prospectus dated September 28, 2012 and
prospectus addendum dated December 24, 2014

Registration Statement No. 333-184193

Dated January 22, 2015; Rule 433

Deutsche Bank AG

\$ Capped Buffered Underlying Securities (BUyS) Linked to the S&P GSCI® Crude Oil Index — Excess Return due

General

- The Capped Buffered Underlying Securities (BUyS) Linked to the S&P GSCI® Crude Oil Index — Excess Return due (the “BUyS”) are designed for investors who seek a return at maturity of 150.00% of any increase in the level of the S&P GSCI® Crude Oil Index — Excess Return (the “Underlying”), up to the Maximum Return of 90.00%. If the Final Level is less than the Initial Level by an amount not greater than the Buffer Amount of 40.00%, investors will receive at maturity the Face Amount per \$1,000 Face Amount of BUyS. However, if the Final Level is less than the Initial Level by an amount greater than the Buffer Amount of 40.00%, for each \$1,000 Face Amount of BUyS, investors will lose 1.6667% of the Face Amount for every 1.00% by which the Final Level is less than the Initial Level by an amount greater than the Buffer Amount. The BUyS do not pay any coupons and investors should be willing to lose some or all of their initial investment if the Final Level is less than the Initial Level by an amount greater than the Buffer Amount. Any payment on the BUyS is subject to the credit of the Issuer.
- Senior unsecured obligations of Deutsche Bank AG due
- Minimum purchase of \$10,000. Minimum denominations of \$1,000 (the “Face Amount”) and integral multiples thereof.
- The BUyS are expected to price on or about January 23, 2015 (the “Trade Date”) and are expected to settle on or about January 28, 2015 (the “Settlement Date”).

Key Terms

Issuer: Deutsche Bank AG, London Branch

Underlying: S&P GSCI® Crude Oil Index — Excess Return (Ticker: SPGCCLP)

Issue Price: 100% of the Face Amount

Payment at Maturity: · If the Final Level is greater than or equal to the Initial Level, you will receive a cash payment at maturity per \$1,000 Face Amount of BUyS calculated as follows:

$\$1,000 + (\$1,000 \times \text{the lesser of (i) Underlying Return} \times \text{Upside Leverage Factor and (ii) Maximum Return})$

· If the Final Level is less than the Initial Level by an amount not greater than the Buffer Amount, you will receive a cash payment at maturity equal to \$1,000 per \$1,000 Face Amount of BUyS.

· If the Final Level is less than the Initial Level by an amount greater than the Buffer Amount, you will receive a cash payment at maturity per \$1,000 Face Amount of BUyS calculated as follows:

$\$1,000 + [\$1,000 \times (\text{Underlying Return} + \text{Buffer Amount}) \times \text{Downside Participation Factor}]$

If the Final Level is less than the Initial Level by an amount greater than the Buffer Amount, for each \$1,000 Face Amount of BUyS, you will lose 1.6667% of the Face Amount for every 1.00% by which the Final Level is less than the Initial Level by an amount greater

than the Buffer Amount. In this circumstance, you will lose some or all of your initial investment at maturity. Any payment at maturity is subject to the credit of the Issuer.

Underlying Return: The Underlying Return, expressed as a percentage, will equal:

$$\frac{\text{Final Level} - \text{Initial Level}}{\text{Initial Level}}$$

The Underlying Return may be positive, zero or negative.

(Key Terms continued on next page)

Investing in the BUyS involves a number of risks. See “Risk Factors” beginning on page 7 of the accompanying product supplement and “Selected Risk Considerations” beginning on page TS-8 of this term sheet.

The Issuer’s estimated value of the BUyS on the Trade Date is approximately \$940.00 to \$980.00 per \$1,000 Face Amount of BUyS, which is less than the Issue Price. Please see “Issuer’s Estimated Value of the BUyS” on page TS-3 of this term sheet for additional information.

By acquiring the BUyS, you will be bound by, and deemed to consent to, the imposition of any Resolution Measure (as defined below) by our competent resolution authority, which may include the write down of all, or a portion, of any payment on the BUyS. If any Resolution Measure becomes applicable to us, you may lose some or all of your investment in the BUyS. Please see “Resolution Measures” on page TS-4 of this term sheet for more information.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the BUyS or passed upon the accuracy or the adequacy of this term sheet or the accompanying underlying supplement, product supplement, prospectus supplement, prospectus or prospectus addendum. Any representation to the contrary is a criminal offense.

| | Price to Public | Maximum Discounts and Commissions(1) | Minimum Proceeds to Us |
|--------------|-----------------|--------------------------------------|------------------------|
| Per Security | \$1,000.00 | \$12.50 | \$987.50 |
| Total | \$ | \$ | \$ |

(1) For more detailed information about discounts and commissions, please see “Supplemental Underwriting Information (Conflicts of Interest)” in this term sheet. The BUyS will be sold with varying underwriting discounts and commissions in an amount not to exceed \$12.50 per \$1,000 Face Amount of BUyS.

The agent for this offering is our affiliate. For more information see “Supplemental Underwriting Information (Conflicts of Interest)” in this term sheet.

The BUyS are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

1 Subject to adjustment as described under “Description of Securities — Adjustments to Valuation Dates and Payment Dates” in the accompanying product supplement.

2 Subject to postponement as described under “Description of Securities — Adjustments to Valuation Dates and Payment Dates” and acceleration as described under “Description of Securities — Adjustments to Valuation Dates and Payment Dates — Commodity Hedging Disruption Events for Commodity Based Underlyings or Basket Components” in the accompanying product supplement.

Issuer's Estimated Value of the BUyS

The Issuer's estimated value of the BUyS is equal to the sum of our valuations of the following two components of the BUyS: (i) a bond and (ii) an embedded derivative(s). The value of the bond component of the BUyS is calculated based on the present value of the stream of cash payments associated with a conventional bond with a principal amount equal to the Face Amount of BUyS, discounted at an internal funding rate, which is determined primarily based on our market-based yield curve, adjusted to account for our funding needs and objectives for the period matching the term of the BUyS. The internal funding rate is typically lower than the rate we would pay when we issue conventional debt securities on equivalent terms. This difference in funding rate, as well as the agent's commissions, if any, and the estimated cost of hedging our obligations under the BUyS, reduces the economic terms of the BUyS to you and is expected to adversely affect the price at which you may be able to sell the BUyS in any secondary market. The value of the embedded derivative(s) is calculated based on our internal pricing models using relevant parameter inputs such as expected interest rates and mid-market levels of price and volatility of the assets underlying the BUyS or any futures, options or swaps related to such underlying assets. Our internal pricing models are proprietary and rely in part on certain assumptions about future events, which may prove to be incorrect.

The Issuer's estimated value of the BUyS on the Trade Date (as disclosed on the cover of this term sheet) is less than the Issue Price of the BUyS. The difference between the Issue Price and the Issuer's estimated value of the BUyS on the Trade Date is due to the inclusion in the Issue Price of the agent's commissions, if any, and the cost of hedging our obligations under the BUyS through one or more of our affiliates. Such hedging cost includes our or our affiliates' expected cost of providing such hedge, as well as the profit we or our affiliates expect to realize in consideration for assuming the risks inherent in providing such hedge.

The Issuer's estimated value of the BUyS on the Trade Date does not represent the price at which we or any of our affiliates would be willing to purchase your BUyS in the secondary market at any time. Assuming no changes in market conditions or our creditworthiness and other relevant factors, the price, if any, at which we or our affiliates would be willing to purchase the BUyS from you in secondary market transactions, if at all, would generally be lower than both the Issue Price and the Issuer's estimated value of the BUyS on the Trade Date. Our purchase price, if any, in secondary market transactions will be based on the estimated value of the BUyS determined by reference to (i) the then-prevailing internal funding rate (adjusted by a spread) or another appropriate measure of our cost of funds and (ii) our pricing models at that time, less a bid spread determined after taking into account the size of the repurchase, the nature of the assets underlying the BUyS and then-prevailing market conditions. The price we report to financial reporting services and to distributors of our BUyS for use on customer account statements would generally be determined on the same basis. However, during the period of approximately three months beginning from the Trade Date, we or our affiliates may, in our sole discretion, increase the purchase price determined as described above by an amount equal to the declining differential between (a) the Issue Price minus the discounts and commissions and (b) the Issuer's estimated value of the BUyS on the Trade Date, prorated over such period on a straight-line basis, for transactions that are individually and in the aggregate of the expected size for ordinary secondary market repurchases.

Resolution Measures

On May 15, 2014, the European Parliament and the Council of the European Union published a directive for establishing a framework for the recovery and resolution of credit institutions and investment firms (commonly referred to as the “Bank Recovery and Resolution Directive”). The Bank Recovery and Resolution Directive requires each member state of the European Union to adopt and publish by December 31, 2014 the laws, regulations and administrative provisions necessary to comply with the Bank Recovery and Resolution Directive. Germany has adopted the Recovery and Resolution Act (Sanierungs- und Abwicklungsgesetz, or “SAG”), which went into effect on January 1, 2015. SAG may result in the BUyS being subject to any Resolution Measure by our competent resolution authority if we become, or are deemed by our competent supervisory authority to have become, “non-viable” (as defined under the then applicable law) and are unable to continue our regulated banking activities without a Resolution Measure becoming applicable to us. By acquiring the BUyS, you will be bound by and deemed to consent to the provisions set forth in the accompanying prospectus addendum, which we have summarized below.

By acquiring the BUyS, you will be bound by and will be deemed to consent to the imposition of any Resolution Measure by our competent resolution authority. Under the relevant resolution laws and regulations as applicable to us from time to time, the BUyS may be subject to the powers exercised by our competent resolution authority to: (i) write down, including to zero, any payment (or delivery obligations) on the BUyS; (ii) convert the BUyS into ordinary shares or other instruments qualifying as core equity tier 1 capital; and/or (iii) apply any other resolution measure, including (but not limited to) any transfer of the BUyS to another entity, the amendment of the terms and conditions of the BUyS or the cancellation of the BUyS. We refer to each of these measures as a “Resolution Measure.”

Furthermore, by acquiring the BUyS, you:

- are deemed irrevocably to have agreed, and you will agree: (i) to be bound by any Resolution Measure; (ii) that you will have no claim or other right against us arising out of any Resolution Measure; (iii) and that the imposition of any Resolution Measure will not constitute a default or an event of default under the BUyS, under the senior indenture dated November 22, 2006 among us, Law Debenture Trust Company of New York, as trustee, and Deutsche Bank Trust Company Americas, as issuing agent, paying agent, authenticating agent and registrar, as amended and supplemented from time to time (the “Indenture”), or for the purpose of the Trust Indenture Act of 1939, as amended (the “Trust Indenture Act”);
- waive, to the fullest extent permitted by the Trust Indenture Act and applicable law, any and all claims against the trustee and the paying agent for, agree not to initiate a suit against the trustee and the paying agent in respect of, and agree that neither the trustee nor the paying agent will be liable for, any action that the trustee or the paying agent takes, or abstains from taking, in either case in accordance with the imposition of a Resolution Measure by our competent resolution authority with respect to the BUyS; and
- will be deemed irrevocably to have (i) consented to the imposition of any Resolution Measure as it may be imposed without any prior notice by the competent resolution authority of its decision to exercise such power with respect to the BUyS and (ii) authorized, directed and requested The Depository Trust Company (the “Depository”) and any participant in the Depository or other intermediary through which you hold such BUyS to take any and all necessary action, if required, to implement the imposition of any Resolution Measure with respect to the BUyS as it may be imposed, without any further action or direction on your part or on the part of the trustee, paying agent, issuing agent, authenticating agent, registrar or calculation agent.

This is only a summary, for more information please see the accompanying prospectus addendum dated December 24, 2014, including the risk factor “The securities may be written down, be converted or become subject to other resolution measures. You may lose part or all of your investment if any such measure becomes applicable to us” on page 2 of the prospectus addendum.

Additional Terms Specific to the BUyS

You should read this term sheet together with underlying supplement No. 1 dated October 1, 2012, product supplement AF dated September 28, 2012, the prospectus supplement dated September 28, 2012 relating to our Series A global notes of which these BUyS are a part, the prospectus dated September 28, 2012 and the prospectus addendum dated December 24, 2014. You may access these documents on the website of the Securities and Exchange Commission (the “SEC”) at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

- Underlying supplement No. 1 dated October 1, 2012:
http://www.sec.gov/Archives/edgar/data/1159508/000095010312005120/crt_dp33209-424b2.pdf
- Product supplement AF dated September 28, 2012:
http://www.sec.gov/Archives/edgar/data/1159508/000095010312005082/crt_dp33006-424b2.pdf
- Prospectus supplement dated September 28, 2012:
<http://www.sec.gov/Archives/edgar/data/1159508/000119312512409437/d414995d424b21.pdf>
- Prospectus dated September 28, 2012:
<http://www.sec.gov/Archives/edgar/data/1159508/000119312512409372/d413728d424b21.pdf>
- Prospectus addendum dated December 24, 2014:
http://www.sec.gov/Archives/edgar/data/1159508/000095010314009034/crt_52088.pdf

Our Central Index Key, or CIK, on the SEC website is 0001159508. As used in this term sheet, “we,” “us” or “our” refers to Deutsche Bank AG, including, as the context requires, acting through one of its branches.

The trustee has appointed Deutsche Bank Trust Company Americas as its authenticating agent with respect to our Series A global notes.

This term sheet, together with the documents listed above, contains the terms of the BUyS and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in this term sheet and in “Risk Factors” in the accompanying product supplement and prospectus addendum, as the BUyS involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before deciding to invest in the BUyS.

Deutsche Bank AG has filed a registration statement (including a prospectus) with the Securities and Exchange Commission for the offering to which this term sheet relates. Before you invest, you should read the prospectus in that registration statement and the other documents relating to this offering that Deutsche Bank AG has filed with the SEC for more complete information about Deutsche Bank AG and this offering. You may obtain these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, Deutsche Bank AG, any agent or any dealer participating in this offering will arrange to send you the prospectus, prospectus addendum, prospectus supplement, product supplement, underlying supplement and this term sheet if you so request by calling toll-free 1-800-311-4409.

You may revoke your offer to purchase the BUyS at any time prior to the time at which we accept such offer by notifying the applicable agent. We reserve the right to change the terms of, or reject any offer to purchase, the BUyS

prior to their issuance. We will notify you in the event of any changes to the terms of the BUyS, and you will be asked to accept such changes in connection with your purchase of any BUyS. You may also choose to reject such changes, in which case we may reject your offer to purchase the BUyS.

TS-5

What Are the Possible Payments on the BUyS, Assuming a Range of Hypothetical Performances for the Underlying?

The table below illustrates the Payment at Maturity per \$1,000 Face Amount of BUyS for a hypothetical range of performances for the Underlying from -100.00% to +100.00%. The table below reflects the Upside Leverage Factor of 150.00%, the Maximum Return of 90.00%, the Buffer Amount of 40.00% and the Downside Participation Factor of 166.67%. The actual Initial Level will be determined on the Trade Date. The following results are based solely on the hypothetical examples cited. You should consider carefully whether the BUyS are suitable to your investment goals. The numbers appearing in the table and examples below may have been rounded for ease of analysis.

| Underlying Return (%) | Payment at Maturity (\$) | Return on BUyS (%) |
|--------------------------|--------------------------|--------------------|
| 100.00% | \$1,900.00 | 90.00% |
| 75.00% | \$1,900.00 | 90.00% |
| 60.00% | \$1,900.00 | 90.00% |
| 50.00% | \$1,750.00 | 75.00% |
| 25.00% | \$1,375.00 | 37.50% |
| 15.00% | \$1,225.00 | 22.50% |
| 10.00% | \$1,150.00 | 15.00% |
| 5.00% | \$1,075.00 | 7.50% |
| 0.00% | \$1,000.00 | 0.00% |
| -5.00% | \$1,000.00 | 0.00% |
| -10.00% | \$1,000.00 | 0.00% |
| -20.00% | \$1,000.00 | 0.00% |
| -30.00% | \$1,000.00 | 0.00% |
| -40.00% | \$1,000.00 | 0.00% |
| -50.00% | \$833.33 | -16.67% |
| -75.00% | \$416.66 | -58.33% |
| -100.00% | \$0.00 | -100.00% |

Hypothetical Examples of Amounts Payable at Maturity

The following hypothetical examples illustrate how the payments on the BUyS at maturity set forth in the table above are calculated.

Example 1: The Final Level is greater than the Initial Level, resulting in an Underlying Return of 75.00%. Because the Final Level is greater than the Initial Level and the Underlying Return of 75.00% multiplied by the Upside Leverage Factor is greater than the Maximum Return, the investor receives a Payment at Maturity of \$1,900.00 per \$1,000 Face Amount of BUyS, the maximum payment on the BUyS, calculated as follows:

$$\begin{aligned} & \$1,000 + (\$1,000 \times \text{the lesser of (i) Underlying Return} \times \text{Upside Leverage Factor and (ii) Maximum Return}) \\ & \qquad \qquad \qquad \$1,000 + (\$1,000 \times 90.00\%) = \$1,900.00 \end{aligned}$$

Selected Purchase Considerations

THE APPRECIATION POTENTIAL OF THE BUYS IS LIMITED — The BUyS provide leveraged upside exposure to any increase in the level of the Underlying, up to the Maximum Return of 90.00%. Consequently, the maximum Payment at Maturity will be \$1,900.00 for each \$1,000 Face Amount of BUyS you hold. Any payment on the BUyS is subject to our ability to satisfy our obligations as they become due.

LIMITED PROTECTION AGAINST LOSS — Payment at maturity of the Face Amount of BUyS is protected against a percentage decline in the Final Level, as compared to the Initial Level, of up to the Buffer Amount. If such percentage decline is greater than the Buffer Amount of 40.00%, for each \$1,000 Face Amount of BUyS, you will lose 1.6667% of the Face Amount for every 1.00% by which the Final Level is less than the Initial Level by an amount greater than the Buffer Amount. In this circumstance, you will lose some or all of your investment in the BUyS.

A COMMODITY HEDGING DISRUPTION EVENT MAY RESULT IN ACCELERATION OF THE BUYS — If a Commodity Hedging Disruption Event (as defined under “Description of Securities — Adjustments to Valuation Dates and Payment Dates — Commodity Hedging Disruption Events for Commodity Based Underlyings or Basket Components” in the accompanying product supplement) occurs, we will have the right, but not the obligation, to accelerate the payment on the BUyS. The amount due and payable per \$1,000 Face Amount of BUyS upon such early acceleration will be determined by the calculation agent in good faith and in a commercially reasonable manner on the date on which we deliver notice of such acceleration and will be payable on the fifth business day following the day on which the calculation agent delivers notice of such acceleration. Please see the risk factors entitled “A Commodity Hedging Disruption Event May Result in Acceleration of the BUyS” and “Commodity Futures Contracts are Subject to Uncertain Legal and Regulatory Regimes, Which May Adversely Affect the Level of the Underlying and the Value of the BUyS” in this term sheet for more information.

RETURN LINKED TO THE PERFORMANCE OF THE S&P GSCI® CRUDE OIL INDEX — EXCESS RETURN — The return on the BUyS, which may be positive, zero or negative, is linked to the performance of the S&P GSCI® Crude Oil Index — Excess Return as described herein. The S&P GSCI® Crude Oil Index — Excess Return is a sub-index of the S&P GSCI® – Excess Return (the “S&P GSCI® – ER”). It is composed entirely of WTI crude oil futures contracts (the “Index Constituents”), and excludes all other futures contracts included in the S&P GSCI® – ER. The Underlying provides investors with a publicly available benchmark for investment performance in the WTI crude oil markets. The Underlying is calculated on an excess return basis using the same methodology as the S&P GSCI® – ER, except that: (i) the daily contract reference prices, contract production weights and contract roll weights used in performing such calculations are limited to the Index Constituents included in the Underlying; and (ii) the Underlying has a separate normalizing constant. The S&P GSCI® – ER is composed of futures contracts on 24 physical commodities and is designed as a benchmark for investment in the commodity markets and as a measure of commodity market performance over time. The futures contracts on such commodities are weighted, on a production basis, to reflect the relative significance of such commodities to the world economy. Because futures contracts specify a certain date for delivery of the underlying commodity, the futures contracts composing the Underlying will change over time, as expiring contracts are replaced by contracts with later expiration dates. Consequently, the Underlying reflects the return of the futures contracts included in the Underlying and also the positive or negative impact of “rolling” hypothetical positions in such contracts forward as they approach delivery.

For more information on the S&P GSCI® Crude Oil Index — Excess Return, including information concerning its composition, calculation methodology and adjustment policy, please see the section entitled “The S&P Dow Jones Indices – The S&P GSCI® Commodity Indices” in the accompanying underlying supplement No. 1 dated October 1, 2012.

TAX CONSEQUENCES — In the opinion of our special tax counsel, Davis Polk & Wardwell LLP, which is based on prevailing market conditions, it is more likely than not that the BUyS will be treated for U.S. federal income tax purposes as prepaid financial contracts that are not debt. Generally, if this treatment is respected, (i) you should not recognize taxable income or loss prior to the taxable disposition of your BUyS (including at maturity) and (ii) the gain or loss on your BUyS should be capital gain or loss and should be long-term capital gain or loss if you have held the BUyS for more than one year. The Internal Revenue Service (the “IRS”) or a court might not agree with this treatment, however, in which case the timing and character of income or loss on your BUyS could be materially and adversely affected.

TS-7

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether beneficial owners of these instruments should be required to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. persons should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose a notional interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the BUyS, possibly with retroactive effect.

You should review carefully the section of the accompanying product supplement entitled “U.S. Federal Income Tax Consequences.” The preceding discussion, when read in combination with that section, constitutes the full opinion of our special tax counsel regarding the material U.S. federal income tax consequences of owning and disposing of the BUyS.

Under current law, the United Kingdom will not impose withholding tax on payments made with respect to the BUyS.

For a discussion of certain German tax considerations relating to the BUyS, you should refer to the section in the accompanying prospectus supplement entitled “Taxation by Germany of Non-Resident Holders.”

You should consult your tax adviser regarding the U.S. federal tax consequences of an investment in the BUyS (including possible alternative treatments and the issues presented by the 2007 notice), as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Selected Risk Considerations

An investment in the BUyS involves significant risks. Investing in the BUyS is not equivalent to investing directly in the futures contracts composing the Underlying. In addition to these selected risk considerations, you should review the “Risk Factors” section of the accompanying product supplement and prospectus addendum.

- **YOUR INVESTMENT IN THE BUYS MAY RESULT IN A LOSS** — The BUyS do not pay any coupons and do not guarantee any return of your investment. The return on the BUyS at maturity is linked to the performance of the Underlying and will depend on whether, and the extent to which, the Underlying Return is positive, zero or negative. If the Final Level is less than the Initial Level by an amount greater than the Buffer Amount, for each \$1,000 Face Amount of BUyS, you will lose 1.6667% of the Face Amount for every 1.00% by which the Final Level is less than the Initial Level by an amount greater than the Buffer Amount. In this circumstance, you will lose some or all of your investment in the BUyS. Any payment on the BUyS is subject to our ability to satisfy our obligations as they become due.
- **THE RETURN ON YOUR BUYS IS LIMITED BY THE MAXIMUM RETURN** — If the Final Level is greater than or equal to the Initial Level, for each \$1,000 Face Amount of BUyS, you will receive at maturity \$1,000 plus an amount equal to \$1,000 multiplied by the lesser of (i) the Underlying Return times the Upside Leverage Factor of 150.00% and (ii) the Maximum Return of 90.00%. Consequently, the maximum Payment at Maturity will be \$1,900.00 for each \$1,000 Face Amount of BUyS you hold, regardless of any further increase in the level of the Underlying, which may be significant.

- **THE MATURITY DATE OF THE BUYS IS A PRICING TERM AND WILL BE DETERMINED BY THE ISSUER ON THE TRADE DATE** — We will not determine the Maturity Date until the Trade Date, so you will not know the exact term of, or the Final Valuation Date for, the BUyS at the time that you make your investment decision. The term of the BUyS could be as short as the shorter end of the Maturity Date range described on the cover of this term sheet, and as long as the longer end of the Maturity Date range. You should be willing to hold your BUyS until the latest possible Maturity Date contemplated by the range. The Maturity Date selected by us could have an impact on the value of the BUyS. Assuming no changes in other economic terms of the BUyS, the value of the BUyS would likely be lower if the term of the BUyS is at the longer end of the Maturity Date range, rather than the shorter end of the Maturity Date range.
- **THE BUYS DO NOT PAY ANY COUPONS** — Unlike ordinary debt securities, the BUyS do not pay any coupons and do not guarantee any return of your investment at maturity.

TS-8

- **THE BUYS ARE SUBJECT TO THE CREDIT OF DEUTSCHE BANK AG** — The BUyS are senior unsecured obligations of Deutsche Bank AG and are not, either directly or indirectly, an obligation of any third party. Any payment(s) to be made on the BUyS depends on the ability of Deutsche Bank AG to satisfy its obligations as they come due. An actual or anticipated downgrade in Deutsche Bank AG’s credit rating or increase in the credit spreads charged by the market for taking the credit risk of Deutsche Bank AG will likely have an adverse effect on the value of the BUyS. As a result, the actual and perceived creditworthiness of Deutsche Bank AG will affect the value of the BUyS and in the event Deutsche Bank AG were to default on its obligations or become subject to a Resolution Measure, you might not receive any amount(s) owed to you under the terms of the BUyS and you could lose your entire investment.
- **THE ISSUER’S ESTIMATED VALUE OF THE BUYS ON THE TRADE DATE WILL BE LESS THAN THE ISSUE PRICE OF THE BUYS** — The Issuer’s estimated value of the BUyS on the Trade Date (as disclosed on the cover of this term sheet) is less than the Issue Price of the BUyS. The difference between the Issue Price and the Issuer’s estimated value of the BUyS on the Trade Date is due to the inclusion in the Issue Price of the agent’s commissions, if any, and the cost of hedging our obligations under the BUyS through one or more of our affiliates. Such hedging cost includes our or our affiliates’ expected cost of providing such hedge, as well as the profit we or our affiliates expect to realize in consideration for assuming the risks inherent in providing such hedge. The Issuer’s estimated value of the BUyS is determined by reference to an internal funding rate and our pricing models. The internal funding rate is typically lower than the rate we would pay when we issue conventional debt securities on equivalent terms. This difference in funding rate, as well as the agent’s commissions, if any, and the estimated cost of hedging our obligations under the BUyS, reduces the economic terms of the BUyS to you and is expected to adversely affect the price at which you may be able to sell the BUyS in any secondary market. In addition, our internal pricing models are proprietary and rely in part on certain assumptions about future events, which may prove to be incorrect. If at any time a third party dealer were to quote a price to purchase your BUyS or otherwise value your BUyS, that price or value may differ materially from the estimated value of the BUyS determined by reference to our internal funding rate and pricing models. This difference is due to, among other things, any difference in funding rates, pricing models or assumptions used by any dealer who may purchase the BUyS in the secondary market.
- **THE BUYS MAY BE WRITTEN DOWN, BE CONVERTED OR BECOME SUBJECT TO OTHER RESOLUTION MEASURES. YOU MAY LOSE SOME OR ALL OF YOUR INVESTMENT IF ANY SUCH MEASURE BECOMES APPLICABLE TO US** — On May 15, 2014, the European Parliament and the Council of the European Union published the Bank Recovery and Resolution Directive for establishing a framework for the recovery and resolution of credit institutions and investment firms. The Bank Recovery and Resolution Directive requires each member state of the European Union to adopt and publish by December 31, 2014 the laws, regulations and administrative provisions necessary to comply with the Bank Recovery and Resolution Directive. Germany has adopted the Recovery and Resolution Act (or SAG), which went into effect on January 1, 2015. SAG may result in the BUyS being subject to the powers exercised by our competent resolution authority to impose a Resolution Measure on us, which may include: writing down, including to zero, any payment on the BUyS; converting the BUyS into ordinary shares or other instruments qualifying as core equity tier 1 capital; or applying any other resolution measure, including (but not limited to) transferring the BUyS to another entity, amending the terms and conditions of the BUyS or cancelling of the BUyS.

By acquiring the BUyS, you would have no claim or other right against us arising out of any Resolution Measure, and we would have no obligation to make payments under the BUyS following the imposition of a Resolution Measure. In particular, the imposition of any Resolution Measure will not constitute a default or an event of default under the BUyS, under the Indenture or for the purpose of the Trust Indenture Act. Imposition of a Resolution Measure would likely occur if we become, or are deemed by our competent supervisory authority to have become, “non-viable” (as defined under the then applicable law) and are unable to continue our regulated banking activities

without a Resolution Measure becoming applicable to us. You may lose some or all of your investment in the BUyS if a Resolution Measure becomes applicable to us. Furthermore, because the BUyS are subject to any Resolution Measure, secondary market trading in the BUyS may not follow the trading behavior associated with similar types of securities issued by other financial institutions which may be or have been subject to a Resolution Measure.

In addition, by your acquisition of the BUyS, you waive, to the fullest extent permitted by the Trust Indenture Act and applicable law, any and all claims against the trustee and the paying agent for, agree not to initiate a suit against the trustee and the paying agent in respect of, and agree that neither the trustee nor the paying agent will be liable for, any action that the trustee or the paying agent takes, or

TS-9

abstains from taking, in either case in accordance with the imposition of a Resolution Measure by our competent resolution authority with respect to the BUyS. Accordingly, you may have limited or circumscribed rights to challenge any decision of our competent resolution authority to impose any Resolution Measure.

INVESTING IN THE BUYS IS NOT THE SAME AS INVESTING IN THE FUTURES CONTRACTS COMPOSING THE UNDERLYING — The return on your BUyS may not reflect the return you would have realized if you had directly invested in the futures contracts composing the Underlying. For instance, your return on the BUyS will be limited to the Maximum Gain regardless of any increase in the level of the Underlying, which could be significant.

IF THE LEVEL OF THE UNDERLYING CHANGES, THE VALUE OF YOUR BUYS MAY NOT CHANGE IN THE SAME MANNER — Your BUyS may trade quite differently from the level of the Underlying. Changes in the level of the Underlying may not result in comparable changes in the value of your BUyS.

YOU WILL HAVE NO RIGHTS IN EXCHANGE-TRADED FUTURES CONTRACTS COMPOSING THE UNDERLYING — As a holder of the BUyS, you will not have any rights that holders of exchange-traded futures contracts composing the Underlying may have.

A COMMODITY HEDGING DISRUPTION EVENT MAY RESULT IN ACCELERATION OF THE BUYS — If a Commodity Hedging Disruption Event occurs, we will have the right to accelerate the payment on your BUyS prior to maturity. The amount due and payable on the BUyS upon such early acceleration will be determined in good faith and in a commercially reasonable manner by the calculation agent. If the payment on your BUyS is accelerated, your investment may result in a loss and you may not be able to reinvest the proceeds in a comparable investment.

COMMODITY FUTURES CONTRACTS ARE SUBJECT TO UNCERTAIN LEGAL AND REGULATORY REGIMES, WHICH MAY ADVERSELY AFFECT THE LEVEL OF THE UNDERLYING AND THE VALUE OF THE BUYS — Commodity futures contracts that may compose the Underlying are subject to legal and regulatory regimes in the United States and, in some cases, in other countries that may change in ways that could adversely affect our ability to hedge our obligations under the BUyS and affect the level of the Underlying. The effect on the value of the BUyS of any future regulatory change is impossible to predict, but could be substantial and adverse to your interest. For example, the Dodd-Frank Wall Street Reform and Consumer Protection Act, which was enacted on July 21, 2010, provided the Commodity Futures Trading Commission (the “CFTC”) with additional authority to establish limits on the amount of positions that may be held by any person in commodity futures contracts, options on such futures contracts and swaps that are economically equivalent to such contracts. Such rules may cause a Commodity Hedging Disruption Event to occur or may increase the likelihood that a Commodity Hedging Disruption Event will occur during the term of the BUyS. If a Commodity Hedging Disruption Event does occur, we may, in our sole and absolute discretion, accelerate the payment on your BUyS early and pay you an amount determined in good faith and in a commercially reasonable manner by the calculation agent. If the payment on your BUyS is accelerated, your investment may result in a loss and you may not be able to reinvest the proceeds in a comparable investment. We may also decide, or be forced, to sell a portion, possibly a substantial portion, of our hedge position in the futures contracts composing the Underlying. Additionally, other market participants are subject to the same regulatory issues and may decide, or be required, to sell their positions in such futures contracts composing the Underlying. While the effect of these or other regulatory developments are difficult to predict, if such broad market selling were to occur, it would likely lead to declines, possibly significant declines, in the prices of such futures contracts composing the Underlying and, therefore, the level of the Underlying and the value of the BUyS.

- **S&P DOW JONES MAY BE REQUIRED TO REPLACE A DESIGNATED CONTRACT IF THE EXISTING FUTURES CONTRACT IS TERMINATED OR REPLACED** — One or more futures contracts known as designated contracts have been selected as the reference contract for WTI crude oil. See “The S&P

Dow Jones Indices – The S&P GSCI® Commodity Indices—Composition of the S&P GSCI” in the accompanying underlying supplement No. 1 dated October 1, 2012. Data concerning each designated contract will be used to calculate the Underlying. The termination or replacement of a futures contract on an established exchange occurs infrequently; if a designated contract were to be terminated or replaced by an exchange, a comparable futures contract, if available, would be selected by S&P Dow Jones to replace that designated contract. The termination or replacement of any designated contract may have an adverse impact on the level of the Underlying.

CHANGES THAT AFFECT THE CALCULATION OF THE UNDERLYING MAY ADVERSELY AFFECT THE VALUE OF THE BUYS AND THE AMOUNT YOU WILL RECEIVE AT MATURITY — The policies

TS-10

of S&P Dow Jones concerning the methodology and calculation of the Underlying, additions, deletions or substitutions of the commodities included in the Underlying or exchange-traded futures contracts on the commodities included in the Underlying could affect the level of the Underlying, which could adversely affect the amount payable on the BUyS at maturity and the value of the BUyS prior to maturity. The amount payable on the BUyS and their value could also be adversely affected if S&P Dow Jones, in its sole discretion, changes these policies, for example, by changing the methodology for compiling and calculating the Underlying, or if S&P Dow Jones discontinues or suspends calculation or publication of the Underlying, in which case it may become difficult to determine the value of the BUyS. If events such as these occur, or if the level of the Underlying is not available because of a market disruption event or for any other reason, the calculation agent will make a good faith estimate in its sole discretion of the level of the Underlying that would have prevailed in the absence of the market disruption event.

THE ABSENCE OF BACKWARDATION OR PRESENCE OF CONTANGO IN THE MARKETS FOR FUTURES CONTRACTS INCLUDED IN THE UNDERLYING WILL ADVERSELY AFFECT THE LEVEL OF THE UNDERLYING — As the futures contracts included in the Underlying near expiration, they are replaced by contracts that have a later expiration. Thus, for example, a contract purchased and held in December may specify a January expiration. As that contract nears expiration, it may be replaced by selling the January contract and purchasing the contract expiring in March. This process is referred to as “rolling.” Historically, with respect to some futures contracts, the prices have frequently been higher for contracts with shorter-term expirations than for contracts with longer-term expirations, which is referred to as “backwardation.” In these circumstances, absent other factors, the sale of the January contract would take place at a price that is higher than the price at which the March contract is purchased, thereby creating a gain in connection with rolling. While certain futures contracts included in the Underlying have historically exhibited consistent periods of backwardation, backwardation will likely not exist in these markets at all times. The absence of backwardation in the markets for these futures contracts will adversely affect the level of the Underlying and, accordingly, decrease the value of your BUyS. Conversely, some futures contracts included in the Underlying have historically exhibited “contango” markets rather than backwardation. Contango markets are those in which the prices of contracts are higher in the distant delivery months than in the nearer delivery months due to the costs of long-term storage of a physical commodity prior to delivery or other factors. The presence of contango in the markets for these futures contracts will adversely affect the level of the Underlying and, accordingly, decrease the value of your BUyS.

THE UNDERLYING MAY BE MORE VOLATILE AND SUSCEPTIBLE TO PRICE FLUCTUATIONS OF COMMODITIES THAN A BROADER COMMODITIES INDEX — The Underlying may be more volatile and susceptible to price fluctuations than a broader commodities index. In contrast to the S&P GSCI® – ER, which, as of the Trade Date, includes futures contracts on 24 physical commodities, the Underlying is composed of futures contracts on a single commodity. As a result, price volatility in the futures contracts included in the Underlying will likely have a greater impact on the level of the Underlying than it would on the broader S&P GSCI® – ER.

PRICES OF COMMODITIES AND COMMODITY FUTURES CONTRACTS ARE HIGHLY VOLATILE AND MAY CHANGE UNPREDICTABLY — Commodity prices are highly volatile and, in many sectors, have experienced unprecedented historical volatility in the past few years. Commodity prices are affected by numerous factors including: changes in supply and demand relationships (whether actual, perceived, anticipated, unanticipated or unrealized); weather; agriculture; trade; fiscal, monetary and exchange control programs; domestic and foreign political and economic events and policies; disease; pestilence; technological developments; changes in interest rates, whether through governmental action or market movements; monetary and other governmental policies, action and inaction; macroeconomic or geopolitical and military events, including political instability in some oil-producing countries; and natural or nuclear disasters. Those events tend to affect commodities prices worldwide, regardless of the location of the event. Market expectations about these events and speculative activity also cause commodities prices to fluctuate. These factors may have a greater impact on commodities prices and commodity futures contracts than on more conventional securities and may adversely affect the performance of the Underlying and, as a result, the

market value of the BUyS, and any payments you may receive in respect of the BUyS. It is possible that lower prices or increased volatility of commodities will adversely affect the performance of Underlying and, as a result, the market value of the BUyS.

IF THE LIQUIDITY OF THE INDEX CONSTITUENTS IS LIMITED, THE VALUE OF THE BUYS WILL LIKELY BE IMPAIRED — Commodities and derivatives contracts on commodities may be difficult to buy or sell, particularly during adverse market conditions. Reduced liquidity of the Index Constituents on the

TS-11

Final Valuation Date would likely have an adverse effect on the level of the Underlying and, therefore, on the return on your BUyS. Limited liquidity relating to the Index Constituents may also result in the publisher of the Underlying being unable to determine the level of the Underlying using its normal means. Any resulting discretion by the calculation agent in determining the Final Level of the Underlying could adversely affect the value of the BUyS.

SUSPENSION OR DISRUPTIONS OF MARKET TRADING IN COMMODITIES AND RELATED FUTURES MAY ADVERSELY AFFECT THE VALUE OF THE BUYS — The commodity futures markets are subject to temporary distortions or other disruptions due to various factors, including the lack of liquidity in the markets, the participation of speculators and government regulation and intervention. In addition, U.S. futures exchanges and some foreign exchanges have regulations that limit the amount of fluctuation in some futures contract prices that may occur during a single business day. These limits are generally referred to as “daily price fluctuation limits” and the maximum or minimum price of a contract on any given day as a result of these limits is referred to as a “limit price.” Once the limit price has been reached in a particular contract, no trades may be made at a price beyond the limit, or trading may be limited for a set period of time. Limit prices have the effect of precluding trading in a particular contract or forcing the liquidation of contracts at potentially disadvantageous times or prices. These circumstances could adversely affect the level of the Underlying and, therefore, the value of the BUyS.

THE BUYS MAY BE SUBJECT TO CERTAIN RISKS SPECIFIC TO WTI CRUDE OIL AS A COMMODITY —The Underlying is composed of futures contracts on WTI crude oil, which is an energy-related commodity. Consequently, in addition to factors affecting commodities generally, the BUyS may be subject to a number of additional factors specific to energy-related commodities that might cause price volatility. These may include:

- changes in the level of industrial and commercial activity with high levels of energy demand;
 - disruptions in the supply chain or in the production or supply of other energy sources;
 - price changes in alternative sources of energy;
 - adjustments to inventory;
 - variations in production and shipping costs;
 - costs associated with regulatory compliance, including environmental regulations; and
- changes in industrial, government and consumer demand, both in individual consuming nations and internationally.

These factors interrelate in complex ways, and the effect of one factor on the level of the Underlying, and the market value of the BUyS linked to the Underlying, may offset or enhance the effect of another factor.

A DECISION BY NYMEX TO INCREASE MARGIN REQUIREMENTS FOR WTI CRUDE OIL FUTURES CONTRACTS MAY AFFECT THE LEVEL OF THE UNDERLYING — If NYMEX increases the amount of collateral required to be posted to hold positions in the futures contracts composing the Underlying (i.e. the margin requirements), market participants who are unwilling or unable to post additional collateral may liquidate their positions, which may cause the level of the Underlying to decline significantly.

PAST PERFORMANCE OF THE UNDERLYING IS NO GUIDE TO FUTURE PERFORMANCE — The actual performance of the Underlying over the term of the BUyS, as well as any amount payable on the BUyS, may bear little relation to the historical closing levels of the Underlying and may bear little relation to the hypothetical return examples set forth elsewhere in this term sheet. We cannot predict the future performance of the Underlying or

whether the performance of the Underlying will result in the return of any of your investment.

▲ASSUMING NO CHANGES IN MARKET CONDITIONS AND OTHER RELEVANT FACTORS, THE PRICE YOU MAY RECEIVE FOR YOUR BUYS IN SECONDARY MARKET TRANSACTIONS WOULD GENERALLY BE LOWER THAN BOTH THE ISSUE PRICE AND THE ISSUER'S ESTIMATED VALUE OF THE BUYS ON THE TRADE DATE — While the payment(s) on the BUyS described in this term sheet is based on the full Face Amount of your BUyS, the Issuer's estimated value of the BUyS on the Trade Date (as disclosed on the cover of this term sheet) is less than the Issue Price of the BUyS. The Issuer's estimated value of the BUyS on the Trade Date does not represent the price at which we or any of our affiliates would be willing to purchase your BUyS in the secondary market at any time. Assuming no changes in market conditions or our creditworthiness and other relevant factors, the price, if any, at which we or our affiliates would be willing to purchase the BUyS from you in secondary market transactions, if at all, would generally be lower than both the Issue Price and the Issuer's estimated value

TS-12

of the BUyS on the Trade Date. Our purchase price, if any, in secondary market transactions would be based on the estimated value of the BUyS determined by reference to (i) the then-prevailing internal funding rate (adjusted by a spread) or another appropriate measure of our cost of funds and (ii) our pricing models at that time, less a bid spread determined after taking into account the size of the repurchase, the nature of the assets underlying the BUyS and then-prevailing market conditions. The price we report to financial reporting services and to distributors of our BUyS for use on customer account statements would generally be determined on the same basis. However, during the period of approximately three months beginning from the Trade Date, we or our affiliates may, in our sole discretion, increase the purchase price determined as described above by an amount equal to the declining differential between (a) the Issue Price minus the discounts and commissions and (b) the Issuer's estimated value of the BUyS on the Trade Date, prorated over such period on a straight-line basis, for transactions that are individually and in the aggregate of the expected size for ordinary secondary market repurchases.

In addition to the factors discussed above, the value of the BUyS and our purchase price in secondary market transactions after the Trade Date, if any, will vary based on many economic and market factors, including our creditworthiness, and cannot be predicted with accuracy. These changes may adversely affect the value of your BUyS, including the price you may receive in any secondary market transactions. Any sale prior to the Maturity Date could result in a substantial loss to you. The BUyS are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your BUyS to maturity.

THE BUYS WILL NOT BE LISTED AND THERE WILL LIKELY BE LIMITED LIQUIDITY — The BUyS will not be listed on any securities exchange. There may be little or no secondary market for the BUyS. We or our affiliates intend to act as market makers for the BUyS but are not required to do so and may cease such market making activities at any time. Even if there is a secondary market, it may not provide enough liquidity to allow you to sell the BUyS when you wish to do so or at a price advantageous to you. Because we do not expect other dealers to make a secondary market for the BUyS, the price at which you may be able to sell your BUyS is likely to depend on the price, if any, at which we or our affiliates are willing to buy the BUyS. If, at any time, we or our affiliates do not act as market makers, it is likely that there would be little or no secondary market in the BUyS. If you have to sell your BUyS prior to maturity, you may not be able to do so or you may have to sell them at a substantial loss, even in cases where the level of the Underlying has increased since the Trade Date.

- **MANY ECONOMIC AND MARKET FACTORS WILL AFFECT THE VALUE OF THE BUYS** — While we expect that, generally, the level of the Underlying will affect the value of the BUyS more than any other single factor, the value of the BUyS prior to maturity will also be affected by a number of other factors that may either offset or magnify each other, including:
 - the expected volatility of the price of WTI crude oil, the prices of WTI crude oil futures contracts and the level of the Underlying;
 - the time remaining to the maturity of the BUyS;
 - trends of supply and demand for WTI crude oil and WTI crude oil futures contracts;
 - interest rates and yields then prevailing in the market;
- geopolitical conditions and a variety of economic, financial, political, regulatory or judicial events that affect WTI crude oil or commodities markets generally;
 - supply and demand for the BUyS; and

- our creditworthiness, including actual or anticipated downgrades in our credit ratings.

TRADING AND OTHER TRANSACTIONS BY US OR OUR AFFILIATES IN THE COMMODITIES AND COMMODITY DERIVATIVE MARKETS MAY IMPAIR THE VALUE OF THE BUYS — We or our affiliates expect to hedge our exposure from the BUyS by entering into commodity derivative transactions, such as over-the-counter options, futures or exchange-traded instruments. We or our affiliates may also engage in trading in instruments linked or related to the Underlying on a regular basis as part of our general broker-dealer and other businesses, for proprietary accounts, for other accounts under management or to facilitate transactions for customers, including block transactions. Such trading and hedging activities may affect the level of the Underlying and make it less likely that you will receive a positive return on your investment in the BUyS. It is possible that we or our affiliates could receive substantial returns from these hedging and trading activities while the value of the BUyS declines. We or our affiliates may also issue or underwrite other securities or financial or derivative instruments with

TS-13

returns linked or related to commodity prices. Introducing competing products into the marketplace in this manner could adversely affect the value of the BUyS. Any of the foregoing activities described in this paragraph may reflect trading strategies that differ from, or are in direct opposition to, investors' trading and investment strategies related to the BUyS. Furthermore, because Deutsche Bank Securities Inc. ("DBSI") or one of its affiliates is expected to conduct trading and hedging activities for us in connection with the BUyS, DBSI or such affiliate may profit in connection with such trading and hedging activities and such profit, if any, will be in addition to any compensation that DBSI receives for the sale of the BUyS to you. You should be aware that the potential to earn a profit in connection with hedging activities may create an incentive for DBSI to sell the BUyS to you in addition to any compensation they would receive for the sale of the BUyS.

WE, OUR AFFILIATES OR OUR AGENTS MAY PUBLISH RESEARCH, EXPRESS OPINIONS OR PROVIDE RECOMMENDATIONS THAT ARE INCONSISTENT WITH INVESTING IN OR HOLDING THE BUYS. ANY SUCH RESEARCH, OPINIONS OR RECOMMENDATIONS COULD ADVERSELY AFFECT THE LEVEL OF THE UNDERLYING OR THE VALUE OF THE BUYS — We, our affiliates or our agents may publish research from time to time on financial markets and other matters that could adversely affect the value of the BUyS, or express opinions or provide recommendations that are inconsistent with purchasing or holding the BUyS. Any research, opinions or recommendations expressed by us, our affiliates or our agents may not be consistent with each other and may be modified from time to time without notice. You should make your own independent investigation of the merits of investing in the BUyS and the Underlying.

POTENTIAL CONFLICTS OF INTEREST — We and our affiliates play a variety of roles in connection with the issuance of the BUyS, including acting as calculation agent, hedging our obligations under the BUyS and determining the Issuer's estimated value of the BUyS on the Trade Date and the price, if any, at which we or our affiliates would be willing to purchase the BUyS from you in secondary market transactions. In performing these roles, our economic interests and those of our affiliates are potentially adverse to your interests as an investor in the BUyS. The calculation agent will determine, among other things, all values, prices and levels required to be determined for the purposes of the BUyS on any relevant date or time. The calculation agent will also be responsible for determining whether a Commodity Hedging Disruption Event and/or a market disruption event has occurred. Any determination by the calculation agent could adversely affect the return on the BUyS.

THE U.S. FEDERAL INCOME TAX CONSEQUENCES OF AN INVESTMENT IN THE BUYS ARE UNCERTAIN — There is no direct legal authority regarding the proper U.S. federal income tax treatment of the BUyS, and we do not plan to request a ruling from the IRS. Consequently, significant aspects of the tax treatment of the BUyS are uncertain, and the IRS or a court might not agree with the treatment of the BUyS as prepaid financial contracts that are not debt. If the IRS were successful in asserting an alternative treatment for the BUyS, the tax consequences of ownership and disposition of the BUyS could be materially and adversely affected. In addition, as described above under "Tax Consequences," in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the BUyS, possibly with retroactive effect. You should review carefully the section of the accompanying product supplement entitled "U.S. Federal Income Tax Consequences," and consult your tax adviser regarding the U.S. federal tax consequences of an investment in the BUyS (including possible alternative treatments and the issues presented by the 2007 notice), as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

The BUyS may be suitable for you if:

- You seek an investment with a return linked to the performance of the Underlying as described herein;
- You are willing to invest in the BUyS based on the Upside Leverage Factor, the Maximum Return, the Downside Participation Factor and the Buffer Amount;
 - You are willing to lose up to 100.00% of your initial investment;
 - You are willing and able to hold the BUyS to the longer end of the Maturity Date range;
 - You are willing to accept our credit risk;
 - You do not seek current income from this investment; and
 - You do not seek an investment for which there will be an active secondary market.

The BUyS may not be suitable for you if:

- You do not seek an investment with a return linked to the performance of the Underlying as described herein;
- You are unwilling to invest in the BUyS based on the Upside Leverage Factor, the Maximum Return, the Downside Participation Factor and the Buffer Amount;
 - You seek an investment that is protected against the loss of your initial investment;
 - You seek an investment with uncapped upside returns;
 - You are unwilling or unable to hold the BUyS to the longer end of the Maturity Date range;
 - You are unwilling to be exposed to our credit risk;
 - You seek current income from your investments; or
 - You seek an investment for which there will be an active secondary market.

TS-15

Historical Information

The following graph sets forth the historical performance of the Underlying based on the daily closing levels of the Underlying from January 20, 2005 through January 20, 2015. The closing level of the S&P GSCI® Crude Oil Index — Excess Return on January 20, 2015 was 252.6902. The graph below shows a hypothetical closing level that would result in a percentage decline from the closing level of 252.6902 on January 20, 2015 that is equal to the Buffer Amount of 40.00%. We obtained the historical closing levels of the Underlying below from Bloomberg L.P., and we have not participated in the preparation of, or verified, such information. The historical closing levels of the Underlying should not be taken as an indication of future performance, and no assurance can be given as to the closing level of the Underlying on the Final Valuation Date. We cannot give you assurance that the performance of the Underlying will result in the return of any of your initial investment.

Supplemental Underwriting Information (Conflicts of Interest)

DBSI, acting as agent for Deutsche Bank AG, will receive or allow as a concession or reallowance to other dealers discounts and commissions of 1.00% or \$10.00 per \$1,000 Face Amount of BUyS. DBSI may pay custodial fees of up to 0.25% or \$2.50 per \$1,000 Face Amount of BUyS to certain other broker-dealers. See “Underwriting (Conflicts of Interest)” in the accompanying product supplement.

DBSI, the agent for this offering, is our affiliate. Because DBSI is both our affiliate and a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”), the underwriting arrangement for this offering must comply with the requirements of FINRA Rule 5121 regarding a FINRA member firm’s distribution of the securities of an affiliate and related conflicts of interest. In accordance with FINRA Rule 5121, DBSI may not make sales in offerings of the BUyS to any of its discretionary accounts without the prior written approval of the customer. See “Underwriting (Conflicts of Interest)” in the accompanying product supplement.

Settlement

We expect to deliver the BUyS against payment for the BUyS on the Settlement Date indicated above, which may be a date that is greater than three business days following the Trade Date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended, trades in the secondary market generally are required to settle in three business days, unless the parties to a trade expressly agree otherwise. Accordingly, if the Settlement Date is more than three business days after the Trade Date, purchasers who wish to transact in the BUyS more than three business days prior to the Settlement Date will be required to specify alternative settlement arrangements to prevent a failed settlement.
