Summary Information

VanEck Vectors AMT-Free NATIONAL municipal index etf

Investment Objective

VanEck Vectors™ AMT-Free National Municipal Index ETF (the “Fund”) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Bloomberg Barclays AMT-Free National Municipal Index (the “Index”).

Fund Fees and Expenses

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (“Shares”).

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fee	[]%
Other Expenses ^(a)	[]%
Total Annual Fund Operating Expenses ^(b)	[]%

(a) “Other Expenses” are based on estimated amounts for the current fiscal year.

The investment management agreement between VanEck Vectors ETF Trust (the “Trust”) and Van Eck Associates Corporation (the “Adviser”) provides that the Adviser will pay all expenses of the Fund, except for the fee payment under the investment management agreement, interest expense, offering costs, trading expenses, taxes and extraordinary expenses.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

YEAREXPENSES

1	\$[]
3	\$[]

Portfolio Turnover

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or "turns over" its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. Because the Fund is newly organized, no portfolio turnover figures are available.

3

Principal Investment Strategies

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Index is comprised of publicly traded municipal bonds that cover the U.S. dollar-denominated investment grade and high yield tax-exempt bond market. The Index tracks the municipal bond market with a 75% weight in investment grade municipal bonds (*i.e.*, rated Baa3/BBB- rated or higher) and the high yield municipal bond market with a 25% weight in non-investment grade municipal bonds (*i.e.*, unrated or rated Ba1/BB+ or lower). The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund has adopted a fundamental investment policy to invest at least 80% of its assets in municipal securities. For purposes of this policy, the term "assets" means net assets plus the amount of any borrowings for investment purposes. This percentage limitation applies at the time of the investment.

The Fund, using a "passive" or indexing investment approach, attempts to approximate the investment performance of the Index. Because of the practical difficulties and expense of purchasing all of the securities in the Index, the Fund does not purchase all of the securities in the Index. Instead, the Adviser utilizes a "sampling" methodology in seeking to achieve the Fund's objective. As such, the Fund may purchase a subset of the securities in the Index in an effort to hold a portfolio of bonds with generally the same risk and return characteristics of the Index.

The Fund is classified as a non-diversified fund and, therefore, may invest a greater percentage of its assets in a particular issuer. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Index concentrates in an industry or group of industries. As of September 30, 2016, the health care, general obligations, industrial development revenue, transportation and special tax (*i.e.*, revenue bonds backed by a specific tax) sectors each represented a significant portion of the Index.

As of September 30, 2016, approximately 18% of the Index consisted of municipal bonds issued by issuers located in California and approximately 14% of the Index consisted of municipal bonds issued by issuers located in New York.

Principal Risks of Investing in the Fund

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Municipal Securities Risk. Municipal securities are subject to the risk that litigation, legislation or other political events, local business or economic conditions or the bankruptcy of the issuer could have a significant effect on an issuer's ability to make payments of principal and/or interest. Certain municipalities may have difficulty meeting their obligations due to, among other reasons, changes in underlying demographics. Municipal securities can be significantly affected by political changes as well as uncertainties in the municipal market related to taxation, legislative changes or the rights of municipal security holders. Because many municipal securities are issued to finance similar projects, especially those relating to education, health care, transportation and utilities, conditions in those sectors can affect the overall municipal market. In addition, changes in the financial condition of an individual municipal insurer can affect the overall municipal market. Municipal securities may include revenue bonds, which are generally backed by revenue from a specific project or tax. The issuer of a revenue bond makes interest and principal payments from revenues generated from a particular source or facility, such as a tax on particular property or revenues generated from a municipal water or sewer utility or an airport. Revenue bonds generally are not backed by the full faith and credit and general taxing power of the issuer. The market for municipal bonds may be less liquid than for taxable bonds. The value and liquidity of many municipal securities have decreased as a result of the recent financial crisis, which has also adversely affected many municipal securities issuers and may continue to do so. There may be less information available on the financial condition of issuers of municipal securities than for public corporations.

Credit Risk. Bonds are subject to credit risk. Credit risk refers to the possibility that the issuer or guarantor of a security will be unable and/or unwilling to make timely interest payments and/or repay the principal on its debt or to otherwise honor its obligations. Bonds are subject to varying degrees of credit risk, depending on the issuer's financial condition and on the terms

of the securities, which may be reflected in credit ratings. There is a possibility that the credit rating of a bond may be downgraded after purchase or the perception of an issuer's credit worthiness may decline, which may adversely affect the value of the security. The Fund may hold securities that are insured by a bond insurer. A downgrade of the credit rating of such bond insurer may cause the value of the insured security to decline.

Interest Rate Risk. Bonds are also subject to interest rate risk. Interest rate risk refers to fluctuations in the value of a bond resulting from changes in the general level of interest rates. When the general level of interest rates goes up, the prices of most bonds go down. When the general level of interest rates goes down, the prices of most bonds go up. The historically low interest rate environment increases the risk associated with rising interest rates, including the potential for periods of volatility and increased redemptions. The Fund may face a heightened level of interest rate risk, since the U.S. Federal Reserve Board recently ended its quantitative easing program and has begun to raise rates. In addition, bonds with longer durations tend to be more sensitive to interest rate changes, usually making them more volatile than bonds with shorter durations.

Call Risk. The Fund may invest in callable bonds. If interest rates fall, it is possible that issuers of callable securities will "call" (or prepay) their bonds before their maturity date. If a call were exercised by the issuer during or following a period of declining interest rates, the Fund is likely to have to replace such called security with a lower yielding security. If that were to happen, it would decrease the Fund's net investment income.

High Yield Securities Risk. Securities rated below investment grade are commonly referred to as high yield securities or "junk bonds." Junk bonds are often issued by issuers that are restructuring, are smaller or less creditworthy than other issuers, or are more highly indebted than other issuers. Junk bonds are subject to greater risk of loss of income and principal than higher rated securities and are considered speculative. The prices of junk bonds are likely to be more sensitive to adverse economic changes or individual issuer developments than higher rated securities. During an economic downturn or substantial period of rising interest rates, junk bond issuers may experience financial stress that would adversely affect their ability to service their principal and interest payment obligations, to meet their projected business goals or to obtain additional financing. In the event of a default, the Fund may incur additional expenses to seek recovery. The secondary market for securities that are junk bonds may be less liquid than the markets for higher quality securities and, as such, may have an adverse effect on the market prices of and the Fund's ability to arrive at a fair value for certain securities. The illiquidity of the market also could make it difficult for the Fund to sell certain securities in connection with a rebalancing of the Index. In addition, periods of economic uncertainty and change may result in an increased volatility of market prices of high yield securities and a corresponding volatility in the Fund's net asset value ("NAV").

California Risk. The Fund may invest a significant portion of its assets in municipal obligations of issuers located in the State of California. Consequently, the Fund may be affected by political, economic, regulatory and other developments within California and by the financial condition of California's political subdivisions, agencies, instrumentalities and public authorities.

New York Risk. The Fund may invest a significant portion of its assets in municipal obligations of issuers located in the State of New York and, therefore, will have greater exposure to negative political, economic, regulatory or other

factors within the State of New York, including the financial condition of its public authorities and political subdivisions, than a fund that invests in a broader base of securities. Unfavorable developments in any economic sector may have a substantial impact on the overall New York municipal market. Certain issuers of New York municipal bonds have experienced serious financial difficulties in the past and reoccurrence of these difficulties may impair the ability of certain New York issuers to pay principal or interest on their obligations.

General Obligation Bond Risk. General obligation bonds are not backed by revenues from a specific project or source. Instead, general obligation bonds are backed by the “full faith and credit” of the issuer, which has the power to tax residents to pay bondholders. To the extent that general obligation bonds continue to represent a significant portion of the Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the general obligation bond sector. Timely payments depend on the issuer’s credit quality, ability to raise tax revenues and ability to maintain an adequate tax base.

Health Care Bond Risk. The health care industry is subject to regulatory action by a number of private and governmental agencies, including federal, state and local governmental agencies. To the extent that the health care sector continues to represent a significant portion of the Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the health care sector. A major source of revenues for the health care industry is payments from Medicare and Medicaid programs. As a result, the industry is sensitive to legislative changes and reductions in governmental spending for such programs. Numerous other factors may also affect the industry and the value and credit quality

of health care bonds, such as general and local economic conditions, demand for services, expenses (including malpractice insurance premiums) and competition among health care providers. The following elements may adversely affect health care facility operations: the implementation of national and/or state-specific health insurance exchanges; other national, state or local health care reform measures; medical and technological advances which dramatically alter the need for health services or the way in which such services are delivered; changes in medical coverage which alter the traditional fee-for-service revenue stream; efforts by employers, insurers, and governmental agencies to reduce the costs of health insurance and health care services; and increases and decreases in the cost and availability of medical products.

Industrial Development Bond Risk. These revenue bonds are issued by or on behalf of public authorities to obtain funds to finance various public and/or privately operated facilities, including those for business and manufacturing, housing, sports, pollution control, airport, mass transit, port and parking facilities. To the extent that the industrial development sector continues to represent a significant portion of the Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the industrial development sector. These bonds are normally secured only by the revenues from the project and not by state or local government tax payments. Consequently, the credit quality of these securities is dependent upon the ability of the user of the facilities financed by the bonds and any guarantor to meet its financial obligations. Payment of interest on and repayment of principal on such bonds are the responsibility of the user and/or any guarantor. These bonds are subject to a wide variety of risks, many of which relate to the nature of the specific project. Generally, the value and credit quality of these bonds are sensitive to the risks related to an economic slowdown.

Transportation Bond Risk. Transportation debt may be issued to finance the construction of airports, toll roads, highways or other transit facilities. To the extent that the transportation sector continues to represent a significant portion of the Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the transportation sector. Airport bonds are dependent on the general stability of the airline industry and on the stability of a specific carrier who uses the airport as a hub. Air traffic generally follows broader economic trends and is also affected by the price and availability of fuel. Toll road bonds are also affected by the cost and availability of fuel as well as toll levels, the presence of competing roads and the general economic health of an area. Fuel costs and availability also affect other transportation related securities, as do the presence of alternate forms of transportation, such as public transportation. Municipal securities that are issued to finance a particular transportation project often depend solely on revenues from that project to make principal and interest payments. Adverse conditions and developments affecting a particular project may result in lower revenues to the issuer of the municipal securities.

Special Tax Bond Risk. Special tax bonds are usually backed and payable through a single tax, or series of special taxes such as incremental property taxes. To the extent that the special tax sector continues to represent a significant portion of the Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the special tax sector. The failure of the tax levy to generate adequate revenue to pay the debt service on the bonds may cause the value of the bonds to decline. Adverse conditions and developments affecting a particular project may result in lower revenues to the issuer of the municipal securities, which may adversely affect the value of the Fund's portfolio.

Sampling Risk. The Fund's use of a representative sampling approach will result in its holding a smaller number of securities than are in the Index. As a result, an adverse development respecting an issuer of securities held by the Fund could result in a greater decline in NAV than would be the case if the Fund held all of the securities in the Index. Conversely, a positive development relating to an issuer of securities in the Index that is not held by the Fund could cause the Fund to underperform the Index. To the extent the assets in the Fund are smaller, these risks will be greater.

Tax Risk. There is no guarantee that the Fund's income will be exempt from U.S. federal or state income taxes. Events occurring after the date of issuance of a municipal bond or after the Fund's acquisition of a municipal bond may result in a determination that interest on that bond is includible in gross income for U.S. federal income tax purposes retroactively to its date of issuance. Such a determination may cause a portion of prior distributions by the Fund to its shareholders to be taxable to those shareholders in the year of receipt. Federal or state changes in income or alternative minimum tax rates or in the tax treatment of municipal bonds may make municipal bonds less attractive as investments and cause them to lose value.

Market Risk. The prices of the securities in the Fund are subject to the risks associated with investing in municipal securities, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Index Tracking Risk. The Fund's return may not match the return of the Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index and raising cash

to meet redemptions or deploying cash with newly created Creation Units (defined herein). The Fund also bears the costs and risks associated with buying and selling securities while such costs and risks are not factored into the return of the Index, and transaction costs, including brokerage costs, will decrease the Fund's NAV to the extent not offset by the transaction fee payable by an AP (defined herein). The Fund may not be fully invested at times, either as a result of cash flows into the Fund or reserves of cash held by the Fund to pay expenses. In addition, the Fund's use of a representative sampling approach may cause the Fund to not be as well correlated with the return of the Index as would be the case if the Fund purchased all of the securities in the Index in the proportions in which they are represented in the Index. The Fund is expected to value certain of its investments based on fair value prices. To the extent the Fund calculates its NAV based on fair value prices and the value of the Index is based on securities' closing prices (*i.e.*, the value of the Index is not based on fair value prices), the Fund's ability to track the Index may be adversely affected. For tax efficiency purposes, the Fund may sell certain securities, and such sale may cause the Fund to realize a loss and deviate from the performance of the Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Index.

Authorized Participant Concentration Risk. The Fund may have a limited number of financial institutions that act as Authorized Participants ("APs"), none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, Shares may trade like closed-end funds at a discount to NAV and possibly face trading halts and/or de-listing. The AP concentration risk may be heightened because APs may be required to post collateral, which only certain APs may be able to do. To the extent that APs exit the business or are unable to process creations or redemptions or similar activities, this may result in a significantly diminished trading market for Shares.

Absence of Prior Active Market. The Fund is a newly organized series of an investment company and thus has no operating history. While the Fund's Shares are expected to be listed on BATS Global Markets, Inc. ("BATS"), there can be no assurance that active trading markets for the Shares will develop or be maintained especially for recently organized funds. Further, secondary markets may be subject to irregular trading activity, market dislocations, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material decline in the Fund's NAV.

Trading Issues. Trading in Shares on BATS may be halted due to market conditions or for reasons that, in the view of BATS, make trading in Shares inadvisable. In addition, trading in Shares on BATS is subject to trading halts caused by extraordinary market volatility pursuant to BATS's "circuit breaker" rules. There can be no assurance that the requirements of BATS necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any bond fund, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not "actively" managed, unless a specific security is removed from the Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Fund Shares Trading, Premium/Discount Risk and Liquidity Risk of Fund Shares. The market prices of the Shares may fluctuate in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for Shares. The Adviser cannot predict whether Shares will trade above, below, or at their most recent NAV. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The securities held by the Fund may be traded in markets that close at a different time than BATS. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when BATS is open but after the applicable market closing, fixing or settlement times, bid-ask spreads on BATS and the resulting premium or discount to the Shares' NAV may widen. Additionally, in stressed market conditions, the market for the Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

Non-Diversified Risk. The Fund is classified as a "non-diversified" investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in obligations of a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Fund's investments are concentrated in a particular sector or sectors or industry or group of industries, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector or industry will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

Performance

The Fund has not yet commenced operations and therefore does not have a performance history. Once available, the Fund's performance information will be accessible on the Fund's website at www.vaneck.com.

Portfolio Management

Investment Adviser. Van Eck Associates Corporation.

Portfolio Managers. The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
James T. Colby III	Portfolio Manager	[]
Eric J. Isenberg	Portfolio Manager	[]

Purchase and Sale of Fund Shares

The Fund issues and redeems Shares at NAV only in a large specified number of Shares, each called a "Creation Unit," or multiples thereof. A Creation Unit consists of 50,000 Shares.

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through brokers. Shares of the Fund are expected to be approved for listing, subject to notice of issuance, on BATS and because Shares will trade at market prices rather than NAV, Shares of the Fund may trade at a price greater than or less than NAV.

Tax Information

The Fund expects to distribute net investment income at least monthly, and any net realized long-term or short-term capital gains annually. The Fund may also pay a special distribution at any time to comply with U.S. federal tax requirements. Dividends paid by the Fund that are properly reported as exempt-interest dividends will not be subject to regular U.S. federal income tax. The Fund intends to invest its assets in a manner such that a significant portion of the Fund's dividend distributions to shareholders will generally be exempt from U.S. federal income taxes, including the federal alternative minimum tax for noncorporate shareholders. Such distributions will generally be subject to state income taxes.

Distributions from the Fund's net investment income (other than net tax-exempt income), including any net short-term capital gains, if any, are taxable to you as ordinary income.

Payments to Broker-Dealers and Other Financial Intermediaries

The Adviser and its related companies may pay broker-dealers or other financial intermediaries (such as a bank) for the sale of

the Fund Shares and related services. These payments may create a conflict of interest by influencing your broker-dealer or other intermediary or its employees or associated persons to recommend the Fund over another investment. Ask your financial adviser or visit your financial intermediary's website for more information.

Additional Information About the Fund's Investment Strategies and Risks

Principal Investment Strategies

The Fund uses a sampling approach in seeking to achieve its investment objective. Sampling means that the Adviser uses quantitative analysis to select a representative sample of securities that the Adviser believes collectively have an investment profile similar to the Index. The Adviser seeks to select securities that will have, in the aggregate, investment characteristics (such as return variability, duration, maturity or credit ratings and yield) and liquidity measures similar to those of the Index. The quantity of holdings in the Fund will be based on a number of factors, including asset size of the Fund. The Adviser generally expects the Fund to hold less than the total number of securities in the Index, but reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective. In addition, from time to time, securities are added to or removed from the Index. The Fund may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Further, the Adviser may choose to underweight or overweight securities, purchase or sell securities not in the Index, or utilize various combinations of other available investment techniques, in seeking to track the Index.

Fundamental and Non-Fundamental Policies

The Fund's investment objective and each of its other investment policies are non-fundamental policies that may be changed by the Board of Trustees without shareholder approval, except for the Fund's fundamental investment policy to invest at least 80% of its assets in investments suggested by its name (which may only be changed with shareholder approval) or as otherwise noted in this Prospectus or the Statement of Additional Information ("SAI") under the section entitled "Investment Policies and Restrictions—Investment Restrictions."

Risks of Investing in the Fund

The following section provides additional information regarding the principal risks identified under "Principal Risks of Investing in the Fund" in the Fund's "Summary Information" section followed by additional risk information.

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Municipal Securities Risk. Municipal securities are subject to the risk that litigation, legislation or other political events, local business or economic conditions or the bankruptcy of the issuer could have a significant effect on an issuer's ability to make payments of principal and/or interest. In addition, there is a risk that, as a result of the current economic crisis, the ability of any issuer to pay, when due, the principal or interest on its municipal bonds may be materially affected. Certain municipalities may have difficulty meeting their obligations due to, among other reasons, changes in underlying demographics. Municipal securities can be significantly affected by political changes as well as uncertainties in the municipal market related to taxation, legislative changes or the rights of municipal security holders. Because many municipal securities are issued to finance similar projects, especially those relating to education, health care, transportation and utilities, conditions in those sectors can affect the overall municipal market. In addition, changes in the financial condition of an individual municipal insurer can affect the overall municipal market. Municipal securities may include revenue bonds, which are generally backed by revenue from a specific project or tax. The issuer of a revenue bond makes interest and principal payments from revenues generated from a particular source or facility, such as a tax on particular property or revenues generated from a municipal water or sewer utility or an airport. Revenue bonds generally are not backed by the full faith and credit and general taxing power of the issuer. Municipal securities backed by current or anticipated revenues from a specific project or specific assets can be negatively affected by the

discontinuance of the taxation supporting the project or assets or the inability to collect revenues for the project or from the assets.

If the Internal Revenue Service (“IRS”) determines that an issuer of a municipal security has not complied with applicable tax requirements, interest from the security could become taxable and the security could decline significantly in value.

The market for municipal bonds may be less liquid than for taxable bonds. There may also be less information available on the financial condition of issuers of municipal securities than for public corporations. This means that it may be harder to buy and sell municipal securities, especially on short notice, and municipal securities may be more difficult for the Fund to value accurately than securities of public corporations. Since the Fund invests a significant portion of its portfolio in municipal securities, its portfolio may have greater exposure to liquidity risk than a fund that invests in non-municipal securities. In addition, the value and liquidity of many municipal securities have decreased as a result of the recent financial crisis, which has also adversely affected many municipal securities issuers and may continue to do so. The markets for many credit instruments, including municipal securities, have experienced periods of illiquidity and extreme volatility since the latter half of 2007. In response to the global economic downturn, governmental cost burdens may be reallocated among federal, state and local governments. In addition, issuers of municipal securities may seek protection under the bankruptcy laws. Many state and local governments that issue municipal securities are currently under significant economic and financial stress and may not be able to satisfy their obligations. The taxing power of any governmental entity may be limited and an entity’s credit may depend on factors which are beyond the entity’s control.

Credit Risk. Bonds are subject to credit risk. Credit risk refers to the possibility that the issuer of a security will be unable and/or unwilling to make timely interest payments and/or repay the principal on its debt or to otherwise honor its obligations. Bonds are subject to varying degrees of credit risk which may be reflected in credit ratings. There is a possibility that the credit rating of a bond may be downgraded after purchase or the perception of an issuer’s credit worthiness may decline, which may adversely affect the value of the security. The Fund may hold securities that are insured by a bond insurer. A downgrade of a credit rating of such bond insurer may cause the value of the insured security to decline.

Interest Rate Risk. Bonds are also subject to interest rate risk. Interest rate risk refers to fluctuations in the value of a bond resulting from changes in the general level of interest rates. When the general level of interest rates goes up, the prices of most bonds go down. When the general level of interest rates goes down, the prices of most bonds go up. The historically low interest rate environment increases the risk associated with rising interest rates, including the potential for periods of volatility and increased redemptions. The Fund may face a heightened level of interest rate risk, since the U.S. Federal Reserve Board recently ended its quantitative easing program and has begun to raise rates. In addition, bonds with longer durations tend to be more sensitive to interest rate changes, usually making them more volatile than bonds with shorter durations.

Call Risk. The Fund may invest in callable bonds. If interest rates fall, it is possible that issuers of callable securities will “call” (or prepay) their bonds before their maturity date. If a call were exercised by the issuer during or following a

period of declining interest rates, the Fund is likely to have to replace such called security with a lower yielding security. If that were to happen, it would decrease the Fund's net investment income.

High Yield Securities Risk. Securities rated below investment grade are commonly referred to as high yield securities or "junk bonds." Junk bonds are often issued by issuers that are restructuring, are smaller or less creditworthy than other issuers, or are more highly indebted than other issuers. Junk bonds are subject to greater risk of loss of income and principal than higher rated securities and are considered speculative. The prices of junk bonds are likely to be more sensitive to adverse economic changes or individual issuer developments than higher rated securities. During an economic downturn or substantial period of rising interest rates, junk bond issuers may experience financial stress that would adversely affect their ability to service their principal and interest payment obligations, to meet their projected business goals or to obtain additional financing. In the event of a default, the Fund may incur additional expenses to seek recovery. The secondary market for securities that are junk bonds may be less liquid than the markets for higher quality securities and, as such, may have an adverse effect on the market prices of and the Fund's ability to arrive at a fair value for certain securities. The illiquidity of the market also could make it difficult for the Fund to sell certain securities in connection with a rebalancing of its Index. In addition, periods of economic uncertainty and change may result in an increased volatility of market prices of high yield securities and a corresponding volatility in the Fund's NAV. In addition, adverse publicity and investor perceptions may decrease the values and liquidity of high yield securities.

California Risk. The Fund may invest a significant portion of its assets in municipal obligations of issuers located in the State of California. Consequently, the Fund may be affected by political, economic, regulatory and other developments within California and by the financial condition of California's political subdivisions, agencies, instrumentalities and public authorities. The following is a summary of certain factors affecting the State's current financial situation that could, in turn,

adversely affect the Fund's investments in California municipal obligations.

Provisions of the California Constitution and State statutes limit the taxing and spending authority of California governmental entities. Payments of certain municipal obligations may also be structurally subordinated to other obligations as a matter of California law. These provisions may impair the ability of California issuers to pay principal and/or interest on their obligations and the ability of the State and municipalities to address financial downturns, including limitations on the ability of the State or municipalities to raise taxes, fees or charges without voter approval. In addition, California has recently experienced financial and economic difficulties, which heighten the risks associated with investing in bonds issued by the State of California and its political subdivisions, agencies, instrumentalities and public authorities. Many local government agencies continue to face budget constraints due to mandated expenditures for health, welfare and public safety, as well as the adverse impact local economic conditions have had on property taxes and sales taxes, two major sources of revenue for local government. In particular, there is an increased risk that payments to bondholders could be interrupted or that an issuer could default on its obligations. A default or credit rating downgrade of a small number of California municipal security issuers could negatively impact the market values and marketability of all California municipal securities held by the Fund. However, if the State's economy weakens the State's budget deficit could continue to grow. Due to California's ongoing economic conditions, several major ratings agencies have downgraded the State's general obligation bond rating in recent years. Further downgrades could result in a reduction in the market value of California municipal obligations held by the Fund. These developments could adversely affect the Fund's income, NAV, liquidity and/or ability to preserve or realize appreciation of capital.

New York Risk. The Fund may invest a significant portion of its assets in New York municipal bonds and, therefore, will have greater exposure to negative political, economic, regulatory or other factors within the State of New York, including the financial condition of its public authorities and political subdivisions, than a fund that invests in a broader base of securities. Unfavorable developments in any economic sector may have a substantial impact on the overall New York municipal market. Certain issuers of New York municipal bonds have experienced serious financial difficulties in the past and reoccurrence of these difficulties may impair the ability of certain New York issuers to pay principal or interest on their obligations. The financial health of New York City affects that of the state, and when New York City experiences financial difficulty, it may have an adverse effect on New York municipal bonds held by the Fund. The growth rate of New York has at times been somewhat slower than the nation overall. The economic and financial condition of New York also may be affected by various financial, social, economic and political factors, including the outcome of pending litigation including the state or its localities.

General Obligation Bond Risk. General obligation bonds are not backed by revenues from a specific project or source. Instead, general obligation bonds are backed by the "full faith and credit" of the issuer, which has the power to tax residents to pay bondholders. To the extent that general obligation bonds continue to represent a significant portion of the Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the general obligation bond sector. Timely payments depend on the issuer's credit quality, ability to raise tax revenues and ability to maintain an adequate tax base.

Health Care Bond Risk. The health care industry is subject to regulatory action by a number of private and governmental agencies, including federal, state and local governmental agencies. To the extent that the health care sector continues to represent a significant portion of the Index, the Fund will be sensitive to changes in, and its

performance may depend to a greater extent on, the overall condition of the health care sector. A major source of revenues for the health care industry is payments from Medicare and Medicaid programs. As a result, the industry is sensitive to legislative changes and reductions in governmental spending for such programs. Numerous other factors may also affect the industry and the value and credit quality of health care bonds, such as general and local economic conditions, demand for services, expenses (including malpractice insurance premiums) and competition among health care providers. The following elements may adversely affect health care facility operations: the implementation of national and/or state-specific health insurance exchanges; other national, state or local health care reform measures; medical and technological advances which dramatically alter the need for health services or the way in which such services are delivered; changes in medical coverage which alter the traditional fee-for-service revenue stream; efforts by employers, insurers, and governmental agencies to reduce the costs of health insurance and health care services; and increases and decreases in the cost and availability of medical products.

Industrial Development Bond Risk. These revenue bonds are issued by or on behalf of public authorities to obtain funds to finance various public and/or privately operated facilities, including those for business and manufacturing, housing, sports, pollution control, airport, mass transit, port and parking facilities. To the extent that the industrial development sector continues to represent a significant portion of the Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the industrial development sector. These bonds are normally secured only by the revenues from the project and not by state or local government tax payments. Consequently, the credit quality of these securities is dependent upon the ability of the user of the facilities financed by the bonds and any guarantor to meet its

financial obligations. Payment of interest on and repayment of principal on such bonds are the responsibility of the user and/or any guarantor. These bonds are subject to a wide variety of risks, many of which relate to the nature of the specific project. Generally, the value and credit quality of these bonds are sensitive to the risks related to an economic slowdown.

Transportation Bond Risk. Transportation debt may be issued to finance the construction of airports, toll roads, highways or other transit facilities. To the extent that the transportation sector continues to represent a significant portion of the Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the transportation sector. Airport bonds are dependent on the general stability of the airline industry and on the stability of a specific carrier who uses the airport as a hub. Air traffic generally follows broader economic trends and is also affected by the price and availability of fuel. Toll road bonds are also affected by the cost and availability of fuel as well as toll levels, the presence of competing roads and the general economic health of an area. Fuel costs and availability also affect other transportation related securities, as do the presence of alternate forms of transportation, such as public transportation. Municipal securities that are issued to finance a particular transportation project often depend solely on revenues from that project to make principal and interest payments. Adverse conditions and developments affecting a particular project may result in lower revenues to the issuer of the municipal securities.

Special Tax Bond Risk. Special tax bonds are usually backed and payable through a single tax, or series of special taxes such as incremental property taxes. To the extent that the special tax sector continues to represent a significant portion of the Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the special tax sector. The failure of the tax levy to generate adequate revenue to pay the debt service on the bonds may cause the value of the bonds to decline. Adverse conditions and developments affecting a particular project may result in lower revenues to the issuer of the municipal securities, which may adversely affect the value of the Fund's portfolio.

Sampling Risk. The Fund's use of a representative sampling approach will result in its holding a smaller number of securities than are in the Index. As a result, an adverse development respecting an issuer of securities held by the Fund could result in a greater decline in NAV than would be the case if the Fund held all of the securities in the Index. Conversely, a positive development relating to an issuer of securities in the Index that is not held by the Fund could cause the Fund to underperform the Index. To the extent the assets in the Fund are smaller, these risks will be greater.

Tax Risk. There is no guarantee that the Fund's income will be exempt from U.S. federal or state income taxes. Events occurring after the date of issuance of a municipal bond or after the Fund's acquisition of a municipal bond may result in a determination that interest on that bond is includible in gross income for U.S. federal income tax purposes retroactively to its date of issuance. Such a determination may cause a portion of prior distributions by the Fund to its shareholders to be taxable to those shareholders in the year of receipt. Federal or state changes in income or alternative minimum tax rates or in the tax treatment of municipal bonds may make municipal bonds less attractive as investments and cause them to lose value.

Market Risk. The prices of securities in the Fund are subject to risks associated with investing in municipal securities, including general economic conditions and sudden and unpredictable drops in value. Overall securities values could decline generally or could underperform other investments. An investment in the Fund may lose money.

Index Tracking Risk. The Fund's return may not match the return of the Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to its Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index and to the extent creations and redemptions are effected in cash) raising cash to meet redemptions or deploying cash in connection with newly created Creation Units. The Fund also bears the costs and risks associated with buying and selling securities while such costs are not factored into the return of the Index and transaction costs, including brokerage costs, will decrease the Fund's NAV to the extent not offset by the transaction fee payable by an AP. In addition, the Fund's use of a representative sampling approach may cause the Fund's returns to not be as well correlated with the return of its Index as would be the case if the Fund purchased all of the securities in its Index in the proportions represented in such Index and can be expected to result in greater tracking error than if the Fund used a replication indexing strategy. The Fund may not be fully invested at times as a result of (to the extent creations and redemptions are effected in cash) cash flows into the Fund or reserves of cash held by the Fund to pay expenses and (to the extent creations and redemptions are effected in cash) meet redemptions. In addition, the Fund may not be able to invest in certain securities included in the Index, or invest in them in the exact proportions in which they are represented in its Index, due to legal restrictions or limitations, a lack of liquidity on stock exchanges in which such securities trade potential adverse tax consequences or other regulatory reasons. Moreover, the Fund may be delayed in purchasing or selling securities included in the Index.

The Fund is expected to fair value certain of the securities it holds. To the extent the Fund calculates its NAV based on fair

value prices or on the prices that differ from those used in calculating the Index, the Fund's ability to track the Index may be adversely affected. The need to comply with the tax diversification and other requirements of the Internal Revenue Code of 1986, as amended ("Internal Revenue Code"), may also impact the Fund's ability to replicate the performance of the Index. In addition, if the Fund utilizes derivative instruments, its return may not correlate as well with the return of the Index as would be the case if the Fund purchased all the securities in the Index directly. For tax efficiency purposes, the Fund may sell certain securities to realize losses causing it to deviate from the performance of the Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Index.

Authorized Participant Concentration Risk. The Fund may have a limited number of financial institutions that act as APs, none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, Shares may trade like closed-end funds at a discount to NAV and possibly face trading halts and/or de-listing. The AP concentration risk may be heightened because APs may be required to post collateral, which only certain APs may be able to do. To the extent that APs exit the business or are unable to process creations or redemptions or similar activities, this may result in a significantly diminished trading market for Shares.

Absence of Prior Active Market. The Fund is a newly organized series of an investment company and thus has no operating history. While the Fund's Shares are expected to be listed on BATS, there can be no assurance that active trading markets for the Shares will develop or be maintained especially for recently organized funds. Further, secondary markets may be subject to irregular trading activity, market dislocations, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from their respective roles in making a market in the Shares and in executing creation and redemption orders, which could cause a material decline in the Fund's NAV. Van Eck Securities Corporation, the distributor of the Shares (the "Distributor"), does not maintain a secondary market in the Shares. Investors purchasing and selling shares in the secondary market may not experience investment results consistent with those experienced by those APs creating and redeeming directly with the Fund.

Trading Issues. Trading in Shares on BATS may be halted due to market conditions or for reasons that, in the view of BATS, make trading in Shares inadvisable. In addition, trading in Shares on BATS is subject to trading halts caused by extraordinary market volatility pursuant to BATS's "circuit breaker" rules. There can be no assurance that the requirements of BATS necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Replication Management Risk. Unlike many investment companies, the Fund is not "actively" managed. Therefore, unless a specific security is removed from its Index, the Fund generally would not sell a security because the security's issuer is in financial trouble. If a specific security is removed from the Index, the Fund may be forced to sell such security at an inopportune time or for prices other than at current market values. An investment in the Fund involves risks similar to those of investing in any bond fund, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and the possibility that the issuer of a security will be unable and/or unwilling to make timely interest payments and/or repay the principal on its debt. The Index may not contain the appropriate or a diversified mix of securities for any particular economic cycle. The timing of changes in the securities of the Fund's portfolio in seeking to replicate its Index could have a negative effect on the Fund. Unlike with an actively managed fund, the Adviser does not use techniques or defensive strategies designed to lessen the effects of

market volatility or to reduce the impact of periods of market decline. This means that, based on market and economic conditions, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Fund Shares Trading, Premium/Discount Risk, and Liquidity Risk of Fund Shares. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or the intraday value of the Fund's holdings. The NAV of the Shares will fluctuate with changes in the market value of the Fund's securities holdings. The market prices of Shares will fluctuate, in some cases materially, in accordance with changes in NAV and the intraday value of the Fund's holdings, as well as supply and demand on BATS. The Adviser cannot predict whether Shares will trade below, at or above their NAV. Given the fact that Shares can be created and redeemed by APs in Creation Units, the Adviser believes that large discounts or premiums to the NAV of Shares should not be sustained in the long-term. While the creation/redemption feature is designed to make it likely that Shares normally will trade close to the value of the Fund's holdings, market prices are not expected to correlate exactly to the Fund's NAV due to timing reasons, supply and demand and imbalances and other factors. The price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the securities

of the Fund's Index trading individually or in the aggregate at any point in time. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. Any of these factors, discussed above and further below, may lead to the Shares trading at a premium or discount to the Fund's NAV. In addition, because certain of the Fund's underlying securities trade on exchanges that are closed when BATS (i.e., the exchange that Shares of the Fund trade on) is open, there are likely to be deviations between the current pricing of an underlying security and the closing security's price (i.e., the last quote from its closed foreign market) resulting in premiums or discounts to NAV that may be greater than those experienced by other ETFs. In addition, the securities held by the Fund may be traded in markets that close at a different time than BATS. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when BATS is open but after the applicable market closing, fixing or settlement times, bid-ask spreads on BATS and the resulting premium or discount to the Shares' NAV may widen. Additionally, in stressed market conditions, the market for the Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

When you buy or sell Shares of the Fund through a broker, you will likely incur a brokerage commission or other charges imposed by brokers. In addition, the market price of Shares, like the price of any exchange-traded security, includes a bid/ask spread charged by the market makers or other participants that trade the particular security. The spread of the Fund's Shares varies over time based on the Fund's trading volume and market liquidity and may increase if the Fund's trading volume, the spread of the Fund's underlying securities, or market liquidity decrease. In times of severe market disruption, including when trading of the Fund's holdings may be halted, the bid/ask spread may increase significantly. This means that Shares may trade at a discount to the Fund's NAV, and the discount is likely to be greatest during significant market volatility.

Non-Diversified Risk. The Fund is a separate investment portfolio of VanEck Vectors ETF Trust (the "Trust"), which is an open-end investment company registered under the 1940 Act. The Fund is classified as a "non-diversified" investment company under the 1940 Act. As a result, the Fund is subject to the risk that it will be more volatile than a diversified fund because the Fund may invest its assets in a smaller number of issuers or may invest a larger proportion of its assets in obligations of a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent that its respective Index concentrates in a particular sector or sectors or industry or group of industries. The securities of many or all of the companies in the same sector or industry may decline in value due to developments adversely affecting such sector or industry. By concentrating its assets in a particular sector or sectors or industry or group of industries, the Fund is subject to the risk that economic, political or other conditions that have a negative effect on that sector or industry will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

Additional Investment Strategies

The Fund may invest in securities not included in the Index, money market instruments, including repurchase agreements or other funds which invest exclusively in money market instruments and structured notes (notes on which the amount of principal repayment and interest payments are based on the movement of one or more specified factors, such as the movement of a particular stock or stock index) and certain derivatives, which the Adviser believes will help the Fund track the Index. The Fund may also invest, to the extent permitted by the 1940 Act, in other affiliated and unaffiliated funds, such as open-end or closed-end management investment companies, including other exchange-traded funds. The Fund does not employ a temporary defensive strategy, and the Fund will not invest as part of a temporary defensive strategy to protect against potential securities market declines.

Borrowing Money

The Fund may borrow money from a bank up to a limit of one-third of the market value of its assets. The Fund is expected to enter into a credit facility to borrow money for temporary, emergency or other purposes, including the funding of shareholder redemption requests, trade settlements and as necessary to distribute to shareholders any income required to maintain the Fund's status as a regulated investment company. To the extent that the Fund borrows money, it will be leveraged; at such times, the Fund will appreciate or depreciate in value more rapidly than its Index. Leverage generally has the effect of increasing the amount of loss or gain the Fund might realize, and may increase volatility in the value of the Fund's investments.

Lending Portfolio Securities

The Fund may lend its portfolio securities to brokers, dealers and other financial institutions desiring to borrow securities to complete transactions and for other purposes. In connection with such loans, the Fund receives liquid collateral equal to at least 102% of the value of the portfolio securities being loaned. This collateral is marked-to-market on a daily basis. Although the Fund will receive collateral in connection with all loans of its securities holdings, the Fund would be exposed to a risk of loss should a borrower fail to return the borrowed securities (*e.g.*, the Fund would have to buy replacement securities and the loaned securities may have appreciated beyond the value of the collateral held by the Fund) or become insolvent. The Fund may pay fees to the party arranging the loan of securities. In addition, the Fund will bear the risk of loss of any cash collateral that it invests.

Additional Risks

Risk of Investing in Derivatives. Derivatives are financial instruments whose values are based on the value of one or more reference assets or indicators, such as a security, currency, interest rate, or index. The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in securities and other more traditional investments. Moreover, although the value of a derivative is based on an underlying asset or indicator, a derivative typically does not carry the same rights as would be the case if the Fund invested directly in the underlying securities, currencies or other assets.

Derivatives are subject to a number of risks, such as potential changes in value in response to market developments or, in the case of "over-the-counter" derivatives, as a result of a counterparty's credit quality and the risk that a derivative transaction may not have the effect the Adviser anticipated. Derivatives also involve the risk of mispricing or improper valuation and the risk that changes in the value of a derivative may not achieve the desired correlation with the underlying asset or indicator. Derivative transactions can create investment leverage, may be highly volatile, and the Fund could lose more than the amount it invests. The use of derivatives may increase the amount and affect the timing and character of taxes payable by shareholders of the Fund.

Many derivative transactions are entered into "over-the-counter" (not on an exchange or contract market); as a result, the value of such a derivative transaction will depend on, among other factors, the ability and the willingness of the Fund's counterparty to perform its obligations under the transaction. If a counterparty were to default on its obligations, the Fund's contractual remedies against such counterparty may be subject to bankruptcy and insolvency laws, which could affect the Fund's rights as a creditor (*e.g.*, the Fund may not receive the net amount of payments that it is contractually entitled to receive). A liquid secondary market may not always exist for the Fund's derivative positions at any time.

Leverage Risk. To the extent that the Fund borrows money or utilizes certain derivatives, it may be leveraged. Leveraging generally exaggerates the effect on NAV of any increase or decrease in the market value of the Fund's portfolio securities.

TAX ADVANTAGED PRODUCT STRUCTURE

Unlike many conventional mutual funds which are only bought and sold at closing NAVs, the Shares of the Fund have been designed to be tradable in a secondary market on an intra-day basis and to be created and redeemed principally in-kind in Creation Units at each day's market close. These in-kind arrangements are designed to mitigate the adverse effects on the Fund's portfolio that could arise from frequent cash purchase and redemption transactions that affect the NAV of the Fund. Moreover, in contrast to conventional mutual funds, where frequent redemptions can have an adverse tax impact on taxable shareholders because of the need to sell portfolio securities which, in turn, may generate taxable gain, the in-kind redemption mechanism of the Fund, to the extent used, generally is not expected to lead to a tax event for shareholders whose shares are not being redeemed.

PORTFOLIO HOLDINGS

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's SAI.

Management of the Fund

Board of Trustees. The Board of Trustees of the Trust has responsibility for the general oversight of the management of the Fund, including general supervision of the Adviser and other service providers, but is not involved in the day-to-day management of the Trust. A list of the Trustees and the Trust officers, and their present positions and principal occupations, is provided in the Fund's SAI.

Investment Adviser. Under the terms of an investment management agreement between the Trust and Van Eck Associates Corporation with respect to the Fund (the "Investment Management Agreement"), Van Eck Associates Corporation serves as the adviser to the Fund and, subject to the supervision of the Board of Trustees, is responsible for the day-to-day investment management of the Fund. As of [], the Adviser managed approximately \$[] billion in assets. The Adviser has been an investment adviser since 1955 and also acts as adviser or sub-adviser to other mutual funds, ETFs, other pooled investment vehicles and separate accounts. The Adviser's principal business address is 666 Third Avenue, 9th Floor, New York, New York 10017.

A discussion regarding the Board of Trustees' approval of the Investment Management Agreement will be available in the Trust's [semi-]annual report for the [period/year] ended [].

Pursuant to the Investment Management Agreement, the Adviser is responsible for all expenses of the Fund, including the costs of transfer agency, custody, fund administration, legal, audit and other services, except for the fee payment under the Investment Management Agreement, interest expense, offering costs, trading expenses, taxes and extraordinary expenses. For its services to the Fund, the Fund has agreed to pay the Adviser an annual unitary management fee equal to []% of its average daily net assets. Offering costs excluded from the annual unitary management fee are: (a) legal fees pertaining to the Fund's Shares offered for sale; (b) SEC and state registration fees; and (c) initial fees paid for Shares of the Fund to be listed on an exchange.

The Fund is responsible for all of its expenses, including the investment advisory fees, costs of transfer agency, custody, legal, audit and other services, interest, taxes, any distribution fees or expenses, offering fees or expenses and extraordinary expenses.

Manager of Managers Structure. The Adviser and the Trust may rely on an exemptive order (the "Order") from the SEC that permits the Adviser to enter into investment sub-advisory agreements with unaffiliated sub-advisers without obtaining shareholder approval. The Adviser, subject to the review and approval of the Board of Trustees, may select one or more sub-advisers for the Fund and supervise, monitor and evaluate the performance of each sub-adviser.

The Order also permits the Adviser, subject to the approval of the Board of Trustees, to replace sub-advisers and amend investment sub-advisory agreements, including applicable fee arrangements, without shareholder approval

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

whenever the Adviser and the Board of Trustees believe such action will benefit the Fund and its shareholders. The Adviser thus would have the responsibility (subject to the oversight of the Board of Trustees) to recommend the hiring and replacement of sub-advisers as well as the discretion to terminate any sub-adviser and reallocate the Fund's assets for management among any other sub-adviser(s) and itself. This means that the Adviser would be able to reduce the sub-advisory fees and retain a larger portion of the management fee, or increase the sub-advisory fees and retain a smaller portion of the management fee. The Adviser would compensate each sub-adviser out of its management fee.

Administrator, Custodian and Transfer Agent. Van Eck Associates Corporation is the administrator for the Fund (the "Administrator"), and The Bank of New York Mellon is the custodian of the Fund's assets and provides transfer agency and fund accounting services to the Fund. The Administrator is responsible for certain clerical, recordkeeping and/or bookkeeping services which are provided pursuant to the Investment Management Agreement.

Distributor. Van Eck Securities Corporation is the distributor of the Shares. The Distributor will not distribute Shares in less than Creation Units, and does not maintain a secondary market in the Shares. The Shares are traded in the secondary market.

Portfolio ManagerS

The portfolio managers currently responsible for the day-to-day management of the Fund's portfolio are James T. Colby III and Eric Isenberg. Mr. Colby has been employed by the Adviser since September 2007. Prior to joining the Adviser, Mr. Colby served as Senior Portfolio Manager and Director of Municipal High Yield for Lord Abbett as well as Director and Senior

Portfolio Manager for Municipal Fixed Income at the John Hancock Funds in Boston. Mr. Colby graduated from Brown University in 1972 with a Bachelor of Arts in Economics and International Relations; and from Hofstra University in 1979 with a Masters of Business Administration in Finance. Mr. Isenberg has been employed by the Adviser since 2015. Prior to joining the Adviser, Mr. Isenberg served as Americas Head of Index Products at Credit Suisse, where he was responsible for the development and publication of benchmark and systematic investment strategies across asset classes. He previously held Credit Suisse positions of Head of Fixed Income Index Products and Head of Bond Indices. Mr. Isenberg received a BS in Computer Science and Economics from Binghamton University. Messrs. Colby and Isenberg serve as portfolio managers of other funds of the Trust. See the Fund's SAI for additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and their ownership of Shares.

Shareholder Information

Determination of NAV

The NAV per Share for the Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by the total number of Shares outstanding. Expenses and fees, including the management fee, are accrued daily and taken into account for purposes of determining NAV. The NAV of the Fund is determined each business day as of the close of trading (ordinarily 4:00 p.m. Eastern time) on BATS. Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

The values of the Fund's portfolio securities are based on the securities' closing prices on markets on which the securities trade, when available. In the absence of a last reported sales price, or if no sales were reported, and for other assets for which market quotes are not readily available, values may be based on quotes obtained from a quotation reporting system, established market makers or by an outside independent pricing service. Fixed income securities are normally valued on the basis of quotes from brokers or dealers, established market makers or an outside independent pricing service using data reflecting the earlier closing of the principal markets for those securities. Prices obtained by an outside independent pricing service may use information provided by market makers or estimates of market values obtained from yield data related to investments or securities with similar characteristics and may use a computerized grid matrix of securities and its evaluations in determining what it believes is the fair value of the portfolio securities. Short-term investments having a maturity of 60 days or less are valued at amortized cost. If a market quotation for a security is not readily available or the Adviser believes it does not otherwise accurately reflect the market value of the security at the time the Fund calculates its NAV, the security will be fair valued by the Adviser in accordance with the Trust's valuation policies and procedures approved by the Board of Trustees. The Fund may also use fair value pricing in a variety of circumstances, including but not limited to, situations when the value of a security in the Fund's portfolio has been materially affected by events occurring after the close of the market on which the security is principally traded (such as a corporate action or other news that may materially affect the price of a security) or trading in a security has been suspended or halted. Accordingly, the Fund's NAV may reflect certain portfolio securities' fair values rather than their market prices at the time the exchanges on which they principally trade close. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security. In addition, fair value pricing could result in a difference between the prices used to calculate the Fund's NAV and the prices used by the Index. This

may adversely affect the Fund's ability to track the Index.

Intraday Value

The trading prices of the Fund's Shares in the secondary market generally differ from the Fund's daily NAV and are affected by market forces such as the supply of and demand for Fund Shares and underlying securities held by the Fund, economic conditions and other factors. Information regarding the intraday value of the Fund's Shares ("IIV") is disseminated every 15 seconds throughout each trading day by the Exchange or by market data vendors or other information providers. The IIV is based on the current market value of the securities and/or cash required to be deposited in exchange for a Creation Unit. The IIV does not necessarily reflect the precise composition of the current portfolio of securities held by the Fund at a particular point in time or the best possible valuation of the current portfolio. Therefore, the IIV should not be viewed as a "real-time" update of the Fund's NAV, which is computed only once a day. The IIV is generally determined by using current market quotations and/or price quotations obtained from broker-dealers and other market intermediaries that may trade in the portfolio securities held by the Fund and valuations based on current market rates. The quotations and/or valuations of certain Fund holdings may not be updated during U.S. trading hours if such holdings do not trade in the United States. The Fund is not involved in, or responsible for, the calculation or dissemination of the IIV and makes no warranty as to its accuracy.

Rule 144A and Other Unregistered Securities

An AP (*i.e.*, a person eligible to place orders with the Distributor to create or redeem Creation Units of the Fund) that is not a “qualified institutional buyer,” as such term is defined under Rule 144A of the Securities Act of 1933, as amended (“Securities Act”), will not be able to receive, as part of a redemption, restricted securities eligible for resale under Rule 144A or other unregistered securities.

Buying and Selling Exchange-Traded Shares

The Shares of the Fund are expected to be approved for listing on BATS, subject to notice of issuance. If you buy or sell Shares in the secondary market, you will incur customary brokerage commissions and charges and may pay some or all of the “spread,” which is any difference between the bid price and the ask price. The spread varies over time for the Fund’s Shares based on the Fund’s trading volume and market liquidity, and is generally lower if the Fund has high trading volume and market liquidity, and generally higher if the Fund has little trading volume and market liquidity (which is often the case for funds that are newly launched or small in size). In times of severe market disruption or low trading volume in the Fund’s Shares, this spread can increase significantly. It is anticipated that the Shares will trade in the secondary market at prices that may differ to varying degrees from the NAV of the Shares. During periods of disruptions to creations and redemptions or the existence of extreme market volatility, the market prices of Shares are more likely to differ significantly from the Shares’ NAV.

The Depository Trust Company (“DTC”) serves as securities depository for the Shares. (The Shares may be held only in book-entry form; stock certificates will not be issued.) DTC, or its nominee, is the record or registered owner of all outstanding Shares. Beneficial ownership of Shares will be shown on the records of DTC or its participants (described below). Beneficial owners of Shares are not entitled to have Shares registered in their names, will not receive or be entitled to receive physical delivery of certificates in definitive form and are not considered the registered holder thereof. Accordingly, to exercise any rights of a holder of Shares, each beneficial owner must rely on the procedures of: (i) DTC; (ii) “DTC Participants,” *i.e.*, securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC; and (iii) “Indirect Participants,” *i.e.*, brokers, dealers, banks and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly, through which such beneficial owner holds its interests. The Trust understands that under existing industry practice, in the event the Trust requests any action of holders of Shares, or a beneficial owner desires to take any action that DTC, as the record owner of all outstanding Shares, is entitled to take, DTC would authorize the DTC Participants to take such action and that the DTC Participants would authorize the Indirect Participants and beneficial owners acting through such DTC Participants to take such action and would otherwise act upon the instructions of beneficial owners owning through them. As described above, the Trust recognizes DTC or its nominee as the owner of all Shares for all purposes. For more information, see the section entitled “Book Entry Only System” in the Fund’s SAI.

BATS is open for trading Monday through Friday and is closed on weekends and the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Because non-U.S. exchanges may be open on days when the Fund does not

price its Shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's Shares.

Market Timing and Related Matters. The Fund imposes no restrictions on the frequency of purchases and redemptions. Frequent purchases and redemptions of Fund Shares may attempt to take advantage of a potential arbitrage opportunity presented by a lag between a change in the value of the Fund's portfolio securities after the close of the primary markets for the Fund's portfolio securities and the reflection of that change in the Fund's NAV ("market timing"). The Board of Trustees considered the nature of the Fund (i.e., a fund whose shares are expected to trade intra-day), that the Adviser monitors the trading activity of APs for patterns of abusive trading, that the Fund reserves the right to reject orders that may be disruptive to the management of or otherwise not in the Fund's best interests, and that the Fund may fair value certain of its securities. Given this structure, the Board of Trustees determined that it is not necessary to impose restrictions on the frequency of purchases and redemptions for the Fund at the present time.

Distributions

Net Investment Income and Capital Gains. As a shareholder of the Fund, you are entitled to your share of the Fund's distributions of net investment income and net realized capital gains on its investments. The Fund pays out substantially all of its net earnings to its shareholders as "distributions."

The Fund typically earns income from interest on municipal securities. These amounts, net of expenses, are typically passed along to Fund shareholders as dividends from net investment income. The Fund generally realizes capital gains or losses whenever it sells securities. Net capital gains are distributed to shareholders as “capital gain distributions.” Dividends paid by the Fund that are properly designated as exempt-interest dividends will not be subject to regular federal income tax. Distributions from the Fund’s net investment income (other than net tax exempt income), including any net short term capital gains, if any, are taxable to you as ordinary income. Any long-term capital gains distributions you receive from the Fund are taxable as long-term capital gains.

Net investment income, if any, is typically distributed to shareholders at least monthly while net realized capital gains, if any, are typically distributed to shareholders at least annually. Dividends may be declared and paid more frequently to improve index tracking or to comply with the distribution requirements of the Internal Revenue Code. In addition, in situations where the Fund acquires investment securities after the beginning of a dividend period, the Fund may elect to distribute at least annually amounts representing the full dividend yield net of expenses on the underlying investment securities, as if the Fund owned the underlying investment securities for the entire dividend period. If the Fund so elects, some portion of each distribution may result in a return of capital, which, for tax purposes, is treated as a return on your investment in Shares. Record shareholders will be notified regarding the portion of the distribution which represents a return of capital.

Distributions in cash may be reinvested automatically in additional Shares of the Fund only if the broker through which you purchased Shares makes such option available.

Tax Information

As with any investment, you should consider how your Fund investment will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in the Fund, including the possible application of foreign, state and local taxes. Unless your investment in the Fund is through a tax-exempt entity or tax-deferred retirement account, such as a 401(k) plan, you need to be aware of the possible tax consequences when: (i) the Fund makes distributions, (ii) you sell Shares in the secondary market or (iii) you create or redeem Creation Units.

Taxes on Distributions. As noted above, the Fund expects to distribute net investment income, if any, at least monthly, and any net realized long-term or short-term capital gains, if any, annually. The Fund may also pay a special distribution at any time to comply with U.S. federal tax requirements.

Dividends paid by the Fund that are properly designated as exempt-interest dividends will not be subject to regular U.S. federal income tax. The Fund intends to invest its assets in a manner such that a significant portion of its dividend distributions to shareholders will generally be exempt from U.S. federal income taxes, including the federal alternative minimum tax for noncorporate shareholders. Corporate shareholders should note that income that is generally exempt from the federal alternative minimum tax may in certain situations nonetheless be relevant in

determining their federal alternative minimum tax liability, if any. Depending on a shareholder's state of residence, exempt-interest dividends from interest earned on municipal securities of a state or its political subdivisions may be exempt in the hands of such shareholder from income tax in that state. However, income from municipal securities of states other than the shareholder's state of residence generally will not qualify for tax-free treatment for such shareholder.

In general, your non-tax-exempt distributions are subject to U.S. federal income tax when they are paid, whether you take them in cash or reinvest them in the Fund. Distributions from the Fund's net investment income (other than net tax-exempt income), including any net short-term capital gains, if any, are taxable to you as ordinary income. Whether distributions of capital gains represent long-term or short-term capital gains is determined by how long the Fund owned the investments that generated them, rather than how long you have owned your Shares. Distributions of net short-term capital gains in excess of net long-term capital losses, if any, are generally taxable as ordinary income. Distributions of net long-term capital gains in excess of net short-term capital losses, if any, that are properly reported as capital gain dividends are generally taxable as long-term capital gains. Long-term capital gains of a non-corporate shareholder are generally taxable at a maximum rate of 15% or 20%, depending on whether the shareholder's income exceeds certain threshold amounts. The Fund does not expect that any of its distributions will be qualified dividends eligible for lower tax rates or for the corporate dividends received deduction.

Exempt-interest dividends from the Fund are taken into account in determining the taxable portion of any Social Security or railroad retirement benefits that you receive.

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

Any interest on indebtedness incurred or continued to purchase or carry the Fund's Shares to which exempt-interest dividends are allocated is not deductible. Under certain applicable rules, the purchase or ownership of Shares may be considered to have been made with borrowed funds even though such funds are not directly used for the purchase or ownership of the Shares.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of your investment to the extent of your basis in the Shares, and generally as capital gain thereafter. A return of capital, which for tax purposes is treated as a return of your investment, reduces your basis in Shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition of Shares. A distribution will reduce the Fund's NAV per Share and may be taxable to you as ordinary income or capital gain even though, from an economic standpoint, the distribution may constitute a return of capital.

Backup Withholding. The Fund may be required to withhold a percentage of your distributions and proceeds if you have not provided a taxpayer identification number or social security number or otherwise established a basis for exemption from backup withholding. The backup withholding rate for individuals is currently 28%. This is not an additional tax and may be refunded, or credited against your U.S. federal income tax liability, provided certain required information is furnished to the Internal Revenue Service.

Taxes on the Sale or Cash Redemption of Exchange Listed Shares. Currently, any capital gain or loss realized upon a sale of Shares is generally treated as long term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid with respect to such Shares. The ability to deduct capital losses may be limited. To the extent that a shareholder's Shares are redeemed for cash, this is normally treated as a sale for tax purposes.

Taxes on Creations and Redemptions of Creation Units. A person who exchanges securities for Creation Units generally will recognize a gain or loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of exchange and the sum of the exchanger's aggregate basis in the securities surrendered and the amount of any cash paid for such Creation Units. A person who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of primarily securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons exchanging securities for Creation Units or redeeming Creation Units should consult their own tax adviser with respect to whether wash sale rules apply and when a loss might be deductible and the tax treatment of any creation or redemption transaction.

Under current U.S. federal income tax laws, any capital gain or loss realized upon a redemption (or creation) of Creation Units is generally treated as long-term capital gain or loss if the Shares (or securities surrendered) have been held for more than one year and as a short-term capital gain or loss if the Shares (or securities surrendered) have been held for one year or less.

If you create or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you created or sold and at what price.

Medicare Tax. An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Fund Shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts.

Non-U.S. Shareholders. If you are not a citizen or resident alien of the United States or if you are a non-U.S. entity, the Fund's ordinary income dividends (which include distributions of net short-term capital gains) will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies or unless such income is effectively connected with a U.S. trade or business.

As part of the Foreign Account Tax Compliance Act, ("FATCA"), the Fund may be required to withhold 30% on certain types of U.S. sourced income (e.g., dividends, interest, and other types of passive income), and after January 1, 2019 proceeds from the sale or other disposition of property producing U.S. sourced income and certain capital gain dividends to (i) foreign financial institutions ("FFIs"), including non-U.S. investment funds, unless they agree to collect and disclose to the Internal Revenue Service ("IRS") information regarding their direct and indirect U.S. account holders and (ii) certain nonfinancial foreign entities ("NFFEs"), unless they certify certain information regarding their direct and indirect U.S. owners. To avoid possible withholding, FFIs will need to enter into agreements with the IRS which state that they will provide the IRS information, including the names, account numbers and balances, addresses and taxpayer identification numbers of U.S.

account holders and comply with due diligence procedures with respect to the identification of U.S. accounts as well as agree to withhold tax on certain types of withholdable payments made to non-compliant foreign financial institutions or to applicable foreign account holders who fail to provide the required information to the IRS, or similar account information and required documentation to a local revenue authority, should an applicable intergovernmental agreement be implemented. NFFEs will need to provide certain information regarding each substantial U.S. owner or certifications of no substantial U.S. ownership, unless certain exceptions apply, or agree to provide certain information to the IRS.

While some parts of the FATCA rules have not been finalized, the Fund may be subject to the FATCA withholding obligation, and also will be required to perform due diligence reviews to classify foreign entity investors for FATCA purposes. Investors are required to agree to provide information necessary to allow the Fund to comply with the FATCA rules. If the Fund is required to withhold amounts from payments pursuant to FATCA, investors will receive distributions that are reduced by such withholding amounts.

Non-U.S. shareholders are advised to consult their tax advisors with respect to the particular tax consequences to them of an investment in the Fund, including the possible applicability of the U.S. estate tax.

The foregoing discussion summarizes some of the consequences under current U.S. federal income tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your own tax advisor about the potential tax consequences of an investment in the Fund under all applicable tax laws.

Index Provider

The Index is published by Bloomberg Finance L.P. and its affiliates (the “Index Provider” or “Bloomberg”). The Index Provider does not sponsor, endorse, or promote the Fund and bears no liability with respect to the Fund or any security.

BLOOMBERG Barclays amt-free National municipal index

The Index is a market size weighted index comprised of publicly traded municipal bonds that cover the U.S. dollar-denominated investment grade and high yield tax-exempt bond markets. The majority of the Index's constituents are from the revenue sector. The revenue sector is divided into industry sectors that include but are not limited to the following: electric, health care, transportation, education, water & sewer, resource recovery, leasing and special tax. As of September 30, 2016, Index consisted of 50,141 bonds.

The Index is calculated using a market value weighting methodology. The Index tracks the municipal bond market with a 75% weight in investment grade municipal bonds and a 25% weight in non-investment grade municipal bonds. It is comprised of two total return, market size weighted benchmark indexes with weights as follows:

75% weight in Muni Investment-Grade Rated/\$75 Million Deal Size Index. To be included in the Muni Investment-Grade Rated/\$75 Million Deal Size Index, a bond must be rated Baa3/BBB- or higher by at least two of the following rating agencies if all three agencies rate the bond: Moody's Investors Service ("Moody's"), Standard & Poor's Ratings Services ("S&P") and Fitch Ratings, Inc. ("Fitch"). If only two of the three agencies rate the bond, the lower rating is used to determine index eligibility. If only one of the three agencies rates a security, the rating must be Baa3/BBB- or higher. Bonds in the Muni Investment-Grade Rated/\$75 Million Deal Size Index must have an outstanding par value of at least \$7 million and be issued as part of a transaction of at least \$75 million.

25% weight in Muni High Yield/\$20 Million Deal Size Index. To be included in the Muni High Yield/\$20 Million Deal Size Index, a bond must be unrated or rated Ba1/BB+ or lower by at least two of the following rating agencies if all three agencies rate the bond: Moody's, S&P and Fitch. If only two of the three agencies rate the bond, the lower rating is used to determine index eligibility. If only one of the three agencies rates a security, the rating must be Ba1/BB+ or lower. Bonds in the Muni High Yield/\$20 Million Deal Size Index must have an outstanding par value of at least \$3 million and be issued as part of a transaction of at least \$20 million.

All bonds must have a fixed rate, a dated date (*i.e.*, the date when interest begins to accrue) after December 31, 1990, and a nominal maturity of 1 to 30 years. Bonds subject to the alternative minimum tax, taxable municipal bonds, bonds with floating rates, derivatives and municipal bonds of issuers from the territories of the United States (*e.g.*, Puerto Rico) are excluded from the Index.

The composition of the Index is rebalanced monthly. Interest and principal payments earned by the component securities are held in the Index without a reinvestment return until month end when they are removed from the Index. Qualifying securities issued, but not necessarily settled, on or before the month end rebalancing date qualify for inclusion in the Index in the following month. The Index is calculated and is available daily by Bloomberg.

Financial Highlights

The Fund has not yet commenced operations as of the date of this Prospectus and therefore it does not have a financial history.

24

Premium/Discount Information

The Fund has not yet commenced operations and, therefore, does not have information about the differences between the Fund's daily market price on BATS and its NAV. Information regarding how often the Shares of the Fund traded on BATS at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV of the Fund during the past four calendar quarters, as applicable, can be found at www.vaneck.com.

General Information

Continuous Offering

The method by which Creation Units are created and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by the Trust on an ongoing basis, a “distribution,” as such term is used in the Securities Act, may occur at any point. Broker dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery and liability provisions of the Securities Act.

For example, a broker dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares, and sells such Shares directly to customers, or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker dealers who are not “underwriters” but are participating in a distribution (as contrasted to ordinary secondary trading transactions), and thus dealing with Shares that are part of an “unsold allotment” within the meaning of Section 4(3)(C) of the Securities Act, would be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker dealer firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(3)(A) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to Shares are reminded that, under Rule 153 of the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on BATS is satisfied by the fact that the prospectus is available at BATS upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

In addition, certain affiliates of the Fund and the Adviser may purchase and resell Fund shares pursuant to this Prospectus.

Other Information

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

The Trust was organized as a Delaware statutory trust on March 15, 2001. Its Declaration of Trust currently permits the Trust to issue an unlimited number of Shares of beneficial interest. If shareholders are required to vote on any matters, each Share outstanding would be entitled to one vote. Annual meetings of shareholders will not be held except as required by the 1940 Act and other applicable law. See the Fund's SAI for more information concerning the Trust's form of organization. Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including Shares of the Fund. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust, including that such investment companies enter into an agreement with the Fund.

The Prospectus, SAI and any other Fund communication do not create any contractual obligations between the Fund's shareholders and the Trust, the Fund, the Adviser and/or the Trustees. Further, shareholders are not intended third-party beneficiaries of any contracts entered into by (or on behalf of) the Fund, including contracts with the Adviser or other parties who provide services to the Fund.

Dechert LLP serves as counsel to the Trust, including the Fund. [] serves as the Trust's independent registered public accounting firm and will audit the Fund's financial statements annually.

Additional Information

This Prospectus does not contain all the information included in the Registration Statement filed with the SEC with respect to the Fund's Shares. Information about the Fund can be reviewed and copied at the SEC's Public Reference Room and information on the operation of the Public Reference Room may be obtained by calling the SEC at 1.202.551.8090. The Fund's

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

Registration Statement, including this Prospectus, the Fund's SAI and the exhibits may be examined at the offices of the SEC (100 F Street, NE, Washington, DC 20549) or on the EDGAR database at the SEC's website (<http://www.sec.gov>), and copies may be obtained, after paying a duplicating fee, by electronic request at the following email address: publicinfo@sec.gov, or by writing the SEC's Public Reference Section, Washington, DC 20549-1520. These documents and other information concerning the Trust also may be inspected at the offices of BATS (8050 Marshall Drive, Lenexa, KS 66214 USA).

The SAI for the Fund, which has been filed with the SEC, provides more information about the Fund. The SAI for the Fund is incorporated herein by reference and is legally part of this Prospectus. Additional information about the Fund's investments will be available in the Fund's annual and semi-annual reports to shareholders. In the Fund's annual report, when available, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. The SAI and the Fund's annual and semi-annual reports may be obtained without charge by writing to the Fund at Van Eck Securities Corporation, the Fund's distributor, at 666 Third Avenue, 9th Floor, New York, New York 10017 or by calling the distributor at the following number: Investor Information: 800-826-2333.

Shareholder inquiries may be directed to the Fund in writing to 666 Third Avenue, 9th Floor, New York, New York 10017 or by calling 800-826-2333.

The Fund's SAI will be available at www.vaneck.com.

GENERAL DESCRIPTION OF THE TRUST

The Trust is an open-end management investment company. The Trust currently consists of [] investment portfolios. This SAI relates to one investment portfolio, VanEck Vectors AMT-Free National Municipal Index ETF (the “Fund”). The Fund is classified as a non-diversified fund under the Investment Company Act of 1940, as amended (“1940 Act”), and, as a result, is not required to meet certain diversification requirements under the 1940 Act. The Trust was organized as a Delaware statutory trust on March 15, 2001. The shares of the Fund are referred to herein as “Shares.”

The Fund will offer and issue Shares at its net asset value (“NAV”) only in aggregations of a specified number of Shares (each, a “Creation Unit”). Similarly, Shares will be redeemable by the Fund only in Creation Units. The Shares of the Fund are expected to be approved for listing, subject to notice of issuance, on the BATS Global Markets, Inc. (“BATS” or the “Exchange”), and will trade in the secondary market at market prices that may differ from the Shares’ NAV. A Creation Unit consists of 50,000 Shares. The Trust reserves the right to permit or require a “cash” option for creations and redemptions of Shares (subject to applicable legal requirements) to the extent such Shares are not created and redeemed in cash.

INVESTMENT POLICIES AND RESTRICTIONS

Municipal Securities

The Fund may invest in securities issued by states, municipalities and other political subdivisions, agencies, authorities and instrumentalities of states and multi-state agencies or authorities. Municipal securities share the attributes of debt/fixed income securities in general, but are generally issued by states, municipalities and other political subdivisions, agencies, authorities and instrumentalities of states and multi-state agencies or authorities. The municipal securities which the Fund may purchase include general obligation bonds and limited obligation bonds (or revenue bonds), including industrial development bonds issued pursuant to former federal tax law. General obligation bonds are obligations involving the credit of an issuer possessing taxing power and are payable from such issuer's general revenues and not from any particular source. Limited obligation bonds are payable only from the revenues derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source. Tax-exempt industrial development bonds generally are also revenue bonds and thus are not payable from the issuer's general revenues. The credit and quality of industrial development bonds are usually related to the credit of the corporate user of the facilities. Payment of interest on and repayment of principal of such bonds is the responsibility of the corporate user (and/or any guarantor). In addition, the Fund may invest in lease obligations. Lease obligations may take the form of a lease or an installment purchase contract issued by public authorities to acquire a wide variety of equipment and facilities. The securities of state and municipal governments and their political subdivisions are not considered to be issued by members of any industry.

Repurchase Agreements

The Fund may invest in repurchase agreements with commercial banks, brokers or dealers to generate income from its excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which the Fund acquires a money market instrument (generally a security issued by the U.S. Government or an agency thereof, a banker's acceptance or a certificate of deposit) from a seller, subject to resale to the seller at an agreed upon price and date (normally, the next business day). A repurchase agreement may be considered a loan collateralized by securities. The resale price reflects an agreed upon interest rate effective for the period the instrument is held by the Fund and is unrelated to the interest rate on the underlying instrument.

In these repurchase agreement transactions, the securities acquired by the Fund (including accrued interest earned thereon) must have a total value at least equal to the value of the repurchase agreement and are held by the Trust's custodian bank until repurchased. In addition, the Trust's Board of Trustees ("Board" or "Trustees") has established guidelines and standards for review of the creditworthiness of any bank, broker or dealer counterparty to a repurchase agreement with the Fund. No more than an aggregate of 15% of the Fund's net assets will be invested in repurchase agreements having maturities longer than seven days.

The use of repurchase agreements involves certain risks. For example, if the other party to the agreement defaults on its obligation to repurchase the underlying security at a time when the value of the security has declined, the Fund may incur a loss upon disposition of the security. If the other party to the agreement becomes insolvent and subject to liquidation or reorganization under the Bankruptcy Code or other laws, a court may determine that the underlying security is collateral not within the control of the Fund and, therefore, the Fund may incur delays in disposing of the security and/or may not be able to substantiate its interest in the underlying security and may be deemed an unsecured creditor of the other party to the agreement.

Futures Contracts and Options

Futures contracts generally provide for the future purchase or sale of a specified instrument, index or commodity at a specified future time and at a specified price. Bond index futures contracts and other types of futures contracts are settled daily with a payment by one party to the other of a cash amount based on the difference between the level of the bond index or other underlying instrument specified in the contract from one day to the next. Futures contracts are standardized as to maturity date and underlying instrument and are traded on futures exchanges. The Fund may use futures contracts and options on futures contracts based on other indexes or combinations of indexes that Van Eck Associates Corporation (the “Adviser”) believes to be representative of the Fund’s benchmark index (the “Index”).

An option is a contract that provides the holder of the option the right to buy or sell shares or other assets at a fixed price, within a specified period of time. An American call option gives the option holder the right to buy the underlying security from the option writer at the option exercise price at any time prior to the expiration of the option. A European call option gives the option holder the right to buy the underlying security from the option writer only on the option expiration date. An American put option gives the option holder the right to sell the underlying security to the option writer at the option exercise price at any time prior to the expiration of the option. A European put option gives the option holder the right to sell the underlying security to the option writer at the option exercise price only on the option expiration date.

Although futures contracts (other than cash settled futures contracts including most bond index futures contracts) by their terms call for actual delivery or acceptance of the underlying instrument or commodity, in most cases the contracts are closed out before the maturity date without the making or taking of delivery. Closing out an open futures position is done by taking an opposite position (buying the same contract which was previously sold or selling the same contract previously purchased) in an identical contract to terminate the position. Brokerage commissions are incurred when a futures contract position is opened or closed.

Futures traders are required to make a good faith margin deposit (typically in cash or government securities) with a broker or custodian to initiate and maintain open positions in futures contracts. A margin deposit is intended to assure completion of the contract (delivery or acceptance of the underlying instrument or commodity or payment of the cash settlement amount) if it is not terminated prior to the specified delivery date. Brokers may establish deposit requirements that are higher than the exchange minimums. Futures contracts are customarily purchased and sold on margin deposits which may range upward from less than 5% of the value of the contract being traded.

After a futures contract position is opened, the value of the contract is marked-to-market daily. If the futures contract price changes to the extent that the margin on deposit does not satisfy margin requirements, payment of additional “variation” margin will be required.

Conversely, a change in the contract value may reduce the required margin, resulting in a repayment of excess margin to the contract holder. Variation margin payments are made to and from the futures broker for as long as the contract

remains open. The Fund expects to earn interest income on its margin deposits in the form of cash.

The Fund may use futures contracts and options thereon, together with positions in cash and money market instruments, to simulate full investment in the Index. Under such circumstances, the Adviser may seek to utilize other instruments that it believes to be correlated to the Index components or a subset of the components. Liquid futures contracts may not be currently available for the Index.

Positions in futures contracts and options may be closed out only on an exchange that provides a secondary market therefor. However, there can be no assurance that a liquid secondary market will exist for any particular futures contract or option at any specific time. Thus, it may not be possible to close a futures or options position. In the event of adverse price movements, the Fund would continue to be required to make daily cash payments to maintain its required margin. In such situations, if the Fund has insufficient cash, it may have to sell portfolio securities to meet daily margin requirements at a time when it may be disadvantageous to do so. In addition, the Fund may be required to make delivery of the instruments underlying futures contracts it has sold.

The Fund will seek to minimize the risk that it will be unable to close out a futures or options contract by only entering into futures and options for which there appears to be a liquid secondary market.

The risk of loss in trading futures contracts or uncovered call options in some strategies (*e.g.*, selling uncovered bond index futures contracts) is potentially unlimited. The Fund does not plan to use futures and options contracts in this way. The risk of a futures position may still be large as traditionally measured due to the low margin deposits required. In many cases, a relatively small price movement in a futures contract may result in immediate and substantial loss or gain to the investor relative to the size of a required margin deposit.

Utilization of futures transactions by the Fund involves the risk of imperfect or even negative correlation to the Index if the index underlying the futures contracts differs from the Index. There is also the risk of loss by the Fund of margin deposits in the event of the bankruptcy or other similar insolvency with respect to a broker with whom the Fund has an open position in the futures contract or option.

Certain financial futures exchanges limit the amount of fluctuation permitted in futures contract prices during a single trading day. The daily limit establishes the maximum amount that the price of a futures contract may vary either up or down from the previous day's settlement price at the end of a trading session. Once the daily limit has been reached in a particular type of contract, no trades may be made on that day at a price beyond that limit. The daily limit governs only price movements during a particular trading day and therefore does not limit potential losses, because the limit may prevent the liquidation of unfavorable positions. Futures contract prices have occasionally moved to the daily limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of future positions and subjecting some futures traders to substantial losses.

Except as otherwise specified in the Fund's Prospectus or this SAI, there are no limitations on the extent to which the Fund may engage in transactions involving futures and options thereon. The Fund will take steps to prevent its futures positions from "leveraging" its securities holdings. When the Fund has a long futures position requiring physical settlement, it will maintain with its custodian bank, cash or liquid securities having a value equal to the notional value of the contract (less any margin deposited in connection with the position). When the Fund has a short futures position requiring physical settlement, the Fund will maintain with its custodian bank assets substantially identical to those underlying the contract or cash and liquid securities (or a combination of the foregoing) having a value equal to the net obligation of the Fund under the contract (less the value of any margin deposits in connection with the position).

Swaps

Over-the-counter (“OTC”) swap agreements are contracts between parties in which one party agrees to make payments to the other party based on the change in market value or level of a specified index or asset. In return, the other party agrees to make payments to the first party based on the return of a different specified index or asset, usually an interest rate. Although OTC swap agreements entail the

4

risk that a party will default on its payment obligations thereunder, the Fund seeks to reduce this risk generally by receiving (or paying) collateral daily and entering into agreements that involve payments no less frequently than quarterly. The net amount of the excess, if any, of the Fund's obligations over its entitlements with respect to each swap is accrued on a daily basis and an amount of cash or highly liquid securities having an aggregate value at least equal to the accrued excess is maintained in an account at the Trust's custodian bank.

The Fund may enter into interest rate swaps and credit default swaps. Interest rate swaps are typically exchange-traded contracts in which a party agrees to make periodic payments on certain referenced interest rates (e.g., a fixed rate or a floating rate) applied to a specified notional amount. A credit default swap on a security is a bilateral contract that enables an investor to buy or sell protection against a defined-issuer credit event. Credit default swaps referencing fixed income indices are generally traded on exchanges. The Fund may enter into credit default swap agreements either as a buyer or a seller. The Fund may buy protection to attempt to mitigate the risk of default or credit quality deterioration in one or more of its individual holdings or in a segment of the fixed income securities market to which it has exposure, or to take a "short" position in individual bonds or market segments which it does not own. The Fund may sell protection in an attempt to gain exposure to the credit quality characteristics of particular bonds or market segments without investing directly in those bonds or market segments. As the protection seller in a credit default swap, the Fund effectively adds economic leverage to its portfolio because, in addition to being subject to investment exposure on its total net assets, the Fund is subject to investment exposure on the notional amount of the swap.

The use of such swap agreements involves certain risks. For example, if the counterparty under an OTC swap agreement defaults on its obligation to make payments due from it as a result of its bankruptcy or otherwise, the Fund may lose such payments altogether or collect only a portion thereof, which collection could involve costs or delays.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") and related regulatory developments require the clearing and exchange-trading of certain standardized OTC derivative instruments that the Commodity Futures Trading Commission ("CFTC") and Securities and Exchange Commission ("SEC") defined as "swaps" and "security-based swaps," respectively. Mandatory exchange-trading and clearing is occurring on a phased-in basis based on the type of market participant and CFTC approval of contracts for central clearing and exchange trading. In a cleared swap, the Fund's ultimate counterparty is a central clearinghouse rather than a swap dealer, bank or other financial institution. The Fund enters into cleared swaps through an executing broker. Such transactions are then submitted for clearing and, if cleared, will be held at regulated futures commission merchants ("FCMs") that are members of the clearinghouse that serves as the central counterparty. When the Fund enters into a cleared swap, it must deliver to the central counterparty (via an FCM) an amount referred to as "initial margin." Initial margin requirements are determined by the central counterparty, but an FCM may require additional initial margin above the amount required by the central counterparty. During the term of the swap agreement, a "variation margin" amount may also be required to be paid by the Fund or may be received by the Fund in accordance with margin controls set for such accounts, depending upon changes in the price of the underlying reference asset subject to the swap agreement. At the conclusion of the term of the swap agreement, if the Fund has a loss equal to or greater than the margin amount, the margin amount is paid to the FCM along with any loss in excess of the margin amount. If the Fund has a loss of less than the margin amount, the excess margin is returned to the Fund. If the Fund has a gain, the full margin amount and the amount of the gain is paid to the Fund.

Central clearing is designed to reduce counterparty credit risk compared to uncleared swaps because central clearing interposes the central clearinghouse as the counterparty to each participant's swap, but it does not eliminate those risks completely. There is also a risk of loss by the Fund of the

initial and variation margin deposits in the event of bankruptcy of the FCM with which the Fund has an open position in a swap contract. The assets of the Fund may not be fully protected in the event of the bankruptcy of the FCM or central counterparty because the Fund might be limited to recovering only a pro rata share of all available funds and margin segregated on behalf of an FCM's customers or central counterparty's clearing members. If the FCM does not provide accurate reporting, the Fund is also subject to the risk that the FCM could use the Fund's assets, which are held in an omnibus account with assets belonging to the FCM's other customers, to satisfy its own financial obligations or the payment obligations of another customer to the central counterparty. Certain swaps have begun trading on exchanges called swap execution facilities. Exchange-trading is expected to, but may not necessarily, increase the liquidity of swaps trading.

In addition, with respect to cleared swaps, the Fund may not be able to obtain as favorable terms as it would be able to negotiate for an uncleared swap. In addition, an FCM may unilaterally impose position limits or additional margin requirements for certain types of swaps in which the Fund may invest. Central counterparties and FCMs generally can require termination of existing cleared swap transactions at any time, and can also require increases in margin above the margin that is required at the initiation of the swap agreement. Margin requirements for cleared swaps vary on a number of factors, and the margin required under the rules of the clearinghouse and FCM may be in excess of the collateral required to be posted by the Fund to support its obligations under a similar uncleared swap. However, regulators recently adopted rules imposing certain margin requirements, including minimums, on uncleared swaps.

The Fund is also subject to the risk that, after entering into a cleared swap with an executing broker, no FCM or central counterparty is willing or able to clear the transaction. In such an event, the central counterparty would void the trade. Before the Fund can enter into a new trade, market conditions may become less favorable to the Fund.

The Adviser will continue to monitor developments regarding trading and execution of cleared swaps on exchanges, particularly to the extent regulatory changes affect the Fund's ability to enter into swap agreements and the costs and risks associated with such investments.

Warrants and Subscription Rights

Warrants are equity securities in the form of options issued by a corporation which give the holder the right, but not the obligation, to purchase stock, usually at a price that is higher than the market price at the time the warrant is issued. A purchaser takes the risk that the warrant may expire worthless because the market price of the common stock fails to rise above the price set by the warrant.

Currency Forwards

A currency forward transaction is a contract to buy or sell a specified quantity of currency at a specified date in the future at a specified price which may be any fixed number of days from the date of the contract agreed upon by the parties. Currency forward contracts may be used to increase or reduce exposure to currency price movements.

The use of currency forward transactions involves certain risks. For example, if the counterparty under the contract defaults on its obligation to make payments due from it as a result of its bankruptcy or otherwise, the Fund may lose such payments altogether or collect only a portion thereof, which collection could involve costs or delays.

Structured Notes

A structured note is a derivative security for which the amount of principal repayment and/or interest payments is based on the movement of one or more “factors.” These factors include, but are not limited to, currency exchange rates, interest rates (such as the prime lending rate or LIBOR), referenced bonds and stock indices. Some of these factors may or may not correlate to the total rate of return on one or more underlying instruments referenced in such notes. Investments in structured notes involve risks including interest rate risk, credit risk and market risk. Depending on the factor(s) used and the use of multipliers or deflators, changes in interest rates and movement of such factor(s) may cause significant price fluctuations. Structured notes may be less liquid than other types of securities and more volatile than the reference factor underlying the note.

Participation Notes

Participation notes (“P-Notes”) are issued by banks or broker-dealers and are designed to offer a return linked to the performance of a particular underlying equity security or market. P-Notes can have the characteristics or take the form of various instruments, including, but not limited to, certificates or warrants. The holder of a P-Note that is linked to a particular underlying security is entitled to receive any dividends paid in connection with the underlying security. However, the holder of a P-Note generally does not receive voting rights as it would if it directly owned the underlying security. P-Notes constitute direct, general and unsecured contractual obligations of the banks or broker-dealers that issue them, which therefore subject the Fund to counterparty risk, as discussed below. Investments in P-Notes involve certain risks in addition to those associated with a direct investment in the underlying foreign securities or foreign securities markets whose return they seek to replicate. For instance, there can be no assurance that the trading price of a P-Note will equal the value of the underlying foreign security or foreign securities market that it seeks to replicate. As the purchaser of a P-Note, the Fund is relying on the creditworthiness of the counterparty issuing the P-Note and has no rights under a P-Note against the issuer of the underlying security. Therefore, if such counterparty were to become insolvent, the Fund would lose its investment. The risk that the Fund may lose its investments due to the insolvency of a single counterparty may be amplified to the extent the Fund purchases P-Notes issued by one issuer or a small number of issuers. P-Notes also include transaction costs in addition to those applicable to a direct investment in securities. In addition, the Fund’s use of P-Notes may cause the Fund’s performance to deviate from the performance of the portion of the Index to which the Fund is gaining exposure through the use of P-Notes.

Due to liquidity and transfer restrictions, the secondary markets on which P-Notes are traded may be less liquid than the markets for other securities, which may lead to the absence of readily available market quotations for securities in the Fund’s portfolio and may cause the value of the P-Notes to decline. The ability of the Fund to value its securities becomes more difficult and the Adviser’s judgment in the application of fair value procedures may play a greater role in the valuation of the Fund’s securities due to reduced availability of reliable objective pricing data. Consequently, while such determinations will be made in good faith, it may nevertheless be more difficult for the Fund to accurately assign a daily value to such securities.

Future Developments

The Fund may take advantage of opportunities in the area of options, futures contracts, options on futures contracts, warrants, swaps and any other investments which are not presently contemplated for use or which are not currently available, but which may be developed, to the extent such investments are considered suitable for the Fund by the Adviser.

7

Investment Restrictions

The Trust has adopted the following investment restrictions as fundamental policies with respect to the Fund. These restrictions cannot be changed without the approval of the holders of a majority of the Fund's outstanding voting securities. For purposes of the 1940 Act, a majority of the outstanding voting securities of the Fund means the vote, at an annual or a special meeting of the security holders of the Trust, of the lesser of (1) 67% or more of the voting securities of the Fund present at such meeting, if the holders of more than 50% of the outstanding voting securities of the Fund are present or represented by proxy, or (2) more than 50% of the outstanding voting securities of the Fund. Under these restrictions:

1. The Fund may not make loans, except that the Fund may (i) lend portfolio securities, (ii) enter into repurchase agreements, (iii) purchase all or a portion of an issue of debt securities, bank loan or participation interests, bank certificates of deposit, bankers' acceptances, debentures or other securities, whether or not the purchase is made upon the original issuance of the securities and (iv) participate in an interfund lending program with other registered investment companies;
2. The Fund may not borrow money, except as permitted under the 1940 Act, and as interpreted or modified by regulation from time to time;
3. The Fund may not issue senior securities, except as permitted under the 1940 Act, and as interpreted or modified by regulation from time to time;
4. The Fund may not purchase a security (other than obligations of the U.S government, its agencies or instrumentalities) if, as a result, 25% or more of its total assets would be invested in a single issuer;

5. The Fund may not purchase or sell real estate, except that the Fund may (i) invest in securities of issuers that invest in real estate or interests therein; (ii) invest in mortgage-related securities and other securities that are secured by real estate or interests therein; and (iii) hold and sell real estate acquired by the Fund as a result of the ownership of securities;

6. The Fund may not engage in the business of underwriting securities issued by others, except to the extent that the Fund may be considered an underwriter within the meaning of the Securities Act of 1933, as amended (the "Securities Act"), in the disposition of restricted securities or in connection with its investments in other investment companies;

7. The Fund may not purchase or sell commodities, unless acquired as a result of owning securities or other instruments, but it may purchase, sell or enter into financial options and futures, forward and spot currency contracts, swap transactions and other financial contracts or derivative instruments and may invest in securities or other instruments backed by commodities; and

8. The Fund may not purchase any security if, as a result of that purchase, 25% or more of its total assets would be invested in securities of issuers having their principal business activities in the same industry except that the Fund may invest 25% or more of the value of its total assets in securities of issuers in any one industry or group of industries if the index that the Fund replicates concentrates in an industry or group of industries. This limit does not apply to securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities.

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

In addition, the Fund has adopted a fundamental investment policy to invest at least 80% of its assets in municipal securities. For purposes of this policy, the term “assets” means net assets plus the amount of borrowings for investment purposes.

In addition to the investment restrictions and investment policy adopted as fundamental policies as set forth above, the Fund observes the following non-fundamental investment restrictions, which may be changed by the Board without a shareholder vote. Under these restrictions:

1. The Fund will not invest in securities which are “illiquid” securities, including repurchase agreements maturing in more than seven days and options traded over-the-counter, if the result is that more than 15% of the Fund’s net assets would be invested in such securities.

2. The Fund will not make short sales of securities.

3. The Fund will not purchase any security on margin, except for such short-term loans as are necessary for clearance of securities transactions. The deposit or payment by the Fund or initial or variation margin in connection with futures contracts or related options thereon is not considered the purchase of a security on margin.

4. The Fund will not participate in a joint or joint-and-several basis in any trading account in securities, although transactions for the Fund and any other account under common or affiliated management may be combined or allocated between the Fund and such account.

5. The Fund will not purchase securities of open-end or closed-end investment companies except in compliance with the 1940 Act or an exemption or other relief applicable to the Fund from the provisions of the 1940 Act, as amended from time to time, although the Fund may not acquire any securities of registered open-end investment companies or registered unit investment trusts in reliance on Sections 12(d)(1)(F) or 12(d)(1)(G) of the 1940 Act.

If a percentage limitation is adhered to at the time of investment or contract, a later increase or decrease in percentage resulting from any change in value or total or net assets will not result in a violation of such restriction, except that the percentage limitations with respect to the borrowing of money described above in fundamental restriction 2 will be continuously complied with.

With respect to fundamental restriction 2, the 1940 Act permits the Fund to borrow money from banks in an amount up to one-third of its total assets (including the amount borrowed) less its liabilities (not including any borrowings but including the fair market value at the time of computation of any other senior securities then outstanding). The Fund may also borrow an additional 5% of its total assets without regard to the foregoing limitation for temporary purposes such as clearance of portfolio transactions. Practices and investments that may involve leverage but are not considered to be borrowings are not subject to the policy.

With respect to fundamental restriction 3, the 1940 Act prohibits the Fund from issuing senior securities, except that the Fund may borrow money in amounts of up to one-third of the Fund’s total assets from banks for any purpose. The Fund may also borrow money or engage in economically similar transactions if those transactions do not constitute

“senior securities” under the 1940 Act. The policy

9

above will be interpreted not to prevent collateral arrangements with respect to swaps, options, forward or futures contracts or other derivatives, or the posting of initial or variation margin.

The Fund may invest its remaining assets in securities not included in the Index, money market instruments or funds which reinvest exclusively in money market instruments, in bonds that are in the relevant market but not the Index, and/or in combinations of certain bond index futures contracts, options on such futures contracts, bond options, bond index options, options on the Shares, and bond index swaps and swaptions, each with a view towards providing the Fund with exposure to the securities in the Index. These investments may be made to invest uncommitted cash balances or, in limited circumstances, to assist in meeting shareholder redemptions of Creation Units. The Fund will not invest in money market instruments as part of a temporary defensive strategy to protect against potential bond market declines.

SPECIAL CONSIDERATIONS AND RISKS

A discussion of the risks associated with an investment in the Fund is contained in the Prospectus under the headings “Summary Information-Principal Risks of Investing in the Fund” and “Additional Information About the Fund’s Investment Strategies and Risks-Risks of Investing in the Fund.” The discussion below supplements, and should be read in conjunction with, such sections of the Prospectus.

General

Investment in the Fund should be made with an understanding that the value of the Fund’s portfolio securities may fluctuate in accordance with changes in the financial condition of the issuers of the portfolio securities, the value of securities generally and other factors.

An investment in the Fund should also be made with an understanding of the risks inherent in an investment in fixed income securities. An issuer may have the right to redeem or “call” a bond before maturity, in which case the investor may have to reinvest the proceeds at lower market rates. Most bonds bear interest income at a “coupon” rate that is fixed for the life of the bond. The value of a fixed rate bond usually rises when market interest rates fall, and falls when market interest rates rise. Accordingly, a fixed rate bond’s yield (income as a percent of the bond’s current value) may differ from its coupon rate as its value rises or falls. Other types of bonds bear income at an interest rate that is adjusted periodically. Because of their adjustable interest rates, the values of “floating-rate” or “variable-rate” bonds generally fluctuate less in response to market interest rate movements than the value of similar fixed rate bonds. The Fund may treat some of these bonds as having a shorter maturity for purposes of calculating the weighted average maturity of its investment portfolio. Generally, prices of higher quality issues tend to fluctuate more with changes in market interest rates than prices of lower quality issues and prices of longer maturity issues tend to fluctuate more than prices of shorter maturity issues. Bonds may be senior or subordinated obligations. Senior obligations generally have the first claim on a corporation’s earnings and assets and, in the event of liquidation, are paid before subordinated obligations. Bonds may be unsecured (backed only by the issuer’s general creditworthiness) or secured (also backed by specified collateral).

The Fund is not actively managed by traditional methods, and therefore the adverse financial condition of any one issuer will not result in the elimination of its securities from the securities held by the Fund unless the securities of such issuer are removed from the Index.

An investment in the Fund should also be made with an understanding that the Fund will not be able to replicate exactly the performance of the Index because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities and other Fund expenses, whereas such transaction costs and expenses are not included in the calculation of the Index. In addition, the Fund’s use of a representative sampling approach may cause the Fund to not be as well correlated with the return of the Index as would be the case if the Fund purchased all of the securities in the Index in the proportions represented in the Index. The risk of non-correlation may

be higher than other exchange-traded funds which utilize a sampling approach to the extent that the Fund invests a portion of its assets in securities that have economic characteristics that are substantially identical to the securities comprising the Index, but which are not included in the Index. It is also possible that for periods of time, the Fund may not fully replicate the performance of the Index due to the temporary unavailability of certain Index securities in the secondary market or due to other extraordinary circumstances. It is also possible that the composition of the Fund may not exactly replicate the composition of the Index if the Fund has to adjust its portfolio holdings in order to continue to qualify as a “regulated investment company” under the U.S. Internal Revenue Code of 1986, as amended (the “Internal Revenue Code”).

Regulatory developments affecting the exchange-traded and OTC derivatives markets may impair the Fund's ability to manage or hedge its investment portfolio through the use of derivatives. The Dodd-Frank Act and the rules promulgated thereunder may limit the ability of the Fund to enter into one or more exchange-traded or OTC derivatives transactions.

The Trust, on behalf of the Fund, has filed a notice of eligibility with the National Futures Association claiming an exclusion from the definition of the term "commodity pool operator" ("CPO") pursuant to CFTC Regulation 4.5, as promulgated under the Commodity Exchange Act ("CEA"), with respect to the Fund's operations. Therefore, neither the Fund nor the Adviser (with respect to the Fund) is subject to registration or regulation as a commodity pool or CPO under the CEA. If the Fund becomes subject to these requirements, the Fund may incur additional compliance and other expenses.

The Fund's use of derivatives may also be limited by the requirements of the Internal Revenue Code for qualification as a regulated investment company for U.S. federal income tax purposes.

With respect to investments in swap transactions, commodity futures, commodity options or certain other derivatives used for purposes other than bona fide hedging purposes, an investment company must meet one of the following tests under the amended regulations in order to claim an exemption from being considered a "commodity pool" or CPO. First, the aggregate initial margin and premiums required to establish an investment company's positions in such investments may not exceed five percent (5%) of the liquidation value of the investment company's portfolio (after accounting for unrealized profits and unrealized losses on any such investments). Alternatively, the aggregate net notional value of such instruments, determined at the time of the most recent position established, may not exceed one hundred percent (100%) of the liquidation value of the investment company's portfolio (after accounting for unrealized profits and unrealized losses on any such positions). In addition to meeting one of the foregoing trading limitations, the investment company may not market itself as a commodity pool or otherwise as a vehicle for trading in the commodity futures, commodity options or swaps and derivatives markets. In the event that the Adviser is required to register as a CPO, the disclosure and operations of the Fund would need to comply with all applicable CFTC regulations. Compliance with these additional registration and regulatory requirements would increase operational expenses. Other potentially adverse regulatory initiatives could also develop.

Municipal Securities Risk

The market for municipal bonds may be less liquid than for taxable bonds. There may also be less information available on the financial condition of issuers of municipal securities than for public corporations. This means that it may be harder to buy and sell municipal securities, especially on short notice, and municipal securities may be more difficult for the Fund to value accurately than securities of public corporations. Since the Fund invests a significant portion of its portfolio in municipal securities, the Fund's portfolio may have greater exposure to liquidity risk than a fund that invests in non-municipal securities.

Municipal securities may include revenue bonds, which are generally backed by revenue from a specific project or tax. The issuer of a revenue bond makes interest and principal payments from revenues generated from a particular source or facility, such as a tax on particular property or revenues generated from a municipal water or sewer utility or an airport. Revenue bonds generally are not backed by the full faith and credit and general taxing power of the issuer. Municipal securities backed by current or anticipated revenues from a specific project or specific assets can be negatively affected by the discontinuance of the taxation supporting the project or assets or the inability to collect revenues for the project or from the assets due to factors such as lower property tax collections as a result of lower home values, lower sales tax revenues as a result of consumers cutting back spending and lower income tax revenue as a result of a higher unemployment rate. In addition, since some municipal obligations may be secured or guaranteed by banks and other institutions, the risk to the Fund could increase if the banking or financial sector suffers an economic downturn and/or if the credit ratings of the institutions issuing the guarantee are downgraded or at risk of being downgraded by a national rating organization.

If the Internal Revenue Service (“IRS”) determines that an issuer of a municipal security has not complied with applicable tax requirements, interest from the security could become taxable and the security could decline significantly in value.

Some longer-term municipal securities give the investor the right to “put” or sell the security at par (face value) within a specified number of days following the investor’s request - usually one to seven days. This demand feature enhances a security’s liquidity by shortening its effective maturity and enables

it to trade at a price equal to or very close to par. If a demand feature terminates prior to being exercised, the Fund would hold the longer-term security, which could experience substantially more volatility.

Municipal securities are subject to credit and market risk. Generally, prices of higher quality issues tend to fluctuate more with changes in market interest rates than prices of lower quality issues and prices of longer maturity issues tend to fluctuate more than prices of shorter maturity issues.

Prices and yields on municipal securities are dependent on a variety of factors, including general money-market conditions, the financial condition of the issuer, general conditions of the municipal securities market, the size of a particular offering, the maturity of the obligation and the rating of the issue. A number of these factors, including the ratings of particular issues, are subject to change from time to time. Available information about the financial condition of an issuer of municipal securities may not be as extensive as that which is made available by corporations whose securities are publicly traded. As a result, municipal securities may be more difficult to value than securities of public corporations.

Lease Obligations Risk

Lease obligations may have risks not normally associated with general obligation or other revenue bonds. Leases and installment purchase or conditional sale contracts (which may provide for title to the leased asset to pass eventually to the issuer) have developed as a means for governmental issuers to acquire property and equipment without the necessity of complying with the constitutional statutory requirements generally applicable for the issuance of debt. Certain lease obligations contain “non-appropriation” clauses that provide that the governmental issuer has no obligation to make future payments under the lease or contract unless money is appropriated for that purpose by the appropriate legislative body on an annual or other periodic basis. Consequently, continued lease payments on those lease obligations containing “nonappropriation” clauses are dependent on future legislative actions. If these legislative actions do not occur, the holders of the lease obligation may experience difficulty in exercising their rights, including disposition of the property. In such circumstances, the Fund might not recover the full principal amount of the obligation.

Tobacco Bond Risk

Tobacco settlement revenue bonds are generally neither general nor legal obligations of a state or any of its political subdivisions and neither the full faith and credit nor the taxing power nor any other assets or revenues of a state or of any political subdivision will be pledged to the payment of any such bonds. In addition, tobacco companies’ profits from the sale of tobacco products are inherently variable and difficult to estimate. There can be no guarantee that tobacco companies will earn enough revenues to cover the payments due under tobacco bonds. The revenues of tobacco companies may be adversely affected by the adoption of new legislation and/or by litigation.

Education Bond Risk

In general, there are two types of education-related bonds: those issued to finance projects for public and private colleges and universities, and those representing pooled interests in student loans. Bonds issued to supply educational institutions with funds are subject to the risk of unanticipated revenue decline, primarily the result of decreasing student enrollment or decreasing state and federal funding. Among the factors that may lead to declining or insufficient revenues are restrictions on students' ability to pay tuition, availability of state and federal funding, and general economic conditions. Student loan revenue bonds are generally offered by state (or sub-state) authorities or commissions and are backed by pools of student loans. Underlying student loans may be guaranteed by state guarantee agencies and may be subject to reimbursement by the United States Department of Education through its guaranteed student

loan program. Others may be private, uninsured loans made to parents or students which are supported by reserves or other forms of credit enhancement. Recoveries of principal due to loan defaults may be applied to redemption of bonds or may be used to re-lend, depending on program latitude and demand for loans. Cash flows supporting student loan revenue bonds are impacted by numerous factors, including the rate of student loan defaults, seasoning of the loan portfolio and student repayment deferral periods of forbearance. Other risks associated with student loan revenue bonds include potential changes in federal legislation regarding student loan revenue bonds, state guarantee agency reimbursement and continued federal interest and other program subsidies currently in effect.

Electric Utilities Bond Risk

The electric utilities industry has been experiencing, and will continue to experience, increased competitive pressures. Federal legislation may open transmission access to any electricity supplier, although it is not presently known to what extent competition will evolve. Other risks include: (a) the availability and cost of fuel; (b) the availability and cost of capital; (c) the effects of conservation on energy demand; (d) the effects of rapidly changing environmental, safety and licensing requirements, and other federal, state and local regulations, (e) timely and sufficient rate increases and governmental limitations on rates charged to customers; (f) the effects of opposition to nuclear power; (h) increases in operating costs; and (i) obsolescence of existing equipment, facilities and products.

Housing Bond Risk

Housing revenue bonds are generally issued by a state, county, city, local housing authority or other public agency. They generally are secured by the revenues derived from mortgages purchased with the proceeds of the bond issue. It is extremely difficult to predict the supply of available mortgages to be purchased with the proceeds of an issue or the future cash flow from the underlying mortgages. Consequently, there are risks that proceeds will exceed supply, resulting in early retirement of bonds, or that homeowner repayments will create an irregular cash flow. Many factors may affect the financing of multi-family housing projects, including acceptable completion of construction, proper management, occupancy and rent levels, economic conditions and changes to current laws and regulations.

Transportation Bond Risk

Transportation debt may be issued to finance the construction of airports, toll roads, highways or other transit facilities. Airport bonds are dependent on the general stability of the airline industry and on the stability of a specific carrier who uses the airport as a hub. Air traffic generally follows broader economic trends and is also affected by the price and availability of fuel. Toll road bonds are also affected by the cost and availability of fuel as well as toll levels, the presence of competing roads and the general economic health of an area. Fuel costs and availability also affect other transportation-related securities, as do the presence of alternate forms of transportation, such as public transportation. Municipal securities that are issued to finance a particular transportation project often depend solely on revenues from that project to make principal and interest payments. Adverse conditions and developments affecting a particular project may result in lower revenues to the issuer of the municipal securities.

Water and Sewer Bond Risk

Water and sewer revenue bonds are often considered to have relatively secure credit as a result of their issuer's importance, monopoly status and generally unimpeded ability to raise rates. Despite this, lack of water supply due to insufficient rain, run-off or snow pack is a concern that has led to past defaults. Further, public resistance to rate increases, costly environmental litigation, and federal environmental mandates are challenges faced by issuers of water and sewer bonds.

14

Industrial Development Bond Risk

Industrial development bonds are revenue bonds issued by or on behalf of public authorities to obtain funds to finance various public and/or privately operated facilities, including those for business and manufacturing, housing, sports, pollution control, airport, mass transit, port and parking facilities. These bonds are normally secured only by the revenues from the project and not by state or local government tax payments. Consequently, the credit quality of these securities is dependent upon the ability of the user of the facilities financed by the bonds and any guarantor to meet its financial obligations. Payment of interest on and repayment of principal of such bonds are the responsibility of the user and/or any guarantor. These bonds are subject to a wide variety of risks, many of which relate to the nature of the specific project. Generally, the value and credit quality of these bonds are sensitive to the risks related to an economic slowdown.

Resource Recovery Bond Risk

Resource recovery bonds are a type of revenue bond issued to build facilities such as solid waste incinerators or waste-to-energy plants. Typically, a private corporation is involved, at least during the construction phase, and the revenue stream is secured by fees or rents paid by municipalities for use of the facilities. These bonds are normally secured only by the revenues from the project and not by state or local government tax receipts. Consequently, the credit quality of these securities is dependent upon the ability of the user of the facilities financed by the bonds and any guarantor to meet its financial obligations. The viability of a resource recovery project, environmental protection regulations, and project operator tax incentives may affect the value and credit quality of resource recovery bonds.

Special Tax Bond Risk

Special tax bonds are usually backed and payable through a single tax, or series of special taxes such as incremental property taxes. The failure of the tax levy to generate adequate revenue to pay the debt service on the bonds may cause the value of the bonds to decline. Adverse conditions and developments affecting a particular project may result in lower revenues to the issuer of the municipal securities, which may adversely affect the value of the Fund's portfolio.

Health Care Bond Risk

The health care industry is subject to regulatory action by a number of private and governmental agencies, including federal, state and local governmental agencies. A major source of revenues for the health care industry is payments from Medicare and Medicaid programs. As a result, the industry is sensitive to legislative changes and reductions in governmental spending for such programs. Numerous other factors may also affect the industry and the value and credit quality of health care bonds, such as general and local economic conditions, demand for services, expenses (including malpractice insurance premiums) and competition among health care providers. The following elements

may adversely affect health care facility operations: the implementation of national and/or state-specific health insurance exchanges; other national, state or local health care reform measures; medical and technological advances which dramatically alter the need for health services or the way in which such services are delivered; changes in medical coverage which alter the traditional fee-for-service revenue stream; efforts by employers, insurers, and governmental agencies to reduce the costs of health insurance and health care services; and increases and decreases in the cost and availability of medical products.

Tax Risks

As with any investment, you should consider how your investment in Shares of the Fund will be taxed. The tax information in the Prospectus and SAI is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares of the Fund.

There is no guarantee that the Fund's income will be exempt from federal or state income taxes. Events occurring after the date of issuance of a municipal bond or after the Fund's acquisition of a municipal bond may result in a determination that interest on that bond is includible in gross income for U.S. federal income tax purposes retroactively to its date of issuance. Such a determination may cause a portion of prior distributions by the Fund to its shareholders to be taxable to those shareholders in the year of receipt. Federal or state changes in income or alternative minimum tax rates or in the tax treatment of municipal bonds may make municipal bonds less attractive as investments and cause them to lose value.

Municipal Market Disruption Risk

The value of municipal securities may be affected by uncertainties in the municipal market related to legislation or litigation involving the taxation of municipal securities or the rights of municipal securities holders in the event of a bankruptcy. Proposals to restrict or eliminate the federal income tax exemption for interest on municipal securities are introduced before Congress from time to time. Proposals also may be introduced before state legislatures that would affect the state tax treatment of a municipal fund's distributions. If such proposals were enacted, the availability of municipal securities and the value of a municipal fund's holdings would be affected. Municipal bankruptcies are relatively rare, and certain provisions of the U.S. Bankruptcy Code governing such bankruptcies are unclear and remain untested. Further, the application of state law to municipal issuers could produce varying results among the states or among municipal securities issuers within a state. These legal uncertainties could affect the municipal securities market generally, certain specific segments of the market, or the relative credit quality of particular securities. There is also the possibility that as a result of litigation or other conditions, the power or ability of issuers to meet their obligations for the payment of interest and principal on their municipal securities may be materially affected or their obligations may be found to be invalid or unenforceable. Such litigation or conditions may from time to time have the effect of introducing uncertainties in the market for municipal securities or certain segments thereof, or of materially affecting the credit risk with respect to particular bonds. Adverse economic, business, legal or political developments might affect all or a substantial portion of the Funds' municipal securities in the same manner. Any of these effects could have a significant impact on the prices of some or all of the municipal securities held by the Fund.

U.S. Federal Tax Treatment of Futures Contracts and Certain Option Contracts

The Fund may be required for federal income tax purposes to mark-to-market and recognize as income for each taxable year its net unrealized gains and losses on certain futures contracts and option contracts as of the end of the

year as well as those actually realized during the year. Gain or loss from futures contracts required to be marked-to-market will be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders. The Fund may be required to defer the recognition of losses on futures contracts or certain option contracts to the extent of any unrecognized gains on related positions held by the Fund.

In order for the Fund to continue to qualify for U.S. federal income tax treatment as a regulated investment company, at least 90% of its gross income for a taxable year must be derived from qualifying income, *i.e.*, dividends, interest, income derived from loans of securities, gains from the sale of securities or of foreign currencies or other income derived with respect to the Fund's business of investing in

securities. It is anticipated that any net gain realized from the closing out of futures contracts or certain option contracts will be considered gain from the sale of securities and therefore will be qualifying income for purposes of the 90% requirement.

The Fund distributes to shareholders annually any net capital gains which have been recognized for U.S. federal income tax purposes (including unrealized gains at the end of the Fund's fiscal year on certain futures transactions and certain option contracts). Such distributions are combined with distributions of capital gains realized on the Fund's other investments and shareholders are advised on the nature of the distributions.

Concentration Considerations

In the event that the Fund's investments are concentrated in a particular sector or sectors or industry or group of industries to the extent that the Index concentrates in such sector and/or industry, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector or industry will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries. The securities of state and municipal governments and their political subdivisions are not considered to be issued by members of any industry.

Cyber Security

The Fund, its service providers, BATS and Authorized Participants (defined below) are susceptible to cyber security risks that include, among other things, theft, unauthorized monitoring, release, misuse, loss, destruction or corruption of confidential and highly restricted data; denial of service attacks; unauthorized access to relevant systems, compromises to networks or devices that the Fund and its service providers use to service the Fund's operations; or operational disruption or failures in the physical infrastructure or operating systems that support the Fund and its service providers. Cyber attacks against or security breakdowns of the Fund, its service providers, BATS or Authorized Participants may adversely impact the Fund and its shareholders, potentially resulting in, among other things, financial losses; the inability of Fund shareholders to transact business and the Fund to process transactions; inability to calculate the Fund's NAV; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs; and/or additional compliance costs. The Fund may incur additional costs for cyber security risk management and remediation purposes. In addition, cyber security risks may also impact issuers of securities in which the Fund invests, which may cause the Fund's investment in such issuers to lose value. There can be no assurance that the Fund, its service providers, BATS or Authorized Participants will not suffer losses relating to cyber attacks or other information security breaches in the future.

EXCHANGE LISTING AND TRADING

A discussion of exchange listing and trading matters associated with an investment in the Fund is contained in the Prospectus under the headings “Summary Information-Principal Risks of Investing in the Fund,” “Additional Information About the Fund’s Investment Strategies and Risks-Risks of Investing in the Fund,” “Shareholder Information-Determination of NAV” and “Shareholder Information-Buying and Selling Exchange-Traded Shares.” The discussion below supplements, and should be read in conjunction with, such sections of the Prospectus.

The Shares of the Fund are expected to be approved for listing on BATS, subject to notice of issuance, and will trade in the secondary market at prices that may differ to some degree from their NAV. The Exchange may but is not required to remove the Shares of the Fund from listing if: (1) following the initial twelve-month period beginning upon the commencement of trading of the Fund, there are fewer than 50 beneficial holders of the Shares for 30 or more consecutive trading days, (2) the value of the Index or portfolio of securities on which the Fund is based is no longer calculated or available or (3) such other event shall occur or condition exists that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. In addition, the Exchange will remove the Shares from listing and trading upon termination of the Trust. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of Shares of the Fund will continue to be met.

As in the case of other securities traded on the Exchange, brokers’ commissions on secondary market transactions in Shares of the Fund will be based on negotiated commission rates at customary levels.

In order to provide investors with a basis to gauge whether the market price of the Shares on the Exchange is approximately consistent with the current value of the assets of the Fund on a per Share basis, an updated value of the Fund’s Shares is disseminated intra-day (“IIV” and also known as the Indicative Optimized Portfolio Value) through the facilities of the Consolidated Tape Association’s Network B. IIVs are disseminated every 15 seconds during regular Exchange trading hours based on the most recently reported prices of Fund Securities. The Fund is not involved in or responsible for the calculation or dissemination of the IIV and makes no warranty as to the accuracy of the IIV.

The IIV has a net other assets value component, which consists of estimates of all other assets and liabilities of the Fund including, among others, current day estimates of interest income and expense accruals. The net other assets value component is divided by the total estimated Fund Shares outstanding, including Shares expected to be issued by the Fund on that day, to arrive at an IIV.

BOARD OF TRUSTEES OF THE TRUST

Trustees and Officers of the Trust

The Board of the Trust consists of five Trustees, four of whom are not “interested persons” (as defined in the 1940 Act), of the Trust (the “Independent Trustees”). Mr. David H. Chow, an Independent Trustee, serves as Chairman of the Board. The Board is responsible for overseeing the management and operations of the Trust, including general supervision of the duties performed by the Adviser and other service providers to the Trust. The Adviser is responsible for the day-to-day administration and business affairs of the Trust.

The Board believes that each Trustee’s experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that the Board possesses the requisite skills and attributes to carry out its oversight responsibilities with respect to the Trust. The Board believes that the Trustees’ ability to review, critically evaluate, question and discuss information provided to them, to interact effectively with the Adviser, other service providers, counsel and independent auditors, and to exercise effective business judgment in the performance of their duties, support this conclusion. The Board also has considered the following experience, qualifications, attributes and/or skills, among others, of its members in reaching its conclusion: such person’s character and integrity; length of service as a board member of the Trust; such person’s willingness to serve and willingness and ability to commit the time necessary to perform the duties of a Trustee; and as to each Trustee other than Mr. van Eck, his status as not being an “interested person” (as defined in the 1940 Act) of the Trust. In addition, the following specific experience, qualifications, attributes and/or skills apply as to each Trustee: Mr. Chow, significant business and financial experience, particularly in the investment management industry, experience with trading and markets through his involvement with the Pacific Stock Exchange, and service as a chief executive officer, board member, partner or executive officer of various businesses and non-profit organizations; Mr. Short, business and financial experience, particularly in the investment management industry, and service as a president, board member or executive officer of various businesses; Mr. Sidebottom, business and financial experience, particularly in the investment management industry, and service as partner and/or executive officer of various businesses; Mr. Stamberger, business and financial experience and service as the president and chief executive officer of SmartBrief Inc., a media company; and Mr. van Eck, business and financial experience, particularly in the investment management industry, and service as a president, executive officer and/or board member of various businesses, including the Adviser, Van Eck Securities Corporation, and Van Eck Absolute Return Advisers Corporation. References to the experience, qualifications, attributes and skills of Trustees are pursuant to requirements of the SEC, do not constitute holding out of the Board or any Trustee as having any special expertise or experience, and shall not impose any greater responsibility or liability on any such person or on the Board by reason thereof.

The Trustees of the Trust, their addresses, positions with the Trust, year of birth, term of office and length of time served, principal occupations during the past five years, the number of portfolios in the Fund Complex overseen by each Trustee and other directorships, if any, held by the Trustees, are set forth below.

Independent Trustees

Janet Squitieri, 1961	Chief Compliance Officer	Since September 2013	Vice President, Global Head of Compliance of the Adviser, VESC and VEARA (since September 2013); Chief Compliance Officer and Senior Vice President North America of HSBC Global Asset Management NA (August 2010 - September 2013); Chief Compliance Officer North America of Babcock & Brown LP (July 2008 - June 2010).

¹The address for each Officer is 666 Third Avenue, 9th Floor, New York, New York 10017.

²Officers are elected yearly by the Trustees.

The Board has an Audit Committee consisting of four Trustees who are Independent Trustees. Messrs. Chow, Short, Sidebottom and Stamberger currently serve as members of the Audit Committee and each of Messrs. Chow, Short and Stamberger has been designated as an "audit committee financial expert" as defined under Item 407 of Regulation S-K of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Mr. Short is the Chairman of the Audit Committee. The Audit Committee has the responsibility, among other things, to: (i) oversee the accounting and financial reporting processes of the Trust and its internal control over financial reporting; (ii) oversee the quality and integrity of the Trust's financial statements and the independent audit thereof; (iii) oversee or, as appropriate, assist the Board's oversight of the Trust's compliance with legal and regulatory requirements that relate to the Trust's accounting and financial reporting, internal control over financial reporting and independent audit; (iv) approve prior to appointment the engagement of the Trust's independent registered public accounting firm and, in connection therewith, to review and evaluate the qualifications, independence and performance of the Trust's independent registered public accounting firm; and (v) act as a liaison between the Trust's independent registered public accounting firm and the full Board. The Audit Committee met [] times during the fiscal year ended [].

The Board also has a Nominating and Corporate Governance Committee consisting of four Independent Trustees. Messrs. Chow, Short, Sidebottom and Stamberger currently serve as members of the Nominating and Corporate Governance Committee. Mr. Stamberger is the Chairman of the Nominating and Corporate Governance Committee. The Nominating and Corporate Governance Committee has the responsibility, among other things, to: (i) evaluate, as necessary, the composition of the Board, its committees and sub-committees and make such recommendations to the Board as deemed appropriate by the Committee; (ii) review and define Independent Trustee qualifications; (iii) review the qualifications of individuals serving as Trustees on the Board and its committees; (iv) evaluate, recommend and nominate qualified individuals for election or appointment as members of the Board and recommend the appointment

of members and chairs of each Board committee and subcommittee; and (v)

24

review and assess, from time to time, the performance of the committees and subcommittees of the Board and report the results to the Board. The Nominating and Corporate Governance Committee met [] times during the fiscal year ended [].

The Board has determined that its leadership structure is appropriate given the business and nature of the Trust. In connection with its determination, the Board considered that the Chairman of the Board is an Independent Trustee. The Chairman of the Board can play an important role in setting the agenda of the Board and also serves as a key point person for dealings between management and the other Independent Trustees. The Independent Trustees believe that the Chairman's independence facilitates meaningful dialogue between the Adviser and the Independent Trustees. The Board also considered that the Chairman of each Board committee is an Independent Trustee, which yields similar benefits with respect to the functions and activities of the various Board committees. The Independent Trustees also regularly meet outside the presence of management and are advised by independent legal counsel. The Board has determined that its committees help ensure that the Trust has effective and independent governance and oversight. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the Independent Trustees from management of the Trust, including the Adviser. The Board reviews its structure on an annual basis.

As an integral part of its responsibility for oversight of the Trust in the interests of shareholders, the Board, as a general matter, oversees risk management of the Trust's investment programs and business affairs. The function of the Board with respect to risk management is one of oversight and not active involvement in, or coordination of, day-to-day risk management activities for the Trust. The Board recognizes that not all risks that may affect the Trust can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Trust's goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees that may relate to risk management matters are typically summaries of the relevant information.

The Board exercises oversight of the risk management process primarily through the Audit Committee, and through oversight by the Board itself. The Trust faces a number of risks, such as investment-related and compliance risks. The Adviser's personnel seek to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Trust. Under the overall supervision of the Board or the applicable Committee of the Board, the Trust, the Adviser, and the affiliates of the Adviser employ a variety of processes, procedures and controls to identify such possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Different processes, procedures and controls are employed with respect to different types of risks. Various personnel, including the Trust's Chief Compliance Officer, as well as various personnel of the Adviser and other service providers such as the Trust's independent accountants, may report to the Audit Committee and/or to the Board with respect to various aspects of risk management, as well as events and circumstances that have arisen and responses thereto.

The officers and Trustees of the Trust, in the aggregate, own less than 1% of the Shares of the Fund as of the date of this SAI.

For each Trustee, the dollar range of equity securities beneficially owned (including ownership through the Trust's Deferred Compensation Plan) by the Trustee in the Trust and in all registered investment companies advised by the Adviser ("Family of Investment Companies") that are overseen by the Trustee is shown below.

25

Name of Trustee	Dollar Range of Equity Securities in VanEck Vectors AMT-Free National Municipal Index ETF (As of [])	Aggregate Dollar Range of Equity Securities in all Registered Investment Companies Overseen By Trustee In Family of Investment Companies (As of [])
David H. Chow	None	□
R. Alastair Short	None	□
Peter J. Sidebottom	None	□
Richard D. Stamberger	None	□
Jan F. van Eck	None	□

As to each Independent Trustee and his immediate family members, no person owned beneficially or of record securities in an investment manager or principal underwriter of the Fund, or a person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the investment manager or principal underwriter of the Fund.

Remuneration of Trustees

The Trust pays each Independent Trustee an annual retainer of \$80,000, a per meeting fee of \$15,000 for scheduled quarterly meetings of the Board and each special meeting of the Board and a per meeting fee of \$7,500 for telephonic meetings. Additionally, the Trust pays the Chairman of the Board an annual retainer of \$45,500, the Chairman of the Audit Committee an annual retainer of \$19,500 and the Chairman of the Governance Committee an annual retainer of \$13,000. The Trust also reimburses each Trustee for travel and other out-of-pocket expenses incurred in attending such meetings. No pension or retirement benefits are accrued as part of Trustee compensation.

The table below shows the estimated compensation to be paid to the Trustees by the Trust for the fiscal year ended []. Annual Trustee fees may be reviewed periodically and changed by the Trust's Board.

Name of Trustee	Aggregate Compensation From the Trust	Deferred Compensation From the Trust	Pension or Retirement Benefits Accrued as Part of the Trust's Expenses⁽²⁾	Estimated Annual Benefits Upon Retirement	Total Compensation From the Trust and the Fund Complex⁽¹⁾ Paid to Trustee⁽²⁾

Jan F. van Eck ⁽³⁾	\$ []	\$ []	N/A	N/A	\$ []

- (1) The “Fund Complex” consists of VanEck Funds, VanEck VIP Trust and the Trust.
- (2) Because the funds of the Fund Complex have different fiscal year ends, the amounts shown are presented on a calendar year basis.
- (3) “Interested person” under the 1940 Act.

PORTFOLIO HOLDINGS DISCLOSURE

The Fund’s portfolio holdings are publicly disseminated each day the Fund is open for business through financial reporting and news services, including publicly accessible Internet web sites and the Fund’s website, at www.vaneck.com. In addition, a basket composition file, which includes the security names and share quantities to deliver in exchange for Creation Units, together with estimates and actual cash components is publicly disseminated daily prior to the opening of the Exchange via the National Securities Clearing Corporation (the “NSCC”), a clearing agency that is registered with the SEC. The basket represents one Creation Unit of the Fund. The Trust, Adviser, Custodian and Distributor will not disseminate non-public information concerning the Trust.

QUARTERLY PORTFOLIO SCHEDULE

The Trust is required to disclose, after its first and third fiscal quarters, the complete schedule of the Fund's portfolio holdings with the SEC on Form N-Q. Form N-Q for the Fund will be available on the SEC's website at <http://www.sec.gov>. The Fund's Form N-Q may also be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. and information on the operation of the Public Reference Room may be obtained by calling 202.551.8090. The Fund's Form N-Q will be available through the Fund's website, at www.vaneck.com or by writing to 666 Third Avenue, 9th Floor, New York, New York 10017.

POTENTIAL CONFLICTS OF INTEREST

The Adviser (and its principals, affiliates or employees) may serve as investment adviser to other client accounts and conduct investment activities for their own accounts. Such "Other Clients" may have investment objectives or may implement investment strategies similar to those of the Fund, or may track the same index the Fund tracks. When the Adviser implements investment strategies for Other Clients that are similar or directly contrary to the positions taken by the Fund, the prices of the Fund's securities may be negatively affected. For example, when purchase or sales orders for the Fund are aggregated with those of other funds and/or Other Clients and allocated among them, the price that the Fund pays or receives may be more in the case of a purchase or less in a sale than if the Adviser served as adviser to only the Fund. When Other Clients are selling a security that the Fund owns, the price of that security may decline as a result of the sales. The compensation that the Adviser receives from Other Clients may be higher than the compensation paid by the Fund to the Adviser. The Adviser has implemented procedures to monitor trading across the funds and its Other Clients.

CODE OF ETHICS

The Fund, the Adviser and the Distributor have each adopted a Code of Ethics pursuant to Rule 17j-1 under the 1940 Act ("Rule 17j-1"). Such Codes of Ethics require, among other things, that "access persons" (as defined in Rule 17j-1) conduct personal securities transactions in a manner that avoids any actual or potential conflict of interest or any abuse of a position of trust and responsibility. The Codes of Ethics allow such access persons to invest in securities that may be purchased and held by the Fund, provided such investments are done consistently with the provisions of the Codes of Ethics.

PROXY VOTING POLICIES AND PROCEDURES

The Fund's proxy voting record will be available upon request and on the SEC's website at <http://www.sec.gov>. Proxies for the Fund's portfolio securities are voted in accordance with the Adviser's proxy voting policies and procedures, which are set forth in Appendix A to this SAI.

The Trust is required to disclose annually the Fund's complete proxy voting record on Form N-PX covering the period July 1 through June 30 and file it with the SEC no later than August 31. Form N-PX for the Fund will be available through the Fund's website, at www.vaneck.com, or by writing to 666 Third Avenue, 9th Floor, New York, New York 10017. The Fund's Form N-PX will also be available on the SEC's website at www.sec.gov.

MANAGEMENT

The following information supplements and should be read in conjunction with the section in the Prospectus entitled "Management of the Fund."

Investment Adviser

Van Eck Associates Corporation acts as investment adviser to the Fund and, subject to the general supervision of the Board, is responsible for the day-to-day investment management of the Fund. The Adviser is a private company with headquarters in New York and manages numerous pooled investment vehicles and separate accounts. The Adviser has been wholly owned by members of the van Eck family since its founding in 1955 and its shares are held by the Adviser's Chief Executive Officer, Jan van Eck, and his family. Mr. van Eck's positions with the Trust and the Adviser are discussed above.

The Adviser serves as investment adviser to the Fund pursuant to an investment management agreement between the Trust and the Adviser (the "Investment Management Agreement"). Under the Investment Management Agreement, the Adviser, subject to the supervision of the Board and in conformity with the stated investment policies of the Fund, manages the investment of the Fund's assets. The Adviser is responsible for placing purchase and sale orders and providing continuous supervision of the investment portfolio of the Fund.

Indemnification. Pursuant to the Investment Management Agreement, the Trust has agreed to indemnify the Adviser for certain liabilities, including certain liabilities arising under the federal securities laws, unless such loss or liability results from willful misfeasance, bad faith or gross negligence in the performance of its duties or the reckless disregard of its obligations and duties.

Compensation. Under the Investment Management Agreement, the Adviser is responsible for all expenses of the Fund, including the costs of transfer agency, custody, fund administration, legal, audit and other services, except for the fee payment under the Investment Management Agreement, interest expense, offering costs, trading expenses, taxes and extraordinary expenses. For its services to the Fund, the Fund has agreed to pay the Adviser an annual unitary management fee equal to []% of its average daily net assets. Offering costs excluded from the annual unitary management fee are: (a) legal fees pertaining to the Fund's Shares offered for sale; (b) SEC and state registration fees; and (c) initial fees paid for Shares of the Fund to be listed on an exchange.

Term. The Investment Management Agreement is subject to annual approval by (1) the Board or (2) a vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund, *provided* that in either event such continuance also is approved by a majority of the Board who are not interested persons (as defined in the 1940 Act) of the Trust by a vote cast in person at a meeting called for the purpose of voting on such approval. The Investment Management Agreement is terminable without penalty, on 60 days' notice, by the Board or by a vote of the holders of a majority (as defined in the 1940 Act) of the Fund's outstanding voting securities. The Investment Management Agreement is also terminable upon 60 days' notice by the Adviser and will terminate automatically in the event of its assignment (as defined in the 1940 Act).

The Administrator

Van Eck Associates Corporation also serves as administrator for the Trust pursuant to the Investment Management Agreement. Under the Investment Management Agreement, the Adviser is obligated on a continuous basis to provide such administrative services as the Board of the Trust reasonably deems necessary for the proper administration of the Trust and the Fund. The Adviser will generally assist in all aspects of the Trust's and the Fund's operations; supply and maintain office facilities, statistical and research data, data processing services, clerical, bookkeeping and record keeping services (including without limitation the maintenance of such books and records as are required under the 1940 Act and the rules thereunder, except as maintained by other agents), internal auditing, executive and administrative services, and stationery and office supplies; prepare reports to shareholders or

investors; prepare and file tax returns; supply financial information and supporting data for reports to and filings with the SEC and various state Blue Sky authorities; supply supporting documentation for meetings of the Board; provide monitoring reports and assistance regarding compliance with the Declaration of Trust, by-laws, investment objectives and policies and with federal and state securities laws; arrange for appropriate insurance coverage; calculate NAVs, net income and realized capital gains or losses; and negotiate arrangements with, and supervise and coordinate the activities of, agents and others to supply services. Van Eck Associates Corporation owns 100% of the common stock of Van Eck Securities Corporation (the “Distributor”).

Custodian and Transfer Agent

The Bank of New York Mellon (“The Bank of New York”), located at 101 Barclay Street, New York, New York 10286, serves as custodian for the Fund pursuant to a Custodian Agreement. As Custodian, The Bank of New York holds the Fund’s assets. As compensation for these custodial services, The Bank of New York receives, among other items, transaction fees, asset-based safe keeping fees and overdraft charges and may be reimbursed by the Fund for its out-of-pocket expenses. The Bank of New York serves as the Fund’s transfer agent (in such capacity, the “Transfer Agent”) pursuant to a Transfer Agency Agreement. In addition, The Bank of New York provides various accounting services to the Fund pursuant to a fund accounting agreement.

The Distributor

Van Eck Securities Corporation is the principal underwriter and distributor of Shares. Its principal address is 666 Third Avenue, New York, New York 10017 and investor information can be obtained by calling 800-826-2333. The Distributor has entered into an agreement with the Trust which will continue from its effective date unless terminated by either party upon 60 days’ prior written notice to the other party by the Trust and the Adviser, or by the Distributor, or until termination of the Trust or the Fund offering its Shares, and which is renewable annually thereafter (the “Distribution Agreement”), pursuant to which it distributes Shares. Shares will be continuously offered for sale by the Trust through the Distributor only in Creation Units, as described below under “Creation and Redemption of Creation Units-Procedures for Creation of Creation Units.” Shares in less than Creation Units are not distributed by the Distributor. The Distributor will deliver a prospectus to persons purchasing Shares in Creation Units and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor is a broker-dealer registered under the Exchange Act and a member of the Financial Industry Regulatory Authority (“FINRA”). The Distributor has no role in determining the investment policies of the Trust or which securities are to be purchased or sold by the Trust.

The Distributor may also enter into sales and investor services agreements with broker-dealers or other persons that are Participating Parties and DTC Participants (as defined below) to provide distribution assistance, including broker-dealer and shareholder support and educational and promotional services but must pay such broker-dealers or other persons, out of its own assets.

The Distribution Agreement provides that it may be terminated at any time, without the payment of any penalty: (i) by vote of a majority of the Independent Trustees or (ii) by vote of a majority (as defined in the 1940 Act) of the outstanding voting securities of the Fund, on at least 60 days' written notice to the Distributor. The Distribution Agreement is also terminable upon 60 days' notice by the Distributor and will terminate automatically in the event of its assignment (as defined in the 1940 Act).

Other Accounts Managed by the Portfolio Managers

As of the date indicated below, Messrs. Colby and Isenberg managed the following other accounts:

Name of Portfolio Manager	Other Accounts Managed (As of [])	Accounts with respect to which the advisory fee is based on the performance of the account			
		Category of Account	Number of Accounts in Category	Total Assets in Accounts in Category	Number of Accounts in Category
James T. Colby III	Registered investment companies	[]	[]	[]	[]
	Other pooled investment vehicles	[]	[]	[]	[]
	Other accounts	[]	[]	[]	[]
Eric J. Isenberg	Registered investment companies	[]	[]	[]	[]
	Other pooled investment vehicles	[]	[]	[]	[]
	Other accounts	[]	[]	[]	[]

Although the funds in the Trust that are managed by Messrs. Colby and Isenberg may have different investment strategies, each has an investment objective of seeking to replicate as closely as possible, before fees and expenses, the price and yield performance of its respective underlying index. The Adviser does not believe that management of the various accounts presents a material conflict of interest for Messrs. Colby or Isenberg or the Adviser.

Portfolio Manager Compensation

The portfolio managers are paid a fixed base salary and a bonus. The bonus is based upon the quality of investment analysis and the management of the funds. The quality of management of the funds includes issues of replication, rebalancing, portfolio monitoring and efficient operation, among other factors. Portfolio managers who oversee accounts with significantly different fee structures are generally compensated by discretionary bonus rather than a set formula to help reduce potential conflicts of interest. At times, the Adviser and its affiliates manage accounts with incentive fees. The portfolio managers may serve as portfolio managers to other clients. Such “Other Clients” may have investment objectives or may implement investment strategies similar to those of the Fund, or may track the same index the Fund tracks. When the portfolio managers implement investment strategies for Other Clients that are similar or directly contrary to the positions taken by the Fund, the prices of the Fund’s securities may be negatively affected. The compensation that the Fund’s portfolio managers receive for managing other client accounts may be higher than the compensation the portfolio managers receive for managing the Fund. The Adviser has implemented procedures to monitor trading across funds and its Other Clients.

Portfolio Manager Share Ownership

As of the date of this SAI, Messrs. Colby and Isenberg did not beneficially own any Shares of the Fund.

BROKERAGE TRANSACTIONS

When selecting brokers and dealers to handle the purchase and sale of portfolio securities, the Adviser looks for prompt execution of the order at a favorable price. Generally, the Adviser works with recognized dealers in these securities, except when a better price and execution of the order can be obtained elsewhere. The Fund will not deal with affiliates in principal transactions unless permitted by exemptive order or applicable rule or regulation. The Adviser owes a duty to its clients to seek best execution on trades effected. Since the investment objective of the Fund is investment performance that corresponds to that of the Index, the Adviser does not intend to select brokers and dealers for the purpose of receiving research services in addition to a favorable price and prompt execution either from that broker or an unaffiliated third party.

The Adviser assumes general supervision over placing orders on behalf of the Trust for the purchase or sale of portfolio securities. If purchases or sales of portfolio securities of the Trust and one or more other investment companies or clients supervised by the Adviser are considered at or about the same time, transactions in such securities are allocated among the several investment companies and clients in a manner deemed equitable to all by the Adviser. In some cases, this procedure could have a detrimental effect on the price or volume of the security so far as the Trust is concerned. However, in other cases, it is possible that the ability to participate in volume transactions and to negotiate lower brokerage commissions will be beneficial to the Trust. The primary consideration is best execution.

Portfolio turnover may vary from year to year, as well as within a year. High turnover rates are likely to result in comparatively greater brokerage expenses and taxable distributions. The overall reasonableness of brokerage commissions is evaluated by the Adviser based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services.

Because the Fund commenced operations on or following the date of this SAI, there have been no payments by the Fund for brokerage commissions.

BOOK ENTRY ONLY SYSTEM

The following information supplements and should be read in conjunction with the section in the Prospectus entitled “Shareholder Information-Buying and Selling Exchange-Traded Shares.”

The Depository Trust Company (“DTC”) acts as securities depository for the Shares. Shares of the Fund are represented by securities registered in the name of DTC or its nominee and deposited with, or on behalf of, DTC. Certificates will not be issued for Shares.

DTC, a limited-purpose trust company, was created to hold securities of its participants (the “DTC Participants”) and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the New York Stock Exchange and FINRA.

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the “Indirect Participants”).

Beneficial ownership of Shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in Shares (owners of such beneficial interests are referred to herein as “Beneficial Owners”) is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of Shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depositary Agreement between the Trust and DTC, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the Shares holdings of each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding Shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all Shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants’ accounts with payments in amounts proportionate to their respective beneficial interests in Shares as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of Shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a “street name,” and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspects of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such Shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may determine to discontinue providing its service with respect to the Shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action either to find a replacement for DTC to perform its functions at a comparable cost or, if such a replacement is unavailable, to issue and deliver printed certificates representing ownership of Shares, unless the Trust makes other arrangements with respect thereto satisfactory to the Exchange.

CREATION AND REDEMPTION OF CREATION UNITS

General

The Fund will issue and sell Shares only in Creation Units on a continuous basis through the Distributor, without an initial sales load, at their NAV next determined after receipt, on any Business Day (as defined herein), of an order in proper form. An Authorized Participant (defined below) that is not a “qualified institutional buyer,” as such term is defined under Rule 144A of the Securities Act of 1933, will not be able to receive, as part of a redemption, restricted securities eligible for resale under Rule 144A.

A “Business Day” with respect to the Fund is any day on which the Exchange is open for business. As of the date of the Prospectus, the Exchange observes the following holidays: New Year’s Day, Martin Luther King, Jr. Day, President’s Day (Washington’s Birthday), Good Friday, Memorial Day (observed), Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

Fund Deposit

The consideration for a purchase of Creation Units generally consists of the in-kind deposit of a designated portfolio of fixed income securities (the “Deposit Securities”) that comprise the Index and an amount of cash computed as described below (the “Cash Component”) or, as permitted or required by the Fund, of cash. The Cash Component together with the Deposit Securities, as applicable, are referred to as the “Fund Deposit,” which represents the minimum initial and subsequent investment amount for Shares. The Cash Component represents the difference between the NAV of a Creation Unit and the market value of Deposit Securities and may include a Dividend Equivalent Payment. The “Dividend Equivalent Payment” enables the Fund to make a complete distribution of dividends on the next dividend payment date, and is an amount equal, on a per Creation Unit basis, to the dividends on all the securities held by the Fund (“Fund Securities”) with ex-dividend dates within the accumulation period for such distribution (the “Accumulation Period”), net of expenses and liabilities for such period, as if all of the Fund Securities had been held by the Trust for the entire Accumulation Period. The Accumulation Period begins on the ex-dividend date for the Fund and ends on the next ex-dividend date.

The Administrator, through the NSCC, makes available on each Business Day, immediately prior to the opening of business on the Exchange (currently 9:30 a.m. Eastern time), the list of the names and the required number of shares of each Deposit Security to be included in the current Fund Deposit (based on information at the end of the previous Business Day) as well as the Cash Component for the Fund. Such Fund Deposit is applicable, subject to any adjustments as described below, in order to effect creations of Creation Units of the Fund until such time as the next-announced Fund Deposit composition is made available.

The identity and number of shares of the Deposit Securities required for the Fund Deposit for the Fund changes as rebalancing adjustments and corporate action events are reflected from time to time by the Adviser with a view to the investment objective of the Fund. The composition of the Deposit Securities may also change in response to adjustments to the weighting or composition of the securities constituting the Index. In addition, the Trust reserves the right to accept a basket of securities or cash that differs from Deposit Securities or to permit or require the substitution of an amount of cash (i.e., a “cash in lieu” amount) to be added to the Cash Component to replace any Deposit Security which may, among other reasons, not be available in sufficient quantity for delivery, not be permitted to be re-registered in the name of the Trust as a result of an in-kind creation order pursuant to local law or market convention or which may not be eligible for transfer through the Clearing Process (described below), or which may not be eligible for trading by a Participating Party (defined below). In light of the foregoing, in order to

seek to replicate the in-kind creation order process, the Trust expects to purchase the Deposit Securities represented by the cash in lieu amount in the secondary market (“Market Purchases”). In such cases where the Trust makes Market Purchases because a Deposit Security may not be permitted to be re-registered in the name of the Trust as a result of an in-kind creation order pursuant to local law or market convention, or for other reasons, the Authorized Participant will reimburse the Trust for, among other things, any difference between the market value at which the securities were purchased by the Trust and the cash in lieu amount (which amount, at the Adviser’s discretion, may be capped), applicable registration fees and taxes. Brokerage commissions incurred in connection with the Trust’s acquisition of Deposit Securities will be at the expense of the Fund and will affect the value of all Shares of the Fund; but the Adviser may adjust the transaction fee to the extent the composition of the Deposit Securities changes or cash in lieu is added to the Cash Component to protect ongoing shareholders. The adjustments described above will reflect changes, known to the Adviser on the date of announcement to be in effect by the time of delivery of the Fund Deposit, in the composition of the Index or resulting from stock splits and other corporate actions.

In addition to the list of names and numbers of securities constituting the current Deposit Securities of the Fund Deposit, the Administrator, through the NSCC, also makes available (i) on each Business Day, the Dividend Equivalent Payment, if any, and the estimated Cash Component effective through and including the previous Business Day, per outstanding Shares of the Fund, and (ii) on a continuous basis throughout the day, the Indicative Per Share Portfolio Value.

Procedures for Creation of Creation Units

To be eligible to place orders with the Distributor to create Creation Units of the Fund, an entity or person either must be (1) a “Participating Party,” *i.e.*, a broker-dealer or other participant in the Clearing Process through the Continuous Net Settlement System of the NSCC; or (2) a DTC Participant (see “Book Entry Only System”); and, in either case, must have executed an agreement with the Distributor and the Transfer Agent with respect to creations and redemptions of Creation Units (as it may be amended from time to time in accordance with its terms) (“Participant Agreement”) (discussed below). A Participating Party and DTC Participant are collectively referred to as an “Authorized Participant.” All Creation Units of the Fund, however created, will be entered on the records of the Depository in the name of Cede & Co. for the account of a DTC Participant.

All orders to create Creation Units must be placed in multiples of 50,000 Shares of the Fund (*i.e.*, a Creation Unit). All orders to create Creation Units, whether through the Clearing Process or outside the Clearing Process, must be received by the Distributor no later than the closing time of the regular trading session on the Exchange (“Closing Time”) (ordinarily 4:00 p.m. Eastern time) on the date such order is placed in order for creation of Creation Units to be effected based on the NAV of the Fund as determined on such date. A “Custom Order” may be placed by an Authorized Participant in the event that the Trust permits or requires the substitution of an amount of cash to be added to the Cash Component to replace any Deposit Security which may not be available in sufficient quantity for delivery or which may not be eligible for trading by such Authorized Participant or the investor for which it is acting, or other relevant reason. The Business Day on which a creation order (or order to redeem as discussed below) is placed is herein referred to as the “Transmittal Date.” Orders must be transmitted by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement, as described below (see “-Placement of Creation Orders Using Clearing Process”). Severe economic or market disruptions or changes, or telephone or other communication failure, may impede the ability to reach the Distributor, a Participating Party or a DTC Participant.

Creation Units may be created in advance of the receipt by the Trust of all or a portion of the Fund Deposit. In such cases, the Authorized Participant will remain liable for the full deposit of the

34

missing portion(s) of the Fund Deposit and will be required to post collateral with the Trust consisting of cash at least equal to a percentage of the marked-to-market value of such missing portion(s) that is specified in the Participant Agreement. The Trust may use such collateral to buy the missing portion(s) of the Fund Deposit at any time and will subject such Authorized Participant to liability for any shortfall between the cost to the Trust of purchasing such securities and the value of such collateral. The Trust will have no liability for any such shortfall. The Trust will return any unused portion of the collateral to the Authorized Participant once the entire Fund Deposit has been properly received by the Distributor and deposited into the Trust.

Orders to create Creation Units of the Fund shall be placed with a Participating Party or DTC Participant, as applicable, in the form required by such Participating Party or DTC Participant. Investors should be aware that their particular broker may not have executed a Participant Agreement, and that, therefore, orders to create Creation Units of the Fund may have to be placed by the investor's broker through a Participating Party or a DTC Participant who has executed a Participant Agreement. At any given time there may be only a limited number of broker-dealers that have executed a Participant Agreement. Those placing orders to create Creation Units of the Fund through the Clearing Process should afford sufficient time to permit proper submission of the order to the Distributor prior to the Closing Time on the Transmittal Date.

Orders for creation that are effected outside the Clearing Process are likely to require transmittal by the DTC Participant earlier on the Transmittal Date than orders effected using the Clearing Process. Those persons placing orders outside the Clearing Process should ascertain the deadlines applicable to DTC and the Federal Reserve Bank wire system by contacting the operations department of the broker or depository institution effectuating such transfer of Deposit Securities and Cash Component.

Placement of Creation Orders Using Clearing Process

Fund Deposits must be delivered through a DTC Participant that has executed a Participant Agreement with the Distributor and with the Trust. A DTC Participant who wishes to place an order creating Creation Units of the Fund need not be a Participating Party, but such orders must state that the creation of Creation Units will be effected through a transfer of securities and cash. The Fund Deposit transfer must be ordered by the DTC Participant in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities through DTC to the account of the Trust by no later than 4:00 p.m. Eastern time, on the Settlement Date. The "Settlement Date" for the Fund is generally the third Business Day following the Transmittal Date. All questions as to the number of Deposit Securities to be delivered, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities, will be determined by the Trust, whose determination shall be final and binding. The cash equal to the Cash Component must be transferred directly to the Distributor through the Federal Reserve wire system in a timely manner so as to be received by the Distributor no later than 4:00 p.m. Eastern time, on the next Business Day immediately following the Transmittal Date. An order to create Creation Units of the Fund is deemed received by the Distributor on the Transmittal Date if (i) such order is received by the Distributor not later than the Closing Time on such Transmittal Date; and (ii) all other procedures set forth in the Participant Agreement are properly followed. Upon written notice to the Distributor, such cancelled order may be resubmitted the following Business Day using a Fund Deposit as newly constituted to reflect the current NAV of the Fund. The delivery of Creation Units so created will occur no later than the third (3rd) Business Day following the day on which the creation order is deemed received by the Distributor.

Placement of Creation Orders Outside Clearing Process

Fund Deposits created outside the Clearing Process must be delivered through a DTC Participant that has executed a Participant Agreement. A DTC Participant who wishes to place an order creating Creation Units of the Fund to be effected outside the Clearing Process need not be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that the creation of Creation Units will instead be effected through a transfer of securities and cash. The Fund Deposit transfer must be ordered by the DTC Participant in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities through DTC to the account of the Trust by no later than 11:00 a.m. Eastern time, of the next Business Day immediately following the Transmittal Date. All questions as to the number of Deposit Securities to be delivered, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities, will be determined by the Trust, whose determination shall be final and binding. The cash equal to the Cash Component must be transferred directly to the Distributor through the Federal Reserve wire system in a timely manner so as to be received by the Distributor no later than 2:00 p.m. Eastern time, on the next Business Day immediately following the Transmittal Date. An order to create Creation Units of the Fund outside the Clearing Process is deemed received by the Distributor on the Transmittal Date if (i) such order is received by the Distributor not later than the Closing Time on such Transmittal Date; and (ii) all other procedures set forth in the Participant Agreement are properly followed. However, if the Distributor does not receive both the requisite Deposit Securities and the Cash Component in a timely fashion on the next Business Day immediately following the Transmittal Date, such order will be cancelled. Upon written notice to the Distributor, such cancelled order may be resubmitted the following Business Day using a Fund Deposit as newly constituted to reflect the current NAV of the Fund. The delivery of Creation Units so created will occur no later than the third (3rd) Business Day following the day on which the creation order is deemed received by the Distributor.

Additional transaction fees may be imposed with respect to transactions effected outside the Clearing Process (through a DTC participant) and in circumstances in which any cash can be used in lieu of Deposit Securities to create Creation Units. (See "Creation Transaction Fee" section below.)

Acceptance of Creation Orders

The Trust reserves the absolute right to reject a creation order transmitted to it by the Distributor if, for any reason, (a) the order is not in proper form; (b) the creator or creators, upon obtaining the Shares, would own 80% or more of the currently outstanding Shares of the Fund; (c) the Deposit Securities delivered are not as specified by the Administrator, as described above; (d) the acceptance of the Deposit Securities would have certain adverse tax consequences to the Fund; (e) the acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (f) the acceptance of the Fund Deposit would otherwise, in the discretion of the Trust or the Adviser, have an adverse effect on the Trust or the rights of beneficial owners; or (g) in the event that circumstances outside the control of the Trust, the Distributor and the Adviser make it for all practical purposes impossible to process creation orders. Examples of such circumstances include, without limitation, acts of God or public service or utility problems such as earthquakes, fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; wars; civil or military disturbances, including acts of civil or military authority or governmental actions; terrorism; sabotage; epidemics; riots; labor disputes; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, the Adviser, the Distributor, DTC, the NSCC or any other participant in the creation process, and similar extraordinary events. The Transfer Agent

will notify a prospective creator of its rejection of the order of such person. The Trust, the Custodian, any subcustodian, the Distributor and the Transfer Agent are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund

Deposits to Authorized Participants nor shall any of them incur any liability to Authorized Participants for the failure to give any such notification.

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust, and the Trust's determination shall be final and binding.

Creation Transaction Fee

A fixed creation transaction fee of \$500 payable to the Custodian is imposed on each creation transaction regardless of the number of Creation Units purchased in the transaction. In addition, a variable charge for cash creations or for creations outside the Clearing Process currently of up to four times the basic creation transaction fee may be imposed. In the case of cash creations or where the Trust permits or requires a creator to substitute cash in lieu of depositing a portion of the Deposit Securities, the creator may be assessed an additional variable charge to compensate the Fund for the costs associated with purchasing the applicable securities. (See "Fund Deposit" section above.) As a result, in order to seek to replicate the in-kind creation order process, the Trust expects to purchase, in the secondary market or otherwise gain exposure to, the portfolio securities that could have been delivered as a result of an in-kind creation order pursuant to local law or market convention, or for other reasons ("Market Purchases"). In such cases where the Trust makes Market Purchases, the Authorized Participant will reimburse the Trust for, among other things, any difference between the market value at which the securities and/or financial instruments were purchased by the Trust and the cash in lieu amount (which amount, at the Adviser's discretion, may be capped), applicable registration fees, brokerage commissions and certain taxes. The Adviser may adjust the transaction fee to the extent the composition of the creation securities changes or cash in lieu is added to the Cash Component to protect ongoing shareholders. Creators of Creation Units are responsible for the costs of transferring the securities constituting the Deposit Securities to the account of the Trust.

Redemption of Creation Units

Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Distributor, only on a Business Day and only through a Participating Party or DTC Participant who has executed a Participant Agreement. **The Trust will not redeem Shares in amounts less than Creation Units.** Beneficial Owners also may sell Shares in the secondary market, but must accumulate enough Shares to constitute a Creation Unit in order to have such Shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of Shares to constitute a redeemable Creation Unit. See the section entitled "Summary Information-Principal Risks of Investing in the Fund" and "Additional Information About the Fund's Investment Strategies and Risks-Risks of Investing in the Fund" in the Prospectus.

The Administrator, through NSCC, makes available immediately prior to the opening of business on the Exchange (currently 9:30 a.m. Eastern time) on each day that the Exchange is open for business, the Fund Securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day. An Authorized Participant submitting a redemption request is deemed to represent to the Trust that it (or its client) (i) owns outright or has full legal authority and legal beneficial right to tender for redemption the requisite number of Fund Shares to be redeemed and can receive the entire proceeds of the redemption, and (ii) the Fund Shares to be redeemed have not been loaned or pledged to another party nor are they the subject of a repurchase agreement, securities lending agreement or such other arrangement that would preclude the delivery of

such Fund Shares to the Trust. The Trust reserves the right to verify these representations at its discretion, but will typically require verification with respect to a redemption request from the Fund in connection with higher levels of redemption activity and/or short interest in the Fund. If the Authorized Participant, upon receipt of a verification request, does not provide sufficient verification of its representations as determined by the Trust, the redemption request will not be considered to have been received in proper form and may be rejected by the Trust.

Unless cash redemptions are permitted or required for the Fund, the redemption proceeds for a Creation Unit generally consist of Fund Securities as announced by the Administrator on the Business Day of the request for redemption, plus cash in an amount equal to the difference between the NAV of the Shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Fund Securities, less the redemption transaction fee and variable fees described below. Should the Fund Securities have a value greater than the NAV of the Shares being redeemed, a compensating cash payment to the Trust equal to the differential plus the applicable redemption transaction fee will be required to be arranged for by or on behalf of the redeeming shareholder. The Fund reserves the right to honor a redemption request by delivering a basket of securities or cash that differs from the Fund Securities.

Redemption Transaction Fee

The basic redemption transaction fee of \$500 is the same no matter how many Creation Units are being redeemed pursuant to any one redemption request. An additional charge up to four times the redemption transaction fee will be charged with respect to cash redemptions or redemptions outside of the Clearing Process. An additional variable charge for cash redemptions or partial cash redemptions (when cash redemptions are permitted or required for the Fund) may also be imposed to compensate the Fund for the costs associated with selling the applicable securities. As a result, in order to seek to replicate the in-kind redemption order process, the Trust expects to sell, in the secondary market, the portfolio securities or settle any financial instruments that may not be permitted to be re-registered in the name of the Participating Party as a result of an in-kind redemption order pursuant to local law or market convention, or for other reasons (“Market Sales”). In such cases where the Trust makes Market Sales, the Authorized Participant will reimburse the Trust for, among other things, any difference between the market value at which the securities and/or financial instruments were sold or settled by the Trust and the cash in lieu amount (which amount, at the Adviser’s discretion, may be capped), applicable registration fees, brokerage commissions and certain taxes (“Transaction Costs”). The Adviser may adjust the transaction fee to the extent the composition of the redemption securities changes or cash in lieu is added to the Cash Component to protect ongoing shareholders. In no event will fees charged by the Fund in connection with a redemption exceed 2% of the value of each Creation Unit. Investors who use the services of a broker or other such intermediary may be charged a fee for such services. To the extent the Fund cannot recoup the amount of Transaction Costs incurred in connection with a redemption from the redeeming shareholder because of the 2% cap or otherwise, those Transaction Costs will be borne by the Fund’s remaining shareholders and negatively affect the Fund’s performance.

Placement of Redemption Orders

Orders to redeem Creation Units of the Fund must be delivered through a DTC Participant that has executed a Participant Agreement with the Distributor and with the Trust. A DTC Participant who wishes to place an order for

redemption of Creation Units of the Fund to be effected need not be a Participating Party, but such orders must state that redemption of Creation Units of the Fund will instead be effected through transfer of Creation Units of the Fund directly through DTC. An order to redeem Creation Units of the Fund is deemed received by the Administrator on the Transmittal Date if (i) such order is received by the Administrator not later than 4:00 p.m. Eastern time on such Transmittal Date;

(ii) such order is preceded or accompanied by the requisite number of Shares of Creation Units specified in such order, which delivery must be made through DTC to the Administrator no later than 11:00 a.m. Eastern time, on such Transmittal Date (the “DTC Cut-Off-Time”); and (iii) all other procedures set forth in the Participant Agreement are properly followed.

After the Administrator has deemed an order for redemption received, the Administrator will initiate procedures to transfer the requisite Fund Securities (or contracts to purchase such Fund Securities) which are expected to be delivered within three Business Days and the cash redemption payment to the redeeming Beneficial Owner by the third Business Day following the Transmittal Date on which such redemption order is deemed received by the Administrator.

Placement of Redemption Orders Outside Clearing Process

Orders to redeem Creation Units of the Fund outside the Clearing Process must be delivered through a DTC Participant that has executed a Participant Agreement. A DTC Participant who wishes to place an order for redemption of Creation Units of the Fund to be effected outside the Clearing Process need not be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that redemption of Creation Units of the Fund will instead be effected through transfer of Creation Units of the Fund directly through DTC. An order to redeem Creation Units of the Fund outside the Clearing Process is deemed received by the Administrator on the Transmittal Date if (i) such order is received by the Administrator not later than 4:00 p.m. Eastern time on such Transmittal Date; (ii) such order is preceded or accompanied by the requisite number of Shares of Creation Units specified in such order, which delivery must be made through DTC to the Administrator no later than 11:00 a.m. Eastern time, on such Transmittal Date (the “DTC Cut-Off-Time”); and (iii) all other procedures set forth in the Participant Agreement are properly followed.

After the Administrator has deemed an order for redemption outside the Clearing Process received, the Administrator will initiate procedures to transfer the requisite Fund Securities (or contracts to purchase such Fund Securities) which are expected to be delivered within three Business Days and the cash redemption payment to the redeeming Beneficial Owner by the third Business Day following the Transmittal Date on which such redemption order is deemed received by the Administrator. An additional variable redemption transaction fee of up to four times the basic transaction fee is applicable to redemptions outside the Clearing Process.

DETERMINATION OF NET ASSET VALUE

The following information supplements and should be read in conjunction with the section in the Prospectus entitled “Shareholder Information-Determination of NAV.”

The NAV per Share for the Fund is computed by dividing the value of the net assets of the Fund (i.e., the value of its total assets less total liabilities) by the total number of Shares outstanding. Expenses and fees, including the management fee, are accrued daily and taken into account for purposes of determining NAV. The NAV of the Fund is determined each business day as of the close of trading (ordinarily 4:00 p.m., Eastern time) on the Exchange. Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

The values of the Fund’s portfolio securities are based on the securities’ closing prices, on the markets on which the securities trade, when available. In the absence of a last reported sales price, or if no sales were reported, and for other assets for which market quotes are not readily available, values may be based on quotes obtained from a quotation reporting system, established market makers or by an outside independent pricing service. Fixed income securities are normally valued on the basis of quotes from brokers or dealers, established market makers or an outside independent pricing service using data reflecting the earlier closing of the principal markets for those securities. Prices obtained by an outside independent pricing service may use information provided by market makers or estimates of market values obtained from yield data related to investments or securities with similar characteristics and may use a computerized grid matrix of securities and its evaluations in determining what it believes is the fair value of the portfolio securities. Short-term investments having a maturity of 60 days or less are valued at amortized cost. If a market quotation for a security is not readily available or the Adviser believes it does not otherwise accurately reflect the market value of the security at the time the Fund calculates its NAV, the security will be fair valued by the Adviser in accordance with the Trust’s valuation policies and procedures approved by the Board of Trustees. The Fund may also use fair value pricing in a variety of circumstances, including but not limited to, situations when the value of a security in the Fund’s portfolio has been materially affected by events occurring after the close of the market on which the security is principally traded (such as a corporate action or other news that may materially affect the price of a security) or trading in a security has been suspended or halted. In addition, the Fund currently expects that it will fair value certain of such securities held by the Fund, if any, each day the Fund calculates its NAV, except those securities principally traded on exchanges that close at the same time the Fund calculates its NAV. Accordingly, the Fund’s NAV may reflect certain portfolio securities’ fair values rather than their market prices at the time the exchanges on which they principally trade close. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security. In addition, fair value pricing could result in a difference between the prices used to calculate the Fund’s NAV and the prices used by the Index. This may adversely affect the Fund’s ability to track the Index.

DIVIDENDS AND DISTRIBUTIONS

The following information supplements and should be read in conjunction with the section in the Prospectus entitled “Shareholder Information-Distributions.”

General Policies

Dividends from net investment income, if any, are declared and paid monthly by the Fund. Distributions of net realized capital gains, if any, generally are declared and paid once a year, but the Trust may make distributions on a more frequent basis for the Fund to improve its Index tracking or to comply with the distribution requirements of the Internal Revenue Code, in all events in a manner consistent with the provisions of the 1940 Act. It is currently expected that the Fund will distribute virtually all of its net income (interest less expenses) monthly while capital gains distributions will generally occur annually in December. In addition, in situations where the Fund acquired investment securities after the beginning of the dividend period, the Fund may elect to distribute at least annually amounts representing the full dividend yield on the underlying portfolio securities of the Fund, net of expenses of the Fund, as if the Fund owned such underlying portfolio securities for the entire dividend period. If the Fund so elects, in which case some portion of each distribution may result in a return of capital, which, for tax purposes, is treated as a return of your investment in Shares.

Dividends and other distributions on Shares are distributed, as described below, on a pro rata basis to Beneficial Owners of such Shares. Dividend payments are made through DTC Participants and Indirect Participants to Beneficial Owners then of record with proceeds received from the Trust. The Trust makes additional distributions to the minimum extent necessary (i) to distribute the entire annual taxable income and net-tax exempt interest income of the Trust, plus any net capital gains and (ii) to avoid imposition of the excise tax imposed by Section 4982 of the Internal Revenue Code. Management of the Trust reserves the right to declare special dividends if, in its reasonable discretion, such action is necessary or advisable to preserve the status of the Fund as a regulated investment company (“RIC”) or to avoid imposition of income or excise taxes on undistributed income.

DIVIDEND REINVESTMENT SERVICE

No reinvestment service is provided by the Trust. Broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by Beneficial Owners of the Fund through DTC Participants for reinvestment of their dividend distributions. If this service is used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole Shares of the Fund. Beneficial Owners should contact their broker to determine the availability and costs of the service and the details of participation therein. Brokers may require Beneficial Owners to adhere to specific procedures and timetables.

CONTROL PERSONS and principal shareholders

As of the date of this SAI, no entity beneficially owned any voting securities of the Fund.

TAXES

The following information also supplements and should be read in conjunction with the section in the Prospectus entitled “Shareholder Information-Tax Information” and the section in this Statement of Additional Information entitled “Special Considerations and Risks.” The following summary of certain relevant tax provisions is subject to change, and does not constitute legal or tax advice.

41

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

The Fund intends to qualify for and to elect treatment as a RIC under Subchapter M of the Internal Revenue Code. As a RIC, the Fund will not be subject to U.S. federal income tax on the portion of its taxable investment income and capital gains that it distributes to its shareholders. To qualify for treatment as a RIC, a company must annually distribute at least 90% of its investment company taxable income (which includes dividends, interest and net short-term capital gains) and at least 90% of its tax-exempt interest income, for each tax year, if any, to its shareholders and meet several other requirements relating to the nature of its income and the diversification of its assets, among others. If the Fund fails to qualify for any taxable year as a RIC, all of its taxable income will be subject to tax at regular corporate income tax rates without any deduction for distributions to shareholders, and such distributions generally will be taxable to shareholders as ordinary dividends to the extent of the Fund's current and accumulated earnings and profits.

The Fund will be subject to a 4% excise tax on certain undistributed income if it does not distribute to its shareholders in each calendar year an amount at least equal to the sum of 98% of its ordinary income (taking into account certain deferrals and elections) for the calendar year, 98.2% of its capital gain net income for the twelve months ended October 31 of such year, and 100% of any undistributed amounts from the prior years. Although the Fund generally intends to declare and distribute dividends and distributions in the amounts and at the times necessary to avoid the application of this 4% excise tax, the Fund may elect to retain a portion of its income and gains, and in such case, the Fund may be subject to excise tax.

As a result of U.S. federal income tax requirements, the Trust on behalf of the Fund, has the right to reject an order for a creation of Shares if the creator (or group of creators) would, upon obtaining the Shares so ordered, own 80% or more of the outstanding Shares of the Fund and if, pursuant to Section 351 of the Internal Revenue Code, the Fund would have a basis in the Deposit Securities different from the market value of such securities on the date of deposit. The Trust also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. See "Creation and Redemption of Creation Units-Procedures for Creation of Creation Units."

The Fund will report to shareholders annually the amounts of dividends received from ordinary income, tax-exempt income and the amount of distributions received from capital gains and the portion of dividends, if any, which may qualify for the dividends received deduction. Certain ordinary dividends paid to non-corporate shareholders may qualify for taxation at a lower tax rate applicable to long-term capital gains provided holding period and other requirements are met at both the shareholder and Fund levels. The Fund does not expect that any of its distributions will be qualified dividends eligible for lower tax rates or for the corporate dividends received deduction.

In general, a sale of Shares results in capital gain or loss, and for individual shareholders, is taxable at a federal rate dependent upon the length of time the Shares were held. A redemption of a shareholder's Fund Shares is normally treated as a sale for tax purposes. Fund Shares held for a period of one year or less at the time of such sale or redemption will, for tax purposes, generally result in short-term capital gains or losses, and those held for more than one year will generally result in long-term capital gains or losses. The maximum tax rate on long-term capital gains available to a non-corporate shareholder generally is 15% or 20%, depending on whether the shareholder's income exceeds certain threshold amounts.

Special tax rules may change the normal treatment of gains and losses recognized by the Fund if the Fund makes certain investments such as investments in structured notes, swaps, options, futures transactions. Those special tax rules can, among other things, affect the treatment of capital gain or loss as long-term or short-term and may result in ordinary income or loss rather than capital gain or loss and may accelerate when the Fund has to take these items into account for U.S. federal income tax purposes. The application of these special rules would therefore also affect the timing and character of distributions made by the Fund. See "U.S. Federal Tax Treatment of Futures Contracts" for certain federal income tax rules regarding futures contracts.

There may be uncertainty as to the appropriate treatment of certain of the Fund's investments for U.S. federal income tax purposes. In particular, the Fund may invest a portion of its net assets in below investment grade instruments. Investments in these types of instruments may present special tax issues for the Fund. U.S. federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless instruments, how payments received on obligations in default should be allocated between principal and income and whether exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other issues will be addressed by the Fund, to the extent necessary, in order to seek to ensure that it distributes sufficient income to ensure that it does not become subject to U.S. federal income or excise tax.

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Fund Shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts.

If at the end of each quarter of the taxable year of a RIC, 50% or more of the assets, by value, of the RIC are either (i) state, municipal and other bonds that pay interest that is exempt from federal income tax, or (ii) interests in other RICs, the RIC may designate a portion of its dividends as exempt-interest dividends. The Fund expects to be eligible to make such designations with respect to a substantial amount of the income each receives. The portion of the dividends that are designated as being exempt-interest dividends generally will be exempt from federal income tax and may be exempt from state and local taxation. Depending on a shareholder's state of residence, exempt-interest dividends paid by the Fund from interest earned on municipal securities of that state, or its political subdivision, may be exempt in the hands of such shareholder from income tax in that state and its localities. However, income from municipal securities of states other than the shareholder's state of residence generally will not qualify for this treatment.

Interest on indebtedness incurred by a shareholder to purchase or carry shares of the Fund will not be deductible for U.S. federal income tax purposes. In addition, the IRS may require a shareholder in the Fund that receives exempt-interest dividends to treat as taxable income a portion of certain otherwise non-taxable social security and railroad retirement benefit payments. In addition, the receipt of dividends and distributions from the Fund may affect a foreign corporate shareholder's federal "branch profits" tax liability and the federal "excess net passive income" tax liability of a shareholder of a Subchapter S corporation. Shareholders should consult their own tax advisers as to whether they are (i) "substantial users" with respect to a facility or "related" to such users within the meaning of the IRC or (ii) subject to the federal "branch profits" tax, or the deferral "excess net passive income" tax.

The Fund may invest a portion of its assets in certain "private activity bonds." As a result, a portion of the exempt-interest dividends paid by the Fund will be an item of tax preference to shareholders subject to the alternative minimum tax. Certain corporations which are subject to the alternative minimum tax may also have to include exempt-interest dividends in calculating their alternative minimum taxable income in situations where the "adjusted current earnings" of the corporation exceeds its alternative minimum taxable income. However, the alternative minimum tax consequences discussed in this paragraph do not apply with respect to interest paid on bonds issued after December 31, 2008 and before January 1, 2011 (including refunding bonds issued during that period to refund bonds originally issued after December 31, 2003 and before January 1, 2009).

Shares of the Fund generally would not be suitable for tax-exempt institutions or tax-deferred retirement plans (e.g., plans qualified under Section 401 of the Internal Revenue Code, and individual retirement accounts). Such retirement plans would not gain any benefit from the tax-exempt nature of the Fund's dividends because such dividends would be ultimately taxable to beneficiaries when distributed to them.

Gain or loss on the sale or redemption of Fund Shares is measured by the difference between the amount of cash received (or the fair market value of any property received) and the adjusted tax basis of the Shares. Shareholders should keep records of investments made (including Shares acquired through reinvestment of dividends and distributions) so they can compute the tax basis of their Fund Shares. Legislation passed by Congress requires reporting of adjusted cost basis information for covered securities, which generally include shares of a regulated investment company acquired after January 1, 2012, to the Internal Revenue Service and to taxpayers. Shareholders should contact their financial intermediaries with respect to reporting of cost basis and available elections for their accounts.

A loss realized on a sale or exchange of Shares of the Fund may be disallowed if other Fund Shares or substantially identical shares are acquired (whether through the automatic reinvestment of dividends or otherwise) within a sixty-one (61) day period beginning thirty (30) days before and ending thirty (30) days after the date that the Shares are disposed of. In such a case, the basis of the Shares acquired will be adjusted to reflect the disallowed loss. Any loss upon the sale or exchange of Shares held for six (6) months or less will be treated as long-term capital loss to the extent of any capital gain dividends received by the shareholders. Distribution of ordinary income and capital gains may also be subject to foreign, state and local taxes. If a shareholder receives exempt interest dividends with respect to any Share of the Fund and if the Share is held by the shareholder for six months or less, then any loss on the sale or exchange of the Share may, to the extent of the exempt interest dividends, be disallowed.

Any market discount recognized on a bond is taxable as ordinary income. A market discount bond is a bond acquired in the secondary market at a price below redemption value or adjusted issue price if issued with original issue discount. Absent an election by the Fund to include the market discount in income as it accrues, gain on the Fund's disposition of such an obligation will be treated as ordinary income rather than capital gain to the extent of the accrued market discount.

The Fund may make investments in which it recognizes income or gain prior to receiving cash with respect to such investment. For example, under certain tax rules, the Fund may be required to accrue a portion of any discount at which certain securities are purchased as income each year even though the Fund receives no payments in cash on the security during the year. To the extent that the Fund makes such investments, it generally would be required to pay out such income or gain as a distribution in each year to avoid taxation at the Fund level.

Distributions reinvested in additional Fund Shares through the means of a dividend reinvestment service (see "Dividend Reinvestment Service") will nevertheless be taxable dividends to Beneficial Owners acquiring such additional Shares to the same extent as if such dividends had been received in cash.

Some shareholders may be subject to a withholding tax on distributions of ordinary income, capital gains and any cash received on redemption of Creation Units ("backup withholding"). The backup withholding rate for individuals is currently 28%. Generally, shareholders subject to backup withholding will be those for whom no certified taxpayer identification number is on file with the Fund or who, to the Fund's knowledge, have furnished an incorrect number. When establishing an account, an investor must certify under penalty of perjury that such number is correct and that such investor is not otherwise subject to backup withholding. Backup withholding is not an additional tax. Any

amounts withheld will be allowed as a credit against shareholders' U.S. federal income tax liabilities, and may entitle them to a refund, provided that the required information is timely furnished to the Internal Revenue Service.

Distributions of ordinary income paid to shareholders who are nonresident aliens or foreign entities will generally be subject to a 30% U.S. withholding tax unless a reduced rate of withholding or a

withholding exemption is provided under applicable treaty law. Prospective investors are urged to consult their tax advisors regarding such withholding.

Under an exemption recently made permanent by Congress, properly designated dividends received by a nonresident alien or foreign entity were generally exempt from U.S. federal withholding tax when they (i) are paid in respect of the Fund's "qualified net interest income" (generally, the Fund's U.S. source interest income, reduced by expenses that are allocable to such income), or (ii) are paid in connection with the Fund's "qualified short-term capital gains" (generally, the excess of the Fund's net short-term capital gain over the Fund's long-term capital loss for such taxable year). However, depending on the circumstances, the Fund may designate all, some or none of the Fund's potentially eligible dividends as such qualified net interest income or as qualified short-term capital gains, and a portion of the Fund's distributions (e.g. interest from non-U.S. sources or any foreign currency gains) would be ineligible for this potential exemption from withholding.

As part of the Foreign Account Tax Compliance Act, ("FATCA"), the Fund may be required to withhold 30% on certain types of U.S. sourced income (e.g., dividends, interest, and other types of passive income), and after January 1, 2019 proceeds from the sale or other disposition of property producing U.S. sourced income and certain capital gain dividends to (i) foreign financial institutions ("FFIs"), including non-U.S. investment funds, unless they agree to collect and disclose to the Internal Revenue Service ("IRS") information regarding their direct and indirect U.S. account holders and (ii) certain nonfinancial foreign entities ("NFFEs"), unless they certify certain information regarding their direct and indirect U.S. owners. To avoid possible withholding, FFIs will need to enter into agreements with the IRS which state that they will provide the IRS information, including the names, account numbers and balances, addresses and taxpayer identification numbers of U.S. account holders and comply with due diligence procedures with respect to the identification of U.S. accounts as well as agree to withhold tax on certain types of withholdable payments made to non-compliant foreign financial institutions or to applicable foreign account holders who fail to provide the required information to the IRS, or similar account information and required documentation to a local revenue authority, should an applicable intergovernmental agreement be implemented. NFFEs will need to provide certain information regarding each substantial U.S. owner or certifications of no substantial U.S. ownership, unless certain exceptions apply, or agree to provide certain information to the IRS.

While some parts of the FATCA rules have not been finalized, the Fund may be subject to the FATCA withholding obligation, and also will be required to perform extensive due diligence reviews to classify foreign entity investors for FATCA purposes. Investors are required to agree to provide information necessary to allow the Fund to comply with FATCA rules. If the Fund is required to withhold amounts from payments pursuant to FATCA, investors will receive distributions that are reduced by such withholding amounts.

Non-U.S. shareholders are advised to consult their tax advisors with respect to the particular tax consequences to them of an investment in the Fund, including the possible applicability of the U.S. estate tax.

The foregoing discussion is a summary only and is not intended as a substitute for careful tax planning. Purchasers of Shares of the Fund should consult their own tax advisers as to the tax consequences of investing in such Shares, including under state, local and other tax laws. Finally, the foregoing discussion is based on applicable provisions of

the Internal Revenue Code, regulations, judicial authority and administrative interpretations in effect on the date hereof. Changes in applicable authority could materially affect the conclusions discussed above, and such changes often occur.

Reportable Transactions

Under promulgated Treasury regulations, if a shareholder recognizes a loss on disposition of the Fund's Shares of \$2 million or more in any one taxable year (or \$4 million or more over a period of six taxable years) for an individual shareholder or \$10 million or more in any taxable year (or \$20 million or more over a period of six taxable years) for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC that engaged in a reportable transaction are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. In addition, significant penalties may be imposed for the failure to comply with the reporting requirements. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

CAPITAL STOCK AND SHAREHOLDER REPORTS

The Trust currently is comprised of [] investment portfolios. The Trust issues Shares of beneficial interest with no par value. The Board may designate additional funds of the Trust.

Each Share issued by the Trust has a pro rata interest in the assets of the Fund. Shares have no pre-emptive, exchange, subscription or conversion rights and are freely transferable. Each Share is entitled to participate equally in dividends and distributions declared by the Board with respect to the Fund, and in the net distributable assets of the Fund on liquidation. The Fund may liquidate and terminate at any time and for any reason, including as a result of the termination of the license agreement between the Adviser and the Index Provider, without shareholder approval.

Each Share has one vote with respect to matters upon which a shareholder vote is required consistent with the requirements of the 1940 Act and the rules promulgated thereunder and each fractional Share has a proportional fractional vote. Shares of all funds vote together as a single class except that if the matter being voted on affects only a particular fund it will be voted on only by that fund, and if a matter affects a particular fund differently from other funds, that fund will vote separately on such matter. Under Delaware law, the Trust is not required to hold an annual meeting of shareholders unless required to do so under the 1940 Act. The policy of the Trust is not to hold an annual meeting of shareholders unless required to do so under the 1940 Act. All Shares of the Trust have noncumulative voting rights for the election of Trustees. Under Delaware law, Trustees of the Trust may be removed by vote of the shareholders.

Under Delaware law, the shareholders of the Fund are not generally subject to liability for the debts or obligations of the Trust. Similarly, Delaware law provides that the Fund will not be liable for the debts or obligations of any other series of the Trust. However, no similar statutory or other authority limiting statutory trust shareholder liability may exist in other states. As a result, to the extent that a Delaware statutory trust or a shareholder is subject to the

jurisdiction of courts of such other states, the courts may not apply Delaware law and may thereby subject the Delaware statutory trust's shareholders to liability for the debts or obligations of the Trust. The Trust's Amended and Restated Declaration of Trust (the "Declaration of Trust") provides for indemnification by the Fund for all loss suffered by a shareholder as a result of an obligation of the Fund. The Declaration of Trust also provides that the Fund shall, upon request, assume the defense of any claim made against any shareholder for any act or obligation of the Fund and satisfy any judgment thereon.

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

The Trust will issue through DTC Participants to its shareholders semi-annual reports containing unaudited financial statements and annual reports containing financial statements audited by an independent auditor approved by the Trust's Trustees and by the shareholders when meetings are held and such other information as may be required by applicable laws, rules and regulations. Beneficial Owners also receive annually notification as to the tax status of the Trust's distributions.

Shareholder inquiries may be made by writing to the Trust, c/o Van Eck Associates Corporation, 666 Third Avenue, 9th Floor, New York, New York 10017.

COUNSEL AND INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Dechert LLP, 1095 Avenue of the Americas, New York, New York 10036, is counsel to the Trust and has passed upon the validity of the Fund's Shares.

[], is the Trust's independent registered public accounting firm and audits the Fund's financial statements and performs other related audit services.

LICENSE AGREEMENT AND DISCLAIMERS

The information contained herein regarding the securities markets and DTC was obtained from publicly available sources.

BLOOMBERG is a trademark and service mark of Bloomberg Finance L.P. BARCLAYS is a trademark and service mark of Barclays Bank Plc (collectively with Barclays Capital Inc. and their affiliates “Barclays”), used under license. Bloomberg Finance L.P. and its affiliates (collectively, “Bloomberg”) or Bloomberg’s licensors own all proprietary rights in the Bloomberg Barclays AMT-Free National Municipal Index (the “BLOOMBERG BARCLAYS INDEX”). The BLOOMBERG BARCLAYS INDEX has been licensed for use in connection with the listing and trading of the VanEck Vectors AMT-Free National Municipal Index ETF (the “VanEck Vectors ETF”) on BATS Global Markets, Inc. (“BATS”). The VanEck Vectors ETF is not sponsored by, endorsed, sold or promoted by Bloomberg or Barclays and neither Bloomberg nor Barclays makes any representation regarding the advisability of investing in it. The only relationship to the Adviser with respect to the VanEck Vectors ETF is the licensing of certain trademarks and trade names of Bloomberg and Barclays and the BLOOMBERG BARCLAYS INDEX that is determined, composed and calculated by Bloomberg without regard to the Adviser or any investor in the VanEck Vectors ETF.

Neither Bloomberg nor Barclays guarantee the timeliness, accuracy or completeness of any data or information relating to the BLOOMBERG BARCLAYS INDEX or make any warranty, express or implied, as to the BLOOMBERG BARCLAYS INDEX or any data or values relating thereto or results to be obtained therefrom, and expressly disclaims all warranties of merchantability and fitness for a particular purpose with respect thereto. It is not possible to invest directly in an index. Back-tested performance is not actual performance. Past performance is not an indication of future results. To the maximum extent allowed by law, Bloomberg and its licensors, including Barclays, and their respective employees, contractors, agents, suppliers and vendors shall have no liability or responsibility whatsoever for any injury or damages - whether direct, indirect, consequential, incidental, punitive or otherwise - arising in connection with BLOOMBERG BARCLAYS INDEX or any data or values relating thereto - whether arising from their negligence or otherwise. Nothing in the BLOOMBERG BARCLAYS INDEX shall constitute or be construed as an offering of financial instruments or as investment advice or investment recommendations (*i.e.*, recommendations as to whether or not to “buy,” “sell,” “hold” or enter into any other transaction involving a specific interest) by Bloomberg or its affiliates or licensors or a recommendation as to an investment or other strategy. Data and other information available via the BLOOMBERG BARCLAYS INDEX should not be considered as information sufficient upon which to base an investment decision. All information provided by the BLOOMBERG BARCLAYS INDEX is impersonal and not tailored to the needs of any specific person, entity or group of persons. Bloomberg and its affiliates express no opinion on the future or expected value of any security or other interest and do not explicitly or implicitly recommend or suggest an investment strategy of any kind. In addition, Barclays is not the issuer or producer of the BLOOMBERG BARCLAYS INDEX and has no responsibilities, obligations or duties to investors in any products based on the index. Investors in products based on the BLOOMBERG BARCLAYS INDEX do not enter into any relationship with Barclays and Barclays does not sponsor, endorse, sell or promote, and Barclays makes no representation regarding the advisability or use of, the BLOOMBERG BARCLAYS INDEX or any data included therein. Customers should consider obtaining independent advice before making any financial decisions.

APPENDIX A

VANECK PROXY VOTING POLICIES

VanEck (the “Adviser”) has adopted the following policies and procedures which are reasonably designed to ensure that proxies are voted in a manner that is consistent with the best interests of its clients in accordance with its fiduciary duties and Rule 206(4)-6 under the Investment Advisers Act of 1940. When an adviser has been granted proxy voting authority by a client, the adviser owes its clients the duties of care and loyalty in performing this service on their behalf. The duty of care requires the adviser to monitor corporate actions and vote client proxies. The duty of loyalty requires the adviser to cast the proxy votes in a manner that is consistent with the best interests of the client.

Rule 206(4)-6 also requires the Adviser to disclose information about the proxy voting procedures to its clients and to inform clients how to obtain information about how their proxies were voted. Additionally, Rule 204-2 under the Advisers Act requires the Adviser to maintain certain proxy voting records.

An adviser that exercises voting authority without complying with Rule 206(4)-6 will be deemed to have engaged in a “fraudulent, deceptive, or manipulative” act, practice or course of business within the meaning of Section 206(4) of the Advisers Act.

The Adviser intends to vote all proxies in accordance with applicable rules and regulations, and in the best interests of clients without influence by real or apparent conflicts of interest. To assist in its responsibility for voting proxies and the overall voting process, the Adviser has engaged an independent third party proxy voting specialist, Glass Lewis & Co., LLC. The services provided by Glass Lewis include in-depth research, global issuer analysis, and voting recommendations as well as vote execution, reporting and recordkeeping.

Resolving Material Conflicts of Interest

When a material conflict of interest exists, proxies will be voted in the following manner:

1. Strict adherence to the Glass Lewis guidelines , or
2. The potential conflict will be disclosed to the client:
 - a. with a request that the client vote the proxy,
 - b. with a recommendation that the client engage another party to determine how the proxy should be voted or if the foregoing are not acceptable to the client, disclosure of how VanEck intends to vote and a written consent
 - c. to that vote by the client.

Any deviations from the foregoing voting mechanisms must be approved by the Chief Compliance Officer with a written explanation of the reason for the deviation.

A **material conflict of interest** means the existence of a business relationship between a portfolio company or an affiliate and the Adviser, any affiliate or subsidiary, or an “affiliated person” of a VanEck mutual fund. Examples of when a material conflict of interest exists include a situation where the adviser provides significant investment advisory, brokerage or other services to a company whose management is soliciting proxies; an officer of the Adviser serves on the board of a charitable organization that receives charitable contributions from the portfolio company and the charitable organization is a client of the Adviser; a portfolio company that is a significant selling agent of the Adviser’s products and services solicits proxies; a broker-dealer or insurance company that controls 5% or more of the Adviser’s assets

solicits proxies; the Adviser serves as an investment adviser to the pension or other investment account of the portfolio company; the Adviser and the portfolio company have a lending relationship. In each of these situations voting against management may cause the Adviser a loss of revenue or other benefit.

Client Inquiries

All inquiries by clients as to how the Adviser has voted proxies must immediately be forwarded to Portfolio Administration.

Disclosure to Clients

1. Notification of Availability of Information

Client Brochure - The Client Brochure or Part II of Form ADV will inform clients that they can obtain information from the Adviser on how their proxies were voted. The Client Brochure or Part II of Form ADV^a will be mailed to each client annually. The Legal Department will be responsible for coordinating the mailing with Sales/Marketing Departments.

2. Availability of Proxy Voting Information

At the client's request or if the information is not available on the Adviser's website, a hard copy of the account's^a proxy votes will be mailed to each client.

Recordkeeping Requirements

1. VanEck will retain the following documentation and information for each matter relating to a portfolio security with respect to which a client was entitled to vote:

- a. proxy statements received;
- b. identifying number for the portfolio security;
- c. shareholder meeting date;
- d. brief identification of the matter voted on;
- e. whether the vote was cast on the matter;
- f. how the vote was cast (e.g., for or against proposal, or abstain; for or withhold regarding election of directors);
- g. records of written client requests for information on how the Adviser voted proxies on behalf of the client; a copy of written responses from the Adviser to any written or oral client request for information on how the
- h. Adviser voted proxies on behalf of the client; and any documents prepared by the Adviser that were material to the decision on how to vote or that memorialized the basis for the decision, if such documents were prepared.

Copies of proxy statements filed on EDGAR, and proxy statements and records of proxy votes maintained with a 2. third party (i.e., proxy voting service) need not be maintained. The third party must agree in writing to provide a copy of the documents promptly upon request.

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

3. If applicable, any document memorializing that the costs of voting a proxy exceed the benefit to the client or any other decision to refrain from voting, and that such abstention was in the client's best interest.
4. Proxy voting records will be maintained in an easily accessible place for five years, the first two at the office of the Adviser. Proxy statements on file with EDGAR or maintained by a third

51

party and proxy votes maintained by a third party are not subject to these particular retention requirements.

Voting Foreign Proxies

At times the Adviser may determine that, in the best interests of its clients, a particular proxy should not be voted. This may occur, for example, when the cost of voting a foreign proxy (translation, transportation, etc.) would exceed the benefit of voting the proxy or voting the foreign proxy may cause an unacceptable limitation on the sale of the security. Any such instances will be documented by the Portfolio Manager and reviewed by the Chief Compliance Officer.

Securities Lending

Certain portfolios managed by the Adviser participate in securities lending programs to generate additional revenue. Proxy voting rights generally pass to the borrower when a security is on loan. The Adviser will use its best efforts to recall a security on loan and vote such securities if the Portfolio Manager determines that the proxy involves a material event.

Proxy Voting Policy

The Adviser has reviewed the Glass Lewis Proxy Guidelines (“Guidelines”) and has determined that the Guidelines are consistent with the Adviser’s proxy voting responsibilities and its fiduciary duty with respect to its clients. The Adviser will review any material amendments to the Guidelines.

While it is the Adviser’s policy to generally follow the Guidelines, the Adviser retains the right, on any specific proxy, to vote differently from the Guidelines, if the Adviser believes it is in the best interests of its clients. Any such exceptions will be documented by the Adviser and reviewed by the Chief Compliance Officer.

The portfolio manager or analyst covering the security is responsible for making proxy voting decisions. Portfolio Administration, in conjunction with the portfolio manager and the custodian, is responsible for monitoring corporate actions and ensuring that corporate actions are timely voted.

<u>V. COMPENSATION, ENVIRONMENTAL, SOCIAL AND GOVERNANCE SHAREHOLDER INITIATIVES OVERVIEW</u>	43
---	----

Guidelines Introduction

Glass Lewis evaluates these guidelines on an ongoing basis and formally updates them on an annual basis. This year we've made noteworthy revisions in the following areas, which are summarized below but discussed in greater detail in the relevant section of this document:

SUMMARY OF CHANGES FOR THE 2016 UNITED STATES POLICY GUIDELINES

CONFLICTING MANAGEMENT AND SHAREHOLDER PROPOSALS

We have outlined our approach to analyzing and determining whether to support conflicting management and shareholder proposals. Specifically, we will consider the following:

- The nature of the underlying issue;
- The benefit to shareholders from implementation of the proposal;
- The materiality of the differences between the terms of the shareholder proposal and management proposal;
- The appropriateness of the provisions in the context of a company's shareholder base, corporate structure and other relevant circumstances; and

A company's overall governance profile and, specifically, its responsiveness to shareholders as evidenced by a company's response to previous shareholder proposals and its adoption of progressive shareholder rights provisions (see p. 22).

EXCLUSIVE FORUM PROVISIONS

We have refined our approach to companies that include exclusive forum provisions in their governing documents in connection with an initial public offering. Specifically, we will no longer recommend that shareholders vote against the chairman of the nominating and governance committee in such situations. Instead, we will weigh the presence of an exclusive forum provision in a newly-public company's bylaws in conjunction with other provisions that we believe will unduly limit shareholder rights such as supermajority vote requirements, a classified board or a fee-shifting bylaw. However, our policy to recommend voting against the chairman of the nominating and governance committee when a company adopts an exclusive forum provision without shareholder approval outside of a spin-off, merger or

IPO will not change.

ENVIRONMENTAL AND SOCIAL RISK OVERSIGHT

We have codified our policy regarding our view of the responsibilities of directors for oversight of environmental and social issues. The codification provides more clarity about instances when we may consider recommending shareholders vote against directors for lapses in environmental and social risk management at companies (see p. 15).

NOMINATING COMMITTEE PERFORMANCE

We have revised the guidelines to clarify that we may consider recommending shareholders vote against the chair of the nominating committee where the board's failure to ensure the board has directors with relevant experience, either through periodic director assessment or board refreshment, has contributed to a company's poor performance (see p. 13).

DIRECTOR OVERBOARDING POLICY

Glass Lewis recognizes that the time directors are devoting to their board obligations has increased in recent years. That, coupled with increased investor scrutiny of directors' commitments, has resulted in directors serving on fewer boards. Therefore, in 2016 Glass Lewis will closely review director board commitments and may note as a concern instances of directors serving on more than five total boards, for directors who are not also executives, and more than two total boards for a director who serves as an executive of a public company. Our voting recommendations in 2016, however, will be continue to be based on our existing thresholds of three total boards for a director who serves as an executive of a public company and six total boards for directors who are not public company executives (see p. 15). Beginning in 2017, Glass Lewis will generally recommend voting against a director who serves as an executive officer of any public company while serving on a total of more than two public company boards and any other director who serves on a total of more than five public company boards.

COMPENSATION UPDATES

We have added additional information to our discussion of one-time and transitional awards to highlight some of the specific factors we evaluate in considering these awards as well as our expectations regarding the relevant disclosure. We have also added minor clarifications regarding our analysis of equity compensation plans.

I. A Board of Directors that Serves Shareholder Interest

ELECTION OF DIRECTORS

The purpose of Glass Lewis' proxy research and advice is to facilitate shareholder voting in favor of governance structures that will drive performance, create shareholder value and maintain a proper tone at the top. Glass Lewis looks for talented boards with a record of protecting shareholders and delivering value over the medium- and long-term. We believe that a board can best protect and enhance the interests of shareholders if it is sufficiently independent, has a record of positive performance, and consists of individuals with diverse backgrounds and a breadth and depth of relevant experience.

INDEPENDENCE

The independence of directors, or lack thereof, is ultimately demonstrated through the decisions they make. In assessing the independence of directors, we will take into consideration, when appropriate, whether a director has a track record indicative of making objective decisions. Likewise, when assessing the independence of directors we will also examine when a director's track record on multiple boards indicates a lack of objective decision-making. Ultimately, we believe the determination of whether a director is independent or not must take into consideration both compliance with the applicable independence listing requirements as well as judgments made by the director.

We look at each director nominee to examine the director's relationships with the company, the company's executives, and other directors. We do this to evaluate whether personal, familial, or financial relationships (not including director compensation) may impact the director's decisions. We believe that such relationships make it difficult for a director to put shareholders' interests above the director's or the related party's interests. We also believe that a director who owns more than 20% of a company can exert disproportionate influence on the board, and therefore believe such a director's independence may be hampered, in particular when serving on the audit committee.

Thus, we put directors into three categories based on an examination of the type of relationship they have with the company:

Independent Director – An independent director has no material financial, familial or other current relationships with the company, its executives, or other board members, except for board service and standard fees paid for that service. Relationships that existed within three to five years¹ before the inquiry are usually considered “current” for purposes of this test.

Affiliated Director – An affiliated director has, (or within the past three years, had) a material financial, familial or other relationship with the company or its executives, but is not an employee of the company.² This includes directors whose employers have a material financial relationship with the company.³ In addition, we view a director who either owns or controls 20% or more of the company’s voting stock, or is an employee or affiliate of an entity that controls such amount, as an affiliate.⁴

1 NASDAQ originally proposed a five-year look-back period but both it and the NYSE ultimately settled on a three-year look-back prior to finalizing their rules. A five-year standard is more appropriate, in our view, because we believe that the unwinding of conflicting relationships between former management and board members is more likely to be complete and final after five years. However, Glass Lewis does not apply the five-year look-back period to directors who have previously served as executives of the company on an interim basis for less than one year.

2 If a company does not consider a non-employee director to be independent, Glass Lewis will classify that director as an affiliate.

3 We allow a five-year grace period for former executives of the company or merged companies who have consulting agreements with the surviving company. (We do not automatically recommend voting against directors in such cases for the first five years.) If the consulting agreement persists after this five-year grace period, we apply the materiality thresholds outlined in the definition of “material.”

4 This includes a director who serves on a board as a representative (as part of his or her basic responsibilities) of an investment firm with greater than 20% ownership. However, while we will generally consider him/her to be affiliated, we will not recommend voting against unless (i) the investment firm has disproportionate board representation or (ii) the director serves on the audit committee.

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

We view 20% shareholders as affiliates because they typically have access to and involvement with the management of a company that is fundamentally different from that of ordinary shareholders. More importantly, 20% holders may have interests that diverge from those of ordinary holders, for reasons such as the liquidity (or lack thereof) of their holdings, personal tax issues, etc.

Glass Lewis applies a three-year look back period to all directors who have an affiliation with the company other than former employment, for which we apply a five-year look back.

Definition of “Material”: A material relationship is one in which the dollar value exceeds:

• \$50,000 (or where no amount is disclosed) for directors who are paid for a service they have agreed to perform for the company, outside of their service as a director, including professional or other services; or

\$120,000 (or where no amount is disclosed) for those directors employed by a professional services firm such as a law firm, investment bank, or consulting firm and the company pays the firm, not the individual, for services.⁵ This dollar limit would also apply to charitable contributions to schools where a board member is a professor; or charities where a director serves on the board or is an executive;⁶ and any aircraft and real estate dealings between the company and the director’s firm; or

1% of either company’s consolidated gross revenue for other business relationships (e.g., where the director is an executive officer of a company that provides services or products to or receives services or products from the company).⁷

Definition of “Familial”: Familial relationships include a person’s spouse, parents, children, siblings, grandparents, uncles, aunts, cousins, nieces, nephews, in-laws, and anyone (other than domestic employees) who shares such person’s home. A director is an affiliate if: i) he or she has a family member who is employed by the company and receives more than \$120,000 in annual compensation; or, ii) he or she has a family member who is employed by the company and the company does not disclose this individual’s compensation.

Definition of “Company”: A company includes any parent or subsidiary in a group with the company or any entity that merged with, was acquired by, or acquired the company.

Inside Director – An inside director simultaneously serves as a director and as an employee of the company. This category may include a chairman of the board who acts as an employee of the company or is paid as an employee of the company. In our view, an inside director who derives a greater amount of income as a result of affiliated transactions with the company rather than through compensation paid by the company (i.e., salary, bonus, etc. as a company employee) faces a conflict between making decisions that are in the best interests of the company versus those in the director’s own best interests. Therefore, we will recommend voting against such a director.

Additionally, we believe a director who is currently serving in an interim management position should be considered an insider, while a director who previously served in an interim management position for less than one year and is no longer serving in such capacity is considered independent. Moreover, a director who previously served in an interim management position for over one year and is no longer serving in such capacity is considered an affiliate for five years following the date of his/her resignation or departure from the interim management position.

5 We may deem such a transaction to be immaterial where the amount represents less than 1% of the firm's annual revenues and the board provides a compelling rationale as to why the director's independence is not affected by the relationship.

6 We will generally take into consideration the size and nature of such charitable entities in relation to the company's size and industry along with any other relevant factors such as the director's role at the charity. However, unlike for other types of related party transactions, Glass Lewis generally does not apply a look-back period to affiliated relationships involving charitable contributions; if the relationship between the director and the school or charity ceases, or if the company discontinues its donations to the entity, we will consider the director to be independent.

7 This includes cases where a director is employed by, or closely affiliated with, a private equity firm that profits from an acquisition made by the company. Unless disclosure suggests otherwise, we presume the director is affiliated.

VOTING RECOMMENDATIONS ON THE BASIS OF BOARD INDEPENDENCE

Glass Lewis believes a board will be most effective in protecting shareholders' interests if it is at least two-thirds independent. We note that each of the Business Roundtable, the Conference Board, and the Council of Institutional Investors advocates that two-thirds of the board be independent. Where more than one-third of the members are affiliated or inside directors, we typically⁸ recommend voting against some of the inside and/ or affiliated directors in order to satisfy the two-thirds threshold.

In the case of a less than two-thirds independent board, Glass Lewis strongly supports the existence of a presiding or lead director with authority to set the meeting agendas and to lead sessions outside the insider chairman's presence.

In addition, we scrutinize avowedly "independent" chairmen and lead directors. We believe that they should be unquestionably independent or the company should not tout them as such.

COMMITTEE INDEPENDENCE

We believe that only independent directors should serve on a company's audit, compensation, nominating, and governance committees.⁹ We typically recommend that shareholders vote against any affiliated or inside director seeking appointment to an audit, compensation, nominating, or governance committee, or who has served in that capacity in the past year.

Pursuant to Section 952 of the Dodd-Frank Act, as of January 11, 2013, the SEC approved new listing requirements for both the NYSE and NASDAQ which require that boards apply enhanced standards of independence when making an affirmative determination of the independence of compensation committee members. Specifically, when making this determination, in addition to the factors considered when assessing general director independence, the board's considerations must include: (i) the source of compensation of the director, including any consulting, advisory or other compensatory fee paid by the listed company to the director (the "Fees Factor"); and (ii) whether the director is affiliated with the listing company, its subsidiaries, or affiliates of its subsidiaries (the "Affiliation Factor").

Glass Lewis believes it is important for boards to consider these enhanced independence factors when assessing compensation committee members. However, as discussed above in the section titled Independence, we apply our own standards when assessing the independence of directors, and these standards also take into account consulting and advisory fees paid to the director, as well as the director's affiliations with the company and its subsidiaries and affiliates. We may recommend voting against compensation committee members who are not independent based on our standards.

INDEPENDENT CHAIRMAN

Glass Lewis believes that separating the roles of CEO (or, more rarely, another executive position) and chairman creates a better governance structure than a combined CEO/chairman position. An executive manages the business according to a course the board charts. Executives should report to the board regarding their performance in achieving goals set by the board. This is needlessly complicated when a CEO chairs the board, since a CEO/chairman presumably will have a significant influence over the board.

While many companies have an independent lead or presiding director who performs many of the same functions of an independent chairman (e.g., setting the board meeting agenda), we do not believe this alternate form of independent board leadership provides as robust protection for shareholders as an independent chairman.

8 With a staggered board, if the affiliates or insiders that we believe should not be on the board are not up for election, we will express our concern regarding those directors, but we will not recommend voting against the other affiliates or insiders who are up for election just to achieve two-thirds independence. However, we will consider recommending voting against the directors subject to our concern at their next election if the issue giving rise to the concern is not resolved.

9 We will recommend voting against an audit committee member who owns 20% or more of the company's stock, and we believe that there should be a maximum of one director (or no directors if the committee is comprised of less than three directors) who owns 20% or more of the company's stock on the compensation, nominating, and governance committees.

It can become difficult for a board to fulfill its role of overseer and policy setter when a CEO/chairman controls the agenda and the boardroom discussion. Such control can allow a CEO to have an entrenched position, leading to longer-than-optimal terms, fewer checks on management, less scrutiny of the business operation, and limitations on independent, shareholder-focused goal-setting by the board.

A CEO should set the strategic course for the company, with the board's approval, and the board should enable the CEO to carry out the CEO's vision for accomplishing the board's objectives. Failure to achieve the board's objectives should lead the board to replace that CEO with someone in whom the board has confidence.

Likewise, an independent chairman can better oversee executives and set a pro-shareholder agenda without the management conflicts that a CEO and other executive insiders often face. Such oversight and concern for shareholders allows for a more proactive and effective board of directors that is better able to look out for the interests of shareholders.

Further, it is the board's responsibility to select a chief executive who can best serve a company and its shareholders and to replace this person when his or her duties have not been appropriately fulfilled. Such a replacement becomes more difficult and happens less frequently when the chief executive is also in the position of overseeing the board.

Glass Lewis believes that the installation of an independent chairman is almost always a positive step from a corporate governance perspective and promotes the best interests of shareholders. Further, the presence of an independent chairman fosters the creation of a thoughtful and dynamic board, not dominated by the views of senior management. Encouragingly, many companies appear to be moving in this direction—one study indicates that only 10 percent of incoming CEOs in 2014 were awarded the chairman title, versus 48 percent in 2002.¹⁰ Another study finds that 47 percent of S&P 500 boards now separate the CEO and chairman roles, up from 37 percent in 2009, although the same study found that only 28 percent of S&P 500 boards have truly independent chairs.¹¹

We do not recommend that shareholders vote against CEOs who chair the board. However, we typically recommend that our clients support separating the roles of chairman and CEO whenever that question is posed in a proxy (typically in the form of a shareholder proposal), as we believe that it is in the long-term best interests of the company and its shareholders.

Further, where the company has neither an independent chairman nor independent lead director, we will recommend voting against the chair of the governance committee.

PERFORMANCE

The most crucial test of a board's commitment to the company and its shareholders lies in the actions of the board and its members. We look at the performance of these individuals as directors and executives of the company and of other companies where they have served.

We find that a director's past conduct is often indicative of future conduct and performance. We often find directors with a history of overpaying executives or of serving on boards where avoidable disasters have occurred serving on the boards of companies with similar problems. Glass Lewis has a proprietary database of directors serving at over 8,000 of the most widely held U.S. companies. We use this database to track the performance of directors across companies.

VOTING RECOMMENDATIONS ON THE BASIS OF PERFORMANCE

We typically recommend that shareholders vote against directors who have served on boards or as executives of companies with records of poor performance, inadequate risk oversight, excessive compensation, auditor accounting-related issues, and/or other indicators of mismanagement or actions against the interests of shareholders. We will reevaluate such directors based on, among other factors, the length of time passed since the incident giving rise to the concern, shareholder support for the director, the severity of the issue, the

10 Ken Favaro, Per-Ola Karlsson and Gary L. Nelson. "The \$112 Billion CEO Succession Problem." (*Strategy+Business*, Issue 79, Summer 2015).

11 Spencer Stuart Board Index, 2014, p. 23.

director's role (e.g., committee membership), director tenure at the subject company, whether ethical lapses accompanied the oversight lapse, and evidence of strong oversight at other companies.

Likewise, we examine the backgrounds of those who serve on key board committees to ensure that they have the required skills and diverse backgrounds to make informed judgments about the subject matter for which the committee is responsible.

We believe shareholders should avoid electing directors who have a record of not fulfilling their responsibilities to shareholders at any company where they have held a board or executive position. We typically recommend voting against:

1. A director who fails to attend a minimum of 75% of board and applicable committee meetings, calculated in the aggregate.¹²
2. A director who belatedly filed a significant form(s) 4 or 5, or who has a pattern of late filings if the late filing was the director's fault (we look at these late filing situations on a case-by-case basis).
3. A director who is also the CEO of a company where a serious and material restatement has occurred after the CEO had previously certified the pre-restatement financial statements.
4. A director who has received two against recommendations from Glass Lewis for identical reasons within the prior year at different companies (the same situation must also apply at the company being analyzed).
5. All directors who served on the board if, for the last three years, the company's performance has been in the bottom quartile of the sector and the directors have not taken reasonable steps to address the poor performance.

BOARD RESPONSIVENESS

Glass Lewis believes that any time 25% or more of shareholders vote contrary to the recommendation of management, the board should, depending on the issue, demonstrate some level of responsiveness to address the concerns of shareholders. These include instances when 25% or more of shareholders (excluding abstentions and broker non-votes): WITHHOLD votes from (or vote AGAINST) a director nominee, vote AGAINST a management-sponsored proposal, or vote FOR a shareholder proposal. In our view, a 25% threshold is significant enough to warrant a close examination of the underlying issues and an evaluation of whether or not a board response was warranted and, if so, whether the board responded appropriately following the vote. While the 25% threshold alone will not automatically generate a negative vote recommendation from Glass Lewis on a future proposal (e.g., to recommend against a director nominee, against a say-on-pay proposal, etc.), it may be a contributing factor to our recommendation to vote against management's recommendation in the event we determine that the board did not respond appropriately.

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

As a general framework, our evaluation of board responsiveness involves a review of publicly available disclosures (e.g., the proxy statement, annual report, 8-Ks, company website, etc.) released following the date of the company's last annual meeting up through the publication date of our most current Proxy Paper. Depending on the specific issue, our focus typically includes, but is not limited to, the following:

- At the board level, any changes in directorships, committee memberships, disclosure of related party transactions, meeting attendance, or other responsibilities;
- Any revisions made to the company's articles of incorporation, bylaws or other governance documents;
- Any press or news releases indicating changes in, or the adoption of, new company policies, business practices or special reports; and

12 However, where a director has served for less than one full year, we will typically not recommend voting against for failure to attend 75% of meetings. Rather, we will note the poor attendance with a recommendation to track this issue going forward. We will also refrain from recommending to vote against directors when the proxy discloses that the director missed the meetings due to serious illness or other extenuating circumstances.

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

Any modifications made to the design and structure of the company's compensation program, as well as an assessment of the company's engagement with shareholders on compensation issues as discussed in the CD&A, particularly following a material vote against a company's say-on-pay.

Our Proxy Paper analysis will include a case-by-case assessment of the specific elements of board responsiveness that we examined along with an explanation of how that assessment impacts our current voting recommendations.

THE ROLE OF A COMMITTEE CHAIRMAN

Glass Lewis believes that a designated committee chairman maintains primary responsibility for the actions of his or her respective committee. As such, many of our committee-specific voting recommendations are against the applicable committee chair rather than the entire committee (depending on the seriousness of the issue). However, in cases where we would ordinarily recommend voting against a committee chairman but the chair is not specified, we apply the following general rules, which apply throughout our guidelines:

- If there is no committee chair, we recommend voting against the longest-serving committee member or, if the longest-serving committee member cannot be determined, the longest-serving board member serving on the committee (i.e., in either case, the "senior director"); and

- If there is no committee chair, but multiple senior directors serving on the committee, we recommend voting against both (or all) such senior directors.

In our view, companies should provide clear disclosure of which director is charged with overseeing each committee. In cases where that simple framework is ignored and a reasonable analysis cannot determine which committee member is the designated leader, we believe shareholder action against the longest serving committee member(s) is warranted. Again, this only applies if we would ordinarily recommend voting against the committee chair but there is either no such position or no designated director in such role.

On the contrary, in cases where there is a designated committee chair and the recommendation is to vote against the committee chair, but the chair is not up for election because the board is staggered, we do not recommend voting against any members of the committee who are up for election; rather, we will note the concern with regard to the committee chair.

AUDIT COMMITTEES AND PERFORMANCE

Audit committees play an integral role in overseeing the financial reporting process because "[v]ibrant and stable capital markets depend on, among other things, reliable, transparent, and objective financial information to support an

efficient and effective capital market process. The vital oversight role audit committees play in the process of producing financial information has never been more important.¹³

When assessing an audit committee's performance, we are aware that an audit committee does not prepare financial statements, is not responsible for making the key judgments and assumptions that affect the financial statements, and does not audit the numbers or the disclosures provided to investors. Rather, an audit committee member monitors and oversees the process and procedures that management and auditors perform. The 1999 Report and Recommendations of the Blue Ribbon Committee on Improving the Effectiveness of Corporate Audit Committees stated it best:

A proper and well-functioning system exists, therefore, when the three main groups responsible for financial reporting – the full board including the audit committee, financial management including the internal auditors, and the outside auditors – form a 'three legged stool' that supports responsible financial disclosure and active participatory oversight. However, in the view of the Committee, the audit committee must be 'first among equals' in this process, since the audit committee is an extension of the full board and hence the ultimate monitor of the process.

13 Audit Committee Effectiveness – What Works Best.” PricewaterhouseCoopers. The Institute of Internal Auditors Research Foundation. 2005.

STANDARDS FOR ASSESSING THE AUDIT COMMITTEE

For an audit committee to function effectively on investors' behalf, it must include members with sufficient knowledge to diligently carry out their responsibilities. In its audit and accounting recommendations, the Conference Board Commission on Public Trust and Private Enterprise said "members of the audit committee must be independent and have both knowledge and experience in auditing financial matters."¹⁴

We are skeptical of audit committees where there are members that lack expertise as a Certified Public Accountant (CPA), Chief Financial Officer (CFO) or corporate controller, or similar experience. While we will not necessarily recommend voting against members of an audit committee when such expertise is lacking, we are more likely to recommend voting against committee members when a problem such as a restatement occurs and such expertise is lacking.

Glass Lewis generally assesses audit committees against the decisions they make with respect to their oversight and monitoring role. The quality and integrity of the financial statements and earnings reports, the completeness of disclosures necessary for investors to make informed decisions, and the effectiveness of the internal controls should provide reasonable assurance that the financial statements are materially free from errors. The independence of the external auditors and the results of their work all provide useful information by which to assess the audit committee.

When assessing the decisions and actions of the audit committee, we typically defer to its judgment and generally recommend voting in favor of its members. However, we will consider recommending that shareholders vote against the following:¹⁵

All members of the audit committee when options were backdated, there is a lack of adequate controls in place,
1. there was a resulting restatement, and disclosures indicate there was a lack of documentation with respect to the option grants.

The audit committee chair, if the audit committee does not have a financial expert or the committee's financial
2. expert does not have a demonstrable financial background sufficient to understand the financial issues unique to public companies.

3. The audit committee chair, if the audit committee did not meet at least four times during the year.

4. The audit committee chair, if the committee has less than three members.

Any audit committee member who sits on more than three public company audit committees, unless the audit
5. committee member is a retired CPA, CFO, controller or has similar experience, in which case the limit shall be four committees, taking time and availability into consideration including a review of the audit committee member's attendance at all board and committee meetings.¹⁶

6.

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

All members of an audit committee who are up for election and who served on the committee at the time of the audit, if audit and audit-related fees total one-third or less of the total fees billed by the auditor.

7. The audit committee chair when tax and/or other fees are greater than audit and audit-related fees paid to the auditor for more than one year in a row (in which case we also recommend against ratification of the auditor).

14 Commission on Public Trust and Private Enterprise. The Conference Board. 2003.

15 As discussed under the section labeled “Committee Chairman,” where the recommendation is to vote against the committee chair but the chair is not up for election because the board is staggered, we do not recommend voting against the members of the committee who are up for election; rather, we will note the concern with regard to the committee chair.

16 Glass Lewis may exempt certain audit committee members from the above threshold if, upon further analysis of relevant factors such as the director’s experience, the size, industry-mix and location of the companies involved and the director’s attendance at all the companies, we can reasonably determine that the audit committee member is likely not hindered by multiple audit committee commitments.

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

8. All members of an audit committee where non-audit fees include fees for tax services (including, but not limited to, such things as tax avoidance or shelter schemes) for senior executives of the company. Such services are prohibited by the Public Company Accounting Oversight Board (“PCAOB”).
9. All members of an audit committee that reappointed an auditor that we no longer consider to be independent for reasons unrelated to fee proportions.
10. All members of an audit committee when audit fees are excessively low, especially when compared with other companies in the same industry.

The audit committee chair¹⁷ if the committee failed to put auditor ratification on the ballot for shareholder approval. However, if the non-audit fees or tax fees exceed audit plus audit-related fees in either the current or the prior year, then Glass Lewis will recommend voting against the entire audit committee.

12. All members of an audit committee where the auditor has resigned and reported that a section 10A¹⁸ letter has been issued.
13. All members of an audit committee at a time when material accounting fraud occurred at the company.¹⁹
14. All members of an audit committee at a time when annual and/or multiple quarterly financial statements had to be restated, and any of the following factors apply:

- The restatement involves fraud or manipulation by insiders;
- The restatement is accompanied by an SEC inquiry or investigation;
- The restatement involves revenue recognition;
- The restatement results in a greater than 5% adjustment to costs of goods sold, operating expense, or operating cash flows; or
- The restatement results in a greater than 5% adjustment to net income, 10% adjustment to assets or shareholders equity, or cash flows from financing or investing activities.

All members of an audit committee if the company repeatedly fails to file its financial reports in a timely fashion. For example, the company has filed two or more quarterly or annual financial statements late within the last 5 quarters.

16. All members of an audit committee when it has been disclosed that a law enforcement agency has charged the company and/or its employees with a violation of the Foreign Corrupt Practices Act (FCPA).
17. All members of an audit committee when the company has aggressive accounting policies and/or poor disclosure or lack of sufficient transparency in its financial statements.
18. All members of the audit committee when there is a disagreement with the auditor and the auditor resigns or is dismissed (e.g., the company receives an adverse opinion on its financial statements from the auditor).
19. All members of the audit committee if the contract with the auditor specifically limits the auditor’s liability to the company for damages.²⁰

17 As discussed under the section labeled “Committee Chairman,” in all cases, if the chair of the committee is not specified, we recommend voting against the director who has been on the committee the longest.

18 Auditors are required to report all potential illegal acts to management and the audit committee unless they are clearly inconsequential in nature.

If the audit committee or the board fails to take appropriate action on an act that has been determined to be a violation of the law, the independent auditor is required to send a section 10A letter to the SEC. Such letters are rare and therefore we believe should be taken seriously.

19 Research indicates that revenue fraud now accounts for over 60% of SEC fraud cases, and that companies that engage in fraud experience significant negative abnormal stock price declines—facing bankruptcy, delisting, and material asset sales at much higher rates than do non-fraud firms (Committee of Sponsoring Organizations of the Treadway Commission. “Fraudulent Financial Reporting: 1998-2007.” May 2010).

20 The Council of Institutional Investors. “Corporate Governance Policies,” p. 4, April 5, 2006; and “Letter from Council of Institutional Investors to the AICPA,” November 8, 2006.

All members of the audit committee who served since the date of the company's last annual meeting, and when, 20. since the last annual meeting, the company has reported a material weakness that has not yet been corrected, or, when the company has an ongoing material weakness from a prior year that has not yet been corrected.

We also take a dim view of audit committee reports that are boilerplate, and which provide little or no information or transparency to investors. When a problem such as a material weakness, restatement or late filings occurs, we take into consideration, in forming our judgment with respect to the audit committee, the transparency of the audit committee report.

COMPENSATION COMMITTEE PERFORMANCE

Compensation committees have a critical role in determining the compensation of executives. This includes deciding the basis on which compensation is determined, as well as the amounts and types of compensation to be paid. This process begins with the hiring and initial establishment of employment agreements, including the terms for such items as pay, pensions and severance arrangements. It is important in establishing compensation arrangements that compensation be consistent with, and based on the long-term economic performance of, the business's long-term shareholders returns.

Compensation committees are also responsible for the oversight of the transparency of compensation. This oversight includes disclosure of compensation arrangements, the matrix used in assessing pay for performance, and the use of compensation consultants. In order to ensure the independence of the board's compensation consultant, we believe the compensation committee should only engage a compensation consultant that is not also providing any services to the company or management apart from their contract with the compensation committee. It is important to investors that they have clear and complete disclosure of all the significant terms of compensation arrangements in order to make informed decisions with respect to the oversight and decisions of the compensation committee.

Finally, compensation committees are responsible for oversight of internal controls over the executive compensation process. This includes controls over gathering information used to determine compensation, establishment of equity award plans, and granting of equity awards. For example, the use of a compensation consultant who maintains a business relationship with company management may cause the committee to make decisions based on information that is compromised by the consultant's conflict of interests. Lax controls can also contribute to improper awards of compensation such as through granting of backdated or spring-loaded options, or granting of bonuses when triggers for bonus payments have not been met.

Central to understanding the actions of a compensation committee is a careful review of the Compensation Discussion and Analysis ("CD&A") report included in each company's proxy. We review the CD&A in our evaluation of the overall compensation practices of a company, as overseen by the compensation committee. The CD&A is also integral to the evaluation of compensation proposals at companies, such as advisory votes on executive compensation, which allow shareholders to vote on the compensation paid to a company's top executives.

When assessing the performance of compensation committees, we will consider recommending that shareholders vote against the following:²¹

All members of a compensation committee during whose tenure the committee failed to address shareholder concerns following majority shareholder rejection of the say-on-pay proposal in the previous year. Where the proposal was approved but there was a significant shareholder vote (i.e., greater than 25% of votes cast) against the say-on-pay proposal in the prior year, if the board did not respond sufficiently to the vote including actively engaging shareholders on this issue, we will also consider recommending voting against the chairman of the compensation committee or all members of the compensation committee, depending on the severity and history of the compensation problems and the level of shareholder opposition.

²¹ As discussed under the section labeled “Committee Chairman,” where the recommendation is to vote against the committee chair and the chair is not up for election because the board is staggered, we do not recommend voting against any members of the committee who are up for election; rather, we will note the concern with regard to the committee chair.

Edgar Filing: VanEck Vectors ETF Trust - Form 485APOS

- All members of the compensation committee who are up for election and served when the company failed to align
2. pay with performance (e.g., a company receives an F grade in our pay-for-performance analysis) if shareholders are not provided with an advisory vote on executive compensation at the annual meeting.²²

- Any member of the compensation committee who has served on the compensation committee of at least two other
3. public companies that have consistently failed to align pay with performance and whose oversight of compensation at the company in question is suspect.

- The compensation committee chair if the company consistently has received deficient grades in our
4. pay-for-performance analysis, and if during the past year the company performed the same as or worse than its peers.²³

5. All members of the compensation committee (during the relevant time period) if the company entered into excessive employment agreements and/or severance agreements.

- All members of the compensation committee when performance goals were changed (i.e., lowered) when
6. employees failed or were unlikely to meet original goals, or performance-based compensation was paid despite goals not being attained.

7. All members of the compensation committee if excessive employee perquisites and benefits were allowed.

8. The compensation committee chair if the compensation committee did not meet during the year.

9. All members of the compensation committee when the company repriced options or completed a “self tender offer” without shareholder approval within the past two years.

10. All members of the compensation committee when vesting of in-the-money options is accelerated.

11. All members of the compensation committee when option exercise prices were backdated. Glass Lewis will recommend voting against an executive director who played a role in and participated in option backdating.

12. All members of the compensation committee when option exercise prices were spring-loaded or otherwise timed around the release of material information.

- All members of the compensation committee when a new employment contract is given to an executive that does
13. not include a clawback provision and the company had a material restatement, especially if the restatement was due to fraud.

- The chair of the compensation committee where the CD&A provides insufficient or unclear information about
14. performance metrics and goals, where the CD&A indicates that pay is not tied to performance, or where the compensation committee or management has excessive discretion to alter performance terms or increase amounts of awards in contravention of previously defined targets.

- All members of the compensation committee during whose tenure the committee failed to implement a
15. shareholder proposal regarding a compensation-related issue, where the proposal received the affirmative vote of a majority of the voting shares at a shareholder meeting, and when a reasonable

22 Where there are multiple CEOs in one year, we will consider not recommending against the compensation committee but will defer judgment on compensation policies and practices until the next year or a full year after arrival of the new CEO. In addition, if a company provides shareholders with a say-on-pay proposal, we will initially only recommend voting against the company's say-on-pay proposal and will not recommend voting against the members of the compensation committee unless there is a pattern of failing to align pay and performance and/or the company exhibits egregious compensation practices. However, if the company repeatedly fails to align pay and performance, we will then recommend against the members of the compensation committee in addition to recommending voting against the say-on-pay proposal.

23 In cases where a company has received two consecutive D grades, or if its grade improved from an F to a D in the most recent period, and during the most recent year the company performed better than its peers (based on our analysis), we refrain from recommending to vote against the compensation committee chair. In addition, if a company provides shareholders with a say-on-pay proposal in this instance, we will consider voting against the advisory vote rather than the compensation committee chair unless the company exhibits unquestionably egregious practices.

analysis suggests that the compensation committee (rather than the governance committee) should have taken steps to implement the request.²⁴

NOMINATING AND GOVERNANCE COMMITTEE PERFORMANCE

The nominating and governance committee, as an agent for the shareholders, is responsible for the governance by the board of the company and its executives. In performing this role, the committee is responsible and accountable for selection of objective and competent board members. It is also responsible for providing leadership on governance policies adopted by the company, such as decisions to implement shareholder proposals that have received a majority vote. (At most companies, a single committee is charged with these oversight functions; at others, the governance and nominating responsibilities are apportioned among two separate committees.)

Consistent with Glass Lewis' philosophy that boards should have diverse backgrounds and members with a breadth and depth of relevant experience, we believe that nominating and governance committees should consider diversity when making director nominations within the context of each specific company and its industry. In our view, shareholders are best served when boards make an effort to ensure a constituency that is not only reasonably diverse on the basis of age, race, gender and ethnicity, but also on the basis of geographic knowledge, industry experience, board tenure and culture.

Regarding the committee responsible for governance, we will consider recommending that shareholders vote against the following:²⁵

All members of the governance committee²⁶ during whose tenure a shareholder proposal relating to important shareholder rights received support from a majority of the votes cast (excluding abstentions and broker non-votes) and the board has not begun to implement or enact the proposal's subject matter²⁷ Examples of such shareholder proposals include those seeking a declassified board structure, a majority vote standard for director elections, or a right to call a special meeting. In determining whether a board has sufficiently implemented such a proposal, we will examine the quality of the right enacted or proffered by the board for any conditions that may unreasonably interfere with the shareholders' ability to exercise the right (e.g., overly restrictive procedural requirements for calling a special meeting).

2. The governance committee chair,²⁸ when the chairman is not independent and an independent lead or presiding director has not been appointed.²⁹

3. In the absence of a nominating committee, the governance committee chair when there are less than five or the whole nominating committee when there are more than 20 members on the board.

4. The governance committee chair, when the committee fails to meet at all during the year.

5. The governance committee chair, when for two consecutive years the company provides what we consider to be "inadequate" related party transaction disclosure (i.e., the nature of such transactions and/or the monetary amounts involved are unclear or excessively vague, thereby preventing a shareholder from being able to reasonably interpret

the independence status of multiple directors

24 In all other instances (i.e., a non-compensation-related shareholder proposal should have been implemented) we recommend that shareholders vote against the members of the governance committee.

25 As discussed in the guidelines section labeled “Committee Chairman,” where we would recommend to vote against the committee chair but the chair is not up for election because the board is staggered, we do not recommend voting against any members of the committee who are up for election; rather, we will note the concern with regard to the committee chair.

26 If the board does not have a committee responsible for governance oversight and the board did not implement a shareholder proposal that received the requisite support, we will recommend voting against the entire board. If the shareholder proposal at issue requested that the board adopt a declassified structure, we will recommend voting against all director nominees up for election.

27 Where a compensation-related shareholder proposal should have been implemented, and when a reasonable analysis suggests that the members of the compensation committee (rather than the governance committee) bear the responsibility for failing to implement the request, we recommend that shareholders only vote against members of the compensation committee.

28 As discussed in the guidelines section labeled “Committee Chairman,” if the committee chair is not specified, we recommend voting against the director who has been on the committee the longest. If the longest-serving committee member cannot be determined, we will recommend voting against the longest-serving board member serving on the committee.

29 We believe that one independent individual should be appointed to serve as the lead or presiding director. When such a position is rotated among directors from meeting to meeting, we will recommend voting against the governance committee chair as we believe the lack of fixed lead or presiding director means that, effectively, the board does not have an independent board leader.

above and beyond what the company maintains is compliant with SEC or applicable stock exchange listing requirements).

The governance committee chair, when during the past year the board adopted a forum selection clause (i.e., an exclusive forum provision)³⁰ without shareholder approval, or, if the board is currently seeking shareholder approval of a forum selection clause pursuant to a bundled bylaw amendment rather than as a separate proposal.

All members of the governance committee during whose tenure the board adopted, without shareholder approval, provisions in its charter or bylaws that, through rules on director compensation, may inhibit the ability of shareholders to nominate directors.

In addition, we may recommend that shareholders vote against the chairman of the governance committee, or the entire committee, where the board has amended the company's governing documents to reduce or remove important shareholder rights, or to otherwise impede the ability of shareholders to exercise such right, and has done so without seeking shareholder approval. Examples of board actions that may cause such a recommendation include: the elimination of the ability of shareholders to call a special meeting or to act by written consent; an increase to the ownership threshold required for shareholders to call a special meeting; an increase to vote requirements for charter or bylaw amendments; the adoption of provisions that limit the ability of shareholders to pursue full legal recourse—such as bylaws that require arbitration of shareholder claims or that require shareholder plaintiffs to pay the company's legal expenses in the absence of a court victory (i.e., “fee-shifting” or “loser pays” bylaws); the adoption of a classified board structure; and the elimination of the ability of shareholders to remove a director without cause.

Regarding the nominating committee, we will consider recommending that shareholders vote against the following:³¹

All members of the nominating committee, when the committee nominated or renominated an individual who had a significant conflict of interest or whose past actions demonstrated a lack of integrity or inability to represent shareholder interests.

The nominating committee chair, if the nominating committee did not meet during the year.

In the absence of a governance committee, the nominating committee chair³² when the chairman is not independent, and an independent lead or presiding director has not been appointed.³³

The nominating committee chair, when there are less than five or the whole nominating committee when there are more than 20 members on the board.³⁴

The nominating committee chair, when a director received a greater than 50% against vote the prior year and not only was the director not removed, but the issues that raised shareholder concern were not corrected.³⁵

³⁰ A forum selection clause is a bylaw provision stipulating that a certain state, typically where the company is incorporated, which is most often Delaware, shall be the exclusive forum for all intra-corporate disputes (e.g., shareholder derivative actions, assertions of claims of a breach of fiduciary duty, etc.). Such a clause effectively limits

a shareholder's legal remedy regarding appropriate choice of venue and related relief offered under that state's laws and rulings.

31 As discussed in the guidelines section labeled "Committee Chairman," where we would recommend to vote against the committee chair but the chair is not up for election because the board is staggered, we do not recommend voting against any members of the committee who are up for election; rather, we will note the concern with regard to the committee chair.

32 As discussed under the section labeled "Committee Chairman," if the committee chair is not specified, we will recommend voting against the director who has been on the committee the longest. If the longest-serving committee member cannot be determined, we will recommend voting against the longest-serving board member on the committee.

33 In the absence of both a governance and a nominating committee, we will recommend voting against the chairman of the board on this basis, unless if the chairman also serves as the CEO, in which case we will recommend voting against the longest-serving director.

34 In the absence of both a governance and a nominating committee, we will recommend voting against the chairman of the board on this basis, unless if the chairman also serves as the CEO, in which case we will recommend voting against the the longest-serving director.

35 Considering that shareholder discontent clearly relates to the director who received a greater than 50% against vote rather than the nominating chair, we review the severity of the issue(s) that initially raised shareholder concern as well as company responsiveness to such matters, and will only recommend voting against the nominating chair if a reasonable analysis suggests that it would be most appropriate. In rare cases, we will consider recommending against the nominating chair when a director receives a substantial (i.e., 25% or more) vote against based on the same analysis.

In addition, we may consider recommending shareholders vote against the chair of the nominating committee where the board's failure to ensure the board has directors with relevant experience, either through periodic director assessment or board refreshment, has contributed to a company's poor performance.

BOARD-LEVEL RISK MANAGEMENT OVERSIGHT

Glass Lewis evaluates the risk management function of a public company board on a strictly case-by-case basis. Sound risk management, while necessary at all companies, is particularly important at financial firms which inherently maintain significant exposure to financial risk. We believe such financial firms should have a chief risk officer reporting directly to the board and a dedicated risk committee or a committee of the board charged with risk oversight. Moreover, many non-financial firms maintain strategies which involve a high level of exposure to financial risk. Similarly, since many non-financial firms have complex hedging or trading strategies, those firms should also have a chief risk officer and a risk committee.

Our views on risk oversight are consistent with those expressed by various regulatory bodies. In its December 2009 Final Rule release on Proxy Disclosure Enhancements, the SEC noted that risk oversight is a key competence of the board and that additional disclosures would improve investor and shareholder understanding of the role of the board in the organization's risk management practices. The final rules, which became effective on February 28, 2010, now explicitly require companies and mutual funds to describe (while allowing for some degree of flexibility) the board's role in the oversight of risk.

When analyzing the risk management practices of public companies, we take note of any significant losses or writedowns on financial assets and/or structured transactions. In cases where a company has disclosed a sizable loss or writedown, and where we find that the company's board-level risk committee's poor oversight contributed to the loss, we will recommend that shareholders vote against such committee members on that basis. In addition, in cases where a company maintains a significant level of financial risk exposure but fails to disclose any explicit form of board-level risk oversight (committee or otherwise)³⁶, we will consider recommending to vote against the chairman of the board on that basis. However, we generally would not recommend voting against a combined chairman/CEO, except in egregious cases.

ENVIRONMENTAL AND SOCIAL RISK OVERSIGHT

Companies face significant financial, legal and reputational risks resulting from poor environmental and social practices, or negligent oversight thereof. Therefore, Glass Lewis views the identification, mitigation and management of environmental and social risks as integra
