Semi-Annual Report

This report provides management's discussion of fund performance for Alliance World Dollar Government Fund II (the "Fund") for the semi-annual reporting period ended September 30, 2003.

Investment Objective and Policies

This closed-end fund is designed for investors who seek high current income and, secondarily, capital appreciation. To achieve this objective, it invests primarily in high yielding, high risk sovereign debt and U.S. corporate fixed-income obligations that we expect to benefit from improving economic and credit fundamentals.

Investment Results

The following table shows the Fund's performance over the six- and 12-month periods ended September 30, 2003. For comparison, we have included the J.P. Morgan Emerging Markets Bond Index Plus (JPM EMBI+), which is a standard measure of the performance of a basket of unmanaged emerging market debt securities.

INVESTMENT RESULTS*

Periods Ended September 30, 2003

	Returns	
	6 Months	12 Months

Alliance World Dollar Government Fund II (NAV)	17.65%	53.68%

J.P. Morgan Emerging Markets Bond Index Plus	13.73%	40.19%

The Fund's Market Price per share on September 30, 2003 was \$12.36.

* The Fund's investment results are for the periods shown and are based on the net asset value (NAV) of the Fund as of September 30, 2003. All fees and

Edgar Filing: ALLIANCE WORLD DOLLAR GOVERNMENT FUND II INC - Form N-CSR

expenses related to the operation of the Fund have been deducted. Returns for the Fund include the reinvestment of any distributions paid during each period. Past performance is no guarantee of future results.

The J.P. Morgan Emerging Markets Bond Index Plus (JPM EMBI+) is comprised of dollar-denominated restructured sovereign bonds; a large percentage of the index is made up of Brady bonds. The index is unmanaged and reflects no fees or expenses. An investor cannot invest directly in an index, and its results are not indicative of any specific investment, including Alliance World Dollar Government Fund II.

The Fund significantly outperformed its benchmark, the JPM EMBI+, for both the six- and 12-month periods ended September 30, 2003. The Fund benefited primarily from its emerging market debt country weightings and individual security selection. Country and security selection in the Fund's overweight allocation to Brazil was the largest contributor to both absolute and relative performance for the annual and semi-annual periods. Brazilian debt was also a top performer within the JPM EMBI+. The Fund's overweight of Russia contributed positively to performance, as prospects for rating agency upgrades reflected the success of structural reforms that have led to economic growth and debt reduction. The Fund's holdings of Uruguayan and Venezuelan debt also had a positive impact on performance. Both countries conducted debt exchanges

Alliance World Dollar Government Fund II o 1

during this period that significantly improved the maturity structure of their external debt.

Market Review and Investment Strategy

During the semi-annual reporting period ended September 30, 2003, investors' desire for higher yielding asset classes benefited the emerging debt markets, as high levels of global liquidity encouraged more risk taking. The emerging market debt class, as represented by the JPM EMBI+, returned a strong 13.73% for the six-month period under review. Latin countries outperformed non-Latin regions, posting returns of 15.61% and 11.19%, respectively. All countries represented within the Index posted positive returns during the reporting period. Top performing countries included Venezuela at 30.45%, Turkey at 30.29%, Ecuador at 23.77% and Brazil at 23.63%, while Bulgaria at 3.08%, Poland at 3.73% and South Africa at 4.01% lagged.

During the semi-annual period, we increased the Fund's overweight exposure to Brazilian sovereign bonds, as President Lula exceeded expectations in his ability to push forward crucial tax and social security reforms. Russia and Mexico continued to be a large percentage of the Fund's exposure; however, we maintained an underweight of the latter, relative to the Index, as bond valuations began to exceed interest rate risk. We have maintained the Fund's overweight position in Russian sovereign debt, as credit statistics continued to improve. The Fund's small position in Venezuela was increased once new management of the state-owned oil company, PDVSA (Petroleos de Venezuela S.A.), proved adept at improving oil production, which helped to augment international reserves. In April, Uruguay, with the support of the International Monetary Fund, announced an aggressive plan to swap its outstanding debt for longer maturity securities. We aggressively purchased Uruguay bonds after this announcement--a tactic that proved beneficial to the Fund.

NOTES TO FINANCIAL STATEMENTS
September 30, 2003 (unaudited)

NOTE A

Significant Accounting Policies

Alliance World Dollar Government Fund II (the "Fund") was incorporated under the laws of the State of Maryland on May 20, 1993 and is registered under the Investment Company Act of 1940 as a non-diversified, closed-end management investment company. The financial statements have been prepared in conformity with accounting principles generally accepted in the United States, which require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

In accordance with Pricing Policies adopted by the Board of Directors of the Fund (the "Pricing Policies") and applicable law, portfolio securities are valued at current market value or at fair value. The Board of Directors has delegated to the Adviser, subject to the Board's continuing oversight, certain responsibilities with respect to the implementation of the Pricing Policies. Pursuant to the Pricing Policies, securities for which market quotations are readily available are valued at their current market value. In general, the market value of these securities is determined as follows:

Securities listed on a national securities exchange or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day. If no bid or asked prices are quoted on such day, then the security is valued in good faith at fair value in accordance with the Pricing Policies. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities not listed on an exchange but traded on The Nasdaq Stock Market, Inc. ("NASDAQ") are valued in accordance with the NASDAQ Official Closing Price; listed put or call options are valued at the last sale price. If there has been no sale on that day, such securities will be valued at the closing bid prices on that day; open futures contracts and options thereon are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuations, the last available closing settlement price is used; securities traded in the over-the-counter market, (but excluding securities traded on NASDAQ) are valued at the mean of the current bid and asked prices as reported by the National Quotation Bureau or other comparable sources; U.S. Government securities and other debt instruments having 60 days or less remaining until maturity are valued at amortized cost if their original maturity was 60 days or less, or by amortizing their fair value as of the 61st day prior to maturity if their original term to maturity exceeded 60 days; fixed-income securities, including mortgage backed and asset backed securities, may be valued on the basis of prices

provided by a pricing service or at a price obtained from one or more of the major broker/dealers. In cases where broker/dealer quotes are obtained, the Pricing Policies provide that the Adviser may establish procedures whereby changes in market yields or spreads are used to adjust, on a daily basis, a recently obtained quoted price on a security; and OTC and other derivatives are valued on the basis of a quoted bid price or spread from a major broker/dealer in such security. Securities for which market quotations are not readily available are valued at fair value in accordance with the Pricing Policies.

2. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provision for federal income or excise taxes is required.

3. Investment Income and Investment Transactions

Interest income is accrued daily. Investment transactions are accounted for on the date securities are purchased or sold. Investment gains and losses are determined on the identified cost basis. The Fund accretes discounts as adjustments to interest income. Additionally, the Fund amortizes premiums on debt securities for financial statement reporting purposes.

4. Dividends and Distributions

Dividends and distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with accounting principles generally accepted in the United States. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

NOTE B

Advisory, Administrative Fees and Other Affiliated Transactions

Under the terms of the Investment Advisory Agreement, the Fund pays Alliance Capital Management L.P. (the "Adviser") an advisory fee at an annual rate of 1% of the Fund's average weekly net assets. Such fee is accrued daily and paid monthly.

Under the terms of the Administration Agreement, the Fund pays the Adviser an administrative fee at an annual rate of .15 of 1% of the Fund's average weekly net assets. Such fee is accrued daily and paid monthly. The Adviser provides administrative functions as well as other clerical services to the Fund and prepares financial and regulatory reports.

The Fund entered into a Shareholder Inquiry Agency Agreement with Alliance Global Investor Services, Inc. (AGIS), a wholly-owned subsidiary of the Adviser,

16 o Alliance World Dollar Government Fund II

whereby the Fund reimburses AGIS for costs relating to servicing phone inquiries on behalf of the Fund. During the six months ended September 30, 2003, there was no reimbursement paid to AGIS.

Edgar Filing: ALLIANCE WORLD DOLLAR GOVERNMENT FUND II INC - Form N-CSR

NOTE C

Investment Transactions

Purchases and sales of investment securities (excluding short-term investments) for the period ended September 30, 2003, were as follows:

	Purchases	Sales
	-----	-----
Investment securities (excluding U.S. government securities).....	\$ 729,449,459	\$ 841,582,328
U.S. government securities.....	-0-	-0-

The cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes. Accordingly, gross unrealized appreciation and unrealized depreciation (excluding written options and swap contracts) are as follows:

Gross unrealized appreciation.....	\$ 170,866,634
Gross unrealized depreciation.....	(6,855,990)

Net unrealized appreciation.....	\$ 164,010,644

1. Option Transactions

For hedging and investment purposes, the Fund may purchase and write (sell) put and call options on U.S. and foreign government securities and foreign currencies that are traded on U.S. and foreign securities exchanges and over-the-counter markets.

The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has real-

Alliance World Dollar Government Fund II o 17

ized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option

Edgar Filing: ALLIANCE WORLD DOLLAR GOVERNMENT FUND II INC - Form N-CSR

written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value.

Transactions in written options for the six months ended September 30, 2003, were as follows:

	Number of Contracts	Premiums Received
	-----	-----
Options outstanding at March 31, 2003	36,595,124	\$ 508,492
Options written.....	22,132,883	331,464
Options terminated in closing purchase transactions.....	(44,353,007)	(632,618)
Options expired.....	(7,800,000)	(138,300)
	-----	-----
Options outstanding at September 30, 2003.....	6,575,000	\$ 69,038
	-----	-----

2. Swap Agreements

The Fund may enter into swaps to hedge its exposure to interest rates and credit risk or for investment purposes. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net interest payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities.

The Fund records a net receivable or payable on a daily basis for the net interest income or expense expected to be received or paid in the interest period. Net interest received or paid on these contracts is recorded as interest income (or as an offset to interest income). Fluctuations in the value of swap contracts are recorded for financial statement purposes as a component of net change in unrealized appreciation/depreciation of investments. Realized gains and/or loss from terminated swap contracts are included in net realized gain or loss on investment transactions.

18 o Alliance World Dollar Government Fund II

The Fund may enter into credit default swaps. A sell/(buy) in a credit default swap provides upon the occurrence of a credit event, as defined in the swap agreement, for the Fund to buy/(sell) from/(to) the Counterparty at par and take/(deliver) the principal amount (the "Notional Amount") of the referenced obligation. During the term of the swap agreement, the Fund receives/(pays) semi-annual fixed interest payments from/(to) the respective Counterparty, calculated at the agreed upon interest rate applied to the Notional Amount.

Edgar Filing: ALLIANCE WORLD DOLLAR GOVERNMENT FUND II INC - Form N-CSR

Credit default swaps may involve greater risks than if a Fund had invested in the referenced obligation directly. Credit default swaps are subject to general market risk, liquidity risk and credit risk. If the Fund is a buyer and no credit event occurs, it will lose its investment. In addition, the value of the referenced obligation received by the Fund as a seller if a credit event occurs, coupled with the periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to the Fund.

3. Reverse Repurchase Agreements

Under a reverse repurchase agreement, the Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing liquid assets having a value at least equal to the repurchase price.

"Due from broker" shown on the statement of assets and liabilities represents the receivable from the respective broker for the reverse repurchase agreements entered into on September 24, 2003.

For the six months ended September 30, 2003, the average amount of reverse repurchase agreements outstanding was \$87,633,544 and the daily weighted average annualized interest rate was 1.01%.

NOTE D

Capital Stock

There are 100,000,000 shares of \$0.01 par value common stock authorized. Of the 77,850,368 shares outstanding at September 30, 2003, the Adviser owned 7,200 shares. During the six months ended September 30, 2003 and the year ended March 31, 2003, the Fund issued no shares in connection with the Fund's dividend reinvestment plan.

NOTE E

Concentration of Risk

Investing in securities of foreign companies and foreign governments involves special risks, which include changes in foreign exchange rates and the possibility of future political and economic developments which could adversely affect the value of such securities. Moreover, securities of many foreign companies and for-

Alliance World Dollar Government Fund II o 19

eign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies and the United States government.

NOTE F

Distributions to Shareholders

The tax character of distributions to be paid for the year ending March 31, 2004 will be determined at the end of the current fiscal year. The tax character of distributions paid during the fiscal years ended March 31, 2003 and March 31, 2002 were as follows:

2003

2002

Edgar Filing: ALLIANCE WORLD DOLLAR GOVERNMENT FUND II INC - Form N-CSR

Distributions paid from:

Ordinary income.....	\$ 82,323,739	\$ 101,219,354
	-----	-----
Total taxable distributions.....	82,323,739	101,219,354
	-----	-----
Total distributions paid.....	\$ 82,323,739	\$ 101,219,354
	-----	-----

As of March 31, 2003, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Undistributed ordinary income.....	\$ 4,884,899
Accumulated capital and other losses.....	(354,176,827) (a)
Unrealized appreciation/(depreciation).....	189,475,023 (b)

Total accumulated earnings/(deficit).....	\$ (159,816,905)

- (a) On March 31, 2003, the Fund had a net capital loss carryforward of \$353,038,174 of which \$103,516,115 expires in the year 2007, \$43,184,734 expires in the year 2008, \$68,859,018 expires in the year 2009, \$78,955,786 expires in the year 2010 and \$58,522,521 expires in the year 2011. To the extent future capital gains are offset by capital loss carryforwards, such gains will not be distributed. Net capital losses incurred after October 31, and within the taxable year are deemed to arise on the first business day of the Fund's next taxable year. For the year ended March 31, 2003, the Fund deferred to April 1, 2003, post October capital losses of \$1,138,653.
- (b) The difference between book-basis and tax-basis unrealized appreciation/depreciation is attributable primarily to the tax deferral of losses on wash sales and the difference between book and tax amortization methods for premium.

See footnote summary on page 22.

Alliance World Dollar Government Fund II o 21

(a) As required, effective April 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide, Audits of Investment Companies, and began amortizing premium on debt securities for financial statement reporting purposes only. The effect of this change for the year ended March 31, 2002 was to decrease net investment income per share by \$.01, increase net realized and unrealized gain on investments per share by \$.01, and decrease the ratio of net investment income to average net assets from 12.74% to 12.69%. Per share, ratios and supplemental data for periods prior to April 1, 2001 have not been restated to reflect this change in presentation.

(b) Based on average shares outstanding.

(c) Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a

Edgar Filing: ALLIANCE WORLD DOLLAR GOVERNMENT FUND II INC - Form N-CSR

decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total investment return calculated for a period of less than one year is not annualized.

(d) Annualized.

* Formerly Growth Investors Fund.

** Formerly Conservative Investors Fund.

Quasar Fund changed its name to Small Cap Growth Fund on 11/3/03.

An investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the Fund.

24 o Alliance World Dollar Government Fund II

SUMMARY OF GENERAL INFORMATION

Shareholder Information

The daily net asset value of the Fund's shares is available from the Fund's Transfer Agent by calling (800) 426-5523. The Fund also distributes its daily net asset value (NAV) to various financial publications or independent organizations such as Lipper Analytical Services, Inc., Morningstar, Inc. and Bloomberg. Daily market prices for the Fund's shares are published in the New York Stock Exchange Composite Transactions Section of different newspapers each day. The Fund's NYSE trading symbol is "AWF." Weekly comparative net asset value and market price information about the Fund is published each Monday in the Wall Street Journal, each Sunday in the New York Times and each Saturday in Barron's and other newspapers in a table called "Closed-End Funds."

Dividend Reinvestment Plan

Edgar Filing: ALLIANCE WORLD DOLLAR GOVERNMENT FUND II INC - Form N-CSR

If your shares are held in your own name, you will automatically be a participant in the Plan unless you elect to receive cash. If your shares are held in nominee or street name through a broker or nominee who provides this service, you will also automatically be a participant in the Plan. If your shares are held in the name of a broker or nominee who does not provide this service, you will need to instruct them to participate in the Plan on your behalf or your distributions will not be reinvested. In such case, you will receive your distributions in cash.

For questions concerning shareholder account information, or if you would like a brochure describing the Divi-dend Reinvestment Plan, please call Equiserve Trust Company, N.A. at (800) 219-4218.
