SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the quarterly period ended June 30, 2009

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

**For the transition period from _____ to _____
Commission File Number 1-15817**

OLD NATIONAL BANCORP

(Exact name of Registrant as specified in its charter)

INDIANA

(State or other jurisdiction of
incorporation or organization)

35-1539838

(I.R.S. Employer
Identification No.)

**One Main Street
Evansville, Indiana**

(Address of principal executive offices)

47708

(Zip Code)

(812) 464-1294

(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to the filing requirements for at least the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (s232.405 of this chapter) during the preceding 12 months (or for shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated
filer

Accelerated filer

Non-accelerated filer

Smaller reporting
company

(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock. The Registrant has one class of common stock (no par value) with 66,433,000 shares outstanding at June 30, 2009.

Table of Contents**OLD NATIONAL BANCORP****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)****NOTE 1 BASIS OF PRESENTATION**

The accompanying unaudited consolidated financial statements include the accounts of Old National Bancorp and its wholly-owned affiliates (Old National) and have been prepared in conformity with accounting principles generally accepted in the United States of America and prevailing practices within the banking industry. Such principles require management to make estimates and assumptions that affect the reported amounts of assets, liabilities and the disclosures of contingent assets and liabilities at the date of the financial statements and amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The allowance for loan losses, goodwill and intangibles, derivative financial instruments, income taxes and valuation of securities are particularly subject to change. In the opinion of management, the consolidated financial statements contain all the normal and recurring adjustments necessary for a fair statement of the financial position of Old National as of June 30, 2009 and 2008, and December 31, 2008, and the results of its operations for the three and six months ended June 30, 2009 and 2008. Interim results do not necessarily represent annual results. These financial statements should be read in conjunction with Old National's Annual Report for the year ended December 31, 2008.

All significant intercompany transactions and balances have been eliminated. Certain prior year amounts have been reclassified to conform with the 2009 presentation. Such reclassifications had no effect on net income.

These financial statements consider events that occurred through August 4, 2009, the date the financial statements were issued.

NOTE 2 RECENT ACCOUNTING PRONOUNCEMENTS

FSP SFAS No. 157-2 In February 2008, the FASB issued FASB Staff Position No. 157-2. The staff position delays the effective date of SFAS No. 157 for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis. The delay expired January 1, 2009, and the expiration of the delay did not have a material impact on Old National's consolidated financial position or results of operations.

SFAS No. 141(R) In December 2007, the FASB issued Statement No. 141(R) *Business Combinations*. This statement replaces FASB Statement No. 141 *Business Combinations*. SFAS No. 141(R) establishes principles and requirements for how an acquiring company (1) recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed and any noncontrolling interest in the acquiree, (2) recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase, and (3) determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The new standard became effective for the Company on January 1, 2009. See Note 3 to the consolidated financial statements for the impact on the Company of adopting SFAS No. 141(R).

SFAS No. 160 In December 2007, the FASB issued Statement No. 160 *Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB No. 51*. SFAS No. 160 requires the ownership interests in subsidiaries held by parties other than the parent be clearly identified, labeled and presented in the consolidated balance sheet within equity, but separate from the parent's equity. It also requires the amount of consolidated net income attributable to the parent and the noncontrolling interest to be clearly identified and presented on the face of the consolidated statement of income. The new standard became effective for the Company on January 1, 2009. The adoption of this statement did not have a material impact on the Company's consolidated financial position or results of operations.

SFAS No. 161 In March 2008, the FASB issued Statement No. 161 *Disclosures about Derivative Instruments and Hedging Activities - an amendment of FASB Statement No. 133*. SFAS No. 161 requires enhanced disclosures about how and why an entity uses derivative instruments, how derivative instruments and related items are accounted for under Statement 133 and how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. The new standard became effective for the Company on January 1, 2009. The adoption of this statement did not have a material impact on the Company's consolidated financial position or results of operations and the required disclosures have been included.

Table of Contents

SFAS No. 165 In May 2009, the FASB issued Statement No. 165 *Subsequent Events*. SFAS No. 165 establishes the period after the balance sheet date during which management shall evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements and the circumstances under which an entity shall recognize events or transactions that occur after the balance sheet date. SFAS No. 165 also requires disclosure of the date through which subsequent events have been evaluated. The new standard becomes effective for interim and annual periods ending after June 15, 2009. The Company adopted this standard for the interim reporting period ending June 30, 2009. The adoption of this statement did not have a material impact on the Company's consolidated financial position or results of operations.

SFAS No. 166 In June 2009, the FASB issued Statement No. 166 *Accounting for Transfers of Financial Assets an amendment of FASB Statement No. 140*. SFAS No. 166 amends SFAS No. 140 and removes the concept of a qualifying special-purpose entity and limits the circumstances in which a financial asset, or portion of a financial asset, should be derecognized when the transferor has not transferred the entire financial asset to an entity that is not consolidated with the transferor in the financial statements being presented and/or when the transferor has continuing involvement with the transferred financial asset. The new standard will become effective for the Company on January 1, 2010. The Company is currently evaluating the impact of adopting SFAS No. 166 on the consolidated financial statements.

SFAS No. 167 In June 2009, the FASB issued Statement No. 167 *Amendments to FASB Interpretation No. 46(R)*. SFAS No. 167 amends tests under Interpretation No. 46(R) for variable interest entities to determine whether a variable interest entity must be consolidated. SFAS No. 167 requires an entity to perform an analysis to determine whether an entity's variable interest or interests give it a controlling financial interest in a variable interest entity. This statement requires ongoing reassessments of whether an entity is the primary beneficiary of a variable interest entity and enhanced disclosures that provide more transparent information about an entity's involvement with a variable interest entity. The new standard will become effective for the Company on January 1, 2010. The Company is currently evaluating the impact of adopting SFAS No. 167 on the consolidated financial statements.

SFAS No. 168 In June 2009, the FASB issued Statement No. 168 *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*. SFAS No. 168 replaces SFAS No. 162 and establishes the FASB Accounting Standards Codification as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with generally accepted accounting principles (GAAP). Rules and interpretative releases of the Securities and Exchange Commission under federal securities laws are also sources of authoritative GAAP for SEC registrants. The new standard becomes effective for financial statements issued for interim and annual periods ending after September 15, 2009. The adoption of this statement is not expected to have a material impact on the Company's consolidated financial position or results of operations.

FSP FAS 132(R)-1 In December 2008, the FASB issued FASB Staff Position No. 132(R)-1, *Employers Disclosures about Postretirement Benefit Plan Assets*. This FASB staff position amends FASB Statement No. 132 to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. FSP FAS 132(R)-1 requires disclosure of the fair value of each major category of plan assets for pension plans and other postretirement benefit plans. This FASB staff position becomes effective for the Company on January 1, 2010. The Company is currently evaluating the impact of adopting FSP FAS 132(R)-1 on the consolidated financial statements, but it is not expected to have a material impact.

FSP No. FAS 107-1 and APB 28-1 In April 2009, the FASB issued FASB Staff Position No. FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*. This FASB staff position amends FASB Statement No. 107 to require disclosures about fair values of financial instruments for interim reporting periods as well as in annual financial statements. The staff position also amends APB Opinion No. 28 to require those disclosures in summarized financial information at interim reporting periods. This FASB staff position becomes effective for interim reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The Company adopted this FASB staff position for the interim reporting period ending March 31, 2009.

Table of Contents

FSP No. FAS 115-2 and FAS 124-2 In April 2009, the FASB issued FASB Staff Position No. FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*. This FASB staff position amends the other-than-temporary impairment guidance in U.S. generally accepted accounting principles for debt securities. If an entity determines that it has an other-than-temporary impairment on a security, it must recognize the credit loss on the security in the income statement. The credit loss is defined as the difference between the present value of the cash flows expected to be collected and the amortized cost basis. The staff position expands disclosures about other-than-temporary impairment and requires that the annual disclosures in FASB Statement No. 115 and FSP FAS 115-1 and FAS 124-1 be made for interim reporting periods. This FASB staff position becomes effective for interim reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009.

The Company adopted this FASB staff position for the interim reporting period ending March 31, 2009. See Note 6 to the consolidated financial statements for the impact on the Company of adopting FSP No. FAS 115-2 and FAS 124-2.

FSP No. FAS 157-4 In April 2009, the FASB issued FASB Staff Position No. FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*. This FASB staff position provides additional guidance on determining fair value when the volume and level of activity for the asset or liability have significantly decreased when compared with normal market activity for the asset or liability. A significant decrease in the volume or level of activity for the asset or liability is an indication that transactions or quoted prices may not be determinative of fair value because transactions may not be orderly. In that circumstance, further analysis of transactions or quoted prices is needed, and an adjustment to the transactions or quoted prices may be necessary to estimate fair value. This FASB staff position becomes effective for interim reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The Company adopted this FASB staff position for the interim reporting period ending March 31, 2009 and it did not have a material impact on the Company's consolidated financial position or results of operations.

SAB 111 In April 2009, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 111 (SAB 111). SAB 111 amends Topic 5.M. in the Staff Accounting Bulletin series entitled *Other Than Temporary Impairment of Certain Investments in Debt and Equity Securities*. On April 9, 2009, the FASB issued FASB Staff Position No. FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*. SAB 111 maintains the previous views related to equity securities and amends Topic 5.M. to exclude debt securities from its scope. SAB 111 was effective for the Company as of March 31, 2009. There was no material impact to Old National's consolidated financial position or results of operations upon adoption.

SAB 112 In June 2009, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 112 (SAB 112). SAB 112 revises or rescinds portions of the interpretative guidance included in the Staff Accounting Bulletin series in order to make the interpretative guidance consistent with recent pronouncements by the FASB, specifically SFAS No. 141(R) and SFAS No. 160. SAB 112 was effective for the Company as of June 30, 2009. There was no material impact to Old National's consolidated financial position or results of operations upon adoption.

EITF 08-6 In November 2008, the FASB Emerging Issues Task Force reached a consensus on Issue No. 08-6, *Equity Method Investment Accounting Considerations* (EITF 08-6). EITF 08-6 clarifies the accounting for certain transactions and impairment considerations involving equity method investments. An equity investor shall not separately test an investee's underlying assets for impairment but will recognize its share of any impairment charge recorded by an investee in earnings and consider the effect of the impairment on its investment. An equity investor shall account for a share issuance by an investee as if the investor had sold a proportionate share of its investment, with any gain or loss recognized in earnings. EITF 08-6 became effective for the Company on January 1, 2009 and did not have a material impact on the Company's consolidated financial position or results of operations.

EITF 08-7 In November 2008, the FASB Emerging Issues Task Force reached a consensus on Issue No. 08-7, *Accounting for Defensive Intangible Assets* (EITF 08-7). EITF 08-7 clarifies how to account for defensive intangible assets subsequent to initial measurement. EITF 08-7 applies to acquired intangible assets in situations in which an entity does not intend to actively use an asset but intends to hold the asset to prevent others from obtaining access to the asset. A defensive intangible asset should be accounted for as a separate unit of accounting with an expected life that reflects the consumption of the expected benefits related to that asset. The benefit from holding a defensive

intangible asset is the direct and indirect cash flows resulting from the entity preventing others from using the asset. EITF 08-7 is effective for intangible assets acquired on or after January 1, 2009. The adoption of EITF 08-7 did not have a material impact on the Company's consolidated financial position or results of operations.

Table of Contents

FSP EITF 03-6-1 In June 2008, the FASB issued FSP No. EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions are Participating Securities*. This FASB staff position concluded that all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends participate in undistributed earnings with common shareholders and therefore are considered participating securities for purposes of computing earnings per share. Entities that have participating securities that are not convertible into common stock are required to use the two-class method of computing earnings per share. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. This FASB staff position is effective for fiscal years beginning after December 15, 2008 and interim periods within those fiscal years. This FASB staff position became effective for the Company on January 1, 2009 and did not have a material impact on the Company's consolidated financial position or results of operations.

NOTE 3 ACQUISITION

On March 20, 2009, Old National completed its acquisition of the Indiana retail branch banking network of Citizens Financial Group, which consists of 65 branches and a training facility. The branches are located primarily in the Indianapolis area, with additional locations in the Lafayette, Fort Wayne, Anderson and Bloomington, Indiana markets. Pursuant to the terms of the purchase agreement, Old National paid Citizens Financial Group approximately \$17.2 million. In accordance with SFAS No.141(R), Old National has expensed approximately \$4.4 million of direct acquisition costs and recorded goodwill of \$8.7 million and \$11.2 million of intangible assets. The intangible assets are related to core deposits and are being amortized on an accelerated basis over 7 years. See Note 9 to the consolidated financial statements for additional information. On the date of acquisition, Old National assumed deposit liabilities valued at approximately \$427 million and acquired a portfolio of loans valued at approximately \$5.6 million.

NOTE 4 NET INCOME PER SHARE

The following table reconciles basic and diluted net income per share for the three and six months ended June 30:

(dollars and shares in thousands, except per share data)	Three Months Ended June 30, 2009	Three Months Ended June 30, 2008
Basic Earnings Per Share		
Net income	\$ 9,635	\$ 19,475
Less: Preferred stock dividends and accretion of discount		
Net income available to common stockholders	9,635	19,475
Weighted average common shares outstanding	65,950	65,640
Basic Earnings Per Share	\$ 0.15	\$ 0.30
Diluted Earnings Per Share		
Net income available to common stockholders	9,635	19,475
Weighted average common shares outstanding	65,950	65,640
Effect of dilutive securities:		
Restricted stock (1)	41	148
Stock options (2)	8	24
Weighted average shares outstanding	65,999	65,812

Diluted Earnings Per Share	\$	0.15	\$	0.30
-----------------------------------	-----------	-------------	-----------	-------------

Table of Contents

(dollars and shares in thousands, except per share data)	Six Months Ended June 30, 2009	Six Months Ended June 30, 2008
Basic Earnings Per Share		
Net income	\$ 19,040	\$ 38,815
Less: Preferred stock dividends and accretion of discount	3,892	
Net income available to common stockholders	15,148	38,815
Weighted average common shares outstanding	65,872	65,631
Basic Earnings Per Share	\$ 0.23	\$ 0.59
Diluted Earnings Per Share		
Net income available to common stockholders	15,148	38,815
Weighted average common shares outstanding	65,872	65,631
Effect of dilutive securities:		
Restricted stock (1)	34	129
Stock options (2)	10	24
Weighted average shares outstanding	65,916	65,784
Diluted Earnings Per Share	\$ 0.23	\$ 0.59

(1) 144 and 220 shares of restricted stock were not included in the computation of net income per diluted share for the second quarter and six months ended June 30, 2009, respectively, because the effect would be antidilutive.

(2) Options to purchase 6,050 shares and 5,706 shares

outstanding at June 30, 2009 and 2008, respectively, were not included in the computation of net income per diluted share for the second quarter and six months ended June 30, 2009 and 2008, respectively, because the exercise price of these options was greater than the average market price of the common shares and, therefore, the effect would be antidilutive.

In June 2008, the FASB issued FSP No. EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions are Participating Securities*. This FASB staff position is effective for Old National for the interim periods beginning January 1, 2009. Upon adoption, all prior-period earnings per share data were recalculated according to EITF 03-6-1. These calculations resulted in no material changes to earnings per share data as previously presented.

Table of Contents**NOTE 5 COMPREHENSIVE INCOME**

Comprehensive income consists of net income and other comprehensive income. Other comprehensive income includes unrealized gains and losses on securities available-for-sale and unrealized gains and losses on cash flow hedges and changes in funded status of pension plans which are also recognized as separate components of equity. Following is a summary of other comprehensive income (loss) for the three and six months ended June 30, 2009 and 2008:

(dollars in thousands)	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2009	2008	2009	2008
Net income	\$ 9,635	\$ 19,475	\$ 19,040	\$ 38,815
Other comprehensive income (loss)				
Change in securities available for sale:				
Unrealized holding gains (losses) arising during the period	279	(46,086)	23,972	(37,742)
Reclassification adjustment for securities (gains) losses realized in income	(10,295)	(2,061)	(15,872)	(6,580)
Other-than-temporary-impairment on available-for-sale debt securities recorded in other comprehensive income	(581)		(13,478)	
Other-than-temporary-impairment on available-for-sale debt securities associated with credit loss realized in income	7,864		10,255	
Income tax effect	1,074	19,017	(1,623)	17,630
Reclassification adjustment for securities transferred from available-for-sale to held-to-maturity	1,033		1,033	
Cash flow hedges:				
Net unrealized derivative gains (losses) on cash flow hedges	(1,065)		44	
Reclassification adjustment on cash flow hedges	72	72	144	143
Income tax effect	398	(28)	(74)	(56)
Defined benefit pension plans:				
Amortization of net (gain) loss recognized in income	13	(4,233)	727	(4,075)
Income tax effect	(6)	1,694	(291)	1,631
Total other comprehensive income (loss)	(1,214)	(31,625)	4,837	(29,049)
Comprehensive income (loss)	\$ 8,421	\$ (12,150)	\$ 23,877	\$ 9,766

The following table summarizes the changes within each classification of accumulated other comprehensive income for the six months ended June 30, 2009 and 2008:

(dollars in thousands)	Unrealized gains (losses) on available for sale securities	Unrecognized gain (loss) on cash flow hedges	Defined pension plans	Accumulated other comprehensive income (loss)
Balance at December 31, 2008	\$ (40,504)	\$ (480)	\$ (12,520)	\$ (53,504)
Other comprehensive income (loss)	(7,001)	114	436	(6,451)

Edgar Filing: OLD NATIONAL BANCORP /IN/ - Form 10-Q

Other-than-temporary-impairment on available-for-sale securities realized in income		10,255				10,255
Reclassification of securities from available-for-sale to held-to-maturity		1,033				1,033
Balance at June 30, 2009	\$	(36,217)	\$	(366)	\$	(12,084)
Balance at December 31, 2007	\$	(3,704)	\$	(655)	\$	(6,986)
Other comprehensive income (loss)		(26,692)		87		(2,444)
Balance at June 30, 2008	\$	(30,396)	\$	(568)	\$	(9,430)

Table of Contents**NOTE 6 INVESTMENT SECURITIES**

The following table summarizes the amortized cost and fair value of the available-for-sale and held-to-maturity investment securities portfolio at June 30, 2009 and December 31, 2008 and the corresponding amounts of unrealized gains and losses therein:

(dollars in thousands)	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
June 30, 2009				
Available-for-sale				
U.S. Treasury	\$ 949	\$ 8	\$	\$ 957
U.S. Government-sponsored entities and agencies	605,100	2,968	(7,076)	600,992
Mortgage-backed securities Agency	747,723	13,238	(244)	760,717
Mortgage-backed securities Non-agency	246,561	448	(57,226)	189,783
States and political subdivisions	508,887	19,953	(6,108)	522,732
Pooled trust preferred securities	38,529		(22,176)	16,353
Other securities	161,401	2,708	(6,235)	157,874
Total available-for-sale securities	\$ 2,309,150	\$ 39,323	\$ (99,065)	\$ 2,249,408
Held-to-maturity				
U.S. Government-sponsored entities and agencies	\$ 229,675	\$ 23	\$ (4,341)	\$ 225,357
Mortgage-backed securities Agency	79,173	1,948		81,121
Other securities	5,322		(466)	4,856
Total held-to-maturity securities	\$ 314,170	\$ 1,971	\$ (4,807)	\$ 311,334
December 31, 2008				
Available-for-sale				
U.S. Government-sponsored entities and agencies	\$ 381,634	\$ 7,644	\$	\$ 389,278
Mortgage-backed securities Agency	850,222	15,125	(586)	864,761
Mortgage-backed securities Non-agency	276,842	318	(60,302)	216,858
States and political subdivisions	471,246	16,030	(5,072)	482,204
Pooled trust preferred securities	48,853		(29,186)	19,667
Other securities	160,848	883	(9,473)	152,258
Total available-for-sale securities	\$ 2,189,645	\$ 40,000	\$ (104,619)	\$ 2,125,026
Held-to-maturity				
Mortgage-backed securities Agency	\$ 90,987	\$ 1,529	\$	\$ 92,516
Other securities	8,674		(359)	8,315
Total held-to-maturity securities	\$ 99,661	\$ 1,529	\$ (359)	\$ 100,831

The amortized cost and fair value of the investment securities portfolio are shown by expected maturity. Expected maturities may differ from contractual maturities if borrowers have the right to call or prepay obligations with or without call or prepayment penalties. Weighted average yield is based on amortized cost.

Table of Contents

(dollars in thousands)	June 30, 2009		Weighted Average Yield
	Amortized Cost	Fair Value	
Maturity			
Available-for-sale			
Within one year	\$ 103,336	\$ 104,925	5.05%
One to five years	936,417	903,665	4.60
Five to ten years	271,432	261,795	5.58
Beyond ten years	997,965	979,023	5.24
Total	\$ 2,309,150	\$ 2,249,408	5.01%
Held-to-maturity			
One to five years	\$ 84,495	\$ 85,977	4.53%
Beyond ten years	229,675	225,357	3.88

Table of Contents

Proceeds from sales and calls of securities available for sale were \$627.4 million and \$582.5 million for the six months ended June 30, 2009 and 2008, respectively. Gross gains of \$16.8 million and \$7.3 million and gross losses of \$0.9 million and \$0.7 million were realized on these sales during 2009 and 2008, respectively. Also impacting earnings in 2009 are other-than-temporary impairment charges related to credit loss on six trust preferred securities in the amount of \$10.3 million, described below.

During the second quarter of 2009, approximately \$230.1 million of U.S. government-sponsored entity and agency securities were transferred from the available-for-sale portfolio to the held-to-maturity portfolio at fair value. The \$1.8 million unrealized holding gain at the date of transfer shall continue to be reported as a separate component of shareholders' equity and will be amortized over the remaining life of the securities as an adjustment of yield. Management evaluates securities for other-than-temporary impairment (OTTI) at least on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. The investment securities portfolio is evaluated for OTTI by segregating the portfolio into two general segments and applying the appropriate OTTI model. Investment securities classified as available for sale or held-to-maturity are generally evaluated for OTTI under Statement of Financial Accounting Standards (SFAS) No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. However, certain purchased beneficial interests, including non-agency mortgage-backed securities, asset-backed securities, and collateralized debt obligations, that had credit ratings at the time of purchase of below AA are evaluated using the model outlined in EITF Issue No. 99-20, *Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests that Continue to be Held by a Transfer in Securitized Financial Assets*.

In determining OTTI under the SFAS No. 115 model, management considers many factors, including: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the entity has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary decline exists involves a high degree of subjectivity and judgment and is based on the information available to management at a point in time. The second segment of the portfolio uses the OTTI guidance provided by EITF 99-20 that is specific to purchased beneficial interests that, on the purchase date, were rated below AA. Under the EITF 99-20 model, the Company compares the present value of the remaining cash flows as estimated at the preceding evaluation date to the current expected remaining cash flows. An OTTI is deemed to have occurred if there has been an adverse change in the remaining expected future cash flows.

When other-than-temporary-impairment occurs under either model, the amount of the other-than-temporary-impairment recognized in earnings depends on whether an entity intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss. If an entity intends to sell or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss, the other-than-temporary-impairment shall be recognized in earnings equal to the entire difference between the investment's amortized cost basis and its fair value at the balance sheet date. If an entity does not intend to sell the security and it is not more likely than not that the entity will be required to sell the security before recovery of its amortized cost basis less any current-period loss, the other-than-temporary-impairment shall be separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total other-than-temporary-impairment related to the credit loss is determined based on the present value of cash flows expected to be collected and is recognized in earnings. The amount of the total other-than-temporary-impairment related to other factors shall be recognized in other comprehensive income, net of applicable taxes. The previous amortized cost basis less the other-than-temporary-impairment recognized in earnings shall become the new amortized cost basis of the investment.

Table of Contents

As of June 30, 2009, Old National's security portfolio consisted of 1,157 securities, 276 of which were in an unrealized loss position. The majority of unrealized losses are related to the Company's non-agency mortgage-backed and pooled trust preferred securities, as discussed below:

Non-agency Mortgage-backed Securities

At June 30, 2009, the Company's securities portfolio contained non-agency collateralized mortgage obligations with a market value of \$189.8 million which had net unrealized losses of approximately \$56.8 million. These non-agency mortgage-backed securities were rated AAA at purchase and are not within the scope of EITF 99-20. Four of these securities were downgraded during the quarter and as of June 30, 2009 eight of these securities were rated below investment grade with grades ranging from B3 to Caa1. These securities were evaluated to determine if the underlying collateral is expected to experience loss, resulting in a principal write-down of the notes. As part of the evaluation, a detailed analysis of deal-specific data was obtained from remittance reports provided by the trustee and data from the servicer. The collateral was broken down into several distinct buckets based on loan performance characteristics in order to apply different assumptions to each bucket. The most significant drivers affecting loan performance were examined including original loan-to-value (LTV), underlying property location and the current loan status. The loans in the current bucket were further divided based on their original LTV: a high-LTV and a low-LTV group to which different default curves and severity percentages were applied. The high-LTV group was further bifurcated into loans originated in high-risk states and all other states and a higher default-curve and severity percentages were applied to loans originated in the high-risk states. Different default curves and severity rates were applied to the remaining non-current collateral buckets. Using these collateral-specific assumptions, a model was built to project the future performance of the instrument. Based on this analysis of the underlying collateral as of June 30, 2009, Old National did not record any other-than-temporary impairment on these securities.

Pooled Trust Preferred Securities

Seven of the pooled trust preferred securities in our portfolio fall within the scope of EITF 99-20 and include \$24.5 million book value. These securities were rated A2 and A3 at inception, but at June 30, 2009, Moody's rated one security Baa2, two securities Caa3 and four securities Ca. The issuers in these securities are primarily banks, but some of the pools do include a limited number of insurance companies. The Company uses the OTTI evaluation model to compare the present value of expected cash flows to the previous estimate to determine whether an adverse change in cash flows has occurred during the quarter. The OTTI model considers the structure and term of the collateralized debt obligation (CDO) and the financial condition of the underlying issuers. Specifically, the model details interest rates, principal balances of note classes and underlying issuers, the timing and amount of interest and principal payments of the underlying issuers, and the allocation of the payments to the note classes. The current estimate of expected cash flows is based on the most recent trustee reports and any other relevant market information including announcements of interest payment deferrals or defaults of underlying trust preferred securities. Assumptions used in the model include expected future default rates and prepayments. We assume no recoveries on defaults and a limited number of recoveries on current or projected interest payment deferrals. In addition we use the model to stress each CDO, or make assumptions more severe than expected activity, to determine the degree to which assumptions could deteriorate before the CDO could no longer fully support repayment of Old National's note class. Upon completion of the June 30, 2009 analysis, our model indicated other-than-temporary impairment on six of these securities, all of which experienced additional defaults or deferrals during the period. For the six months ended June 30, 2009, these six securities had other-than-temporary-impairment losses of \$23.7 million, of which \$10.2 million was recorded as expense and \$13.5 million was recorded in other comprehensive income. These six securities remained classified as available for sale at June 30, 2009, and together, the seven securities subject to EITF 99-20 accounted for \$13.7 million of the unrealized loss in the pooled trust preferred securities category at June 30, 2009.

The following table details the six pooled trust preferred securities securities with other-than-temporary-impairment, their credit rating at June 30, 2009 and the related credit losses recognized in earnings:

Table of Contents**NOTE 7 LOANS HELD FOR SALE**

Effective January 1, 2008, residential loans that Old National has committed to sell are recorded at fair value in accordance with SFAS No. 159 *The Fair Value Option for Financial Assets and Financial Liabilities*. Prior to this, these residential loans had been recorded at the lower of cost or market value. At June 30, 2009 and December 31, 2008, Old National had residential loans held for sale of \$25.2 million and \$17.2 million, respectively.

At June 30, 2009, Old National had finance leases held for sale of \$370.2 million. The leases are being marketed by an independent third party and the company anticipates that the majority of these transactions will close during the third quarter of 2009. The leases were reclassified to leases held for sale at the lower of cost or fair value, resulting in no write-down of the leases, but eliminating the need for \$1.6 million of related FAS 5 historical loss allocations in the allowance for loan losses. The portfolio of leases had maturities ranging from 1 to 19 years and interest rates ranging from 2.57% to 13.21%. All of the leases are current. The majority of the leases held for sale are to municipalities, with various types of equipment securing the leases.

During the first six months of 2009, commercial and commercial real estate loans held for investment of \$2.6 million were reclassified to loans held for sale at the lower of cost or fair value and sold for \$2.0 million, resulting in a write-down on loans transferred to held for sale of \$0.6 million, which was recorded as a reduction to the allowance for loan losses. During the first six months of 2008, commercial loans held for investment of \$2.2 million were reclassified to loans held for sale at the lower of cost or fair value and sold, with no write-down on the loans transferred.

NOTE 8 ALLOWANCE FOR LOAN LOSSES

Activity in the allowance for loan losses was as follows:

	Six Months Ended	
	June 30,	
(dollars in thousands)	2009	2008
Balance, January 1	\$ 67,087	\$ 56,463
Additions:		
Provision charged to expense	30,855	27,605
Provision related to leases transferred to held for sale	(1,587)	
Deductions:		
Write-downs from loans transferred to held for sale	572	
Loans charged-off	31,895	26,650
Recoveries	(6,213)	(4,669)
Net charge-offs	26,254	21,981
Balance, June 30	\$ 70,101	\$ 62,087

Individually impaired loans were as follows:

	June 30,	December 31,
	2009	2008
(dollars in thousands)		
Impaired loans without an allowance for loan losses allocation	\$ 14,554	\$ 13,968
Impaired loans with an allowance for loan losses allocation	48,174	38,425
Total impaired loans	\$ 62,728	\$ 52,393
Allowance for loan losses allocated to impaired loans	\$ 20,426	\$ 13,599

For the six months ended June 30, 2009 and 2008, the average balance of impaired loans was \$60.3 million and \$49.2 million, respectively, for which no interest income was recorded. No additional funds are committed to be advanced in connection with impaired loans. Loans deemed impaired are evaluated using the fair value of the underlying collateral.

Table of Contents

Nonperforming loans were as follows:

(dollars in thousands)	June 30, 2009	December 31, 2008
Nonaccrual loans	\$ 77,735	\$ 64,041
Total nonperforming loans	\$ 77,735	\$ 64,041
Past due loans (90 days or more and still accruing)	\$ 2,323	\$ 2,908

Nonperforming loans includes both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans.

From time to time, Old National may agree to modify the contractual terms of a borrower's loan. In cases where such modifications represent a concession to a borrower experiencing financial difficulty, the modification is considered a troubled debt restructuring. Loans modified in a troubled debt restructuring are placed on nonaccrual status until the Company determines the future collection of principal and interest is reasonably assured, which generally requires that the borrower demonstrate a period of performance according to the restructured terms of six months. At June 30, 2009, loans modified in a troubled debt restructuring, which are included in nonaccrual loans, totaled \$0.6 million.

NOTE 9 GOODWILL AND OTHER INTANGIBLE ASSETS

The following table shows the changes in the carrying amount of goodwill by segment for the six months ended June 30, 2009 and 2008:

(dollars in thousands)	Community Banking	Other	Total
Balance, January 1, 2009	\$ 119,325	\$ 39,873	\$ 159,198
Goodwill acquired during the period	8,686		8,686
Balance, June 30, 2009	\$ 128,011	\$ 39,873	\$ 167,884
Balance, January 1, 2008	\$ 119,325	\$ 39,873	\$ 159,198
Adjustments to goodwill			
Balance, June 30, 2008	\$ 119,325	\$ 39,873	\$ 159,198

Goodwill is reviewed annually for impairment. Old National completed its most recent annual goodwill impairment test as of August 31, 2008 and determined that no impairment existed as of this date. Old National recorded \$8.7 million of goodwill in 2009 associated with the acquisition of the Indiana retail branch banking network of Citizens Financial Group.

Table of Contents

The gross carrying amount and accumulated amortization of other intangible assets at June 30, 2009 and December 31, 2008 was as follows:

(dollars in thousands)	Gross Carrying Amount	Accumulated Amortization and Impairment	Net Carrying Amount
June 30, 2009			
Amortized intangible assets:			
Core deposit	\$ 26,810	\$ (8,671)	\$ 18,139
Customer business relationships	25,753	(11,187)	14,566
Customer loan relationships	4,413	(970)	3,443
Total intangible assets	\$ 56,976	\$ (20,828)	\$ 36,148
December 31, 2008			
Amortized intangible assets:			
Core deposit	\$ 15,623	\$ (7,203)	\$ 8,420
Customer business relationships	25,753	(10,189)	15,564
Customer loan relationships	4,413	(769)	3,644
Total intangible assets	\$ 45,789	\$ (18,161)	\$ 27,628

Other intangible assets consist of core deposit intangibles and customer relationship intangibles and are being amortized primarily on an accelerated basis over their estimated useful lives, generally over a period of 7 to 25 years. Old National reviews intangible assets for possible impairment whenever events or changes in circumstances indicate that carrying amounts may not be recoverable. Old National recorded \$11.2 million of other intangibles associated with the acquisition of the branch banking network of Citizens Financial Group in the first quarter of 2009, which is included in the Community Banking column for segment reporting. During the first quarter of 2008, Old National recorded \$0.2 million of other intangibles associated with the purchase of an insurance book of business. The insurance subsidiary is included in the Other column for segment reporting. During the second quarter of 2008, Old National recorded \$0.7 million for impairment of intangibles due to the loss of a significant insurance client at one of its insurance subsidiaries. The insurance subsidiary is included in the Other column for segment reporting. Total amortization expense associated with other intangible assets for the six months ended June 30 was \$2.7 million in 2009 and \$1.8 million in 2008.

Estimated amortization expense for future years is as follows:

(dollars in thousands)	
2009 remaining	\$ 3,320
2010	6,130
2011	5,546
2012	4,840
2013	4,050
Thereafter	12,262
Total	\$ 36,148

Table of Contents**NOTE 10 ASSETS HELD FOR SALE**

Assets held for sale are summarized as follows:

(dollars in thousands)	June 30, 2009	December 31, 2008
Assets held for sale:		
Land	\$ 641	\$ 791
Building and improvements	2,773	3,401
Total	3,414	4,192
Accumulated depreciation	(1,847)	(2,200)
Assets held for sale net	\$ 1,567	\$ 1,992

During the second quarter of 2009, Old National sold one financial center with a carrying value of approximately \$0.4 million in a sale-leaseback transaction with an unrelated party.

Assets remaining held for sale at June 30, 2009 include three financial centers which are actively being marketed. Old National plans to continue occupying these properties under long-term lease arrangements. See note 17 to the consolidated financial statements for additional information on Old National's long-term lease arrangements.

NOTE 11 SHORT-TERM BORROWINGS

The following table presents the distribution of Old National's short-term borrowings and related weighted-average interest rates as of June 30, 2009:

(dollars in thousands)	Federal Funds Purchased	Repurchase Agreements	Other Short-term Borrowings	Total
2009				
Outstanding at June 30, 2009	\$ 143,411	\$ 284,847	\$ 114,160	\$ 542,418
Average amount outstanding	264,609	291,958	134,465	691,032
Maximum amount outstanding at any month-end	488,392	292,478	158,809	
Weighted average interest rate:				
During six months ended				
June 30, 2009	0.20%	0.23%	0.36%	0.24%
At June 30, 2009	0.13	0.17	0.22	0.17

Other Short-term Borrowings**Line of Credit**

During the first quarter of 2008, Old National entered into a \$100 million revolving credit facility at the parent company level. Three unrelated financial institutions serve as lenders for the facility. During part of 2008, \$55 million was outstanding under the revolving credit facility and was included in other short-term borrowings. The facility had an interest rate of LIBOR plus 1.00% and a maturity of 364 days. There was no amount outstanding as of December 31, 2008. On February 13, 2009, the line of credit was terminated.

During the second quarter of 2009, Old National entered into a \$30 million revolving credit facility at the parent level. The facility had an interest rate of LIBOR plus 2.00% and a maturity of 364 days. There was no amount outstanding as of June 30, 2009.

Table of Contents**Term Auction Facility**

On January 2, 2009, Old National borrowed \$100 million from the Federal Reserve under its Term Auction Facility. The borrowing had an interest rate of .20% and a maturity of 83 days. On January 15, 2009, Old National borrowed an additional \$50 million from the Federal Reserve under the Term Auction Facility. The additional borrowing had an interest rate of .25% and a maturity of 28 days. On February 12, 2009, the \$50 million borrowing was rolled over into new debt with an interest rate of .25% and a maturity date of March 12, 2009. On March 12, 2009, the \$50 million borrowing was rolled over into new debt with an interest rate of .25% and a maturity date of April 9, 2009. On April 9, 2009, the \$50 million debt matured and was replaced with \$100 million of new debt with an interest rate of .25% and a maturity date of May 7, 2009. On April 23, 2009, Old National borrowed an additional \$50 million with an interest rate of .25% and a maturity date of July 16, 2009. On June 4, 2009, Old National borrowed an additional \$50 million with an interest rate of .25% and a maturity date of July 2, 2009.

NOTE 12 FINANCING ACTIVITIES

The following table summarizes Old National's and its subsidiaries' other borrowings at June 30, 2009, and December 31, 2008:

(dollars in thousands)	June 30, 2009	December 31, 2008
Old National Bancorp:		
Senior unsecured note (fixed rate 5.00%) maturing May 2010	\$ 50,000	\$ 50,000
Junior subordinated debenture (fixed rates 6.27% to 8.00% and variable rate 3.65%) maturing April 2032 to March 2035	108,000	108,000
SFAS 133 fair value hedge and other basis adjustments	(749)	(771)
Old National Bank:		
Securities sold under agreements to repurchase (fixed rates 2.45% to 4.06%) maturing December 2010 to October 2012	99,000	99,000
Federal Home Loan Bank advances (fixed rates 2.11% to 8.34%) maturing September 2009 to January 2023	399,871	425,198
Subordinated bank notes (fixed rate 6.75%) maturing October 2011	150,000	150,000
Capital lease obligation	4,370	4,390
SFAS 133 fair value hedge and other basis adjustments	(187)	(950)
Total other borrowings	\$ 810,305	\$ 834,867

Contractual maturities of other borrowings at June 30, 2009, were as follows:

(dollars in thousands)		
Due in 2009		\$ 2,020
Due in 2010		99,043
Due in 2011		275,046
Due in 2012		150,688
Due in 2013		106,405
Thereafter		178,039
SFAS 133 fair value hedge and other basis adjustments		(936)
Total		\$ 810,305

FEDERAL HOME LOAN BANK

Federal Home Loan Bank advances had weighted-average rates of 3.82% and 3.81% at June 30, 2009, and December 31, 2008, respectively. These borrowings are collateralized by investment securities and residential real

estate loans up to 150% of outstanding debt.

Table of Contents**SUBORDINATED BANK NOTES**

Subordinated bank notes qualify as Tier 2 Capital for regulatory purposes, subject to certain limitations, and are in accordance with the senior and subordinated global bank note program in which Old National Bank may issue and sell up to a maximum of \$1 billion. Notes issued by Old National Bank under the global note program are not obligations of, or guaranteed by, Old National Bancorp.

JUNIOR SUBORDINATED DEBENTURES

Junior subordinated debentures related to trust preferred securities are classified in other borrowings. These securities qualify as Tier 1 capital for regulatory purposes, subject to certain limitations.

Old National guarantees the payment of distributions on the trust preferred securities issued by ONB Capital Trust II. ONB Capital Trust II issued \$100 million in preferred securities in April 2002. The preferred securities have a liquidation amount of \$25 per share with a cumulative annual distribution rate of 8.0% or \$2.00 per share payable quarterly and maturing on April 15, 2032. Proceeds from the issuance of these securities were used to purchase junior subordinated debentures with the same financial terms as the securities issued by ONB Capital Trust II. Old National may redeem the junior subordinated debentures and thereby cause a redemption of the trust preferred securities in whole (or in part from time to time) on or after April 12, 2007. Costs associated with the issuance of these trust preferred securities totaling \$3.3 million in 2002 were capitalized and are being amortized through the maturity dates of the securities. The unamortized balance is included in other assets in the consolidated balance sheet.

During February 2007, Old National acquired St. Joseph Capital Trust I and St. Joseph Capital Trust II in conjunction with its acquisition of St. Joseph Capital Corporation. Old National guarantees the payment of distributions on the trust preferred securities issued by St. Joseph Capital Trust I and St. Joseph Capital Trust II. St. Joseph Capital Trust I issued \$3.0 million in preferred securities in July 2003. The preferred securities carry a variable rate of interest priced at the three-month LIBOR plus 305 basis points, payable quarterly and maturing on July 11, 2033. Proceeds from the issuance of these securities were used to purchase junior subordinated debentures with the same financial terms as the securities issued by St. Joseph Capital Trust I. St. Joseph Capital Trust II issued \$5.0 million in preferred securities in March 2005. The preferred securities have a cumulative annual distribution rate of 6.27% until March 2010 when it will carry a variable rate of interest priced at the three-month LIBOR plus 175 basis points, payable quarterly and maturing on March 17, 2035. Proceeds from the issuance of these securities were used to purchase junior subordinated debentures with the same financial terms as the securities issued by St. Joseph Capital Trust II. Old National may redeem the junior subordinated debentures and thereby cause a redemption of the trust preferred securities in whole (or in part from time to time) on or after September 30, 2008 (for debentures owned by St. Joseph Capital Trust I) and on or after March 31, 2010 (for debentures owned by St. Joseph Capital Trust II), and in whole (but not in part) following the occurrence and continuance of certain adverse federal income tax or capital treatment events.

CAPITAL LEASE OBLIGATION

On January 1, 2004, Old National entered into a long-term capital lease obligation for a financial center in Owensboro, Kentucky, which extends for 25 years with one renewal option for 10 years. The economic substance of this lease is that Old National is financing the acquisition of the building through the lease and accordingly, the building is recorded as an asset and the lease is recorded as a liability. The fair value of the capital lease obligation was estimated using a discounted cash flow analysis based on Old National's current incremental borrowing rate for similar types of borrowing arrangements.

Table of Contents

At June 30, 2009, the future minimum lease payments under the capital lease were as follows:

(dollars in thousands)	
2009 remaining	\$ 194
2010	390
2011	390
2012	390
2013	390
Thereafter	11,314
Total minimum lease payments	13,068
Less amounts representing interest	8,698
Present value of net minimum lease payments	\$ 4,370

NOTE 13 EMPLOYEE BENEFIT PLANS
RETIREMENT PLAN

Old National maintains a funded noncontributory defined benefit plan (the Retirement Plan) that was frozen as of December 31, 2005. Retirement benefits are based on years of service and compensation during the highest paid five years of employment. The freezing of the plan provides that future salary increases will not be considered. Old National's policy is to contribute at least the minimum funding requirement determined by the plan's actuary. Old National also maintains an unfunded pension restoration plan (the Restoration Plan) which provides benefits for eligible employees that are in excess of the limits under Section 415 of the Internal Revenue Code of 1986, as amended, that apply to the Retirement Plan. The Restoration Plan is designed to comply with the requirements of ERISA. The entire cost of the plan, which was also frozen as of December 31, 2005, is supported by contributions from the Company.

Old National contributed \$0.2 million to cover benefit payments from the Restoration Plan during the first six months of 2009. Old National expects to contribute an additional \$0.2 million to cover benefit payments from the Restoration Plan during the remainder of 2009.

The net periodic benefit cost and its components were as follows for the three and six months ended June 30:

(dollars in thousands)	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2009	2008	2009	2008
Interest cost	\$ 493	\$ 535	\$ 986	\$ 1,071
Expected return on plan assets	(482)	(792)	(965)	(1,584)
Recognized actuarial loss	363	158	726	316
Settlement	(350)	434		434
Net periodic benefit cost	\$ 24	\$ 335	\$ 747	\$ 237

NOTE 14 STOCK-BASED COMPENSATION

During May 2008, shareholders approved the Company's 2008 Incentive Compensation Plan which authorizes up to a maximum of 1.0 million shares plus certain shares covered under the 1999 Equity Incentive Plan. At June 30, 2009, 1.4 million shares remained available for issuance. The granting of awards to key employees is typically in the form of options to purchase capital stock or restricted stock.

Stock Options

The Company granted 177 thousand stock options during the first six months of 2009. Using the Black-Scholes option pricing model, the Company estimated the fair value of these stock options to be \$0.3 million. The Company will

expense this amount ratably over the three-year vesting period. The assumptions used in the option pricing model and the determination of stock option expense were an expected volatility of 28.8%; a risk free interest rate of 2.08%; an expected option term of six years; a 5.31% dividend yield; and a forfeiture rate of 7%. These options expire in ten years.

Table of Contents

Old National recorded \$0.1 million of stock based compensation expense, net of tax, during the first six months of 2009 as compared to \$0.1 million for the first six months of 2008.

Restricted Stock Awards

The Company granted 80 thousand time-based restricted stock awards to certain key officers during 2009, with shares vesting at the end of a thirty-six month period. Compensation expense is recognized on a straight-line basis over the vesting period. Shares are subject to certain restrictions and risk of forfeiture by the participants. As of June 30, 2009, unrecognized compensation expense was estimated to be \$3.2 million for unvested restricted share awards.

Old National recorded expense of \$0.3 million, net of tax benefit, during the first six months of 2009, compared to expense of \$1.0 million during the first six months of 2008 related to the vesting of restricted share awards. Included in the first six months of 2009 is the reversal of \$0.8 million of expense associated with certain performance-based restricted stock grants.

Restricted Stock Units

The Company granted 106 thousand shares of performance based restricted stock units to certain key officers during 2009, with shares vesting at the end of a thirty-six month period based on the achievement of certain targets.

Compensation expense is recognized on a straight-line basis over the vesting period. Shares are subject to certain restrictions and risk of forfeiture by the participants. In addition, certain of the restricted stock units are subject to relative performance factors which could increase or decrease the percentage of shares issued.

Old National recorded \$0.1 million of stock based compensation expense, net of tax, during the first six months of 2009. The Company did not grant restricted stock units in 2008.

NOTE 15 INCOME TAXES

Following is a summary of the major items comprising the differences in taxes from continuing operations computed at the federal statutory rate and as recorded in the consolidated statement of income for the three and six months ended June 30:

(dollars in thousands)	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2009	2008	2009	2008
Provision at statutory rate of 35%	\$ 2,679	\$ 8,513	\$ 5,013	\$ 13,352
Tax-exempt income	(4,060)	(3,921)	(8,231)	(7,694)
Reversal of portion of unrecognized tax benefits				(6,611)
State income taxes	(675)	354	(1,481)	358
Other, net	75	(98)	(18)	(72)
Income tax expense (benefit)	\$ (1,981)	\$ 4,848	\$ (4,717)	\$ (667)
Effective tax rate	(25.9)%	19.9%	(32.9)%	(1.7)%

For the three months ended June 30, 2009, the effective tax rate was lower than the three months ended June 30, 2008. The main factor for the decrease in the effective tax rate for the three months ended June 30, 2009, was that the tax-exempt income comprised a higher percentage of pre-tax income in the three months ended June 30, 2009 than at June 30, 2008. For the six months ended June 30, 2009, the effective tax rate was lower than the six months ended June 30, 2008. The main factor for the decrease in the effective tax rate for the six months ended June 30, 2009, was that the tax-exempt income comprised a higher percentage of pre-tax income in the six months ended June 30, 2009 than at June 30, 2008.

Table of Contents**Unrecognized Tax Benefits**

The Company and its subsidiaries file a consolidated U.S. federal income tax return, as well as filing various state returns. Unrecognized state income tax benefits are reported net of their related deferred federal income tax benefit.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

(dollars in thousands)	2009
Balance at January 1	\$ 7,513
Additions based on tax positions related to the current year	52
Balance at June 30	\$ 7,565

Approximately \$1.9 million of unrecognized tax benefits, if recognized, would favorably affect the effective income tax rate in future periods.

NOTE 16 DERIVATIVE FINANCIAL INSTRUMENTS

As part of the Company's overall interest rate risk management, Old National uses derivative instruments, including interest rate swaps, caps and floors. The notional amount of these derivative instruments was \$150.0 million and \$55.1 million at June 30, 2009 and December 31, 2008, respectively. In addition, commitments to fund certain mortgage loans (interest rate lock commitments) and forward commitments for the future delivery of mortgage loans to third party investors are considered derivatives. At June 30, 2009, the notional amount of the interest rate lock commitments and forward commitments were \$39.9 million and \$64.2 million, respectively. At December 31, 2008, the notional amount of the interest rate lock commitments and forward commitments were \$20.6 million and \$37.0 million, respectively. It is the Company's practice to enter into forward commitments for the future delivery of residential mortgage loans to third party investors when interest rate lock commitments are entered into in order to economically hedge the effect of changes in interest rates resulting from its commitment to fund the loans. All derivative instruments are recognized on the balance sheet at their fair value in accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended.

Old National also enters into derivative instruments for the benefit of its customers. The notional amounts of these customer derivative instruments and the offsetting counterparty derivative instruments were \$511.1 million and \$511.1 million, respectively, at June 30, 2009. At December 31, 2008, the notional amounts of the customer derivative instruments and the offsetting counterparty derivative instruments were \$484.0 million and \$484.0 million, respectively. These derivative contracts do not qualify for hedge accounting. These instruments include interest rate swaps, caps, foreign exchange forward contracts and commodity swaps and options. Commonly, Old National will economically hedge significant exposures related to these derivative contracts entered into for the benefit of customers by entering into offsetting contracts with approved, reputable, independent counterparties with substantially matching terms.

Credit risk arises from the possible inability of counterparties to meet the terms of their contracts. Old National's exposure is limited to the replacement value of the contracts rather than the notional, principal or contract amounts. There are provisions in our agreements with the counterparties that allow for certain unsecured credit exposure up to an agreed threshold. Exposures in excess of the agreed thresholds are collateralized. In addition, the Company minimizes credit risk through credit approvals, limits, and monitoring procedures.

Table of Contents

The following tables summarize the fair value of derivative financial instruments utilized by Old National:

	Asset Derivatives			
	June 30, 2009		December 31, 2008	
(dollars in thousands)	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives designated as hedging instruments under Statement 133				
Interest rate contracts	Other assets	\$ 541	Other assets	\$ 1
Total derivatives designated as hedging instruments under Statement 133		\$ 541		\$ 1
Derivatives not designated as hedging instruments under Statement 133				
Interest rate contracts	Other assets	\$ 32,576	Other assets	\$ 45,737
Commodity contracts	Other assets		Other assets	130
Foreign exchange contracts	Other assets		Other assets	441
Mortgage contracts	Other assets	589	Other assets	459
Total derivatives not designated as hedging instruments under Statement 133		\$ 33,165		\$ 46,767
Total derivative assets		\$ 33,706		\$ 46,768

	Liability Derivatives			
	June 30, 2009		December 31, 2008	
(dollars in thousands)	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives not designated as hedging instruments under Statement 133				
Interest rate contracts	Other liabilities	\$ 32,173	Other liabilities	\$ 46,338
Commodity contracts	Other liabilities		Other liabilities	130
Foreign exchange contracts	Other liabilities		Other liabilities	441
Mortgage contracts	Other liabilities	73	Other liabilities	505
Total derivatives not designated as hedging instruments under Statement 133		\$ 32,246		\$ 47,414
Total derivative liabilities		\$ 32,246		\$ 47,414

The effect of derivative instruments on the Consolidated Statement of Income for the three and six months ended June 30, 2009 and 2008 are as follows:

Derivatives Not Designated as	Location of Gain or (Loss)	Amount of Gain or (Loss)
--------------------------------------	-----------------------------------	---------------------------------

Hedging Instruments under Statement 133	Recognized in Income on Derivative	Recognized in Income on Derivative	
Interest rate contracts (1)	Interest income / (expense)	\$ (68)	\$ 123
Interest rate contracts (3)	Other income / (expense)	455	(331)
Mortgage contracts	Mortgage banking revenue	234	19
Total		\$ 621	\$ (189)

Table of Contents

(dollars in thousands)		Six months Ended June 30, 2009	Six months Ended June 30, 2008
Derivatives in Statement 133 Fair Value Hedging Relationships	Location of Gain or (Loss) Recognized in Income on Derivative	Amount of Gain or (Loss) Recognized in Income on Derivative	
Interest rate contracts (1)	Interest income / (expense)	\$ 1,101	\$ 676
Interest rate contracts (2)	Other income / (expense)	72	71
Total		\$ 1,173	\$ 747

Derivatives Not Designated as Hedging Instruments under Statement 133	Location of Gain or (Loss) Recognized in Income on Derivative	Amount of Gain or (Loss) Recognized in Income on Derivative

statements.

NOTE 17 COMMITMENTS AND CONTINGENCIES

LITIGATION

In the normal course of business, Old National Bancorp and its subsidiaries have been named, from time to time, as defendants in various legal actions. Certain of the actual or threatened legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages.

Old National contests liability and/or the amount of damages as appropriate in each pending matter. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases where claimants seek substantial or indeterminate damages or where investigations and proceedings are in the early stages, Old National cannot predict with certainty the loss or range of loss, if any, related to such matters, how or if such matters will be resolved, when they will ultimately be resolved, or what the eventual settlement, or other relief, if any, might be. Subject to the foregoing, Old National believes, based on current knowledge and after consultation with counsel, that the outcome of such pending matters will not have a material adverse effect on the consolidated financial condition of Old National, although the outcome of such matters could be material to Old National's operating results and cash flows for a particular future period, depending on, among other things, the level of Old National's revenues or income for such period.

In November 2002, several beneficiaries of certain trusts filed a complaint against Old National Bancorp and Old National Trust Company in the United States District Court for the Western District of Kentucky relating to the administration of the trusts in 1997. The complaint, as amended, alleged that Old National (through a predecessor), as trustee, mismanaged termination of a lease between the trusts and a tenant mining company. The complaint seeks, among other relief, unspecified damages, (costs and expenses, including attorneys' fees, and such other relief as the court might find just and proper.) On March 25, 2009, the Court granted summary judgment to Old National concluding that the plaintiffs do not have standing to sue Old National in this matter. The plaintiffs subsequently filed a motion to alter or amend the judgment with the Court. The Plaintiffs motion to alter or amend the judgment was granted by the Court on July 29, 2009, reversing the Court's March 25, 2009 Order as to standing. The July 29, 2009 Order also permits Old National to file a new motion for summary judgment with respect to issues that have not been resolved by the Court. Old National continues to believe that it has meritorious defenses to each of the claims in the lawsuit and intends to continue to vigorously defend the lawsuit. There can be no assurance, however, that Old National will be successful, and an adverse resolution of the lawsuit could have a material adverse effect on its consolidated financial position and results of operations in the period in which the lawsuit is resolved. Old National is not presently able to reasonably estimate potential losses, if any, related to the lawsuit and has not recorded a liability in its accompanying Consolidated Balance Sheets.

Table of Contents**LEASES**

In December 2006, Old National entered into a sale leaseback agreement with an unrelated third party for its three main buildings in downtown Evansville, Indiana. Old National sold assets with a carrying value of \$69.9 million, received approximately \$79.0 million in cash and incurred \$0.4 million of selling costs. The \$8.7 million deferred gain will be amortized over the term of the lease. The agreement requires rent payments of approximately \$6.6 million per year over the next 23 years.

During 2007, seventy-three financial centers were sold in a series of sale leaseback transactions to an unrelated party. Old National received cash proceeds of \$176.3 million, net of selling costs. The properties sold had a carrying value of \$65.3 million, resulting in a gain of \$111.1 million. In 2007, \$4.7 million of this gain was recognized, the remainder has been deferred and is being amortized over the term of the leases. The leases have terms of ten to twenty-four years, and Old National has the right, at its option, to extend the term of the leases for four additional successive terms of five years each, upon specified terms and conditions. Under the agreements signed in 2007, Old National is obligated to pay base rents for the properties in an aggregate annual amount of \$14.0 million in the first year.

In addition, Old National sold an office building located in Evansville, Indiana to an unrelated party in a separate transaction during 2007. This transaction resulted in cash proceeds of \$3.4 million, net of selling costs. The property had a carrying value of \$3.7 million, resulting in a loss of \$0.3 million. Old National agreed to lease back the building for a term of five years. Under the lease agreement, Old National is obligated to pay a base rent of \$0.4 million per year.

During 2008, Old National sold eight financial centers in a series of sale leaseback transactions to unrelated parties. Old National received cash proceeds of \$15.9 million, net of selling costs. The properties sold had a carrying value of \$12.0 million. The \$3.9 million deferred gain will be amortized over the term of the leases. The leases have terms of fifteen to twenty years. Under the lease agreements, Old National is obligated to pay a base rent of \$1.5 million per year.

During 2009, Old National sold two financial centers in sale leaseback transactions to unrelated parties. Old National received cash proceeds of \$1.4 million, net of selling costs. The properties sold had a carrying value of \$1.0 million. The \$0.4 million deferred gain will be amortized over the term of the leases. The leases have terms of fifteen years. Under the lease agreements, Old National is obligated to pay a base rent of \$0.1 million per year.

In March 2009, Old National acquired the Indiana retail branch banking network of Citizens Financial Group. The network included 65 leased locations. Old National intends to close or merge 11 of these locations into existing branch locations during 2009. The leases have term of less than one year to ten years. Under the lease agreements, Old National is obligated to pay a base rent of approximately \$2.6 million per year.

CREDIT-RELATED FINANCIAL INSTRUMENTS

In the normal course of business, Old National's banking affiliates have entered into various agreements to extend credit, including loan commitments of \$1.049 billion and standby letters of credit of \$101.7 million at June 30, 2009. At June 30, 2009, approximately \$991 million of the loan commitments had fixed rates and \$58 million had floating rates, with the fixed interest rates ranging from 0.5% to 18%. At December 31, 2008, loan commitments were \$1.124 billion and standby letters of credit were \$108.4 million. These commitments are not reflected in the consolidated financial statements. At June 30, 2009 and December 31, 2008, the balance of the allowance for unfunded loan commitments was \$4.1 million and \$3.5 million, respectively.

At June 30, 2009 and December 31, 2008 Old National had credit extensions of \$27.5 million and \$29.0 million, respectively, with various unaffiliated banks related to letter of credit commitments issued on behalf of Old National's clients. At June 30, 2009 and December 31, 2008, Old National provided collateral to the unaffiliated banks to secure credit extensions totaling \$24.1 million and \$25.0 million, respectively. Old National did not provide collateral for the remaining credit extensions.

Table of Contents

NOTE 18 FINANCIAL GUARANTEES

Old National holds instruments, in the normal course of business with clients, that are considered financial guarantees in accordance with FIN 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*, which requires the Company to record the instruments at fair value. Standby letters of credit guarantees are issued in connection with agreements made by clients to counterparties. Standby letters of credit are contingent upon failure of the client to perform the terms of the underlying contract. Credit risk associated with standby letters of credit is essentially the same as that associated with extending loans to clients and is subject to normal credit policies. The term of these standby letters of credit is typically one year or less. At June 30, 2009, the notional amount of standby letters of credit was \$101.7 million, which represents the maximum amount of future funding requirements, and the carrying value was \$0.5 million.

During the second quarter of 2007, Old National entered into a risk participation in an interest rate swap. The interest rate swap has a notional amount of \$9.4 million at June 30, 2009.

NOTE 19 SEGMENT INFORMATION

Old National operates in two operating segments: community banking and treasury. The community banking segment serves customers in both urban and rural markets providing a wide range of financial services including commercial, real estate and consumer loans; lease financing; checking, savings, time deposits and other depository accounts; cash management services; and debit cards and other electronically accessed banking services and Internet banking. Treasury manages investments, wholesale funding, interest rate risk, liquidity and leverage for Old National.

Additionally, treasury provides other miscellaneous capital markets products for its corporate banking clients. Other is comprised of the parent company and several smaller business units including insurance, wealth management and brokerage. It includes unallocated corporate overhead and intersegment revenue and expense eliminations.

In order to measure performance for each segment, Old National allocates capital and corporate overhead to each segment. Capital and corporate overhead are allocated to each segment using various methodologies, which are subject to periodic changes by management. Intersegment sales and transfers are not significant.

Old National uses a funds transfer pricing (FTP) system to eliminate the effect of interest rate risk from net interest income in the community banking segment and from companies included in the other column. The FTP system is used to credit or charge each segment for the funds the segments create or use. The net FTP credit or charge is reflected in segment net interest income.

The financial information for each operating segment is reported on the basis used internally by Old National's management to evaluate performance and is not necessarily comparable with similar information for any other financial institution.

Table of Contents

Summarized financial information concerning segments is shown in the following table for the three and six months ended June 30:

(dollars in thousands)	Community Banking	Treasury	Other	Total
Three months ended June 30, 2009				
Net interest income	\$ 66,783	\$ (4,782)	\$ (1,234)	\$ 60,767
Provision for loan losses	11,978	85	(95)	11,968
Noninterest income	26,525	3,308	15,773	45,606
Noninterest expense	68,193	2,810	15,748	86,751
Income (loss) before income taxes	13,137	(4,369)	(1,114)	7,654
Total assets	4,754,079	3,138,161	119,935	8,012,175
Three months ended June 30, 2008				
Net interest income	\$ 64,813	\$ (2,652)	\$ (817)	\$ 61,344
Provision for loan losses	5,493	207		5,700
Noninterest income	21,382	5,236	16,895	43,513

Income before income taxes	24,509	1,229	(1,415)	24,323
Total assets	4,971,884	2,514,308	115,594	7,601,786
Six months ended June 30, 2009				
Net interest income	\$ 136,241	\$ (14,536)	\$ (1,740)	\$ 119,965
Provision for loan losses	29,278	85	(95)	29,268
Noninterest income	46,701	7,508	33,632	87,841
Noninterest expense	127,671	4,258	32,286	164,215
Income before income taxes	25,993	(11,371)	(299)	14,323
Total assets	4,754,079	3,138,161	119,935	8,012,175
Six months ended June 30, 2008				
Net interest income	\$ 128,053	\$ (5,681)	\$ (1,238)	\$ 121,134
Provision for loan losses	27,379	226		27,605
Noninterest income	40,483	11,879	38,027	90,389
Noninterest expense	108,108	2,483	35,179	145,770
Income (loss) before income taxes	33,049	3,489	1,610	38,148
Total assets	4,971,884	2,514,308	115,594	7,601,786

NOTE 20 FAIR VALUE

Effective January 1, 2008, the Company adopted SFAS No. 157 and SFAS No. 159. Both standards address aspects of the expanding application of fair value accounting.

SFAS No. 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. SFAS No. 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair values:

Level 1 Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2 Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated

by observable market data.

Level 3 Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Table of Contents

Old National used the following methods and significant assumptions to estimate the fair value of each type of financial instrument:

Investment securities: The fair values for investment securities are determined by quoted market prices, if available (Level 1). For securities where quoted prices are not available, fair values are calculated based on market prices of similar securities (Level 2). For securities where quoted prices or market prices of similar securities are not available, fair values are calculated using discounted cash flows or other market indicators (Level 3). Discounted cash flows are calculated using spread to swap and libor curves that are updated to incorporate loss severities, volatility, credit spread and optionality. During times when trading is more liquid, broker quotes are used (if available) to validate the model. Rating agency and industry research reports as well as defaults and deferrals on individual securities are reviewed and incorporated into the calculations.

Residential loans held for sale: The fair value of loans held for sale is determined using quoted prices for a similar asset, adjusted for specific attributes of that loan (Level 2).

Derivative financial instruments: The fair values of derivative financial instruments are based on derivative valuation models using market data inputs as of the valuation date (Level 2).

Deposits: The fair value of retail certificates of deposit is estimated by discounting future cash flows using rates currently offered for deposits with similar remaining maturities (Level 2).

Assets and liabilities measured at fair value under SFAS No. 157 on a recurring basis, including financial assets and liabilities for which the Company has elected the fair value option, are summarized below:

Fair Value Measurements at June 30, 2009 Using Significant

	Carrying Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(dollars in thousands)				
Financial Assets				
Investment securities available-for-sale	\$ 2,249,408		\$ 2,233,055	\$ 16,353
Residential loans held for sale	25,249		25,249	
Derivative assets	33,706		33,706	
Financial Liabilities				
Certain retail certificates of deposit				
Derivative liabilities	32,246		32,246	

Fair Value Measurements at December 31, 2008 Using Significant

	Carrying Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(dollars in thousands)				
Financial Assets				
Investment securities available-for-sale	\$ 2,125,026		\$ 2,105,358	\$ 19,668
Residential loans held for sale	17,155		17,155	
Derivative assets	46,768		46,768	

Financial Liabilities

Certain retail certificates of deposit	49,309	49,309
Derivative liabilities	47,414	47,414

Table of Contents

The table below presents a reconciliation of all assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the six months ended June 30, 2009:

	Fair Value Measurements using Significant Unobservable Inputs (Level 3) Pooled Trust Preferred Securities Available- for-Sale
(dollars in thousands)	
Beginning balance, January 1, 2009	\$ 19,668
Accretion/amortization of discount or premium	(14)
Payments received	(99)
Credit loss write-downs	(10,255)
Increase/decrease in fair value of securities	7,053
Transfers in and/or out of Level 3	
Ending balance, June 30, 2009	\$ 16,353

Included in the income statement is \$14 thousand in interest expense from the amortization of discounts on securities. The increase in market value is reflected in the balance sheet as an increase in the fair value of investment securities available-for sale, an increase in accumulated other comprehensive income, which is included in shareholders' equity, and a decrease in other assets related to the tax impact.

Assets measured at fair value on a non-recurring basis are summarized below:

	Fair Value Measurements at June 30, 2009 Using			
	Carrying Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(dollars in thousands)				
Financial Assets				
Impaired loans	\$ 27,748			\$ 27,748
Impaired loans, which are measured for impairment using the fair value of the collateral, had a principal amount of \$48.1 million, with a valuation allowance of \$20.4 million at June 30, 2009.				

	Fair Value Measurements at December 31, 2008 Using			
	Carrying Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(dollars in thousands)				
Financial Assets				
Impaired loans	\$ 24,826			\$ 24,826
Impaired loans, which are measured for impairment using the fair value of the collateral, had a principal amount of \$38.4 million, with a valuation allowance of \$13.6 million at December 31, 2008.				

Financial instruments recorded using SFAS No. 159

Under SFAS No. 159, the Company may elect to report most financial instruments and certain other items at fair value on an instrument-by instrument basis with changes in fair value reported in net income. After the initial adoption, the election is made at the acquisition of an eligible financial asset, financial liability or firm commitment or when certain specified reconsideration events occur. The fair value election may not be revoked once an election is made.

Table of Contents

Additionally, the transition provisions of SFAS No. 159 permit a one-time election for existing positions at the adoption date with a cumulative-effect adjustment included in beginning retained earnings and future changes in fair value reported in net income. The Company did not elect the fair value option for any existing position at January 1, 2008.

The Company did elect the fair value option under SFAS No. 159 prospectively for the following items:

Residential mortgage loans held for sale

Certain retail certificates of deposit

For items for which the fair value option has been elected, interest income is recorded in the consolidated statements of income based on the contractual amount of interest income earned on financial assets (except any that are on nonaccrual status). Included in the income statement are \$210 thousand and \$347 thousand of interest income for residential loans held for sale for the three and six months ended June 30, 2009, respectively. Included in the income statement are \$124 thousand and \$220 thousand of interest income for residential loans held for sale for the three and six months ended June 30, 2008, respectively. Interest expense is recorded based on the contractual amount of interest expense incurred. The income statement includes \$2 thousand and \$73 thousand of interest expense for the three and six months ended June 30, 2009, respectively, for certain retail certificates of deposit under SFAS No. 159. The income statement includes \$431 thousand and \$576 thousand of interest expense for the three and six months ended June 30, 2008, respectively, for certain retail certificates of deposit under SFAS No. 159.

Residential mortgage loans held for sale

Old National has elected the fair value option under SFAS No. 159 for newly originated conforming fixed-rate and adjustable-rate first mortgage loans held for sale. These loans are intended for sale and are hedged with derivative instruments. None of these loans are 90 days or more past due, nor are any on nonaccrual status. Old National has elected the fair value option to mitigate accounting mismatches in cases where hedge accounting is complex and to achieve operational simplification. The fair value option was not elected for loans held for investment. This election was effective for applicable loans originated after January 1, 2008.

Certain retail certificates of deposit

Old National has elected the fair value option under SFAS No. 159 for certain retail certificates of deposit; specifically, pools of retail certificates of deposit that have been matched with derivative instruments. Old National has elected the fair value option to mitigate accounting mismatches in cases where hedge accounting is complex and to achieve operational simplification. This election was adopted prospectively for certain retail certificates of deposit originated after January 1, 2008. At June 30, 2009, there were no retail certificates of deposit accounted for under the fair value option under SFAS No. 159.

As of June 30, 2009, the difference between the aggregate fair value and the aggregate remaining principal balance for loans and certificates of deposit for which the fair value option has been elected was as follows. Accrued interest at period end is included in the fair value of the instruments.

(dollars in thousands)	Aggregate Fair Value	Difference	Contractual Principal
Residential loans held for sale	\$ 25,249	\$ 181	\$ 25,068
Certain retail certificates of deposit			

Table of Contents

The following table presents the amount of gains and losses from fair value changes included in income before income taxes for financial assets and liabilities carried at fair value for the three and six months ended June 30, 2009:

**Changes in Fair Value for the Three Months ended June 30, 2009, for Items
Measured at Fair Value Pursuant to Election of the Fair Value Option**

Table of Contents

In accordance with FSP FAS 107-1, the carrying amounts and estimated fair values of financial instruments, not previously presented, at June 30, 2009 and December 31, 2008 are as follows:

(dollars in thousands)	Carrying Value	Fair Value
June 30, 2009		
Financial Assets		
Cash, due from banks, federal funds sold and money market investments	\$ 209,246	\$ 209,246
Investment securities held-to-maturity	314,170	311,334
Federal Home Loan Bank stock	36,090	36,090
Loans, net (including impaired loans)	4,081,105	4,283,646
Accrued interest receivable	49,082	49,082
Financial Liabilities		
Deposits	\$ 5,798,508	\$ 5,841,192
Short-term borrowings	542,418	542,399
Other borrowings	810,305	824,718
Accrued interest payable	13,946	13,946
Standby letters of credit	538	538
Off-Balance Sheet Financial Instruments		
Commitments to extend credit	\$	\$ 2,266

(dollars in thousands)	Carrying Value	Fair Value
December 31, 2008		
Financial Assets		
Cash, due from banks, federal funds sold and money market investments	\$ 193,012	\$ 193,012
Investment securities held-to-maturity	99,661	100,831
Federal Home Loan Bank stock	41,090	41,090
Loans, net (including impaired loans)	4,693,272	4,997,869
Accrued interest receivable	49,030	49,030
Financial Liabilities		
Deposits	\$ 5,372,978	\$ 5,425,134
Short-term borrowings	649,623	649,610
Other borrowings	834,867	850,569
Accrued interest payable	14,954	14,954
Standby letters of credit	494	494
Off-Balance Sheet Financial Instruments		
Commitments to extend credit	\$	\$ 1,614

The following methods and assumptions were used to estimate the fair value of each type of financial instrument.

Cash, due from banks, federal funds sold and resell agreements and money market investments: For these instruments, the carrying amounts approximate fair value.

Investment securities: Fair values for investment securities held-to-maturity are based on quoted market prices, if available. For securities where quoted prices are not available, fair values are estimated based on market prices of similar securities.

Table of Contents

Federal Home Loan Bank Stock: The carrying value of Federal Home Loan Bank stock approximates fair value based on the redemption provisions of the Federal Home Loan Bank.

Loans: The fair value of loans is estimated by discounting future cash flows using current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Deposits: The fair value of noninterest-bearing demand deposits and savings, NOW and money market deposits is the amount payable as of the reporting date. The fair value of fixed-maturity certificates of deposit is estimated using rates currently offered for deposits with similar remaining maturities.

Short-term borrowings: Federal funds purchased and other short-term borrowings generally have an original term to maturity of 30 days or less and, therefore, their carrying amount is a reasonable estimate of fair value. The fair value of securities sold under agreements to repurchase is estimated by discounting future cash flows using current interest rates.

Other borrowings: The fair value of medium-term notes, subordinated debt and senior bank notes is determined using market quotes. The fair value of FHLB advances is determined using quoted prices for new FHLB advances with similar risk characteristics. The fair value of other debt is determined using comparable security market prices or dealer quotes.

Standby letters of credit: Fair values for standby letters of credit are based on fees currently charged to enter into similar agreements. The fair value for standby letters of credit was recorded in Accrued expenses and other liabilities on the consolidated balance sheet in accordance with FIN 45.

Off-balance sheet financial instruments: Fair values for off-balance sheet credit-related financial instruments are based on fees currently charged to enter into similar agreements. For further information regarding the notional amounts of these financial instruments, see Notes 17 and 18.

PART I. FINANCIAL INFORMATION

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion is an analysis of our results of operations for the three and six months ended June 30, 2009 and 2008, and financial condition as of June 30, 2009, compared to June 30, 2008, and December 31, 2008. This discussion and analysis should be read in conjunction with the consolidated financial statements and related notes. This discussion contains forward-looking statements concerning our business that are based on estimates and involves certain risks and uncertainties. Therefore, future results could differ significantly from our current expectations and the related forward-looking statements.

EXECUTIVE SUMMARY

During the quarter, we successfully completed the integration of the 65 branches acquired from Citizens Financial on March 20, 2009. The branches are located primarily in the Indianapolis area, with additional locations in the Indiana markets of Lafayette, Fort Wayne, Anderson, and Bloomington. On the date of acquisition, we assumed deposit liabilities valued at approximately \$427 million and acquired a portfolio of loans valued at approximately \$5.6 million. During the second quarter, we acquired additional loans from Citizens Financial valued at \$8.0 million and opened 4,580 new demand deposit accounts.

The goodwill and intangibles of \$19.9 million recorded in connection with the acquisition as well as the repurchase on March 31, 2009, of \$100 million in preferred stock sold to the U.S. Department of Treasury as part of the Capital Purchase Program, along with the subsequent repurchase of the warrant for \$1.2 million on May 11, 2009 impacted our capital ratios during the first and second quarters. Management is focused on building and maintaining strong capital levels to allow us to both absorb loan growth as it materializes and to take advantage of likely acquisition opportunities. As part of our capital strategy, management is working to reduce leverage on the balance sheet and took actions to reduce the investment portfolio late in the second quarter, and, in addition, moved a large portion of our lease portfolio to held-for-sale status. These actions could result in a lower margin and net income in the near term. Net income for the second quarter of 2009 is \$9.6 million, compared to \$6.6 million and \$19.5 million for the quarters ended December 31, 2008 and June 30, 2008, respectively. Results for the second quarter of 2009 were impacted negatively by a \$4.0 million charge related to a special assessment of FDIC insurance expense and

other-than-temporary impairment of \$7.9 million related to certain pooled-trust preferred securities. Partially offsetting these charges were securities gains of \$10.3 million resulting from calls and sales during the quarter. As of June 30, 2009, our security portfolio consisted of 1,157 securities, 276 of which were in an unrealized loss position. The majority of unrealized losses are related to our non-agency mortgage-backed and pooled trust preferred securities. Management will continue to monitor these securities closely.

Table of Contents

Net interest margin in the second quarter of 2009 was 3.59% compared to 3.63% during the first quarter of 2009, and 3.85% year-over-year. The decrease from the first quarter is primarily the result of higher average deposit balances, reducing our need for other borrowings which are currently at a more favorable rate. Also contributing to the lower margin is a decrease in average loans outstanding and an increase in lower yielding securities.

Although we believe our conservative stance toward underwriting policies and real estate lending has positioned us well, the credit markets continue to be a challenge in 2009. We recorded provision expense of \$12.0 million during the second quarter. Non-accrual loan levels remained relatively constant compared to the prior quarter while criticized and classified loans increased slightly. As a percent of total loans, the allowance was 1.69% at June 30, 2009, compared to 1.41% and 1.31% at December 31, 2008 and June 30, 2008, respectively. Annualized net charge-offs were 1.18% of average loans in the second quarter of 2009 compared to 1.14% in the fourth quarter of 2008, and 1.35% year-over-year. Nonperforming loans totaled 1.71% of total loans at June 30, 2009, compared to 1.34% at December 31, 2008 and 1.43% a year ago.

RESULTS OF OPERATIONS

The following table sets forth certain income statement information of Old National for the three and six months ended June 30, 2009 and 2008:

(dollars in thousands)	Three Months Ended			Six Months Ended		
	June 30,		%	June 30,		%
	2009	2008	Change	2009	2008	Change
Income Statement						
Summary:						
Net interest income	\$ 60,767	\$ 61,344	(0.9)%	\$ 119,965	\$ 121,134	(1.0)%
Provision for loan losses	11,968	5,700	110.0	29,268	27,605	6.0
Noninterest income	45,606	43,513	4.8	87,841	90,389	(2.8)
Noninterest expense	86,751	74,834	15.9	164,215	145,770	12.7
Other Data:						
Return on average common equity	6.02%	11.58%		4.73%	11.54%	
Efficiency ratio	77.50	68.37		74.91	66.10	
Tier 1 leverage ratio	7.10	8.22		7.10	8.22	
Net charge-offs to average loans	1.18	1.35		1.13	0.94	

Net Interest Income

Net interest income is our most significant component of earnings, comprising over 57% of revenues at June 30, 2009. Net interest income and margin are influenced by many factors, primarily the volume and mix of earning assets, funding sources and interest rate fluctuations. Other factors include prepayment risk on mortgage and investment-related assets and the composition and maturity of earning assets and interest-bearing liabilities. Loans typically generate more interest income than investment securities with similar maturities. In the current market wholesale funding sources cost less than client deposits; however, funding from client deposits generally cost less than wholesale funding sources. Factors such as general economic activity, Federal Reserve Board monetary policy and price volatility of competing alternative investments, can also exert significant influence on our ability to optimize our mix of assets and funding and our net interest income and margin.

Table of Contents

Net interest income and net interest margin in the following discussion are presented on a fully taxable equivalent basis, which adjusts tax-exempt or nontaxable interest income to an amount that would be comparable to interest subject to income taxes using the federal statutory tax rate of 35% in effect for all periods. Net income is unaffected by these taxable equivalent adjustments as the offsetting increase of the same amount is made to income tax expense. Net interest income includes taxable equivalent adjustments of \$5.6 million and \$4.6 million for the three months ended June 30, 2009 and 2008, respectively. Taxable equivalent adjustments for the six months ended June 30, 2009 and 2008 were \$11.4 million and \$9.0 million, respectively.

Taxable equivalent net interest income was \$66.3 million and \$131.4 million for the three and six months ended June 30, 2009, up from the \$65.9 million and \$130.1 million reported for the three and six months ended June 30, 2008. The net interest margin was 3.59% and 3.61% for the three and six months ended June 30, 2009, compared to 3.85% and 3.76% for the three and six months ended June 30, 2008. The increase in net interest income is primarily due to the increase in interest earning assets being greater than the increase in interest-bearing liabilities. The decrease in net interest margin is primarily due to a change in the mix of interest earning assets and interest-bearing liabilities. The yield on average earning assets decreased 84 basis points from 5.97% to 5.13% while the cost of interest-bearing liabilities decreased 65 basis points from 2.46% to 1.81% in the quarterly year-over-year comparison. In the year-to-date comparison, the yield on average assets decreased 91 basis points from 6.11% to 5.20% while the cost of interest-bearing liabilities decreased 85 basis points from 2.72% to 1.87%.

Average earning assets were \$7.396 billion for the three months ended June 30, 2009, compared to \$6.856 billion for the three months ended June 30, 2008, an increase of 7.9%, or \$540.4 million. Average earning assets were \$7.287 billion for the six months ended June 30, 2009, compared to \$6.915 billion for the six months ended June 30, 2008, an increase of 5.4%, or \$371.9 million. Significantly affecting average earning assets at June 30, 2009 compared to June 30, 2008, was the increase in the size of the investment portfolio combined with the reduction of the size of the loan portfolio. During the six months ended June 30, 2009, \$1.146 billion of investment securities were purchased and \$627.4 million of investment securities were called by the issuers or sold. In addition, commercial and commercial real estate loans have been affected by continued weak loan demand in our markets, more stringent loan underwriting standards and our desire to lower future potential credit risk by being cautious towards the real estate market. Year over year, the investment portfolio, which generally has an average yield lower than the loan portfolio, has increased as a percent of interest earning assets.

Also affecting margin was an increase in noninterest-bearing demand deposits and time deposits. Included in deposits at June 30, 2009 are \$84.2 million of noninterest-bearing deposits and \$136.1 million of time deposits from the Citizens Financial branch acquisition. In the last half of 2008, \$19.3 million of high cost brokered certificates of deposit were called or matured and \$5.5 million of retail certificates of deposit were called. In addition, \$51 million of FHLB advances matured in the last half of 2008 and a revolving credit facility with \$55 million outstanding was paid off in the fourth quarter of 2008. During the first half of 2009, \$81.0 million of high cost brokered certificates of deposit were called and \$56.6 million of retail certificates of deposit were called. In addition, \$25.0 million of FHLB advances were prepaid in the first half of 2009. Year over year, brokered certificates of deposit, which have an average interest rate higher than other types of deposits, have decreased as a percent of interest-bearing liabilities. Year over year, noninterest-bearing demand deposits have increased as a percent of total funding.

Provision for Loan Losses

The provision for loan losses was \$12.0 million for the three months ended June 30, 2009, compared to \$5.7 million for the three months ended June 30, 2008. The provision for loan losses was \$29.3 million for the six months ended June 30, 2009, compared to \$27.6 million for the six months ended June 30, 2008. The higher provision in 2009 is attributable to an increase in net charge-offs combined with an increase in nonaccrual loans. Included in the 2008 provision is \$18.5 million associated with the misconduct of a former loan officer in the Indianapolis market and subsequent deterioration of these credits. See the discussion in Allowance for Loan Losses and Reserve for Unfunded Commitments in the Risk Management section of Management's Discussion and Analysis of Financial Condition and Results of Operations for additional information.

Noninterest Income

We generate revenues in the form of noninterest income through client fees and sales commissions from our core banking franchise and other related businesses, such as wealth management, investment consulting, investment products and insurance. Noninterest income for the three months ended June 30, 2009, was \$45.6 million, an increase of \$2.1 million, or 4.8%, from the \$43.5 million reported for the three months ended June 30, 2008. For the six months ended June 30, 2009, noninterest income was \$87.8 million, a decrease of \$2.5 million, or 2.8%, from the \$90.4 million reported for the six months ended June 30, 2008.

Table of Contents

Net securities gains were \$2.4 million and \$5.6 million for the three and six months ended June 30, 2009, compared to net securities gains of \$2.1 million and \$6.6 million for the three and six months ended June 30, 2008. Included in the second quarter and first six months of 2009 is \$7.9 million and \$10.3 million, respectively, in charges for other-than-temporary-impairment on six pooled trust preferred securities. The 2008 net securities gains were primarily the result of securities which were called by the issuers.

Wealth management fees were \$4.3 million and \$8.1 million for the three and six months ended June 30, 2009 as compared to \$4.9 million and \$9.5 million for the three and six months ended June 30, 2008. Trust fee income has declined as a result of lower market values of managed assets.

Service charges on deposit accounts were \$15.7 million and \$26.4 million for the three and six months ended June 30, 2009, compared to \$11.3 million and \$21.5 million for the three and six months ended June 30, 2008. The increase in revenue is primarily attributable to the acquisition of the retail branch banking network of Citizens Financial Group in March 2009.

ATM fees were \$5.4 million and \$9.6 million for the three and six months ended June 30, 2009, compared to \$4.5 million and \$8.5 million for the three and six months ended June 30, 2008. The increase in debit card usage is primarily attributable to the Citizens Financial branch acquisition.

Revenue from company-owned life insurance was \$0.4 million and \$1.1 million for the three and six months ended June 30, 2009, compared to \$2.8 million and \$5.5 million for the three and six months ended June 30, 2008. During the third quarter of 2008, the crediting rate formula for the 1997 company-owned life insurance policy was amended to adopt a more conservative position and improve the overall market to book value ratio. This change resulted in lower revenues in the first six months of 2009 and we anticipate lower revenue levels to continue in future periods. Fluctuations in the value of our derivatives resulted in gains on derivatives of \$0.5 million and \$1.0 million for the three and six months ended June 30, 2009 as compared to losses on derivatives of \$0.4 million and \$1.0 million for the three and six months ended June 30, 2008.

Other income decreased \$1.2 million and \$2.7 million for the three and six months ended June 30, 2009 as compared to the three and six months ended June 30, 2008. The decrease in the quarterly comparison was primarily as a result of a decrease in customer derivative fee revenue combined with a decrease in the gain on fair value adjustments related to certain retail certificates of deposit accounted for under SFAS No. 159. The decrease in the six month comparison was primarily as a result of a \$1.5 million gain associated with the redemption of class B VISA shares recorded during the first quarter of 2008 combined with a decrease in customer derivative fee revenue and a decrease in the gain on fair value adjustments related to certain retail certificates of deposit accounted for under SFAS No. 159.

Noninterest Expense

Noninterest expense for the three months ended June 30, 2009, totaled \$86.8 million, an increase of \$11.9 million, or 15.9%, from the \$74.8 million recorded for the three months ended June 30, 2008. For the six months ended June 30, 2009, noninterest expense was \$164.2 million, an increase of \$18.4 million, or 12.7%, from the \$145.8 million recorded for the six months ended June 30, 2008. The increased expenses in 2009 relate primarily to costs associated with the 65 Citizens Financial branches acquired during March 2009, as well as a \$4.0 million special assessment of FDIC insurance expense.

Salaries and benefits is the largest component of noninterest expense. For the three months ended June 30, 2009, salaries and benefits were \$45.2 million compared to \$43.2 million for the three months ended June 30, 2008. For the six months ended June 30, 2009, salaries and benefits were \$87.9 million compared to \$85.5 million for the six months ended June 30, 2008. Included in the second quarter of 2009 is approximately \$3.6 million of personnel expense associated with the acquisition of the Indiana retail branch banking network of Citizens Financial Group and \$0.6 million for higher medical insurance expenses. Partially offsetting these increases was a \$2.0 million reversal of performance-based incentive compensation expense. Included in the first six months of 2009 is approximately \$5.2 million of personnel expense associated with the acquisition of the Indiana retail branch banking network of Citizens Financial Group and \$1.1 million for higher medical insurance expense. Partially offsetting these increases was a \$3.3 million reversal of performance-based incentive compensation expense.

Table of Contents

Occupancy expense increased \$2.5 million and \$3.4 million for the three and six months ended June 30, 2009, compared to the three and six months ended June 30, 2008, primarily as a result of increases in rent expense and the amortization of leasehold improvements. Utilities expense and real estate taxes also increased for the three and six months ended June 30, 2009 as compared to the three and six months ended June 30, 2008. The increase in rent expense is related to the sale leaseback transactions discussed in Note 17 to the consolidated financial statements and the additional 65 branches acquired from Citizens Financial in the first quarter of 2009. The increase in amortization expense is also related to the acquisition of the branches from Citizens Financial.

Professional fees increased \$1.2 million for the six months ended June 30, 2009 as compared to the six months ended June 30, 2008. The increase is primarily attributable to legal and other professional fees associated with the acquisition of the Citizens Financial branch network.

FDIC assessment expense was \$6.3 million for the three months ended June 30, 2009, compared to \$0.3 million for the three months ended June 30, 2008. For the six months ended June 30, 2009, FDIC assessment expense was \$8.4 million compared to \$0.6 million for the six months ended June 30, 2008. The increase is primarily due to the increase in the rates banks pay for deposit insurance and the expiration of our one-time assessment credit at the end of 2008. The FDIC implemented a special assessment during the second quarter of 2009 which resulted in approximately \$4.0 of additional expense during the quarter. It is possible that the FDIC will impose another special assessment later in the year as part of its restoration plan.

The increase in the expense for amortization of intangibles for both the quarterly and year-to-date comparisons is primarily due to the core deposit intangible associated with the acquisition of the retail branch banking network of Citizens Financial Group and subsequent amortization of this asset.

Other expense for the three months ended June 30, 2009, totaled \$3.6 million, a decrease of \$0.7 million compared to the three months ended June 30, 2008. Other expense for the six months ended June 30, 2009, totaled \$8.1 million, an increase of \$1.4 million compared to the six months ended June 30, 2008. During the second quarter of 2008, we recorded \$0.7 million for impairment of intangibles due to the loss of a significant insurance client at one of its insurance subsidiaries. The insurance subsidiary is included in the Other column for segment reporting. There is no corresponding expense in 2009. The provision for unfunded commitments increased \$1.0 million for the six months ended June 30, 2009 as compared to the six months ended June 30, 2008. Included in the six months ended June 30, 2009 is approximately \$1.0 million of conversion expenses related to the acquisition of the retail branch banking network of Citizens Financial Group.

Provision for Income Taxes

We record a provision for income taxes currently payable and for income taxes payable or benefits to be received in the future, which arise due to timing differences in the recognition of certain items for financial statement and income tax purposes. The major difference between the effective tax rate applied to our financial statement income and the federal statutory tax rate is caused by interest on tax-exempt securities and loans. The provision for income taxes, as a percentage of pre-tax income, was a benefit of 25.9% for the three months ended June 30, 2009, compared to expense of 19.9% for the three months ended June 30, 2008. The provision for income taxes, as a percentage of pre-tax income, was a benefit of 32.9% for the six months ended June 30, 2009, compared to a benefit of 1.7% for the six months ended June 30, 2008. The decrease in the effective tax rate for the three and six months ended June 30, 2009, is the result of tax-exempt income being a higher percentage of pre-tax income in 2009 than in the prior year. See Note 15 to the consolidated financial statements for additional information.

Table of Contents**FINANCIAL CONDITION****Overview**

At June 30, 2009, our assets were \$8.012 billion, a 5.4% increase compared to June 30, 2008 assets of \$7.602 billion, and an annualized increase of 3.5% compared to December 31, 2008 assets of \$7.874 billion. On March 20, 2009, Old National completed its acquisition of the Indiana retail branch banking network of Citizens Financial Group, which increased assets by approximately \$424.7 million and deposits by \$424.5 million.

Earning Assets

Our earning assets are comprised of investment securities, loans and loans and leases held for sale, and money market investments. Earning assets were \$7.209 billion at June 30, 2009, an increase of 6.3% from June 30, 2008, and an annualized increase of 3.8% since December 31, 2008.

Investment Securities

We classify the majority of our investment securities as available-for-sale to give management the flexibility to sell the securities prior to maturity if needed, based on fluctuating interest rates or changes in our funding requirements.

However, we do have \$79.2 million of 15- and 20-year fixed-rate mortgage pass-through securities in our held-to-maturity investment portfolio and during the second quarter of 2009 approximately \$230.1 million of U.S. government-sponsored entity and agency securities were added to our held-to-maturity investment portfolio.

At June 30, 2009, the total investment securities portfolio was \$2.600 billion compared to \$2.027 billion at June 30, 2008, an increase of \$572.3 million or 28.2%. Investment securities increased \$333.9 million compared to December 31, 2008, an annualized increase of 29.5%. Investment securities represented 36.1% of earning assets at June 30, 2009, compared to 29.9% at June 30, 2008, and 32.0% at December 31, 2008. Funds received in the Citizens Financial branch acquisition have been invested primarily in investment securities. There were \$99.0 million of unplanned calls of securities during the second quarter. Stronger commercial loan demand in the future and management's efforts to deleverage the balance sheet could also result in a reduction in the securities portfolio. As of June 30, 2009, management does not intend to sell any securities with an unrealized loss position.

The investment securities available-for-sale portfolio had net unrealized losses of \$59.7 million at June 30, 2009, an increase of \$8.7 million compared to net unrealized losses of \$51.0 million at June 30, 2008, and a decrease of \$4.9 million compared to net unrealized losses of \$64.6 million at December 31, 2008. A \$10.3 million charge was recorded during the first six months of 2009 related to other-than-temporary-impairment on six pooled trust preferred securities. Contributing to the volatility in net unrealized losses over the past twelve months are changes in interest rates and the financial crisis affecting the banking system and financial markets.

The investment portfolio had an average duration of 5.35 years at June 30, 2009, compared to 4.50 years at June 30, 2008, and 3.87 years at December 31, 2008. The annualized average yields on investment securities, on a taxable equivalent basis, were 5.19% for the three months ended June 30, 2009, compared to 5.30% for the three months ended June 30, 2008, and 5.62% for the three months ended December 31, 2008. Average yields on investment securities, on a taxable equivalent basis, were 5.31%, 5.18% and 5.34% for the six months ended June 30, 2009 and 2008, and for the year ended December 31, 2008, respectively.

Residential Loans Held for Sale

Residential loans held for sale were \$25.2 million at June 30, 2009, compared to \$16.6 million at June 30, 2008, and \$17.2 million at December 31, 2008. Residential loans held for sale are loans that are closed, but not yet purchased by investors. The amount of residential loans held for sale on the balance sheet varies depending on the amount of originations and timing of loan sales to the secondary market. The increase in residential loans held for sale from June 30, 2008, is primarily attributable to increased activity in residential lending in late 2008 and the first half of 2009.

We elected the fair value option under SFAS No. 159 prospectively for residential loans held for sale. The election was effective for loans originated after January 1, 2008. The aggregate fair value exceeded the unpaid principal balances by \$0.2 million, \$0.6 million and \$0.3 million as of June 30, 2009, December 31, 2008 and June 30, 2008, respectively.

Table of Contents*Finance Leases Held for Sale*

At June 30, 2009, Old National had finance leases held for sale of \$370.2 million. These leases were transferred from the commercial loan category at cost utilizing the lower of cost or fair value method. The portfolio of leases had maturities ranging from 1 to 19 years and interest rates ranging from 2.57% to 13.21%. All of the leases are current. The majority of the leases held for sale are to municipalities, with various types of equipment securing the leases.

Commercial and Commercial Real Estate Loans

Commercial and commercial real estate loans are the second largest classification within earning assets, representing 35.3% of earning assets at June 30, 2009, a decrease from 44.6% at June 30, 2008, and a decrease from 43.2% at December 31, 2008. At June 30, 2009, commercial and commercial real estate loans were \$2.547 billion, a decrease of \$475.6 million since June 30, 2008, and a decrease of \$505.9 million since December 31, 2008. The majority of the decrease relates to the finance leases which were transferred to held for sale. In addition, weak loan demand in our markets continues to affect loan growth. Our conservative underwriting standards have also contributed to slower loan growth. We continue to be cautious towards the real estate market in an effort to lower credit risk.

Consumer Loans

At June 30, 2009, consumer loans, including automobile loans, personal and home equity loans and lines of credit, and student loans, decreased \$32.4 million or 2.7% compared to June 30, 2008, and decreased \$55.2 million or, annualized, 9.1% since December 31, 2008.

Residential Real Estate Loans

Residential real estate loans, primarily 1-4 family properties, have decreased in significance to the loan portfolio over the past five years due to higher levels of loan sales into the secondary market, primarily to private investors. We sell the majority of residential real estate loans originated as a strategy to better manage interest rate risk and liquidity. We sell almost all residential real estate loans servicing released without recourse.

At June 30, 2009, residential real estate loans were \$448.4 million, a decrease of \$67.6 million, or 13.1%, from June 30, 2008.

Goodwill and Other Intangible Assets

Goodwill and other intangible assets at June 30, 2009, totaled \$204.0 million, an increase of \$15.3 million compared to \$188.7 million at June 30, 2008, and an increase of \$17.2 million compared to \$186.8 million at December 31, 2008. We recorded \$19.9 million of goodwill and other intangible assets associated with the acquisition of the Indiana retail branch banking network of Citizens Financial Group, which is included in the Community Banking column for segment reporting. During the second quarter of 2008, Old National recorded \$0.7 million for impairment of intangibles due to the loss of a significant insurance client at one of its insurance subsidiaries. The insurance subsidiary is included in the Other column for segment reporting. The remaining decreases were the result of standard amortization expense related to the other intangible assets.

Real Estate Assets Held for Sale

Real estate assets held for sale were \$1.6 million at June 30, 2009, a decrease of \$1.4 million compared to \$3.0 million at June 30, 2008. The decline is the result of the sale leaseback transactions during 2008 and the second quarter of 2009. Included in real estate assets held for sale at June 30, 2009 are three financial centers that are actively being marketed. We plan to continue occupying these properties under long-term lease agreements after sale.

Other assets have increased \$32.0 million, or 20.4%, since June 30, 2008, primarily as a result of an increase in deferred tax assets and fluctuations in the fair value of derivative financial instruments. Based on current forecasts, we believe our deferred tax assets are fully realizable and we will be able to apply net operating losses to future periods.

Table of Contents**Funding**

Total funding, comprised of deposits and wholesale borrowings, was \$7.151 billion at June 30, 2009, an increase of 6.2% from \$6.731 billion at June 30, 2008, and an annualized increase of 7.1% from \$6.907 billion at December 31, 2008. Included in total funding were deposits of \$5.799 billion at June 30, 2009, an increase of \$426.1 million, or 7.9%, compared to June 30, 2008, and an increase of \$376.2 million compared to December 31, 2008. Included in total deposits at June 30, 2009 is \$356.2 million from the acquisition of the Indiana retail branch banking network of Citizens Financial Group. In the last half of 2008, we called \$5.5 million of retail certificates of deposit; and \$19.3 million of high cost brokered certificates of deposit were called or matured. During the first half of 2009, \$81.0 million of high cost brokered certificates of deposit were called and \$56.6 million of retail certificates of deposit were called. Noninterest-bearing deposits increased 21.8% or \$187.0 million compared to June 30, 2008. Time deposits increased 14.8% or \$267.4 million compared to June 30, 2008. Year over year, we have experienced an increase in noninterest-bearing demand deposits that has favorably impacted the cost of funds.

Effective January 1, 2008, we elected the fair value option under SFAS No. 159 prospectively for certain retail certificates of deposit. The carrying value of these retail certificates of deposit was \$0, \$49.3 million and \$49.7 million as of June 30, 2009, December 31, 2008 and June 30, 2008, respectively. The carrying values at December 31, 2008 and June 30, 2008 were comprised of contractual balances of \$48.5 million and \$49.7 million and fair value adjustments of \$0.8 million and \$37 thousand, respectively.

We use wholesale funding to augment deposit funding and to help maintain our desired interest rate risk position. At June 30, 2009, wholesale borrowings, including short-term borrowings and other borrowings, decreased \$6.0 million, or 0.4%, from June 30, 2008 and decreased \$131.8 million, or 17.8%, annualized, from December 31, 2008, respectively. Wholesale funding as a percentage of total funding was 18.9% at June 30, 2009, compared to 20.2% at June 30, 2008, and 21.5% at December 31, 2008. Short-term borrowings have decreased \$32.9 million since June 30, 2008 while long-term borrowings have increased \$26.9 million since June 30, 2008. We purchased \$80.0 million of low-cost FHLB advances during the last half of 2008. In addition, \$51.0 million of FHLB advances matured in the last half of 2008 and a revolving credit facility with \$55.0 million outstanding was paid off in the fourth quarter of 2008. During the first half of 2009, \$25.0 million of FHLB advances were prepaid.

Capital

Shareholders' equity totaled \$634.6 million at June 30, 2009, compared to \$649.0 million at June 30, 2008, and \$730.9 million at December 31, 2008. The December 31, 2008 balance included \$100 million of non-voting preferred shares and common stock warrants issued to the Treasury Department as part of the Capital Purchase Program for healthy financial institutions. On March 31, 2009, we accelerated the accretion of the \$2.6 million discount and repurchased all of the \$100 million of non-voting preferred shares from the Treasury Department.

As part of the TARP CPP, we entered into a Letter Agreement and Securities Purchase Agreement with the Treasury Department on December 12, 2008, pursuant to which Old National sold (i) 100,000 shares of Old National's Fixed Rate Cumulative Perpetual Preferred Stock, Series T (the "Series T Preferred Stock") and (ii) warrants (the "Warrants") to purchase up to 813,008 shares of Old National's common stock at an initial per share exercise price of \$18.45.

The Series T Preferred Stock qualified as Tier 1 capital and the Treasury Department was entitled to cumulative dividends at a rate of 5% per year for the first five years, and 9% per year thereafter. The Preferred Stock had priority in the payment of dividends over any cash dividends paid to common stockholders. The adoption of ARRA permitted Old National to redeem the Series T Preferred Stock without penalty and without the need to raise new capital, subject to the Treasury's consultation with Old National's regulatory agency. The Warrants had a 10-year term and were immediately exercisable upon issuance. The common stock warrants were repurchased on May 11, 2009, for \$1.2 million.

During the fourth quarter of 2007, we declared a cash dividend of \$0.23 per share to be paid in the first quarter of 2008, which was included in the fourth quarter 2007 financial results. We paid a cash dividend of \$0.23 per share for the second quarter of 2008, which reduced equity by \$15.3 million. We declared cash dividends of \$0.23 and \$0.07 per share during the first and second quarters of 2009, respectively, which reduced equity by \$19.9 million. We also accrued dividends on the preferred shares for the three months ended March 31, 2009, which reduced equity by \$1.2 million. We repurchased shares of our stock, reducing shareholders' equity by \$0.4 million during the six months

ended June 30, 2009, and \$0.3 million during the six months ended June 30, 2008. The repurchases related to our employee stock based compensation plans. The change in unrealized losses on investment securities increased equity by \$4.3 million during the six months ended June 30, 2009, and decreased equity by \$26.7 million during the six months ended June 30, 2008. Shares issued for stock options, restricted stock and stock compensation plans increased shareholders' equity by \$2.5 million during the six months ended June 30, 2009, compared to \$2.0 million during the six months ended June 30, 2008.

Table of Contents**Capital Adequacy**

Old National and the banking industry are subject to various regulatory capital requirements administered by the federal banking agencies. At June 30, 2009, Old National and its bank subsidiary exceeded the regulatory minimums and Old National Bank met the regulatory definition of well-capitalized based on the most recent regulatory definition. To be categorized as well-capitalized, the bank subsidiary must maintain at least a total risk-based capital ratio of 10.0%, a Tier 1 risk-based capital ratio of 6.0% and a Tier 1 leverage ratio of 5.0%. Regulatory capital ratios have decreased from December 31, 2008 levels primarily due to the repurchase of \$100 million of preferred shares from the Treasury Department on March 31, 2009.

As of June 30, 2009, Old National's consolidated capital position remains strong as evidenced by the following comparisons of key industry ratios.

	Regulatory			December
	Guidelines	June 30,		31,
	Minimum	2009	2008	2008
Risk-based capital:				
Tier 1 capital to total avg assets (leverage ratio)	4.00%	7.10%	8.22%	9.50%
Tier 1 capital to risk-adjusted total assets	4.00	10.25	11.23	12.73
Total capital to risk-adjusted total assets	8.00	12.59	14.10	15.06
Shareholders' equity to assets	N/A	7.92	8.54	9.28

RISK MANAGEMENT**Overview**

Management, with the oversight of the Board of Directors, has in place company-wide structures, processes, and controls for managing and mitigating risk. The following discussion addresses the three major risks that we face: credit, market, and liquidity.

Credit Risk

Credit risk represents the risk of loss arising from an obligor's inability or failure to meet contractual payment or performance terms. Our primary credit risks result from our investment and lending activities.

Investment Activities

Within our securities portfolio, the non-agency collateralized mortgage obligations represent the greatest exposure to the current instability in the residential real estate and credit markets. At June 30, 2009, we had non-agency collateralized mortgage obligations of \$189.8 million or approximately 8.4% of the available-for-sale securities portfolio. The net unrealized loss on these securities at June 30, 2009, was approximately \$56.8 million.

We expect conditions in the overall residential real estate and credit markets to remain uncertain for the foreseeable future. Deterioration in the performance of the underlying loan collateral could result in deterioration in the performance of our asset-backed securities. Four of these securities were downgraded during the quarter and as of June 30, 2009 eight of these securities were rated below investment grade. Additional credit deterioration in future periods could result in other-than-temporary-impairment in certain of these securities.

We also carry a higher exposure to loss in our pooled trust preferred securities, which are collateralized debt obligations, due to illiquidity in that market and performance of underlying collateral. At June 30, 2009, we had pooled trust preferred securities with a fair value of approximately \$16.4 million, or 0.7% of the available-for-sale securities portfolio. During the first six months of 2009, we determined that six of these securities had other-than-temporary-impairment as a result of additional defaults or deferrals during the period. A \$10.3 million charge related to the credit loss was realized in earnings during the first six months of 2009. These securities remained classified as available-for-sale and at June 30, 2009, the unrealized loss on our pooled trust preferred securities was approximately \$22.2 million.

Table of Contents

The majority of the remaining mortgage-backed securities are backed by U.S. government-sponsored or federal agencies. Municipal bonds, corporate bonds and other debt securities are evaluated by reviewing the credit-worthiness of the issuer and general market conditions. We do not have the intent to sell these securities and it is likely that we will not be required to sell these securities before their anticipated recovery.

Counterparty Exposure

Counterparty exposure is the risk that the other party in a financial transaction will not fulfill its obligation in a financial transaction. We define counterparty exposure as nonperformance risk in transactions involving federal funds sold and purchased, repurchase agreements, correspondent bank relationships, and derivative contracts with companies in the financial services industry. Old National's net counterparty exposure was an asset of \$227.5 million at June 30, 2009.

Lending Activities

Community-based lending personnel, along with region-based independent underwriting and analytic support staff, extend credit under guidelines established and administered by our Risk and Credit Policy Committee. This committee, which meets quarterly, is made up of outside directors. The committee monitors credit quality through its review of information such as delinquencies, credit exposures, peer comparisons, problem loans and charge-offs. In addition, the committee reviews and approves recommended loan policy changes to assure it remains appropriate for the current lending environment.

We lend primarily to small- and medium-sized commercial and commercial real estate clients in various industries including manufacturing, agribusiness, transportation, mining, wholesaling and retailing. At June 30, 2009, we had no concentration of loans in any single industry exceeding 10% of its portfolio and had no exposure to foreign borrowers or lesser-developed countries. Our policy is to concentrate our lending activity in the geographic market areas we serve, primarily Indiana, Illinois and Kentucky. We continue to be affected by weakness in the economy of our principal markets. Management expects that trends in under-performing, criticized and classified loans will be influenced by the degree to which the economy strengthens or weakens.

Table of Contents

Summary of under-performing, criticized and classified assets:

(dollars in thousands)	June 30,		December
	2009	2008	31, 2008
Nonaccrual loans			
Commercial and commercial real estate	\$ 62,730	\$ 57,307	\$ 52,394
Residential real estate	7,424	4,976	5,474
Consumer	7,581	5,769	6,173
Total nonaccrual loans	77,735	68,052	64,041
Past due loans (90 days or more and still accruing)			
Commercial and commercial real estate	1,126	611	991
Residential real estate	134		
Consumer	1,063	970	1,917
Total past due loans	2,323	1,581	2,908
Foreclosed properties	4,768	3,309	2,934
Total under-performing assets	\$ 84,826	\$ 72,942	\$ 69,883
Classified loans (includes nonaccrual, renegotiated, past due 90 days and other problem loans)	\$ 191,324	\$ 149,751	\$ 180,118
Other classified assets (3)	145,299		34,543
Criticized loans	101,019	97,542	124,855
Total criticized and classified assets	\$ 437,642	\$ 247,293	\$ 339,516
Asset Quality Ratios:			
Non-performing loans/total loans (1) (2)	1.71%	1.43%	1.34%
Under-performing assets/total loans and foreclosed properties (1)	1.86	1.54	1.46
Under-performing assets/total assets	1.06	0.96	0.89
Allowance for loan losses/under-performing assets	82.64	85.12	96.00

(1) Loans include residential loans held for sale and leases held for sale.

(2) Non-performing loans include nonaccrual and renegotiated loans.

(3) Includes 8 pooled trust preferred

securities, 8
non-agency
mortgage-backed
securities and 2
corporate
securities at
June 30, 2009.

Loan charge-offs, net of recoveries, totaled \$13.6 million for the three months ended June 30, 2009, a decrease of \$2.3 million from the three months ended June 30, 2008. Net charge-offs for the six months ended June 30, 2009 totaled \$26.3 million compared to \$22.0 million for the six months ended June 30, 2008. Included in the first six months of 2009 and 2008 are \$1.2 million and \$13.9 million, respectively, of charge-offs associated with the misconduct of a former loan officer in the Indianapolis market. Included in the three and six months ended June 30, 2009 is \$0.6 million of charge-offs associated with commercial and commercial real estate loans which were transferred to held for sale and sold during the second quarter. Annualized, net charge-offs to average loans were 1.18% and 1.13% for the three and six months ended June 30, 2009, as compared to 1.35% and 0.94% for the three and six months ended June 30, 2008.

Under-performing assets totaled \$84.8 million at June 30, 2009, an increase of \$11.9 million compared to \$72.9 million at June 30, 2008, and an increase of \$14.9 million compared to \$69.9 million at December 31, 2008. As a percent of total loans and foreclosed properties, under-performing assets at June 30, 2009, were 1.86%, an increase from the June 30, 2008 ratio of 1.54% and an increase from the December 31, 2008 ratio of 1.46%. Nonaccrual loans were \$77.7 million at June 30, 2009, compared to \$68.1 million at June 30, 2008, and \$64.0 million at December 31, 2008.

From time to time, Old National may agree to modify the contractual terms of a borrower's loan. In cases where such modifications represent a concession to a borrower experiencing financial difficulty, the modification is considered a troubled debt restructuring. Loans modified in a troubled debt restructuring are placed on nonaccrual status until the Company determines the future collection of principal and interest is reasonably assured, which generally requires that the borrower demonstrate a period of performance according to the restructured terms of six months. At June 30, 2009, loans modified in a troubled debt restructuring, which are included in nonaccrual loans, totaled \$0.6 million.

Table of Contents

Management will continue its efforts to reduce the level of under-performing loans and will consider the possibility of sales of troubled and non-performing loans, which could result in additional charge-offs to the allowance for loan losses.

Total classified and criticized assets were \$437.6 million at June 30, 2009, an increase of \$190.3 million from June 30, 2008, and an increase of \$98.1 million from December 31, 2008. Other classified assets include \$145.3 million and \$34.5 million of investment securities that fell below investment grade rating at June 30, 2009 and December 31, 2008, respectively.

Allowance for Loan Losses and Reserve for Unfunded Commitments

To provide for the risk of loss inherent in extending credit, we maintain an allowance for loan losses. The determination of the allowance is based upon the size and current risk characteristics of the loan portfolio and includes an assessment of individual problem loans, actual loss experience, current economic events and regulatory guidance. At June 30, 2009, the allowance for loan losses was \$70.1 million, an increase of \$8.0 million compared to \$62.1 million at June 30, 2008, and an increase of \$3.0 million compared to \$67.1 million at December 31, 2008. As a percentage of total loans excluding loans and leases held for sale, the allowance was 1.69% at June 30, 2009, compared to 1.31% at June 30, 2008, and 1.41% at December 31, 2008. The provision for loan losses for the three months ended June 30, 2009, amounted to \$12.0 million compared to \$5.7 million for the three months ended June 30, 2008. The provision for the six months ended June 30, 2009, amounted to \$29.3 million compared to \$27.6 million for the six months ended June 30, 2008. The increase in the provision year over year is primarily attributable to an increase in net charge-offs combined with an increase in nonaccrual loans.

We maintain an allowance for losses on unfunded commercial lending commitments and letters of credit to provide for the risk of loss inherent in these arrangements. The allowance is computed using a methodology similar to that used to determine the allowance for loan losses, modified to take into account the probability of a drawdown on the commitment. In accordance with generally accepted accounting principles, the \$4.1 million reserve for unfunded loan commitments is classified as a liability account on the balance sheet. The reserve for unfunded loan commitments was \$3.5 million at December 31, 2008.

Market Risk

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, currency exchange rates, and other relevant market rates or prices. Interest rate risk is our primary market risk and results from timing differences in the re-pricing of assets and liabilities, changes in the slope of the yield curve, and the potential exercise of explicit or embedded options.

We manage interest rate risk within an overall asset and liability management framework that includes attention to credit risk, liquidity risk and capitalization. A principal objective of asset/liability management is to manage the sensitivity of net interest income to changing interest rates. Asset and liability management activity is governed by a policy reviewed and approved annually by the Board of Directors. The Board of Directors has delegated the administration of this policy to the Funds Management Committee, a committee of the Board of Directors, and the Executive Balance Sheet Management Committee, a committee comprised of senior executive management. The Funds Management Committee meets quarterly and oversees adherence to policy and recommends policy changes to the Board. The Executive Balance Sheet Management committee meets at least quarterly. This committee determines balance sheet management strategies and initiatives for the Company. A group comprised of corporate and line management meets monthly to implement strategies and initiatives determined by the Executive Balance Sheet Management Committee.

We use two modeling techniques to quantify the impact of changing interest rates on the Company, Net Interest Income at Risk and Economic Value of Equity. Net Interest Income at Risk is used by management and the Board of Directors to evaluate the impact of changing rates over a two-year horizon. Economic Value of Equity is used to evaluate long-term interest rate risk. These models simulate the likely behavior of our net interest income and the likely change in our economic value due to changes in interest rates under various possible interest rate scenarios. Because the models are driven by expected behavior in various interest rate scenarios and many factors besides market interest rates affect our net interest income and value, we recognize that model outputs are not guarantees of actual results. For this reason, we model many different combinations of interest rates and balance sheet assumptions to

understand its overall sensitivity to market interest rate changes.

Table of Contents

Old National's Board of Directors, through its Funds Management Committee, monitors our interest rate risk. Policy guidelines, in addition to June 30, 2009 and 2008 results are as follows:

Net Interest Income 12 Month Policies**Interest Rate Change in Basis Points (bp)**

	Down 300	Down 200	Down 100	Up 100	Up 200	Up 300

Red zone policy limits represent our normal absolute interest rate risk exposure compliance limit. Policy limits defined as green zone represent the range of potential interest rate risk exposures that the Funds Management Committee believes to be normal and acceptable operating behavior. Yellow zone policy limits represent a range of interest rate risk exposures falling below the bank's maximum allowable exposure (red zone) but above its normally acceptable interest rate risk levels (green zone). Policy limits are applicable to negative changes in Net Interest Income at Risk and Economic Value of Equity.

Modeling for the Down 100 Basis Points, Down 200 Basis Points, and Down 300 Basis Points scenarios for both the Net Interest Income at Risk and Economic Value of Equity are not applicable in the current rate environment because

the scenarios floor at Zero before absorbing the full 100, 200, and 300 basis point drop, respectively.

At June 30, 2009, modeling indicated Old National's Net Interest Income at Risk values were positive for Up 100, Up 200 and Up 300 scenarios for both the 12-month and 24-month Net Interest Income at Risk.

Table of Contents

At June 30, 2009, modeling indicated that Old National was within the yellow zone policy limit for the Up 100 and Up 200 Economic Value of Equity scenarios. Management has agreed to monitor these scenarios closely. The Up 300 Economic Value of Equity Scenarios fell within the Old National's green zone policy limit, which is considered normal and acceptable for Economic Value of Equity scenarios.

In addition to policy-defined scenarios, Old National models other scenarios to measure interest rate risk. For example, the company models a yield curve based on current swap spreads and a 12-month forward curve. As of June 30, 2009, Old National's 12 month cumulative Net Interest Income at Risk for the scenario was 3.04%. In addition, Old National models a ramp scenario where rates are increased 25 basis points each quarter over a 12 month timeframe. As of June 30, 2009, Old National's 12 month cumulative Net Interest Income at Risk for this scenario was 0.64%.

We use derivatives, primarily interest rate swaps, as one method to manage interest rate risk in the ordinary course of business. Our derivatives had an estimated fair value gain of \$1.5 million at June 30, 2009, compared to an estimated fair value loss of \$0.6 million at December 31, 2008. In addition, the notional amount of derivatives increased by \$194.8 million from 2008. See Note 16 to the consolidated financial statements for further discussion of derivative financial instruments.

Liquidity Risk

Liquidity risk arises from the possibility that we may not be able to satisfy current or future financial commitments, or may become unduly reliant on alternative funding sources. The Funds Management Committee of the Board of Directors establishes liquidity risk guidelines and, along with the Balance Sheet Management Committee, monitors liquidity risk. The objective of liquidity management is to ensure we have the ability to fund balance sheet growth and meet deposit and debt obligations in a timely and cost-effective manner. Management monitors liquidity through a regular review of asset and liability maturities, funding sources, and loan and deposit forecasts. We maintain strategic and contingency liquidity plans to ensure sufficient available funding to satisfy requirements for balance sheet growth, properly manage capital markets' funding sources and to address unexpected liquidity requirements.

Loan repayments and maturing investment securities are a relatively predictable source of funds. However, deposit flows, calls of investment securities and prepayments of loans and mortgage-related securities are strongly influenced by interest rates, the housing market, general and local economic conditions, and competition in the marketplace. We continually monitor marketplace trends to identify patterns that might improve the predictability of the timing of deposit flows or asset prepayments.

Our ability to acquire funding at competitive prices is influenced by rating agencies' views of our credit quality, liquidity, capital and earnings. All of the rating agencies place us in an investment grade that indicates a low risk of default. Standard and Poor's and Dominion Bond Rating Services have each issued a stable outlook in conjunction with their ratings as of December 31, 2008. On October 13, 2008, Moody's Investor Service changed Old National Bancorp's outlook to negative. As of December 12, 2008, Fitch Rating Services changed their long-term outlook rating from negative to stable for both Old National Bancorp (the Parent Company) and Old National Bank (the Bank Subsidiary). The senior debt ratings of Old National Bancorp (the Parent Company) and Old National Bank (the Bank Subsidiary) at June 30, 2009, are shown in the following table.

SENIOR DEBT RATINGS

	Standard and Poor's		Moody's Investor Service		Fitch, Inc.		Dominion Bond Rating Svc.	
	Long term	Short term	Long term	Short term	Long term	Short term	Long term	Short term
Old National Bancorp	BBB	N/A	A2	N/A	BBB	F2	BBB (high)	R-2 (high)
Old National Bank	BBB+	A2	A1	P-1	BBB+	F2	A (low)	R-1 (low)

N/A = not applicable

As of June 30, 2009, the Bank Subsidiary had the capacity to borrow \$800.7 million from the Federal Reserve Bank's discount window. The Bank Subsidiary is also a member of the Federal Home Loan Bank (FHLB) of Indianapolis, which provides a source of funding through FHLB advances. The Bank Subsidiary maintains relationships in capital markets with brokers and dealers to issue certificates of deposits and short-term and medium-term bank notes as well.

Table of Contents

The Parent Company has routine funding requirements consisting primarily of operating expenses, dividends to shareholders, debt service, net derivative cash flows and funds used for acquisitions. The Parent Company obtains funding to meet its obligations from dividends and management fees collected from its subsidiaries, operating line of credit and through the issuance of debt securities. Additionally, the Parent Company has a shelf registration in place with the Securities and Exchange Commission permitting ready access to the public debt markets. At June 30, 2009, the Parent Company's other borrowings outstanding remained unchanged at \$157.2 million compared with December 31, 2008. There is \$50.0 million Parent Company debt scheduled to mature within the next 12 months. During the second quarter of 2009, Old National entered into a \$30 million revolving credit facility at the parent level. The facility had an interest rate of LIBOR plus 2.00% and a maturity of 364 days. There was no amount outstanding as of June 30, 2009.

Old National agreed to participate in the U.S. Treasury Department Capital Purchase Program for healthy financial institutions during fourth quarter 2008. Under the program, Old National sold preferred, non-voting shares of its stock and warrants valued at \$100 million to the U.S. Treasury Department. As of March 31, 2009, Old National repurchased all of the \$100 million of non-voting preferred shares from the Treasury Department. The common stock warrants were repurchased on May 11, 2009, for \$1.2 million.

Federal banking laws regulate the amount of dividends that may be paid by banking subsidiaries without prior approval. Prior regulatory approval is required if dividends to be declared in any year would exceed net earnings of the current year plus retained net profits for the preceding two years. At December 31, 2006, the Bank Subsidiary had received regulatory approval to declare a dividend up to \$76 million in the first quarter of 2007. The Parent Company used the cash obtained from the dividend to fund its purchase of St. Joseph Capital Corporation during the first quarter of 2007. As a result of this special dividend, the Bank Subsidiary requires approval of regulatory authority for the payment of dividends to the Parent Company. Such approval was obtained for the payment of dividends at June 30, 2009.

OFF-BALANCE SHEET ARRANGEMENTS

Off-balance sheet arrangements include commitments to extend credit and financial guarantees. Commitments to extend credit and financial guarantees are used to meet the financial needs of our customers. Our banking affiliates have entered into various agreements to extend credit, including loan commitments of \$1.049 billion and standby letters of credit of \$101.7 million at June 30, 2009. At June 30, 2009, approximately \$991 million of the loan commitments had fixed rates and \$58 million had floating rates, with the fixed rates ranging from 0.5% to 18%. At December 31, 2008, loan commitments were \$1.124 billion and standby letters of credit were \$108.4 million. The term of these off-balance sheet arrangements is typically one year or less.

During the second quarter of 2007, we entered into a risk participation in an interest rate swap. The interest rate swap had a notional amount of \$9.4 million at June 30, 2009.

CONTRACTUAL OBLIGATIONS

The following table presents our significant fixed and determinable contractual obligations at June 30, 2009:

CONTRACTUAL OBLIGATIONS

(dollars in thousands)	Payments Due In				Total
	One Year or Less (A)	One to Three Years	Three to Five Years	Over Five Years	
Deposits without stated maturity	\$ 3,723,647	\$	\$	\$	\$ 3,723,647
IRAs, consumer and brokered certificates of deposit	718,115	968,508	293,016	95,222	2,074,861
Short-term borrowings	542,418				542,418
Other borrowings	2,020	374,089	257,093	177,103	810,305
Operating leases	16,048	62,071	58,649	319,045	455,813

(A) For the
remaining six

months of fiscal
2009.

We rent certain premises and equipment under operating leases. See Note 17 to the consolidated financial statements for additional information on long-term lease arrangements.

Table of Contents

We are party to various derivative contracts as a means to manage the balance sheet and our related exposure to changes in interest rates, to manage our residential real estate loan origination and sale activity, and to provide derivative contracts to our clients. Since the derivative liabilities recorded on the balance sheet change frequently and do not represent the amounts that may ultimately be paid under these contracts, these liabilities are not included in the table of contractual obligations presented above. Further discussion of derivative instruments is included in Note 16 to the consolidated financial statements.

In the normal course of business, various legal actions and proceedings are pending against us and our affiliates which are incidental to the business in which they are engaged. Further discussion of contingent liabilities is included in Note 17 to the consolidated financial statements.

In addition, liabilities recorded under FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109* (FIN 48) are not included in the table because the amount and timing of any cash payments cannot be reasonably estimated. Further discussion of income taxes and liabilities recorded under FIN 48 is included in Note 15 to the consolidated financial statements.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our accounting policies are described in Note 1 to the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2008. Certain accounting policies require management to use significant judgment and estimates, which can have a material impact on the carrying value of certain assets and liabilities. We consider these policies to be critical accounting policies. The judgment and assumptions made are based upon historical experience or other factors that management believes to be reasonable under the circumstances. Because of the nature of the judgment and assumptions, actual results could differ from these judgments and estimates which could have a material affect on our financial condition and results of operations.

The following accounting policies materially affect our reported earnings and financial condition and require significant judgments and estimates. Management has reviewed these critical accounting estimates and related disclosures with the Audit Committee of our Board.

Goodwill and Intangibles

Description. For acquisitions, we are required to record the assets acquired, including identified intangible assets, and the liabilities assumed at their fair value. These often involve estimates based on third-party valuations, such as appraisals, or internal valuations based on discounted cash flow analyses or other valuation techniques that may include estimates of attrition, inflation, asset growth rates or other relevant factors. In addition, the determination of the useful lives over which an intangible asset will be amortized is subjective. Under Statement of Financial Accounting Standards (SFAS) No. 142 *Goodwill and Other Intangible Assets*, goodwill and indefinite-lived assets recorded must be reviewed for impairment on an annual basis, as well as on an interim basis if events or changes indicate that the asset might be impaired. An impairment loss must be recognized for any excess of carrying value over fair value of the goodwill or the indefinite-lived intangible asset.

Judgments and Uncertainties. The determination of fair values is based on internal valuations using management's assumptions of future growth rates, future attrition, discount rates, multiples of earnings or other relevant factors.

Effect if Actual Results Differ From Assumptions. Changes in these factors, as well as downturns in economic or business conditions, could have a significant adverse impact on the carrying values of goodwill or intangible assets and could result in impairment losses affecting the financials of the Company as a whole and the individual lines of business in which the goodwill or intangibles reside.

Allowance for Loan Losses

Description. The allowance for loan losses is maintained at a level believed adequate by management to absorb probable incurred losses in the consolidated loan portfolio. Management's evaluation of the adequacy of the allowance is an estimate based on reviews of individual loans, pools of homogeneous loans, assessments of the impact of current and anticipated economic conditions on the portfolio and historical loss experience. The allowance represents management's best estimate, but significant downturns in circumstances relating to loan quality and economic conditions could result in a requirement for additional

allowance. Likewise, an upturn in loan quality and improved economic conditions may allow a reduction in the required allowance. In either instance, unanticipated changes could have a significant impact on results of operations.

Table of Contents

The allowance is increased through a provision charged to operating expense. Uncollectible loans are charged-off through the allowance. Recoveries of loans previously charged-off are added to the allowance. A loan is considered impaired when it is probable that contractual interest and principal payments will not be collected either for the amounts or by the dates as scheduled in the loan agreement. Our policy for recognizing income on impaired loans is to accrue interest unless a loan is placed on nonaccrual status. A loan is generally placed on nonaccrual status when principal or interest becomes 90 days past due unless it is well secured and in the process of collection, or earlier when concern exists as to the ultimate collectibility of principal or interest. We monitor the quality of our loan portfolio on an on-going basis and use a combination of detailed credit assessments by relationship managers and credit officers, historic loss trends, and economic and business environment factors in determining the allowance for loan losses. We record provisions for loan losses based on current loans outstanding, grade changes, mix of loans and expected losses. A detailed loan loss evaluation on an individual loan basis for our highest risk loans is performed quarterly. Management follows the progress of the economy and how it might affect our borrowers in both the near and the intermediate term. We have a formalized and disciplined independent loan review program to evaluate loan administration, credit quality and compliance with corporate loan standards. This program includes periodic reviews and regular reviews of problem loan reports, delinquencies and charge-offs.

Judgments and Uncertainties. We use migration analysis as a tool to determine the adequacy of the allowance for loan losses for non-retail loans that are not impaired. Migration analysis is a statistical technique that attempts to estimate probable losses for existing pools of loans by matching actual losses incurred on loans back to their origination.

We calculate migration analysis using several different scenarios based on varying assumptions to evaluate the widest range of possible outcomes. The migration-derived historical commercial loan loss rates are applied to the current commercial loan pools to arrive at an estimate of probable losses for the loans existing at the time of analysis. The amounts determined by migration analysis are adjusted for management's best estimate of the effects of current economic conditions, loan quality trends, results from internal and external review examinations, loan volume trends, credit concentrations and various other factors. Historic loss ratios adjusted for expectations of future economic conditions are used in determining the appropriate level of allowance for consumer and residential real estate loans.

Effect if Actual Results Differ From Assumptions. The allowance represents management's best estimate, but significant downturns in circumstances relating to loan quality and economic conditions could result in a requirement for additional allowance. Likewise, an upturn in loan quality and improved economic conditions may allow a reduction in the required allowance. In either instance, unanticipated changes could have a significant impact on results of operations.

Management's analysis of probable losses in the portfolio at June 30, 2009, resulted in a range for allowance for loan losses of \$8.4 million with the potential effect to net income ranging from a decrease of \$2.2 million to an increase of \$3.3 million. These sensitivities are hypothetical and are not intended to represent actual results.

Derivative Financial Instruments

Description. As part of our overall interest rate risk management, we use derivative instruments to reduce exposure to changes in interest rates and market prices for financial instruments. The application of the hedge accounting policy requires judgment in the assessment of hedge effectiveness, identification of similar hedged item groupings and measurement of changes in the fair value of derivative financial instruments and hedged items. To the extent hedging relationships are found to be effective, as determined by SFAS No. 133 Accounting for Derivative Instruments and Hedging Activities, changes in fair value of the derivatives are offset by changes in the fair value of the related hedged item or recorded to other comprehensive income. Management believes hedge effectiveness is evaluated properly in preparation of the financial statements. All of the derivative financial instruments we use have an active market and indications of fair value can be readily obtained. We are not using the short-cut method of accounting for any fair value derivatives.

Table of Contents

Judgments and Uncertainties. The application of the hedge accounting policy requires judgment in the assessment of hedge effectiveness, identification of similar hedged item groupings and measurement of changes in the fair value of derivative financial instruments and hedged items.

Effect if Actual Results Differ From Assumptions. To the extent hedging relationships are found to be effective, as determined by SFAS No. 133 Accounting for Derivative Instruments and Hedging Activities, changes in fair value of the derivatives are offset by changes in the fair value of the related hedged item or recorded to other comprehensive income. However, if in the future the derivative financial instruments used by us no longer qualify for hedge accounting treatment, all changes in fair value of the derivative would flow through the consolidated statements of income in other noninterest income, resulting in greater volatility in our earnings.

Income Taxes

Description. We are subject to the income tax laws of the U.S., its states and the municipalities in which we operate. These tax laws are complex and subject to different interpretations by the taxpayer and the relevant government taxing authorities. We review income tax expense and the carrying value of deferred tax assets quarterly; and as new information becomes available, the balances are adjusted as appropriate. On January 1, 2007, we adopted FIN 48 to account for uncertain tax positions. FIN 48 prescribes a recognition threshold of more-likely-than-not, and a measurement attribute for all tax positions taken or expected to be taken on a tax return, in order for those tax positions to be recognized in the financial statements. See Note 12 to the Consolidated Financial Statements for a further description of our provision and related income tax assets and liabilities.

Judgments and Uncertainties. In establishing a provision for income tax expense, we must make judgments and interpretations about the application of these inherently complex tax laws. We must also make estimates about when in the future certain items will affect taxable income in the various tax jurisdictions. Disputes over interpretations of the tax laws may be subject to review/adjudication by the court systems of the various tax jurisdictions or may be settled with the taxing authority upon examination or audit.

Effect if Actual Results Differ From Assumptions. Although management believes that the judgments and estimates used are reasonable, actual results could differ and we may be exposed to losses or gains that could be material. To the extent we prevail in matters for which reserves have been established, or are required to pay amounts in excess of our reserves, our effective income tax rate in a given financial statement period could be materially affected. An unfavorable tax settlement would result in an increase in our effective income tax rate in the period of resolution. A favorable tax settlement would result in a reduction in our effective income tax rate in the period of resolution.

Valuation of Securities

Description. The fair value of our securities is determined with reference to price estimates. In the absence of observable market inputs related to items such as cash flow assumptions or adjustments to market rates, management judgment is used. Different judgments and assumptions used in pricing could result in different estimates of value.

When the fair value of a security is less than its amortized cost for

an extended period, we consider whether there is an other than temporary impairment in the value of the security. If, in management's judgment, an other-than-temporary-impairment exists, the portion of the loss in value attributable to credit quality is transferred from accumulated other comprehensive loss as an immediate reduction of current earnings and the cost basis of the security is written down by this amount.

Table of Contents

We consider the following factors when determining an other-than-temporary-impairment for a security or investment:

- The length of time and the extent to which the market value has been less than amortized cost;
- The financial condition and near-term prospects of the issuer;
- The underlying fundamentals of the relevant market and the outlook for such market for the near future;
- Our intent to sell the debt security or whether it is more likely than not that we will be required to sell the debt security before its anticipated recovery; and
- When applicable for purchased beneficial interests, the estimated cash flows of the securities are assessed for adverse changes.

Quarterly, securities are evaluated for other-than-temporary-impairment in accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, and Emerging Issues Task Force No. 99-20, *Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interest in Securitized Financial Assets* and FSP No. FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*. An impairment that is an other-than-temporary-impairment is a decline in the fair value of an investment below its amortized cost attributable to factors that indicate the decline will not be recovered over the anticipated holding period of the investment.

Other-than-temporary-impairments result in reducing the security's carrying value by the amount of credit loss. The credit component of the other-than-temporary-impairment loss is realized through the statement of income and the remainder of the loss remains in other comprehensive income.

Judgments and Uncertainties. The determination of other-than-temporary-impairment is a subjective process, and different judgments and assumptions could affect the timing and amount of loss realization. In addition, significant judgments are required in determining valuation and impairment, which include making assumptions regarding the estimated prepayments, loss assumptions and interest cash flows.

Effect if Actual Results Differ From Assumptions. Actual credit deterioration could be more or less severe than estimated. Upon subsequent review, if cash flows have significantly improved, the discount would be amortized into earnings over the remaining life of the debt security in a prospective manner based on the amount and timing of future cash flows. Additional credit deterioration resulting in an adverse change in cash flows would result in additional other-than-temporary impairment loss recorded in the income statement.

FORWARD-LOOKING STATEMENTS

In this report, we have made various statements regarding current expectations or forecasts of future events, which speak only as of the date the statements are made. These statements are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are also made from time-to-time in press releases and in oral statements made by the officers of Old National. Forward-looking statements are identified by the words expect, may, could, intend, project, estimate, believe, anticipate and similar. Forward-looking statements also include, but are not limited to, statements regarding estimated cost savings, plans and objectives for future operations, and expectations about performance as well as economic and market conditions and trends.

Such forward-looking statements are based on assumptions and estimates, which although believed to be reasonable, may turn out to be incorrect. Therefore, undue reliance should not be placed upon these estimates and statements. We can not assure that any of these statements, estimates, or beliefs will be realized and actual results may differ from those contemplated in these forward-looking statements. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events, or otherwise. You are advised to consult further disclosures we may make on related subjects in our filings with the SEC. In addition to other factors discussed in this report, some of the important factors that could cause actual results to differ materially from those discussed in the forward-looking statements include the following:

- economic, market, operational, liquidity, credit and interest rate risks associated with our business;

economic conditions generally and in the financial services industry;

Table of Contents

increased competition in the financial services industry either nationally or regionally, resulting in, among other things, credit quality deterioration;

our ability to achieve loan and deposit growth;

volatility and direction of market interest rates;

governmental legislation and regulation, including changes in accounting regulation or standards;

our ability to execute our business plan;

a weakening of the economy which could materially impact credit quality trends and the ability to generate loans;

changes in the securities markets; and

changes in fiscal, monetary and tax policies.

Investors should consider these risks, uncertainties and other factors in addition to risk factors included in our other filings with the SEC.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See Management's Discussion and Analysis of Financial Condition and Results of Operations-Market Risk and Liquidity Risk.

ITEM 4. CONTROLS AND PROCEDURES

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Evaluation of disclosure controls and procedures. Old National's principal executive officer and principal financial officer have concluded that Old National's disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended), based on their evaluation of these controls and procedures as of the end of the period covered by this Form 10-Q, are effective at the reasonable assurance level as discussed below to ensure that information required to be disclosed by Old National in the reports it files under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission and that such information is accumulated and communicated to Old National's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Limitations on the Effectiveness of Controls. Management, including the principal executive officer and principal financial officer, does not expect that Old National's disclosure controls and internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgements in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls.

The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be only reasonable assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, control may become inadequate because of changes in conditions or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Changes in Internal Control over Financial Reporting. There were no changes in Old National's internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, Old National's internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****ITEM 1A. RISK FACTORS**

Old National's business could be harmed by any of the risks noted below. In analyzing whether to make or to continue an investment in Old National, investors should consider, among other factors, the following:

Risks Related to Old National's Business

The current banking crisis, including the Enactment of the Emergency Economic Stabilization Act of 2008 (EESA) and the American Recovery and Reinvestment Act of 2009 (ARRA), may significantly affect our financial condition, results of operations, liquidity or stock price.

The capital and credit markets have been experiencing volatility and disruption for more than a year. In recent months, the volatility and disruption has reached unprecedented levels. In some cases, the markets have produced downward pressure on stock prices and credit availability for certain issuers seemingly without regard to those issuers' underlying financial strength.

EESA, which established the Troubled Asset Relief Program (TARP), was signed into law in October 2008. As part of TARP, the Treasury established the Capital Purchase Program (CPP) to provide up to \$700 billion of funding to eligible financial institutions through the purchase of capital stock and other financial instruments for the purpose of stabilizing and providing liquidity to the U.S. financial markets. Then, on February 17, 2009, President Obama signed ARRA, as a sweeping economic recovery package intended to stimulate the economy and provide for broad infrastructure, energy, health, and education needs. There can be no assurance as to the actual impact that EESA or its programs, including the CPP, and ARRA or its programs, will have on the national economy or financial markets. The failure of these significant legislative measures to help stabilize the financial markets and a continuation or worsening of current financial market conditions could materially and adversely affect our business, financial condition, results of operations, access to credit or the trading price of our common shares.

There have been numerous actions undertaken in connection with or following EESA and ARRA by the Federal Reserve Board, Congress, the Treasury, the FDIC, the SEC and others in efforts to address the current liquidity and credit crisis in the financial industry that followed the sub-prime mortgage market meltdown which began in 2007. These measures include homeowner relief that encourages loan restructuring and modification; the establishment of significant liquidity and credit facilities for financial institutions and investment banks; the lowering of the federal funds rate; emergency action against short selling practices; a temporary guaranty program for money market funds; the establishment of a commercial paper funding facility to provide back-stop liquidity to commercial paper issuers; and coordinated international efforts to address illiquidity and other weaknesses in the banking sector. The purpose of these legislative and regulatory actions is to help stabilize the U.S. banking system. EESA, ARRA and the other regulatory initiatives described above may not have their desired effects. If the volatility in the markets continues and economic conditions fail to improve or worsen, our business, financial condition and results of operations could be materially and adversely affected.

If Old National's actual loan losses exceed Old National's allowance for loan losses, Old National's net income will decrease.

Old National makes various assumptions and judgments about the collectibility of Old National's loan portfolio, including the creditworthiness of Old National's borrowers and the value of the real estate and other assets serving as collateral for the repayment of Old National's loans. Despite Old National's underwriting and monitoring practices, the effect of the declining economy could negatively impact the ability of Old National's borrowers to repay loans in a timely manner and could also negatively impact collateral values. As a result, Old National may experience significant loan losses that could have a material adverse effect on Old National's operating results. Since Old National must use assumptions regarding individual loans and the economy, Old National's current allowance for loan losses may not be sufficient to cover actual loan losses. Old National's assumptions may not anticipate the severity or duration of the current credit cycle and Old National may need to significantly increase Old National's provision for losses on loans if one or more of Old National's larger loans or credit relationships becomes delinquent or if Old National expands its commercial real estate and commercial lending. In addition, federal and state regulators periodically review Old National's allowance for loan losses and may require Old National to increase the provision for loan losses or recognize loan charge-offs. Material additions to Old National's allowance would materially decrease Old National's

net income. There can be no assurance that Old National's monitoring procedures and policies will reduce certain lending risks or that Old National's allowance for loan losses will be adequate to cover actual losses.

Table of Contents

Old National's loan portfolio includes loans with a higher risk of loss.

The Bank originates commercial real estate loans, commercial loans, agricultural real estate loans, agricultural loans, consumer loans, and residential real estate loans primarily within Old National's market areas. Commercial real estate, commercial, consumer, and agricultural loans may expose a lender to greater credit risk than loans secured by residential real estate because the collateral securing these loans may not be sold as easily as residential real estate.

These loans also have greater credit risk than residential real estate for the following reasons:

Commercial Real Estate Loans. Repayment is dependent upon income being generated in amounts sufficient to cover operating expenses and debt service.

Commercial Loans. Repayment is dependent upon the successful operation of the borrower's business.

Consumer Loans. Consumer loans (such as personal lines of credit) are collateralized, if at all, with assets that may not provide an adequate source of payment of the loan due to depreciation, damage, or loss.

Agricultural Loans. Repayment is dependent upon the successful operation of the business, which is greatly dependent on many things outside the control of either the Bank or the borrowers. These factors include weather, commodity prices, and interest rates.

Credit quality issues may broaden in these sectors during 2009 depending on the severity and duration of the declining economy and current credit cycle.

If Old National forecloses on collateral property, Old National may be subject to the increased costs associated with the ownership of real property, resulting in reduced revenues.

Old National may have to foreclose on collateral property to protect Old National's investment and may thereafter own and operate such property, in which case Old National will be exposed to the risks inherent in the ownership of real estate. The amount that Old National, as a mortgagee, may realize after a default is dependent upon factors outside of Old National's control, including, but not limited to: (i) general or local economic conditions; (ii) neighborhood values; (iii) interest rates; (iv) real estate tax rates; (v) operating expenses of the mortgaged properties; (vi) environmental remediation liabilities; (vii) ability to obtain and maintain adequate occupancy of the properties; (viii) zoning laws; (ix) governmental rules, regulations and fiscal policies; and (x) acts of God. Certain expenditures associated with the ownership of real estate, principally real estate taxes, insurance, and maintenance costs, may adversely affect the income from the real estate. Therefore, the cost of operating real property may exceed the income earned from such property, and Old National may have to advance funds in order to protect Old National's investment, or Old National may be required to dispose of the real property at a loss. The foregoing expenditures and costs could adversely affect Old National's ability to generate revenues, resulting in reduced levels of profitability.

We face risks with respect to future expansion.

We may acquire other financial institutions or parts of those institutions in the future, and we may engage in de novo branch expansion. We may also consider and enter into new lines of business or offer new products or services.

Acquisitions and mergers involve a number of expenses and risks, including:

the time and costs associated with identifying potential new markets, as well as acquisition and merger targets;

the estimates and judgments used to evaluate credit, operations, management and market risks with respect to the target institution may not be accurate;

Table of Contents

the time and costs of evaluating new markets, hiring experienced local management and opening new offices, and the time lags between these activities and the generation of sufficient assets and deposits to support the costs of the expansion;

our ability to finance an acquisition and possible dilution to our existing shareholders;

the diversion of our management's attention to the negotiation of a transaction, and the integration of the operations and personnel of the combined businesses;

entry into new markets where we lack experience;

the introduction of new products and services into our business;

the incurrence and possible impairment of goodwill associated with an acquisition and possible adverse short-term effects on our results of operations; and

the risk of loss of key employees and customers.

We may incur substantial costs to expand, and we can give no assurance such expansion will result in the levels of profits we seek. There can be no assurance integration efforts for any future mergers or acquisitions will be successful. Also, we may issue equity securities in connection with future acquisitions, which could cause ownership and economic dilution to our current shareholders. There is no assurance that, following any future mergers or acquisitions, our integration efforts will be successful or that, after giving effect to the acquisition, we will achieve profits comparable to or better than our historical experience.

Old National operates in an extremely competitive market, and Old National's business will suffer if Old National is unable to compete effectively.

In Old National's market area, the Company encounters significant competition from other commercial banks, savings and loan associations, credit unions, mortgage banking firms, consumer finance companies securities brokerage firms, insurance companies, money market mutual funds and other financial intermediaries. The Company's competitors may have substantially greater resources and lending limits than Old National does and may offer services that Old National does not or cannot provide. Old National's profitability depends upon Old National's continued ability to compete successfully in Old National's market area.

The loss of key members of Old National's senior management team could adversely affect Old National's business.

Old National believes that Old National's success depends largely on the efforts and abilities of Old National's senior management. Their experience and industry contacts significantly benefit Old National. The competition for qualified personnel in the financial services industry is intense, and the loss of any of Old National's key personnel or an inability to continue to attract, retain and motivate key personnel could adversely affect Old National's business.

A breach of information security or compliance breach by one of our agents or vendors could negatively affect Old National's reputation and business.

Old National relies upon a variety of computing platforms and networks over the internet for the purposes of data processing, communication and information exchange. Despite the safeguards instituted by Old National, such systems are susceptible to a breach of security. In addition, Old National relies on the services of a variety of third-party vendors to meet Old National's data processing and communication needs. If confidential information is compromised, financial losses, costs and/or other damages could occur. Such costs and/or losses could materially affect Old National's earnings.

Fiduciary Activity Risk Factor

Old National Is Subject To Claims and Litigation Pertaining To Fiduciary Responsibility

From time to time, customers make claims and take legal action pertaining to Old National's performance of its fiduciary responsibilities. If such claims and legal actions are not resolved in a manner favorable to Old National they may result in significant financial liability and/or adversely affect the market perception of Old National and its products and services as well as impact customer demand for those products and services. Any financial liability or reputation damage could have a material adverse effect on the Old National's business, which, in turn, could have a material adverse effect on the Old National's financial condition and results of operations.

Table of Contents**Risks Related to the Banking Industry**

Changes in economic or political conditions could adversely affect Old National's earnings, as Old National's borrowers' ability to repay loans and the value of the collateral securing Old National's loans decline.

Old National's success depends, to a certain extent, upon economic or political conditions, local and national, as well as governmental monetary policies. Conditions such as the on-going recession, unemployment, changes in interest rates, inflation, money supply and other factors beyond Old National's control may adversely affect its asset quality, deposit levels and loan demand and, therefore, the Old National's earnings. Because Old National has a significant amount of commercial real estate loans, decreases in real estate values could adversely affect the value of property used as collateral. Adverse changes in the economy may also have a negative effect on the ability of Old National's borrowers to make timely repayments of their loans, which would have an adverse impact on Old National's earnings. In addition, substantially all of Old National's loans are to individuals and businesses in Old National's market area. Consequently, any economic decline in Old National's primary market areas which include Indiana, Kentucky and Illinois could have an adverse impact on Old National's earnings.

Current levels of market volatility are unprecedented

The capital and credit markets have been experiencing volatility and disruption for more than a year. In recent months, the volatility and disruption has reached unprecedented levels. In some cases, the markets have produced downward pressure on stock prices and credit availability for certain issuers seemingly without regard to those issuers' underlying financial strength. The current market volatility could contribute to a further decline in the market value of certain security investments and other assets of Old National and if current levels of market disruption and volatility continue or worsen, there can be no assurance that we will not experience an adverse effect, which may be material, on results of operations, capital or financial position.

Changes in interest rates could adversely affect Old National's results of operations and financial condition.

Old National's earnings depend substantially on Old National's interest rate spread, which is the difference between (i) the rates Old National earns on loans, securities and other earning assets and (ii) the interest rates Old National pays on deposits and other borrowings. These rates are highly sensitive to many factors beyond Old National's control, including general economic conditions and the policies of various governmental and regulatory authorities. If market interest rates rise, Old National will have competitive pressures to increase the rates Old National pays on deposits, which could result in a decrease of Old National's net interest income. If market interest rates decline, Old National could experience fixed rate loan prepayments and higher investment portfolio cash flows, resulting in a lower yield on earnings assets.

Old National operates in a highly regulated environment, and changes in laws and regulations to which Old National is subject may adversely affect Old National's results of operations.

Old National operates in a highly regulated environment and is subject to extensive regulation, supervision and examination by the Office of Comptroller of the Currency (OCC), the Federal Deposit Insurance Corporation (FDIC), the Board of Governors of the Federal Reserve System (the Federal Reserve) and the State of Indiana. Applicable laws and regulations may change, and such changes may adversely affect Old National's business. Such regulation and supervision of the activities in which an institution may engage is primarily intended for the protection of the depositors and federal deposit insurance funds. Regulatory authorities have extensive discretion in connection with their supervisory and enforcement activities, including but not limited to the imposition of restrictions on the operation of an institution, the classification of assets by the institution and the adequacy of an institution's allowance for loan losses. Any change in such regulation and oversight, whether in the form of restrictions on activities, regulatory policy, regulations, or legislation, including but not limited to changes in the regulations governing institutions, could have a material impact on Old National and its operations.

Table of Contents

Changes in technology could be costly.

The banking industry is undergoing technological innovation at a fast pace. To keep up with its competition, Old National needs to stay abreast of innovations and evaluate those technologies that will enable it to compete on a cost-effective basis. The cost of such technology, including personnel, can be high in both absolute and relative terms. There can be no assurance, given the fast pace of change and innovation, that Old National's technology, either purchased or developed internally, will meet or continue to meet the needs of Old National.

Our earnings could be adversely impacted by incidences of fraud and compliance failures that are not within our direct control.

We are subject to fraud and compliance risk in connection with the origination of loans. Fraud risk includes the intentional misstatement of information in property appraisals or other underwriting documentation provided to us by third parties. Compliance risk is the risk that loans are not originated in compliance with applicable laws and regulations and our standards. There can be no assurance that we can prevent or detect acts of fraud or violation of law or our compliance standards by the third parties that we deal with. Repeated incidences of fraud or compliance failures adversely impact the performance of our loan portfolio.

Risks Related to Old National's Stock

We may not be able to pay dividends in the future in accordance with past practice.

Old National has traditionally paid a quarterly dividend to common stockholders. The payment of dividends is subject to legal and regulatory restrictions. Any payment of dividends in the future will depend, in large part, on Old National's earnings, capital requirements, financial condition and other factors considered relevant by Old National's Board of Directors.

The price of Old National's common stock may be volatile, which may result in losses for investors.

General market price declines or market volatility in the future could adversely affect the price of Old National's common stock. In addition, the following factors may cause the market price for shares of Old National's common stock to fluctuate:

- announcements of developments related to Old National's business;
- fluctuations in Old National's results of operations;
- sales or purchases of substantial amounts of Old National's securities in the marketplace;
- general conditions in Old National's banking niche or the worldwide economy;
- a shortfall or excess in revenues or earnings compared to securities analysts' expectations;
- changes in analysts' recommendations or projections; and

Old National's announcement of new acquisitions or other projects.

Old National's charter documents and federal regulations may inhibit a takeover, prevent a transaction that may favor or otherwise limit Old National's growth opportunities, which could cause the market price of Old National's common stock to decline.

Certain provisions of Old National's charter documents and federal regulations could have the effect of making it more difficult for a third party to acquire, or of discouraging a third party from attempting to acquire, control of Old National. In addition, Old National must obtain approval from regulatory authorities before acquiring control of any other company.

Table of Contents**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**
(c) ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
