EMTEC, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
THREE MONTHS ENDED JUNE 30, 2003 AND 2002
(unaudited)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and note disclosures required by generally accepted accounting principles in the United States. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Quarterly results are not necessarily indicative of results for the full year. For further information, refer to the annual financial statements and

Edgar Filing: EMTEC INC/NJ - Form 10-Q

notes thereto included in the Company's Form 10-K.

2. Stock-Based Compensation

Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation," (SFAS No. 123) encourages, but does not require companies to record compensation cost for stock-based employee compensation plans at fair value. The Company has adopted Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" (APB No. 25). APB No. 25 provides that the compensation expense relative to the Company's employee stock options is measured based on the intrinsic value of the stock option.

Option activity is summarized in the following table:

Options outstanding - April 1, 2003	461,428
Activity for the three months ended June 30, 2003:	
Options granted	
Options exercised	
Options forfeited or expired	(10,000)

Options outstanding - June 30, 2003	451,428
	=====

3. Line of Credit

On November 21, 2001, the Company entered into a \$10.0 million revolving credit facility with Fleet Capital Corporation, formerly Summit Business Capital Corporation ("Fleet") under which the Company may borrow on 85% of its eligible trade receivables. Interest on outstanding loans under the revolving credit facility with Fleet is charged monthly at a fluctuating rate per annum equal to 0.25% above

the prime rate and, at our option, interest on up to 50% of the outstanding loans may be charged at libor plus 2.75%. The Fleet revolving credit facility is collateralized by a lien upon and security interest in substantially all of the Company assets. Since current credit facilities with two of the Company's primary trade vendors, (GE Access, and Ingram Micro,) were also collateralized by substantially all of the Company's assets, Fleet, GE Access and Ingram Micro, have entered into intercreditor agreements, which provide that as regards to these vendors, debt obligations to Fleet are accorded priority. The lending agreement contains financial covenants that require the Company to maintain a maximum leverage ratio, a minimum debt ratio, a minimum tangible net worth ratio, and a minimum result of operations. As of June 30, 2003 the Company was not in compliance with its financial covenant. On November 21, 2001, we also entered into a Wholesale Financing Security Agreement with IBM. This credit facility, which is collateralized by a \$750,000 letter of credit from Fleet in favor of IBM, affords us up to a like amount of credit to purchase IBM products from IBM Global Financing. On January 9, 2002, Fleet also issued a \$250,000

Edgar Filing: EMTEC INC/NJ - Form 10-Q

letter of credit in favor of its landlord for our New York City office, as a security deposit for the building lease.

At June 30, 2003, the Company had a \$8,048,245 outstanding balance under the credit facility.

On June 11, 2003 Fleet offered to waive such non-compliance and increase our credit facility permanently to \$12.50 million through November 21, 2005 in consideration of a cash payment of service fees to Fleet of \$50,000 and an increased interest rate of one percent above prime. The Company is currently reviewing and negotiating the amended terms of its facility but cannot state with any certainty the terms upon which the credit facility will be continued or its duration. The Company and Fleet expect to finalize the amended terms within the next 30 to 90 days.

On June 17, 2003 Fleet temporarily increased our current credit facility from \$10.0 million to \$11.50 million. This increase expired on July 18, 2003. On July 18, 2003 Fleet extended this temporary increase for additional 30 days.

4. Trade Receivables

The Company provides an allowance for losses on trade receivables based on a review of the current status of existing receivables and management's evaluation of periodic aging of the accounts. Trade accounts receivable consists of the following:

6

	June 30, 2003	March 31, 2003
Trade Receivable	\$17,456,079	\$14,793,971
Allowance for doubtful accounts	(261,896)	(240,847)
Trade Receivable, net	\$17,194,183	\$14,553,124

5. Inventory

Inventories are stated at lower of cost (first-in, first-out) or market. Cost is based on standard costs generated principally by the most recent purchase price. The Company provides an inventory reserve for obsolescence and deterioration based on management's review of product sales. Inventory is recorded on the balance sheet net of allowances for inventory valuation of \$518,920 and \$471,203 at June 30, 2003 and March 31, 2003, respectively.

6. Acquisitions

On August 31, 2002, the Company acquired all of the customer contracts and

Edgar Filing: EMTEC INC/NJ - Form 10-Q

certain assets of Turnkey Computer Systems, Inc. of Clifton, NJ. The purchase price will be paid over a two-year period and will be based on an earning share derived from the customer contracts transferred from Turnkey to Emtec. Earnings share for a given period shall mean 50% of earnings for that period, provided, that, if for that period earnings is less than \$120,000, then the earnings share for that period shall be the earnings in excess of \$60,000. The first earning share will be calculated at the end of twelve months ended on August 31, 2003.

On August 12, 2002, the Company acquired certain assets of Acentra Technologies, Inc., including the assignment of the State of New Jersey computer supply and services contract. The Company paid a net purchase price of \$165,607 in cash to be allocated under the purchase method as follows:

Assignment of State of NJ Contract	\$ 100,000	
Inventory	326,798	
Equipment	22,715	
Advance payment amount from customers	(283,906)	

Net Purchase Price	\$ 165,607	=====

7. Major Customers

Two major customers accounted for approximated 56%, and 27% of the Company's net sales in the quarter ended June 30, 2003 and 2002, respectively.

7

While the Company believes its relationship with these customers will continue, there can be no assurance that sales to these customers will continue at all or at the same level.

8. Segment Information

Summarized financial information relating to the Company's operating segments are as follows:

For the three months ended June 30:	2003	2002
	-----	-----
Revenues		
Information Technology	\$28,432,755	\$19,663,755
Geothermal	47,585	45,349

		=====		=====

8

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with, and is qualified in its entirety by, the unaudited financial statements, including the notes thereto, appearing elsewhere in this quarterly report on Form, 10-Q.

Critical Accounting Policies

Management's Discussion and Analysis of Financial Condition and Results of Operations discusses our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The methods, estimates, and judgments we use in applying our most critical accounting policies have a significant impact on the results we report in our financial statements. The Securities and Exchange Commission has defined critical accounting policies as policies that involve critical accounting estimates that require (i) management to make assumptions that are highly uncertain at the time the estimate is made, and (ii) different estimates that could have been reasonably used for the current period, or changes in the estimates that are reasonably likely to occur from period to period, which would have a material impact on the presentation of our financial condition, changes in financial condition or in result of operations. Based on this definition, our most critical policies include: revenue recognition, allowance for doubtful accounts, inventory valuation reserve, the assessment of recoverability of long-lived assets, the assessment of recoverability of goodwill and intangible assets, and valuation of deferred tax assets.

o Revenue Recognition

We recognize revenues based upon Staff Accounting Bulletin #101 (SAB 101). SAB 101 states that revenue recognition cannot occur until the earnings process is complete, evidenced by an agreement between us and the customer, there has been delivery and acceptance, collectibility is probable, and pricing is fixed and determinable. If significant obligations remain after delivery, revenue is deferred until such obligations are fulfilled. Procurement services represent sales of computer hardware and prepackaged software. Revenue from consulting and support service contracts are recognized ratably over the contract or service period. Revenues from manufacturer support service contracts where the manufacturer is responsible for fulfilling the service requirements of the customer are recognized immediately on their contract date. These contracts

Edgar Filing: EMTEC INC/NJ - Form 10-Q

contain cancellation privileges that allow our customer to terminate a contract with 90 days written notice. In this event, the customer is entitled to a pro-rated refund based on the remaining term of the contract and we would owe the manufacturer a pro-rated refund of the cost of the contract. However, we have experienced no customer cancellations of any significance during our most recent 3-year history and do not expect cancellations of any significance in the future. We believe that net revenue reporting for manufacturer support service contracts is more appropriate. Thus starting the fiscal year ended March 31, 2003, we have adopted net revenue reporting for manufacturer support service contracts and to conform to the current presentation, have reclassified contract costs from prior periods as an offset to revenue.

9

o Trade Receivables

We maintain allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. We base our estimates on the aging of our accounts receivable balances and our historical write-off experience, net of recoveries. If the financial condition of our customers were to deteriorate, additional allowances may be required. We believe the accounting estimate related to the allowance for doubtful accounts is a "critical accounting estimate" because changes in it can significantly affect net income.

o Inventories

Inventories are stated at the lower of cost (first-in, first-out) or market. Cost is based on standard costs generated principally by the most recent purchase prices. We provide an inventory reserve for obsolescence and deterioration based on management's review of the current status of the excess inventory, its age, and net realizable value based upon assumptions about future demand and market condition.

o Property and Equipment

We estimate the useful lives of property and equipment in order to determine the amount of depreciation and amortization expense to be recorded during any reporting period. The majority of our equipment is depreciated over three years. The estimated useful lives are based on the historical experience with similar assets as well as taking into account anticipated technological or other changes. If technological changes were to occur more rapidly than anticipated or in a different form than anticipated, the useful lives assigned to these assets may need to be shortened, resulting in the recognition of increased depreciation and amortization in future periods. We review for impairment when events or circumstances indicate that the carrying amounts may not be recoverable over the remaining lives of the assets. In assessing impairments, we follow the provisions of Statement of Financial Accounting Standard No. 144 "Accounting for the Impairment or Disposal of Long-Lived Assets," utilizing cash flows which takes into account management's estimates of future operations.

o Goodwill and Intangible Assets

We have adopted Statement of Financial Accounting Standards No. 141

Edgar Filing: EMTEC INC/NJ - Form 10-Q

"Business Combinations" and No. 142 "Goodwill and Other Intangible Assets". As a result, amortization of goodwill was discontinued. We performed the initial goodwill impairment test as of April 1, 2002 and another impairment test as of March 31, 2003. Based on the impairment test performed as of March 31, 2003, the goodwill of \$254,894 associated with the acquisition of Devise Associates, Inc., was determined to be fully impaired and charged to earnings in fiscal year ended March 31, 2003. This determination was based upon the operating and cash flow losses of this business unit since the January 9, 2002 acquisition date and budgeted fiscal 2004 operating and cash flow losses for this business unit. We found no impairment of the remaining goodwill of \$112,996 as of March 31, 2003.

We were assigned a contract to supply computer hardware and services to the State of New Jersey in the August 12, 2002 acquisition of Acentra Technologies, Inc. This contract was

10

valued at \$100,000 in the acquisition. Amortization expense of \$13,636 was expensed in the current period based upon the current contract term that ends at May 2004. The contract is subject to annual renewals. The net carrying value for this contract amounted to \$50,000 at June 30, 2003.

o Income Taxes

Income taxes are accounted for under an asset and liability approach that requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been recognized in Emtec's financial statements or tax returns. In estimating future tax consequences, Emtec generally considers all expected future events other than the enactment of changes in tax laws or rates. A valuation allowance is recognized if, on weight of available evidence, it is more likely than not that some portion or all the deferred tax assets will not be realized. We continue to be conservative in accounting for income taxes by recording significant valuation allowances for deferred tax assets due to the high degree of uncertainty that exists regarding future operating results.

Results of Operations

Three Months Ended June 30, 2003 Compared to Three Months Ended June 30, 2002.

Total Revenues

Total revenues for our IT business, which includes services and consulting revenue, and procurement revenues, increased by 44.59% or \$8.77 million, to \$28.43 million for the quarter ended June 30, 2003, compared to \$19.67 million for the quarter ended June 30, 2002. This increase is primarily attributable to acquisitions of Acentra Technologies, Inc. in August 2002 and Turnkey Computer Systems, Inc. in August 2002. IT revenue associated with these acquisitions equaled \$10.43 million for the quarter ended June 30, 2003. Without these acquisitions, revenues associated with our IT business would have decreased by 8.43% or \$1.66 million for the quarter ended June 30, 2003. This decrease is mainly due to a slow-down in the economy.

Services and consulting revenue increased by 27.66%, or \$1.02 million, to \$4.70 million for the quarter ended June 30, 2003 compared to \$3.68 million for

Edgar Filing: EMTEC INC/NJ - Form 10-Q

the quarter ended June 30, 2002. This increase is also attributable to acquisitions of Acentra Technologies Inc., and Turnkey Computer Systems, Inc. Services and consulting revenue associated with these acquisitions equaled \$2.02 million for the quarter ended June 30, 2003. Without these acquisitions, services and consulting revenue would have decreased by 27.18% or \$1.00 million, to \$2.68 million for the quarter ended June 30, 2003. This decrease is mainly due to a decrease in our manufacturers support services contracts revenues. Net revenues associated with manufacturers support services contracts revenue decreased by 80.27%, or \$857,266, to \$210,679 for the quarter ended June 30, 2003 compared to \$1.07 million for the quarter ended June 30, 2002. This decrease in manufacturers support services contracts revenue is mainly due a sale that occurred in May 2002 of \$580,000 to one customer, which may be renewed in December 2003. The remaining decrease is due to a slow-down in the economy.

11

Procurement revenues also increased by 48.50%, or \$7.75 million, to \$23.73 million for the quarter ended June 30, 2003. This increase is the net result of the acquisitions of Acentra Technologies, Inc. and Turnkey Computer Systems, Inc. of approximately \$8.40 million recorded in the quarter ended June 30, 2003. Without these acquisitions, procurement revenue would have decreased by 4.07%, or \$649,817 for the quarter ended June 30, 2003.

Geothermal Revenues increased by 4.93%, or \$2,236. to \$47,585 for the quarter ended June 30, 2003. This increase is mainly attributable to higher production of steam during this quarter.

Gross Profit

Our aggregate gross profit for IT business increased by 18.98%, or \$585,925, to \$3.67 million for the quarter ended June 30, 2003. This increase is mainly attributable to a 44.59% increase in our IT revenues. Measured as a percentage of our total revenues for IT business, our overall gross profit margin decreased to 12.92% of total revenues for the quarter ended June 30, 2003 from 15.70% for the quarter ended June 30, 2002. This decrease is mainly due to lower gross profit margin from our procurement revenues.

Gross profit for product sales increased by 6.27%, or \$120,351, to \$2.04 million for the quarter ended June 30, 2003 as compared with \$1.92 million for the quarter ended June 30, 2002. This increase is mainly attributable to a 48.50% increase in product revenue. Measured as a percentage of procurement revenues, our gross profit margin decreased to 8.59% of procurement revenue for the quarter ended June 30, 2003 from 12.01% for the quarter ended June 30, 2002. This decrease is mainly due to continued downward pricing pressure on product sales.

Gross profit for service and consulting increased by 39.84%, or \$465,574, to \$1.63 million for the quarter ended June 30, 2003 as compared with \$1.17 million for the quarter ended June 30, 2002. This increase is mainly attributable to a 27.66% increase in services and consulting revenues. Measured as a percentage of services and consulting revenues, our gross margin attributable to services and consulting revenue increased to 34.76% of services and consulting revenue for the quarter ended June 30, 2003 from 31.73% for the quarter ended June 30, 2002. This increase is attributable to higher billing rates (total revenue generated divided by total billable hours available during

Edgar Filing: EMTEC INC/NJ - Form 10-Q

the period) and utilization rates (billable hours divided by paid hours) of engineers during this quarter.

The geothermal gross profit of \$30,101 for the quarter ended June 30, 2003 increased by 8.47%, or \$2,350 attributable to higher production of steam coupled with lower operating expenses for the quarter.

Sales, General, and Administrative Expenses

Sales, general and administrative expenses increased by 7.78%, or \$231,328, to \$3.21 million for the quarter ended June 30, 2003. Without the acquisitions of Acentra Technologies, Inc. and Turnkey Computer Systems, Inc., our sales, general and administrative expenses would have been decreased by approximately 18.49 %, or \$549,000, to \$2.42 million for the quarter ended June 30, 2003 compared with \$2.97 million for the quarter ended June 30, 2002. This decrease is mainly attributable to the following:

12

1. Elimination of non-productive sales staff.
2. Reduction in sales commission compensation plans. and
3. Eliminated duplication of non-essential administrative support services.

Interest expense

Interest expense increased by 265.44%, or \$72,030, to \$99,166 the quarter ended June 30, 2003 as compared with \$27,136 for the quarter ended June 30, 2002. This increase is mainly due to a higher balance on our line of credit, and higher days sales outstanding during the period.

Income Taxes

Income tax expense for the quarter ended June 30, 2003 was \$41,281. For the quarter ended June 30, 2003, we recognized a deferred income tax expense of \$47,901 that is partially offset by an income tax refund of \$6,620.

Factors That May Affect Future Results

Our future operating results may be affected by a number of factors including uncertainties relative to national economic conditions, especially as they affect interest rates, business insurance industry factors, our ability to successfully increase business, and effectively manage expense margins.

Since our inception, we have funded our operations primarily from borrowings under our credit facility. We are currently in default under our credit facility, which could result in a demand for immediate repayment. Revised terms of our indebtedness could materially limit our financial and operating flexibility.

We must continue to effectively manage expenses in relation to revenues by directing new business development towards markets that complement or improve our existing service lines. Management must also continue to emphasize operating

Edgar Filing: EMTEC INC/NJ - Form 10-Q

efficiencies through cost containment strategies, reengineering efforts, and improved service delivery techniques. The most significant cost relating to the services component of our business is personnel expense, which consists of salaries, benefits, and payroll related expenses. Thus, the financial performance of our service business is based primarily upon billing margins (billable hourly rates less the costs to us of service personnel on an hourly basis) and utilization rates (billable hours divided by paid hours). The future success of the services component of our business will depend in large part upon our ability to maintain high utilization rates at profitable billing margins. The competition for quality technical personnel has continued to intensify, resulting in increased personnel costs. This intense competition has caused our billing margins to be lower than they might otherwise have been. Our utilization rates for service personnel likely will also be adversely affected during periods of rapid and concentrated hiring.

13

Emtec is a system integrator focused on providing technology solutions that enables our customers to effectively use and manage their data to grow their business. Our areas of specialization in IT services include remote network monitoring, help desk, network design, enterprise backup and storage consolidation, and network security. While we have offered IT services to our customers since 1983, our major emphasis on IT consulting and services began in 1995 and we started focusing on our new managed services and network security during the fiscal year 2002. We have invested approximately \$710,000 for the purchase of computer hardware, software, and consulting services for our Network Operations Center to enhance our offerings in Managed Services. Currently our recurring managed services revenues equal approximately \$35,000 a month. We have limited experience in developing, marketing, or providing these services. We cannot assure that we will be able to successfully market such services to either new or existing customers, that our services will achieve market acceptance, or that we will be able to effectively hire, integrate, and manage additional technical personnel to enable us to perform these services to our customers' expectations. This industry has been characterized by rapid technological advances that have resulted in frequent introductions of new products, product enhancements and aggressive pricing practices, which also impacts pricing of service activities. Our operating results could be adversely affected by industry-wide pricing pressures, the ability to recruit, train and retain personnel integral to our operations and the presence of competitors with greater financial and other resources. Also, our operating results could be adversely impacted should our company be unable to effectively achieve the revenue growth necessary to provide profitable operating margins in various operations. Our plan for growth includes marketing efforts, acquisitions that expand market share. There can be no assurances these efforts will be successful, or if successful the timing thereof.

Liquidity and Capital Resources

Cash and cash equivalents at June 30, 2003 of \$1,050,332 represented a decrease of \$741,769 from \$1,792,101 at March 31, 2003. We are a net borrower; consequently, we believe our cash and cash equivalents balance must be viewed along with the available balance on our line of credit.

Since our inception, we have funded our operations primarily from borrowings under our credit facility. On November 21, 2001, we entered into a

Edgar Filing: EMTEC INC/NJ - Form 10-Q

\$10.0 million revolving credit facility with Fleet Capital Corporation, formerly Summit Business Capital Corporation ("Fleet"). Interest on outstanding loans under our revolving credit facility with Fleet is charged monthly at a fluctuating rate per annum equal to 0.25% above the Prime Rate and, at our option, interest on up to 50% of the outstanding loans may be charged at LIBOR plus 2.75%. Our Fleet revolving credit facility is collateralized by a lien upon and security interest in substantially all of our assets. As our current credit facilities with two of our primary trade vendors, GE Access, and Ingram Micro, were also collateralized by substantially all of our assets, we, Fleet, GE Access and Ingram Micro, have entered into intercreditor agreements, which provide that as regards to these vendors, our obligations to Fleet are accorded priority. On November 21, 2001, we also entered into a Wholesale Financing Security Agreement with IBM. This credit facility, which is collateralized by a \$750,000 letter of credit from Fleet in favor of IBM, affords us up to a like amount of credit to purchase IBM products from IBM Global Financing. On January 9, 2002, Fleet also issued a \$250,000 letter of credit in favor of Vandergrand Properties Co., L.P., our

14

landlord for our New York City office, as a security deposit for the building lease. At June 30, 2003, we had an \$8.05 million outstanding loan balance under the credit facility.

Our lending agreement with Fleet contains financial covenants that require us to maintain a minimum leverage ratio, minimum debt service coverage ratio, minimum tangible net worth, and prohibits quarterly losses. As of June 30, 2003, Emtec was not in compliance with some of its covenants. The following table quantifies Emtec's non-compliance with its financial covenants with Fleet.

Covenants	Required	Actual As of 6/30/2003
Leverage Ratio	Not to exceed 11.0 : 1.0	11.11 : 1.0
Debt Service Coverage Ratio	Not to be less than 1.20 : 1.0	1.63 : 1.0
Tangible Net Worth	Not to be less than \$1,842,000	\$1,985,545
Prohibition on Losses	No Quarterly Losses Allowed in excess of \$150,000	Quarterly Loss of \$(767,026) as of December 31, 2002.

On June 11, 2003 Fleet offered to waive such non-compliance and increase our credit facility permanently to \$12.50 million through November 21, 2005 in consideration of a cash payment to Fleet of \$50,000 and increased interest rate of one percent above prime. Emtec is currently reviewing and negotiating the amended terms of its facility but cannot state with any certainty the terms upon which the credit facility will be continued or its duration. Emtec and Fleet

Edgar Filing: EMTEC INC/NJ - Form 10-Q

expect to finalize the amended terms within next 30 to 90 days. If we are unsuccessful in reaching an agreement with Fleet, Fleet may immediately call for a repayment of the outstanding borrowings under the Credit Facility. This action of Fleet could force us to find a substitute lender at a higher cost and/or could adversely affect our day to day business.

On June 17, 2003 Fleet temporarily increased our current credit facility from \$10.0 million to \$11.50 million. This increase expired on July 18, 2003. On July 18, 2003 Fleet extended this temporary increase for additional 30 days.

At June 30, 2003, our credit facilities with our primary trade vendors, GE Access, Ingram Micro, and Tech Data were as follows: 1) Our credit Line with GE Access was \$4.0 million, no interest charged, with an outstanding principal balance of \$2.06 million. 2) Our credit line with Ingram Micro was \$6.5 million this includes a temporary increase of \$4.0 million which expires on September 30, 2003, at an 18% APR interest rate after 30 days from the date of the invoice, with an outstanding principal balance of \$5.29 million, (\$2.66 million on the main account and \$2.62 million on the temporary account). 3) Our credit line with Tech Data was \$2.0 million, no interest charged, with an outstanding balance of \$1.43 million. Under these credit lines, we are obligated to pay each invoice within 30 days from the date of such invoice.

15

Capital expenditures of \$37,425 during three months ended June 30, 2003, were primarily for the purchase of computer equipment for internal use.

Emtec has no arrangements or other relationships with unconsolidated entities or other persons that are reasonably likely to materially affect liquidity or the availability of or requirements for capital resources.

We believe that our available funds, together with existing and anticipated credit facilities, as discussed above, will be adequate to satisfy our current and planned operations for at least the next 12 months. If we are unsuccessful in reaching an agreement with Fleet, Fleet may immediately call for a repayment of the outstanding borrowings under the Credit Facility. This action of Fleet could force us to find a substitute lender at a higher cost and/or could adversely affect our day-to-day business.

Recently Issued Accounting Standards

In June 2001, the FASB issued two new statements: SFAS No. 141, "Business Combinations," and SFAS No. 142, "Goodwill and Other intangible Assets."

Effective April 1, 2002, Emtec adopted SFAS No. 141 that requires business combinations entered into after June 30, 2001 to be accounted for using the purchase method of accounting. Specifically identifiable intangible assets, other than goodwill, are to be amortized over their estimated useful economic life.

SFAS No. 142 requires that goodwill not be amortized, but should be tested for impairment at least annually. SFAS No. 142 is effective for fiscal years beginning after December 15, 2001 and applies to goodwill and other intangible assets, regardless of when those assets were initially recognized. Effective April 1, 2002, Emtec adopted SFAS No. 142 and in connection with its adoption,

Edgar Filing: EMTEC INC/NJ - Form 10-Q

discontinued the amortization of goodwill and reviewed the estimated useful lives of previously recorded identifiable intangible assets. Emtec follows the two-step process prescribed in SFAS 142 to test its goodwill for impairment. The first step is a screen for potential impairment, while the second step measures the amount of the impairment, if any. Under the guidelines of SFAS No. 142, Emtec is required to perform an impairment test at least on an annual basis. Emtec performed its initial goodwill impairment test as of April 1, 2002 and another impairment test as of March 31, 2003. Based on the impairment test performed on March 31, 2003 the goodwill of \$254,894 associated with the acquisitions of Devise Associates, Inc. was impaired.

In August 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 144 ("SFAS 144"), "Accounting for the Impairment or Disposal of Long-Lived Assets." SFAS 144 addresses the financial accounting and reporting for the impairment or disposal of long-lived assets. SFAS 144 supersedes SFAS 121 but retains the fundamental provisions of SFAS 121 for (I) recognition/measurement of impairment of long-lived assets to be held and used and (II) measurement of long-lived assets to be disposed of by sale. SFAS 144 also supersedes the accounting and reporting provisions of Accounting Principles Board's No. 30 ("APB 30"). "Reporting the Results of Operations-Reporting the

16

Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions, "for segments of a business to be disposed of but retains APB 30's requirement to report discontinued operations separately from continuing operations and extends that reporting to a component of an entity that either has been disposed of or is classified as held for sale. SFAS 144 is effective for fiscal years beginning after December 15, 2001. Emtec adopted the provisions of SFAS 144 effective April 1, 2002.

17

Item 3. Quantitative and Qualitative Information About Market Risk

We do not engage in trading market risk sensitive instruments and do not purchase hedging instruments or "other than trading" instruments that are likely to expose us to market risk, whether interest rate, foreign currency exchange, commodity price or equity price risk. We have issued no debt instruments, entered into no forward or future contracts, purchased no options and entered into no swaps. Our primary market risk exposures are those of interest rate fluctuations. A change in interest rates would affect the rate at which we could borrow funds under our revolving credit facility. Our balance on the line of credit at June 30, 2003 was approximately \$8.00 million. Assuming no material increase or decrease in such balance, a one percent change in the interest rate would change our interest expense by approximately \$80,000 annually.

Item 4. Controls and Procedures

Our management carried out an evaluation, with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures as of June 30, 2003. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported, within the time periods specified in the rules and forms of the Securities and Exchange Commission.

There has not been any change in our internal control over financial reporting in connection with the evaluation required by Rule 15d-15(d) under the Exchange Act that occurred during the quarter ended June 30, 2003 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
