At March 31, 2009, the cost of investments for federal income tax purposes was \$1,005,874,401. The tax basis gross unrealized appreciation and depreciation of portfolio securities were \$14,633,206 and \$302,247,904, respectively. Net unrealized depreciation was \$287,614,698.

- * Non-income producing security.
- ** Security in default and non-income producing.

At March 31, 2009, Tri-Continental Corporation owned one limited partnership investment that was purchased through a private offering and cannot be sold without prior registration under the Securities Act of 1933 or pursuant to an exemption therefrom. The investment is valued at fair value as determined in accordance with procedures approved by the Board of Directors of the Corporation. The acquisition dates of investment in the limited partnership, along with the cost and value at March 31, 2009, was as follows:

Investment	Acquisition Dates	Cost	Value
WCAS Capital Partners II, L.P.	12/11/90 to 3/24/98	\$4,292,803	\$1,893,126

The security may be offered and sold only to a <code>[qualified</code> institutional buyer <code>[]</code> under Rule 144A of the Securities Act of 1933. These notes are exchangeable at maturity, based on the terms of the respective notes, for shares of common stock of a company or cash at a maturity value which is generally determined as follows: The principal amount of the notes plus or minus the lowest return of the companies <code>[]</code> respective stock prices determined at maturity from the date of purchase of the notes:

- (a) Delta Air Lines, Inc., Intel Corporation and Mylan Inc.
- (b) Health Net, Inc., Kohl's Corporation and Prudential Financial, Inc.

ADR ☐ American Depositary Receipts.

Security Valuation [] Securities traded on an exchange are valued at the last sales price on the primary exchange or market on which they are traded. Securities not listed on an exchange or security market, or securities for which there is no last sales price, are valued at the mean of the most recent bid and asked prices or are valued by RiverSource Investments, LLC ([RiverSource]] or the [Manager]] based on quotations provided by primary market makers in such securities. Securities for which market quotations are not readily available (or are otherwise no longer valid or reliable) are valued at fair value determined in accordance with procedures approved by the Board of Directors. This can occur in the event of, among other things, natural disasters, acts of terrorism, market disruptions, intra-day trading halts, and extreme market volatility. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other investment companies to determine net asset value or the price that may be realized upon the actual sale of the security. Short-term holdings maturing in 60 days or less are valued at current market quotations or amortized cost if the Manager believes it approximates fair value. Short-term holdings that mature in more than 60 days are valued at current market quotations until the 60th day prior to maturity and are then valued as described above for securities maturing in 60 days or less. Investments in money market funds are valued at net asset value.

Fair Value Measurements [] Statement of Financial Accounting Standards No. 157 ([]SFAS 157[]), []Fair Value Measurements, [] establishes a three-tier hierarchy to classify the assumptions, referred to as inputs, used in valuation techniques (see Security Valuation above) to measure fair value of the Corporation[]s investments and other financial instruments. These inputs are summarized in three broad levels: Level 1 [] quoted prices in active markets for identical investments or financial instruments; Level 2 [] other significant observable inputs (including quoted prices in inactive markets or for similar investments or financial instruments); and Level 3 [] significant unobservable inputs (including the Corporation[]s own assumptions in determining fair value). Observable inputs are those based on market data obtained from sources independent of the Corporation, and unobservable inputs reflect the Corporation[]s own assumptions based on the best information available. The inputs or methodology

used for valuing securities may not be an indication of the risk associated with investing in those securities.

The following is a summary of the value of the Corporation

s investments and other financial instruments as of March 31, 2009, based on the level of inputs used:

			Other Financial
	Valuation Inputs	Investments	Instruments*
Level 1	Quoted Prices in Active Markets for		
	Identical Investments	\$713,706,948	\$ □
Level 2	Other Significant Observable Inputs	2,659,629	(62,833)
Level 3	[Significant Unobservable Inputs	1,893,126	
	Total	\$718,259,703	\$ (62,833)

^{*} Represents futures, which are not reflected in the Portfolio of Investments and which are valued at the net unrealized appreciation (depreciation) on futures.

As required by SFAS 157, the following is a reconciliation of investments for which significant unobservable inputs (Level 3) were used to determine the fair value of investments classified as Level 3 at either the beginning or end of the period:

Balance as of December 31, 2008	\$ 1,893,126
Net change in unrealized depreciation	
Balance as of March 31, 2009	\$ 1,893,126
Net change in unrealized depreciation from	
investments still held as of March 31, 2009	\$

Risk \square To the extent that the Corporation invests a substantial percentage of its assets in an industry, the Corporation \square s performance may be negatively affected if that industry falls out of favor. Stocks of large-capitalization companies have at times experienced periods of volatility and negative performance. During such periods, the value of such stocks may decline and the Corporation \square s performance may be negatively affected.

ITEM 2. CONTROLS AND PROCEDURES.

- a. The registrant's principal executive officer and principal financial officer have concluded, based upon their evaluation of the registrant's disclosure controls and procedures as conducted within 90 days of the filing date of this report, that these disclosure controls and procedures provide reasonable assurance that material information required to be disclosed by the registrant in the report it files or submits on Form N-Q is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms and that such material information is accumulated and communicated to the registrant's management, including its principal executive officer and principal financial officer, as appropriate, in order to allow timely decisions regarding required disclosure.
- b. The registrant s principal executive officer and principal financial officer are aware of no changes in the registrant internal control over financial reporting that occurred during the registrant s last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant internal control over financial reporting.

ITEM 3. EXHIBITS.

(a) Certifications of principal executive officer and principal financial officer as required by Rule 30a-2(a) under the Investment Company Act of 1940.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

TRI-CONTINENTAL CORPORATION
