SECTION 8. OTHER EVENTS

Item 8.01. Other Events

On February 21, 2012, Buckeye Technologies Inc. issued a press release announcing that its Foley Plant in Perry, Florida, which manufactures specialty wood cellulose and fluff pulp, is returning to normal operation following a power failure and electrical surge that occurred last Friday, February 17. The power failure was triggered by a malfunction in a high voltage electrical line and subsequent transformer failure in its power house. This resulted in the unplanned, complete shutdown of the facility. Power has been fully restored to the facility, and one of the plant's two production lines resumed operation at normal rates on Sunday. Company officials are targeting for the second line to resume normal operation on Wednesday, February 22. A copy of the press release is attached as exhibit 99.1.
