FROM THE TRUSTEES

[GRAPHIC OMITTED: PHOTO OF JOHN A. HILL AND GEORGE PUTNAM III]

Dear Fellow Shareholder:

Thanks to some astute decisions by the management team and the strong performance of U.S. government securities, Putnam Premier Income Trust was able to post favorable results within its peer group for the fiscal year that ended on July 31, 2002. The generally troubled non-U.S. and high-yield securities in the portfolio detracted from performance. On the following pages, the team provides a full discussion of the reasons behind this performance and then presents its view of prospects for the months ahead.

Management believes there are reasons for optimism as the U.S. economic recovery continues to exhibit signs that it is still very much alive, albeit not as robust as some investors might desire. Productivity continues to improve, interest rates remain low, and inflation is still virtually nonexistent, all positive signs for fixed-income securities. As non-U.S. markets also begin to recover, the managers are confident that the prospects for securities in these areas will similarly improve.

Meanwhile, as your fund begins a new fiscal year, the team continues to monitor these market and economic trends closely and will adjust the portfolio to seek maximum advantage as opportunities present themselves.

Respectfully yours,

/S/ JOHN A. HILL

/S/ GEORGE PUTNAM, III

John A. Hill
Chairman of the Trustees
September 18, 2002

George Putnam, III
President of the Funds

REPORT FROM FUND MANAGEMENT

This fund is managed by the
Putnam Core Fixed-Income Team

During the past fiscal year, Putnam Premier Income Trust endured one of the most volatile environments in recent memory for both stocks and bonds. A series of unforeseeable events during the period resulted in a flight to quality that benefited higher-quality bonds at the expense of riskier asset classes, such as high yield. Since your fund holds approximately 40%-50% of its assets in high-yield bonds, the fund

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

underperformed its benchmark index, the Lehman Government Bond Index, which consists entirely of government securities. Despite modest absolute returns at net asset value, the fund's relative performance was strong, coming in ahead of its Lipper category average for the 12-month period (see page 7 for Lipper details). The fund's higher return at market price reflected investors' growing preference for fixed-income securities and pursuit of higher yields.

Total return for 12 months ended 7/31/02

NAV	Market price
1.44%	4.44%

Past performance does not indicate future results. Performance based on market prices for the shares will vary from performance based on the portfolio's net asset value. Performance information for longer periods begins on page 7.

* 2001 WAS HEAVILY INFLUENCED BY SEPTEMBER 11

Financial markets endured one of the most challenging periods in decades, as the world struggled to overcome the damage caused by terrorism, recession, geopolitical unrest, and accounting scandals involving several large U.S. firms. These factors created an environment of uncertainty, causing fixed-income investors to favor higher-quality investments. As a result, bond sectors with greater risk, such as high yield, struggled during the year. On the other hand, government bonds benefited from the flight to quality and turned in strong returns.

[GRAPHIC OMITTED: horizontal bar chart SECTOR ALLOCATIONS]

SECTOR ALLOCATIONS*

High yield	45.4%
U.S. investment grade	32.0%
Foreign	22.6%

Footnote reads:

*Based on net assets as of 7/31/02. Holdings will vary over time.

Just as the U.S. economy was starting to gain some momentum in the late summer of 2001, the September 11 tragedy sent global markets into a tailspin. Economic activity dropped off sharply and a recession became imminent. Central banks in many developed countries intervened by cutting interest rates further in an effort to boost economic growth, and the Federal Reserve Board lowered the federal funds rate to a historical low of 1.75%, where it stood as this report was being written. Yield curves steepened dramatically as short-term yields plunged because of large-scale monetary and fiscal stimulus as well as a flight to quality among investors. Government bonds emerged as the top performers during this time.

"As the stock market continues to take an awful beating, investors have rediscovered the simple virtues of bonds."

-- Barron's, July 29, 2002

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

While the high-yield market suffered from its lack of liquidity and dependence on economic recovery immediately after September 11, high-yield bonds staged an impressive rally in the final months of 2001. Optimism set in again as the New Year approached and investors applauded signs of a stronger-than-expected economic rebound. Amid widespread references to the shortest and mildest U.S. recession in history, investors developed a renewed appetite for risk that helped lift returns in the high-yield market at the expense of the safer government sectors.

* 2002 BROUGHT MORE TURMOIL, BUT DECLINING RATES HELPED BONDS

Despite an earlier-than-expected turnaround in macroeconomic data, investor confidence rapidly eroded following the intensification of corporate accounting scandals. Poor first-quarter earnings, mounting investigations by the Securities and Exchange Commission, and fears of terrorism contributed to increasing investor risk aversion. As a result, government bonds advanced at the expense of riskier asset classes. Equity and credit markets came under pressure as investors became more skeptical about corporate accounting practices. Within the fixed-income universe, corporate bonds -- both investment grade and high-yield -- performed poorly compared to the higher-quality sectors.

Fund Profile

Putnam Premier Income Trust is designed for investors seeking a high level of current income. The fund maintains flexibility across three main sectors -- government and agencies, high-yield corporate, and international -- to seek maximum current income without undue risk to capital. The fund is designed for investors seeking a higher level of income who can accept a moderately higher level of risk.

As with the high-yield sector, emerging-market bond returns fell victim to the volatility. Initially, corporate scandals in the U.S. boosted investor interest in these bonds, especially in light of the improving macroeconomic environment. However, the second wave of corporate scandals in the U.S. lowered growth expectations worldwide and hurt the outlook for emerging-market bonds.

Your fund's performance was negatively affected by its high-yield holdings, but the management team was able to mitigate the damage by keeping the high-yield holdings well diversified and by having minimal exposure to large-scale defaults. The fund's emerging-markets holdings also hurt performance, but the fund benefited from our low exposure to Argentina and from solid performance in Russian bonds. The fund's international holdings within developed countries -- especially Germany and the U.K. -- made positive contributions overall and were enhanced by the decline in the U.S. dollar against its major counterparts.

* SLOW TO MODERATE GROWTH FOR THE REST OF 2002

We still believe that a modest economic recovery, combined with low inflation, should continue through the second half of 2002. However, given the recent trend of weaker-than-expected economic data, growth appears likely to be somewhat sluggish. We believe personal consumption should decelerate this year, moreover, due to a negative wealth effect and the lack of further tax cuts. Furthermore, we believe growth in business investment spending will outpace consumer spending by the end of the year and continue its gradual improvement throughout 2003.

Portfolio holdings will vary over time.

The high-yield market remains bifurcated, with controversy riddling four industry sectors: cable, wireline telecommunications, wireless telecommunications, and utilities. In our view, the rest of the high-yield market is in good shape from a fundamental standpoint. Poor returns in these four troubled sectors have weighed on the market heavily, and we now view high-yield bonds somewhat more cautiously than we had at the beginning of the year. While the technical environment remains supportive -- with low absolute yields, a steep yield curve, positive net cash inflows and a manageable level of supply -- secular issues in the poor-performing sectors may continue to thwart returns.

We continue to find value in international developed markets, while we remain neutral on emerging markets because of rising political concerns in specific countries. As global investors await further evidence that economic recovery remains on track, we will continue to maintain the fund's diversity.

In general, the relative weakness in the global economies bodes well for the higher-quality bond sectors, as this type of environment should keep

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

inflation and interest rates stable. We expect that the lower-quality, higher-risk sectors will benefit more as economic growth improves. As always, we will continue to take advantage of opportunities as they arise while maintaining strict risk controls. The fund's diversity remains its strength, as weak performance in some sectors can be offset by stronger performance in others. As active managers, we will continue to seek out securities with positive fundamentals and attractive valuations, as well as market sectors that appear to offer potential for outperformance, while seeking to pare back in those markets and sectors that may be facing difficulties.

The views expressed here are exclusively those of Putnam Management. They are not meant as investment advice. Although the described holdings were viewed favorably as of 7/31/02, there is no guarantee the fund will continue to hold these securities in the future. International investing involves certain risks, such as currency fluctuations, economic instability, and political developments. Lower-rated bonds may offer higher yields in return for more risk. Government securities guarantee principal and interest; mutual funds that invest in these securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk.

The fund is managed by the Putnam Core Fixed-Income Team. The members of the team are William Kohli (Portfolio Leader), David Waldman (Portfolio Member), Carl Bell, Rob Bloemker, Andrea Burke, Kevin Cronin, Krisha Memani, James Prusko, Michael Salm, and John Van Tassel.

PUTNAM'S POLICY ON CONFIDENTIALITY

In order to conduct business with our shareholders, we must obtain certain personal information such as account holders' addresses, telephone numbers, Social Security numbers, and the names of their financial advisors. We use this information to assign an account number and to help us maintain accurate records of transactions and account balances.

It is our policy to protect the confidentiality of your information, whether or not you currently own shares of our funds, and in particular, not to sell information about you or your accounts to outside marketing firms. We have safeguards in place designed to prevent unauthorized access to our computer systems and procedures to protect personal information from unauthorized use.

Under certain circumstances, we share this information with outside vendors who provide services to us, such as mailing and proxy solicitation. In those cases, the service providers enter into confidentiality agreements with us, and we provide only the information necessary to process transactions and perform other services related to your account. We may also share this information with our Putnam affiliates to service your account or provide you with information about other Putnam products or services. It is also our policy to share account information with your financial advisor, if you've listed one on your Putnam account.

If you would like clarification about our confidentiality policies or have any questions or concerns, please don't hesitate to contact us at 1-800-225-1581, Monday through Friday, 8:30 a.m. to 7:00 p.m., or Saturdays from 9:00 a.m. to 5:00 p.m. Eastern Time.

PERFORMANCE SUMMARY

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

This section provides information about your fund's performance, which should always be considered in light of its investment strategy.

Past performance does not indicate future results. More recent returns may be more or less than those shown. They do not take into account any adjustment for taxes payable on reinvested distributions. Investment returns, net asset value, and market price will fluctuate so that an investor's shares when sold may be worth more or less than their original cost.

TERMS AND DEFINITIONS

Total return shows how the value of the fund's shares changed over time, assuming you held the shares through the entire period and reinvested all distributions in the fund.

Net asset value (NAV) is the value of all your fund's assets, minus any

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

liabilities and the net assets allocated to remarketed preferred shares, divided by the number of outstanding common shares.

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on the New York Stock Exchange.

COMPARATIVE BENCHMARKS

Lehman Government Bond Index* is an unmanaged index of U.S. Treasury and agency securities.

Credit Suisse First Boston (CSFB) High Yield Index* is an unmanaged index of high-yield debt securities.

Salomon Smith Barney (SSB) Non-U.S. World Government Bond Index* is an unmanaged list of bonds issued by 10 countries.

Consumer price index (CPI) is a commonly used measure of inflation; it does not represent an investment return.

Lipper Inc. is a third-party industry ranking entity that ranks funds (without sales charges) with similar current investment styles or objectives as determined by Lipper.

*Indexes assume reinvestment of all distributions and do not account for fees. Securities and performance of a fund and an index will differ. You cannot invest directly in an index.

A GUIDE TO THE FINANCIAL STATEMENTS

These sections of the report, as well as the accompanying Notes, preceded by the Report of independent accountants, constitute the fund's financial statements.

The fund's portfolio lists all the fund's investments and their values as of the last day of the reporting period. Holdings are organized by asset type and industry sector, country, or state to show areas of concentration and diversification.

Statement of assets and liabilities shows how the fund's net assets and share price are determined. All investment and noninvestment assets are added together. Any unpaid expenses and other liabilities are subtracted from this total. The result is divided by the number of shares to determine the net asset value per share, which is calculated separately for each class of shares. (For funds with preferred shares, the amount subtracted from total assets includes the net assets allocated to remarketed preferred shares.)

Statement of operations shows the fund's net investment gain or loss. This is done by first adding up all the fund's earnings -- from dividends and interest income -- and subtracting its operating expenses to determine net investment income (or loss). Then, any net gain or loss the fund realized on the sales of its holdings -- as well as any unrealized gains or losses over the period -- is added to or subtracted from the net investment result to determine the fund's net gain or loss for the fiscal year.

Statement of changes in net assets shows how the fund's net assets were affected by distributions to shareholders and by changes in the number

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

of the fund's shares. It lists distributions and their sources (net investment income or realized capital gains) over the current reporting period and the most recent fiscal year-end. The distributions listed here may not match the sources listed in the Statement of operations because the distributions are determined on a tax basis and may be paid in a different period from the one in which they were earned.

Financial highlights provide an overview of the fund's investment results, per-share distributions, expense ratios, net investment income ratios, and portfolio turnover in one summary table, reflecting the five most recent reporting periods. In a semiannual report, the highlight table also includes the current reporting period. For open-end funds, a separate table is provided for each share class.

REPORT OF INDEPENDENT ACCOUNTANTS

The Board of Trustees and Shareholders
Putnam Premier Income Trust

We have audited the accompanying statement of assets and liabilities of Putnam Premier Income Trust, including the fund's portfolio, as of July 31, 2002, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended and financial highlights for each of the years in the four-year period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform our audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of July 31, 2002 by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Putnam Premier Income Trust as of July 31, 2002, the results of its operations for the year then ended, and changes in its net assets for each of the years in the two-year period then ended and financial highlights for each of the years in the four-year period then ended in conformity with accounting principles generally accepted in the United States of America.

Portfolio turnover (%)	175.78 (d)	231.58	133.80	165.79	209.50

(a) Per share net investment income has been determined on the basis of the weighted average number of shares outstanding during the period.

(b) Total return assumes dividend reinvestment.

(c) Includes amounts paid through expense offset arrangements (Note 2).

(d) Portfolio turnover excludes certain treasury note transactions executed in connection with a short-term trading strategy.

The accompanying notes are an integral part of these financial statements.

NOTES TO FINANCIAL STATEMENTS
July 31, 2002

Note 1

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

Significant accounting policies

Putnam Premier Income Trust (the "fund") is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. The fund's investment objective is to seek high current income consistent with the preservation of capital by allocating its investments among the U.S. government sector, high yield sector and international sector of the fixed-income securities market.

The following is a summary of significant accounting policies consistently followed by the fund in the preparation of its financial statements. The preparation of financial statements is in conformity with accounting principles generally accepted in the United States of America and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

A) Security valuation Investments for which market quotations are readily available are stated at market value, which is determined using the last reported sales price on its principal exchange, or if no sales are reported -- as in the case of some securities traded over-the-counter -- the last reported bid price. Market quotations are not considered to be readily available for certain debt obligations; such investments are stated at fair value on the basis of valuations furnished by an independent pricing service or dealers, approved by the Trustees, which determine valuations for normal institutional-size trading units of such securities using methods based on market transactions for comparable securities and variable relationships, generally recognized by institutional traders, between securities. For foreign investments, if trading or events occurring in other markets after the close of the principal exchange in which the securities are traded are expected to materially affect the value of the investments, then those investments are valued, taking into consideration these events, at their fair value following procedures approved by the Trustees. Securities quoted in foreign currencies are translated into U.S. dollars at the current exchange rate. Short-term investments having remaining maturities of 60 days or less are stated at amortized cost, which approximates market value. Other investments, including restricted securities, are stated at fair value.

B) Joint trading account The fund may transfer uninvested cash balances, including cash collateral received under security lending arrangements, into a joint trading account along with the cash of other registered investment companies and certain other accounts managed by Putnam Investment Management, LLC ("Putnam Management"), the fund's manager, an indirect wholly-owned subsidiary of Putnam, LLC. These balances may be invested in issuers of high-grade short-term investments having maturities of up to 397 days for collateral received under security lending arrangements and up to 90 days for other cash investments.

C) Repurchase agreements The fund, or any joint trading account, through its custodian, receives delivery of the underlying securities, the market value of which at the time of purchase is required to be in an amount at least equal to the resale price, including accrued interest. Collateral for certain tri-party repurchase agreements is held at the counterparty's custodian in a segregated account for the benefit of the fund and the counterparty. Putnam Management is responsible for determining that the value of these underlying securities is at all times at least equal to the resale price, including accrued interest.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

D) Security transactions and related investment income Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Gains or losses on securities sold are determined on the identified cost basis.

Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recorded as soon as the fund is informed of the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received.

All premiums/discounts are amortized/accreted on a yield-to-maturity basis. The premium in excess of the call price, if any, is amortized to the call date; thereafter, the remaining excess premium is amortized to maturity.

E) Foreign currency translation The accounting records of the fund are maintained in U.S. dollars. The market value of foreign securities, currency holdings, and other assets and liabilities are recorded in the books and records of the fund after translation to U.S. dollars based on the exchange rates on that day. The cost of each security is determined using historical exchange rates. Income and withholding taxes are translated at prevailing exchange rates when accrued or incurred. The fund does not isolate that portion of realized or unrealized gains or losses resulting from changes in the foreign exchange rate on investments from fluctuations arising from changes in the market prices of the securities. Such gains and losses are included with the net realized and unrealized gain or loss on investments. Net realized gains and losses on foreign currency transactions represent net realized exchange gains or losses on closed forward currency contracts, disposition of foreign currencies and the difference between the amount of investment income and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized appreciation and depreciation of assets and liabilities in foreign currencies arise from changes in the value of open forward currency contracts and assets and liabilities other than investments at the period end, resulting from changes in the exchange rate. Investments in foreign securities involve certain risks, including those related to economic instability, unfavorable political developments, and currency fluctuations, not present with domestic investments.

F) Forward currency contracts The fund may engage in forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to protect against a decline in value relative to the U.S. dollar of the currencies in which its portfolio securities are denominated or quoted (or an increase in the value of a currency in which securities a fund intends to buy are denominated, when a fund holds cash reserves and short-term investments). The U.S. dollar value of forward currency contracts is determined using current forward currency exchange rates supplied by a quotation service. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is "marked-to-market" daily and the change in market value is recorded as an unrealized gain or loss. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The fund could be exposed to risk if the value of the currency changes unfavorably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the fund is unable to enter into a closing position.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

G) Futures and options contracts The fund may use futures and options contracts to hedge against changes in the values of securities the fund owns or expects to purchase. The fund may also write options on securities it owns or in which it may invest to increase its current returns. The potential risk to the fund is that the change in value of futures and options contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments, if there is an illiquid secondary market for the contracts, or if the counterparty to the contract is unable to perform. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Realized gains and losses on purchased options are included in realized gains and losses on investment securities. Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade. The fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin." Exchange traded options are valued at the last sale price, or if no sales are reported, the last bid price for purchased options and the last ask price for written options. Options traded over-the-counter are valued using prices supplied by dealers.

H) Interest rate swap contracts The fund may engage in interest rate swap agreements, which are arrangements between two parties to exchange cash flows based on a notional principal amount. The fund may enter into interest rate swap agreements, to manage the fund's exposure to interest rates. Interest rate swaps are marked-to-market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain or loss. Payments made or received are included as part of interest income. Payments received or made upon early termination are recorded as realized gain or loss. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or if the counterparty defaults on its obligation to perform.

I) TBA purchase commitments The fund may enter into "TBA" (to be announced) purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalized. However, the amount of the commitments will not fluctuate more than 0.01% from the principal amount. The fund holds, and maintains until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the fund may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines prior to the settlement date, which risk is in addition to the risk of decline in the value of the fund's other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities, according to the procedures described under "Security valuation" above.

Although the fund will generally enter into TBA purchase commitments with the intention of acquiring securities for their portfolio or for delivery pursuant to options contracts it has entered into, the fund may dispose of a commitment prior to settlement if Putnam Management deems it appropriate to do so.

J) Security lending The fund may lend securities, through its agent Citibank N.A., to qualified borrowers in order to earn additional

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

income. The loans are collateralized by cash and/or securities in an amount at least equal to the market value of the securities loaned. The market value of securities loaned is determined daily and any additional required collateral is allocated to the fund on the next business day. The risk of borrower default will be borne by Citibank N.A., the fund will bear the risk of loss with respect to the investment of the cash collateral. Income from securities lending is included in investment income on the Statement of operations. At July 31, 2002, the value of securities loaned amounted to \$11,341. The fund received cash collateral of \$12,900 which is pooled with collateral of other Putnam funds into 33 issuers of high-grade short-term investments.

K) Federal taxes It is the policy of the fund to distribute all of its taxable income within the prescribed time and otherwise comply with the provisions of the Internal Revenue Code applicable to regulated investment companies. It is also the intention of the fund to distribute an amount sufficient to avoid imposition of any excise tax under Section 4982 of the Internal Revenue Code of 1986, as amended. Therefore, no provision has been made for federal taxes on income, capital gains or unrealized appreciation on securities held nor for excise tax on income and capital gains.

At July 31, 2002, the fund had a capital loss carryover of approximately \$154,608,000 available to offset future capital gains, if any. The amount of the carryover and the expiration dates are:

Loss Carryover	Expiration
-----	-----
\$39,893,000	July 31, 2007
44,858,000	July 31, 2008
24,930,000	July 31, 2009
44,927,000	July 31, 2010

L) Distributions to shareholders Distributions to shareholders from net investment income are recorded by the fund on the ex-dividend date. Distributions from capital gains, if any, are recorded on the ex-dividend date and paid at least annually. The amount and character of income and gains to be distributed are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. These differences include temporary and permanent differences of losses on wash sale transactions, foreign currency gains and losses, post-October loss deferrals, dividends payable, defaulted bond interest, realized and unrealized gains and losses on certain futures contracts, paydown gains and losses on mortgage-backed securities, market discount and interest on payment-in-kind securities. Reclassifications are made to the fund's capital accounts to reflect income and gains available for distribution (or available capital loss carryovers) under income tax regulations. For the year ended July 31, 2002, the fund reclassified \$1,748,833 to decrease distributions in excess of net investment income and \$73,840 to decrease paid-in-capital, with an increase to accumulated net realized losses of \$1,674,993. As of July 31, 2002, the undistributed ordinary income on a tax basis was zero.

Note 2

Management fee, administrative services and other transactions

Compensation of Putnam Management, for management and investment advisory services is paid quarterly based on the average net assets of the fund. Such fee is based on the following annual rates: 0.75% of the first \$500 million of average weekly net assets, 0.65% of the next \$500

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

million, 0.60% of the next \$500 million and 0.55% of any amount over \$1.5 billion.

The fund reimburses Putnam Management an allocated amount for the compensation and related expenses of certain officers of the fund and their staff who provide administrative services to the fund. The aggregate amount of all such reimbursements is determined annually by the Trustees.

Custodial functions for the fund's assets are provided by Putnam Fiduciary Trust Company (PFTC), a wholly-owned subsidiary of Putnam, LLC. Investor servicing agent functions are provided by Putnam Investor Services, a division of PFTC.

The fund has entered into an arrangement with PFTC whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the fund's expenses. For the year ended July 31, 2002, the fund's expenses were reduced by \$47,633 under these arrangements.

Each independent Trustee of the fund receives an annual Trustee fee, of which \$1,050 has been allocated to the fund, and an additional fee for each Trustees meeting attended. Trustees receive additional fees for attendance at certain committee meetings.

The fund has adopted a Trustee Fee Deferral Plan (the "Deferral Plan") which allows the Trustees to defer the receipt of all or a portion of Trustees Fees payable on or after July 1, 1995. The deferred fees remain invested in certain Putnam funds until distribution in accordance with the Deferral Plan.

The fund has adopted an unfunded noncontributory defined benefit pension plan (the "Pension Plan") covering all Trustees of the fund who have served as Trustee for at least five years. Benefits under the Pension Plan are equal to 50% of the Trustee's average total retainer and meeting fees for the three years preceding retirement. Pension expense for the fund is included in Compensation of Trustees in the Statement of operations. Accrued pension liability is included in Payable for compensation of Trustees in the Statement of assets and liabilities.

Note 3

Purchases and sales of securities

During the year ended July 31, 2002, cost of purchases and proceeds from sales of investment securities other than U.S. government obligations and short-term investments aggregated \$827,496,144 and \$818,094,720, respectively. Purchases and sales of U.S. government obligations aggregated \$1,171,503,408 and \$1,192,922,632, respectively.

Written option transactions during the year are summarized as follows:

	Contract Amounts	Premiums Received

Written options outstanding at beginning of year	1,664,000	\$33,280

Options opened	6,126,048	27,813
Options expired	(6,126,000)	(11,167)
Options closed	(1,664,048)	(49,926)

Written options

FUND INFORMATION

ABOUT PUTNAM INVESTMENTS

One of the largest mutual fund families in the United States, Putnam Investments has a heritage of investment leadership dating back to Judge Samuel Putnam, whose Prudent Man Rule has defined fiduciary tradition and practice since 1830. Founded 65 years ago, Putnam Investments was built around the concept that a balance between risk and reward is the hallmark of a well-rounded financial program. We presently manage over 100 mutual funds in growth, value, blend, fixed income, and international.
