Table of Contents

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrants were required to file such reports), and (2) have been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of *accelerated filer* and *large accelerated filer* in Rule 12b-2 of the Exchange Act. (Check one):

Registrant	Large Accelerated Filer	Accelerated Filer	Non-accelerated Filer
The Southern Company	X		
Alabama Power Company			X
Georgia Power Company			X
Gulf Power Company			X
Mississippi Power Company			X
Southern Power Company			X

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.) Yes No (Response applicable to all registrants.)

Registrant	Description of Common Stock	Shares Outstanding at June 30, 2007
The Southern Company	Par Value \$5 Per Share	756,427,551
Alabama Power Company	Par Value \$40 Per Share	15,750,000
Georgia Power Company	Without Par Value	9,261,500
Gulf Power Company	Without Par Value	1,792,717
Mississippi Power Company	Without Par Value	1,121,000
Southern Power Company	Par Value \$0.01 Per Share	1,000

This combined Form 10-Q is separately filed by The Southern Company, Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Southern Power Company. Information contained herein relating to any individual registrant is filed by such registrant on its own behalf. Each registrant makes no representation as to information relating to the other registrants.

Table of Contents**CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION**

This Quarterly Report on Form 10-Q contains forward-looking statements. Forward-looking statements include, among other things, statements concerning the strategic goals for the wholesale business, retail sales growth, customer growth, storm damage cost recovery and repairs, fuel cost recovery, environmental regulations and expenditures, access to sources of capital, projections for postretirement benefit trust contributions, synthetic fuel investments, financing activities, completion or termination of construction projects, impacts of adoption of new accounting rules, PPA revenues, costs of implementing the IIC settlement with the FERC, and estimated construction and other expenditures. In some cases, forward-looking statements can be identified by terminology such as may, will, could, should, expects, plans, anticipates, believes, estimates, projects, predicts, potential, or continue or terms or other similar terminology. There are various factors that could cause actual results to differ materially from those suggested by the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory change, including legislative and regulatory initiatives regarding deregulation and restructuring of the electric utility industry, implementation of the Energy Policy Act of 2005, environmental laws including regulation of emissions of sulfur, nitrogen, mercury, carbon, soot, or particulate matter and other substances, and also changes in tax and other laws and regulations to which Southern Company and its subsidiaries are subject, as well as changes in application of existing laws and regulations;
- current and future litigation, regulatory investigations, proceedings or inquiries, including the pending EPA civil actions against certain Southern Company subsidiaries, FERC matters, IRS audits, and Mirant matters;
- the effects, extent, and timing of the entry of additional competition in the markets in which Southern Company's subsidiaries operate;
- variations in demand for electricity, including those relating to weather, the general economy and population, and business growth (and declines);
- available sources and costs of fuels;
- ability to control costs;
- investment performance of Southern Company's employee benefit plans;
- advances in technology;
- state and federal rate regulations and the impact of pending and future rate cases and negotiations, including rate actions relating to fuel and storm restoration cost recovery;
- the performance of projects undertaken by the non-utility businesses and the success of efforts to invest in and develop new opportunities;
- fluctuations in the level of oil prices;
- the level of production by the synthetic fuel operations at Carbontronics Synfuels Investors LP and Alabama Fuel Products, LLC for the remainder of fiscal year 2007;
- internal restructuring or other restructuring options that may be pursued;
- potential business strategies, including acquisitions or dispositions of assets or businesses, which cannot be assured to be completed or beneficial to Southern Company or its subsidiaries;
- the ability of counterparties of Southern Company and its subsidiaries to make payments as and when due;
- the ability to obtain new short- and long-term contracts with neighboring utilities;
- the direct or indirect effect on Southern Company's business resulting from terrorist incidents and the threat of terrorist incidents;
- interest rate fluctuations and financial market conditions and the results of financing efforts, including Southern Company's and its subsidiaries' credit ratings;
- the ability of Southern Company and its subsidiaries to obtain additional generating capacity at competitive prices;
- catastrophic events such as fires, earthquakes, explosions, floods, hurricanes, pandemic health events such as an avian influenza, or other similar occurrences;
- the direct or indirect effects on Southern Company's business resulting from incidents similar to the August 2003 power outage in the Northeast;
- the effect of accounting pronouncements issued periodically by standard setting bodies; and

other factors discussed elsewhere herein and in other reports (including the Form 10-K) filed by the registrants from time to time with the SEC.

Each registrant expressly disclaims any obligation to update any forward-looking statements.

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
SECOND QUARTER 2007 vs. SECOND QUARTER 2006
AND
YEAR-TO-DATE 2007 vs. YEAR-TO-DATE 2006

OVERVIEW

Discussion of the results of operations is focused on Southern Company's primary business of electricity sales in the Southeast by the traditional operating companies—Alabama Power, Georgia Power, Gulf Power, and Mississippi Power—and Southern Power. Southern Power is an electric wholesale generation subsidiary with market-based rate authority. Southern Company's other business activities include investments in synthetic fuels and leveraged lease projects, telecommunications, and energy-related services. For additional information on these businesses, see **BUSINESS** The Southern Company System—Traditional operating companies, Southern Power, and Other Businesses in Item 1 of the Form 10-K. For information regarding the synthetic fuel investment, see Note (B) to the Condensed Financial Statements under **INCOME TAX MATTERS** Synthetic Fuel Tax Credits herein.

Southern Company continues to focus on several key performance indicators. These indicators include customer satisfaction, plant availability, system reliability, and earnings per share. For additional information on these indicators, see **MANAGEMENT'S DISCUSSION AND ANALYSIS** OVERVIEW Key Performance Indicators of Southern Company in Item 7 of the Form 10-K.

RESULTS OF OPERATIONS**Net Income**

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$44.0	11.4	\$121.0	18.7

Southern Company's second quarter 2007 earnings were \$429.2 million (\$0.57 per share) compared to \$385.2 million (\$0.52 per share) for second quarter 2006.

Southern Company's year-to-date 2007 earnings were \$767.8 million (\$1.02 per share) compared to \$646.8 million (\$0.87 per share) for year-to-date 2006.

The increases for the second quarter and year-to-date 2007 when compared to the same periods in 2006 resulted primarily from higher revenues due to customer growth in the Southern Company service area, favorable weather as compared to the same periods in 2006, higher tax credits from the synthetic fuel business, and a retail base rate increase at Alabama Power. Sustained economic strength in the Southern Company service area also contributed to the year-to-date 2007 increase in earnings. The second quarter and year-to-date 2007 increases were partially offset by higher maintenance expense, higher interest expense, higher depreciation and amortization, and a decrease in contributions by market-based rates to large commercial and industrial customers when compared to the same period in 2006.

Retail Revenues

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$134.7	4.5	\$407.1	7.5

In the second quarter 2007, retail revenues were \$3.1 billion compared to \$3.0 billion for the same period in 2006. Year-to-date 2007, retail revenues were \$5.8 billion compared to \$5.4 billion for the same period in 2006.

Table of Contents

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Details of the change to retail revenues follow:

	Second Quarter 2007		Year-to-Date 2007	
	(<i>in millions</i>)	(<i>% change</i>)	(<i>in millions</i>)	(<i>% change</i>)
Retail prior year	\$2,970.4		\$5,441.8	
Estimated change in				
Rates and pricing	14.3	0.5	32.1	0.6
Sales growth	12.6	0.4	48.9	0.9
Weather	10.9	0.3	30.7	0.6
Fuel and other cost recovery	96.9	3.3	295.4	5.4
Retail current year	\$3,105.1	4.5%	\$5,848.9	7.5%

Revenues associated with changes in rates and pricing increased for second quarter and year-to-date 2007 when compared to the same periods in 2006 primarily as a result of an increase in base rates at Alabama Power, partially offset by a decrease in contributions by market-based rates to large commercial and industrial customers.

Revenues attributable to changes in sales growth increased for second quarter and year-to-date 2007 when compared to the same periods in 2006 due to a 0.3% and 1.8% increase in retail KWH sales, respectively, resulting from continued customer growth. The number of retail customers increased by 1.6% as of June 2007 compared to June 2006. Sustained economic strength in the Southern Company service area also contributed to the year-to-date 2007 increase.

Revenues resulting from changes in weather increased because of favorable weather for second quarter and year-to-date 2007 compared to the same periods in 2006.

Fuel and other cost recovery revenues increased \$96.9 million in the second quarter of 2007 and \$295.4 million for year-to-date 2007 when compared to the same periods in 2006. Electric rates for the traditional operating companies include provisions to adjust billings for fluctuations in fuel costs, including the energy component of purchased power costs. Under these provisions, fuel revenues generally equal fuel expenses, including the fuel component of purchased power costs, and do not affect net income.

Wholesale Revenues

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
(<i>change in millions</i>)	(<i>% change</i>)	(<i>change in millions</i>)	(<i>% change</i>)
\$47.0	10.7	\$112.8	13.2

In the second quarter 2007, wholesale revenues were \$486.9 million compared to \$439.9 million in the same period in 2006. The increase was primarily a result of a rise in fuel revenues due to a 7.5% increase in the average unit cost of fuel per net KWH generated.

For year-to-date 2007, wholesale revenues were \$967.6 million compared to \$854.8 million for the same period in 2006. The increase was primarily a result of a rise in fuel revenues due to a 10.5% increase in the average unit cost of fuel per net KWH generated.

Short-term opportunity sales also contributed to the increases over the same periods in 2006 due to favorable weather compared to neighboring territories and a favorable price differential between market prices and Southern Company's marginal cost. Short-term opportunity sales are made at market-based rates that generally provide a margin above

Southern Company's variable cost to produce the energy.

Table of Contents

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Other Electric Revenues

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$13.5	11.6	\$23.8	10.5

In the second quarter 2007, other electric revenues were \$129.6 million compared to \$116.1 million in the same period in 2006. The increase was primarily a result of an increase in transmission revenues of \$5.6 million, an increase in revenues of \$3.2 million resulting from increased sales of electricity to co-generation customers due to higher natural gas prices, and an increase in customer fees of \$2.0 million.

For year-to-date 2007, other electric revenues were \$250.9 million compared to \$227.1 million in the same period in 2006. The increase was primarily a result of an increase in transmission revenues of \$12.4 million, an increase in customer fees of \$3.5 million, and an increase in outdoor lighting revenues of \$3.4 million.

Transmission revenues are generally offset by related expenses and do not significantly affect net income.

Fuel and Purchased Power Expenses

	Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
Fuel	\$149.9	11.5	\$417.8	17.7
Purchased power	(38.7)	(27.9)	(79.0)	(32.5)
Total fuel and purchased power expenses	\$111.2		\$338.8	

Fuel and purchased power expenses for the second quarter 2007 were \$1.6 billion compared to \$1.4 billion for the corresponding period in 2006. The increase in fuel and purchased power expenses was due to a \$98.3 million net increase in the average cost of fuel and purchased power as well as a \$12.9 million net increase related to total KWH generated and purchased when compared to the same period in 2006. The net increase in the average cost of fuel and purchased power for the second quarter 2007 compared to the corresponding period in 2006 resulted from rising fossil fuel prices and a 4.5% increase in fossil fuel generation by Southern Company-owned facilities primarily due to a 58.0% decrease in hydro generation from lack of rainfall.

Fuel and purchased power expenses for year-to-date 2007 were \$2.9 billion compared to \$2.6 billion for the corresponding period in 2006. The increase in fuel and purchased power expenses was due to a \$240.4 million net increase in the average cost of fuel and purchased power as well as a \$98.4 million net increase related to total KWH generated and purchased when compared to the same period in 2006. The net increase in the average cost of fuel and purchased power for year-to-date 2007 compared to the corresponding period in 2006 resulted from rising fossil fuel prices and an 8.0% increase in fossil fuel generation by Southern Company-owned facilities primarily due to a 47.4% decrease in hydro generation from lack of rainfall.

Details of Southern Company's cost of generation and purchased power are as follows:

	Second Quarter 2007	Second Quarter 2006	Year-to-Date 2007	Year-to-Date 2006	% change
Average Cost					

Edgar Filing: SOUTHERN CO - Form 10-Q

	<i>(cents per net KWH)</i>		<i>%</i> change	<i>(cents per net KWH)</i>		
Fuel	2.88	2.68	7.5	2.84	2.57	10.5
Purchased power	5.93	6.16	(3.7)	4.95	5.53	(10.5)

15

Table of Contents

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Increases in fuel expense at the traditional operating companies are generally offset by fuel revenues and do not affect net income. See FUTURE EARNINGS POTENTIAL FERC and State PSC Matters Retail Fuel Cost Recovery herein for additional information. Fuel expenses incurred under Southern Power's PPAs are generally the responsibility of the counterparties and do not significantly affect net income.

Maintenance Expense

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$15.7	5.8	\$14.1	2.5

In the second quarter 2007, maintenance expense was \$289.0 million compared to \$273.3 million in the same period in 2006.

For year-to-date 2007, maintenance expense was \$571.0 million compared to \$556.9 million in the same period in 2006.

The second quarter and year-to-date 2007 increases were primarily a result of timing differences related to maintenance performed on power generation facilities and increased costs associated with these maintenance activities.

Depreciation and Amortization

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$12.8	4.3	\$20.1	3.4

In the second quarter 2007, depreciation and amortization was \$310.3 million compared to \$297.5 million in the same period in 2006.

For year-to-date 2007, depreciation and amortization was \$616.6 million compared to \$596.5 million in the same period in 2006.

The second quarter and year-to-date 2007 increases were a result of the acquisitions of Plants DeSoto and Rowan in June and September 2006, respectively, as well as additional investment in environmental projects, primarily at Alabama Power and Georgia Power.

Allowance for Equity Funds Used During Construction

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$13.2	126.9	\$21.9	99.6

In the second quarter 2007, allowance for equity funds used during construction was \$23.6 million compared to \$10.4 million in the same period in 2006.

For year-to-date 2007, allowance for equity funds used during construction was \$43.8 million compared to \$21.9 million in the same period in 2006.

The second quarter and year-to-date 2007 increases were a result of additional investment in environmental projects as well as transmission and distribution projects, primarily at Alabama Power and Georgia Power.

Table of Contents

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Equity in Losses of Unconsolidated Subsidiaries

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$1.3	10.5	\$(24.6)	(54.7)

The second quarter 2007 equity in losses of unconsolidated subsidiaries was \$13.6 million compared to \$12.3 million for the same period in 2006. Southern Company made investments in two synthetic fuel production facilities that generate operating losses. These investments also allow Southern Company to claim federal income tax credits that offset these operating losses and make the projects profitable. The increase in equity in losses of unconsolidated subsidiaries for the second quarter 2007 when compared with the same period in 2006 was primarily the result of higher operating expenses at one of the synthetic fuel entities due to idled production for a portion of the second quarter 2006. The increase was partially offset by the termination of Southern Company's membership interest in the other synthetic fuel entity in 2006 which eliminated the funding obligation and Southern Company's share of losses for the second quarter 2007. See FUTURE EARNINGS POTENTIAL - Income Tax Matters - Synthetic Fuel Tax Credits and Note (B) to the Condensed Financial Statements under INCOME TAX MATTERS - Synthetic Fuel Tax Credits herein for further information.

For year-to-date 2007, equity in losses of unconsolidated subsidiaries was \$20.3 million compared to \$44.9 million for the same period in 2006. The decrease in equity in losses of unconsolidated subsidiaries for year-to-date 2007 when compared with the same period in 2006 was primarily the result of terminating Southern Company's membership interest in one of the synthetic fuel entities in 2006 which eliminated the funding obligation and Southern Company's share of losses for year-to-date 2007, partially offset by higher operating expenses at the other synthetic fuel entity due to idled production for a portion of second quarter 2006.

Leveraged Lease Income

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(7.9)	(44.8)	\$(16.1)	(45.2)

Leveraged lease income for the second quarter 2007 was \$9.7 million compared to \$17.6 million for the corresponding period in 2006.

Leveraged lease income for year-to-date 2007 was \$19.6 million compared to \$35.7 million for the corresponding period in 2006.

Southern Company has several leveraged lease agreements which relate to international and domestic energy generation, distribution, and transportation assets. Southern Company receives federal income tax deductions for depreciation and amortization, as well as interest on long-term debt related to these investments. The adoption of FASB Staff Position No. FAS 13-2 (FSP 13-2), Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction resulted in decreases to leveraged lease pre-tax income of \$6.6 million and \$13.1 million for the second quarter and year-to-date 2007, respectively, when compared to the same periods in 2006. See FUTURE EARNINGS POTENTIAL - Income Tax Matters - Leveraged Lease Transactions and Note (B) to the Condensed Financial Statements under INCOME TAX MATTERS - Leveraged Lease Transactions herein for further information.

Impairment Loss on Equity Method Investments

Edgar Filing: SOUTHERN CO - Form 10-Q

Table of Contents

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Impairment loss on equity method investments for the second quarter and year-to-date 2007 was \$0.0 million compared to \$15.3 million for the corresponding periods in 2006.

The second quarter and year-to-date 2007 decreases were a result of impairment losses of \$15.3 million recognized during the second quarter 2006 related to Southern Company's investments in two synthetic fuel production facilities. See FUTURE EARNINGS POTENTIAL Income Tax Matters Synthetic Fuel Tax Credits and Note (B) to the Condensed Financial Statements under INCOME TAX MATTERS Synthetic Fuel Tax Credits herein for further information.

Interest Expense, Net of Amounts Capitalized

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$19.5	10.8	\$37.2	10.4

Interest expense, net of amounts capitalized for the second quarter 2007 was \$200.2 million compared to \$180.7 million for the corresponding period in 2006. The increase was a result of a \$27.0 million increase associated with \$1.7 billion in additional debt outstanding at June 30, 2007 compared to June 30, 2006 and higher interest rates associated with the issuance of new long-term debt. Also contributing to the increase was \$2.9 million related to an increase in average interest rates on variable rate debt. These increases were partially offset by \$10.5 million associated with capitalized interest and allowance for debt funds used during construction. See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Financing Activities of Southern Company in Item 7 of the Form 10-K and herein for additional information.

Interest expense, net of amounts capitalized for year-to-date 2007 was \$394.3 million compared to \$357.1 million for the corresponding period in 2006. The increase was a result of a \$44.6 million increase associated with \$1.7 billion in additional debt outstanding at June 30, 2007 compared to June 30, 2006 and higher interest rates associated with the issuance of new long-term debt. Also contributing to the increase was \$10.3 million related to an increase associated in average interest rates on variable rate debt. These increases were partially offset by \$17.8 million associated with capitalized interest and allowance for debt funds used during construction.

Interest Expense to Affiliate Trusts

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(8.3)	(27.1)	\$(15.1)	(24.6)

Interest expense to affiliate trusts for the second quarter 2007 was \$22.3 million compared to \$30.6 million for the corresponding period in 2006.

Interest expense to affiliate trusts for year-to-date 2007 was \$46.2 million compared to \$61.3 million for the corresponding period in 2006.

The second quarter and year-to-date 2007 decreases were primarily a result of the redemption of long-term debt payable to affiliated trusts in December 2006.

Other Income (Expense), Net

Table of Contents

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In the second quarter 2007, other income (expense), net was \$(6.0) million compared to \$11.6 million for the same period in 2006 primarily as a result of a \$10.0 million increase in expense due to changes in the value of derivative transactions in the second quarter 2007 and the release of \$6.3 million in certain obligations associated with the termination of Southern Company's membership interest in a synthetic fuel entity in 2006.

For year-to-date 2007, other income (expense), net was \$(8.9) million compared to \$3.2 million for the same period in 2006 primarily as a result of the release of \$6.3 million in certain obligations associated with the termination of Southern Company's membership interest in a synthetic fuel entity in 2006, \$6.2 million related to changes in the value of derivative transactions, and a \$4.9 million decrease in miscellaneous income deductions. Partially offsetting the year-to-date 2007 decrease was Alabama Power's recognition of \$5.0 million associated with the consent decree entered in the NSR litigation in 2006. See Note 3 to the financial statements of Southern Company under Environmental Matters - New Source Review Actions in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under NEW SOURCE REVIEW LITIGATION herein for further information.

Income Taxes

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(15.2)	(6.9)	\$32.5	9.9

Income taxes for the second quarter 2007 were \$205.6 million compared to \$220.8 million for the corresponding period in 2006. The decrease was due primarily to the recognition of state income tax credits by Georgia Power as well as an increase in allowance for equity funds used during construction. See Note (H) to the Condensed Financial Statements under EFFECTIVE TAX RATES herein for further information. Also contributing to the decrease was a \$16.7 million reduction to tax credit reserves for synthetic fuel tax credits in second quarter 2007 compared to the same period in 2006 and an \$11.3 million increase in synthetic fuel tax credits in 2007 due to idled production at one of the synthetic fuel entities for a portion of second quarter 2006. See FUTURE EARNINGS POTENTIAL - Income Tax Matters - Synthetic Fuel Tax Credits and Note (B) to the Condensed Financial Statements under INCOME TAX MATTERS - Synthetic Fuel Tax Credits herein for further information. The decrease in income tax expense was partially offset by higher pre-tax earnings and a \$13.3 million decrease in synthetic fuel tax credits as a result of terminating the membership interest in one of the synthetic fuel entities in 2006.

Income taxes for year-to-date 2007 were \$361.2 million compared to \$328.7 million for the corresponding period in 2006. The increase was due to higher pre-tax earnings and a \$39.5 million decrease in synthetic fuel tax credits as a result of terminating the membership interest in one of the synthetic fuel entities in 2006. The increase in income tax expense was partially offset by an \$11.3 million increase in synthetic fuel tax credits in 2007 due to idled production at the other synthetic fuel entity for a portion of second quarter 2006 and a \$34.0 million reduction to synthetic tax credit reserves for year-to-date 2007 compared to the same period in 2006. The increase in income tax expense was also partially offset by the recognition of state income tax credits by Georgia Power during the second quarter 2007 as well as an increase in allowance for equity funds used during construction.

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Southern Company's future earnings potential. The level of Southern Company's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of Southern Company's primary business of selling electricity. These factors include the traditional operating companies' ability to maintain a stable regulatory environment that continues to allow for the recovery of all prudently incurred costs during a time of increasing costs. Another

Table of Contents

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

major factor is the profitability of the competitive market-based wholesale generating business and federal regulatory policy, which may impact Southern Company's level of participation in this market. Future earnings for the electricity business in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in the service area. For additional information relating to these issues, see RISK FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL of Southern Company in Item 7 of the Form 10-K.

Environmental Matters

Compliance costs related to the Clean Air Act and other environmental regulations could affect earnings if such costs cannot be fully recovered in rates on a timely basis. See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Environmental Matters of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under Environmental Matters in Item 8 of the Form 10-K for additional information.

New Source Review Litigation

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Environmental Matters - New Source Review Actions of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under Environmental Matters - New Source Review Actions in Item 8 of the Form 10-K for additional information regarding a civil action brought by the EPA alleging that Alabama Power had violated the NSR provisions of the Clean Air Act and related state laws with respect to certain of its coal-fired generating facilities. The plaintiffs' appeal against Alabama Power was stayed by the U.S. Court of Appeals for the Eleventh Circuit pending the U.S. Supreme Court's decision in a similar case against Duke Energy. On April 2, 2007, the U.S. Supreme Court issued an opinion in the Duke Energy case. On April 26, 2007, the plaintiffs filed a motion to vacate and remand the U.S. District Court for the Northern District of Alabama's decision in the Alabama Power case based on the Supreme Court's decision in Duke Energy. On June 7, 2007, the Eleventh Circuit declined the plaintiffs' request and instead issued a brief stay of appeal to allow the plaintiffs to file a motion for relief from judgment with the District Court in light of the Supreme Court's decision in Duke Energy. On July 23, 2007, the plaintiffs filed such a motion. If the District Court grants the motion, the Eleventh Circuit will remand the case back to the District Court for further proceedings. If the motion is denied, the Eleventh Circuit will retain jurisdiction over the case and the appeal will move forward. The final resolution of these claims is dependent on these appeals and possible further court action and, therefore, cannot be determined at this time.

Eight-Hour Ozone Regulations

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Environmental Matters - Environmental Statutes and Regulations - Air Quality of Southern Company in Item 7 of the Form 10-K for additional information regarding revisions to the eight-hour ozone air quality standard. On June 20, 2007, the EPA proposed additional revisions to the current eight-hour ozone standard which, if enacted, could result in designation of new nonattainment areas within Southern Company's service territory. The EPA has requested comment and is expected to make a determination regarding finalization of a revised standard in 2008. The ultimate outcome of this matter cannot be determined at this time.

Fine Particulate Matter Regulations

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Environmental Matters - Environmental Statutes and Regulations - Air Quality of Southern Company in Item

Table of Contents

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

7 of the Form 10-K for additional information regarding nonattainment designations for the fine particulate matter air quality standard. In March 2007, the EPA finalized its fine particulate matter implementation rule, requiring submittal of state plans for addressing the nonattainment designations by April 2008. The ultimate outcome of this matter depends on the development and submittal of those state plans and the resolution of pending legal challenges and, therefore, cannot be determined at this time.

Georgia Multi-Pollutant Rule

On June 27, 2007, the State of Georgia approved a new multi-pollutant rule for certain existing coal-fired electric utility steam generating units in Georgia. The rule is designed to reduce emissions of mercury, sulfur dioxide, nitrogen oxide, and fine particulates state-wide by requiring installation of specified control technologies at each affected unit by a date certain between December 31, 2008 and June 1, 2015. This rule will require the installation of controls on the majority of Georgia Power's coal-fired units. See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Environmental Matters - Environmental Statutes and Regulations - General in Item 7 of the Form 10-K for a discussion of estimated compliance costs for 2007 through 2009. If compliance costs cannot be fully recovered in rates on a timely basis, Southern Company's financial statements would be adversely impacted. See FERC and State PSC Matters - Georgia Power Retail Base Rate Recovery for information on Georgia Power's request to increase retail rates effective January 1, 2008.

Plant Wansley Environmental Litigation

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Environmental Matters - Plant Wansley Environmental Litigation of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under Environmental Matters - Plant Wansley Environmental Litigation in Item 8 of the Form 10-K for additional information on litigation involving alleged violations of the Clean Air Act at four of the units at Plant Wansley. On June 18, 2007, the U.S. District Court for the Northern District of Georgia approved a settlement between the parties resolving all remaining issues and dismissed the case. There was no material impact on Southern Company's financial statements.

Florida Greenhouse Gas Executive Orders

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Environmental Matters - Global Climate Issues of Southern Company in Item 7 of the Form 10-K for additional information regarding domestic efforts to reduce greenhouse gases. On July 13, 2007, the Governor of the State of Florida signed three executive orders addressing reduction of greenhouse gas emissions within the state, including statewide emission reduction targets beginning in 2017. Included in the orders is a directive to the Secretary of Environmental Protection to develop rules adopting maximum allowable emissions levels of greenhouse gases for electric utilities, consistent with the statewide emission reduction targets, and a request to the Florida PSC to initiate rulemaking requiring utilities to produce at least 20% of their electricity from renewable sources. The impact of these orders on Southern Company will depend on the development, adoption, and implementation of any rules governing greenhouse gas emissions, and the ultimate outcome cannot be determined at this time.

FERC and State PSC Matters*Market-Based Rate Authority*

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - FERC Matters - Market-Based Rate Authority of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under FERC Matters - Market-Based Rate Authority in Item 8 of the

Table of Contents

**THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Form 10-K for information regarding the proceedings initiated by the FERC in December 2004 to assess Southern Company's generation dominance within its retail service territory and in May 2005 to determine whether Southern Company satisfies the other three parts of the FERC's market-based rate analysis: transmission market power, barriers to entry, and affiliate abuse or reciprocal dealing.

In late June and July 2007, hearings were held in the December 2004 proceeding and Southern Company anticipates a decision in November 2007. On June 21, 2007, the FERC issued an order terminating the May 2005 proceeding, based upon its final approval of the settlement in the IIC proceeding discussed below.

In addition, on June 21, 2007, the FERC issued its final rule regarding market-based rate authority. The FERC generally retained its current market-based rate standards. The impact of this order and its effect on the generation dominance proceeding cannot now be determined.

Intercompany Interchange Contract

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - FERC Matters Intercompany Interchange Contract of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under FERC Matters Intercompany Interchange Contract in Item 8 of the Form 10-K for information regarding the proceeding initiated by the FERC in May 2005 to examine (1) the provisions of the IIC among Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Power, and SCS, as agent, under the terms of which the Power Pool is operated, and, in particular, the propriety of the continued inclusion of Southern Power as a party to the IIC, (2) whether any parties to the IIC have violated the FERC's standards of conduct applicable to utility companies that are transmission providers, and (3) whether Southern Company's code of conduct defining Southern Power as a system company rather than a marketing affiliate is just and reasonable.

On April 19, 2007, the FERC approved, with certain modifications, the compliance filing submitted by Southern Company on November 6, 2006. The compliance plan largely involves functional separation and information restrictions related to marketing activities conducted on behalf of Southern Power. Implementation of the plan is not expected to have a material impact on Southern Company's financial statements.

Retail Fuel Cost Recovery

The traditional operating companies each have established fuel cost recovery rates approved by their respective state PSCs. Over the past several years, the traditional operating companies have experienced higher than expected fuel costs for coal, natural gas, and uranium. These higher fuel costs have resulted in under recovered fuel costs included in the balance sheets of approximately \$1.3 billion at June 30, 2007. Gulf Power and Mississippi Power were granted increased fuel billing factors effective January 1, 2007. Georgia Power was granted an increase effective March 2007. Alabama Power was ordered to increase its fuel billing factor effective July 2007. Operating revenues are adjusted for differences in actual recoverable fuel costs and amounts billed in current regulated rates. Accordingly, changes to the billing factors will have no significant effect on Southern Company's revenues or net income but will affect cash flow. The traditional operating companies will continue to monitor the under recovered fuel cost balance in light of these higher fuel costs. See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - PSC Matters Fuel Cost Recovery of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under Alabama Power Retail Regulatory Matters and Georgia Power Retail Regulatory Matters in Item 8 of the Form 10-K for additional information.

Table of Contents

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Georgia Power Retail Base Rate Filing

On June 29, 2007, Georgia Power filed a request to increase retail base rates with the Georgia PSC. The request includes an increase effective January 1, 2008 of approximately \$406.7 million, or 5.98%, in retail revenues, based on a future test year ending July 31, 2008 and a proposed retail return on common equity of 12.5%. The majority of the increase in retail revenues is being requested to cover the costs of environmental compliance and continued investment in new generation, transmission, and distribution facilities to support growth and ensure reliability. The remainder of the increase would include recovery of higher operation, maintenance, and other investment costs to meet the rising demand for electricity.

Georgia Power is currently operating under a three-year retail rate order that expires December 31, 2007. Under the terms of the existing order, earnings are evaluated annually against a retail return on common equity range of 10.25% to 12.25%. Two-thirds of any earnings above the 12.25% return are applied to rate refunds, with the remaining one-third retained by Georgia Power. The order required Georgia Power to file a general rate case by July 1, 2007. Georgia Power expects the Georgia PSC to issue a final order in this matter on December 20, 2007. In addition to the traditional test period request, Georgia Power filed information for a three-year rate plan option that includes additional increases of approximately \$191 million, or 2.65%, and \$45 million, or 0.61%, in retail revenues effective January 1, 2009 and 2010, respectively, to cover the costs of additional environmental controls and certified PPAs. The final outcome of this matter cannot now be determined. See MANAGEMENT'S DISCUSSION AND ANALYSIS RESULTS OF OPERATIONS Future Earnings Potential PSC Matters Georgia Power of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under Georgia Power Retail Regulatory Matters in Item 8 of the Form 10-K and Note (K) to the Condensed Financial Statements herein for additional information.

Mississippi Power Storm Damage Cost Recovery

See Note 3 to the financial statements of Southern Company under PSC Matters Storm Damage Cost Recovery in Item 8 of the Form 10-K for information regarding storm restoration costs in connection with Hurricane Katrina and a financing order issued by the Mississippi PSC that authorized the issuance of \$121.2 million of storm restoration bonds under a state bond program. The storm restoration bonds were issued by the Mississippi Development Bank on June 1, 2007 on behalf of the State of Mississippi. On June 1, 2007, Mississippi Power received a grant payment of \$85.2 million from the State of Mississippi representing recovery of \$25.2 million in retail storm restoration costs incurred or to be incurred and \$60.0 million to increase Mississippi Power's property damage reserve. Mississippi Power will receive the remaining bond proceeds as expenditures are incurred to construct a new storm operations center. See Note (D) to the Condensed Financial statements herein for additional information.

Mirant Matters

Mirant was an energy company with businesses that included independent power projects and energy trading and risk management companies in the U.S. and selected other countries. It was a wholly-owned subsidiary of Southern Company until its initial public offering in October 2000. In April 2001, Southern Company completed a spin-off to its shareholders of its remaining ownership, and Mirant became an independent corporate entity. In July 2003, Mirant filed for voluntary reorganization under Chapter 11 of the U.S. Bankruptcy Code. See Note 3 to the financial statements of Southern Company under Mirant Matters Mirant Bankruptcy in Item 8 of the Form 10-K for information regarding Southern Company's contingent liabilities associated with Mirant, including guarantees of contractual commitments, litigation, and joint and several liabilities in connection with the consolidated federal income tax return.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

MC Asset Recovery Litigation

See Note 3 to the financial statements of Southern Company under **Mirant Matters** **MC Asset Recovery Litigation** in Item 8 of the Form 10-K for information regarding a suit between MC Asset Recovery, a special purpose subsidiary of Reorganized Mirant, and Southern Company. On March 28, 2007, MC Asset Recovery filed a Fourth Amended Complaint. Among other things, the Fourth Amended Complaint adds a claim under the Federal Debt Collection Procedure Act (FDCPA) to avoid certain transfers from Mirant to Southern Company and withdraws the breach of fiduciary duty claim the court struck as a result of Southern Company's motion for summary judgment. MC Asset Recovery claims to have standing to assert violations of the FDCPA and to recover property on behalf of the Mirant debtors' estates. The ultimate outcome of this matter cannot be determined at this time.

Mirant Securities Litigation

See Note 3 to the financial statements of Southern Company under **Mirant Matters** **Mirant Securities Litigation** in Item 8 of the Form 10-K for information regarding a class action lawsuit that several Mirant shareholders (plaintiffs) originally filed against Mirant and certain Mirant officers in May 2002. In November 2002, Southern Company, certain former and current senior officers of Southern Company, and 12 underwriters of Mirant's initial public offering were added as defendants. On March 24, 2006, the plaintiffs filed a motion for reconsideration requesting that the court vacate that portion of its July 14, 2003 order dismissing the plaintiffs' claims based upon Mirant's alleged improper energy trading and marketing activities involving the California energy market. On March 6, 2007, the court granted plaintiffs' motion for reconsideration, reinstated the California energy market claims, and granted in part and denied in part defendants' motion to compel certain class certification discovery. On March 21, 2007, defendants filed renewed motions to dismiss the California energy claims on grounds originally set forth in their 2003 motions to dismiss, but which were not addressed by the court. The ultimate outcome of this matter cannot be determined at this time.

Southern Company Employee Savings Plan Litigation

See Note 3 to the financial statements of Southern Company under **Mirant Matters** **Southern Company Employee Savings Plan Litigation** in Item 8 of the Form 10-K for information related to the pending settlement of a class action complaint filed under ERISA in June 2004, and amended in December 2004 and November 2005, on behalf of a purported class of participants in or beneficiaries of The Southern Company Employee Savings Plan at any time since April 2, 2001 and whose plan accounts included investments in Mirant common stock. On June 12, 2007, the U.S. District Court for the Northern District of Georgia issued a preliminary approval of the December 2006 settlement agreement and set a fairness hearing for August 2007. If approved, there will be no material impact on the financial statements of Southern Company. Pending final settlement approval, the ultimate outcome of this matter cannot now be determined.

Income Tax Matters*Leveraged Lease Transactions*

See **MANAGEMENT'S DISCUSSION AND ANALYSIS** **FUTURE EARNINGS POTENTIAL** **Income Tax Matters** **Leveraged Lease Transactions** of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under **Income Tax Matters** in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under **INCOME TAX MATTERS** **Leveraged Lease Transactions** herein for information regarding IRS challenges to Southern Company's transactions related to international leveraged leases that could have material impacts on Southern Company's financial statements. Effective January 1, 2007, Southern Company adopted FSP 13-2, which amends FASB Statement No. 13, **Accounting for Leases** requiring recalculation of the rate of return and the allocation of income whenever the projected timing of the

Table of Contents

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

income tax cash flows generated by a leveraged lease is revised with recognition of the resulting gain or loss in the year of the revision. FSP 13-2 also requires that all recognized tax positions in a leveraged lease must be measured in accordance with the criteria in FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes, and any changes resulting from FIN 48 must be reflected as a change in important lease assumptions as of the date of adoption. The cumulative effect of initially adopting FSP 13-2 was recorded as an adjustment to beginning retained earnings. For the lease-in-lease-out (LILO) transaction settled with the IRS in February 2005, the cumulative effect of adopting FSP 13-2 was a \$17 million reduction in retained earnings. With respect to Southern Company's sale-in-lease-out (SILO) transactions, the adoption of FSP 13-2 reduced retained earnings by \$108 million and the adoption of FIN 48 reduced beginning retained earnings by an additional \$15 million. The adjustments to retained earnings are non-cash charges and will be recognized as income over the remaining terms of the affected leases. Any future changes in the projected or actual income tax cash flows will result in an additional recalculation of the net investment in the leases and will be recorded currently in income. The ultimate impact on Southern Company's net income will be dependent on the outcome of pending litigation, but could be significant, and potentially material. Southern Company believes these transactions are valid leases for U.S. tax purposes and the related deductions are allowable. Southern Company is continuing to pursue resolution of these matters through administrative appeals and litigation; however, the ultimate outcome of these matters cannot now be determined.

Synthetic Fuel Tax Credits

As discussed in MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Income Tax Matters Synthetic Fuel Tax Credits of Southern Company in Item 7 of the Form 10-K, Southern Company has an investment in an entity that produces synthetic fuel and receives tax credits under Section 45K (formerly Section 29) of the IRC. In accordance with Section 45K of the IRC, these tax credits are subject to limitation as the annual average price of oil (as determined by the DOE) increases over a specified, inflation-adjusted dollar amount published in the spring of the subsequent year. Southern Company, along with its partners in this investment, has continued to monitor oil prices. Reserves against tax credits earned in 2007 of \$7.3 million have been recorded in the first six months of 2007 due to projected phase-outs of the credits in 2007 as a result of current and projected future oil prices.

Construction Projects*Integrated Gasification Combined Cycle (IGCC) Project*

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Construction Projects Integrated Gasification Combined Cycle of Southern Company in Item 7 of the Form 10-K for information regarding the development by Southern Power and the Orlando Utilities Commission (OUC) of an IGCC project in Orlando, Florida at OUC's Stanton Energy site. Since the definitive agreements relating to the development of the project were executed in December 2005, the estimated costs of the gasifier portion have increased due primarily to increases in commodity costs and increased market demand for labor. Southern Power had the option under the original agreements to end its participation in the gasifier portion of the project at the end of the project definition phase, which has been completed. On March 29, 2007, Southern Power's Board of Directors approved the continuation and the completion of the design, engineering, and construction of the gasifier portion of the project. Southern Power and OUC will share 65% and 35% of the estimated cost increase, respectively, under the proposed amended agreements. In April 2007, OUC approved its portion of the cost increase, subject to the DOE's approval of the additional funding. On May 8, 2007, SCS, as agent for Southern Power, and the DOE entered into an amendment to the February 2006 cooperative agreement to increase the DOE's funding for the gasifier portion of the project by \$58.75 million.

FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Nuclear

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Construction Projects - Nuclear of Southern Company in Item 7 of the Form 10-K for information regarding a development agreement between Southern Nuclear and Duke Energy to evaluate the potential construction of a new two-unit nuclear plant at a jointly owned site in Cherokee County, South Carolina. In March 2007, the Southern Nuclear Board of Directors voted to withdraw from any further development of this project and a notice of withdrawal from the project was provided to Duke Energy. Adjustments to the carrying value of the related assets were recorded in the first quarter 2007 and were not material to the financial statements. During the second quarter 2007, Duke Energy chose to independently continue with the project and purchased Southern Company's interest in the project with no material effect on Southern Company's financial statements. This matter is now concluded.

Other Matters

Southern Company is subject to certain claims and legal actions arising in the ordinary course of business. In addition, Southern Company's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental requirements such as opacity and air quality standards, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such pending or potential litigation against Southern Company and its subsidiaries cannot be predicted at this time; however, for current proceedings not specifically reported herein or in Note 3 to the financial statements of Southern Company in Item 8 of the Form 10-K, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on Southern Company's financial statements.

See the Notes to the Condensed Financial Statements herein for discussion of various other contingencies, regulatory matters, and other matters being litigated which may affect future earnings potential.

ACCOUNTING POLICIES

Application of Critical Accounting Policies and Estimates

Southern Company prepares its consolidated financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements of Southern Company in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Southern Company's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. See MANAGEMENT'S DISCUSSION AND ANALYSIS - ACCOUNTING POLICIES -

Application of Critical Accounting Policies and Estimates of Southern Company in Item 7 of the Form 10-K for a complete discussion of Southern Company's critical accounting policies and estimates related to Electric Utility Regulation, Contingent Obligations, and Unbilled Revenues.

New Accounting Standards

Income Taxes

On January 1, 2007, Southern Company adopted FIN 48, which requires companies to determine whether it is more likely than not that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. It also provides guidance

Table of Contents

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

on the recognition, measurement, and classification of income tax uncertainties, along with any related interest and penalties. The provisions of FIN 48 were applied to all tax positions beginning January 1, 2007. The impact on Southern Company's financial statements was a reduction to beginning 2007 retained earnings of approximately \$15 million related to Southern Company's SILO transactions. See Note (I) to the Condensed Financial Statements herein for details regarding the financial statement impact of the adoption.

Leveraged Leases

Effective January 1, 2007, Southern Company adopted FSP 13-2. The cumulative effect of initially adopting FSP 13-2 was recorded as an adjustment to beginning retained earnings. For the LIFO transaction settled with the IRS in February 2005, the cumulative effect of adopting FSP 13-2 was a \$17 million reduction in retained earnings. With respect to Southern Company's SILO transactions, the adoption of FSP 13-2 reduced retained earnings by \$108 million. The adjustments to retained earnings are non-cash charges and will be recognized as income over the remaining terms of the affected leases. Any future changes in the projected or actual income tax cash flows will result in an additional recalculation of the net investment in the leases and will be recorded currently in income. See FUTURE EARNINGS POTENTIAL - Income Tax Matters - Leveraged Lease Transactions and Note (B) to the Condensed Financial Statements under INCOME TAX MATTERS - Leveraged Lease Transactions herein for further details about the effect of FSP 13-2.

Fair Value Measurement

The FASB issued FASB Statement No. 157 (SFAS No. 157), Fair Value Measurements in September 2006. This standard provides guidance on how to measure fair value where it is permitted or required under other accounting pronouncements. SFAS No. 157 also requires additional disclosures about fair value measurements. Southern Company plans to adopt SFAS No. 157 on January 1, 2008 and is currently assessing the impact of this standard.

Fair Value Option

In February 2007, the FASB issued FASB Statement No. 159 (SFAS No. 159), Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115. This standard permits an entity to choose to measure many financial instruments and certain other items at fair value. Southern Company plans to adopt SFAS No. 159 on January 1, 2008 and is currently assessing its impact.

FINANCIAL CONDITION AND LIQUIDITY**Overview**

Southern Company's financial condition and liquidity position remained stable at June 30, 2007. Net cash provided from operating activities totaled \$974 million for the first six months of 2007, compared to \$744 million for the corresponding period in 2006. The \$230 million increase is primarily due to the increase in net income as previously discussed and a reduction in the outflow of cash for accounts payable, primarily related to gas purchases. Net cash used for investing activities totaled \$1.7 billion primarily due to gross property additions to utility plant of \$1.6 billion. Net cash provided from financing activities totaled \$710 million for the first six months of 2007, compared to \$478 million for the corresponding period in 2006. The increase was primarily the result of additional common stock and long-term debt issuances.

Significant balance sheet changes for the first six months of the year include a \$1.5 billion increase in long-term debt, which was used primarily for the repayment of short-term debt, redemptions of long-term debt payable to affiliated trusts, construction expenditures, and general corporate purposes. Total property, plant, and equipment, net of depreciation, increased \$930 million during the first six months of 2007 primarily from the purchase and installation of environmental equipment and transmission and distribution construction.

Table of Contents

THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The market price of Southern Company's common stock at June 30, 2007 was \$34.29 per share (based on the closing price as reported on the New York Stock Exchange) and the book value was \$15.59 per share, representing a market-to-book ratio of 220%, compared to \$36.86, \$15.24, and 242%, respectively, at the end of 2006. The dividend for the second quarter 2007 was \$0.4025 per share compared to \$0.3875 per share in the second quarter 2006.

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Capital Requirements and Contractual Obligations of Southern Company in Item 7 of the Form 10-K for a description of Southern Company's capital requirements for its construction program and other funding requirements associated with scheduled maturities of long-term debt, as well as the related interest, preferred and preference stock dividends, leases, trust funding requirements, and other purchase commitments. Approximately \$1.3 billion will be required by June 30, 2008 for redemptions and maturities of long-term debt.

Sources of Capital

Southern Company intends to meet its future capital needs through internal cash flow and external security issuances. Equity capital can be provided from any combination of Southern Company's stock plans, private placements, or public offerings. The amount and timing of additional equity capital to be raised will be contingent on Southern Company's investment opportunities. Southern Company does not currently anticipate any equity offerings in 2007 outside of its existing stock option plan, the employee savings plan, and the Southern Investment Plan. The traditional operating companies and Southern Power plan to obtain the funds required for construction and other purposes from sources similar to those used in the past, which were primarily from operating cash flows, security issuances, term loans, short-term borrowings, and equity contributions from Southern Company. However, the amount, type, and timing of any financings, if needed, will depend upon prevailing market conditions, regulatory approval, and other factors. See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Sources of Capital of Southern Company in Item 7 of the Form 10-K for additional information.

Southern Company's current liabilities frequently exceed current assets because of the continued use of short-term debt as a funding source to meet scheduled maturities of long-term debt as well as cash needs which can fluctuate significantly due to the seasonality of the business. To meet short-term cash needs and contingencies, Southern Company has substantial cash flow from operating activities and access to capital markets, including commercial paper programs. At June 30, 2007, Southern Company and its subsidiaries had approximately \$168.8 million of cash and cash equivalents, \$96.0 million of restricted cash related to the sale of pollution control bonds which may be used only for future project costs, and approximately \$3.4 billion of unused credit arrangements with banks, of which \$426 million expire in 2007 and \$2.9 billion expire in 2008 and beyond. Approximately \$79 million of the credit facilities expiring in 2007 and 2008 allow for the execution of term loans for an additional two-year period, and approximately \$343 million contain provisions allowing one-year term loans. Subsequent to June 30, 2007, Southern Company and certain of its subsidiaries extended the final maturity of \$2.4 billion of their facilities from 2011 to 2012 and Southern Company entered into a five-year \$500 million credit facility that replaced a \$250 million agreement. See Note 6 to the financial statements of Southern Company under Bank Credit Arrangements in Item 8 of the Form 10-K for additional information. The traditional operating companies may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper and extendible commercial notes at the request and for the benefit of each of the traditional operating companies. At June 30, 2007, the Southern Company system had outstanding commercial paper of \$1.2 billion, bank notes of \$150 million, and extendible commercial notes of \$107 million. Management believes that the need for working capital can be adequately met by utilizing commercial paper programs and lines of credit without maintaining large cash balances.

FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Off-Balance Sheet Financing Arrangements

See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY

Off-Balance Sheet Financing Arrangements of Southern Company in Item 7 and Note 7 to the financial statements of Southern Company under Operating Leases in Item 8 of the Form 10-K for information related to Mississippi Power's lease of a combined cycle generating facility at Plant Daniel.

Credit Rating Risk

Southern Company does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change to BBB and Baa2, or BBB- or Baa3 or below. These contracts are primarily for physical electricity purchases and sales. At June 30, 2007, the maximum potential collateral requirements at a BBB and Baa2 rating were approximately \$9 million and at a BBB- or Baa3 rating were approximately \$281 million. The maximum potential collateral requirements at a rating below BBB- or Baa3 were approximately \$909 million. Subsequent to June 30, 2007, Southern Power entered into a contract for electric capacity and energy. This contract also contains a provision that could require collateral, but not accelerated payment, in the event of a change in credit rating of Southern Power. Under this agreement, the additional potential collateral requirement at a rating below BBB- or Baa3 is \$1.5 million. Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. Southern Company's operating subsidiaries are also party to certain agreements that could require collateral and/or accelerated payment in the event of a credit rating change to below investment grade for Alabama Power and/or Georgia Power. These agreements are primarily for natural gas and power price risk management activities. At June 30, 2007, Southern Company's total exposure to these types of agreements was \$34 million. Subsequent to June 30, 2007, certain Southern Company subsidiaries entered into additional agreements which could increase this exposure. The increase in exposure, if any, is currently \$8 million.

Market Price Risk

Southern Company's market risk exposures relative to interest rate changes have not changed materially compared with the December 31, 2006 reporting period. In addition, Southern Company is not aware of any facts or circumstances that would significantly affect such exposures in the near term.

Due to cost-based rate regulations, the traditional operating companies have limited exposure to market volatility in interest rates, commodity fuel prices, and prices of electricity. In addition, Southern Power's exposure to market volatility in commodity fuel prices and prices of electricity is limited because its long-term sales contracts shift substantially all fuel cost responsibility to the purchaser. To mitigate residual risks relative to movements in electricity prices, the traditional operating companies and Southern Power enter into physical fixed-price contracts for the purchase and sale of electricity through the wholesale electricity market and, to a lesser extent, into financial hedge contracts for natural gas purchases. The traditional operating companies have implemented fuel-hedging programs at the instruction of their respective state PSCs.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The fair value of derivative energy contracts at June 30, 2007 was as follows:

	Second Quarter 2007 Changes	Year-to-Date 2007 Changes
	Fair Value (in millions)	
Contracts beginning of period	\$ 11	\$ (82)
Contracts realized or settled	2	30
New contracts at inception		
Changes in valuation techniques		
Current period changes (a)	(45)	20
Contracts at June 30, 2007	\$(32)	\$ (32)

(a) Current period changes also include the changes in fair value of new contracts entered into during the period, if any.

	Source of June 30, 2007 Valuation Prices		
	Total Fair Value	Maturity	
		Year 1	1-3 Years
	(in millions)		
Actively quoted	\$(36)	\$(47)	\$ 11
External sources	4	4	
Models and other methods			
Contracts at June 30, 2007	\$(32)	\$(43)	\$ 11

Unrealized gains and losses from mark-to-market adjustments on derivative contracts related to the traditional operating companies' fuel hedging programs are recorded as regulatory assets and liabilities. Realized gains and losses from these programs are included in fuel expense and are recovered through the traditional operating companies' fuel cost recovery clauses. In addition, unrealized gains and losses on energy-related derivatives used by Southern Power to hedge anticipated purchases and sales are deferred in other comprehensive income. Gains and losses on derivative contracts that are not designated as hedges are recognized in the statements of income as incurred.

At June 30, 2007, the fair value gain/(loss) of derivative energy contracts was reflected in the financial statements as follows:

	Amounts <i>(in millions)</i>
Regulatory assets, net	\$(36.2)
Accumulated other comprehensive income	2.2
Net income	1.8
 Total fair value	 \$(32.2)

Unrealized pre-tax gains recognized in income for the three months and six months ended June 30, 2007 for derivative energy contracts that are not hedges were \$1.7 million and \$1.5 million, respectively.

To reduce Southern Company's exposure to changes in the value of synthetic fuel tax credits, which are impacted by changes in oil prices, Southern Company has entered into derivative transactions indexed to oil prices. Because these transactions are not designated as hedges, the gains and losses are recognized in the statements of income as incurred. For the three months and six months ended June 30, 2007, the fair value losses recognized in income to mark the transactions to market were \$6.5 million and \$0.2 million, respectively.

**THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

For additional information, see MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Market Price Risk of Southern Company in Item 7 and Notes 1 and 6 to the financial statements of Southern Company under Financial Instruments in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements herein.

Financing Activities

In the first six months of 2007, Southern Company and its subsidiaries issued \$2.3 billion of senior notes, incurred obligations related to the issuance of \$246.5 million of pollution control revenue bonds, and issued \$312 million of common stock, including treasury stock, through employee, director, and other stock plans. The proceeds were primarily used to repay short-term indebtedness, to redeem higher cost securities, and to fund ongoing construction projects. See Southern Company's Condensed Consolidated Statements of Cash Flows herein for further details on financing activities during the first six months of 2007. Southern Company and its subsidiaries also terminated interest rate derivatives related to these transactions at a gain of \$7.9 million. These gains were deferred in other comprehensive income and will be amortized to income over a 10-year period. During the first six months of 2007, Southern Company and its subsidiaries redeemed or paid at maturity \$1.1 billion in senior notes and other long-term debt.

Subsequent to June 30, 2007, Southern Company Capital Funding, Inc. redeemed \$205.7 million of long-term debt payable to affiliated trusts. Also subsequent to June 30, 2007, Georgia Power issued \$300 million in senior notes and terminated related interest rate derivatives at a gain of \$5.7 million. The gain will be amortized over a 30-year period, reflecting the original hedge period. Proceeds from the issuance were used to repay a portion of its outstanding short-term indebtedness. In addition, Georgia Power borrowed \$300 million under a short-term credit agreement that matures in September 2007, the proceeds of which were used to repay Georgia Power's \$300 million senior notes at maturity on July 15, 2007. In addition, Georgia Power repaid a \$150 million bank loan on August 1, 2007.

During the first six months of 2007, Southern Company and its subsidiaries entered into additional derivative transactions designed to hedge interest rate risk of future debt issuances. See Note (F) to the Condensed Financial Statements herein for further details.

In addition to any financings that may be necessary to meet capital requirements and contractual obligations, Southern Company and its subsidiaries plan to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

PART I

Item 3. Quantitative And Qualitative Disclosures About Market Risk.

See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Market Price Risk herein for each registrant and Notes 1 and 6 to the financial statements of Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and Southern Power under Financial Instruments in Item 8 of the Form 10-K. Also, see Note (F) to the Condensed Financial Statements herein for information relating to derivative instruments.

Item 4. Controls and Procedures.

(a) Evaluation of disclosure controls and procedures.

As of the end of the period covered by this quarterly report, Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and Southern Power conducted separate evaluations under the supervision and with the participation of each company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the disclosure controls and procedures (as defined in Sections 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934). Based upon these evaluations, the Chief Executive Officer and the Chief Financial Officer, in each case, concluded that the disclosure controls and procedures are effective in alerting them in a timely manner to information relating to their company (including its consolidated subsidiaries, if any) required to be included in periodic filings with the SEC.

(b) Changes in internal controls.

There have been no changes in Southern Company's, Alabama Power's, Georgia Power's, Gulf Power's, Mississippi Power's, or Southern Power's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) during the second quarter of 2007 that have materially affected or are reasonably likely to materially affect Southern Company's, Alabama Power's, Georgia Power's, Gulf Power's, Mississippi Power's, or Southern Power's internal control over financial reporting.

Table of Contents

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
SECOND QUARTER 2007 vs. SECOND QUARTER 2006
AND
YEAR-TO-DATE 2007 vs. YEAR-TO-DATE 2006

OVERVIEW

Alabama Power operates as a vertically integrated utility providing electricity to retail customers within its traditional service area located within the State of Alabama and to wholesale customers in the Southeast. Many factors affect the opportunities, challenges, and risks of Alabama Power's primary business of selling electricity. These factors include the ability to maintain a stable regulatory environment, to achieve energy sales growth, and to effectively manage and secure timely recovery of rising costs. These costs include those related to growing demand, increasingly stringent environmental standards, fuel prices, and restoration following major storms.

Alabama Power continues to focus on several key performance indicators. These indicators include customer satisfaction, plant availability, system reliability, and net income. For additional information on these indicators, see MANAGEMENT'S DISCUSSION AND ANALYSIS OVERVIEW Key Performance Indicators of Alabama Power in Item 7 of the Form 10-K.

RESULTS OF OPERATIONS**Net Income**

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$29.1	24.6	\$61.9	30.9

Alabama Power's net income after dividends on preferred and preference stock for the second quarter 2007 was \$147.2 million compared to \$118.1 million for the corresponding period of 2006. Net income after dividends on preferred and preference stock for year-to-date 2007 was \$262.1 million compared to \$200.2 million for the corresponding period of 2006. The increases in earnings for the second quarter and year-to-date 2007 were primarily due to retail base rate revenue increases resulting from an increase in rates under Rate RSE and Rate CNP for environmental costs (Rate CNP Environmental) that took effect January 1, 2007, as well as favorable weather conditions. See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL PSC Matters Retail Rate Adjustments of Alabama Power in Item 7 and Note 3 to the financial statements of Alabama Power under Retail Regulatory Matters in Item 8 of the Form 10-K for additional information on Alabama Power's rates. The increases in revenues for the second quarter and year-to-date 2007 were partially offset by increases in other operations expense mainly related to steam power and other power supply expense, depreciation and amortization expense as a result of additional plant-in-service, taxes other than income taxes related to state and municipal public utility license tax, and interest expense due to additional debt outstanding and higher interest rates associated with the issuance of new long-term debt.

Retail Revenues

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$67.3	6.6	\$220.9	12.1

In the second quarter 2007, retail revenues were \$1.09 billion compared to \$1.03 billion in same period in 2006. For year-to-date 2007, retail revenues were \$2.05 billion compared to \$1.83 billion in the same period in 2006.

Table of Contents

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Details of retail revenues are as follows:

	Second Quarter 2007		Year-to-Date 2007	
	<i>(in millions)</i>	<i>(% change)</i>	<i>(in millions)</i>	<i>(% change)</i>
Retail prior year	\$1,026.6		\$1,828.9	
Estimated change in				
Rates and pricing	52.5	5.1	109.5	6.0
Sales growth	0.1		2.0	0.1
Weather	9.3	0.9	23.4	1.3
Fuel and other cost recovery	5.5	0.6	85.9	4.7
Retail current year	\$1,094.0	6.6%	\$2,049.7	12.1%

Revenues associated with changes in rates and pricing increased in the second quarter and year-to-date 2007 when compared to the same periods in 2006 primarily due to the Rate RSE and Rate CNP Environmental rate increases effective in January 2007. See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL PSC Matters Retail Rate Adjustments of Alabama Power in Item 7 and Note 3 to the financial statements of Alabama Power under Retail Regulatory Matters in Item 8 of the Form 10-K.

Revenues attributable to changes in sales growth were flat in the second quarter of 2007 when compared to the same period in 2006. Commercial KWH energy sales increased due to continued customer and demand growth. This increase was offset by a decrease in residential KWH energy sales as a result of a reduction in the average residential customer usage during the second quarter. Industrial KWH energy sales during the second quarter 2007 were relatively flat.

For year-to-date 2007, revenues attributable to changes in sales growth increased when compared to the same period in 2006, primarily due to an increase of 2.2% in commercial KWH energy sales and a 1.0% increase in the number of customers. These increases were offset by a 1.6% decrease in KWH energy sales to residential customers primarily as a result of a reduction in average residential customer usage and a 1.9% decrease in KWH energy sales to industrial customers primarily as a result of decreased sales demand in the primary metals, textiles, and forest products sectors. Revenues resulting from changes in weather increased due to favorable weather conditions in the second quarter of 2007 when compared to same period in 2006 which resulted in increased KWH energy sales to residential and commercial customers of 1.1%.

For year-to-date 2007, revenues resulting from changes in weather increased due to favorable weather conditions when compared to same period in 2006 which resulted in increased KWH energy sales to residential and commercial customers of 1.6%.

Fuel and other cost recovery revenues increased in the second quarter and year-to-date 2007 when compared to the same periods in 2006. Electric rates for Alabama Power include provisions to recognize the full recovery of fuel costs, purchased power costs, PPAs certificated by the Alabama PSC, and costs associated with the replenishment of Alabama Power's natural disaster reserve. Under these provisions, fuel and other cost recovery revenues generally equal fuel and other cost recovery expenses and do not affect net income.

Table of Contents

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Wholesale Revenues Affiliates

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$12.9	49.6	\$(24.2)	(22.9)

Wholesale energy sales to affiliated companies within the Southern Company system vary from period to period depending on demand and the availability and cost of generating resources at each company. These sales are made in accordance with the IIC, as approved by the FERC. These transactions do not have a significant impact on earnings since the energy is generally sold at marginal cost.

In the second quarter 2007, revenues from wholesale energy sales to affiliates were \$39.0 million compared to \$26.1 million in the same period in 2006. This increase was primarily due to an 84.7% increase in KWH sales to affiliates due to system availability offset by a 19.0% decrease in price.

For year-to-date 2007, revenues from wholesale energy sales to affiliates were \$81.2 million compared to \$105.4 million for the same period in 2006. This decrease was primarily due to a 20.4% decrease in price as well as a 3.2% decrease in KWH sales.

Other Revenues

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$6.7	16.5	\$6.0	7.0

In the second quarter 2007, other revenues were \$47.0 million compared to \$40.3 million in the same period in 2006. This increase was due to an increase of \$3.2 million in revenues from gas-fueled co-generation steam facilities resulting from higher gas prices and a \$2.2 million increase in revenues from rent from electric property associated with pole attachments and microwave tower rentals.

For year-to-date 2007, other revenues were \$91.1 million compared to \$85.1 million for the same period in 2006. This increase was mainly due to an increase of \$2.9 million in revenues from rent from electric property associated with pole attachments and microwave tower rentals and a \$2.2 million increase in other electric revenues as a result of increases in revenues from co-generation steam facilities and facilities service contracts.

Fuel and Purchased Power Expenses

	Second Quarter 2007		Year-to-Date 2007	
	vs.		vs.	
	Second Quarter 2006		Year-to-Date 2006	
	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
Fuel	\$ 41.7	10.0	\$ 86.0	11.3
Purchased power-non-affiliates	(14.5)	(44.6)	(32.0)	(58.5)
Purchased power-affiliates	(12.6)	(14.1)	3.5	2.4
Total fuel and purchased power expenses	\$ 14.6		\$ 57.5	

Fuel and purchased power transactions do not have a significant impact on earnings since energy expenses are generally offset by energy revenues through Alabama Power's energy cost recovery clause.

Table of Contents

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In the second quarter 2007, total fuel and purchased power expenses were \$555.5 million compared to \$540.9 million in the same period in 2006. The increase was primarily due to a \$14.4 million increase in the cost of energy primarily resulting from an increase in the average cost of fuel and purchased power.

For year-to-date 2007, total fuel and purchased power expenses were \$1,018.9 million compared to \$961.4 million for the same period in 2006. The increase was due to a \$50.2 million increase related to greater KWHs generated and purchased and a \$7.3 million increase in the cost of energy resulting from an increase in the average cost of fuel.

Details of the individual components follow:

	Second Quarter	Second Quarter	% change	Year-to-Date 2007	Year-to-Date 2006	% change
Average Cost	2007	2006		2007	2006	
	<i>(cents per net KWH)</i>			<i>(cents per net KWH)</i>		
Fuel	2.41	2.37	1.7	2.36	2.29	3.1
Purchased power	6.14	5.80	5.9	5.36	5.68	(5.6)

In the second quarter 2007, fuel expense was \$460.9 million compared to \$419.2 million in the same period in 2006. This increase was due to a 2.1% increase in natural gas prices and a 7.0% increase in generation from Alabama Power-owned coal and gas-fired facilities due to a 62.6% decrease in hydro generation from lack of rainfall.

For year-to-date 2007, fuel expense was \$846.9 million compared to \$760.9 million for the same period in 2006. This increase was due to a 1.4% increase in the average cost of coal and a 6.0% increase in generation from Alabama Power-owned coal and gas-fired facilities due to a 52.0% decrease in hydro generation from lack of rainfall. These increases were offset by a 4.7% decrease in natural gas prices.

Energy purchases from non-affiliates will vary depending on market cost of available energy being lower than Southern Company system-generated energy, demand for energy within the system service territory, and availability of Southern Company system generation. In the second quarter 2007, purchased power from non-affiliates was \$18.1 million compared to \$32.6 million in the same period in 2006. This decrease was primarily due to an 11.6% decrease in the amount of energy purchased and a 25.1% decrease in price.

For year-to-date 2007, purchased power from non-affiliates was \$22.7 million compared to \$54.7 million for the same period in 2006. This decrease was primarily due to a 37.3% decrease in the amount of energy purchased and a 19.9% decrease in price.

Energy purchases from affiliates will vary depending on demand and the availability and cost of generating resources at each company within the Southern Company system. These purchases are made in accordance with the IIC, as approved by the FERC. In the second quarter 2007, purchased power from affiliates was \$76.5 million compared to \$89.1 million in the same period in 2006. This decrease was due to an 18.9% decrease in the amount of energy purchased partially offset by a 15.5% increase in price.

The year to date 2007 variance in purchased power from affiliates when compared to the same period in 2006 is not material.

Other Operations Expense

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$7.7	4.4	\$10.1	2.9

Table of Contents

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For the second quarter 2007, other operations expense was \$183.7 million compared to \$176.0 million in the same period in 2006. This increase is primarily due to a \$3.0 million increase in steam power expense related to labor and materials expense, a \$1.7 million increase in other power supply expense associated with system control and load dispatching, a \$1.3 million increase in hydro power expense, and a \$1.1 million increase in transmission expense related to external electric purchases.

For year-to-date 2007, other operations expense was \$355.1 million compared to \$345.0 million for the same period in 2006. This increase is primarily due to a \$3.2 million increase in steam power expense related to labor and materials expense, a \$2.6 million increase in other power supply expense associated with system control and load dispatching, and a \$2.1 million increase in transmission expense related to load dispatching and external electric purchases.

Depreciation and Amortization

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$4.9	4.3	\$11.0	4.9

For the second quarter 2007, depreciation and amortization was \$117.2 million compared to \$112.3 million in the same period in 2006. For year-to-date 2007, depreciation and amortization was \$233.1 million compared to \$222.1 million for the same period in 2006. These increases were due to an increase in property, plant, and equipment related to environmental steam power capital projects as well as distribution capital projects when compared to the same periods in 2006.

Taxes Other than Income Taxes

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$6.2	9.6	\$13.3	10.2

For the second quarter 2007, taxes other than income taxes were \$71.5 million compared to \$65.3 million in the same period in 2006. For year-to-date 2007, taxes other than income taxes were \$144.2 million compared to \$130.9 million for the same period in 2006. These increases were primarily due to increases in state and municipal public utility license taxes which are directly related to increased retail revenues.

Allowance for Equity Funds Used During Construction

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$4.5	118.4	\$5.6	59.8

Allowance for equity funds used during construction (AFUDC) in the second quarter 2007 was \$8.3 million compared to \$3.8 million in the same period in 2006. For year-to-date 2007, AFUDC was \$15.0 million compared to \$9.4 million for the same period in 2006. These increases were primarily due to increases in the amount of construction work in progress related to environmental steam power capital projects when compared to the same periods in 2006.

Table of Contents

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Interest Expense, Net of Amounts Capitalized

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$6.4	10.9	\$16.4	14.6

For the second quarter 2007, interest expense, net of amounts capitalized was \$65.5 million compared to \$59.1 million in the same period in 2006. For year-to-date 2007, interest expense, net of amounts capitalized was \$128.6 million compared to \$112.2 million for the same period in 2006. These increases were mainly due to additional debt outstanding and higher interest rates associated with the issuance of new long-term debt. For additional information, see MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Financing Activities of Alabama Power in Item 7 of the Form 10-K and FINANCIAL CONDITION AND LIQUIDITY Financing Activities herein.

Dividends on Preferred and Preference Stock

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$2.1	34.7	\$4.2	34.7

Dividends on preferred and preference stock in the second quarter 2007 were \$8.2 million compared to \$6.1 million in the same period in 2006. For year-to-date 2007, dividends on preferred and preference stock were \$16.3 million compared to \$12.1 million for the same period in 2006. These increases were due to the issuance of six million shares of preference stock in December 2006. For additional information, see MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Financing Activities of Alabama Power in Item 7 of the Form 10-K.

Income Taxes

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$16.5	21.3	\$35.9	27.4

For the second quarter 2007, income tax expense was \$94.1 million compared to \$77.6 million in the same period in 2006. For year-to-date 2007, income tax expense was \$166.9 million compared to \$131.0 million in the same period in 2006. This increase was primarily a result of higher earnings before income taxes.

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Alabama Power's future earnings potential. The level of Alabama Power's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of Alabama Power's primary business of selling electricity. These factors include Alabama Power's ability to maintain a stable regulatory environment that continues to allow for the recovery of all prudently incurred costs during a time of increasing costs. Future earnings in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in Alabama Power's service area. For additional information relating to these issues, see RISK FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL of Alabama Power in Item 7 of the Form 10-K.

Table of Contents

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Environmental Matters

Compliance costs related to the Clean Air Act and other environmental regulations could affect earnings if such costs cannot be fully recovered in rates on a timely basis. See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters of Alabama Power in Item 7 and Note 3 to the financial statements of Alabama Power under Environmental Matters in Item 8 of the Form 10-K for additional information.

New Source Review Litigation

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters New Source Review Actions of Alabama Power in Item 7 and Note 3 to the financial statements of Alabama Power under Environmental Matters New Source Review Actions in Item 8 of the Form 10-K for additional information regarding a civil action brought by the EPA alleging that Alabama Power had violated the NSR provisions of the Clean Air Act and related state laws with respect to certain of its coal-fired generating facilities. The plaintiffs' appeal against Alabama Power was stayed by the U.S. Court of Appeals for the Eleventh Circuit pending the U.S. Supreme Court's decision in a similar case against Duke Energy. On April 2, 2007, the U.S. Supreme Court issued an opinion in the Duke Energy case. On April 26, 2007, the plaintiffs filed a motion to vacate and remand the U.S. District Court for the Northern District of Alabama's decision in the Alabama Power case based on the Supreme Court's decision in Duke Energy. On June 7, 2007, the Eleventh Circuit declined the plaintiffs' request and instead issued a brief stay of appeal to allow the plaintiffs to file a motion for relief from judgment with the District Court in light of the Supreme Court's decision in Duke Energy. On July 23, 2007, the plaintiffs filed such a motion. If the District Court grants the motion, the Eleventh Circuit will remand the case back to the District Court for further proceedings. If the motion is denied, the Eleventh Circuit will retain jurisdiction over the case and the appeal will move forward. The final resolution of these claims is dependent on these appeals and possible further court action and, therefore, cannot be determined at this time.

Eight-Hour Ozone Regulations

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters Environmental Statutes and Regulations Air Quality of Alabama Power in Item 7 of the Form 10-K for additional information regarding revisions to the eight-hour ozone air quality standard. On June 20, 2007, the EPA proposed additional revisions to the current eight-hour ozone standard which, if enacted, could result in designation of new nonattainment areas within Alabama Power's service territory. The EPA has requested comment and is expected to make a determination regarding finalization of a revised standard in 2008. The ultimate outcome of this matter cannot be determined at this time.

Fine Particulate Matter Regulations

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters - Environmental Statutes and Regulations Air Quality of Alabama Power in Item 7 of the Form 10-K for additional information regarding nonattainment designations for the fine particulate matter air quality standard. In March 2007, the EPA finalized its fine particulate matter implementation rule, requiring submittal of state plans for addressing the nonattainment designations by April 2008. The ultimate outcome of this matter depends on the development and submittal of those state plans and the resolution of pending legal challenges and, therefore, cannot be determined at this time.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FERC and Alabama PSC Matters

Market-Based Rate Authority

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL FERC Matters Market-Based Rate Authority of Alabama Power in Item 7 and Note 3 to the financial statements of Alabama Power under FERC Matters Market-Based Rate Authority in Item 8 of the Form 10-K for information regarding the proceedings initiated by the FERC in December 2004 to assess Southern Company's generation dominance within its retail service territory and in May 2005 to determine whether Southern Company satisfies the other three parts of the FERC's market-based rate analysis: transmission market power, barriers to entry, and affiliate abuse or reciprocal dealing.

In late June and July 2007, hearings were held in the December 2004 proceeding and Southern Company anticipates a decision in November 2007. On June 21, 2007, the FERC issued an order terminating the May 2005 proceeding, based upon its final approval of the settlement in the IIC proceeding discussed below.

In addition, on June 21, 2007, the FERC issued its final rule regarding market-based rate authority. The FERC generally retained its current market-based rate standards. The impact of this order and its effect on the generation dominance proceeding cannot now be determined.

Intercompany Interchange Contract

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL FERC Matters Intercompany Interchange Contract of Alabama Power in Item 7 and Note 3 to the financial statements of Alabama Power under FERC Matters Intercompany Interchange Contract in Item 8 of the Form 10-K for information regarding the proceeding initiated by the FERC in May 2005 to examine (1) the provisions of the IIC among Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Power, and SCS, as agent, under the terms of which the Power Pool is operated, and, in particular, the propriety of the continued inclusion of Southern Power as a party to the IIC, (2) whether any parties to the IIC have violated the FERC's standards of conduct applicable to utility companies that are transmission providers, and (3) whether Southern Company's code of conduct defining Southern Power as a system company rather than a marketing affiliate is just and reasonable.

On April 19, 2007, the FERC approved, with certain modifications, the compliance filing submitted by Southern Company on November 6, 2006. The compliance plan largely involves functional separation and information restrictions related to marketing activities conducted on behalf of Southern Power. Implementation of the plan is not expected to have a material impact on Alabama Power's financial statements.

Retail Fuel Cost Recovery

Alabama Power has established fuel cost recovery rates approved by the Alabama PSC. Alabama Power's under recovered fuel costs as of June 30, 2007 totaled \$375 million as compared to \$301 million at December 31, 2006. As a result of the increasing level of under recovered fuel costs, on June 18, 2007, the Alabama PSC ordered Alabama Power to increase its Rate ECR factor to 3.1 cents per KWH from 2.4 cents per KWH, effective with billings beginning July 2007 for the 30-month period ending December 2009. This change represents on average an increase of approximately \$7.37 per month for a customer billing of 1,000 KWH. This increase is intended to permit the recovery of energy costs based on an estimate of future energy costs, as well as the collection of the existing under recovered energy costs by the end of 2009. During the 30-month period,

Table of Contents

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Alabama Power will be allowed to include a carrying charge associated with the under recovered fuel costs in the fuel expense calculation. In the event the application of this increased Rate ECR factor results in an over recovered position during this period, Alabama Power will pay interest on any such over recovered balance at the same rate used to derive the carrying costs. As a result of the order, Alabama Power classified \$128 million of the under recovered regulatory clause receivable as deferred charges and other assets in the Condensed Balance Sheet as of June 30, 2007 herein.

Natural Disaster Cost Recovery

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL PSC Matters Natural Disaster Cost Recovery of Alabama Power in Item 7 and Note 3 to the financial statements of Alabama Power under Retail Regulatory Matters Natural Disaster Cost Recovery in Item 8 of the Form 10-K for information regarding natural disaster cost recovery. As of December 31, 2006, Alabama Power had a deficit balance in the deferred natural disaster reserve account of approximately \$16.8 million. In June 2007, Alabama Power fully recovered its prior storm costs related to Hurricanes Dennis and Katrina. As a result customer rates decreased by \$1.73 per month per residential customer account and \$4.29 per month per non-residential customer account beginning with July 2007 billings. Alabama Power continues to collect a monthly Rate NDR charge to establish and maintain a target reserve balance of \$75 million for future storms. At June 30, 2007, Alabama Power had accumulated a balance of \$19.1 million in the target reserve for future storms, which is included in the Condensed Balance Sheet herein under Other Regulatory Liabilities.

Other Matters

Alabama Power is subject to certain claims and legal actions arising in the ordinary course of business. In addition, Alabama Power's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental requirements such as opacity and air quality standards, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such pending or potential litigation against Alabama Power cannot be predicted at this time; however, for current proceedings not specifically reported herein or in Note 3 to the financial statements of Alabama Power in Item 8 of the Form 10-K, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on Alabama Power's financial statements.

See the Notes to the Condensed Financial Statements herein for discussion of various other contingencies, regulatory matters, and other matters being litigated which may affect future earnings potential.

ACCOUNTING POLICIES**Application of Critical Accounting Policies and Estimates**

Alabama Power prepares its financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements of Alabama Power in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Alabama Power's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. See MANAGEMENT'S DISCUSSION AND ANALYSIS ACCOUNTING POLICIES Application of Critical Accounting Policies and Estimates of Alabama Power in Item 7 of the Form 10-K for a

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

complete discussion of Alabama Power's critical accounting policies and estimates related to Electric Utility Regulation, Contingent Obligations, and Unbilled Revenues.

New Accounting Standards

Income Taxes

On January 1, 2007, Alabama Power adopted FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes. FIN 48 requires companies to determine whether it is more likely than not that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. It also provides guidance on the recognition, measurement, and classification of income tax uncertainties, along with any related interest and penalties. The provisions of FIN 48 were applied to all tax positions beginning January 1, 2007. The adoption of FIN 48 did not have a material impact on Alabama Power's financial statements.

Fair Value Measurement

The FASB issued FASB Statement No. 157 (SFAS No. 157), Fair Value Measurements in September 2006. This standard provides guidance on how to measure fair value where it is permitted or required under other accounting pronouncements. SFAS No. 157 also requires additional disclosures about fair value measurements. Alabama Power plans to adopt SFAS No. 157 on January 1, 2008 and is currently assessing the impact of this standard.

Fair Value Option

In February 2007, the FASB issued FASB Statement No. 159 (SFAS No. 159), Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115. This standard permits an entity to choose to measure many financial instruments and certain other items at fair value. Alabama Power plans to adopt SFAS No. 159 on January 1, 2008 and is currently assessing its impact.

FINANCIAL CONDITION AND LIQUIDITY

Overview

Alabama Power's financial condition and liquidity position remained stable at June 30, 2007. Net cash provided from operating activities totaled \$361.2 million for the first six months of 2007, compared to \$300.7 million for the corresponding period in 2006. The \$60.5 million increase in cash provided from operating activities in the first six months of 2007 is primarily due to the increase in net income as previously discussed and a decrease in cash outflow for accounts payable, partially offset by an increase in under recovered fuel costs. Net cash used for investing activities totaled \$673.6 million primarily due to gross property additions to utility plant of \$555.3 million in the first six months of 2007. These additions were primarily related to construction of transmission and distribution facilities, replacement of steam equipment, purchases of nuclear fuel, and installation of equipment to comply with environmental standards. Net cash provided from financing activities totaled \$318.4 million for the first six months of 2007, compared to \$221.3 million for the corresponding period in 2006. The increase was primarily the result of a decrease in cash outflow for notes payable.

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Capital Requirements and Contractual Obligations of Alabama Power in Item 7 of the Form 10-K for a description of Alabama Power's capital requirements for its construction program, scheduled maturities of long-

Table of Contents

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

term debt, as well as the related interest, preferred and preference stock dividends, lease obligations, purchase commitments, and trust funding requirements. Approximately \$750 million will be required through June 30, 2008 for maturities of long-term debt.

Sources of Capital

Alabama Power plans to obtain the funds required for construction and other purposes from sources similar to those utilized in the past. Recently, Alabama Power has primarily utilized funds from operating cash flows, short-term debt, external security offerings, and equity contributions from Southern Company. However, the amount, type, and timing of any future financings, if needed, will depend upon regulatory approval, prevailing market conditions, and other factors. See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Sources of Capital of Alabama Power in Item 7 of the Form 10-K for additional information.

Alabama Power's current liabilities frequently exceed current assets because of the continued use of short-term debt as a funding source to meet scheduled maturities of long-term debt as well as cash needs which can fluctuate significantly due to the seasonality of the business. To meet short-term cash needs and contingencies, Alabama Power had at June 30, 2007 approximately \$22 million of cash and cash equivalents, \$96 million of restricted cash related to the sale of pollution control bonds which may be used only for future project costs, unused committed lines of credit of approximately \$970 million (including \$563 million of such lines which are dedicated to funding purchase obligations related to variable rate pollution control bonds), and an extendible commercial note program. Of the unused credit facilities, \$370 million will expire at various times in 2007 and 2008 (of which \$198 million allow for one-year term loans). Subsequent to June 30, 2007, Alabama Power extended the maturity of its remaining \$600 million facility from 2011 to 2012. Alabama Power expects to renew its credit facilities, as needed, prior to expiration. See Note 6 to the financial statements of Alabama Power under Bank Credit Arrangements in Item 8 of the Form 10-K for additional information. Alabama Power may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper and extendible commercial notes at the request and for the benefit of Alabama Power and other Southern Company subsidiaries. Alabama Power has regulatory authority for up to \$1.4 billion of short-term borrowings. At June 30, 2007, Alabama Power had \$27 million of commercial paper outstanding. There were no extendible commercial notes outstanding. Management believes that the need for working capital can be adequately met by issuing commercial paper or utilizing lines of credit without maintaining large cash balances.

Credit Rating Risk

Alabama Power does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. However, Alabama Power, along with all members of the Power Pool, is party to certain agreements that could require collateral and/or accelerated payment in the event of a credit rating change to below investment grade for it and/or Georgia Power. These agreements are primarily for natural gas and power price risk management activities. At June 30, 2007, Alabama Power's total exposure to these types of agreements was \$34 million. Subsequent to June 30, 2007, certain Southern Company subsidiaries entered into additional agreements which could increase this exposure. The increase in exposure, if any, is currently \$8 million.

Market Price Risk

Alabama Power's market risk exposures relative to interest rate changes have not changed materially compared with the December 31, 2006 reporting period. In addition, Alabama Power is not aware of any facts or circumstances that would significantly affect such exposures in the near term.

Table of Contents

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Due to cost-based rate regulations, Alabama Power has limited exposure to market volatility in interest rates, commodity fuel prices, and prices of electricity. To mitigate residual risks relative to movements in electricity prices, Alabama Power enters into physical fixed-price contracts for the purchase and sale of electricity through the wholesale electricity market. Alabama Power has also implemented a retail fuel hedging program at the instruction of the Alabama PSC.

The fair value of derivative energy contracts at June 30, 2007 was as follows:

	Second Quarter 2007 Changes	Year-to-Date 2007 Changes
	Fair Value (in thousands)	
Contracts beginning of period	\$ (361)	\$(32,628)
Contracts realized or settled	1,909	14,735
New contracts at inception		
Changes in valuation techniques		
Current period changes (a)	(14,218)	5,223
Contracts at June 30, 2007	\$(12,670)	\$(12,670)

(a) Current period changes also include the changes in fair value of new contracts entered into during the period, if any.

Unrealized gains and losses from mark-to-market adjustments on derivative contracts related to Alabama Power's fuel hedging programs are recorded as regulatory assets and liabilities. Realized gains and losses from these programs are included in fuel expense and are recovered through Alabama Power's fuel cost recovery clause. Certain other energy related derivatives, designated as hedges, are deferred in other comprehensive income. Gains and losses on derivative contracts that are not designated as hedges are recognized in the statements of income as incurred.

At June 30, 2007, the fair value gain/(loss) of derivative energy contracts was reflected in the financial statements as follows:

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For additional information, see MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Market Price Risk of Alabama Power in Item 7 and Notes 1 and 6 to the financial statements of Alabama Power under Financial Instruments in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements herein.

Financing Activities

Alabama Power issued \$200 million of senior notes in the first quarter of 2007. The proceeds were used to repay a portion of Alabama Power's outstanding short-term indebtedness and for other general corporate purposes, including Alabama Power's continuing construction activities. Also in the first quarter of 2007, Alabama Power issued 1,750,000 shares of common stock to Southern Company at \$40.00 a share (\$70 million aggregate purchase price). The proceeds from the sale were used by Alabama Power for general corporate purposes.

In April 2007, Alabama Power issued \$250 million of Series 2007B 5.875% Senior Notes due April 1, 2047. The proceeds were used to repay a portion of Alabama Power's outstanding short-term indebtedness and for other general corporate purposes, including Alabama Power's continuing construction activities. Also in April 2007, \$168.5 million in aggregate principal amount of Series W Floating Rate Extendible Senior Notes matured.

In May 2007, Alabama Power issued an additional 1,750,000 shares of common stock to Southern Company at \$40.00 a share (\$70 million aggregate purchase price). The proceeds from the sales were used by Alabama Power for general corporate purposes.

In June 2007, Alabama Power incurred obligations related to the issuance of \$246.5 million of The Industrial Development Board of the City of Mobile Pollution Control Revenue Bonds (Alabama Power Barry Plant Project). The proceeds will be held by the trustee and will be transferred to Alabama Power to fund pollution control and environmental improvement facilities at Plant Barry. As of June 30, 2007, approximately \$150.5 million had been applied to fund project costs, with the remaining \$96 million held by the trustee.

In addition to any financings that may be necessary to meet capital requirements and contractual obligations, Alabama Power plans to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
SECOND QUARTER 2007 vs. SECOND QUARTER 2006
AND
YEAR-TO-DATE 2007 vs. YEAR-TO-DATE 2006

OVERVIEW

Georgia Power operates as a vertically integrated utility providing electricity to retail customers within its traditional service area located within the State of Georgia and to wholesale customers in the Southeast. Many factors affect the opportunities, challenges, and risks of Georgia Power's business of selling electricity. These factors include the ability to maintain a stable regulatory environment, to achieve energy sales growth, and to effectively manage and secure timely recovery of rising costs. These costs include those related to growing demand and increasingly stringent environmental standards. These issues are expected to be addressed in a general rate case that was filed on June 29, 2007. The rate case will determine whether the existing rate plan (2004 Retail Rate Plan) should be continued, modified, or discontinued. In addition, fuel costs rose significantly during 2005 and 2006. Georgia Power received Georgia PSC orders to increase its fuel recovery rate effective July 1, 2006 and March 1, 2007 and continues to work with the Georgia PSC to enable the timely recovery of these costs.

Effective July 1, 2006, Savannah Electric was merged into Georgia Power. Georgia Power has accounted for the merger in a manner similar to a pooling of interests. See MANAGEMENT'S DISCUSSION AND ANALYSIS OVERVIEW Business Activities of Georgia Power in Item 7 of the Form 10-K for additional information. Georgia Power continues to focus on several key performance indicators. These indicators include customer satisfaction, plant availability, system reliability, and net income. For additional information on these indicators, see MANAGEMENT'S DISCUSSION AND ANALYSIS OVERVIEW Key Performance Indicators of Georgia Power in Item 7 of the Form 10-K.

RESULTS OF OPERATIONS**Net Income**

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(9.0)	(4.6)	\$(9.6)	(2.9)

Georgia Power's net income after dividends on preferred stock for the second quarter and year-to-date 2007 was \$188.4 million and \$319.7 million, respectively, compared to \$197.4 million and \$329.3 million for the corresponding periods in 2006. The decreases were primarily the result of lower base retail revenues, increased interest expense due to additional debt and higher short-term interest rates, and the timing of maintenance activities. These factors were partially offset by a lower effective income tax rate and, in the first quarter, higher wholesale non-fuel revenues.

Retail Revenues

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$60.7	4.0	\$114.4	4.0

In the second quarter 2007, retail revenues were \$1.6 billion compared to \$1.5 billion in the corresponding period in 2006.

For year-to-date 2007, retail revenues were \$3.0 billion compared to \$2.9 billion for the same period in 2006.

Table of Contents

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Details of retail revenues are as follows:

	Second Quarter 2007		Year-to-Date 2007	
	<i>(in millions)</i>	<i>(% change)</i>	<i>(in millions)</i>	<i>(% change)</i>
Retail prior year	\$1,524.9		\$2,883.5	
Estimated change in				
Rates and pricing	(40.1)	(2.6)	(84.8)	(2.9)
Sales growth	6.6	0.4	35.5	1.2
Weather	10.3	0.7	10.0	0.4
Fuel cost recovery	83.9	5.5	153.7	5.3
Retail current year	\$1,585.6	4.0	\$2,997.9	4.0

Revenues associated with changes in rates and pricing decreased in the second quarter and year-to-date 2007 when compared to the corresponding periods for 2006 due to lower contributions from market-driven rates for sales to large commercial and industrial customers.

Revenues attributable to sales growth increased in the second quarter and year-to-date 2007 when compared to the corresponding periods for 2006. Total KWH sales increased 1.3% for the second quarter and 2.1% for year-to-date compared to the corresponding periods in 2006. The increases were primarily the effect of increased KWH energy sales to residential and commercial customers and customer additions. For the second quarter and year-to-date, residential KWH sales increased 3.0% and 4.2%, respectively, and commercial KWH sales increased 2.1% and 2.9%, respectively. These increases were partially offset by decreases in industrial KWH sales of 1.3% and 0.8% for the second quarter and year-to-date 2007, primarily due to reduced demand from the textile industry.

Revenues attributable to changes in weather increased in the second quarter and year-to-date when compared to the corresponding periods for 2006 due to warmer summer weather.

Fuel cost recovery revenues increased when compared to the corresponding periods for 2006. Georgia Power's rates include provisions to adjust billings for fluctuations in fuel costs, including the energy component of purchased power costs. Under these provisions, which increased July 1, 2006 and March 1, 2007, fuel revenues generally equal fuel expenses, including the fuel component of purchased power costs, and do not affect net income. See FUTURE EARNINGS POTENTIAL - FERC and Georgia PSC Matters - Retail Fuel Cost Recovery herein for additional information.

Wholesale Revenues - Non-Affiliates

Second Quarter 2007 vs. Second Quarter 2006

Year-to-Date 2007 vs. Year-to-Date 2006

<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$1.4	1.0	\$10.4	3.9

Wholesale energy sales to non-affiliates will vary depending on the market cost of available energy compared to the cost of Georgia Power and Southern Company system owned generation, demand for energy within the Southern Company service territory, and availability of Southern Company system generation. The second quarter 2007 variance when compared to the second quarter 2006 was not material.

For year-to-date 2007, revenues from wholesale energy sales to non-affiliates were \$278.8 million compared to \$268.4 million in the same period in 2006. The increase was primarily due to a new long-term contract with an

electrical membership corporation that went into effect in April 2006 and has contributed to a 9.1% increase in wholesale non-affiliate KWH sales volume.

Table of Contents

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Wholesale Revenues - Affiliates

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(29.5)	(33.4)	\$(24.9)	(19.9)

Wholesale energy sales to affiliated companies within the Southern Company system will vary depending on demand and the availability and cost of generating resources at each company. These sales are made in accordance with the IIC, as approved by the FERC. These transactions do not have a significant impact on earnings since this energy is generally sold at marginal cost. In the second quarter and year-to-date 2007, revenues from wholesale affiliates were \$58.8 million and \$100.6 million, respectively, compared to \$88.3 million and \$125.5 million for the corresponding periods in 2006. The revenue decreases were the result of a 38.1% and 19.0% decrease in KWH for short-term affiliate sales through the Power Pool for the quarter and year-to-date, respectively. This was primarily a result of the timing of scheduled outages at multiple Georgia Power generation units.

Other Revenues

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$4.1	6.7	\$9.7	8.5

In the second quarter and year-to-date 2007, other revenues were \$64.7 million and \$124.0 million, respectively, compared to \$60.6 million and \$114.3 million for the corresponding periods in 2006. The other revenue increases were primarily due to transmission revenue increases for the second quarter and year-to-date 2007 of \$2.6 million and \$6.8 million, respectively, from increased usage of Georgia Power's transmission system by non-affiliated companies. Outdoor lighting revenue increases of \$1.9 million and \$3.4 million, respectively, also contributed to the total increase and were primarily driven by a 2.8% increase in lighting customers.

Fuel and Purchased Power Expenses

	Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
Fuel	\$ 59.6	10.1	\$192.8	18.3
Purchased power - Non-affiliates	(16.5)	(19.6)	(29.2)	(20.4)
Purchased power - Affiliates	11.6	6.9	(21.8)	(5.6)
Total fuel and purchased power expenses	\$ 54.7		\$141.8	

In the second quarter 2007, total fuel and purchased power expenses were \$898.2 million compared to \$843.5 million for the corresponding period in 2006. The increase in fuel and purchased power expenses was due to a \$56.9 million net increase in the average cost of energy per KWH. This increase was due to a 21.0% increase in the average cost of coal per net KWH, resulting from higher coal transportation costs. This was partially offset by a net decrease of

\$2.2 million from lower total KWH volumes generated and purchased compared to the corresponding period in 2006. For year-to-date 2007, total fuel and purchased power expenses were \$1.7 billion compared to \$1.6 billion for the same period in 2006. The net increase in fuel and purchase power expense was due to a \$120.2 million increase in the average cost of energy per KWH primarily the result of a 22.2% increase in the average cost of

Table of Contents

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

coal per net KWH generated, resulting from higher coal transportation costs. Also contributing was a \$21.6 million net increase from higher KWH volumes generated and purchased compared to the corresponding period in 2006.

Details of Georgia Power's cost of generation and purchased power are as follows:

	Second Quarter	Second Quarter	% change	Year-to-Date 2007	Year-to-Date 2006	% change
Average Cost	2007	2006				
	<i>(cents per net KWH)</i>			<i>(cents per net KWH)</i>		
Fuel	2.66	2.43	9.5	2.65	2.38	11.3
Purchased power	6.80	6.64	2.4	6.37	6.28	1.4

In the second quarter 2007 fuel expense was \$650.8 million compared to \$591.2 million for the corresponding periods in 2006. This increase was the result of a 9.5% increase in the average cost of fuel per net KWH generated. For year-to-date 2007, fuel expense was \$1.2 billion compared to \$1.1 billion in 2006. This increase was the result of an 11.3% increase in the average cost of fuel per net KWH generated. The changes in average fuel cost were primarily due to higher coal transportation prices. These expenses do not have a significant impact on earnings since fuel expenses are generally offset by fuel revenues through Georgia Power's fuel cost recovery clause. See FUTURE EARNINGS POTENTIAL - FERC and Georgia PSC Matters - Retail Fuel Cost Recovery herein for additional information.

In the second quarter 2007, purchased power expense - non-affiliates was \$67.7 million compared to \$84.2 million for the corresponding period in 2006. This decrease was primarily due to an 18.3% decrease in KWH volume purchased compared to the same period in 2006. Georgia Power replaced those purchases with less expensive energy available from affiliates.

For year-to-date 2007, purchased power expense - non-affiliates was \$113.8 million compared to \$143.0 million in the corresponding period in 2006. This decrease was primarily due to a 19.7% decrease in KWH volume purchased compared to 2006. Georgia Power replaced those purchases with less expensive energy available from affiliates. Energy purchases from affiliated companies within the Southern Company system will vary depending on demand and the availability and cost of generating resources at each company. These purchases are made in accordance with the IIC, as approved by the FERC. These transactions did not have a significant impact on earnings since the energy purchases are generally offset by energy revenues through Georgia Power's fuel cost recovery clause.

In the second quarter 2007, purchased power from affiliates was \$179.7 million compared with \$168.1 million for the corresponding period in 2006. The increase was primarily the result of a 12.7% increase in KWH volume purchased from affiliates compared to the same period in 2006.

For year-to-date 2007, purchased power from affiliates was \$364.2 million compared with \$386.0 million for the corresponding period in 2006. This decrease was primarily due to the use of lower priced available resources from affiliate contracts or the Power Pool. The decrease was despite a 9.3% increase in total KWH purchased from affiliates compared to the corresponding period in 2006.

Maintenance Expense

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$7.5	5.8	\$3.4	1.3

Table of Contents

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In the second quarter 2007, maintenance expense was \$136.8 million compared with \$129.3 million for the corresponding period in 2006. The change was primarily due to an \$8.5 million increase from the timing and higher than expected cost of maintenance outages at Georgia Power's fossil and nuclear generation units. This increase was partially offset by decreases from the timing of distribution maintenance activities.

For year-to-date 2007, the variance when compared to year-to-date 2006 was not material.

Allowance for Equity Funds Used During Construction

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$8.2	124.5	\$15.4	122.5

In the second quarter 2007, the allowance for equity funds used during construction was \$14.7 million compared with \$6.5 million for the corresponding period in 2006. For year-to-date 2007, the allowance for equity funds used during construction was \$27.9 million compared with \$12.5 million for the corresponding period in 2006. These increases were primarily related to a 119.4% increase in average expenditures related to new and ongoing construction activities for environmental, transmission, and distribution projects.

Interest Expense, Net of Amounts Capitalized

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$9.8	15.4	\$16.0	12.5

In the second quarter 2007, interest expense, net of amounts capitalized was \$73.1 million compared with \$63.3 million for the corresponding period in 2006. For year-to-date 2007, interest expense, net of amounts capitalized was \$143.7 million compared to \$127.7 million for the corresponding period in 2006. These increases were primarily the result of generally higher interest rates for variable rate debt, commercial paper, and the issuance of additional long-term debt.

Other Income (Expense), Net

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(2.9)	(90.7)	\$(5.8)	(306.7)

In the second quarter 2007, other income (expense), net was \$0.3 million compared with \$3.2 million for the corresponding period in 2006. For year-to-date 2007, other income (expense), net was \$(3.9) million compared with \$1.9 million in 2006. These decreases were primarily the result of lower income from a residential pricing program and customer contract work.

Income Taxes

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(19.6)	(16.4)	\$(28.5)	(14.3)

In the second quarter and year-to-date 2007, income taxes were \$100.2 million and \$171.2 million, respectively, compared with \$119.8 million and \$199.7 million for the corresponding periods in 2006. These decreases were primarily the result of lower pre-tax net income, increased federal income tax benefits, as well as increases in state income tax credits of \$7.8 million and \$11.3 million, respectively, for the second quarter and year-to-date

Table of Contents

GEORGIA POWER COMPANY

FINANCIAL CONDITION AND RESULTS OF OPERATIONS

2007. See Note (H) to the Condensed Financial Statements herein for additional information related to the tax impact of state income tax credits on Georgia Power's effective tax rate.

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Georgia Power's future earnings potential. The level of Georgia Power's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of Georgia Power's business of selling electricity. These factors include Georgia Power's ability to maintain a stable regulatory environment that continues to allow for the recovery of all prudently incurred costs during a time of increasing costs. Future earnings in the near term will depend, in part, upon growth in energy sales which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in Georgia Power's service area. For additional information relating to these issues, see RISK FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL of Georgia Power in Item 7 of the Form 10-K.

Environmental Matters

Compliance costs related to the Clean Air Act and other environmental regulations could affect earnings if such costs cannot be fully recovered in rates on a timely basis. See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Environmental Matters of Georgia Power in Item 7 and Note 3 to the financial statements of Georgia Power under Environmental Matters in Item 8 of the Form 10-K for additional information.

Eight-Hour Ozone Regulations

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Environmental Matters - Environmental Statutes and Regulations - Air Quality of Georgia Power in Item 7 of the Form 10-K for additional information regarding revisions to the eight-hour ozone air quality standard. On June 20, 2007, the EPA proposed additional revisions to the current eight-hour ozone standard which, if enacted, could result in designation of new nonattainment areas within Georgia Power's service territory. The EPA has requested comment and is expected to make a determination regarding finalization of a revised standard in 2008. The ultimate outcome of this matter cannot be determined at this time.

Fine Particulate Matter Regulations

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Environmental Matters - Environmental Statutes and Regulations - Air Quality of Georgia Power in Item 7 of the Form 10-K for additional information regarding nonattainment designations for the fine particulate matter air quality standard. In March 2007, the EPA finalized its fine particulate matter implementation rule, requiring submittal of state plans for addressing the nonattainment designations by April 2008. The ultimate outcome of this matter depends on the development and submittal of those state plans and the resolution of pending legal challenges and, therefore, cannot be determined at this time.

Georgia Multi-Pollutant Rule

On June 27, 2007, the State of Georgia approved a new multi-pollutant rule for certain existing coal-fired electric utility steam generating units in Georgia. The rule is designed to reduce emissions of mercury, sulfur dioxide, nitrogen oxide, and fine particulates state-wide by requiring installation of specified control

Table of Contents

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

technologies at each affected unit by a date certain between December 31, 2008 and June 1, 2015. This rule will require the installation of controls on the majority of Georgia Power's coal-fired units. See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters Environmental Statutes and Regulations General in Item 7 of the Form 10-K for a discussion of estimated compliance costs for 2007 through 2009. If compliance costs cannot be fully recovered in rates on a timely basis, Georgia Power's financial statements would be adversely impacted. See FERC and Georgia PSC Matters Retail Base Rate Recovery for information on Georgia Power's request to increase retail rates effective January 1, 2008.

Plant Wansley Environmental Litigation

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters Plant Wansley Environmental Litigation of Georgia Power in Item 7 and Note 3 to the financial statements of Georgia Power under Environmental Matters Plant Wansley Environmental Litigation in Item 8 of the Form 10-K for additional information on litigation involving alleged violations of the Clean Air Act at four of the units at Plant Wansley. On June 18, 2007, the U.S. District Court for the Northern District of Georgia approved a settlement between the parties resolving all remaining issues and dismissed the case. There was no material impact on Georgia Power's financial statements.

FERC and Georgia PSC Matters

Market-Based Rate Authority

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL FERC Matters Market-Based Rate Authority of Georgia Power in Item 7 and Note 3 to the financial statements of Georgia Power under FERC Matters Market-Based Rate Authority in Item 8 of the Form 10-K for information regarding the proceedings initiated by the FERC in December 2004 to assess Southern Company's generation dominance within its retail service territory and in May 2005 to determine whether Southern Company satisfies the other three parts of the FERC's market-based rate analysis: transmission market power, barriers to entry, and affiliate abuse or reciprocal dealing.

In late June and July 2007, hearings were held in the December 2004 proceeding and Southern Company anticipates a decision in November 2007. On June 21, 2007, the FERC issued an order terminating the May 2005 proceeding, based upon its final approval of the settlement in the IIC proceeding discussed below.

In addition, on June 21, 2007, the FERC issued its final rule regarding market-based rate authority. The FERC generally retained its current market-based rate standards. The impact of this order and its effect on the generation dominance proceeding cannot now be determined.

Intercompany Interchange Contract

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL FERC Matters Intercompany Interchange Contract of Georgia Power in Item 7 and Note 3 to the financial statements of Georgia Power under FERC Matters Intercompany Interchange Contract in Item 8 of the Form 10-K for information regarding the proceeding initiated by the FERC in May 2005 to examine (1) the provisions of the IIC among Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Power, and SCS, as agent, under the terms of which the Power Pool is operated, and, in particular, the propriety of the continued inclusion of Southern Power as a party to the IIC, (2) whether any parties to the IIC have violated the FERC's standards of conduct applicable to utility companies that are

Table of Contents

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

transmission providers, and (3) whether Southern Company's code of conduct defining Southern Power as a system company rather than a marketing affiliate is just and reasonable.

On April 19, 2007, the FERC approved, with certain modifications, the compliance filing submitted by Southern Company on November 6, 2006. The compliance plan largely involves functional separation and information restrictions related to marketing activities conducted on behalf of Southern Power. Implementation of the plan is not expected to have a material impact on Georgia Power's financial statements.

Retail Fuel Cost Recovery

As of June 30, 2007, Georgia Power had an under recovered fuel balance of approximately \$830.1 million, compared to \$898.1 million at December 31, 2006. On February 6, 2007, the Georgia PSC approved an increase in Georgia Power's total annual billings of approximately \$383 million related to fuel cost recovery effective March 1, 2007. The order also requires Georgia Power to file for a new fuel cost recovery rate no later than March 1, 2008. Fuel cost recovery revenues as recorded on the financial statements are adjusted for differences in actual recoverable costs and amounts billed in current regulated rates. Accordingly, any changes in the billing factor will have no significant effect on Georgia Power's revenues or net income, but will affect cash flow. See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - PSC Matters - Fuel Cost Recovery of Georgia Power in Item 7 and Note 3 to the financial statements of Georgia Power under Retail Regulatory Matters - Fuel Cost Recovery in Item 8 of the Form 10-K for additional information.

Retail Base Rate Filing

On June 29, 2007, Georgia Power filed a request to increase retail base rates with the Georgia PSC. The request includes an increase effective January 1, 2008 of approximately \$406.7 million, or 5.98%, in retail revenues, based on a future test year ending July 31, 2008 and a proposed retail return on common equity of 12.5%. The majority of the increase in retail revenues is being requested to cover the costs of environmental compliance and continued investment in new generation, transmission, and distribution facilities to support growth and ensure reliability. The remainder of the increase would include recovery of higher operation, maintenance, and other investment costs to meet the rising demand for electricity.

Georgia Power is currently operating under a three-year retail rate order that expires December 31, 2007. Under the terms of the existing order, earnings are evaluated annually against a retail return on common equity range of 10.25% to 12.25%. Two-thirds of any earnings above the 12.25% return are applied to rate refunds, with the remaining one-third retained by Georgia Power. The order required Georgia Power to file a general rate case by July 1, 2007.

Georgia Power expects the Georgia PSC to issue a final order in this matter on December 20, 2007. In addition to the traditional test period request, Georgia Power filed information for a three-year rate plan option that includes additional increases of approximately \$191 million, or 2.65%, and \$45 million, or 0.61%, in retail revenues effective January 1, 2009 and 2010, respectively, to cover the costs of additional environmental controls and certified PPAs.

The final outcome of this matter cannot now be determined. See MANAGEMENT'S DISCUSSION AND ANALYSIS - RESULTS OF OPERATIONS - Future Earnings Potential - PSC Matters - Rate Plans of Georgia Power in Item 7 and Note 3 to the financial statements of Georgia Power under Retail Regulatory Matters - Rate Plans in Item 8 of the Form 10-K and Note (K) to the Condensed Financial Statements herein for additional information.

Other Matters

See Note 3 to the financial statements of Georgia Power under Property Tax Dispute in Item 8 of the Form 10-K for information on the property tax dispute with Monroe County, Georgia. The administrative appeals and

Table of Contents

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

notices of arbitration have been expanded to include tax year 2006. The appeals remain stayed pending the outcome of the related litigation. On March 30, 2007, the Georgia Court of Appeals reversed the trial court and ruled that the Monroe County Board of Tax Assessors (Monroe Board) had exceeded its legal authority and remanded the case for entry of an injunction prohibiting the Monroe Board from collecting taxes based on its independent valuation of Plant Scherer. In April 2007, the Monroe Board filed a petition with the Georgia Supreme Court requesting review of the decision of the Georgia Court of Appeals. On July 16, 2007, the Georgia Supreme Court agreed to hear the Monroe Board's requested review of this decision. The suit could impact all co-owners. Georgia Power could be subject to total taxes through June 30, 2007 of up to \$20.4 million, plus penalties and interest. The ultimate outcome of this matter cannot currently be determined.

Georgia Power is subject to certain claims and legal actions arising in the ordinary course of business. In addition, Georgia Power's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental requirements such as opacity and air quality standards, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such pending or potential litigation against Georgia Power cannot be predicted at this time; however, for current proceedings not specifically reported herein or in Note 3 to the financial statements of Georgia Power in Item 8 of the Form 10-K, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on Georgia Power's financial statements.

See the Notes to the Condensed Financial Statements herein for discussion of various other contingencies, regulatory matters, and other matters being litigated which may affect future earnings potential.

ACCOUNTING POLICIES**Application of Critical Accounting Policies and Estimates**

Georgia Power prepares its financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements of Georgia Power in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Georgia Power's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. Also see MANAGEMENT'S DISCUSSION AND ANALYSIS ACCOUNTING POLICIES Application of Critical Accounting Policies and Estimates of Georgia Power in Item 7 of the Form 10-K for a complete discussion of Georgia Power's critical accounting policies and estimates related to Electric Utility Regulation, Contingent Obligations, and Unbilled Revenues.

New Accounting Standards*Income Taxes*

On January 1, 2007, Georgia Power adopted FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes. FIN 48 requires companies to determine whether it is more likely than not that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. It also provides guidance on the recognition, measurement, and classification of income tax uncertainties, along with any related interest and penalties. The provisions of FIN 48 were applied to all tax positions beginning January 1, 2007. The adoption of FIN 48 did not have a material impact on Georgia Power's financial statements. See Note (I) to the Condensed Financial Statements herein for additional information.

Table of Contents

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Fair Value Measurement

The FASB issued FASB Statement No. 157 (SFAS No. 157), Fair Value Measurements in September 2006. This standard provides guidance on how to measure fair value where it is permitted or required under other accounting pronouncements. SFAS No. 157 also requires additional disclosures about fair value measurements. Georgia Power plans to adopt SFAS No. 157 on January 1, 2008 and is currently assessing the impact of this standard.

Fair Value Option

In February 2007, the FASB issued FASB Statement No. 159 (SFAS No. 159), Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115. This standard permits an entity to choose to measure many financial instruments and certain other items at fair value. Georgia Power plans to adopt SFAS No. 159 on January 1, 2008 and is currently assessing its impact.

FINANCIAL CONDITION AND LIQUIDITY

Overview

Georgia Power's financial condition and liquidity position remained stable at June 30, 2007. Net cash provided from operating activities totaled \$381.2 million for the first six months of 2007, compared to \$322.9 million for the corresponding period in 2006. The \$58.3 million increase in cash provided from operating activities in the first six months of 2007 is primarily due to higher total retail revenues and less cash used for working capital primarily through lower inventory additions. Net cash used for investing activities totaled \$763.5 million primarily due to gross property additions to utility plant of \$795.8 million in the first six months of 2007. These additions were primarily related to construction of transmission and distribution facilities, purchases of nuclear fuel, and installation of equipment to comply with environmental standards. Net cash provided from financing activities totaled \$392.7 million for the first six months of 2007, compared to \$175.8 million for the corresponding period in 2006. The net change was primarily the result of the issuance of new senior notes.

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Capital Requirements and Contractual Obligations of Georgia Power in Item 7 of the Form 10-K for a description of Georgia Power's capital requirements for its construction program, scheduled maturities of long-term debt, as well as related interest, preferred stock dividends, lease obligations, purchase commitments, and trust funding requirements. Since December 31, 2006, Georgia Power has entered into four additional PPAs totaling approximately 1,863 MW annually. These contracts begin in 2009 and 2010 and are expected to result in additional obligations of \$1.3 million in 2008-2009, \$191.4 million in 2010-2011, and \$1.08 billion thereafter. Of the total capacity, approximately 561 MW will expire in 2017, 1,274 MW in 2025, and 28 MW in 2029. These contracts are subject to certification by the Georgia PSC. Two of the contracts are with Southern Power and are also subject to FERC approval. Approximately \$303.1 million will be required through June 30, 2008 for redemptions and maturities of long-term debt.

Sources of Capital

Georgia Power plans to obtain the funds required for construction and other purposes from sources similar to those utilized in the past. Recently, Georgia Power has primarily utilized funds from operating cash flows, short-term debt, external security offerings, and equity contributions from Southern Company. However, the amount, type, and timing of any future financings, if needed, will depend upon regulatory approval, prevailing market conditions and other factors. See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL

Table of Contents

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CONDITION AND LIQUIDITY Sources of Capital of Georgia Power in Item 7 of the Form 10-K for additional information.

Georgia Power's current liabilities frequently exceed current assets because of the continued use of short-term debt as a funding source to meet scheduled maturities of long-term debt as well as cash needs which can fluctuate significantly due to the seasonality of the business. To meet short-term cash needs and contingencies, Georgia Power had at June 30, 2007 approximately \$27.2 million of cash and cash equivalents and \$902 million of unused credit arrangements with banks. Of the unused credit arrangements, \$40 million expire in 2008 and \$862 million expire in 2011. Subsequent to June 30, 2007, Georgia Power and its lenders extended the 2011 maturity to 2012. Of the facilities that expire in 2008, all contain provisions allowing two-year term loans executable at expiration. Georgia Power expects to renew its credit facilities, as needed, prior to expiration. See Note 6 to the financial statements of Georgia Power under Bank Credit Arrangements in Item 8 of the Form 10-K for additional information. These unused credit arrangements provide liquidity support to Georgia Power's obligations with respect to variable rate pollution control bonds and commercial paper. Georgia Power may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper and extendible commercial notes at the request and for the benefit of Georgia Power and other Southern Company subsidiaries. At June 30, 2007, Georgia Power had approximately \$555.4 million of commercial paper, \$107.4 million of extendible commercial notes, and \$150 million of bank loans outstanding. Subsequent to June 30, 2007, Georgia Power entered into a \$300 million two-month bank borrowing to provide additional liquidity. Management believes that the need for working capital can be adequately met by utilizing commercial paper programs, short-term bank loans, and lines of credit without maintaining large cash balances.

Credit Rating Risk

Georgia Power does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change to BBB- or Baa3 or below. These contracts are primarily for physical electricity purchases and sales. At June 30, 2007, the maximum potential collateral requirements at a BBB- or Baa3 rating were approximately \$8 million. The maximum potential collateral requirements at a rating below BBB- or Baa3 were approximately \$388 million. Generally, collateral may be provided for by a Southern Company guaranty, letter of credit, or cash. Georgia Power, along with all members of the Power Pool, is also party to certain agreements that could require collateral and/or accelerated payment in the event of a credit rating change to below investment grade for it and/or Alabama Power. These agreements are primarily for natural gas and power price risk management activities. At June 30, 2007, Georgia Power's total exposure to these types of agreements was \$34 million. Subsequent to June 30, 2007, certain Southern Company subsidiaries entered into additional agreements which could increase this exposure. The increase in exposure, if any, is currently \$8 million.

Market Price Risk

Georgia Power's market risk exposures relative to interest rate changes have not changed materially compared with the December 31, 2006 reporting period. In addition, Georgia Power is not aware of any facts or circumstances that would significantly affect such exposures in the near term.

Due to cost-based rate regulations, Georgia Power has limited exposure to market volatility in interest rates, commodity fuel prices, and prices of electricity. To mitigate residual risks relative to movements in electricity prices, Georgia Power enters into physical fixed-price contracts for the purchase and sale of electricity through the wholesale electricity market. Georgia Power continues to manage a fuel hedging program at the instruction of the Georgia PSC.

Table of Contents

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The fair value of derivative energy contracts at June 30, 2007 was as follows:

	Second Quarter 2007 Changes	Year-to-Date 2007 Changes
	Fair Value	
	<i>(in thousands)</i>	
Contracts beginning of period	\$ 3,771	\$(38,003)
Contracts realized or settled	1,037	13,535
New contracts at inception		
Changes in valuation techniques		
Current period changes (a)	(26,266)	3,010
Contracts at June 30, 2007	\$(21,458)	\$(21,458)

(a) Current period changes also include the changes in fair value of new contracts entered into during the period, if any.

**Source of June 30, 2007
Valuation Prices**

	Total Fair Value	Maturity Year 1	1-3 Years
	<i>(in thousands)</i>		
Actively quoted	\$(21,373)	\$(25,713)	\$4,340
External sources	(85)	(85)	
Models and other methods			
Contracts at June 30, 2007	\$(21,458)	\$(25,798)	\$4,340

Unrealized gains and losses from mark to market adjustments on derivative contracts related to Georgia Power's fuel hedging programs are recorded as regulatory assets and liabilities. Realized gains and losses from these programs are included in fuel expense and are recovered through Georgia Power's fuel cost recovery mechanism. Gains and losses on derivative contracts that are not designated as hedges are recognized in the statements of income as incurred.

At June 30, 2007, the fair value gain/(loss) of all derivative energy contracts was reflected in the financial statements as follows:

Amounts*(in thousands)*

Regulatory assets, net	\$ (21,458)
Accumulated other comprehensive income	
Net income	
Total fair value	\$ (21,458)

Unrealized pre-tax gains and losses on energy contracts recognized in income were not material for any period presented.

For additional information, see MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Market Price Risk of Georgia Power in Item 7 and Notes 1 and 6 to the financial statements of Georgia Power under Financial Instruments in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements herein.

FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Financing Activities

In the first six months of 2007, Georgia Power issued \$250 million of Series 2007A 5.65% Senior Notes due March 1, 2037, \$450 million of Series 2007B 5.70% Senior Notes due June 1, 2017, and \$150 million of Series 2007C Floating Rate Senior Notes with a final maturity date of July 18, 2012. The proceeds were used to repay a portion of Georgia Power's outstanding short-term indebtedness, to fund the redemption in June of \$454 million outstanding principal amount of its Series E 7.125% Junior Subordinated Notes due March 31, 2042 and the related 7.125% Preferred Securities of Georgia Power Capital Trust V, and for other general corporate purposes, including Georgia Power's continuing construction activities. Georgia Power also terminated derivative transactions related to the issuance of the Series 2007A 5.65% Senior Notes at a loss of \$3.9 million, and the Series 2007B 5.70% Senior Notes at a gain of \$8.8 million. The loss and the gain will both be amortized over a 10-year period, reflecting the original hedge period. Subsequent to June 30, 2007, Georgia Power issued \$300 million of Series 2007D 6.375% Senior Notes due July 15, 2047 and terminated related interest rate derivatives at a gain of \$5.7 million. The gain will be amortized over a 30-year period, reflecting the original hedge period. Proceeds from the issuance were used to repay a portion of its outstanding short-term indebtedness. In addition, Georgia Power borrowed \$300 million under a short-term credit agreement that matures in September 2007, the proceeds of which were used to repay Georgia Power's \$300 million senior notes at maturity on July 15, 2007. On August 1, 2007, Georgia Power repaid a \$150 million bank loan. Also, in the first six months of 2007, Georgia Power entered into derivative transactions designed to mitigate interest rate risk related to planned future debt issuances. See Note (F) to the Condensed Financial Statements for further details. In addition to any financings that may be necessary to meet capital requirements and contractual obligations, Georgia Power plans to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
SECOND QUARTER 2007 vs. SECOND QUARTER 2006
AND
YEAR-TO-DATE 2007 vs. YEAR-TO-DATE 2006

OVERVIEW

Gulf Power operates as a vertically integrated utility providing electricity to retail customers within its traditional service area located in northwest Florida and to wholesale customers in the Southeast. Many factors affect the opportunities, challenges, and risks of Gulf Power's business of selling electricity. These factors include the ability to maintain a stable regulatory environment, to achieve energy sales growth, and to effectively manage and secure timely recovery of rising costs. These costs include those related to growing demand, increasingly stringent environmental standards, fuel prices, and storm restoration costs. Appropriately balancing environmental expenditures with customer prices will continue to challenge Gulf Power for the foreseeable future.

Gulf Power continues to focus on several key performance indicators. These indicators include customer satisfaction, plant availability, system reliability, and net income. For additional information on these indicators, see MANAGEMENT'S DISCUSSION AND ANALYSIS OVERVIEW Key Performance Indicators of Gulf Power in Item 7 of the Form 10-K.

RESULTS OF OPERATIONS**Net Income**

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(0.7)	(3.5)	\$5.7	16.5

Gulf Power's net income after dividends on preference stock for the second quarter 2007 was \$21.3 million compared to \$22.0 million for the corresponding period in 2006. The decrease in the second quarter 2007 compared to the corresponding period in 2006 was primarily due to a decrease in retail revenues, excluding revenues related to fuel and other cost recovery.

Gulf Power's net income after dividends on preference stock for year-to-date 2007 was \$40.1 million compared to \$34.4 million for the corresponding period in 2006. The year-to-date increase was primarily due to an increase in retail revenues, excluding revenues related to fuel and other cost recovery.

Retail Revenues

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(2.3)	(0.9)	\$38.0	8.9

In the second quarter 2007, retail revenues were \$243.4 million compared to \$245.7 million in the corresponding period in 2006.

For year-to-date 2007, retail revenues were \$463.0 million compared to \$425.0 million for the corresponding period in 2006.

Table of Contents

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Details of retail revenues are as follows:

	Second Quarter 2007		Year-to-Date 2007	
	<i>(in millions)</i>	<i>(% change)</i>	<i>(in millions)</i>	<i>(% change)</i>
Retail prior year	\$245.7		\$425.0	
Estimated change in				
Rates and pricing	0.6	0.3	1.2	0.3
Sales growth	1.0	0.4	4.1	0.9
Weather	(4.3)	(1.8)	(1.2)	(0.3)
Fuel and other cost recovery	0.4	0.2	33.9	8.0
Retail current year	\$243.4	(0.9)	\$463.0	8.9

Revenues associated with changes in rates and pricing increased in the second quarter 2007 and increased year-to-date 2007, when compared to corresponding periods in 2006, due to cost recovery provisions. These cost recovery provisions include energy conservation costs and environmental compliance costs. Annually, Gulf Power petitions the Florida PSC for recovery of projected costs including any true-up amount from prior periods, and approved rates are implemented each January. The recovery provisions include related expenses and a return on average net investment. See Note 1 to the financial statements of Gulf Power under Revenues, and Environmental Remediation Cost Recovery and Note 3 to the financial statements under Retail Regulatory Matters Environmental Cost Recovery in Item 8 of the Form 10-K for additional information.

Revenues attributable to changes in sales growth increased in the second quarter of 2007 when compared to the same period in 2006 primarily from a 3.9% increase in KWH energy sales to commercial customers. This increase is offset by a decrease of 12.8% in industrial energy KWH sales. For year-to-date 2007, revenues attributable to changes in sales growth increased when compared to the corresponding period in 2006 primarily from a 1.5% increase in KWH energy sales to residential customers and a 5.0% increase in KWH energy sales to commercial customers. These increases are offset by a 9.2% decrease in industrial KWH energy sales. The increase for both periods for residential and commercial customers is primarily related to customer growth offset by a slight decrease in average residential customer usage. The decrease in industrial KWH energy sales for both periods is primarily due to increased customer cogeneration due to lower cost of natural gas along with decreased demand due to customer process changes.

Revenues associated with changes in weather decreased in the second quarter 2007 when compared to the corresponding period in 2006 as a result of a 4.9% decrease in KWH energy sales to residential and commercial customers. Revenues associated with changes in weather decreased year-to-date 2007 when compared to the corresponding period in 2006 as a result of a 0.7% decrease in KWH energy sales to residential and commercial customers. The decreases for both periods are a result of milder weather in 2007.

Revenues associated with changes in fuel and other cost recovery increased in the second quarter 2007 and year-to-date 2007, when compared to corresponding periods in 2006, primarily due to cost recovery provisions. These cost recovery provisions include fuel expenses, the energy component of purchased power costs, and purchased power capacity costs. Annually, Gulf Power petitions the Florida PSC for recovery of projected costs including any true-up amount from prior periods, and approved rates are implemented each January. Cost recovery provisions also include revenues related to the recovery of storm damage restoration costs. The recovery provisions generally equal the related expenses and have no material effect on net income. See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL FERC and Florida PSC Matters Retail Fuel Cost Recovery herein and

Table of Contents

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Item 7 and Note 1 to the financial statements of Gulf Power under Revenues, and Property Damage Reserve and Note 3 to the financial statements under Retail Regulatory Matters Storm Damage Cost Recovery in Item 8 of the Form 10-K for additional information.

Wholesale Revenues Affiliates

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$5.4	35.0	\$(7.1)	(10.5)

Wholesale revenues from affiliates will vary depending on demand and the availability and cost of generating resources at each company within the Southern Company system. These affiliate sales are made in accordance with the IIC, as approved by the FERC. These transactions do not have a significant impact on earnings since this energy is generally sold at marginal cost.

In the second quarter 2007, wholesale revenues from affiliates were \$20.8 million compared to \$15.4 million in the corresponding period in 2006. The increase was primarily a result of increases in sales volume of KWH to the Power Pool.

For year-to-date 2007, wholesale revenues from affiliates were \$60.9 million compared to \$68.0 million for the same period in 2006. The decrease was primarily a result of lower actual gas prices.

Other Revenues

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$1.9	16.7	\$4.8	22.2

In the second quarter 2007, other revenues were \$13.2 million compared to \$11.3 million in the same period in 2006.

For year-to-date 2007, other revenues were \$26.4 million compared to \$21.6 million for the same period in 2006.

These increases were primarily a result of other energy services and higher franchise fees, which have no impact on earnings. Franchise fees are generally proportional to sales revenue and are offset by franchise and gross receipt taxes. The increased revenues from other energy services did not have a material impact on earnings since they were offset by associated expenses.

Fuel and Purchased Power Expenses

	Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
Fuel	\$12.1	10.0	\$37.3	15.4
Purchased power-non-affiliates	(2.5)	(56.9)	(6.0)	(64.2)
Purchased power-affiliates	(4.7)	(30.8)	(4.6)	(20.9)
Total fuel and purchased power expenses	\$ 4.9		\$26.7	

In the second quarter 2007, fuel expense was \$133.0 million compared to \$120.9 million in the same period in 2006. This change resulted from a \$5.5 million increase related to a higher average cost of fuel as well as a \$6.6 million increase due to the KWH volume generated. See FUTURE EARNINGS POTENTIAL FERC and Florida PSC Matters Retail Fuel Cost Recovery herein for additional information. In the second quarter 2007,

Table of Contents

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

total purchased power was \$12.4 million compared to \$19.6 million in the same period in 2006. The decrease was due to a \$9.6 million decrease in KWH purchases offset by a \$2.4 million increase resulting from higher average cost per net KWH.

For year-to-date 2007, fuel expense was \$279.5 million compared to \$242.2 million for the same period in 2006. This change resulted primarily from a \$26.2 million increase related to a higher average cost of fuel as well as an \$11.1 million increase due to the KWH volume generated. See FUTURE EARNINGS POTENTIAL – FERC and Florida PSC Matters – Retail Fuel Cost Recovery herein for additional information. For year-to-date 2007, total purchased power was \$20.9 million compared to \$31.5 million for the same period in 2006. The decrease was primarily due to an \$8.8 million decrease in KWH purchased and a \$1.8 million decrease resulting from lower average cost per net KWH.

Average Cost	Second Quarter 2007	Second Quarter 2006	% change	Year-to-Date 2007	Year-to-Date 2006	% change
	<i>(cents per net KWH)</i>			<i>(cents per net KWH)</i>		
Fuel	3.33	3.19	4.39	3.41	3.09	10.36
Purchased power	7.71	6.23	23.76	5.92	6.42	(7.79)

Since energy expenses are generally offset by revenues through Gulf Power's fuel cost recovery mechanism, these expenses do not have a significant impact on net income.

Other Operations Expense

Second Quarter 2007 vs. Second Quarter 2006

Year-to-Date 2007 vs. Year-to-Date 2006

*(change in millions)**(% change)**(change in millions)**(% change)*

\$0.2

0.4

\$2.7

3.1

The change in the second quarter 2007 compared with the second quarter 2006 other operations expense is not material. For year-to-date 2007, other operations expense was \$93.0 million compared to \$90.3 million for the same period in 2006. The increase was primarily due to other energy services. The increased expenses from other energy services did not have a material impact on earnings since they were offset by associated revenues.

Maintenance Expense

Second Quarter 2007 vs. Second Quarter 2006

Year-to-Date 2007 vs. Year-to-Date 2006

*(change in millions)**(% change)**(change in millions)**(% change)*

\$3.4

20.5

\$1.9

6.3

In the second quarter 2007, maintenance expense was \$19.5 million compared to \$16.1 million in the same period in 2006. For year-to-date 2007, maintenance expense was \$32.6 million compared to \$30.7 million for the same period in 2006. These increases were primarily due to unscheduled maintenance performed on power generation facilities.

<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(0.5)	(49.6)	\$(1.1)	(49.7)

In the second quarter 2007, interest expense to affiliate trusts was \$0.6 million compared to \$1.1 million in the same period in 2006. For year-to-date 2007, interest expense to affiliate trusts was \$1.2 million compared to \$2.3 million for the same period in 2006. These decreases were due to the redemption of long-term debt payable to affiliated trusts in December 2006.

Income Taxes

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(0.7)	(5.1)	\$3.0	14.1

In the second quarter 2007, income tax expense was \$13.0 million compared to \$13.7 million in the same period in 2006. The decrease was primarily a result of lower earnings before income taxes.

For year-to-date 2007, income tax expense was \$24.4 million compared to \$21.4 million for the same period in 2006. The increase was primarily a result of higher earnings before income taxes.

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Gulf Power's future earnings potential. The level of Gulf Power's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of Gulf Power's business of selling electricity. These factors include Gulf Power's ability to maintain a stable regulatory environment that continues to allow for the recovery of all prudently incurred costs during a time of increasing costs. Future earnings in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in Gulf Power's service area. For additional information relating to these issues, see RISK FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL of Gulf Power in Item 7 of the Form 10-K.

Table of Contents

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Environmental Matters

Compliance costs related to the Clean Air Act and other environmental regulations could affect earnings if such costs cannot be fully recovered in rates on a timely basis. See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters of Gulf Power in Item 7 and Note 3 to the financial statements of Gulf Power under Environmental Matters in Item 8 of the Form 10-K for additional information.

Eight-Hour Ozone Regulations

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters Environmental Statutes and Regulations Air Quality of Gulf Power in Item 7 of the Form 10-K for additional information regarding revisions to the eight-hour ozone air quality standard. On June 20, 2007, the EPA proposed additional revisions to the current eight-hour ozone standard which, if enacted, could result in designation of new nonattainment areas within Gulf Power's service territory. The EPA has requested comment and is expected to make a determination regarding finalization of a revised standard in 2008. The ultimate outcome of this matter cannot be determined at this time.

Fine Particulate Matter Regulations

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters Environmental Statutes and Regulations Air Quality of Gulf Power in Item 7 of the Form 10-K for additional information regarding nonattainment designations for the fine particulate matter air quality standard. In March 2007, the EPA finalized its fine particulate matter implementation rule, requiring submittal of state plans for addressing the nonattainment designations by April 2008. The ultimate outcome of this matter depends on the development and submittal of those state plans and the resolution of pending legal challenges and, therefore, cannot be determined at this time.

Florida Greenhouse Gas Executive Orders

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters - Global Climate Issues of Gulf Power in Item 7 of the Form 10-K for additional information regarding domestic efforts to reduce greenhouse gases. On July 13, 2007, the Governor of the State of Florida signed three executive orders addressing reduction of greenhouse gas emissions within the state, including statewide emission reduction targets beginning in 2017. Included in the orders is a directive to the Secretary of Environmental Protection to develop rules adopting maximum allowable emissions levels of greenhouse gases for electric utilities, consistent with the statewide emission reduction targets, and a request to the Florida PSC to initiate rulemaking requiring utilities to produce at least 20% of their electricity from renewable sources. The impact of these orders on Gulf Power will depend on the development, adoption, and implementation of any rules governing greenhouse gas emissions, and the ultimate outcome cannot be determined at this time.

Georgia Multi-Pollutant Rule

On June 27, 2007, the State of Georgia approved a new multi-pollutant rule for certain existing coal-fired electric utility steam generating units in Georgia. The rule is designed to reduce emissions of mercury, sulfur dioxide, nitrogen oxide, and fine particulates state-wide by requiring installation of specified control technologies at each affected unit by a date certain between December 31, 2008 and June 1, 2015. This rule will require the installation of a new pollution control system at Plant Scherer Unit 3 which Gulf Power co-owns with Georgia Power. The ultimate impact of this rule on Gulf Power cannot be determined at this time.

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Environmental Remediation

During the second quarter 2007, Gulf Power increased its estimated liability for environmental remediation projects by \$12.8 million as a result of changes in the costs estimates to remediate substation sites. These projects have been approved by the Florida PSC for recovery through the environmental cost recovery clause; therefore, there was no impact on Gulf Power's net income as a result of these revised estimates. See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters Environmental Remediation of Gulf Power in Item 7 and Note 3 to the financial statements of Gulf Power under Environmental Matters Environmental Remediation in Item 8 of the Form 10-K for additional information.

FERC and Florida PSC Matters

Market-Based Rate Authority

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL FERC Matters Market-Based Rate Authority of Gulf Power in Item 7 and Note 3 to the financial statements of Gulf Power under FERC Matters Market-Based Rate Authority in Item 8 of the Form 10-K for information regarding the proceedings initiated by the FERC in December 2004 to assess Southern Company's generation dominance within its retail service territory and in May 2005 to determine whether Southern Company satisfies the other three parts of the FERC's market-based rate analysis: transmission market power, barriers to entry, and affiliate abuse or reciprocal dealing. In late June and July 2007, hearings were held in the December 2004 proceeding and Southern Company anticipates a decision in November 2007. On June 21, 2007, the FERC issued an order terminating the May 2005 proceeding, based upon its final approval of the settlement in the IIC proceeding discussed below.

In addition, on June 21, 2007, the FERC issued its final rule regarding market-based rate authority. The FERC generally retained its current market-based rate standards. The impact of this order and its effect on the generation dominance proceeding cannot now be determined.

Intercompany Interchange Contract

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL FERC Matters Intercompany Interchange Contract of Gulf Power in Item 7 and Note 3 to the financial statements of Gulf Power under FERC Matters Intercompany Interchange Contract in Item 8 of the Form 10-K for information regarding the proceeding initiated by the FERC in May 2005 to examine (1) the provisions of the IIC among Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Power, and SCS, as agent, under the terms of which the Power Pool is operated, and, in particular, the propriety of the continued inclusion of Southern Power as a party to the IIC, (2) whether any parties to the IIC have violated the FERC's standards of conduct applicable to utility companies that are transmission providers, and (3) whether Southern Company's code of conduct defining Southern Power as a system company rather than a marketing affiliate is just and reasonable. On April 19, 2007, the FERC approved, with certain modifications, the compliance filing submitted by Southern Company on November 6, 2006. The compliance plan largely involves functional separation and information restrictions related to marketing activities conducted on behalf of Southern Power. Implementation of the plan is not expected to have a material impact on Gulf Power's financial statements.

Table of Contents

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Retail Fuel Cost Recovery

Gulf Power has established fuel cost recovery rates approved by the Florida PSC. In recent years, Gulf Power has experienced higher than expected fuel costs for coal and natural gas. If the projected fuel revenue over or under recovery exceeds 10% of the projected fuel costs for the period, Gulf Power is required to notify the Florida PSC and to indicate if an adjustment to the fuel cost recovery factor is being requested. Gulf Power filed such notice with the Florida PSC on June 15, 2007, but no adjustment to the factor was requested. Under recovered fuel costs at June 30, 2007 totaled \$65.6 million, and are included in under recovered regulatory clause revenues on Gulf Power's Condensed Balance Sheets herein. Fuel cost recovery revenues, as recorded on the financial statements, are adjusted for differences in actual recoverable costs and amounts billed in current regulated rates. Accordingly, any changes in the billing factor would have no significant effect on Gulf Power's revenues or net income, but will affect cash flow. See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - PSC Matters - Fuel Cost Recovery of Gulf Power in Item 7 and Note 1 to the financial statements of Gulf Power under Revenues in Item 8 of the Form 10-K for additional information.

Other Matters

See Note 3 to the financial statements of Gulf Power under Property Tax Dispute in Item 8 of the Form 10-K for information on the property tax dispute with Monroe County, Georgia. The administrative appeals and notices of arbitration have been expanded to include tax year 2006. The appeals remain stayed pending the outcome of the related litigation. On March 30, 2007, the Georgia Court of Appeals reversed the trial court and ruled that the Monroe County Board of Tax Assessors (Monroe Board) had exceeded its legal authority and remanded the case for entry of an injunction prohibiting the Monroe Board from collecting taxes based on its independent valuation of Plant Scherer. On July 16, 2007, the Georgia Supreme Court agreed to hear the Monroe Board's requested review of this decision. Gulf Power could be subject to total taxes through June 30, 2007 of up to \$3.9 million, plus penalties and interest. In accordance with Gulf Power's unit power sales contract for Plant Scherer, such property taxes would be recoverable from the customer. The ultimate outcome of this matter cannot currently be determined.

Gulf Power is subject to certain claims and legal actions arising in the ordinary course of business. In addition, Gulf Power's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental requirements such as opacity and air quality standards, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such pending or potential litigation against Gulf Power cannot be predicted at this time; however, for current proceedings not specifically reported herein or in Note 3 to the financial statements of Gulf Power in Item 8 of the Form 10-K, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on Gulf Power's financial statements.

See Note (B) to the Condensed Financial Statements herein for discussion of various other contingencies, regulatory matters, and other matters being litigated which may affect future earnings potential.

FINANCIAL CONDITION AND RESULTS OF OPERATIONS

ACCOUNTING POLICIES

Application of Critical Accounting Policies and Estimates

Gulf Power prepares its financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements of Gulf Power in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Gulf Power's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. See MANAGEMENT'S DISCUSSION AND ANALYSIS ACCOUNTING POLICIES Application of Critical Accounting Policies and Estimates of Gulf Power in Item 7 of the Form 10-K for a complete discussion of Gulf Power's critical accounting policies and estimates related to Electric Utility Regulation, Contingent Obligations, and Unbilled Revenues.

New Accounting Standards

Income Taxes

On January 1, 2007, Gulf Power adopted FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes. FIN 48 requires companies to determine whether it is more likely than not that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. It also provides guidance on the recognition, measurement, and classification of income tax uncertainties, along with any related interest and penalties. The provisions of FIN 48 were applied to all tax positions beginning January 1, 2007. The adoption of FIN 48 did not have a material impact on Gulf Power's financial statements.

Fair Value Measurement

The FASB issued FASB Statement No. 157 (SFAS No. 157), Fair Value Measurements in September 2006. This standard provides guidance on how to measure fair value where it is permitted or required under other accounting pronouncements. SFAS No. 157 also requires additional disclosures about fair value measurements. Gulf Power plans to adopt SFAS No. 157 on January 1, 2008 and is currently assessing the impact of this standard.

Fair Value Option

In February 2007, the FASB issued FASB Statement No. 159 (SFAS No. 159), Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115. This standard permits an entity to choose to measure many financial instruments and certain other items at fair value. Gulf Power plans to adopt SFAS No. 159 on January 1, 2008 and is currently assessing its impact.

FINANCIAL CONDITION AND LIQUIDITY

Overview

Gulf's financial condition and liquidity position remained stable at June 30, 2007. Net cash provided from operating activities totaled \$73.6 million for the first six months of 2007, compared to \$73.3 million for the corresponding period in 2006. The \$0.3 million increase in cash provided from operating activities in the first six months of 2007 is primarily due to a decrease in cash outflow for materials and supplies, partially offset by an increase in cash outflows for accounts payable. Net cash used for investing activities totaled \$105.8 million primarily due to gross property additions to utility plant of \$90.5 million in the first six months of 2007. These additions were primarily related to installation of equipment to comply with environmental standards and

Table of Contents

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

distribution facilities construction. Net cash provided from financing activities totaled \$29.2 million for the first six months of 2007, compared to \$19.6 million for the corresponding period in 2006 primarily due to the issuance of additional long-term debt partially offset by decreased notes payable.

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Capital Requirements and Contractual Obligations of Gulf Power in Item 7 of the Form 10-K for a description of Gulf Power's capital requirements for its construction program, lease obligations, preference stock dividends, purchase commitments, and trust funding requirements. Gulf Power has no maturities or redemptions of long-term debt required by June 30, 2008.

On May 11, 2007 the Florida PSC issued an order approving two PPAs that Gulf Power had previously entered into, one of which is with Southern Power, for a total of 487 MW annually from June 2009 through May 2014. The PPA with Southern Power was approved by the FERC on July 13, 2007. See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Capital Requirements and Contractual Obligations of Gulf Power in Item 7 of the Form 10-K for additional information.

Sources of Capital

Gulf Power plans to obtain the funds required for construction and other purposes from sources similar to those utilized in the past. Recently, Gulf Power has primarily utilized funds from operating cash flows, short-term debt, external security offerings, and equity contributions from Southern Company. However, the amount, type, and timing of any future financings, if needed, will depend upon regulatory approval, prevailing market conditions, and other factors. See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Sources of Capital of Gulf Power in Item 7 of the Form 10-K for additional information.

Gulf Power's current liabilities frequently exceed current assets because of the continued use of short-term debt as a funding source to meet scheduled maturities of long-term debt as well as cash needs which can fluctuate significantly due to the seasonality of the business. To meet short-term cash needs and contingencies, Gulf Power had at June 30, 2007 approximately \$4.6 million of cash and cash equivalents and \$125 million of unused committed lines of credit with banks. Of the unused credit agreements, \$90 million expire in 2007 and \$35 million expire in 2008 (of which \$100 million contain provisions allowing one-year term loans). Gulf Power expects to renew its credit facilities, as needed, prior to expiration. See Note 6 to the financial statements of Gulf Power under Bank Credit Arrangements in Item 8 of the Form 10-K for additional information. These credit arrangements provide liquidity support to Gulf Power's obligations with respect to variable rate pollution control bonds and commercial paper. Gulf Power may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper and extendible commercial notes at the request and for the benefit of Gulf Power and other Southern Company subsidiaries. At June 30, 2007, Gulf Power had \$23.8 million of commercial paper outstanding. Management believes that the need for working capital can be adequately met by utilizing commercial paper programs and lines of credit without maintaining large cash balances.

Credit Rating Risk

Gulf Power does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change to BBB- or Baa3, or below. Generally, collateral may be provided for by a Southern Company guaranty, letter of credit, or cash. These contracts are

Table of Contents

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

primarily for physical electricity purchases and sales. At June 30, 2007, the maximum potential collateral requirements at a BBB- or Baa3 rating were approximately \$23 million. The maximum potential collateral requirements at a rating below BBB- or Baa3 were approximately \$46 million. Gulf Power, along with all members of the Power Pool, is also party to certain agreements that could require collateral and/or accelerated payment in the event of a credit rating change to below investment grade for Alabama Power and/or Georgia Power. These agreements are primarily for natural gas and power price risk management activities. At June 30, 2007, Gulf Power's total exposure to these types of agreements was \$34 million. Subsequent to June 30, 2007, certain Southern Company subsidiaries entered into additional agreements which could increase this exposure. The increase in exposure, if any, is currently \$8 million.

Market Price Risk

Gulf Power's market risk exposures relative to interest rate changes have not changed materially compared with the December 31, 2006 reporting period. In addition, Gulf Power is not aware of any facts or circumstances that would significantly affect such exposures in the near term.

Due to cost-based rate regulation, Gulf Power has limited exposure to market volatility in interest rates, commodity fuel prices, and prices of electricity. To mitigate residual risks relative to movements in electricity prices, Gulf Power enters into physical fixed-price contracts for the purchase and sale of electricity through the wholesale electricity market. Gulf Power has also implemented a fuel-hedging program with the approval of the Florida PSC.

The fair value of derivative energy contracts at June 30, 2007 was as follows:

	Second Quarter 2007 Changes	Year-to-Date 2007 Changes
	Fair Value	
	<i>(in thousands)</i>	
Contracts beginning of period	\$ 901	\$(7,186)
Contracts realized or settled	44	3,133
New contracts at inception		
Changes in valuation techniques

and losses on derivative energy contracts that are not designated as hedges are recognized in the statements of income as incurred.

At June 30, 2007, the fair value gain/(loss) of derivative energy contracts was reflected in the financial statements as follows:

	Amounts
	<i>(in thousands)</i>
Regulatory assets, net	\$ (2,139)
Accumulated other comprehensive income	
Net income	
Total fair value	\$ (2,139)

Unrealized pre-tax gains and losses recognized in income were not material for any period presented.

For additional information, see MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Market Price Risk of Gulf Power in Item 7 and Notes 1 and 6 to the financial statements of Gulf Power under Financial Instruments in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements herein.

Financing Activities

In January 2007, Gulf Power issued 800,000 shares of common stock to Southern Company at \$100 stated value per share (\$80 million aggregate purchase price). The proceeds were used to repay a portion of Gulf Power's short-term indebtedness and for other general corporate purposes.

In June 2007, Gulf Power issued \$85 million of Series 2007A 5.90% Senior Notes due June 15, 2017. Proceeds were used to repay a portion of its outstanding short-term indebtedness and for general corporate purposes, including Gulf Power's continuous construction program.

Gulf Power entered into derivative transactions in March 2007 designed to mitigate interest rate risk related to future planned debt issuances. The total notional amount of these derivatives was \$165 million. Of this \$165 million, \$85 million was terminated in June 2007 when the underlying security was issued at a gain of \$3 million. This gain will be amortized over a 10-year period. See Note (F) to the Condensed Financial Statements herein for further details.

In addition to any financings that may be necessary to meet capital requirements, contractual obligations, and storm-recovery, Gulf Power plans to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
SECOND QUARTER 2007 vs. SECOND QUARTER 2006
AND
YEAR-TO-DATE 2007 vs. YEAR-TO-DATE 2006

OVERVIEW

Mississippi Power operates as a vertically integrated utility providing electricity to retail customers within its traditional service area located within the State of Mississippi and to wholesale customers in the Southeast. Many factors affect the opportunities, challenges, and risks of Mississippi Power's business of selling electricity. These factors include the ability to maintain a stable regulatory environment, to achieve energy sales growth, and to effectively manage and secure timely recovery of rising costs. These costs include those related to growing demand, increasingly stringent environmental standards, fuel prices, and storm restoration following Hurricane Katrina. Mississippi Power continues to focus on several key performance indicators. In recognition that Mississippi Power's long-term financial success is dependent upon how well it satisfies its customers' needs, Mississippi Power's retail base rate mechanism, PEP, includes performance indicators that directly tie customer service indicators to Mississippi Power's allowed return. In addition to the PEP performance indicators, Mississippi Power focuses on other performance measures, including broader measures of customer satisfaction, plant availability, system reliability, and net income. For additional information on these indicators, see MANAGEMENT'S DISCUSSION AND ANALYSIS OVERVIEW - Key Performance Indicators of Mississippi Power in Item 7 of the Form 10-K.

RESULTS OF OPERATIONS**Net Income**

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$3.5	15.4	\$7.9	20.7

Mississippi Power's net income after dividends on preferred stock for the second quarter 2007 was \$26.3 million compared to \$22.8 million for the corresponding period in 2006. The increase was primarily due to increased wholesale energy revenues and other income, partially offset by an increase in depreciation and amortization due to the amortization of a regulatory liability related to Plant Daniel capacity for the current period.

Mississippi Power's net income after dividends on preferred stock for year-to-date 2007 was \$45.9 million compared to \$38.0 million for the corresponding period in 2006. The increase was primarily due to an increase in territorial base revenues which was a result of a retail base rate increase effective April 1, 2006, and sales growth as well as increases in wholesale energy revenues and other income. These increases were partially offset by an increase in operations and maintenance and an increase in depreciation and amortization due to the amortization of a regulatory liability related to Plant Daniel capacity for the current year.

Retail Revenues

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$9.0	5.2	\$33.8	11.1

Table of Contents

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In the second quarter 2007, retail revenues were \$182.1 million compared to \$173.1 million in the same period in 2006.

For year-to-date 2007, retail revenues were \$338.3 million compared to \$304.5 million for the same period in 2006. Details of the change to retail revenues are as follows:

	Second Quarter 2007		Year-to-Date 2007	
	<i>(in millions)</i>	<i>(% change)</i>	<i>(in millions)</i>	<i>(% change)</i>
Retail prior year	\$173.1		\$304.5	
Estimated change in				
Rates and pricing	1.3	0.8	6.3	2.1
Sales growth	4.9	2.8	7.2	2.3
Weather	(4.4)	(2.5)	(1.5)	(0.5)
Fuel and other cost recovery	7.2	4.1	21.8	7.2
Retail current year	\$182.1	5.2%	\$338.3	11.1%

Revenues associated with changes in rates and pricing increased in the second quarter 2007 when compared to the same period of 2006 due to an increase in the ECO Plan rate.

Revenues associated with changes in rates and pricing increased for year-to-date 2007 when compared to the same period of 2006 due to a base rate increase effective April 2006 and the increase in the ECO Plan rate.

Revenues attributable to changes in sales growth increased in the second quarter 2007 when compared to the same period in 2006 due to a 6.0% and 5.9% increase in KWH sales to commercial and industrial customers, respectively, primarily due to increase in usage and customer additions after Hurricane Katrina.

Revenues attributable to changes in sales growth increased for year-to-date 2007 when compared to the same period in 2006 due to a 2.2%, 9.8%, and 7.3% increase in KWH sales to residential, commercial, and industrial customers, respectively, primarily due to increase in usage and customer additions after Hurricane Katrina.

Revenues resulting from changes in weather decreased because of mild weather in the second quarter and year-to-date 2007 compared to normal weather in the second quarter and year-to-date 2006.

Fuel revenues increased in the second quarter and year-to-date 2007 when compared to the same periods in 2006.

Electric rates include provisions to adjust billings for fluctuations in fuel costs, including the energy component of purchased power costs. Under these provisions, fuel revenues generally equal fuel expenses, including the fuel component of purchased power costs, and do not affect net income.

Wholesale Revenues - Non-Affiliates

Second Quarter 2007 vs. Second Quarter 2006

Year-to-Date 2007 vs. Year-to-Date 2006

(change in millions)
\$10.1

(% change)
15.2

(change in millions)
\$26.1

(% change)
20.4

Revenues from wholesale sales to non-affiliates will vary depending on the market cost of available energy compared to the cost of Mississippi Power and Southern Company system owned generation, demand for energy within the Southern Company service territory, and availability of Southern Company system generation. In the second quarter 2007, wholesale revenues from non-affiliates were \$76.7 million compared to \$66.6 million in

Table of Contents

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

the same period in 2006. The increase was primarily due to a \$9.5 million increase in sales to customers outside Mississippi Power's service territory compared to the same period in 2006. This increase was due to an \$8.4 million increase in energy revenues and a \$1.1 million increase in capacity revenues.

For year-to-date 2007, wholesale revenues to non-affiliates were \$154.0 million compared to \$127.9 million for the same period in 2006. The increase was primarily due to a \$14.1 million increase in sales to customers outside Mississippi Power's service territory, of which a \$12.2 million increase was associated with energy revenues and a \$1.9 million increase was associated with capacity revenues. The increase in revenues to customers within Mississippi Power's service territory was \$12.0 million, primarily due to an \$8.8 million increase in fuel costs and a \$3.1 million increase in base revenues due to higher demand by customers.

Wholesale Revenues - Affiliates

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(1.1)	(10.4)	\$6.0	26.7

Revenues from wholesale sales to affiliates will vary depending on demand and the availability and cost of generating resources at each company. These affiliate sales are made in accordance with the IIC, as approved by the FERC.

These transactions do not have a significant impact on earnings since the energy is generally sold at marginal cost. In the second quarter 2007, wholesale revenues to affiliates were \$9.7 million compared to \$10.8 million in the same period in 2006. The decrease was primarily due to a \$0.7 million increase in capacity revenues and a \$0.4 million decrease in energy revenues, of which a \$1.6 million decrease was associated with lower fuel prices, partially offset by a \$1.2 million increase associated with increased sales.

For year-to-date 2007, wholesale revenues to affiliates were \$28.6 million compared to \$22.6 million for the same period in 2006. The increase was primarily due to a \$7.4 million increase in energy revenues, of which a \$15.1 million increase was associated with increased sales and a \$7.7 million decrease was associated with lower fuel prices. This increase was offset by a decrease in capacity revenues of \$1.4 million.

Fuel and Purchased Power Expenses

	Second Quarter 2007		Year-to-Date 2007	
	vs.		vs.	
	<i>(change in</i>	<i>(%</i>	<i>(change in</i>	<i>(%</i>
	<i>millions)</i>	<i>change)</i>	<i>millions)</i>	<i>change)</i>
Fuel	\$17.8	17.0	\$61.3	33.5
Purchased power-non-affiliates	(3.4)	(72.7)	(7.1)	(76.2)
Purchased power-affiliates	(0.3)	(2.0)	(7.0)	(19.1)
Total fuel and purchased power expenses	\$14.1		\$47.2	

In the second quarter 2007, total fuel and purchased power expenses were \$140.5 million compared to \$126.4 million in the same period in 2006. The net increase in fuel and purchased power expenses was primarily due to a \$7.7 million increase in the average cost of fuel and purchased power as well as a \$6.4 million increase due to the KWH volume generated or purchased. Details of the individual components follow.

For year-to-date 2007, total fuel and purchased power expenses were \$275.6 million compared to \$228.4 million for the same period in 2006. The net increase in fuel and purchased power expenses was primarily due to a \$16.9 million

increase in the average cost of fuel and purchased power as well as a \$30.3 million increase due to the KWH volume generated or purchased. Details of the individual components follow.

Table of Contents

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In the second quarter 2007, fuel expense was \$122.2 million compared to \$104.4 million in the same period in 2006. The increase was primarily due to a \$9.2 million increase in generation from Mississippi Power-owned facilities and an \$8.6 million increase in the cost of fuel.

For year-to-date 2007, fuel expense was \$243.9 million compared to \$182.6 million for the same period in 2006. The increase was primarily due to a \$39.5 million increase in generation from Mississippi Power-owned facilities and a \$21.8 million increase in the cost of fuel.

Details of Mississippi Power's cost of generation and purchased power are as follows:

	Second Quarter	Second Quarter	% change	Year-to-Date 2007	Year-to-Date 2006	% change
Average Cost	2007	2006		2007	2006	
	<i>(cents per net KWH)</i>			<i>(cents per net KWH)</i>		
Fuel	3.71	3.44	7.8	3.63	3.31	9.7
Purchased power	4.14	4.34	(4.6)	3.77	4.36	(13.5)

In the second quarter 2007, purchased power expense – non-affiliates was \$1.3 million compared to \$4.6 million in the same period in 2006. The decrease was primarily the result of a 53.5% decrease in KWH volume purchased due to more of Mississippi Power's generation being available to meet customer demand and a 41.3% decrease in the average cost of purchased power per KWH.

For year-to-date 2007, purchased power expense – non-affiliates was \$2.2 million compared to \$9.3 million for the same period in 2006. The decrease was primarily the result of a 51.8% decrease in KWH volume purchased due to more of Mississippi Power's generation being available to meet customer demand and a 50.7% decrease in the average cost of purchased power per KWH.

In the second quarter 2007, purchased power from affiliates was \$17.0 million compared to \$17.4 million in the same period in 2006. The decrease was primarily due to a 5.0% decrease in the average cost of purchased power per KWH, partially offset by a 3.2% increase in KWH volume purchased.

For year-to-date 2007, purchased power from affiliates was \$29.5 million compared to \$36.4 million for the same period in 2006. The decrease was primarily due to a 15.1% decrease in the average cost of purchased power per KWH due to decreased fuel costs and a 4.7% decrease in KWH volume purchased due to more of Mississippi Power's generation being available to meet customer demand.

Energy purchases from affiliated companies within the Southern Company system will vary depending on demand and the availability and cost of generating resources at each company. These purchases are made in accordance with the IIC, as approved by the FERC. These transactions did not have a significant impact on earnings since the energy purchases are generally offset by energy revenues through Mississippi Power's retail and wholesale fuel cost recovery clauses.

Other Operations Expense

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$2.0	4.8	\$8.5	10.9

In the second quarter 2007, other operations expense was \$43.1 million compared to \$41.1 million in the same period in 2006. The increase was primarily the result of a general increase in operation expenses across all functions resulting from a \$1.7 million increase in shared services and other outside services and a \$0.7 million

Table of Contents

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

increase in company labor, partially offset by a \$0.3 million decrease in employee benefit expenses which is primarily due to a decrease in medical expense.

For the year-to-date 2007, other operations expense was \$87.0 million compared to \$78.4 million for the same period in 2006. The increase was primarily the result of a \$3.2 million insurance recovery for storm restoration recognized in 2006, a \$2.2 million increase in employee benefit expenses which is primarily due to an increase in medical expense, and a \$3.1 million increase in operations expense across all functions resulting primarily from increases in shared services and other outside services.

Maintenance Expense

Second Quarter 2007 vs. Second Quarter 2006

Year-to-Date 2007 vs. Year-to-Date 2006

<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(2.0)	(10.5)	\$(2.5)	(7.4)

In the second quarter 2007, maintenance expense was \$17.3 million compared to \$19.4 million in the same period in 2006. The decrease was primarily the result of a \$1.8 million decrease in distribution maintenance expense due primarily to the deferral of distribution maintenance expenses pursuant to an April 2007 regulatory accounting order from the Mississippi PSC. See FUTURE EARNINGS POTENTIAL FERC and Mississippi PSC Matters Retail Regulatory Matters herein for additional information.

For the year-to-date 2007, maintenance expense was \$31.3 million compared to \$33.8 million for the same period in 2006. The decrease was primarily the result of a \$1.1 million decrease in generation maintenance expense primarily due to outage work performed in 2006, and a \$1.1 million decrease in distribution maintenance expense due primarily to the deferral of distribution maintenance expenses pursuant to the regulatory accounting order mentioned above.

Depreciation and Amortization

Second Quarter 2007 vs. Second Quarter 2006

Year-to-Date 2007 vs. Year-to-Date 2006

<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$3.2	26.3	\$5.1	20.8

In the second quarter 2007, depreciation and amortization was \$15.2 million compared to \$12.0 million in the same period in 2006. The increase was primarily due to a \$0.4 million increase in distribution depreciation, a \$0.8 million increase in amortization of environmental costs, and a \$1.8 million increase in amortization related to a regulatory liability recorded in 2003 in connection with the Mississippi PSC's accounting order on Plant Daniel capacity. See Note 3 to the financial statements of Mississippi Power under Retail Regulatory Matters in Item 8 of the Form 10-K for additional information.

For year-to-date 2007, depreciation and amortization was \$29.4 million compared to \$24.3 million for the same period in 2006. The increase was primarily due to a \$0.6 million increase in distribution depreciation, a \$0.6 million increase in amortization of environmental cost expenses, and a \$3.7 million increase in amortization related to a regulatory liability recorded in 2003 in connection with the Mississippi PSC's accounting order on Plant Daniel capacity. See Note 3 to the financial statements of Mississippi Power under Retail Regulatory Matters in Item 8 of the Form 10-K for additional information.

Table of Contents

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Taxes Other than Income Taxes

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(0.2)	(1.0)	\$(1.5)	(5.1)

In the second quarter and year-to-date 2007, taxes other than income taxes were \$15.5 million and \$28.3 million, respectively, compared to \$15.7 million and \$29.9 million, respectively, in the same periods in 2006. The changes were primarily due to a \$0.1 million and \$1.4 million decrease in ad valorem taxes for the second quarter and year-to-date 2007, respectively, as compared to the same periods in 2006. The retail portion, or approximately 83%, of the decrease in ad valorem taxes is recoverable under Mississippi Power's ad valorem tax cost recovery clause, and, therefore, does not affect net income.

Total Other Income and (Expense)

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$4.5	135.3	\$3.8	52.2

In the second quarter 2007, total other income and (expense) was \$1.2 million compared to \$(3.3) million in the same period in 2006. The change was primarily the result of a \$3.7 million contract termination, a \$0.9 million increase in income associated with customer projects, and a \$0.6 million decrease in interest expense primarily due to interest on early redemption of securities, partially offset by a \$0.5 million decrease in interest income related to the recovery mechanism for fuel hedging and energy cost hedging.

For year-to-date 2007, total other income and (expense) was \$(3.5) million compared to \$(7.2) million for the same period in 2006. The change was primarily the result of a \$3.7 million contract termination, a \$0.5 million increase in income associated with customer projects, and a \$0.6 million decrease in interest expense primarily due to interest on early redemption of securities, partially offset by a \$0.9 million decrease in interest income related to the recovery mechanism for fuel hedging and energy cost hedging.

Income Taxes

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$2.2	16.0	\$5.3	23.1

In the second quarter and year-to-date 2007, income taxes were \$16.1 million and \$28.3 million, respectively, compared to \$13.9 million and \$23.0 million, respectively, in the same periods in 2006. The increases were due to the increases in pre-tax income.

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Mississippi Power's future earnings potential. The level of Mississippi Power's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of Mississippi Power's business of selling electricity. These factors include Mississippi Power's ability to maintain a stable regulatory environment that continues to allow for the recovery of all prudently incurred costs during a time of increasing costs. Future earnings in the near term will depend, in part, upon growth in energy

sales, which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in Mississippi Power's service area in the aftermath of Hurricane Katrina. For additional information relating to these issues, see RISK

Table of Contents

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL of Mississippi Power in Item 7 of the Form 10-K.

Environmental Matters

Compliance costs related to the Clean Air Act and other environmental regulations could affect earnings if such costs cannot be fully recovered in rates on a timely basis. See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters of Mississippi Power in Item 7 and Note 3 to the financial statements of Mississippi Power under Environmental Matters in Item 8 of the Form 10-K for additional information.

FERC and Mississippi PSC Matters

Market-Based Rate Authority

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL FERC Matters Market-Based Rate Authority of Mississippi Power in Item 7 and Note 3 to the financial statements of Mississippi Power under FERC Matters Market-Based Rate Authority in Item 8 of the Form 10-K for information regarding the proceedings initiated by the FERC in December 2004 to assess Southern Company's generation dominance within its retail service territory and in May 2005 to determine whether Southern Company satisfies the other three parts of the FERC's market-based rate analysis: transmission market power, barriers to entry, and affiliate abuse or reciprocal dealing.

In late June and July 2007, hearings were held in the December 2004 proceeding and Southern Company anticipates a decision in November 2007. On June 21, 2007, the FERC issued an order terminating the May 2005 proceeding, based upon its final approval of the settlement in the IIC proceeding discussed below.

In addition, on June 21, 2007, the FERC issued its final rule regarding market-based rate authority. The FERC generally retained its current market-based rate standards. The impact of this order and its effect on the generation dominance proceeding cannot now be determined.

Intercompany Interchange Contract

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL FERC Matters Intercompany Interchange Contract of Mississippi Power in Item 7 and Note 3 to the financial statements of Mississippi Power under FERC Matters Intercompany Interchange Contract in Item 8 of the Form 10-K for information regarding the proceeding initiated by the FERC in May 2005 to examine (1) the provisions of the IIC among Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Power, and SCS, as agent, under the terms of which the Power Pool is operated, and, in particular, the propriety of the continued inclusion of Southern Power as a party to the IIC, (2) whether any parties to the IIC have violated the FERC's standards of conduct applicable to utility companies that are transmission providers, and (3) whether Southern Company's code of conduct defining Southern Power as a system company rather than a marketing affiliate is just and reasonable.

On April 19, 2007, the FERC approved, with certain modifications, the compliance filing submitted by Southern Company on November 6, 2006. The compliance plan largely involves functional separation and information restrictions related to marketing activities conducted on behalf of Southern Power. Implementation of the plan is not expected to have a material impact on Mississippi Power's financial statements.

Table of Contents

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Retail Regulatory Matters

See Note 3 to the financial statements of Mississippi Power under Retail Regulatory Matters Environmental Compliance Overview Plan in Item 8 of the Form 10-K for information on Mississippi Power's annual environmental filing with the Mississippi PSC. In February 2007, Mississippi Power filed with the Mississippi PSC its annual ECO Plan evaluation for 2007. Mississippi Power requested an average increase for retail customers of 86 cents per 1,000 KWH. This increase represents approximately \$7.5 million in annual revenues for Mississippi Power. On April 13, 2007, the Mississippi PSC approved Mississippi Power's ECO Plan as filed. The new rates became effective in May 2007.

In April 2007, the Mississippi PSC issued an order allowing Mississippi Power to defer approximately \$10.4 million of certain reliability related maintenance costs beginning January 1, 2007 and recover them over a four-year period beginning January 1, 2008. These costs relate to system upgrades and improvements that are now being made as a follow-up to the emergency repairs that were made subsequent to Hurricane Katrina. As of June 30, 2007, Mississippi Power had incurred and deferred approximately \$4.7 million of such costs, which are included in Other Regulatory Assets on the Condensed Balance Sheets herein.

See Note 3 to the financial statements of Mississippi Power under Retail Regulatory Matters Storm Damage Cost Recovery in Item 8 of the Form 10-K for information regarding storm restoration costs in connection with Hurricane Katrina and a financing order issued by the Mississippi PSC that authorized the issuance of \$121.2 million of storm restoration bonds under a state bond program. The storm restoration bonds were issued by the Mississippi Development Bank on June 1, 2007 on behalf of the State of Mississippi. On June 1, 2007, Mississippi Power received a grant payment of \$85.2 million from the State of Mississippi representing recovery of \$25.2 million in retail storm restoration costs incurred or to be incurred and \$60.0 million to increase Mississippi Power's property damage reserve. The funds received related to previously incurred storm restoration expenditures have been accounted for as a government grant and have been recorded as a reduction to the regulatory asset that was recorded as the storm restoration expenditures were incurred, in accordance with FASB Statement No. 71 (SFAS No.71), Accounting for the Effects of Certain Types of Regulation. The funds received for storm restoration expenditures to be incurred were recorded as a regulatory liability. Mississippi Power will receive the bond proceeds as expenditures are incurred to construct a new storm operations center.

The funds received with respect to the \$25.2 million grant were funded through the Mississippi Development Bank's issuance of tax-exempt bonds. Due to the tax-exempt status to the holders of bonds for federal income tax purposes, the use of the proceeds is limited to expenditures that qualify under the IRC. Prior to the receipt of the proceeds from the tax-exempt bonds in June 2007, management of Mississippi Power represented to the Mississippi Development Bank that all expenditures to date qualify under the IRC. Should Mississippi Power use the proceeds for non-qualifying expenditures, it could be required to return that portion of the proceeds received from the tax-exempt bond issuance that was applied to non-qualifying expenditures. Management expects that all future expenditures will also qualify and that no proceeds will be required to be returned.

In order for the State of Mississippi to repay the bonds issued by the Mississippi Development Bank, the State of Mississippi has established a system restoration charge that will be charged to all retail electric utility customers within Mississippi Power's service area. This charge will be collected by Mississippi Power through the retail customers' monthly statement and remitted to the State of Mississippi on a monthly basis. The system restoration charge is the property of the State of Mississippi. Mississippi Power's only obligation is to collect and remit the proceeds of the charge.

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Fuel Cost Recovery

Mississippi Power has an established fuel cost recovery factor that is approved by the Mississippi PSC. Over the past several years, Mississippi Power experienced higher than expected fuel costs for coal and gas, which led to an increase in the under recovered fuel costs. Mississippi Power is required to file for an adjustment to the fuel cost recovery factor annually. The last such filing was made in November 2006. The Mississippi PSC approved an increase in the fuel cost recovery factor effective January 2007 in an amount equal to 4.6% of total retail revenues. At June 30, 2007, the under recovered balance of fuel recorded in Mississippi Power's Condensed Balance Sheets herein was \$39.4 million compared to \$50.8 million at December 31, 2006. Mississippi Power's operating revenues are adjusted for differences in actual recoverable fuel cost and amounts billed in accordance with the currently approved cost recovery rate. Accordingly, changes to the billing factor will have no significant effect on Mississippi Power's revenues or net income but will affect cash flow. See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - PSC Matters - Fuel Cost Recovery of Mississippi Power in Item 7 of the Form 10-K for additional information.

Other Matters

Mississippi Power is subject to certain claims and legal actions arising in the ordinary course of business. In addition, Mississippi Power's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental requirements such as opacity and air quality standards, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such pending or potential litigation against Mississippi Power cannot be predicted at this time; however, for current proceedings not specifically reported herein or in Note 3 to the financial statements of Mississippi Power in Item 8 of the Form 10-K, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on Mississippi Power's financial statements.

See the Notes to the Condensed Financial Statements herein for discussion of various other contingencies, regulatory matters, and other matters being litigated which may affect future earnings potential.

ACCOUNTING POLICIES

Application of Critical Accounting Policies and Estimates

Mississippi Power prepares its financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements of Mississippi Power in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Mississippi Power's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. See MANAGEMENT'S DISCUSSION AND ANALYSIS - ACCOUNTING POLICIES - Application of Critical Accounting Policies and Estimates of Mississippi Power in Item 7 of the Form 10-K for a complete discussion of Mississippi Power's critical accounting policies and estimates related to Electric Utility Regulation, Contingent Obligations, Unbilled Revenues, and Plant Daniel Operating Lease.

New Accounting Standards

Income Taxes

On January 1, 2007, Mississippi Power adopted FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes. FIN 48 requires companies to determine whether it is more likely than not that

Table of Contents

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. It also provides guidance on the recognition, measurement, and classification of income tax uncertainties, along with any related interest and penalties. The provisions of FIN 48 were applied to all tax positions beginning January 1, 2007. The adoption of FIN 48 did not have a material impact on Mississippi Power's financial statements.

Fair Value Measurement

The FASB issued FASB Statement No. 157 (SFAS No. 157), Fair Value Measurements in September 2006. This standard provides guidance on how to measure fair value where it is permitted or required under other accounting pronouncements. SFAS No. 157 also requires additional disclosures about fair value measurements. Mississippi Power plans to adopt SFAS No. 157 on January 1, 2008 and is currently assessing the impact of this standard.

Fair Value Option

In February 2007, the FASB issued FASB Statement No. 159 (SFAS No. 159), Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115. This standard permits an entity to choose to measure many financial instruments and certain other items at fair value. Mississippi Power plans to adopt SFAS No. 159 on January 1, 2008 and is currently assessing its impact.

FINANCIAL CONDITION AND LIQUIDITY**Overview**

Mississippi Power's financial condition and liquidity position remained stable at June 30, 2007. Net cash provided from operating activities totaled \$120.8 million for the first six months of 2007, compared to \$17.4 million for the corresponding period in 2006. The \$103.4 million increase in cash provided from operating activities in the first six months of 2007 is primarily due to the receipt of grant proceeds of \$74.3 million, of which \$60 million will be used to fund the property damage reserve and \$14.3 million is for recovery of retail operations and maintenance storm restoration costs, the receipt of \$21.3 million in external insurance proceeds related to Hurricane Katrina, and from fuel and base rate increases in effect in the first and second quarters 2007 and cash outflows for restoration costs in the second quarter 2006 due to the impact of Hurricane Katrina. Net cash used for investing activities totaled \$38 million compared to \$107.8 million for the first six months of 2006. This change of \$69.8 million is primarily due to the receipt of grant proceeds of \$10.9 million related to retail capital storm restoration cost and cash outflows for restoration costs in the second quarter 2006 due to the impact of Hurricane Katrina. Net cash used for financing activities totaled \$70.9 million for the first six months of 2007, compared to net cash flow provided from financing activities of \$79.3 million for the corresponding period in 2006. This decrease of \$150.2 million is primarily due to the redemption of \$36.1 million of long-term debt payable to affiliate trust and the decrease in short-term borrowings.

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Capital Requirements and Contractual Obligations of Mississippi Power in Item 7 of the Form 10-K for a description of Mississippi Power's capital requirements for its construction program, lease obligations, purchase commitments, preferred stock dividends, and trust funding requirements. Mississippi Power has no maturities or redemptions of long-term debt required by June 30, 2008.

Table of Contents

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Sources of Capital

Mississippi Power plans to obtain the funds required for construction and other purposes from sources similar to those utilized in the past. Recently, Mississippi Power has primarily utilized funds from operating cash flows, short-term debt, external security offerings, and equity contributions from Southern Company. However, the amount, type, and timing of any future financings, if needed, will depend upon, regulatory approval, prevailing market conditions, and other factors. See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Sources of Capital of Mississippi Power in Item 7 of the Form 10-K for additional information. Mississippi Power's current liabilities frequently exceed current assets because of the continued use of short-term debt as a funding source to meet scheduled maturities of long-term debt as well as cash needs which can fluctuate significantly due to the seasonality of the business. To meet short-term cash needs and contingencies, Mississippi Power had at June 30, 2007 approximately \$16.1 million of cash and cash equivalents and \$181 million of unused committed credit arrangements with banks. Of these unused facilities, \$51 million expire in 2007 and \$130 million expire in 2008. Approximately \$39 million of these credit arrangements contain provisions allowing two-year term loans executable at expiration and \$15 million contain provisions allowing one-year term loans executable at expiration. Mississippi Power expects to renew its credit facilities, as needed, prior to expiration. See Note 6 to the financial statements of Mississippi Power under Bank Credit Arrangements in Item 8 of the Form 10-K for additional information. The credit arrangements provide liquidity support to Mississippi Power's obligations with respect to variable rate pollution control bonds and commercial paper. Mississippi Power may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper and extendible commercial notes at the request and for the benefit of Mississippi Power and other Southern Company subsidiaries. At June 30, 2007, Mississippi Power had \$50.6 million of commercial paper outstanding. Management believes that the need for working capital can be adequately met by utilizing commercial paper programs and lines of credit without maintaining large cash balances.

Off-Balance Sheet Financing Arrangements

See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY

Off-Balance Sheet Financing Arrangements of Mississippi Power in Item 7 and Note 7 to the financial statements of Mississippi Power under Operating Leases in Item 8 of the Form 10-K for information related to Mississippi Power's lease of a combined cycle generating facility at Plant Daniel.

Credit Rating Risk

Mississippi Power does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change to below BBB- or Baa3. These contracts are primarily for physical electricity purchases and sales. At June 30, 2007, the maximum potential collateral requirements were \$4.5 million. Mississippi Power, along with all members of the Power Pool, is also party to certain agreements that could require collateral and/or accelerated payment in the event of a credit rating change to below investment grade for Alabama Power and/or Georgia Power. These agreements are primarily for natural gas and power price risk management activities. At June 30, 2007, Mississippi Power's total exposure to these types of agreements was \$34 million. Subsequent to June 30, 2007, certain Southern Company subsidiaries entered into additional agreements which could increase this exposure. The increase in exposure, if any, is currently \$8 million.

Table of Contents

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Market Price Risk

Mississippi Power's market risk exposures relative to interest rate changes have not changed materially compared with the December 31, 2006 reporting period. In addition, Mississippi Power is not aware of any facts or circumstances that would significantly affect such exposures in the near term.

Due to cost-based rate regulation, Mississippi Power has limited exposure to market volatility in interest rates, commodity fuel prices, and prices of electricity. To mitigate residual risks relative to movements in electricity prices, Mississippi Power enters into physical fixed-price contracts for the purchase and sale of electricity through the wholesale electricity market. Mississippi Power has also implemented retail fuel hedging programs at the instruction of the Mississippi PSC and wholesale fuel hedging programs under agreements with wholesale customers.

The fair value of derivative, fuel, and energy contracts at June 30, 2007 was as follows:

	Second Quarter 2007 Changes	Year-to-Date 2007 Changes
	Fair Value (in thousands)	
Contracts beginning of period	\$ 6,643	\$ (6,360)
Contracts realized or settled	(1,138)	359
New contracts at inception		
Changes in valuation techniques		
Current period changes (a)	(4,242)	7,264
Contracts at June 30, 2007	\$ 1,263	\$ 1,263

(a) Current period changes also include the changes in fair value of new contracts entered into during the period, if any.

	Source of June 30, 2007 Valuation Prices		
	Total Fair Value	Maturity Year 1	1-3 Years
	(in thousands)		
Actively quoted	\$(1,066)	\$(3,712)	\$2,646
External sources	2,329	2,329	
Models and other methods			
Contracts at June 30, 2007	\$ 1,263	\$(1,383)	\$2,646

Unrealized gains and losses from mark-to-market adjustments on derivative contracts related to Mississippi Power's fuel hedging programs are recorded as regulatory assets and liabilities. Realized gains and losses from these programs are included in fuel expense and are recovered through Mississippi Power's energy cost management clause. In addition, any unrealized gains and losses on energy-related derivatives used to hedge anticipated purchases and sales are deferred in other comprehensive income. Gains and losses on derivative contracts that are not designated as hedges are recognized in the statements of income as incurred. These amounts were not material in any period presented.

Table of Contents

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

At June 30, 2007, the fair value gain/(loss) of derivative energy contracts was reflected in the financial statements as follows:

	Amounts <i>(in thousands)</i>
Regulatory assets, net	\$ (66)
Accumulated other comprehensive income	1,089
Net income	240
Total fair value	\$ 1,263

Unrealized pre-tax gains (losses) recognized in income were not material for any period presented.

For additional information, see MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Market Price Risk of Mississippi Power in Item 7 and Notes 1 and 6 to the financial statements of Mississippi Power under Financial Instruments in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements herein.

Financing Activities

In April 2007, Mississippi Power redeemed \$36.1 million of long-term debt payable to affiliated trusts. In addition to any financings that may be necessary to meet capital requirements, contractual obligations, and storm restoration costs, Mississippi Power plans to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

Table of Contents

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
SECOND QUARTER 2007 vs. SECOND QUARTER 2006
AND
YEAR-TO-DATE 2007 vs. YEAR-TO-DATE 2006

OVERVIEW

Southern Power and its wholly-owned subsidiaries construct, acquire, own, and manage generation assets and sell electricity at market-based prices in the southeastern wholesale market. Southern Power continues to focus on executing its regional strategy in 2007 in the Southeast, one of the fastest growing regions of the country, including potential acquisition and/or expansion opportunities. Southern Power continues to face challenges at the federal regulatory level relative to market power and affiliate transactions. See FUTURE EARNINGS POTENTIAL – FERC Matters herein for additional detail.

To evaluate operating results and to ensure Southern Power's ability to meet its contractual commitments to customers, Southern Power focuses on several key performance indicators. These indicators consist of plant availability, peak season equivalent forced outage rate (EFOR), and net income. Plant availability shows the percentage of time during the year that Southern Power's generating units are available to be called upon to generate (the higher the better), whereas the EFOR more narrowly defines the hours during peak demand times when Southern Power's generating units are not available due to forced outages (the lower the better). For additional information on these indicators, see MANAGEMENT'S DISCUSSION AND ANALYSIS – OVERVIEW – Key Performance Indicators of Southern Power in Item 7 of the Form 10-K.

RESULTS OF OPERATIONS**Net Income**

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$8.1	25.2	\$20.2	39.0

Southern Power's net income for the second quarter 2007 was \$39.9 million compared to \$31.8 million for the corresponding period of 2006. Year-to-date earnings were \$71.9 million compared to \$51.7 million for the corresponding period in 2006. These increases were primarily the result of increased energy sales from existing resources due to more favorable weather than the corresponding periods in 2006. Also contributing to the increase in income were additional sales from the acquisitions of Plant DeSoto in June 2006 and Plant Rowan in September 2006.

Wholesale Revenues – Affiliates and Wholesale Revenues – Non-Affiliates

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$49.1	25.5	\$100.7	30.3

Wholesale revenues for the second quarter 2007 were \$242.0 million compared to \$192.9 million for the corresponding period of 2006. Wholesale revenues for year-to-date 2007 were \$432.6 million compared to \$331.9 million for the corresponding period of 2006. Wholesale energy sales to non-affiliates will vary depending on the energy demand of those customers and their generation capacity, as well as the market cost of available energy compared to the cost of Southern Power. Energy sales to affiliated companies within the Southern Company system will vary depending on demand and the availability and cost of generating resources at each company. Sales to affiliate companies that are not covered by PPAs are made

Table of Contents

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

in accordance with the IIC, as approved by the FERC. In the second quarter and year-to-date 2007, wholesale revenues to non-affiliates and affiliates increased when compared to the corresponding periods in 2006. Wholesale revenues to non-affiliates increased \$35.1 million and \$64.6 million during the respective periods, primarily due to short-term market energy sales and sales from Plants DeSoto and Rowan. Wholesale revenues to affiliates increased \$14.0 million and \$36.2 million during the respective periods, primarily due to increased demand under existing PPAs with affiliates as a result of favorable weather within the Southern Company service territory as well as higher fuel revenues due to an increase in natural gas prices in the second quarter and year-to-date.

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Power Sales Agreements of Southern Power in Item 7 of the Form 10-K and FUTURE EARNINGS POTENTIAL - Plant Acquisitions and Power Sales Agreements herein for additional information.

Other Revenues

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$1.2	162.5	\$2.3	146.7

Other revenues for the second quarter 2007 were \$2.0 million compared to \$0.8 million for the corresponding period of 2006. Other revenues for year-to-date 2007 were \$3.9 million compared to \$1.6 million for the corresponding period of 2006. These increases were primarily due to transmission revenues related to a PPA which provides for recovery of substantially all direct transmission costs. These transmission revenues do not have a significant impact on net income since they are generally offset by associated expenses.

Fuel and Purchased Power Expenses

	Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
Fuel	\$18.5	46.1	\$31.6	58.1
Purchased power-non-affiliates	(1.5)	(11.8)	(4.4)	(16.7)
Purchased power-affiliates	10.5	39.7	22.4	48.8
Total fuel and purchased power expenses	\$27.5		\$49.6	

In the second quarter 2007, total fuel and purchased power expenses were \$106.8 million compared to \$79.3 million for the corresponding period in 2006. For year-to-date 2007, total fuel and purchased power expenses were \$176.5 million compared to \$126.9 million for the same period in 2006. These increases were primarily due to increased generation and purchases in order to meet the higher energy sales as well as higher fuel costs due to an increase in the average cost of fuel.

Other Operations Expense

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$4.8	28.4	\$8.1	23.7

In the second quarter 2007, other operations expense was \$21.6 million compared to \$16.8 million for the corresponding period in 2006. This increase was primarily due to approximately \$0.9 million of

Table of Contents

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

additional administrative and general expense as a result of costs incurred to implement the FERC compliance plan, (see FUTURE EARNINGS POTENTIAL FERC Matters Intercompany Interchange Contract herein for additional information), \$1.3 million of increased operations expense primarily related to costs associated with the newly acquired Plants DeSoto and Rowan, and \$2.6 million increased transmission expenses partially related to a PPA which provides for recovery of substantially all direct transmission costs.

For year-to-date 2007, other operations expense was \$42.4 million compared to \$34.3 million in the same period in 2006. This increase was primarily due to approximately \$2.1 million of additional administrative and general expense as a result of costs incurred to implement the FERC compliance plan, (see FUTURE EARNINGS POTENTIAL FERC Matters Intercompany Interchange Contract herein for additional information), \$2.8 million of increased operations expense primarily related to the newly acquired Plants DeSoto and Rowan, and \$3.3 million increased transmission expenses partially related to a PPA which provides for recovery of substantially all direct transmission costs.

Maintenance Expense

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$2.7	48.7	\$2.1	18.4

In the second quarter 2007, maintenance expense was \$8.2 million compared to \$5.5 million for the corresponding period in 2006. For year-to-date 2007, maintenance expense was \$13.5 million compared to \$11.4 million for the same period in 2006. These increases were primarily due to the timing of plant maintenance activities and the additions of Plants DeSoto and Rowan, acquired in June 2006 and September 2006, respectively.

Depreciation and Amortization

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$2.4	15.4	\$6.1	20.0

In the second quarter 2007, depreciation and amortization was \$18.3 million compared to \$15.9 million for the corresponding period in 2006. This increase was primarily a result of additional plant in service related to Plants DeSoto and Rowan, acquired in June 2006 and September 2006, respectively.

For year-to-date 2007, depreciation and amortization was \$36.7 million compared to \$30.6 million for the same period in 2006. This increase was primarily a result of additional plant in service related to Plants DeSoto and Rowan, acquired in June 2006 and September 2006, respectively. These new plants contributed \$5.5 million to the year-to-date increase. Higher depreciation rates also contributed approximately \$0.8 million to the year-to-date 2007 expense due to the change in rates adopted in March 2006. See Note 1 to the financial statements of Southern Power under Depreciation in Item 8 of the Form 10-K for additional information.

Taxes Other than Income Taxes

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$0.5	13.6	\$0.5	7.6

Table of Contents

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In the second quarter 2007, taxes other than income taxes were \$4.3 million compared to \$3.8 million for the corresponding period in 2006. For year-to-date 2007, taxes other than income taxes were \$8.0 million compared to \$7.5 million for the corresponding period in 2006. These increases were primarily due to ad valorem taxes associated with the additions of Plants DeSoto and Rowan, acquired in June 2006 and September 2006, respectively.

Interest Expense, Net of Amounts Capitalized

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(0.2)	(1.0)%	\$0.4	0.9%

In the second quarter 2007, interest expense, net of amounts capitalized was \$20.5 million compared to \$20.7 million for the corresponding period in 2006. For year-to-date 2007, interest expense, net of amounts capitalized was \$41.4 million compared to \$41.0 million for the corresponding period in 2006. During these respective periods, interest expense increased by \$3.7 million and \$7.7 million due to an increase in commercial paper outstanding as well as an increase in short-term interest rates. These increases were offset by capitalized interest, which increased during the respective periods by \$3.9 million and \$7.3 million due to construction activity.

Other Income (Expense), Net

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$0.3	31.8	\$(2.2)	(66.6)

In the second quarter 2007, other income (expense), net was \$1.2 million compared to \$0.9 million for the corresponding period in 2006. This increase was primarily due to unrealized mark-to-market gains on derivative positions recognized in the second quarter 2007.

For year-to-date 2007, other income (expense), net was \$1.1 million compared to \$3.3 million for the same period in 2006. This decrease was primarily due to unrealized mark-to-market gains on derivative positions recognized in the first quarter of 2006 partially offset by additional unrealized mark-to-market gains on derivative positions recognized in the second quarter 2007.

Income Taxes

Second Quarter 2007 vs. Second Quarter 2006		Year-to-Date 2007 vs. Year-to-Date 2006	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$4.9	23.6	\$13.8	41.4

In the second quarter 2007, income taxes were \$25.7 million compared to \$20.8 million for the corresponding period in 2006. For year-to-date 2007, income taxes were \$47.2 million compared to \$33.4 million in the same period in 2006. These increases were primarily due to higher earnings before taxes. Other factors include a higher state tax rate due to changes in state tax apportionment rules and new activity in the state of North Carolina related to the newly acquired Plant Rowan.

Table of Contents

**SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Southern Power's future earnings potential. Several factors affect the opportunities, challenges, and risks of Southern Power's competitive wholesale energy business. These factors include the ability to achieve sales growth while containing costs. Another major factor is federal regulatory policy, which may impact Southern Power's level of participation in this market. The level of future earnings depends on numerous factors, including regulatory matters, especially those related to affiliate contracts, sales, creditworthiness of customers, total generating capacity available in the Southeast, and the successful remarketing of capacity as current contracts expire. For additional information relating to these issues, see RISK FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL of Southern Power in Item 7 of the Form 10-K.

FERC Matters

Market-Based Rate Authority

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - FERC Matters Market-Based Rate Authority of Southern Power in Item 7 and Note 3 to the financial statements of Southern Power under FERC Matters Market-Based Rate Authority in Item 8 of the Form 10-K for information regarding the proceedings initiated by the FERC in December 2004 to assess Southern Company's generation dominance within its retail service territory and in May 2005 to determine whether Southern Company satisfies the other three parts of the FERC's market-based rate analysis: transmission market power, barriers to entry, and affiliate abuse or reciprocal dealing.

In late June and July 2007, hearings were held in the December 2004 proceeding, and Southern Company anticipates a decision in November 2007. On June 21, 2007, the FERC issued an order terminating the May 2005 proceeding, based upon its final approval of the settlement in the IIC proceeding discussed below.

In addition, on June 21, 2007, the FERC issued its final rule regarding market-based rate authority. The FERC generally retained its current market-based rate standards. The impact of this order and its effect on the generation dominance proceeding cannot now be determined.

Intercompany Interchange Contract

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - FERC Matters Intercompany Interchange Contract of Southern Power in Item 7 and Note 3 to the financial statements of Southern Power under FERC Matters Intercompany Interchange Contract in Item 8 of the Form 10-K for information regarding the proceeding initiated by the FERC in May 2005 to examine (1) the provisions of the IIC among Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Power, and SCS, as agent, under the terms of which the Power Pool is operated, and, in particular, the propriety of the continued inclusion of Southern Power as a party to the IIC, (2) whether any parties to the IIC have violated the FERC's standards of conduct applicable to utility companies that are transmission providers, and (3) whether Southern Company's code of conduct defining Southern Power as a system company rather than a marketing affiliate is just and reasonable.

Table of Contents

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

On April 19, 2007, the FERC approved, with certain modifications, the compliance filing submitted by Southern Company on November 6, 2006. The compliance plan largely involves functional separation and information restrictions related to marketing activities conducted on behalf of Southern Power. Southern Power's cost of implementing the compliance plan, including the modifications, is expected to average approximately \$9 million annually.

Integrated Gasification Combined Cycle (IGCC) Project

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Construction Projects - Integrated Gasification Combined Cycle (IGCC) of Southern Power in Item 7 of the Form 10-K for information regarding the development by Southern Power and the Orlando Utilities Commission (OUC) of an IGCC project in Orlando, Florida at OUC's Stanton Energy site. Since the definitive agreements relating to the development of the project were executed in December 2005, the estimated costs of the gasifier portion have increased due primarily to increases in commodity costs and increased market demand for labor. Southern Power had the option under the original agreements to end its participation in the gasifier portion of the project at the end of the project definition phase, which has been completed. On March 29, 2007, Southern Power's Board of Directors approved the continuation and the completion of the design, engineering, and construction of the gasifier portion of the project. Southern Power and OUC will share 65% and 35% of the estimated cost increase, respectively, under the proposed amended agreements. In April 2007, OUC approved its portion of the cost increase, subject to the DOE's approval of the additional funding. On May 8, 2007, SCS, as agent for Southern Power, and the DOE entered into an amendment to the February 2006 cooperative agreement to increase the DOE's funding for the gasifier portion of the project by \$58.75 million.

Power Sales Agreements

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Power Sales Agreements of Southern Power in Item 7 of the Form 10-K for additional information on long-term PPAs. Southern Power's PPAs with non-affiliated counterparties have provisions that require the posting of collateral or an acceptable substitute guarantee in the event that the counterparty does not meet certain rating or financial requirements. The PPAs are expected to provide Southern Power with a stable source of revenue during their respective terms. In October 2006, Southern Power entered into a PPA with Gulf Power for 292 MW annually from June 2009 through May 2014 from Plant Dahlberg. The Florida PSC approved the agreement on March 27, 2007. The FERC approved the agreement on July 13, 2007.

In April 2007, Southern Power entered into two PPAs with Georgia Power. Under the first agreement, Southern Power will provide Georgia Power with a total of 561 MW of capacity annually for the period from June 2010 through May 2017 from Plant Wansley. Under the second agreement, Southern Power will provide Georgia Power with a total of 292 MW of capacity annually for the period June 2010 through May 2025 from Plant Dahlberg. The contracts provide for fixed capacity payments and variable energy payments based on actual energy delivered. These contracts are contingent upon approval from the Georgia PSC and the FERC. The final outcome of this matter cannot now be determined.

Other Matters

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Environmental Matters of Southern Power in Item 7 of the Form 10-K for information on the development by federal and state environmental regulatory agencies of additional control strategies for

Table of Contents

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

emission of air pollution from industrial sources, including electric generating facilities. Compliance with possible additional federal or state legislation or regulations related to global climate change, air quality, or other environmental and health concerns could also affect earnings. While Southern Power's PPAs generally contain provisions that permit charging the counterparty with some of the new costs incurred as a result of changes in environmental laws and regulations, the full impact of any such regulatory or legislative changes cannot be determined at this time.

Southern Power is subject to certain claims and legal actions arising in the ordinary course of business. In addition, Southern Power's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental requirements such as opacity and air quality standards, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such pending or potential litigation against Southern Power and its subsidiaries cannot be predicted at this time; however, for current proceedings not specifically reported herein or in Note 3 to the financial statements of Southern Power in Item 8 of the Form 10-K, management does not anticipate that the liabilities, if any, arising from any such proceedings would have a material adverse effect on Southern Power's financial statements.

See Note (B) to the Condensed Financial Statements herein for discussion of various other contingencies, regulatory matters, and other matters being litigated which may affect future earnings potential.

ACCOUNTING POLICIES**Application of Critical Accounting Policies and Estimates**

Southern Power prepares its consolidated financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements of Southern Power in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Southern Power's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. See MANAGEMENT'S DISCUSSION AND ANALYSIS ACCOUNTING POLICIES Application of Critical Accounting Policies and Estimates of Southern Power in Item 7 of the Form 10-K for a complete discussion of Southern Power's critical accounting policies and estimates related to Revenue Recognition, Asset Impairments, and Acquisition Accounting.

New Accounting Standards*Income Taxes*

On January 1, 2007, Southern Power adopted FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes. FIN 48 requires companies to determine whether it is more likely than not that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. It also provides guidance on the recognition, measurement, and classification of income tax uncertainties, along with any related interest and penalties. The provisions of FIN 48 were applied to all tax positions beginning January 1, 2007. The adoption of FIN 48 did not have a material impact on Southern Power's financial statements.

Table of Contents

**SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Fair Value Measurement

The FASB issued FASB Statement No. 157 (SFAS No. 157), Fair Value Measurements in September 2006. This standard provides guidance on how to measure fair value where it is permitted or required under other accounting pronouncements. SFAS No. 157 also requires additional disclosures about fair value measurements. Southern Power plans to adopt SFAS No. 157 on January 1, 2008 and is currently assessing the impact of this standard.

Fair Value Option

In February 2007, the FASB issued FASB Statement No. 159 (SFAS No. 159), Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115. This standard permits an entity to choose to measure many financial instruments and certain other items at fair value. Southern Power plans to adopt SFAS No. 159 on January 1, 2008 and is currently assessing its impact.

FINANCIAL CONDITION AND LIQUIDITY

Overview

Southern Power's financial condition and liquidity position remained stable at June 30, 2007. Net cash provided from operating activities totaled \$96.9 million for the first six months of 2007, compared to \$67.0 million for the corresponding period in 2006. The \$29.9 million increase in cash provided from operating activities in the first six months of 2007 is primarily due to the increase in net income, as previously discussed, and cash received under billings for the engineering, procurement, and construction services to build a combined cycle unit for OUC. Net cash used for investing activities totaled \$94.4 million primarily due to gross property additions to utility plant of \$88.9 million in the first six months of 2007. These additions were primarily related to ongoing construction activity at Plants Franklin and Oleander. Net cash used for financing activities totaled \$29.8 million for the first six months of 2007, compared to cash provided of \$15.8 million for the corresponding period in 2006. This change was primarily due to higher commercial paper borrowings in the first six months of 2006 related to the acquisition of Plant DeSoto. Southern Power paid dividends to Southern Company of \$44.9 million in the first six months of 2007.

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Capital Requirements and Contractual Obligations of Southern Power in Item 7 of the Form 10-K for a description of Southern Power's capital requirements for its construction program, maturing debt, purchase commitments, and long-term service agreements. The total estimated cost of the gasifier portion of the IGCC project for Southern Power has increased to \$212 million. As a result of the increases in commodity costs and an increase in market demand for labor, the capital program of Southern Power is projected to be \$257.8 million for 2007, \$537.1 million for 2008, and \$865.0 million for 2009. These projections include Southern Power's share of the gasifier portion of the IGCC project cost increase. See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Integrated Gasification Combined Cycle (IGCC) Project herein for additional information.

In June, July, and August 2007, Southern Power entered into agreements to purchase power in the years 2007 to 2010. These purchase commitments will be \$1.6 million, \$5.4 million, \$10.9 million, and \$10.9 million in the respective years.

Table of Contents

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Sources of Capital

Southern Power plans to obtain the funds required for construction and other purposes from sources similar to those utilized in the past. Recently, Southern Power has primarily utilized funds from operating cash flows, short-term debt, external security offerings and equity contributions from Southern Company. However, the amount, type, and timing of any future financings, if needed, will depend upon regulatory approval, prevailing market conditions, and other factors. See MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY

Sources of Capital of Southern Power in Item 7 of the Form 10-K for additional information.

Southern Power's current liabilities frequently exceed current assets because of the continued use of short-term debt as a funding source as well as cash needs which can fluctuate significantly due to the seasonality of the business. To meet short-term cash needs and contingencies, Southern Power had at June 30, 2007 approximately \$2.6 million of cash and cash equivalents and a \$400 million unused committed credit facility with a 2011 maturity. Subsequent to June 30, 2007, Southern Power and its lenders extended the maturity of its credit facility from 2011 to 2012. Southern Power expects to renew its credit facilities, as needed, prior to expiration. See Note 6 to the financial statements of Southern Power under Bank Credit Arrangements in Item 8 of the Form 10-K for additional information. At June 30, 2007, Southern Power had approximately \$140.1 million of commercial paper outstanding. Management believes that the need for working capital can be adequately met by utilizing commercial paper programs and lines of credit without maintaining large cash balances.

Credit Rating Risk

Southern Power does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit downgrade. There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change to BBB and Baa2 or to BBB- or Baa3 or below. Generally, collateral may be provided with a Southern Company guaranty, letter of credit, or cash. These contracts are primarily for physical electricity purchases and sales. At June 30, 2007, the maximum potential collateral requirements at a BBB and Baa2 rating were approximately \$9 million and at a BBB- or Baa3 rating were approximately \$255 million. The maximum potential collateral requirements at a rating below BBB- or Baa3 were approximately \$479 million. In addition, through the acquisition of Plant Rowan, Southern Power assumed a PPA with Duke Power Company LLC that could require collateral, but not accelerated payment, in the event of a downgrade to Southern Power's credit rating to below BBB- or Baa3. The amount of collateral required would depend upon actual losses, if any, resulting from a credit downgrade, limited to Southern Power's remaining obligations under the PPA. Subsequent to June 30, 2007, Southern Power entered into a contract for electric capacity and energy. This contract also contains a provision that could require collateral, but not accelerated payment, in the event of a change in credit rating of Southern Power. Under this agreement, the additional potential collateral requirement at a rating below BBB- or Baa3 is \$1.5 million. Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. Southern Power, along with the other members of the Power Pool, is also party to certain agreements that could require collateral and/or accelerated payment in the event of a credit rating change to below investment grade for Alabama Power and/or Georgia Power. These agreements are primarily for natural gas and power price risk management activities. At June 30, 2007, Southern Power's total exposure to these types of agreements was \$34 million. Subsequent to June 30, 2007, certain Southern Company subsidiaries entered into additional agreements which could increase this exposure. The increase in exposure, if any, is currently \$8 million.

Table of Contents

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Market Price Risk

Southern Power is exposed to market risks, including changes in interest rates, certain energy-related commodity prices, and, occasionally, currency exchange rates. To manage the volatility attributable to these exposures, Southern Power nets the exposures to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to Southern Power's policies in areas such as counterparty exposure and hedging practices. Southern Power's policy is that derivatives are to be used primarily for hedging purposes. Derivative positions are monitored using techniques that include market valuation and sensitivity analysis.

Southern Power's market risk exposures relative to interest rate changes have not changed materially compared with the December 31, 2006 reporting period. In addition, Southern Power is not aware of any facts or circumstances that would significantly affect such exposures in the near term.

Because energy from Southern Power's generating facilities is primarily sold under long-term PPAs with tolling agreements and provisions shifting substantially all of the responsibility for fuel cost to the counterparties, Southern Power's exposure to market volatility in commodity fuel prices and prices of electricity is limited. To mitigate residual risks in those areas, Southern Power enters into fixed-price contracts for the sale of electricity.

The fair value of changes in derivative energy contracts at June 30, 2007 was as follows:

	Second Quarter 2007 Changes	Year-to-Date 2007 Changes
	Fair Value (in thousands)	
Contracts beginning of period	\$ (32)	\$ 1,850
Contracts realized or settled	(263)	(1,641)
New contracts at inception		
Changes in valuation techniques		
Current period changes (a)	3,066	2,562
Contracts at June 30, 2007	\$2,771	\$ 2,771

(a) Current period changes also include the changes in fair value of new contracts entered into during the period, if any.

	Source of June 30, 2007 Valuation Prices		
	Total Fair Value	Maturity	
		Year 1	1-3 Years
	(in thousands)		
Actively quoted	\$ 620	\$ 416	\$204
External sources	2,151	2,151	
Models and other methods			
Contracts at June 30, 2007	\$2,771	\$2,567	\$204

Unrealized pre-tax gains and losses on electric contracts used to hedge anticipated sales, and gas contracts used to hedge anticipated purchases and sales, are deferred in other comprehensive income. Gains and losses on derivative

contracts that are not designated as hedges are recognized in the statements of income as incurred.

Table of Contents

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

At June 30, 2007, the fair value gain/(loss) of derivative energy contracts was as follows:

	Amounts <i>(in thousands)</i>
Net Income	\$ 1,569
Accumulated other comprehensive loss	1,202
Total fair value	\$ 2,771

Unrealized pre-tax gains recognized in income for the three months and six months ended June 30, 2007 for derivative energy contracts that are not hedges were \$1.5 million and \$1.1 million, respectively.

For additional information, see MANAGEMENT'S DISCUSSION AND ANALYSIS FINANCIAL CONDITION AND LIQUIDITY Market Price Risk of Southern Power in Item 7 and Notes 1 and 6 to the financial statements of Southern Power under Financial Instruments in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements herein.

Financing Activities

Southern Power did not issue or redeem any long-term securities during the six months ended June 30, 2007.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS:

(A) INTRODUCTION

The condensed quarterly financial statements of the registrants included herein have been prepared by each registrant, without audit, pursuant to the rules and regulations of the SEC. The Condensed Balance Sheets as of December 31, 2006 have been derived from the audited financial statements of each registrant. In the opinion of each registrant's management, the information regarding such registrant furnished herein reflects all adjustments necessary to present fairly the results of operations for the periods ended June 30, 2007 and 2006. Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations, although each registrant believes that the disclosures regarding such registrant are adequate to make the information presented not misleading. Disclosure which would substantially duplicate the disclosure in the latest Form 10-K and details which have not changed significantly in amount or composition since the filing of the Form 10-K are omitted from this Quarterly Report on Form 10-Q. Therefore, these Condensed Financial Statements should be read in conjunction with the financial statements and the notes thereto included in the Form 10-K. Certain prior period amounts have been reclassified to conform to current period presentation. Due to seasonal variations in the demand for energy, operating results for the periods presented do not necessarily indicate operating results for the entire year.

(B) CONTINGENCIES AND REGULATORY MATTERS

See Note 3 to the financial statements of Southern Company, the traditional operating companies, and Southern Power in Item 8 of the Form 10-K for information relating to various lawsuits and other contingencies.

ENVIRONMENTAL MATTERS

New Source Review Litigation

See Note 3 to the financial statements of Southern Company and Alabama Power under Environmental Matters New Source Review Actions in Item 8 of the Form 10-K for additional information regarding civil actions brought by the EPA alleging that Alabama Power and Georgia Power had violated the NSR provisions of the Clean Air Act and related state laws with respect to certain of their respective coal-fired generating facilities. The plaintiffs' appeal against Alabama Power was stayed by the U.S. Court of Appeals for the Eleventh Circuit pending the U.S. Supreme Court's decision in a similar case against Duke Energy. On April 2, 2007, the U.S. Supreme Court issued an opinion in the Duke Energy case. On April 26, 2007, the plaintiffs filed a motion to vacate and remand the U.S. District Court for the Northern District of Alabama's decision in the Alabama Power case based on the Supreme Court's decision in Duke Energy. On June 7, 2007, the Eleventh Circuit declined the plaintiffs' request and instead issued a brief stay of appeal to allow the plaintiffs to file a motion for relief from judgment with the District Court in light of the Supreme Court's decision in Duke Energy. On July 23, 2007, the plaintiffs filed such a motion. If the District Court grants the motion, the Eleventh Circuit will remand the case back to the District Court for further proceedings. If the motion is denied, the Eleventh Circuit will retain jurisdiction over the case and the appeal will move forward. The final resolution of these claims is dependent on these appeals and possible further court action and, therefore, cannot be determined at

this time.

Table of Contents

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)

Plant Wansley Environmental Litigation

See Note 3 to the financial statements of Southern Company and Georgia Power under Environmental Matters Plant Wansley Environmental Litigation in Item 8 of the Form 10-K for additional information on litigation involving alleged violations of the Clean Air Act at four of the units at Plant Wansley. On June 18, 2007, the U.S. District Court for the Northern District of Georgia approved a settlement between the parties resolving all remaining issues and dismissed the case. There was no material impact on the financial statements of Southern Company or Georgia Power.

Environmental Remediation

During the second quarter 2007, Gulf Power increased its estimated liability for environmental remediation projects by \$12.8 million as a result of changes in the costs estimates to remediate substation sites. These projects have been approved by the Florida PSC for recovery through the environmental cost recovery clause; therefore, there was no impact on Gulf Power's net income as a result of these revised estimates. See Note 3 to the financial statements of Gulf Power under Environmental Matters Environmental Remediation in Item 8 of the Form 10-K for additional information.

MIRANT MATTERS

Mirant was an energy company with businesses that included independent power projects and energy trading and risk management companies in the U.S. and selected other countries. It was a wholly-owned subsidiary of Southern Company until its initial public offering in October 2000. In April 2001, Southern Company completed a spin-off to its shareholders of its remaining ownership, and Mirant became an independent corporate entity. In July 2003, Mirant filed for voluntary reorganization under Chapter 11 of the U.S. Bankruptcy Code. See Note 3 to the financial statements of Southern Company under Mirant Matters Mirant Bankruptcy in Item 8 of the Form 10-K for information regarding Southern Company's contingent liabilities associated with Mirant, including guarantees of contractual commitments, litigation, and joint and several liabilities in connection with the consolidated federal income tax return.

MC Asset Recovery Litigation

See Note 3 to the financial statements of Southern Company under Mirant Matters MC Asset Recovery Litigation in Item 8 of the Form 10-K for information regarding a suit between MC Asset Recovery, a special purpose subsidiary of Reorganized Mirant, and Southern Company. On March 28, 2007, MC Asset Recovery filed a Fourth Amended Complaint. Among other things, the Fourth Amended Complaint adds a claim under the Federal Debt Collection Procedure Act (FDCPA) to avoid certain transfers from Mirant to Southern Company and withdraws the breach of fiduciary duty claim the court struck as a result of Southern Company's motion for summary judgment. MC Asset Recovery claims to have standing to assert violations of the FDCPA and to recover property on behalf of the Mirant debtors' estates. The ultimate outcome of this matter cannot be determined at this time.

Mirant Securities Litigation

See Note 3 to the financial statements of Southern Company under Mirant Matters Mirant Securities Litigation in Item 8 of the Form 10-K for information regarding a class action lawsuit that several Mirant shareholders (plaintiffs) originally filed against Mirant and certain Mirant officers in May 2002. In November 2002, Southern Company, certain former and current senior officers of Southern Company, and 12 underwriters of

Mirant's initial public offering were added as defendants. On March 24, 2006, the plaintiffs filed a motion for reconsideration requesting that the court vacate that portion of its July 14, 2003 order dismissing the plaintiffs claims based upon Mirant's alleged improper energy trading and marketing activities involving the California energy market. On March 6, 2007, the court granted

Table of Contents

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)

plaintiffs' motion for reconsideration, reinstated the California energy market claims, and granted in part and denied in part defendants' motion to compel certain class certification discovery. On March 21, 2007, defendants filed renewed motions to dismiss the California energy claims on grounds originally set forth in their 2003 motions to dismiss, but which were not addressed by the court. The ultimate outcome of this matter cannot be determined at this time.

Southern Company Employee Savings Plan Litigation

See Note 3 to the financial statements of Southern Company under "Mirant Matters - Southern Company Employee Savings Plan Litigation" in Item 8 of the Form 10-K for information related to the pending settlement of a class action complaint filed under ERISA in June 2004, and amended in December 2004 and November 2005, on behalf of a purported class of participants in or beneficiaries of The Southern Company Employee Savings Plan at any time since April 2, 2001 and whose plan accounts included investments in Mirant common stock. On June 12, 2007, the U.S. District Court for the Northern District of Georgia issued a preliminary approval of the December 2006 settlement agreement and set a fairness hearing for August 2007. If approved, there will be no material impact on Southern Company's financial statements. Pending final settlement approval, the ultimate outcome of this matter cannot now be determined.

FERC MATTERS

Market-Based Rate Authority

See Note 3 to the financial statements of Southern Company, the traditional operating companies and Southern Power under "FERC Matters - Market-Based Rate Authority" in Item 8 of the Form 10-K for information regarding the proceedings initiated by the FERC in December 2004 to assess Southern Company's generation dominance within its retail service territory and in May 2005 to determine whether Southern Company satisfies the other three parts of the FERC's market-based rate analysis: transmission market power, barriers to entry, and affiliate abuse or reciprocal dealing.

In late June and July 2007, hearings were held in the December 2004 proceeding and Southern Company anticipates a decision in November 2007. On June 21, 2007, the FERC issued an order terminating the May 2005 proceeding, based upon its final approval of the settlement in the IIC proceeding discussed below.

In addition, on June 21, 2007, the FERC issued its final rule regarding market-based rate authority. The FERC generally retained its current market-based rate standards. The impact of this order and its effect on the generation dominance proceeding cannot now be determined.

Intercompany Interchange Contract

See Note 3 to the financial statements of Southern Company, the traditional operating companies and Southern Power under "FERC Matters - Intercompany Interchange Contract" in Item 8 of the Form 10-K for information regarding the proceeding initiated by the FERC in May 2005 to examine (1) the provisions of the IIC among Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Power, and SCS, as agent, under the terms of which the Power Pool is operated, and, in particular, the propriety of the continued inclusion of Southern Power as a party to the IIC, (2) whether any parties to the IIC have violated the FERC's standards of conduct applicable to utility companies that are transmission providers, and (3) whether Southern Company's code of conduct defining Southern Power as a system company rather than a marketing affiliate is just and reasonable.

On April 19, 2007, the FERC approved, with certain modifications, the compliance filing submitted by Southern Company on November 6, 2006. The compliance plan largely involves functional separation

123

Table of Contents**NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)**

and information restrictions related to marketing activities conducted on behalf of Southern Power. Implementation of the plan is not expected to have a material impact on the financial statements of Southern Company or the traditional operating companies. Southern Power's cost of implementing the compliance plan, including the modifications, is expected to average approximately \$9 million annually.

INCOME TAX MATTERS*Leveraged Lease Transactions*

See Note 3 to the financial statements of Southern Company under *Income Tax Matters* in Item 8 of the Form 10-K. The IRS challenged Southern Company's deductions related to three international lease transactions (so-called SILO or sale-in-lease-out transactions), in connection with its audits of Southern Company's 2000 through 2003 tax returns. In the third quarter 2006, Southern Company paid the full amount of the disputed tax and the applicable interest on the SILO issue for tax years 2000-2001 and filed a claim for refund which has now been denied by the IRS. The disputed tax amount is \$79 million and the related interest is approximately \$24 million for these tax years. This payment, and the subsequent IRS disallowance of the refund claim, closed the issue with the IRS and Southern Company has initiated litigation in the U.S. District Court for the Northern District of Georgia for a complete refund of tax and interest paid for the 2000-2001 tax years. The estimated amount of disputed tax and interest for tax years 2002 and 2003 is approximately \$83 million and \$15 million, respectively. The tax and interest for these tax years was paid to the IRS in the fourth quarter 2006. Southern Company has accounted for both payments in 2006 as deposits. For tax years 2000 through 2006, Southern Company has claimed \$284 million in tax benefits related to these SILO transactions challenged by the IRS. The ultimate impact on Southern Company's net income will be dependent on the outcome of pending litigation, but could be significant, and potentially material. Southern Company believes these transactions are valid leases for U.S. tax purposes and the related deductions are allowable. Southern Company is continuing to pursue resolution of these matters through administrative appeals or litigation; however, the ultimate outcome of these matters cannot now be determined.

Effective January 1, 2007, Southern Company adopted both FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes* and FASB Staff Position No. FAS 13-2 (FSP 13-2), *Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction*. FIN 48 requires companies to determine whether it is more likely than not that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. It also provides guidance on the recognition, measurement, and classification of income tax uncertainties, along with any related interest and penalties. FSP 13-2 amends FASB Statement No. 13, *Accounting for Leases* requiring recalculation of the rate of return and the allocation of income whenever the projected timing of the income tax cash flows generated by a leveraged lease is revised with recognition of the resulting gain or loss in the year of the revision. FSP 13-2 also requires that all recognized tax positions in a leveraged lease must be measured in accordance with the criteria in FIN 48 and any changes resulting from FIN 48 must be reflected as a change in an important lease assumption as of the date of adoption. In adopting these standards, Southern Company concluded that a portion of the SILO tax benefits were uncertain tax positions, as defined in FIN 48. Accordingly, Southern Company also concluded that there was a change in the projected income tax cash flows and, as required by FSP 13-2, recalculated the rate of return and allocation of income under the lease-in-lease-out (LILO) and SILO transactions.

The cumulative effect of the initial adoption of FIN 48 and FSP 13-2 was recorded as an adjustment to beginning retained earnings. For the LILO transaction settled with the IRS in February 2005, the cumulative effect of adopting FSP 13-2 was a \$17 million reduction in beginning retained earnings. With respect to

Southern Company's SILO transactions, the adoption of FSP 13-2 reduced beginning retained earnings by \$108 million and the adoption of FIN 48 reduced beginning retained earnings by an additional \$15 million. The adjustments to retained earnings are non-cash charges and those related to

Table of Contents**NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)**

FSP 13-2 will be recognized as income over the remaining terms of the affected leases. Any future changes in the projected or actual income tax cash flows will result in an additional recalculation of the net investment in the leases and will be recorded currently in income.

Synthetic Fuel Tax Credits

Southern Company has an investment in an entity that produces synthetic fuel and receives tax credits under Section 45K (formerly Section 29) of the IRC. In accordance with Section 45K of the IRC, these tax credits are subject to limitation as the annual average price of oil (as determined by the DOE) increases over a specified, inflation-adjusted dollar amount published in the spring of the subsequent year. Southern Company, along with its partners in this investment, has continued to monitor oil prices. Reserves against tax credits earned in 2007 of \$7.3 million have been recorded in the first six months of 2007 due to projected phase-outs of the credits in 2007 as a result of current and projected future oil prices.

PROPERTY TAX DISPUTE

See Note 3 to the financial statements of Georgia Power and Gulf Power under Property Tax Dispute in Item 8 of the Form 10-K for information on the property tax dispute with Monroe County, Georgia. The administrative appeals and notices of arbitration have been expanded to include tax year 2006. The appeals remain stayed pending the outcome of the related litigation. On March 30, 2007, the Georgia Court of Appeals reversed the trial court and ruled that the Monroe County Board of Tax Assessors (Monroe Board) had exceeded its legal authority and remanded the case for entry of an injunction prohibiting the Monroe Board from collecting taxes based on its independent valuation of Plant Scherer. On July 16, 2007, the Georgia Supreme Court agreed to hear the Monroe Board's requested review of this decision. The suit could impact all co-owners. Georgia Power and Gulf Power could be subject to total taxes through June 30, 2007 of up to \$20.4 million and \$3.9 million, respectively, plus penalties and interest. In accordance with Gulf Power's unit power sales contract for Plant Scherer, such property taxes would be recoverable from the customer. The ultimate outcome of this matter cannot currently be determined.

(C) SEGMENT AND RELATED INFORMATION

Southern Company's reportable business segment is the sale of electricity in the Southeast by the traditional operating companies and Southern Power. The All Other column includes parent Southern Company, which does not allocate operating expenses to business segments. Also, this category includes segments below the quantitative threshold for separate disclosure. These segments include investments in synthetic fuels and leveraged lease projects, telecommunications, and energy-related services. Southern Power's revenues from sales to the traditional operating companies were \$144 million and \$253 million for the three month and six months ended June 30, 2007, respectively, and \$130 million and \$217 million for the three month and six months ended June 30, 2006, respectively. All other intersegment revenues are not material. Financial data for business segments and products and services are as follows:

(D) MISSISSIPPI POWER RETAIL REGULATORY MATTERS

See Note 3 to the financial statements of Mississippi Power under Retail Regulatory Matters Environmental Compliance Overview Plan in Item 8 of the Form 10-K for information on Mississippi Power's annual environmental filing with the Mississippi PSC. In February 2007, Mississippi Power filed with the Mississippi PSC its annual ECO Plan evaluation for 2007. Mississippi Power requested an average increase for retail customers of 86 cents per 1,000 KWH. This increase represents approximately \$7.5 million in annual revenues for Mississippi Power. On April 13, 2007, the Mississippi PSC approved Mississippi Power's ECO Plan as filed. The new rates became effective in May 2007.

In April 2007, the Mississippi PSC issued an order allowing Mississippi Power to defer approximately \$10.4 million of certain reliability related maintenance costs beginning January 1, 2007 and recover them over a four-year period beginning January 1, 2008. These costs relate to system upgrades and improvements that are now being made as a follow-up to the emergency repairs that were made subsequent to Hurricane Katrina. As of June 30, 2007, Mississippi Power had incurred and deferred approximately \$4.7 million of such costs, which are included in Other Regulatory Assets on the Condensed Balance Sheets herein.

See Note 3 to the financial statements of Mississippi Power under Retail Regulatory Matters Storm Damage Cost Recovery in Item 8 of the Form 10-K for information regarding storm restoration costs in connection with

Hurricane Katrina and a financing order issued by the Mississippi PSC that authorized the issuance of \$121.2 million of storm restoration bonds under a state bond program. The storm restoration bonds were issued by the Mississippi Development Bank on June 1, 2007 on behalf of the State of Mississippi. On June 1, 2007, Mississippi Power received a grant payment of \$85.2 million from the State of Mississippi representing recovery of \$25.2 million in retail storm restoration costs incurred or to be incurred and \$60.0 million to increase Mississippi Power's property damage reserve. The funds received related to previously incurred storm restoration expenditures have been accounted for as a government grant and have been recorded as a reduction to the regulatory asset that was recorded as the storm restoration expenditures were incurred, in accordance with FASB Statement No. 71 (SFAS No.71), Accounting for the Effects of Certain Types of Regulation. The funds received for storm restoration expenditures to be incurred were recorded as a regulatory liability. Mississippi Power will receive the bond proceeds as expenditures are incurred to construct a new storm operations center.

Table of Contents**NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)**

The funds received with respect to the \$25.2 million grant were funded through the Mississippi Development Bank's issuance of tax-exempt bonds. Due to the tax-exempt status to the holders of bonds for federal income tax purposes, the use of the proceeds is limited to expenditures that qualify under the IRC. Prior to the receipt of the proceeds from the tax-exempt bonds in June 2007, management of Mississippi Power represented to the Mississippi Development Bank that all expenditures to date qualify under the IRC. Should Mississippi Power use the proceeds for non-qualifying expenditures, it could be required to return that portion of the proceeds received from the tax-exempt bond issuance that was applied to non-qualifying expenditures. Management expects that all future expenditures will also qualify and that no proceeds will be required to be returned.

In order for the State of Mississippi to repay the bonds issued by the Mississippi Development Bank, the State of Mississippi has established a system restoration charge that will be charged to all retail electric utility customers within Mississippi Power's service area. This charge will be collected by Mississippi Power through the retail customers' monthly statement and remitted to the State of Mississippi on a monthly basis. The system restoration charge is the property of the State of Mississippi. Mississippi Power's only obligation is to collect and remit the proceeds of the charge.

(E) COMMON STOCK

For Southern Company, the only difference in computing basic and diluted earnings per share is attributable to exercised options and outstanding options under the stock option plan. See Note 8 to the financial statements of Southern Company in Item 8 of the Form 10-K for further information on the stock option plan. The effect of the stock options was determined using the treasury stock method. Shares used to compute diluted earnings per share are as follows (in thousands):

	Three months Ended June 30, 2007	Three months Ended June 30, 2006	Six months Ended June 30, 2007	Six months Ended June 30, 2006
As reported shares	755,137	742,515	752,698	742,355
Effect of options	4,709	3,872	4,898	4,370
Diluted shares	759,846	746,387	757,596	746,725

(F) FINANCIAL INSTRUMENTS

See Note 6 to the financial statements of Southern Company, the traditional operating companies, and Southern Power under "Financial Instruments" in Item 8 of the Form 10-K. At June 30, 2007, the fair value gain/(loss) of derivative energy contracts was reflected in the financial statements as follows (in millions):

	Southern Company	Alabama Power	Georgia Power	Gulf Power	Mississippi Power	Southern Power
Regulatory (assets)/ liabilities, net	\$(36.2)	\$(12.6)	\$(21.5)	\$(2.1)	\$	\$
Accumulated other comprehensive	2.2	(0.1)			1.1	1.2

Edgar Filing: SOUTHERN CO - Form 10-Q

income (loss)						
Net income (loss)	1.8				0.2	1.6
Total fair value	\$(32.2)	\$(12.7)	\$(21.5)	\$(2.1)	\$ 1.3	\$2.8

For the three months and six months ended June 30, 2007, the unrealized gain recognized in income for derivative energy contracts that are not hedges was \$1.7 million and \$1.5 million, respectively, for Southern Company, was \$1.5 million and \$1.1 million, respectively, for Southern Power, and was immaterial for the traditional operating companies. For the three months and six months ended June 30, 2006, the unrealized gain recognized in income was \$0.7 million and \$3.7 million, respectively, for

Table of Contents**NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)**

Southern Company, was \$0.7 million and \$3.0 million, respectively, for Southern Power, and was immaterial for the traditional operating companies.

The amounts reclassified from other comprehensive income to fuel expense and revenues for the three- and six-month periods ending June 30, 2007 and 2006 were immaterial for each registrant. Additionally, no material ineffectiveness has been recorded in net income for the three and six months ended June 30, 2007 and 2006. The amounts expected to be reclassified from other comprehensive income to fuel expense and revenue for the next twelve-month period ending June 30, 2008 is also immaterial for each registrant.

During 2006 and 2007, Southern Company entered into derivative transactions to reduce its exposure to a potential phase-out of certain income tax credits related to synthetic fuel production in 2007. In accordance with Section 45K of the IRC, these tax credits are subject to limitation as the annual average price of oil increases. At June 30, 2007, the fair value of all derivative transactions related to synthetic fuel production was a \$15.7 million net asset. For the three and six months ended June 30, 2007, the fair value loss recognized in income to mark the transactions to market was \$6.5 million and \$0.2 million, respectively. For the three and six months ended June 30, 2006, the fair value gain recognized in income for similar derivative transactions was \$3.9 million.

At June 30, 2007, Southern Company had \$1.4 billion notional amount of interest rate derivatives outstanding with net fair value gains of \$23.4 million as follows:

Cash Flow Hedges

	Notional Amount	Variable Rate Received	Weighted Average Fixed Rate Paid	Hedge Maturity Date	Fair Value Gain (Loss) June 30, 2007 (in millions)
Alabama Power*	\$100 million	3-month LIBOR	6.15%	November 2017	\$
Alabama Power*	\$100 million	3-month LIBOR	6.15%	December 2017	0.1
Georgia Power*	\$300 million	3-month LIBOR	5.75%	July 2037	4.1
Georgia Power**	\$400 million	Floating	3.85%	December 2007	
Georgia Power	\$100 million	3-month LIBOR	5.10%	December 2017	4.3
Georgia Power	\$225 million	3-month LIBOR	5.26%	March 2018	7.1
Georgia Power	\$100 million	3-month LIBOR	5.12%	June 2018	4.2
Georgia Power	\$14 million	BMA Index	2.50%	December 2007	0.1
Gulf Power	\$80 million	3-month LIBOR	5.10%	July 2018	3.5

* Interest rate collar showing rate cap

** Interest rate collar with variable rate based on one-month LIBOR (showing rate cap)

The amount reclassified from other comprehensive income to interest expense for the three and six-month periods ending June 30, 2007 was a loss of \$3.8 million and \$7.3 million, respectively, for Southern Company, was a loss of \$3.3 million and \$6.6 million, respectively, for Southern Power, and was immaterial for the traditional operating companies. For the comparative three and six-month periods in 2006, the amount was a gain of \$2.6 million and \$5.3 million, respectively for Alabama Power, was a loss of \$3.0 million and \$5.9 million, respectively, for Southern Power, and was immaterial for all other registrants. No material ineffectiveness has been recorded in net income for any of the periods reported.

Table of Contents**NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)**

For the next twelve-month period ending June 30, 2008, the following table reflects the estimated pre-tax losses that will be reclassified from other comprehensive income to interest expense (in millions):

Southern Company	\$(16.5)
Alabama Power	(0.8)
Georgia Power	(1.4)
Gulf Power	(0.6)
Southern Power	(13.8)

(G) RETIREMENT BENEFITS

See Note 2 to the financial statements of Southern Company, Alabama Power, Georgia Power, Gulf Power, and Mississippi Power in Item 8 of the Form 10-K. Components of the pension plans and postretirement plans net periodic costs for the three- and six-month periods ended June 30, 2007 and 2006 are as follows (in millions):

PENSION PLANS	Southern Company	Alabama Power	Georgia Power	Gulf Power	Mississippi Power
Three Months Ended June 30, 2007

(H) EFFECTIVE TAX RATES

Southern Company's effective tax rate decreased in the six months ended June 30, 2007 as compared to 2006, largely due to the impact of synthetic fuel tax credits net of reserves, as well as increases in certain state tax credits and AFUDC equity recorded by Georgia Power. See Note 5 to the financial statements of Southern Company and Georgia Power in Item 8 of the Form 10-K for information on each company's effective income tax rate.

Southern Company recorded synthetic fuel tax credits as of the six months ended June 30, 2007 that are \$28.2 million less than the synthetic fuel tax credits recorded for the same period in 2006, which resulted in an increase in income tax expense. The increase in income tax expense was offset by a \$34 million reduction to tax credit reserves during the same period in 2007 as compared to 2006. See Note (B) herein for additional information regarding the production of synthetic fuel tax credits in 2007. The impact of the reduction in synthetic fuel tax credits and these reserves is a decrease in Southern Company's effective tax rate for the six months ended June 30, 2007 as compared to the same period in 2006.

In connection with its construction program, Georgia Power recorded increases of approximately \$8.2 million and \$15.4 million in AFUDC equity, which is not taxable, during the three months and six months ended June 30, 2007, as compared to the prior year. Georgia Power also recorded certain state income tax credits, which together with the increased AFUDC equity, resulted in a lower effective

Table of Contents**NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)**

income tax rate for the three and six months ended June 30, 2007 when compared to the same periods in 2006.

In September 2006, Georgia Power filed its 2005 income tax returns, which included certain other state income tax credits. Georgia Power has also filed similar claims for the years 2001 through 2004. The Georgia Department of Revenue has not responded to these claims. If Georgia Power prevails, such claims could have a significant, and possibly material, effect on Georgia Power's net income. On July 24, 2007, Georgia Power filed a complaint in the Superior Court of Fulton County to recover the credits claimed for the years 2002 through 2004. If Georgia Power is not successful, payment of the related state tax credits could have a significant, and possibly material, effect on Georgia Power's cash flow. The ultimate outcome of this matter cannot now be determined.

(I) ADOPTION OF FIN 48

On January 1, 2007, Southern Company, the traditional operating companies, and Southern Power adopted FIN 48, which requires companies to determine whether it is more likely than not that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. It also provides guidance on the recognition, measurement, and classification of income tax uncertainties, along with any related interest and penalties. Prior to adoption of FIN 48, Southern Company had unrecognized tax benefits of approximately \$65 million, which included approximately \$62 million for Georgia Power. As of adoption, an additional \$146 million of unrecognized tax benefits were recorded, which resulted in a total balance of \$211 million. The \$146 million is associated with a tax timing difference which was recorded by reclassifying a deferred tax liability to an unrecognized tax benefit. Of the total \$211 million unrecognized tax benefits, \$65 million would impact Southern Company's effective tax rate if recognized, which includes \$62 million for Georgia Power. For the first six months of 2007, the total amount of unrecognized tax benefits increased by \$23 million, resulting in a balance of \$234 million as of June 30, 2007. Of the \$23 million increase in unrecognized tax benefits, \$12 million would impact Southern Company's effective tax rate if recognized.

Southern Company classifies interest on tax uncertainties as interest expense. The net amount of interest accrued as of adoption was \$24 million. The impact of adopting FIN 48 on Southern Company's financial statements was a reduction to beginning 2007 retained earnings of approximately \$15 million. The other registrants' retained earnings balances were not impacted by the adoption of FIN 48. Net interest accrued for the six months ended June 30, 2007 was \$1.6 million.

Southern Company files a consolidated federal income tax return. The IRS has audited and closed all tax returns prior to 2004. Southern Company also files income tax returns in various states. The audits for these returns have either been concluded, or the statute of limitations has expired, for years prior to 2002.

Southern Company has initiated litigation in the U.S. District Court for the Northern District of Georgia for a refund of taxes and interest paid related to several SILO transactions. It is possible that a settlement of the litigation could occur within the next 12 months. In addition, certain tax-related state statutes of limitation will expire and certain state tax examinations will be concluded prior to June 30, 2008. Southern Company does not anticipate that the unrecognized tax benefits will significantly change as a result of these occurrences. See Note (B) herein for additional information regarding the implementation of FIN 48 and current litigation concerning deductions related to the SILO transactions.

(J) ALABAMA POWER RETAIL REGULATORY MATTERS

Alabama Power has established fuel cost recovery rates approved by the Alabama PSC. Alabama Power's under recovered fuel costs as of June 30, 2007 totaled \$375 million as compared to \$301 million at December 31, 2006. As a result of the increasing level of under recovered fuel costs, on June 18, 2007, the Alabama PSC ordered Alabama Power to increase its Rate ECR factor to 3.1 cents per KWH from 2.4 cents per KWH, effective with billings beginning July 2007 for the 30-month period ending December 2009. This change represents on average an increase of approximately \$7.37 per month for a

Table of Contents**NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)**

customer billing of 1,000 KWH. This increase is intended to permit the recovery of energy costs based on an estimate of future energy costs, as well as the collection of the existing under recovered energy costs by the end of 2009. During the 30-month period, Alabama Power will be allowed to include a carrying charge associated with the under recovered fuel costs in the fuel expense calculation. In the event the application of this increased Rate ECR factor results in an over recovered position during this period, Alabama Power will pay interest on any such over recovered balance at the same rate used to derive the carrying costs. As a result of the order, Alabama Power classified \$128 million of the under recovered regulatory clause receivable as deferred charges and other assets in the Condensed Balance Sheet as of June 30, 2007 herein.

As of December 31, 2006, Alabama Power had a deficit balance in the deferred natural disaster reserve account of approximately \$16.8 million. In June 2007, Alabama Power fully recovered its prior storm costs related to Hurricanes Dennis and Katrina. As a result customer rates decreased by \$1.73 per month per residential customer account and \$4.29 per month per non-residential customer account beginning with July 2007 billings. Alabama Power continues to collect a monthly Rate NDR charge to establish and maintain a target reserve balance of \$75 million for future storms. At June 30, 2007, Alabama Power had accumulated a balance of \$19.1 million in the target reserve for future storms, which is included in the balance sheets under Other Regulatory Liabilities. See Note 3 to the financial statements of Alabama Power under Retail Regulatory Matters Natural Disaster Cost Recovery in Item 8 of the Form 10-K for additional information.

(K) GEORGIA POWER RETAIL REGULATORY MATTERS

On June 29, 2007, Georgia Power filed a request to increase retail base rates with the Georgia PSC. The request includes an increase effective January 1, 2008 of approximately \$406.7 million, or 5.98%, in retail revenues, based on a future test year ending July 31, 2008 and a proposed retail return on common equity of 12.5%. The majority of the increase in retail revenues is being requested to cover the costs of environmental compliance and continued investment in new generation, transmission, and distribution facilities to support growth and ensure reliability. The remainder of the increase would include recovery of higher operation, maintenance, and other investment costs to meet the rising demand for electricity.

Georgia Power is currently operating under a three-year retail rate order that expires December 31, 2007. Under the terms of the existing order, earnings are evaluated annually against a retail return on common equity range of 10.25% to 12.25%. Two-thirds of any earnings above the 12.25% return are applied to rate refunds, with the remaining one-third retained by Georgia Power. The order required Georgia Power to file a general rate case by July 1, 2007. Georgia Power expects the Georgia PSC to issue a final order in this matter on December 20, 2007. In addition to the traditional test period request, Georgia Power filed information for a three-year rate plan option that includes additional increases of approximately \$191 million, or 2.65%, and \$45 million, or 0.61%, in retail revenues effective January 1, 2009 and 2010, respectively, to cover the costs of additional environmental controls and certified PPAs. The final outcome of this matter cannot now be determined. See Note 3 to the financial statements of Southern Company and Georgia Power under Georgia Power Retail Regulatory Matters and Retail Regulatory Matters Rate Plans, respectively, in Item 8 of the Form 10-K for additional information.

(L) NUCLEAR FUEL DISPOSAL COST LITIGATION

See Note 1 to the financial statements of Southern Company, Alabama Power and Georgia Power under Nuclear Fuel Disposal Costs in Item 8 of the Form 10-K for information regarding the litigation brought by Alabama Power and Georgia Power against the DOE for breach of contracts related to the disposal of spent nuclear fuel. On July 9, 2007, the U.S. Court of Federal Claims awarded Georgia Power a total of \$30 million,

based on its ownership interests, and awarded Alabama Power \$17.3 million, representing all of the direct costs of the expansion of spent nuclear fuel storage facilities from 1998 through 2004. The DOE has 60 days from the date of the order to file an appeal. The final outcome of this matter cannot be determined at this time, but no material impact on net income is expected. No amounts have been recognized in the financial statements as of June 30, 2007.

Table of Contents**PART II OTHER INFORMATION****Item 1. Legal Proceedings.**

See the Notes to the Condensed Financial Statements herein for information regarding certain legal and administrative proceedings in which Southern Company and its reporting subsidiaries are involved.

Item 1A. Risk Factors.

See RISK FACTORS in Item 1A of the Form 10-K for a discussion of the risk factors of Southern Company and the subsidiary registrants. There have been no material changes to these risk factors from those previously disclosed in the Form 10-K.

Item 4. Submission of Matters to a Vote of Security Holders.**Southern Company**

Southern Company held its annual meeting of shareholders on May 23, 2007. Each nominee for director of Southern Company received the requisite plurality of votes for election. The vote tabulation was as follows:

Nominees	Shares For	Shares Withheld
Juanita Powell Baranco	573,601,497	11,269,320
Dorrit J. Bern	572,368,547	12,502,270
Francis S. Blake	571,005,192	13,865,625
Thomas F. Chapman	574,151,272	10,719,545
H. William Habermeyer, Jr.	574,072,951	10,797,866
Donald M. James	568,522,602	16,348,215
J. Neal Purcell	574,310,091	10,560,726
David M. Ratcliffe	572,071,967	12,798,850
William G. Smith, Jr.	574,105,180	10,765,637
Gerald J. St. Pé	571,645,018	13,225,799

In addition, at the annual meeting, shareholders were asked to vote for the ratification of the appointment of the independent registered public accounting firm. The vote tabulation was 575,472,675 shares for, 3,257,594 shares against, and 6,140,548 shares abstaining. As a result of this vote, the appointment of the independent registered public accounting firm was ratified. Shareholders were also entitled to vote on the shareholder proposal on an environmental report. The vote tabulation was 39,012,562 shares for, 317,362,556 shares against, and 53,862,045 shares abstaining. As a result of this vote, the shareholder proposal on an environmental report was not approved.

Item 4. Submission of Matters to a Vote of Security Holders. (Continued)

Alabama Power

Alabama Power held its annual meeting of common shareholders and preferred shareholders on May 24, 2007, and the following persons were elected to serve as directors of Alabama Power:

Whit Armstrong	Robert D. Powers
David J. Cooper, Sr.	David M. Ratcliffe
John D. Johns	C. Dowd Ritter
Patricia M. King	James H. Sanford
James K. Lowder	John C. Webb, IV
Charles D. McCrary	James W. Wright
Malcolm Portera	

All 14,000,000 of the shares of Alabama Power's common stock outstanding on the record date were owned by Southern Company and were voted in favor of the nominees for directors. None of the shares of preferred stock or Class A preferred stock were voted. None of the shares of preference stock were entitled to vote.

Georgia Power

Georgia Power held its annual meeting of common shareholders and preferred shareholders on May 16, 2007, and the following persons were elected to serve as directors of Georgia Power:

Gus H. Bell, III	Jimmy C. Tallent
Robert L. Brown, Jr.	D. Gary Thompson
Ronald D. Brown	Richard W. Ussery
Anna R. Cablik	William Jerry Vereen
Michael D. Garrett	E. Jenner Wood, III
David M. Ratcliffe	

All of the 9,261,500 outstanding shares of Georgia Power's common stock were owned by Southern Company and were voted in favor of the nominees for directors. None of the shares of Class A preferred stock were voted.

Gulf Power

By written consent, in lieu of the annual meeting of stockholders of Gulf Power, effective June 26, 2007, the following persons were elected to serve as directors of Gulf Power:

C. LeDon Anchors	William A. Pullum
William C. Cramer, Jr.	Winston E. Scott
Fred C. Donovan, Sr.	Susan N. Story

All of the 1,792,717 outstanding shares of Gulf Power's common stock are owned by Southern Company and were voted in favor of the nominees for directors. None of the shares of preference stock were entitled to vote.

Item 4. Submission of Matters to a Vote of Security Holders. (Continued)

Mississippi Power

Mississippi Power held its annual meeting of common shareholders and preferred shareholders on May 16, 2007, and the following persons were elected to serve as directors of Mississippi Power:

Roy Anderson, III	Christine L. Pickering
Tommy E. Dulaney	George A. Schloegel
Warren A. Hood, Jr.	Philip J. Terrell
Robert C. Khayat	Anthony J. Topazi
Aubrey B. Patterson, Jr.	

All of the 1,121,000 outstanding shares of Mississippi Power's common stock are owned by Southern Company and were voted in favor of the nominees for directors. None of the shares of preferred stock were voted.

Southern Power

By written consent, in lieu of the annual meeting of stockholders of Southern Power, effective May 15, 2007, the number of directors constituting the board of directors was set at four and the following persons were elected to serve as directors of Southern Power:

William P. Bowers	G. Edison Holland, Jr.
Thomas A. Fanning	David M. Ratcliffe

All of the 1,000 outstanding shares of Southern Power's common stock are owned by Southern Company and were voted in favor of the nominees for directors.

Item 5. Other Information.

Termination of Material Definitive Agreements

On August 1, 2007, the Amended and Restated Operating Agreements between Alabama Power and Georgia Power, respectively, and Southern Power were terminated. Pursuant to the terms of such operating agreements, Alabama Power and Georgia Power operated Southern Power's generating facilities in their respective states. Southern Power has executed services agreements with Alabama Power and Georgia Power pursuant to which Alabama Power and Georgia Power will continue to provide services to Southern Power. Southern Power incurred no penalties as a result of the termination of the operating agreements.
