SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-Q
QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the Quarterly Period Ended September 30, 2010
Commission File Number: 1-1927
THE GOODYEAR TIRE & RUBBER COMPANY
(Exact Name of Registrant as Specified in Its Charter)

Ohio
(State or Other Jurisdiction of
Incorporation or Organization)

34-0253240
(I.R.S. Employer
Identification No.)

1144 East Market Street, Akron, Ohio
(Address of Principal Executive Offices)

44316-0001
(Zip Code)

(330) 796-2121
(Registrant's Telephone Number, Including Area Code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No
Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting
company

(Do not check if a smaller
reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date.

Number of Shares of Common Stock,
Without Par Value, Outstanding at September 30, 2010: 242,913,365

THE GOODYEAR TIRE & RUBBER COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1. ACCOUNTING POLICIES**Basis of Presentation**

The accompanying unaudited consolidated financial statements have been prepared by The Goodyear Tire & Rubber Company (the Company, Goodyear, we, us or our) in accordance with Securities and Exchange Commission regulations and in the opinion of management contain all adjustments (including normal recurring adjustments) necessary to present fairly the financial position, results of operations and cash flows for the periods presented. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. These interim consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2009 (the 2009 Form 10-K).

We are a party to shareholder agreements concerning certain of our less-than-wholly-owned consolidated subsidiaries. Under the terms of certain of these agreements, the minority shareholders have the right to require us to purchase their ownership interests in the respective subsidiaries if there is a change in control of Goodyear or a bankruptcy of Goodyear. Accordingly, we have reported the minority equity in those subsidiaries outside of Shareholders' Equity.

Operating results for the three and nine months ended September 30, 2010 are not necessarily indicative of the results expected in subsequent quarters or for the year ending December 31, 2010.

Recently Adopted Accounting Standards

Effective January 1, 2010, we adopted a new standard pertaining to the consolidation of variable interest entities that required us to determine whether a variable interest gives the Company a controlling financial interest in a variable interest entity. This standard also requires an ongoing reassessment of the primary beneficiary of the variable interest entity and eliminates the quantitative approach previously required for determining whether an entity is the primary beneficiary. The adoption of this standard did not have a material impact on our consolidated financial statements.

Effective January 1, 2010 we also adopted a new standard pertaining to accounting for transfers of financial assets that removed the concept of a qualifying special-purpose entity from accounting for transfers and servicing of financial assets and extinguishment of liabilities. This standard also clarified the requirements for transfers of financial assets that are eligible for sale accounting. The adoption of this standard did not have a material impact on our consolidated financial statements.

Reclassifications

Certain items previously reported in specific financial statement captions have been reclassified to conform to the current presentation.

NOTE 2. COSTS ASSOCIATED WITH RATIONALIZATION PROGRAMS

In order to maintain our global competitiveness, we have implemented rationalization actions over the past several years to reduce high-cost manufacturing capacity and to reduce associate headcount. The net rationalization charges included in Income (Loss) before Income Taxes are as follows:

<i>(In millions)</i>	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2010	2009	2010	2009
New charges	\$ 8	\$ 23	\$ 35	\$ 221
Reversals		(7)	(19)	(14)
	\$ 8	\$ 16	\$ 16	\$ 207

Table of Contents

THE GOODYEAR TIRE & RUBBER COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

The following table shows the roll-forward of our liability between periods:

<i>(In millions)</i>	Associate- Related Costs	Other Costs	Total
Balance at December 31, 2009	\$ 120	\$ 25	\$ 145
Charges	15	20	35
Incurred	(31)	(22)	(53)
Reversed to the statement of operations	(15)	(4)	(19)
Balance at September 30, 2010	\$ 89	\$ 19	\$ 108

The rationalization actions taken in 2010 were initiated to reduce our cost structure. North American Tire initiated actions related to the consolidation of multiple warehouses to further improve our supply chain and Asia Pacific Tire initiated the closure of a high-cost tire manufacturing facility in Taipei, Taiwan.

During the third quarter of 2010, net rationalization charges of \$8 million were recorded. New charges of \$8 million were comprised of \$4 million for plans initiated in 2010 and \$4 million for plans initiated primarily in 2009. These charges consist of \$4 million for associate severance costs and \$4 million for other exit and non-cancelable lease costs. Substantially all of the new charges relate to future cash outflows.

During the first nine months of 2010, net rationalization charges of \$16 million were recorded. New charges of \$35 million were comprised of \$14 million for plans initiated in 2010, consisting of \$11 million for associate severance and pension costs and \$3 million for other exit and non-cancelable lease costs, and \$21 million for plans initiated primarily in 2009, consisting of \$4 million for associate severance costs and \$17 million for other exit and non-cancelable lease costs. Substantially all of the new charges relate to future cash outflows. The net charges in 2010 also included the reversal of \$19 million of reserves for actions no longer needed for their originally-intended purposes. Approximately 400 associates will be released under 2010 plans of which approximately 300 have been released as of September 30, 2010.

In the first nine months of 2010, \$31 million was incurred for associate severance payments and pension costs, and \$22 million was incurred for non-cancelable lease and other exit costs.

The accrual balance of \$108 million at September 30, 2010 consists of \$89 million for associate severance costs that are expected to be substantially utilized within the next twelve months and \$19 million primarily for long term non-cancelable lease costs.

Asset write-offs and accelerated depreciation charges of \$4 million and \$13 million were recorded in cost of goods sold (CGS) in the three and nine months ended September 30, 2010, respectively, and were related primarily to the closure of our Taiwan facility.

In the third quarter of 2009, net rationalization charges of \$16 million were recorded. New charges of \$23 million were comprised of \$12 million for plans initiated in 2009 and \$11 million for plans initiated in 2008 and prior years. New charges for the 2009 plans were primarily for associate severance costs which require future cash outflows. New charges for the 2008 and prior year plans include \$6 million related to associate severance costs and \$5 million primarily for other exit and non-cancelable lease costs. These amounts include \$3 million related to future cash outflows and \$8 million for other non-cash exit costs, including \$6 million for pension settlements. The third quarter of 2009 includes the reversal of \$7 million of reserves for actions no longer needed for their originally-intended purposes.

For the first nine months of 2009, \$207 million of net charges were recorded. New charges of \$221 million were comprised of \$188 million for plans initiated in 2009 and \$33 million for plans initiated in 2008 and prior years. New charges for the 2009 plans were primarily for associate severance costs which require future cash outflows. The first

nine months of 2009 included the reversal of \$14 million of reserves for actions no longer needed for their originally-intended purposes. Approximately 4,000 associates will be released under 2009 plans of which approximately 3,400 have been released as of September 30, 2010. The \$33 million of new charges for 2008 and prior year plans consisted of \$19 million of associate-related costs and \$14 million primarily for other exit and non-cancelable lease costs. These amounts include \$22 million related to future cash outflows and \$11 million for other non-cash exit costs, including \$8 million for pension settlements and curtailments.

-6-

Table of Contents

THE GOODYEAR TIRE & RUBBER COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Asset write-offs and accelerated depreciation charges of \$18 million and \$40 million were recorded in CGS in the three and nine months ended September 30, 2009, respectively, and primarily related to the closure of our Las Pinas, Philippines and Somerton, Australia tire manufacturing facilities and the discontinuation of a line of tires at one of our plants in North America.

NOTE 3. OTHER EXPENSE

<i>(In millions) (Income) Expense</i>	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Net foreign currency exchange (gains) losses	\$ 5	\$ (6)	\$ 126	\$ 1
Financing fees and financial instruments	63	9	83	30
Net (gains) losses on asset sales	(2)	(7)	(26)	33
Royalty income	(7)	(7)	(22)	(22)
Interest income	(3)	(4)	(8)	(11)
General and product liability discontinued products (Note 9)	3	1	14	9
Subsidiary liquidation loss		18		18
Miscellaneous	3		6	8
	\$ 62	\$ 4	\$ 173	\$ 66

Net foreign currency exchange losses in the third quarter of 2010 were \$5 million, compared to \$6 million of gains in the third quarter of 2009. Foreign currency exchange reflected net gains and losses resulting from the effect of exchange rate changes on various foreign currency transactions worldwide. Foreign currency exchange losses in the first nine months of 2010 were \$126 million, compared to \$1 million in the first nine months of 2009. Losses in 2010 included a first quarter loss of \$110 million resulting from the January 8, 2010 devaluation of the Venezuelan bolivar fuerte against the U.S. dollar and the establishment of a two-tier exchange structure for essential and non-essential goods. For essential goods the official exchange rate is 2.6 bolivares fuertes to the U.S. dollar and for non-essential goods the official exchange rate is 4.3 bolivares fuertes to the U.S. dollar.

Effective January 1, 2010, Venezuela's economy was considered to be highly inflationary under U.S. generally accepted accounting principles since it experienced a rate of general inflation in excess of 100% over the latest three year period, based upon the blended Consumer Price Index and National Consumer Price Index. Accordingly, the U.S. dollar was determined to be the functional currency of our Venezuelan subsidiary. All gains and losses resulting from the remeasurement of its financial statements are determined using official exchange rates and are reported in Other Expense.

The \$110 million foreign currency exchange loss primarily consisted of a \$157 million remeasurement loss on bolivar-denominated net monetary assets and liabilities including deferred taxes at the time of the devaluation. The loss was primarily related to cash deposits in Venezuela that were remeasured at the official exchange rate applicable to non-essential goods, and was partially offset by \$47 million related to U.S. dollar-denominated payables that will be settled at the official exchange rate applicable to essential goods. Nonmonetary assets and liabilities, which consisted primarily of inventory and property, plant and equipment, were translated at historical rates.

Increased financing fees in the third quarter of 2010 primarily related to the redemption of \$973 million of long term debt. The increase included a \$50 million cash premium paid on the redemption and \$6 million of financing fees which were written off. Financing fees and financial instruments expense also includes the amortization of deferred financing fees, commitment fees and other charges incurred in connection with financing transactions.

Net gains on asset sales were \$2 million in the third quarter of 2010, compared to \$7 million in the third quarter of 2009. Net gains on asset sales were \$26 million in the first nine months of 2010, compared to net losses on asset sales of \$33 million in the first nine months of 2009. Net gains on asset sales in 2010 included a first quarter gain on the sale of land in Thailand and a second quarter gain on the recognition of a deferred gain from the sale of a warehouse in Guatemala in 2008. The net gains in the third quarter of 2009 related primarily to the sale of property in Luxembourg and the net losses in the first nine months of 2009 were due primarily to the sale of certain of our properties in Akron, Ohio that comprise our current headquarters to Industrial Realty Group (IRG) in connection with the development of a proposed new headquarters in Akron, Ohio. Prior to the sale, the facilities remained classified as held and used. Due to significant uncertainties related to the completion of the transaction resulting from prevailing conditions in the credit markets and the ability of IRG to obtain

-7-

Table of Contents

THE GOODYEAR TIRE & RUBBER COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

financing, we concluded the sale was not probable and, accordingly, did not write down the facilities to their net realizable value. The headquarters properties were corporate facilities that did not have identifiable cash flows that were largely independent of other assets and liabilities and, accordingly, were tested for impairment at the total company level. No impairment was indicated as a result of that testing.

Royalty income is derived primarily from licensing arrangements related to divested businesses. Interest income consisted primarily of amounts earned on cash deposits. General and product liability discontinued products includes charges for claims against us related primarily to asbestos personal injury claims, net of probable insurance recoveries. We recorded \$6 million and \$3 million of expense related to asbestos claims in the third quarter of 2010 and 2009, respectively. In addition, we recorded \$3 million of income related to probable insurance recoveries and a \$1 million reduction of probable insurance recoveries in the third quarter of 2010 and 2009, respectively. We recorded \$18 million and \$16 million of expense related to asbestos claims in the first nine months of 2010 and 2009, respectively. In addition, we recorded \$4 million of income related to probable insurance recoveries in both the first nine months of 2010 and 2009.

We liquidated our subsidiary in Guatemala in the third quarter of 2009 and recognized a loss of \$18 million due primarily to the recognition of accumulated foreign currency translation losses.

NOTE 4. PER SHARE OF COMMON STOCK

Basic earnings per share are computed based on the weighted average number of common shares outstanding. Diluted earnings per share are calculated to reflect the potential dilution that could occur if securities were exercised or converted into common stock.

The following table presents the number of incremental weighted average shares used in computing diluted per share amounts:

<i>(In millions)</i>	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Weighted average shares outstanding basic	242	242	242	241
Stock options and other dilutive securities		3		
Weighted average shares outstanding diluted	242	245	242	241

Weighted average shares outstanding diluted exclude the effects of approximately 4 million equivalent shares for both the three and nine months ended September 30, 2010 and 6 million equivalent shares for the nine months ended September 30, 2009, related to options with exercise prices less than the average market price of our common shares (i.e., in-the-money options), as their inclusion would have been anti-dilutive due to the Goodyear net loss.

Additionally, weighted average shares outstanding diluted excluded approximately 12 million equivalent shares for both the three and nine months ended September 30, 2010 and excluded approximately 11 million and 13 million equivalent shares for the three and nine months ended September 30, 2009, respectively, related to options with exercise prices greater than the average market price of our common shares (i.e. underwater options).

NOTE 5. FAIR VALUE MEASUREMENTS

The following table presents information about assets and liabilities recorded at fair value on the Consolidated Balance Sheet at September 30, 2010 and December 31, 2009:

<i>(In millions)</i>	Total Carrying Value in the		Quoted Prices in Active Markets for Identical		Significant Other Observable		Significant Unobservable	
	Consolidated Balance Sheet		Assets/Liabilities (Level 1)		Inputs (Level 2)		Inputs (Level 3)	
	2010	2009	2010	2009	2010	2009	2010	2009
Assets:								
Investments	\$ 36	\$ 32	\$ 36	\$ 32	\$	\$	\$	\$
Foreign Exchange Contracts	14	28			13	27	1	1
Total Assets at Fair Value	\$ 50	\$ 60	\$ 36	\$ 32	\$ 13	\$ 27	\$ 1	\$ 1
Liabilities:								
Foreign Exchange Contracts	\$ 45	\$ 6	\$	\$	\$ 45	\$ 6	\$	\$
Total Liabilities at Fair Value	\$ 45	\$ 6	\$	\$	\$ 45	\$ 6	\$	\$

Derivative financial instrument valuations classified as Level 3 included embedded currency derivatives in long-dated operating leases. The valuation of the embedded currency derivatives is based on an extrapolation of forward rates to the assumed expiration of the leases. Realized and unrealized gains and losses related to the embedded currency derivatives are included in Other Expense. Also included in Other Expense was a gain of \$2 million and \$9 million for the three and nine months ended September 30, 2009, respectively, related to an interest rate basis swap.

The following table presents changes in fair value for instruments classified as Level 3:

<i>(In millions)</i>	Nine Months Ended September 30, 2010	Twelve Months Ended December 31, 2009
Asset (liability)		
Balance at beginning of period	\$ 1	\$ (9)
Net realized gains		10
Net unrealized losses		

Balance at end of period	\$	1	\$	1
--------------------------	----	---	----	---

The following table presents supplemental fair value information about long term fixed rate and variable rate debt, excluding capital leases, at September 30, 2010 and December 31, 2009. The fair value was estimated using quoted market prices or discounted future cash flows.

<i>(In millions)</i>	September 30, 2010	December 31, 2009
Fixed Rate Debt:		
Carrying amount liability	\$ 2,627	\$ 2,442

NOTE 6. FINANCING ARRANGEMENTS

At September 30, 2010, we had total credit arrangements of \$7,807 million, of which \$2,357 million were unused. At that date, 45% of our debt was at variable interest rates averaging 3.72%.

Notes Payable and Overdrafts, Long Term Debt and Capital Leases due Within One Year and Short Term Financing Arrangements

At September 30, 2010, we had short term committed and uncommitted credit arrangements totaling \$489 million, of which \$230 million were unused. These arrangements are available primarily to certain of our international subsidiaries through various banks at quoted market interest rates. There are no commitment fees associated with these arrangements.

The following table presents amounts due within one year:

<i>(In millions)</i>	September 30, 2010	December 31, 2009
Notes payable and overdrafts	\$ 259	\$ 224
Weighted average interest rate	4.27%	4.84%
Long term debt and capital leases due within one year:		
Other domestic and international debt (including capital leases)	\$ 118	\$ 114
Weighted average interest rate	9.22%	4.78%
Total obligations due within one year	\$ 377	\$ 338

NOTES\$1.0 Billion 8.25% Senior Notes due 2020

On August 13, 2010, we issued \$900 million aggregate principal amount of 8.25% senior notes due 2020. These notes were sold at 99.163% of the principal amount at an effective yield of 8.375% and will mature on August 15, 2020. On August 25, 2010, we issued \$100 million aggregate principal amount of additional notes, which were sold at 100.750% of the principal amount at an effective yield of 8.119%. These notes are unsecured senior obligations and are guaranteed by our U.S. and Canadian subsidiaries that also guarantee our obligations under our senior secured

credit facilities described below.

We have the option to redeem these notes, in whole or in part, at any time on or after August 15, 2015 at a redemption price of 104.125%, 102.750%, 101.375% and 100.000% during the 12-month periods commencing on August 15, 2015, 2016, 2017 and 2018, respectively, plus accrued and unpaid interest to the redemption date. Prior to August 15, 2015, we may redeem these notes, in whole or in part, at a redemption price equal to 100% of the principal amount plus a make-whole premium and accrued and unpaid interest to the redemption date. In addition, prior to August 15, 2013, we may redeem up to 35% of these notes from the net cash proceeds of certain equity offerings at a redemption price equal to 108.25% of the principal amount plus accrued and unpaid interest to the redemption date.

The terms of the indenture for these notes, among other things, limit our ability and the ability of certain of our subsidiaries to (i) incur additional debt or issue redeemable preferred stock, (ii) pay dividends, or make certain other restricted payments or investments, (iii) incur liens, (iv) sell assets, (v) incur restrictions on the ability of our subsidiaries to pay dividends to us, (vi) enter into affiliate transactions, (vii) engage in sale and leaseback transactions, and (viii) consolidate,

Table of Contents

**THE GOODYEAR TIRE & RUBBER COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)**

merge, sell or otherwise dispose of all or substantially all of our assets. These covenants are subject to significant exceptions and qualifications. For example, if these notes are assigned an investment grade rating by Moody's and Standard & Poor's (S&P) and no default has occurred or is continuing, certain covenants will be suspended.

Redemption of Notes

On September 29, 2010, we redeemed all of our outstanding 7.857% notes due 2011, 8.625% senior notes due 2011, and 9% senior notes due 2015. The aggregate redemption price for these redemptions was \$1,023 million, including a prepayment premium of \$50 million.

Debt Exchange Offer

On March 5, 2010, we completed an offer to exchange our outstanding 7.857% notes due 2011 (2011 Notes) for a new series of 8.75% notes due 2020 (2020 Notes). A total of \$262 million in principal amount of the 2011 Notes were validly tendered, and \$282 million in aggregate principal amount of the 2020 Notes were issued in the exchange. We will accrete the difference in the carrying amount of the 2011 Notes and the principal amount of the 2020 Notes as additional interest expense over the life of the 2020 Notes using the effective interest rate method. The direct costs of the exchange offer incurred with third parties were expensed.

At September 30, 2010, \$282 million in aggregate principal amount of the 2020 Notes were outstanding. The 2020 Notes are unsecured senior obligations, are guaranteed by our U.S. and Canadian subsidiaries that also guarantee our obligations under our senior secured credit facilities described below, and will mature on August 15, 2020.

We have the option to redeem the 2020 Notes, in whole or in part, at any time at a redemption price equal to the greater of 100% of the principal amount of the 2020 Notes or the sum of the present values of the remaining scheduled payments on the 2020 Notes, discounted using a defined treasury rate plus 50 basis points, plus in either case accrued and unpaid interest to the redemption date.

The terms of the indenture for the 2020 Notes, among other things, limit our ability and the ability of certain of our subsidiaries to (i) incur secured debt, (ii) engage in sale and leaseback transactions, and (iii) consolidate, merge, sell or otherwise dispose of all or substantially all of our assets. These covenants are subject to significant exceptions and qualifications.

CREDIT FACILITIES

505 Million Amended and Restated Senior Secured European and German Revolving Credit Facilities due 2012

Our amended and restated 505 million European revolving credit facilities consist of a 155 million German revolving credit facility, which is only available to one of the German subsidiaries (the German borrower) of Goodyear Dunlop Tires Europe B.V. (GDTE), and a 350 million European revolving credit facility, which is available to the same German borrower and to GDTE and certain of its other subsidiaries with a 125 million sublimit for non-German borrowers and a 50 million letter of credit sublimit. Goodyear and its subsidiaries that guarantee our U.S. facilities provide unsecured guarantees to support the European revolving credit facilities and GDTE and certain of its subsidiaries in the United Kingdom, Luxembourg, France and Germany also provide guarantees. GDTE's obligations under the facilities and the obligations of its subsidiaries under the related guarantees are secured by first priority security interests in a variety of collateral. At September 30, 2010, \$54 million (40 million) was outstanding under the German revolving credit facility and \$82 million (60 million) was outstanding under the European revolving credit facility. At December 31, 2009, there were no borrowings under the German or the European revolving credit facilities. Letters of credit issued under the European revolving credit facility totaled \$13 million (10 million) at September 30, 2010 and \$14 million (10 million) at December 31, 2009.

These facilities have customary representations and warranties including, as a condition to borrowing, that all such representations and warranties are true and correct, in all material respects, on the date of the borrowing, including representations as to no material adverse change in our financial condition since December 31, 2006. These facilities also have customary defaults, including cross-defaults to material indebtedness of Goodyear and our subsidiaries.

Table of Contents

**THE GOODYEAR TIRE & RUBBER COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)**

\$1.5 Billion Amended and Restated First Lien Revolving Credit Facility due 2013

This facility is available in the form of loans or letters of credit, with letter of credit availability limited to \$800 million. Subject to the consent of the lenders whose commitments are to be increased, we may request that the facility be increased by up to \$250 million. Our obligations under the facility are guaranteed by most of our wholly-owned U.S. and Canadian subsidiaries. Our obligations under the facility and our subsidiaries' obligations under the related guarantees are secured by first priority security interests in a variety of collateral.

This facility has customary representations and warranties including, as a condition to borrowing, that all such representations and warranties are true and correct, in all material respects, on the date of the borrowing, including representations as to no material adverse change in our financial condition since December 31, 2006. This facility also has customary defaults, including a cross-default to material indebtedness of Goodyear and our subsidiaries.

At September 30, 2010, we had no borrowings and \$483 million of letters of credit issued under the revolving credit facility. At December 31, 2009, we had no borrowings and \$494 million of letters of credit issued under the revolving credit facility.

\$1.2 Billion Amended and Restated Second Lien Term Loan Facility due 2014

Our obligations under this facility are guaranteed by most of our wholly-owned U.S. and Canadian subsidiaries and are secured by second priority security interests in the same collateral securing the \$1.5 billion first lien revolving credit facility. At September 30, 2010 and December 31, 2009, this facility was fully drawn.

This facility has customary defaults, including a cross-default to material indebtedness of Goodyear and our subsidiaries.

International Accounts Receivable Securitization Facilities (On-Balance Sheet)

GDTE and certain of its subsidiaries are parties to a pan-European accounts receivable securitization facility that provides up to 450 million of funding and expires in 2015. Utilization under this facility is based on current available receivable balances. The facility is subject to customary annual renewal of back-up liquidity commitments.

The facility involves an ongoing daily sale of substantially all of the trade accounts receivable of certain GDTE subsidiaries to a bankruptcy-remote French company controlled by one of the liquidity banks in the facility. These subsidiaries retain servicing responsibilities. At September 30, 2010 and December 31, 2009, the amount available, and fully utilized under this program, totaled \$446 million (327 million) and \$437 million (304 million), respectively. The program did not qualify for sale accounting, and accordingly, these amounts are included in long term debt and capital leases.

In addition to the pan-European accounts receivable securitization facility discussed above, subsidiaries in Australia have accounts receivable programs totaling \$68 million at September 30, 2010 and December 31, 2009. The receivables sold under this program also serve as collateral for the facility. The Company retains the risk of loss related to these receivables in the event of non-payment. These amounts are included in Notes payable and overdrafts.

For a description of the collateral securing the facilities described above as well as the covenants applicable to them, refer to the Note to the Consolidated Financial Statements No. 12, Financing Arrangements and Derivative Financial Instruments, in our 2009 Form 10-K.

Other Foreign Credit Facilities

Our Chinese subsidiary has two financing agreements in China. At September 30, 2010, these non-revolving credit facilities had total unused availability of 3.1 billion renminbi (\$459 million) and can only be used to finance the relocation and expansion of our manufacturing facilities in China. The facilities contain covenants relating to our Chinese subsidiary and have customary representations and warranties and defaults relating to our Chinese subsidiary's ability to perform its obligations under the facilities. One of the facilities (with 1.8 billion renminbi of unused availability at September 30, 2010) matures in 2016 and principal amortization begins in 2013. At September 30, 2010, there were \$81 million of borrowings outstanding under this facility. The other facility (with 1.3 billion renminbi of unused availability at September 30, 2010)

Table of Contents

THE GOODYEAR TIRE & RUBBER COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

will mature eight years after the first borrowing and will begin principal amortization five years after the first borrowing. At September 30, 2010, there were no borrowings outstanding under this facility. There were no amounts outstanding under either of the facilities at December 31, 2009.

Debt Maturities

Updates to our debt maturities as disclosed in our 2009 Form 10-K are provided below and reflect the exchange of \$262 million of our 7.857% notes due 2011 for \$282 million aggregate principal amount of our 8.75% notes due 2020, and the redemption of \$388 million of our 7.857% notes due 2011 and \$325 million of our 8.625% senior notes due 2011.

<i>(In millions)</i>	2010	2011	2012	2013	2014
Domestic	\$ 3	\$ 1	\$ 1	\$ 4	\$ 1,200
International	111	13	95	28	7
	\$ 114	\$ 14	\$ 96	\$ 32	\$ 1,207

DERIVATIVE FINANCIAL INSTRUMENTS

We utilize derivative financial instrument contracts and nonderivative instruments to manage interest rate, foreign exchange and commodity price risks. We have established a control environment that includes policies and procedures for risk assessment and the approval, reporting and monitoring of derivative financial instrument activities. We do not hold or issue derivative financial instruments for trading purposes.

Foreign Currency Contracts

We will enter into foreign currency contracts in order to manage the impact of changes in foreign exchange rates on our consolidated results of operations and future foreign currency-denominated cash flows. These contracts reduce exposure to currency movements affecting existing foreign currency-denominated assets, liabilities, firm commitments and forecasted transactions resulting primarily from trade receivables and payables, equipment acquisitions, intercompany loans, royalty agreements and forecasted purchases and sales. Contracts hedging short term trade receivables and payables normally have no hedging designation.

The following table presents fair values for foreign currency contracts not designated as hedging instruments:

<i>(In millions)</i>	September 30, 2010	December 31, 2009
Fair Values asset (liability):		
Accounts receivable	\$ 13	\$ 27
Other assets	1	1
Other current liabilities	(45)	(6)
Other long term liabilities		

At September 30, 2010 and December 31, 2009, these outstanding foreign currency derivatives had notional amounts of \$1,208 million and \$1,252 million, respectively, and were primarily related to intercompany loans. Other Expense included net transaction losses of \$63 million and gains of \$34 million for the three and nine months ended September 30, 2010, respectively, compared to net transaction losses of \$44 million and \$102 million for the three and nine months ended September 30, 2009, respectively, on foreign currency derivatives. These amounts were substantially offset in Other Expense by the effect of changing exchange rates on the underlying currency exposures.

The counterparties to our interest rate and foreign exchange contracts were substantial and creditworthy multinational commercial banks or other financial institutions that are recognized market makers. We control our credit exposure by diversifying across multiple counterparties and by setting counterparty credit limits based on long

term credit ratings and other indicators of counterparty credit risk such as credit default swap spreads. We also enter into master netting agreements with counterparties when possible. Based on our analysis, we consider the risk of counterparty nonperformance associated with these contracts to be remote. However, the inability of a counterparty to fulfill its obligations when due could have a material adverse effect on our consolidated financial position, results of operations or liquidity in the period in which it occurs.

-14-

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 7. STOCK COMPENSATION PLANS

Our Board of Directors granted 1.7 million stock options, 0.3 million shares of restricted stock, 0.3 million restricted stock units and 0.1 million performance share units during the nine months ended September 30, 2010 under our 2008 Performance Plan. The 2008 Performance Plan will expire on April 8, 2018. The weighted average exercise price per share and weighted average fair value per share for the stock options was \$12.71 and \$6.55, respectively. We estimated the fair value of the stock options using the following assumptions in our Black-Scholes model:

Expected term: 6.25 years

Interest rate: 2.68%

Volatility: 50.36%

Dividend yield: Nil

We measure the fair value of grants of shares of restricted stock, restricted stock units and performance share units at the closing market price of a share of our common stock on the date of the grant. The weighted average fair value per share was \$12.74 for grants made during the nine months ended September 30, 2010.

We recognized stock-based compensation expense of \$7 million and \$14 million during the three and nine months ended September 30, 2010, respectively. At September 30, 2010, unearned compensation cost related to the unvested portion of all stock-based awards was approximately \$27 million and is expected to be recognized over the remaining vesting period of the respective grants, through March 31, 2015. We recognized stock-based compensation expense of \$11 million and \$25 million during the three and nine months ended September 30, 2009, respectively.

NOTE 8. PENSION, SAVINGS AND OTHER POSTRETIREMENT BENEFIT PLANS

We provide employees with defined benefit pension or defined contribution savings plans.

Defined benefit pension cost follows:

<i>(In millions)</i>	U.S.		U.S.	
	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Service cost benefits earned during the period	\$ 10	\$ 9	\$ 30	\$ 26
Interest cost on projected benefit obligation	74	77	222	235
Expected return on plan assets	(70)	(59)	(210)	(177)
Amortization of:				
- prior service cost	8	8	23	25
- net losses	34	38	100	116
Total defined benefit pension cost	\$ 56	\$ 73	\$ 165	\$ 225

<i>(In millions)</i>	Non-U.S.		Non-U.S.	
	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Service cost benefits earned during the period	\$ 6	\$ 7	\$ 19	\$ 20
Interest cost on projected benefit obligation	36	37	108	105

Edgar Filing: GOODYEAR TIRE & RUBBER CO /OH/ - Form 10-Q

Expected return on plan assets	(32)	(30)	(94)	(85)
Amortization of:				
- prior service cost			1	1
- net losses	9	10	26	24
Net periodic pension cost	19	24	60	65
Curtailments/settlements/termination benefits	(2)	9	(1)	16
Total defined benefit pension cost	\$ 17	\$ 33	\$ 59	\$ 81

We expect to contribute approximately \$300 million to \$325 million to our funded U.S. and non-U.S. pension plans in 2010, which includes \$200 million to \$225 million to our funded U.S. pension plans. For the three and nine months ended September 30, 2010, we contributed \$15 million and \$71 million, respectively, to our non-U.S. plans and for the three and nine months ended September 30, 2010, we contributed \$94 million and \$146 million, respectively, to our U.S. plans.

Table of Contents

THE GOODYEAR TIRE & RUBBER COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

The expense recognized for our contributions to defined contribution savings plans was \$23 million and \$24 million for the three months ended September 30, 2010 and 2009, respectively, and \$69 million and \$63 million for the nine months ended September 30, 2010 and 2009, respectively.

We provide certain domestic employees and employees at certain non-U.S. subsidiaries with health care benefits or life insurance benefits upon retirement. Postretirement benefit cost (credit) for the three months ended September 30, 2010 and 2009 was \$2 million and \$(1) million, respectively, and \$13 million, which includes a \$7 million adjustment for participant data related to prior periods, and \$2 million for the nine months ended September 30, 2010 and 2009, respectively.

The Medicare Prescription Drug Improvement and Modernization Act provides plan sponsors a federal subsidy for certain qualifying prescription drug benefits covered under the sponsor's postretirement health care plans. Our postretirement benefit costs are presented net of this subsidy.

NOTE 9. COMMITMENTS AND CONTINGENT LIABILITIES

At September 30, 2010, we had binding commitments for raw materials and investments in buildings and equipment of approximately \$1.6 billion, and off-balance-sheet financial guarantees written and other commitments totaling approximately \$104 million. In addition, we have other contractual commitments, the amounts of which cannot be estimated, pursuant to certain long-term agreements under which we will purchase minimum amounts of various raw materials and finished goods at agreed upon base prices that are subject to periodic adjustments for changes in raw material costs and market price adjustments, or in quantities that are subject to periodic adjustments for changes in our production levels.

Environmental Matters

We have recorded liabilities totaling \$46 million and \$43 million at September 30, 2010 and December 31, 2009, respectively, for anticipated costs related to various environmental matters, primarily the remediation of numerous waste disposal sites and certain properties sold by us. Of these amounts, \$8 million and \$9 million were included in Other Current Liabilities at September 30, 2010 and December 31, 2009, respectively. The costs include legal and consulting fees, site studies, the design and implementation of remediation plans, post-remediation monitoring and related activities, and will be paid over several years. The amount of our ultimate liability in respect of these matters may be affected by several uncertainties, primarily the ultimate cost of required remediation and the extent to which other responsible parties contribute. We have limited potential insurance coverage for future environmental claims.

Workers Compensation

We have recorded liabilities, on a discounted basis, totaling \$323 million and \$301 million for anticipated costs related to workers' compensation at September 30, 2010 and December 31, 2009, respectively. Of these amounts, \$72 million and \$75 million were included in Current Liabilities as part of Compensation and Benefits at September 30, 2010 and December 31, 2009, respectively. The costs include an estimate of expected settlements on pending claims, defense costs and a provision for claims incurred but not reported. These estimates are based on our assessment of potential liability using an analysis of available information with respect to pending claims, historical experience, and current cost trends. The amount of our ultimate liability in respect of these matters may differ from these estimates. We periodically, and at least annually, update our loss development factors based on actuarial analyses. At September 30, 2010 and December 31, 2009, the liability was discounted using a risk-free rate of return.

General and Product Liability and Other Litigation

We have recorded liabilities totaling \$342 million and \$300 million, including related legal fees expected to be incurred, for potential product liability and other tort claims presently asserted against us at September 30, 2010 and December 31, 2009, respectively. Of these amounts, \$99 million and \$73 million were included in Other Current Liabilities at September 30, 2010 and December 31, 2009, respectively. The increase in general and product liability reserves was due primarily to an unexpected, unfavorable judgment involving one claim in which an appellate court affirmed a trial court order that prohibited us from presenting evidence with respect to our liability for that claim. The amounts recorded were estimated based on an assessment of potential liability using an analysis of available

information with respect to pending claims, historical

Table of Contents

THE GOODYEAR TIRE & RUBBER COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

experience and, where available, recent and current trends. The amount of our ultimate liability in respect of these matters may differ from these estimates.

Asbestos. We are a defendant in numerous lawsuits alleging various asbestos-related personal injuries purported to result from alleged exposure to certain asbestos products manufactured by us or present in certain of our facilities. Typically, these lawsuits have been brought against multiple defendants in state and Federal courts. To date, we have disposed of approximately 85,800 claims by defending and obtaining the dismissal thereof or by entering into a settlement. The sum of our accrued asbestos-related liability and gross payments to date, including legal costs, totaled approximately \$366 million through September 30, 2010 and \$349 million through December 31, 2009.

A summary of recent approximate asbestos claims activity follows. Because claims are often filed and disposed of by dismissal or settlement in large numbers, the amount and timing of settlements and the number of open claims during a particular period can fluctuate significantly. The passage of tort reform laws and creation of deferred dockets for non-maligancy claims in several states has contributed to a decline in the number of claims filed in recent years.

<i>(Dollars in millions)</i>	Nine Months Ended September 30, 2010	Year Ended December 31, 2009
Pending claims, beginning of period	90,200	99,000
New claims filed	1,300	1,600
Claims settled/dismissed	(3,300)	(10,400)
Pending claims, end of period	88,200	90,200
Payments (1)	\$ 22	\$ 20

(1) Represents amount spent by us and our insurers on asbestos litigation defense and claim resolution.

We periodically, and at least annually, review our existing reserves for pending claims, including a reasonable estimate of the liability associated with unasserted asbestos claims, and estimate our receivables from probable insurance recoveries.

We had recorded gross liabilities for both asserted and unasserted claims, inclusive of defense costs, totaling \$131 million and \$136 million at September 30, 2010 and December 31, 2009, respectively. At September 30, 2010, we estimate that it is reasonably possible that our gross liabilities, net of our estimate for probable insurance recoveries, could exceed our recorded amounts by \$15 million.

We recorded a receivable related to asbestos claims of \$67 million and \$69 million as of September 30, 2010 and December 31, 2009, respectively. We expect that approximately 50% of asbestos claim related losses would be recoverable through insurance through the period covered by the estimated liability. Of these amounts, \$10 million

and \$11 million were included in Current Assets as part of Accounts receivable at September 30, 2010 and December 31, 2009, respectively. The recorded receivable consists of an amount we expect to collect under coverage-in-place agreements with certain primary carriers as well as an amount we believe is probable of recovery from certain of our excess coverage insurance carriers.

We believe that, at September 30, 2010, we had approximately \$180 million in aggregate limits of excess level policies potentially applicable to indemnity payments for asbestos products claims, in addition to limits of available primary insurance policies. Some of these excess policies provide for payment of defense costs in addition to indemnity limits. A portion of the availability of the excess level policies is included in the \$67 million insurance receivable recorded at September 30, 2010. We also had approximately \$15 million in aggregate limits for products claims, as well as coverage for premise claims on a per occurrence basis, and defense costs available with our primary insurance carriers through coverage-in-place agreements at September 30, 2010.

Other Actions. We are currently a party to various claims and legal proceedings in addition to those noted above. If management believes that a loss arising from these matters is probable and can reasonably be estimated, we record the amount of the loss, or the minimum estimated liability when the loss is estimated using a range, and no point within the range is more probable than another. As additional information becomes available, any potential liability related to these matters is assessed and the estimates are revised, if necessary. Based on currently available information, management believes that the ultimate outcome of these matters, individually and in the aggregate, will not have a material adverse effect on our financial position or overall trends in results of operations. However, litigation is subject to inherent uncertainties, and unfavorable rulings could occur. An unfavorable ruling could include monetary damages or an injunction prohibiting us from selling one

Table of Contents

THE GOODYEAR TIRE & RUBBER COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

or more products. If an unfavorable ruling were to occur, there exists the possibility of a material adverse impact on the financial position and results of operations of the period in which the ruling occurs, or in future periods.

Tax Matters

The calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations. We recognize liabilities for anticipated tax audit issues based on our estimate of whether, and the extent to which, additional taxes will be due. If we ultimately determine that payment of these amounts is unnecessary, we reverse the liability and recognize a tax benefit during the period in which we determine that the liability is no longer necessary. We also recognize tax benefits to the extent that it is more likely than not that our positions will be sustained when challenged by the taxing authorities. We derecognize tax benefits when based on new information we determine that it is no longer more likely than not that our position will be sustained. To the extent we prevail in matters for which liabilities have been established, or determine we need to derecognize tax benefits recorded in prior periods, or that we are required to pay amounts in excess of our liabilities, our effective tax rate in a given period could be materially affected. An unfavorable tax settlement would require use of our cash, and result in an increase in our effective tax rate in the period of resolution. A favorable tax settlement would be recognized as a reduction in our effective tax rate in the period of resolution.

Guarantees

We will from time to time issue guarantees to financial institutions or other entities, on behalf of certain of our affiliates, lessors or customers. Normally there is no separate premium received by us as consideration for the issuance of guarantees. We also generally do not require collateral in connection with the issuance of these guarantees. If our performance under these guarantees is triggered by non-payment or another specified event, we would be obligated to make payment to the financial institution or the other entity, and would typically have recourse to the assets of the affiliate, lessor or customer. The guarantees expire at various times through 2029. We are unable to estimate the extent to which the assets of our affiliates, lessors or customers would be adequate to recover any payments made by us under the related guarantees.

NOTE 11. INCOME TAXES

For the third quarter of 2010, we recorded tax expense of \$55 million on income before income taxes of \$42 million. For the third quarter of 2009, we recorded tax expense of \$38 million on income before income taxes of \$140 million. Our income tax expense or benefit is allocated among operations and items charged or credited directly to shareholders' equity. Pursuant to this allocation requirement, a non-cash tax benefit has been allocated to the loss from our U.S. operations, with offsetting tax expense allocated to items, primarily attributable to employee benefits, charged directly to shareholders' equity. For the three and nine months ended September 30, 2010, the allocated

amount is \$13 million and \$17 million, respectively. For the three and nine months ended September 30, 2009, the allocated amount is \$28 million and \$36 million, respectively. Income tax expense for the third quarter of 2009 also was impacted unfavorably by a charge of \$6 million after minority interest, related to various discrete adjustments.

For the first nine months of 2010, we recorded tax expense of \$151 million on income before income taxes of \$153 million. For the first nine months of 2009, we recorded tax expense of \$3 million on a loss before income taxes of \$496 million. Income tax expense for the first nine months of 2009 also was impacted favorably by \$21 million primarily related to a benefit resulting from the settlement of our 1997 through 2003 Competent Authority claim between the United States and Canada.

The difference between our effective tax rate and the U.S. statutory rate was primarily attributable to continuing to maintain a full valuation allowance against our net Federal and state deferred tax assets.

At January 1, 2010, we had unrecognized tax benefits of \$112 million that, if recognized, would have a favorable impact on our tax expense of \$108 million. We had accrued interest of \$17 million as of January 1, 2010. If not favorably settled, \$49 million of the unrecognized tax benefits and \$17 million of the accrued interest would require the use of our cash.

Table of Contents

THE GOODYEAR TIRE & RUBBER COMPANY AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

In the second quarter, our unrecognized tax benefits increased by \$29 million (absent any corresponding future tax refunds and deferred tax assets recorded in the period of \$27 million) related to prior tax years in our European operations. It is reasonably possible that our unrecognized tax benefits may decrease by up to \$50 million during the next 12 months as a consequence of settling prior tax years in Europe. We do not expect changes during the next 12 months to have a significant impact on our financial position or results of operations.

Generally, years beginning after 2004 are still open to examination by foreign taxing authorities, including Germany, where we are open to examinations from 2003 onward. In the United States, we are open to examination from 2009 onward.

NOTE 12. CHANGES IN SHAREHOLDERS' EQUITY

NOTE 13. CONSOLIDATING FINANCIAL INFORMATION

Certain of our subsidiaries have guaranteed Goodyear's obligations under the \$1.0 billion outstanding principal amount of 10.5% senior notes due 2016, the \$1.0 billion outstanding principal amount of 8.25% senior notes due 2020, and the \$282 million outstanding principal amount of 8.75% senior notes due 2020 (collectively, the notes). The following presents the condensed consolidating financial information separately for:

- (i) The Goodyear Tire & Rubber Company (the Parent Company), the issuer of the guaranteed obligations;
- (ii) Guarantor subsidiaries, on a combined basis, as specified in the indentures related to Goodyear's obligations under the notes;
- (iii) Non-guarantor subsidiaries, on a combined basis;
- (iv) Consolidating entries and eliminations representing adjustments to (a) eliminate intercompany transactions between or among the Parent Company, the guarantor subsidiaries and the non-guarantor subsidiaries, (b) eliminate the investments in our subsidiaries, and (c) record consolidating entries; and
- (v) The Goodyear Tire & Rubber Company and Subsidiaries on a consolidated basis.

Each guarantor subsidiary is 100% owned by the Parent Company at the date of each balance sheet presented. The notes are fully and unconditionally guaranteed on a joint and several basis by each guarantor subsidiary. Each entity in the consolidating financial information follows the same accounting policies as described in the consolidated financial statements, except for the use by the Parent Company and guarantor subsidiaries of the equity method of accounting to reflect ownership interests in subsidiaries which are eliminated upon consolidation. Intercompany cash advances and loans made primarily for the purpose of short-term operating needs are included in cash flows from operating activities. Intercompany transactions reported as investing or financing activities include the sale of the capital stock

of various subsidiaries and other capital transactions between members of the consolidated group.

Certain non-guarantor subsidiaries of the Parent Company are restricted from remitting funds to it by means of dividends, advances or loans due to required foreign government and/or currency exchange board approvals or restrictions in credit agreements or other debt instruments of those subsidiaries.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**

All per share amounts are diluted and refer to Goodyear net income (loss)

OVERVIEW

The Goodyear Tire & Rubber Company is one of the world's leading manufacturers of tires, with one of the most recognizable brand names in the world and operations in most regions of the world. We have a broad global footprint with 56 manufacturing facilities in 22 countries, including the United States. We operate our business through four operating segments representing our regional tire businesses: North American Tire; Europe, Middle East and Africa Tire (EMEA); Latin American Tire; and Asia Pacific Tire.

We continued to experience improving industry conditions in the third quarter of 2010 as global economic conditions continued to recover, resulting in increased motor vehicle sales and production and increased demand for replacement tires compared to the third quarter of 2009. As a result, tire unit volumes in the third quarter of 2010 increased by approximately 6% compared to the third quarter of 2009 and our plant capacity utilization continued to improve, resulting in lower under-absorbed fixed overhead costs. Price and product mix improved in the third quarter of 2010, with global revenue per tire, excluding the impact of foreign currency translation, increasing by approximately 8% compared to the prior year period. Our price and product mix improvements are driven by our innovative new product engine, our selective focus on profitable growth opportunities and pricing actions. However, raw material costs, particularly for natural rubber, have risen rapidly and remain volatile and are expected to continue their upward trend. Furthermore, global tire industry demand remains below its historic levels in North America and Europe.

Net sales were \$4,962 million in the third quarter of 2010, compared to \$4,385 million in the third quarter of 2009. Net sales increased due to improved price and product mix, higher tire volume globally, and an increase in other tire-related businesses, primarily in North American Tire's third-party sales of chemical products.

Net sales were \$13,760 million in the first nine months of 2010, compared to \$11,864 million in the first nine months of 2009. Net sales increased due to higher tire volume globally, an increase in other tire-related businesses, primarily in North American Tire's third-party sales of chemical products, improved price and product mix, and favorable foreign currency translation, primarily in Asia Pacific Tire.

In the third quarter of 2010, Goodyear net loss was \$20 million, or \$0.08 per share, compared to Goodyear net income of \$72 million, or \$0.30 per share, in the third quarter of 2009. Our total segment operating income for the third quarter of 2010 was \$234 million, compared to \$275 million in the third quarter of 2009. The \$41 million decrease in segment operating income was due primarily to higher raw material costs of \$381 million, net of cost savings, which were partially offset by improved price and product mix of \$252 million and lower conversion costs. See Results of Operations Segment Information for additional information.

In the first nine months of 2010, Goodyear net loss was \$39 million, or \$0.16 per share, compared to \$482 million, or \$2.00 per share, in the first nine months of 2009. Our total segment operating income for the first nine months of 2010 was \$693 million, compared to \$123 million in the first nine months of 2009. The \$570 million increase in segment operating income was due primarily to improved price and product mix, which more than offset increased raw material costs, lower conversion costs, and higher tire volume which were partially offset by higher selling, administrative and general expense. See Results of Operations Segment Information for additional information.

At September 30, 2010, we had \$1,665 million in Cash and cash equivalents as well as \$2,357 million of unused availability under our various credit agreements, compared to \$1,922 million and \$2,567 million, respectively, at December 31, 2009. The cash and cash equivalents decrease from December 31, 2009 was driven by capital expenditures of \$618 million during the period and the remeasurement loss of \$185 million on our cash in Venezuela. These decreases were partially offset by \$426 million of net borrowing activities and \$83 million of operating cash flows. See Liquidity and Capital Resources for additional information.

In the first nine months of 2010, we had aggregate cost savings of approximately \$350 million, including approximately \$70 million in the third quarter of 2010. These cost savings consisted of continuous improvement initiatives, including cost savings under our master labor agreement with the United Steelworkers union (USW), increased low-cost country sourcing, and initiatives to reduce raw material costs and selling, administrative and

general expense, including approximately \$31 million of raw material cost savings in the third quarter. We also have announced high-cost capacity reductions of approximately 9 million units.

Raw material prices, particularly for natural rubber, have risen rapidly during the third quarter of 2010. As a result, we expect fourth quarter raw material costs to be more than previously anticipated. We now expect fourth quarter 2010 raw material costs to increase by at least 35% compared with the fourth quarter of 2009. In order to mitigate some of the impact of high and volatile natural rubber prices, we are continuing to focus on price and product mix, to substitute synthetic rubber for natural rubber where possible and to work to identify additional substitution opportunities, to reduce the amount of natural rubber required in each tire, and to pursue alternative raw materials including innovative bio-based materials. However, during periods of rapidly rising raw material costs, we may not be able to fully offset those raw material cost increases through the use of these strategies, although we remain confident in our ability to do so over the longer term.

We have also updated our outlook for the industry for 2010. In North America, we now expect consumer replacement to increase approximately 4% and consumer original equipment (OE) to increase approximately 30%. We continue to expect North American commercial replacement to increase approximately 15% and now expect commercial OE to increase approximately 25%. In Europe, we now expect consumer replacement to increase approximately 5% and consumer OE to increase approximately 10%. For European commercial tires, we now expect replacement to increase approximately 15% and OE to increase approximately 65%. The net impact of higher volume in 2010 will continue to have a positive impact; however, product mix may be adversely impacted by the stronger anticipated recovery in OE than in replacement.

See Forward-Looking Information Safe Harbor Statement for a discussion of our use of forward-looking statements in this Form 10-Q.

Table of Contents**RESULTS OF OPERATIONS****CONSOLIDATED*****Three Months Ended September 30, 2010 and 2009***

Net sales in the third quarter of 2010 were \$4,962 million, increasing \$577 million, or 13.2%, from \$4,385 million in the third quarter of 2009. Goodyear net loss was \$20 million, or \$0.08 per share, in the third quarter of 2010, compared to Goodyear net income of \$72 million, or \$0.30 per share, in the third quarter of 2009.

Net sales in the third quarter of 2010 were favorably impacted by improved price and product mix of \$303 million, increased tire volume globally of \$211 million, and an increase in other tire-related businesses sales of \$137 million, primarily in North American Tire. These were partially offset by unfavorable foreign currency translation of \$88 million.

Worldwide tire unit sales in the third quarter of 2010 were 47.7 million units, increasing 2.7 million units, or 6.0%, from 45.0 million units in the third quarter of 2009. Replacement tire volume increased 1.4 million units, or 4.2%, due to improved economic conditions throughout the world. OE tire volume also increased 1.3 million units, or 12.1%, primarily in the consumer markets of North American Tire and Asia Pacific Tire due to improved economic conditions and increased demand for new vehicles.

Cost of goods sold (CGS) in the third quarter of 2010 was \$4,120 million, increasing \$597 million, or 16.9%, from \$3,523 million in the third quarter of 2009. CGS increased due to higher raw material costs of \$381 million, higher tire volume of \$161 million, higher costs in other tire-related businesses of \$130 million, primarily in North American Tire, and product mix-related manufacturing cost increases of \$51 million. CGS benefited from favorable foreign currency translation of \$59 million, primarily in EMEA, lower conversion costs of \$55 million, and savings from rationalization plans of approximately \$16 million. Conversion costs included lower under-absorbed fixed overhead costs of approximately \$75 million due to higher production volume and lower pension expenses of \$25 million. The third quarter of 2010 also included asset write-offs and accelerated depreciation of \$4 million (\$3 million after-tax or \$0.01 per share), compared to \$18 million (\$14 million after-tax or \$0.06 per share) in the 2009 period. The third quarter of 2010 also included additional expenses of \$4 million (\$4 million after-tax or \$0.02 per share) due to a supplier disruption. The third quarter of 2009 included expense of \$5 million (\$5 million after-tax or \$0.02 per share) related to our labor contract with the USW. CGS was 83.0% of sales in the third quarter of 2010, compared to 80.3% in the third quarter of 2009.

Selling, administrative and general expense (SAG) in the third quarter of 2010 was \$640 million, increasing \$23 million, or 3.7%, from \$617 million in the third quarter of 2009. The increase in SAG was primarily driven by increased wages and benefits, including incentive compensation, of \$29 million and higher advertising expenses of \$7 million, which were partially offset by decreased other expenses of \$11 million due primarily to an insurance recovery of \$8 million (\$8 million after-tax or \$0.03 per share), favorable foreign currency translation of \$9 million and savings from rationalization plans of \$7 million. SAG was 12.9% of sales in the third quarter of 2010, compared to 14.1% in the third quarter of 2009.

We recorded net rationalization charges of \$8 million in the third quarter of 2010 (\$7 million after-tax or \$0.03 per share) and \$16 million in the third quarter of 2009 (\$15 million after-tax or \$0.06 per share). Rationalization actions consisted of headcount reductions throughout the Company.

Interest expense in the third quarter of 2010 was \$90 million, increasing \$5 million, or 5.9%, from \$85 million in the third quarter of 2009. The increase related primarily to the issuance in August 2010 of our \$1.0 billion principal amount of 8.25% senior notes due 2020 and borrowings on our European revolving credit facility partially offset by the repayment of our \$500 million senior floating rate notes in December 2009 and our U.S. first lien revolving credit facility in the fourth quarter of 2009. Also increasing interest expense were higher weighted average interest rates.

Other Expense in the third quarter of 2010 was \$62 million, increasing \$58 million from \$4 million in the third quarter of 2009. Financing fees in the third quarter of 2010 were \$63 million which included \$56 million (\$56 million after-tax or \$0.23 per share) related to the redemption of \$973 million of long term debt, of which \$50 million was a cash premium paid on the redemption and \$6 million was financing fees which were written off. Net gains on asset sales were \$2 million in the third quarter of 2010 compared to net gains on asset sales of \$7 million (\$6 million after-tax or \$0.03 per share) in the 2009 period. Net gains in the third quarter of 2009 were due primarily to the sale of

property in Luxembourg. Foreign currency exchange net gains (losses) were a \$5 million loss in the third quarter of 2010

-29-

Table of Contents

compared to a \$6 million gain in the third quarter of 2009. Foreign currency exchange reflected net gains and losses resulting from the effect of exchange rate changes on various foreign currency transactions worldwide. The 2009 period included a loss of \$18 million (\$18 million after-tax or \$0.08 per share) on the liquidation of our subsidiary in Guatemala.

For the third quarter of 2010, we recorded tax expense of \$55 million on income before income taxes of \$42 million. For the third quarter of 2009, we recorded tax expense of \$38 million on income before income taxes of \$140 million. Our income tax expense or benefit is allocated among operations and items charged or credited directly to shareholders' equity. Pursuant to this allocation requirement, for the three months ended September 30, 2010 and 2009, a \$13 million (\$13 million after minority interest or \$0.06 per share) and \$28 million (\$28 million after minority interest or \$0.11 per share), respectively, non-cash tax benefit has been allocated to the loss from our U.S. operations, with an offsetting tax expense allocated to items, primarily attributable to employee benefits, charged directly to shareholders' equity. Income tax expense for the third quarter of 2009 also was impacted unfavorably by a charge of \$6 million (\$6 million after minority interest or \$0.03 per share), related to various discrete adjustments. The difference between our effective tax rate and the U.S. statutory rate was primarily attributable to continuing to maintain a full valuation allowance against our net Federal and state deferred tax assets.

Minority shareholders' net income in the third quarter of 2010 was \$7 million, compared to \$30 million in 2009. The decrease was due primarily to lower earnings in our joint venture in Europe. The 2009 period included a charge of \$9 million (\$0.04 per share) to correct minority shareholders' net income and Goodyear net income for the six months ended June 30, 2009.

Nine Months Ended September 30, 2010 and 2009

Net sales in the first nine months of 2010 were \$13,760 million, increasing \$1,896 million, or 16.0%, from \$11,864 million in the first nine months of 2009. Goodyear net loss was \$39 million, or \$0.16 per share, in the first nine months of 2010, compared to Goodyear net loss of \$482 million, or \$2.00 per share, in the first nine months of 2009.

Net sales in the first nine months of 2010 were favorably impacted by increased tire volume globally of \$914 million, an increase in other tire-related businesses' sales of \$423 million, primarily in North American Tire, improved price and product mix of \$422 million, and foreign currency translation of \$99 million, primarily in Asia Pacific Tire.

Worldwide tire unit sales in the first nine months of 2010 were 135.5 million units, increasing 12.1 million units, or 9.8%, from 123.4 million units in the first nine months of 2009. Replacement tire volume increased 3.9 million units, or 4.1%, due to improved economic conditions throughout the world. OE tire volume also increased 8.2 million units, or 29.5%, primarily in the consumer markets of North American Tire and EMEA due to improved economic conditions and increased demand for new vehicles.

CGS in the first nine months of 2010 was \$11,262 million, increasing \$1,167 million, or 11.6%, from \$10,095 million in the first nine months of 2009. CGS increased due to higher tire volume of \$756 million, higher costs in other tire-related businesses of \$383 million, primarily in North American Tire, higher raw material costs of \$152 million, and foreign currency translation of \$108 million, primarily in Asia Pacific Tire. CGS benefited from decreased conversion costs of \$198 million and savings from rationalization plans of approximately \$80 million. Conversion costs included lower under-absorbed fixed overhead costs of approximately \$213 million due to higher production volume. The first nine months of 2010 also included asset write-offs and accelerated depreciation of \$13 million (\$10 million after-tax or \$0.04 per share), compared to \$40 million (\$35 million after-tax or \$0.15 per share) in the 2009 period. CGS was 81.8% of sales in the first nine months of 2010, compared to 85.1% in the first nine months of 2009.

SAG in the first nine months of 2010 was \$1,915 million, increasing \$151 million, or 8.6%, from \$1,764 million in the first nine months of 2009. The increase in SAG was primarily driven by increased wages and benefits of \$56 million that included incentive compensation of \$32 million, higher advertising expenses of \$32 million, unfavorable foreign currency translation of \$19 million, and increased other expense of \$20 million due primarily to increased general and product liability expense of \$17 million in North American Tire, which were partially offset by savings from rationalization plans of \$14 million. SAG was 13.9% of sales in the first nine months of 2010, compared

to 14.9% in the first nine months of 2009.

We recorded net rationalization charges of \$16 million (\$13 million after-tax or \$0.05 per share) in the first nine months of 2010. Rationalization actions initiated in 2010 consisted of the closure of a high-cost tire manufacturing facility in Taipei, Taiwan and the consolidation of multiple warehouses in North American Tire to improve our supply chain.

We recorded net rationalization charges of \$207 million (\$165 million after-tax or \$0.68 per share) in the first nine months of 2009. Rationalization actions in 2009 primarily consisted of manufacturing headcount reductions throughout the Company.

-30-

Table of Contents

Upon completion of the 2010 plans, we estimate that annual operating costs will be reduced by approximately \$13 million in CGS and \$4 million in SAG. The savings realized in 2010 for the 2009 and prior years plans totaled \$94 million of which \$80 million was in CGS and \$14 million was in SAG. For further information, refer to the Note to the Consolidated Financial Statements No. 2, Costs Associated with Rationalization Programs.

Interest expense in the first nine months of 2010 was \$241 million, increasing \$13 million, or 5.7%, from \$228 million in the first nine months of 2009. The increase related primarily to the issuance in May 2009 of our \$1.0 billion principal amount of 10.5% senior notes due 2016 and the issuance in August 2010 of our \$1.0 billion principal amount of 8.25% senior notes due 2020 partially offset by the repayment of our \$500 million senior floating rate notes in December 2009, the repayment of our European revolving credit facility in the second quarter of 2009 and the repayment of our U.S. first lien revolving credit facility in the fourth quarter of 2009. Also increasing interest expense were higher weighted average interest rates.

Other Expense in the first nine months of 2010 was \$173 million, increasing \$107 million from \$66 million in the first nine months of 2009. The 2010 period included a first quarter loss of \$110 million (\$99 million after-tax or \$0.41 per share) resulting from the January 8, 2010 devaluation of the Venezuelan bolivar fuerte against the U.S. dollar and the establishment of a two-tier exchange structure for essential and non-essential goods. Foreign currency exchange also reflected net gains and losses resulting from the effect of exchange rate changes on various foreign currency transactions worldwide. The 2009 period included a loss of \$18 million (\$18 million after-tax or \$0.08 per share) on the liquidation of our subsidiary in Guatemala.

Effective January 1, 2010, Venezuela's economy was considered to be highly inflationary under U.S. generally accepted accounting principles since it experienced a rate of general inflation in excess of 100% over the latest three year period, based upon the blended Consumer Price Index and National Consumer Price Index. Accordingly, the U.S. dollar was determined to be the functional currency of our Venezuelan subsidiary. All gains and losses resulting from the remeasurement of its financial statements are determined using official exchange rates and are reported in Other Expense.

The \$110 million foreign currency exchange loss primarily consisted of a \$157 million remeasurement loss on bolivar-denominated net monetary assets and liabilities including deferred taxes at the time of the devaluation. The loss was primarily related to cash deposits in Venezuela that were remeasured at the official exchange rate applicable to non-essential goods, and was partially offset by \$47 million related to U.S. dollar-denominated payables that will be settled at the official exchange rate applicable to essential goods. Nonmonetary assets and liabilities which consisted primarily of inventory and property, plant and equipment were translated at historical rates.

Financing fees in the first nine months of 2010 of \$83 million included \$56 million related to the redemption of \$973 million of long term debt, of which \$50 million was a cash premium paid on the redemption and \$6 million was financing fees which were written off.

Net gains on asset sales were \$26 million (\$17 million after-tax or \$0.07 per share) in the first nine months of 2010 compared to net losses on asset sales of \$33 million (\$32 million after-tax or \$0.13 per share) in the 2009 period. Net gains in the first nine months of 2010 related primarily to the sale of land in Thailand and the recognition of a deferred gain from the sale of a warehouse in Guatemala in 2008. Net losses in the first nine months of 2009 were due primarily to the sale of certain of our properties in Akron, Ohio that comprise our current headquarters in connection with the development of a proposed new headquarters in Akron, Ohio.

For the first nine months of 2010 we recorded tax expense of \$151 million on income before income taxes of \$153 million. For the first nine months of 2009 we recorded tax expense of \$3 million on a loss before income taxes of \$496 million. Our income tax expense or benefit is allocated among operations and items charged or credited directly to shareholders' equity. Pursuant to this allocation requirement, for the nine months ended September 30, 2010 and 2009, a \$17 million (\$17 million after minority interest or \$0.07 per share) and \$36 million (\$36 million after minority interest or \$0.15 per share), respectively, non-cash tax benefit has been allocated to the loss from our U.S. operations, with offsetting tax expense allocated to items, primarily attributable to employee benefits, charged directly to shareholders' equity. Income tax expense for the first nine months of 2009 also was impacted favorably by \$21 million (\$22 million after minority interest or \$0.09 per share) primarily related to a benefit resulting from the settlement of our 1997 through 2003 Competent Authority claim between the United States and Canada. The

difference between our effective tax rate and the U.S. statutory rate was primarily attributable to continuing to maintain a full valuation allowance against our net Federal and state deferred tax assets.

-31-

Table of Contents

Our losses in various taxing jurisdictions in recent periods represented sufficient negative evidence to require us to maintain a full valuation allowance against certain of our net deferred tax assets. However, in certain foreign locations, it is reasonably possible that sufficient positive evidence required to release all, or a portion, of these valuation allowances within the next 12 months will exist, resulting in possible one-time tax benefits of up to \$20 million (\$20 million net of minority interest). For further information, refer to the Note to the Consolidated Financial Statements No. 11, Income Taxes.

Minority shareholders' net income in the first nine months of 2010 was \$41 million, compared to a net loss of \$17 million in 2009. The increase was due primarily to higher earnings in our joint venture in Europe.

SEGMENT INFORMATION

Segment information reflects our strategic business units (SBU's), which are organized to meet customer requirements and global competition and are segmented on a regional basis.

Results of operations are measured based on net sales to unaffiliated customers and segment operating income. Each segment exports tires to other segments. The financial results of each segment exclude sales of tires exported to other segments, but include operating income derived from such transactions. Segment operating income is computed as follows: Net Sales less CGS (excluding asset write-off and accelerated depreciation charges) and SAG (including certain allocated corporate administrative expenses). Segment operating income also includes certain royalties and equity in earnings of most affiliates. Segment operating income does not include net rationalization charges (credits), asset sales and certain other items.

Total segment operating income in the third quarter of 2010 was \$234 million, decreasing \$41 million from \$275 million in the third quarter of 2009. Total segment operating margin (segment operating income divided by segment sales) in the third quarter of 2010 was 4.7%, compared to 6.3% in the third quarter of 2009.

Total segment operating income in the first nine months of 2010 was \$693 million, increasing \$570 million from \$123 million in the first nine months of 2009. Total segment operating margin in the first nine months of 2010 was 5.0%, compared to 1.0% in the first nine months of 2009.

Management believes that total segment operating income is useful because it represents the aggregate value of income created by our SBUs and excludes items not directly related to the SBUs for performance evaluation purposes. Total segment operating income is the sum of the individual SBUs' segment operating income. Refer to the Note to the Consolidated Financial Statements No. 10, Business Segments, for further information and for a reconciliation of total segment operating income to Income (Loss) before Income Taxes.

Table of Contents**North American Tire**

<i>(In millions)</i>	Three Months Ended September 30,				Nine Months Ended September 30,

Operating Income (Loss)	5	2	3	>100%	7	(278)	285	
Operating Margin	0.2%	0.1%			0.1%	(5.5)%		

Three Months Ended September 30, 2010 and 2009

North American Tire unit sales in the third quarter of 2010 increased 0.9 million units, or 4.8%, to 18.0 million units. The increase was driven by higher sales in both replacement and OE in our consumer and commercial businesses. OE tire volume increased 0.5 million units, or 11.8%, due primarily to increased consumer vehicle production.

Replacement volume increased 0.4 million units, or 2.9%, due primarily to higher consumer branded product sales.

Net sales in the third quarter of 2010 were \$2,176 million, increasing \$314 million, or 16.9%, from \$1,862 million in the third quarter of 2009. The increase was due primarily to higher sales in other tire-related businesses of \$143 million driven by an increase in the volume and price of third-party sales of chemical products, improved price and product mix of \$99 million, increased tire volume of \$63 million and favorable foreign currency translation of \$8 million.

Operating income in the third quarter of 2010 was \$5 million compared to \$2 million in the third quarter of 2009. The quarter benefited from lower conversion costs of \$35 million, higher tire sales volume of \$11 million, and lower transportation costs of \$7 million. Raw material costs increased \$148 million, which were partially offset by improved price and product mix of \$96 million. The decrease in conversion costs was driven by lower under-absorbed fixed overhead costs of approximately \$31 million due to higher production volume. Though lower pension expense of \$25 million and lower expense of \$5 million (\$5 million after-tax or \$0.02 per share) related to our USW contract decreased conversion costs, that favorable impact was offset by increased profit sharing benefit costs associated with the USW contract, general inflation, and costs associated with ramping up production levels in our tire plants. Conversion costs and SAG expenses also included savings from rationalization plans of \$12 million and \$1 million, respectively.

Operating income in the third quarter of 2010 excluded net rationalization charges of \$1 million and net gains on asset sales of \$1 million. Operating income in the third quarter of 2009 excluded net rationalization charges of \$13 million, gains on asset sales of \$3 million, and asset write-offs and accelerated depreciation of \$3 million.

Nine Months Ended September 30, 2010 and 2009

North American Tire unit sales in the first nine months of 2010 increased 4.0 million units, or 8.8%, to 49.8 million units. The increase was due primarily to an increase in OE tire volume of 3.4 million units, or 38.0%, primarily in our consumer business driven by increased vehicle production. Replacement volume also increased 0.6 million units, or 1.8%, due primarily to higher consumer branded product sales.

Net sales in the first nine months of 2010 were \$6,004 million, increasing \$911 million, or 17.9%, from \$5,093 million in the first nine months of 2009. The increase was due primarily to higher sales in other tire-related businesses of \$443 million, driven by an increase in the volume and price of third-party sales of chemical products, increased tire volume of \$313 million, improved price and product mix of \$117 million, and favorable foreign currency translation of \$34 million.

Operating income in the first nine months of 2010 was \$7 million, improving \$285 million from a loss of \$278 million in the first nine months of 2009. Price and product mix improved \$146 million, which more than offset raw material price increases of \$15 million. Operating income also benefited from lower conversion costs of \$97 million, increased operating income in our other tire-related businesses of \$32 million, primarily related to sales of chemical products, higher tire volume of \$31 million, and lower transportation costs of \$17 million. The decrease in

conversion costs was driven by lower under-absorbed fixed overhead costs of approximately \$81 million due to higher production volume, and lower pension expense of \$7 million. Increased general and product liability expense of \$17 million negatively impacted the first nine months of 2010. Conversion costs and SAG expenses also included savings from rationalization plans of \$53 million and \$5 million, respectively.

-33-

Table of Contents

Operating income in the first nine months of 2010 excluded net rationalization charges of \$6 million, net gains on asset sales of \$2 million, and asset write-offs and accelerated depreciation of \$1 million. The operating loss in the first nine months of 2009 excluded net rationalization charges of \$102 million, asset write-offs and accelerated depreciation of \$14 million, and gains on asset sales of \$3 million.

Europe, Middle East and Africa Tire

<i>(In millions)</i>	Three Months Ended September 30,				Nine Months Ended September 30,			
	2010	2009	Change	Percent Change	2010	2009	Change	Percent Change
Tire Units	19.1	17.8	1.3	7.2%	54.3	49.8	4.5	8.9%
Net Sales	\$1,696	\$1,581	\$115	7.3%	\$4,680	\$4,242	\$438	10.3%
Operating Income	77	106	(29)	(27.4)%	259	41	218	>100%
Operating Margin	4.5%	6.7%			5.5%	1.0%		

Three Months Ended September 30, 2010 and 2009

Europe, Middle East and Africa Tire unit sales in the third quarter of 2010 increased 1.3 million units, or 7.2%, to 19.1 million units. Replacement tire volume increased 0.9 million units, or 6.3%, primarily in consumer as a result of improved economic conditions, while OE tire volume increased 0.4 million units, or 10.9%, primarily in our consumer business driven by increased vehicle production.

Net sales in the third quarter of 2010 were \$1,696 million, increasing \$115 million, or 7.3%, from \$1,581 million in the third quarter of 2009. Net sales increased due primarily to improved price and product mix of \$119 million and higher tire volume of \$101 million. These increases were partially offset by unfavorable foreign currency translation of \$100 million and decreased sales in other tire-related businesses of \$15 million, primarily in retail.

Operating income in the third quarter of 2010 was \$77 million, decreasing \$29 million from \$106 million in the third quarter of 2009. Operating income decreased due primarily to higher raw material costs of \$154 million, which were partially offset by improved price and product mix of \$60 million, and increased SAG expenses of \$11 million due primarily to increased wages and benefits of \$10 million. These increases were partially offset by lower conversion costs of \$50 million and higher tire volume of \$29 million. Conversion costs included lower under-absorbed fixed overhead costs of approximately \$32 million due to higher production volume. Conversion costs and SAG expenses also included savings from rationalization plans of \$1 million and \$3 million, respectively. Operating income also included the impact of a strike in South Africa of \$3 million (\$3 million after-tax or \$0.01 per share) in the third quarter of 2010.

Operating income in the third quarter of 2010 excluded net rationalization charges of \$5 million. Operating income in the third quarter of 2009 excluded net gains on asset sales of \$4 million, and net rationalization charges of \$1 million.

Nine Months Ended September 30, 2010 and 2009

Europe, Middle East and Africa Tire unit sales in the first nine months of 2010 increased 4.5 million units, or 8.9%, to 54.3 million units. Replacement tire volume increased 1.7 million units, or 4.1%, in consumer and commercial replacement as a result of improved economic conditions, while OE tire volume increased 2.8 million units, or 29.4%, primarily in our consumer business driven by increased vehicle production.

Net sales in the first nine months of 2010 were \$4,680 million, increasing \$438 million, or 10.3%, from \$4,242 million in the first nine months of 2009. Net sales increased due primarily to higher tire volume of \$333 million and improved price and product mix of \$188 million. These increases were partially offset by unfavorable foreign currency translation of \$71 million and decreased sales in other tire-related businesses of \$38 million, primarily in retail.

Operating income in the first nine months of 2010 was \$259 million, increasing \$218 million from \$41 million in the first nine months of 2009. Operating income increased due primarily to lower conversion costs of \$132 million, higher tire volume of \$82 million, improved price and product mix of \$46 million which more than offset higher raw

material costs of \$24 million, and decreased other costs of \$11 million due primarily to lower transportation costs. These were partially offset by an increase in SAG expenses of \$28 million due primarily to increased advertising expenses of \$18 million,

-34-

Table of Contents

increased incentive compensation of \$5 million and increased warehousing costs of \$5 million. Conversion costs included lower under-absorbed fixed overhead costs of approximately \$84 million due to higher production volume. Conversion costs and SAG expenses also included savings from rationalization plans of \$9 million and \$6 million, respectively. Operating income also included the impact of a strike in South Africa of \$3 million in 2010.

Operating income in the first nine months of 2010 excluded the reversal of net rationalization charges of \$2 million, net gains on asset sales of \$1 million, and accelerated depreciation of \$1 million. Operating income in the first nine months of 2009 excluded net rationalization charges of \$81 million, net gains on asset sales of \$1 million, and accelerated depreciation of \$1 million.

Latin American Tire

<i>(In millions)</i>	Three Months Ended September 30,				Nine Months Ended September 30,			
	2010	2009	Change	Percent Change	2010	2009	Change	Percent Change
Tire Units	5.2	5.0	0.2	4.4%	15.5	13.8	1.7	12.1%
Net Sales	\$ 569	\$ 486	\$ 83	17.1%	\$ 1,576	\$ 1,306	\$ 270	20.7%
Operating Income	95	99	(4)	(4.0)%	237	220	17	7.7%
Operating Margin	16.7%	20.4%			15.0%	16.8%		

Three Months Ended September 30, 2010 and 2009

Latin American Tire unit sales in the third quarter of 2010 increased 0.2 million units, or 4.4%, to 5.2 million units. OE tire volume increased 11.4%, primarily in consumer as a result of increased vehicle production, while replacement tire volume increased 1.1%, primarily in commercial due to increased market share.

Net sales in the third quarter of 2010 were \$569 million, increasing \$83 million, or 17.1%, from \$486 million in the third quarter of 2009. Net sales increased due primarily to improved price and product mix of \$82 million and higher tire volume of \$18 million. These increases were partially offset by unfavorable foreign currency translation of \$26 million which included \$52 million related to the devaluation of the Venezuelan bolivar fuerte.

Operating income in the third quarter of 2010 was \$95 million, decreasing \$4 million, or 4.0%, from \$99 million in the third quarter of 2009. Operating income decreased due primarily to unfavorable foreign currency translation of \$19 million, an increase in other expenses of \$14 million, primarily lower profitability on intersegment transfers of \$9 million and transportation costs of \$5 million, and increased SAG expenses of \$6 million, due primarily to higher wages and benefits of \$7 million. These decreases were partially offset by improved price and product mix of \$73 million which more than offset increased raw material costs of \$44 million, lower conversion costs of \$4 million, and higher tire volume of \$2 million. Conversion costs included lower under-absorbed fixed overhead costs of \$10 million due to increased production volume. Conversion costs and SAG expenses also included savings from rationalization plans of \$2 million and \$3 million, respectively. The devaluation of the Venezuelan bolivar fuerte, weak economic conditions and operational disruptions in Venezuela reduced operating income by approximately \$24 million compared to the third quarter of 2009.

Operating income in the third quarter of 2010 excluded net rationalization charges of \$1 million. Operating income in the third quarter of 2009 excluded net rationalization charges of \$2 million.

Nine Months Ended September 30, 2010 and 2009

Latin American Tire unit sales in the first nine months of 2010 increased 1.7 million units, or 12.1%, to 15.5 million units. Replacement tire volume increased 1.0 million units, or 10.3%, primarily in consumer replacement as a result of improved economic conditions, while OE tire volume increased 0.7 million units, or 16.0%, primarily in our consumer business due to increased vehicle production.

Net sales in the first nine months of 2010 were \$1,576 million, increasing \$270 million, or 20.7%, from \$1,306 million in the first nine months of 2009. Net sales increased due primarily to higher tire volume of \$131 million and improved price and product mix of \$121 million. The devaluation of the Venezuelan bolivar fuerte reduced net sales by \$152 million compared to the first nine months of 2009 which was partially offset by favorable foreign currency translation of \$148 million in other countries within the region.

Table of Contents

Operating income in the first nine months of 2010 was \$237 million, increasing \$17 million, or 7.7%, from \$220 million in the first nine months of 2009. Operating income increased due primarily to improved price and product mix of \$110 million which more than offset increased raw material costs of \$52 million, lower conversion costs of \$24 million, and higher tire volume of \$19 million. These increases were partially offset by unfavorable foreign currency translation of \$38 million, increased other expenses of \$29 million due primarily to lower profitability on intersegment transfers of \$13 million and increased transportation costs of \$9 million, and higher SAG expenses of \$19 million due primarily to higher wages and benefits of \$11 million and warehousing costs of \$5 million. Conversion costs included lower under-absorbed fixed overhead costs of \$36 million due to increased production volume. Conversion costs and SAG expenses also included savings from rationalization plans of \$4 million and \$3 million, respectively.

Operating income in the first nine months of 2010 excluded net gains on asset sales of \$7 million and net rationalization charges of \$4 million. Operating income in the first nine months of 2009 excluded net rationalization charges of \$16 million and net gains on asset sales of \$1 million.

Goodyear Venezuela contributed a significant portion of Latin American Tire's sales and operating income in 2009. The devaluation of the Venezuelan bolivar fuerte against the U.S. dollar in January 2010 and weak economic conditions and operational disruptions in Venezuela reduced Latin American Tire's operating income by approximately \$84 million in the first nine months of 2010. The \$110 million remeasurement loss is included in Other Expense and, therefore, not included in segment operating income. For further information see Item 1. Business Recent Developments Venezuelan Currency Devaluation and Item 1A. Risk Factors in our 2009 Form 10-K, and Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Overview below.

Asia Pacific Tire

<i>(In millions)</i>	Three Months Ended September 30,				Nine Months Ended September 30,			
	2010	2009	Change	Percent Change	2010	2009	Change	Percent Change
Tire Units	5.4	5.1	0.3	7.8%	15.9	14.0	1.9	13.9%
Net Sales	\$ 521	\$ 456	\$ 65	14.3%	\$1,500	\$1,223	\$277	22.6%
Operating Income	57	68	(11)	(16.2)%	190	140	50	35.7%
Operating Margin	10.9%	14.9%			12.7%	11.4%		

Three Months Ended September 30, 2010 and 2009

Asia Pacific Tire unit sales in the third quarter of 2010 increased 0.3 million units, or 7.8%, to 5.4 million units. Replacement tire volume increased 0.1 million units, or 3.1%, primarily in consumer replacement as a result of improved economic conditions, while OE tire volume increased 0.2 million units, or 15.3%, primarily in our consumer business due to increased vehicle production.

Net sales in the third quarter of 2010 were \$521 million, increasing \$65 million, or 14.3%, from \$456 million in the third quarter of 2009. Net sales increased due primarily to favorable foreign currency translation of \$30 million and higher tire volume of \$29 million.

Operating income in the third quarter of 2010 was \$57 million, decreasing \$11 million, or 16.2%, from \$68 million in the third quarter of 2009. Operating income decreased due primarily to increased raw material costs of \$35 million, which were partially offset by improved price and product mix of \$23 million, and higher SAG expenses of \$8 million. SAG increased due primarily to higher advertising costs and compensation expenses. The decrease in operating income was partially offset by increased tire volume of \$8 million.

Operating income in the third quarter of 2010 excluded asset write-offs and accelerated depreciation of \$4 million, net rationalization charges of \$1 million, and net gains on asset sales of \$1 million. Operating income in the third quarter of 2009 excluded asset write-offs and accelerated depreciation of \$15 million.

Table of Contents

Nine Months Ended September 30, 2010 and 2009

Asia Pacific Tire unit sales in the first nine months of 2010 increased 1.9 million units, or 13.9%, to 15.9 million units. Replacement tire volume increased 0.6 million units, or 6.8%, primarily in consumer replacement as a result of improved economic conditions, while OE tire volume increased 1.3 million units, or 26.6%, primarily in our consumer business due to increased vehicle production.

Net sales in the first nine months of 2010 were \$1,500 million, increasing \$277 million, or 22.6%, from \$1,223 million in the first nine months of 2009. Net sales increased due primarily to favorable foreign currency translation of \$140 million and higher tire volume of \$137 million.

Operating income in the first nine months of 2010 was \$190 million, increasing \$50 million, or 35.7%, from \$140 million in the first nine months of 2009. Operating income increased due primarily to improved price and product mix of \$72 million which more than offset increased raw materials costs of \$61 million, higher tire volume of \$26 million, lower conversion costs of \$19 million, and favorable foreign currency translation of \$16 million. These increases were partially offset by higher SAG expenses of \$23 million due primarily to higher advertising costs and compensation expenses. Conversion costs included savings of \$14 million from rationalization plans and lower under-absorbed fixed overhead costs of \$12 million due to increased production volume, which more than offset other increases of \$7 million.

Operating income in the first nine months of 2010 excluded net gains on asset sales of \$16 million, asset write-offs and accelerated depreciation of \$11 million, and net rationalization charges of \$9 million. Operating income in the first nine months of 2009 excluded asset write-offs and accelerated depreciation of \$25 million, net rationalization charges of \$6 million, and net gains on asset sales of \$5 million.

-37-

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES**

Our primary sources of liquidity are cash generated from our operating and financing activities. Our cash flows from operating activities are driven primarily by our operating results and changes in our working capital requirements and our cash flows from financing activities are dependent upon our ability to access credit or other capital.

We continued to experience improving industry conditions in the third quarter of 2010 as global economic conditions continued to recover, resulting in increased motor vehicle sales and production and increased demand for replacement tires compared to the third quarter of 2009. However, raw material costs, particularly for natural rubber, have risen rapidly and remain volatile and are expected to continue their upward trend. Furthermore, global tire industry demand remains below its historic levels in North America and Europe.

In the first nine months of 2010, we had net cash provided by operating activities of \$83 million. Operating cash flow in 2010 was favorably impacted by improved net income offset by an increase in trade working capital primarily driven by the increase in sales.

At September 30, 2010, we had \$1,665 million in Cash and cash equivalents, compared to \$1,922 million at December 31, 2009. The cash and cash equivalents decrease from December 31, 2009 was driven by capital expenditures of \$618 million during the period and the remeasurement loss of \$185 million on our cash in Venezuela. These decreases were partially offset by \$426 million of net borrowing activities and \$83 million of operating cash flows.

At September 30, 2010, we had \$2,357 million of unused availability under our various credit agreements, compared to \$2,567 million at December 31, 2009. The table below provides unused availability under our credit facilities at those dates:

<i>(In millions)</i>	September 30, 2010	December 31, 2009
\$1.5 billion first lien revolving credit facility due 2013	\$ 995	\$ 892
505 million revolving credit facility due 2012	539	712
Chinese credit facilities	459	530
Other domestic and international debt	134	124
Notes payable and overdrafts	230	309
	\$ 2,357	\$ 2,567

At September 30, 2010, our unused availability included \$459 million which can only be used to finance the relocation and expansion of our manufacturing facilities in China. These credit facilities, along with government grants, should provide funding for most of the cost related to the relocation and expansion of these manufacturing facilities. There were \$81 million of borrowings outstanding under these credit facilities at September 30, 2010.

We have deposited our cash and cash equivalents and entered into various credit agreements and derivative contracts with financial institutions that we considered to be substantial and creditworthy at the time of such transactions. We seek to control our exposure to these financial institutions by diversifying our deposits, credit agreements and derivative contracts across multiple financial institutions, by setting deposit and counterparty credit limits based on long term credit ratings and other indicators of credit risk such as credit default swap spreads, and by monitoring the financial strength of these financial institutions on a regular basis. We also enter into master netting agreements with counterparties when possible. By controlling and monitoring exposure to financial institutions in this manner, we believe that we effectively manage the risk of loss due to nonperformance by a financial institution. However, we cannot provide assurance that we will not experience losses or delays in accessing our deposits or lines of credit due to the nonperformance of a financial institution. Our inability to access our cash deposits or make draws on our lines of credit, or the inability of a counterparty to fulfill its contractual obligations to us, could have a material adverse effect on our liquidity, financial position or results of operations in the period in which it occurs.

In 2010, we expect our operating needs to include working capital increases of approximately \$200 million, global contributions to our funded pension plans of approximately \$300 million to \$325 million, and our investing needs to include capital expenditures of approximately \$1.0 billion to \$1.1 billion. We also now expect interest expense to be approximately \$325 million.

In August 2010, we issued \$1.0 billion aggregate principal amount of 8.25% senior notes due 2020. We used the net proceeds from the offerings of those notes, together with available cash, to redeem \$973 million aggregate principal amount of outstanding notes on September 29, 2010, including \$713 million of notes due in 2011 and \$260 million of notes due in 2015. As a result of these transactions, we have paid off all of our material debt maturities due in 2011.

Table of Contents

On June 25, 2010, the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010 (the Pension Relief Act) was signed into law. The Pension Relief Act provides funding relief for defined benefit pension plan sponsors by deferring near-term contributions. As allowed by the Pension Relief Act, we elected funding relief for the 2009 plan year and expect to elect funding relief for the 2011 plan year, which is expected to reduce our total U.S. pension contributions in 2011 to 2014 by approximately \$275 million to \$325 million. We currently estimate that we will be required to make contributions to our funded U.S. pension plans of approximately \$175 million to \$225 million in 2011. The reduction from funding relief will result in increased contributions in years after 2014.

Sumitomo Rubber Industries, Ltd. (SRI) has certain minority exit rights that, if triggered and exercised, could require us to make a substantial payment to acquire SRI's interests in GDTE and Goodyear Dunlop Tires North America, Ltd. (GDTNA) following the determination of the fair value of SRI's interests. For further information regarding our global alliance with SRI, including the events that could trigger SRI's exit rights, see Item 1. Business. Description of Goodyear's Business Global Alliance in our 2009 Form 10-K. As of the date of this filing, SRI has not provided us notice of any exit rights that have become exercisable.

Our ability to service debt and operational requirements is also dependent, in part, on the ability of our subsidiaries to make distributions of cash to various other entities in our consolidated group, whether in the form of dividends, loans or otherwise. In certain countries where we operate, such as Venezuela, transfers of funds into or out of such countries by way of dividends, loans, advances or payments to third-party or affiliated suppliers are generally or periodically subject to certain requirements, such as obtaining approval from the foreign government and/or currency exchange board before net assets can be transferred out of the country. In addition, certain of our credit agreements and other debt instruments limit the ability of foreign subsidiaries to make distributions of cash. Thus, we would have to repay and/or amend these credit agreements and other debt instruments in order to use this cash to service our consolidated debt. Because of the inherent uncertainty of satisfactorily meeting these requirements or limitations, we do not consider the net assets of our subsidiaries, including Goodyear Venezuela, that are subject to such requirements or limitations to be integral to our liquidity or our ability to service our debt and operational requirements.

Effective January 1, 2010, Venezuela's economy was considered to be highly inflationary under U.S. generally accepted accounting principles. Accordingly, the U.S. dollar was determined to be the functional currency of our Venezuelan subsidiary. All gains and losses resulting from the remeasurement of its financial statements are determined using official exchange rates. On January 8, 2010, the Venezuelan government announced the devaluation of the bolivar fuerte against the U.S. dollar and the establishment of a two-tier exchange structure for essential and non-essential goods. For essential goods the official exchange rate is 2.6 bolivares fuertes to the U.S. dollar and for non-essential goods the official exchange rate is 4.3 bolivares fuertes to the U.S. dollar. As a result, we recorded a loss of \$110 million in the first quarter of 2010 in connection with the remeasurement of our balance sheet to reflect the devaluation. Immediately prior to the devaluation, the official exchange rate was 2.15 bolivares fuertes to the U.S. dollar.

If in the future we convert bolivares fuertes at a rate other than the official exchange rates or the official exchange rates are revised, we may realize additional gains or losses that would be recorded in the statement of operations. At September 30, 2010, we had bolivar fuerte denominated monetary assets of \$233 million which consisted primarily of \$164 million of cash, \$54 million of accounts receivable and \$15 million of deferred tax assets, and bolivar fuerte denominated monetary liabilities of \$30 million which consisted primarily of \$11 million of accounts payable trade and \$9 million of compensation and benefits. At December 31, 2009, we had bolivar fuerte denominated monetary assets of \$389 million which consisted primarily of \$369 million of cash, \$11 million of deferred tax assets and \$5 million of accounts receivable, and bolivar fuerte denominated monetary liabilities of \$78 million which consisted primarily of \$29 million of income taxes payable, \$19 million of accounts payable trade, and \$11 million of compensation and benefits. All monetary assets and liabilities were remeasured at 4.3 bolivares fuertes to the U.S. dollar at September 30, 2010, and were translated at 2.15 bolivares fuertes to the U.S. dollar at December 31, 2009.

Goodyear Venezuela's sales were 1.3% and 2.4% of our net sales for the three months ended September 30, 2010 and 2009, respectively, and were 1.1% and 2.6% of our net sales for the nine months ended September 30, 2010 and 2009, respectively. Goodyear Venezuela's operating income was 9.4% and 16.7% of our segment operating income for

the three months ended September 30, 2010 and 2009, respectively. Goodyear Venezuela's operating income was 5.2% and 97.6% of our segment operating income for the nine months ended September 30, 2010 and 2009, respectively. The percentage for the

Table of Contents

nine months ended September 30, 2009 was high due to the operating loss in North American Tire. Goodyear Venezuela's sales are bolivar fuerte denominated and cost of goods sold are approximately 60% bolivar fuerte denominated and approximately 40% U.S. dollar denominated. A 10% increase/(decrease) in each of the official exchange rates would decrease/(increase) Goodyear Venezuela's sales and cost of goods sold on an annual basis by approximately \$25 million and approximately \$10 million, respectively.

During the nine month period ended September 30, 2010 and 2009, Goodyear Venezuela settled \$102 million and \$18 million, respectively, of U.S. dollar denominated intercompany payables and accounts payable trade. For the nine month period ended September 30, 2010, approximately 97% of those payables were settled at the essential goods rate of 2.6 bolivares fuertes to the U.S. dollar and, for the nine month period ended September 30, 2009, 100% were settled at the official rate of 2.15 bolivares fuertes to the U.S. dollar. At September 30, 2010, settlements of U.S. dollar denominated liabilities pending before the currency exchange board were approximately \$133 million of which approximately \$97 million are expected to be settled at 2.6 bolivares fuertes to the U.S. dollar and approximately \$36 million are expected to be settled at 4.3 bolivares fuertes to the U.S. dollar. At September 30, 2010, approximately \$57 million of the requested settlements were pending up to 180 days, approximately \$8 million were pending from 180 to 360 days and approximately \$68 million were pending over one year. Amounts pending up to 180 days include dividends payable of \$17 million and amounts pending over one year include dividends payable of \$14 million. Currency exchange controls in Venezuela continue to limit our ability to remit funds from Venezuela.

Goodyear Venezuela contributed a significant portion of Latin American Tire's sales and operating income in 2009. The devaluation of the Venezuelan bolivar fuerte against the U.S. dollar in January 2010 and weak economic conditions and operational disruptions in Venezuela reduced Latin American Tire's operating income by approximately \$84 million in the first nine months of 2010. The operational challenges we face include high absenteeism, a lack of supplies and difficulties importing raw materials and finished goods. In response to the devaluation and conditions in Venezuela, we continue to evaluate the need to adjust prices for our products while remaining competitive and have taken steps to address our operational challenges, including securing necessary approvals for import licenses and increasing the local production of certain tires. Our pricing policies take into account factors such as fluctuations in raw material cost, production cost, market demand and adherence to government price controls. For a discussion of the risks related to our international operations, including Venezuela, see Item 1A. Risk Factors in our 2009 Form 10-K.

We believe that our liquidity position is adequate to fund our operating and investing needs and debt maturities in 2010 and to provide us with flexibility to respond to further changes in the business environment. If market opportunities exist, we may choose to undertake additional financing actions in order to further enhance our liquidity position which could include obtaining new bank debt or capital markets transactions. However, the challenges of the present business environment may cause a material reduction in our liquidity as a result of an adverse change in our cash flow from operations or our access to credit or other capital. See Item 1A. Risk Factors in our 2009 Form 10-K for a more detailed discussion of these challenges.

Operating Activities

Net cash provided by operating activities was \$83 million in the first nine months of 2010, compared to \$429 million in the first nine months of 2009. Operating cash flow in 2010 was favorably impacted by improved net income. The first nine months of 2010 included a net cash outflow of \$806 million for trade working capital, compared with net cash inflows of \$287 million in 2009. The increase in trade working capital was primarily driven by an increase in accounts receivable due to higher sales.

Investing Activities

Net cash used in investing activities was \$574 million in the first nine months of 2010, compared to \$517 million in the first nine months of 2009. Capital expenditures were \$618 million in the first nine months of 2010, compared to \$502 million in the first nine months of 2009. Investing activities in the first nine months of 2009 included a net cash outflow of \$98 million reflecting funds which were restricted for use in a tender offer to acquire shares of a Polish subsidiary.

Financing Activities

Net cash provided by financing activities was \$396 million in the first nine months of 2010, compared to \$740 million in the first nine months of 2009. This decrease was mainly due to lower borrowings on our revolving credit facilities. Financing activities in 2010 included net proceeds of \$974 million from the issuance of our 8.25% senior notes due 2020. Financing activities in 2009 included net proceeds of \$937 million from the issuance of our 10.5% senior notes due 2016 and \$900 million of borrowings and \$1,039 million of payments under our U.S. and European revolving credit facilities.

Credit Sources

In aggregate, we had total credit arrangements of \$7,807 million available at September 30, 2010, of which \$2,357 million were unused, compared to \$7,579 million available at December 31, 2009, of which \$2,567 million were unused. At September 30, 2010, we had long term credit arrangements totaling \$7,318 million, of which \$2,127 million were unused,

Table of Contents

compared to \$7,046 million and \$2,258 million, respectively, at December 31, 2009. At September 30, 2010, we had short term committed and uncommitted credit arrangements totaling \$489 million, of which \$230 million were unused, compared to \$533 million and \$309 million, respectively, at December 31, 2009. The continued availability of the short term uncommitted arrangements is at the discretion of the relevant lender and may be terminated at any time.

Outstanding Notes

At September 30, 2010, we had \$2,369 million of outstanding notes, compared to \$2,345 million at December 31, 2009.

On March 5, 2010, we completed an offer to exchange our outstanding 7.857% notes due 2011 (2011 Notes) for a new series of 8.75% notes due 2020 (2020 Notes). A total of \$262 million in principal amount of the 2011 Notes were validly tendered, and \$282 million in aggregate principal amount of the 2020 Notes were issued in the exchange.

On August 13, 2010, we issued \$900 million aggregate principal amount of 8.25% senior notes due 2020. These notes were sold at 99.163% of the principal amount at an effective yield of 8.375% and will mature on August 15, 2020. On August 25, 2010, we issued \$100 million aggregate principal amount of additional notes, which were sold at 100.750% of the principal amount at an effective yield of 8.119%. These notes are unsecured senior obligations and are guaranteed by our U.S. and Canadian subsidiaries that also guarantee our obligations under our senior secured credit facilities described below.

On September 29, 2010, we redeemed all of our outstanding 2011 Notes, 8.625% senior notes due 2011, and 9% senior notes due 2015. The aggregate redemption price for these redemptions was \$1,023 million, including a prepayment premium of \$50 million.

For additional information on our outstanding notes, refer to the Note to Consolidated Financial Statements, No. 12, Financing Arrangements and Derivative Financial Instruments, in our 2009 Form 10-K and Note 6, Financing Arrangements in this Form 10-Q.

505 Million Amended and Restated Senior Secured European and German Revolving Credit Facilities due 2012

Our amended and restated 505 million European revolving credit facilities consist of a 155 million German revolving credit facility, which is only available to one of the German subsidiaries (the German borrower) of GDTE, and a 350 million European revolving credit facility, which is available to the same German borrower and to GDTE and certain of its other subsidiaries with a 125 million sublimit for non-German borrowers and a 50 million letter of credit sublimit. Goodyear and its subsidiaries that guarantee our U.S. facilities provide unsecured guarantees to support the European revolving credit facilities and GDTE and certain of its subsidiaries in the United Kingdom, Luxembourg, France and Germany also provide guarantees. GDTE's obligations under the facilities and the obligations of its subsidiaries under the related guarantees are secured by first priority security interests in a variety of collateral. At September 30, 2010, \$54 million (40 million) was outstanding under the German revolving credit facility and \$82 million (60 million) was outstanding under the European revolving credit facility. At December 31, 2009, there were no borrowings under the German or the European revolving credit facilities. Letters of credit issued under the European revolving credit facility totaled \$13 million (10 million) at September 30, 2010 and \$14 million (10 million) at December 31, 2009.

\$1.5 Billion Amended and Restated First Lien Revolving Credit Facility due 2013

Our \$1.5 billion first lien revolving credit facility is available in the form of loans or letters of credit, with letter of credit availability limited to \$800 million. Subject to the consent of the lenders whose commitments are to be increased, we may request that the facility be increased by up to \$250 million. Our obligations under the facility are guaranteed by most of our wholly-owned U.S. and Canadian subsidiaries. Our obligations under this facility and our subsidiaries' obligations under the related guarantees are secured by first priority security interests in a variety of collateral. Availability under the facility is subject to a borrowing base, which is based on eligible accounts receivable and inventory of the parent company and certain of its U.S. and Canadian subsidiaries, after adjusting for customary factors that are subject to modification from time to time by the administrative agent and the majority lenders at their discretion (not to be exercised unreasonably). Modifications are based on the results of periodic collateral and borrowing base evaluations and appraisals. To the extent that our eligible accounts receivable and inventory decline, our borrowing base will decrease and the availability under the facility may decrease below \$1.5 billion. In addition, if the amount of outstanding borrowings and letters of credit under the facility exceeds the borrowing base, we are

required to prepay borrowings and/or cash collateralize letters of credit sufficient to eliminate the excess. As of September 30, 2010, our borrowing base, and therefore our availability, under this facility was \$22 million below the facility's stated amount of \$1.5 billion.

Table of Contents

At September 30, 2010, we had no borrowings outstanding and \$483 million of letters of credit issued under the revolving credit facility. At December 31, 2009, we had no borrowings outstanding and \$494 million of letters of credit issued under the revolving credit facility.

\$1.2 Billion Amended and Restated Second Lien Term Loan Facility due 2014

Our obligations under this facility are guaranteed by most of our wholly-owned U.S. and Canadian subsidiaries and are secured by second priority security interests in the same collateral securing the \$1.5 billion first lien revolving credit facility. At September 30, 2010 and December 31, 2009, this facility was fully drawn.

Each of our European and German revolving credit facilities and our first lien revolving credit facility have customary representations and warranties including, as a condition to borrowing, that all such representations and warranties are true and correct, in all material respects, on the date of the borrowing, including representations as to no material adverse change in our financial condition since December 31, 2006. Each of the facilities described above have customary defaults, including cross-defaults to material indebtedness of Goodyear and our subsidiaries. For a description of the collateral securing the above facilities as well as the covenants applicable to them, please refer to

Covenant Compliance below and the Note to the Consolidated Financial Statements No. 12, Financing Arrangements and Derivative Financial Instruments, in our 2009 Form 10-K.

International Accounts Receivable Securitization Facilities (On-Balance Sheet)

GDTE and certain of its subsidiaries are parties to a pan-European accounts receivable securitization facility that provides up to 450 million of funding and expires in 2015. Utilization under this facility is based on current available receivable balances. The facility is subject to customary annual renewal of back-up liquidity commitments.

The facility involves an ongoing daily sale of substantially all of the trade accounts receivable of certain GDTE subsidiaries to a bankruptcy-remote French company controlled by one of the liquidity banks in the facility. These subsidiaries retain servicing responsibilities. At September 30, 2010, the amount available and fully utilized under this program totaled \$446 million (327 million), compared to \$437 million (304 million) at December 31, 2009. The program did not qualify for sale accounting, and accordingly, these amounts are included in Long term debt and capital leases.

In addition to the pan-European accounts receivable securitization facility discussed above, subsidiaries in Australia have accounts receivable securitization programs totaling \$68 million at September 30, 2010 and December 31, 2009. The receivables sold under this program also serve as collateral for the facility. We have concluded that we retain the risk of loss related to these receivables in the event of non-payment. These amounts are included in Notes payable and overdrafts.

Accounts Receivable Factoring Facilities (Off-Balance Sheet)

Various subsidiaries sell certain of their trade receivables under off-balance sheet programs. For these programs, we have concluded that there is no risk of loss to us from non-payment of the sold receivables. At September 30, 2010, the gross amount of receivables sold was \$133 million, compared to \$113 million at December 31, 2009.

Other Foreign Credit Facilities

Our Chinese subsidiary has two financing agreements in China. At September 30, 2010, these non-revolving credit facilities had total unused availability of 3.1 billion renminbi (\$459 million) and can only be used to finance the relocation and expansion of our manufacturing facilities in China. The facilities contain covenants relating to our Chinese subsidiary and have customary representations and warranties and defaults relating to our Chinese subsidiary's ability to perform its obligations under the facilities. One of the facilities (with 1.8 billion renminbi of unused availability at September 30, 2010) matures in 2016 and principal amortization begins in 2013. At September 30, 2010, there were \$81 million of borrowings outstanding under this facility. The other facility (with 1.3 billion renminbi of unused availability at September 30, 2010) will mature eight years after the first borrowing and will begin principal amortization five years after the first borrowing. At September 30, 2010, there were no borrowings outstanding under this facility. There were no amounts outstanding under either of the facilities at December 31, 2009.

Table of Contents**Covenant Compliance**

Our amended and restated first lien revolving and second lien credit facilities and some of the indentures governing our notes contain certain covenants that, among other things, limit our ability to incur additional debt or issue redeemable preferred stock, make certain restricted payments or investments, incur liens, sell assets, incur restrictions on the ability of our subsidiaries to pay dividends to us, enter into affiliate transactions, engage in sale and leaseback transactions, and consolidate, merge, sell or otherwise dispose of all or substantially all of our assets. These covenants are subject to significant exceptions and qualifications.

We have additional financial covenants in our first lien revolving and second lien credit facilities that are currently not applicable. We only become subject to these financial covenants when certain events occur. These financial covenants and related events are as follows:

We become subject to the financial covenant contained in our first lien revolving credit facility when the aggregate amount of our Parent Company and Guarantor subsidiaries cash and cash equivalents (Available Cash) plus our availability under our first lien revolving credit facility is less than \$150 million. If this were to occur, our ratio of EBITDA to Consolidated Interest Expense may not be less than 2.0 to 1.0 for any period of four consecutive fiscal quarters. As of September 30, 2010, our availability under this facility of \$995 million, plus our Available Cash of \$521 million, totaled \$1.5 billion, which is in excess of \$150 million.

We become subject to a covenant contained in our second lien credit facility upon certain asset sales. The covenant provides that, before we use cash proceeds from certain asset sales to repay any junior lien, senior unsecured or subordinated indebtedness, we must first offer to prepay borrowings under the second lien credit facility unless our ratio of Consolidated Net Secured Indebtedness to EBITDA (Pro Forma Senior Secured Leverage Ratio) for any period of four consecutive fiscal quarters is equal to or less than 3.0 to 1.0.

In addition, our \$505 million senior secured European and German revolving credit facilities contain non-financial covenants similar to the non-financial covenants in our first lien revolving and second lien credit facilities that are described above and a financial covenant applicable only to GDTE and its subsidiaries. This financial covenant provides that we are not permitted to allow GDTE's ratio of Consolidated Net J.V. Indebtedness to Consolidated European J.V. EBITDA to be greater than 3.0 to 1.0 at the end of any fiscal quarter. Consolidated Net J.V. Indebtedness is determined, through March 31, 2011, net of the sum of (1) cash and cash equivalents in excess of \$100 million held by GDTE and its subsidiaries, (2) cash and cash equivalents in excess of \$150 million held by the Parent Company and its U.S. subsidiaries and (3) availability under our first lien revolving credit facility if the ratio of EBITDA to Consolidated Interest Expense described above is not applicable and the conditions to borrowing under the first lien revolving credit facility are met. Consolidated Net J.V. Indebtedness also excludes loans from other consolidated Goodyear entities. This financial covenant is also included in our pan-European accounts receivable securitization facility. At September 30, 2010, we were in compliance with this financial covenant.

There are no known future changes to, or new covenants in, any of our existing debt obligations. Covenants could change based upon a refinancing or amendment of an existing facility, or additional covenants may be added in connection with the incurrence of new debt.

At September 30, 2010, we were in compliance with the currently applicable material covenants imposed by our principal credit facilities and indentures.

The terms Available Cash, EBITDA, Consolidated Interest Expense, Consolidated Net Secured Indebtedness, Pro Forma Senior Secured Leverage Ratio, Consolidated Net J.V. Indebtedness and Consolidated European J.V. EBITDA have the meanings given them in the respective credit facilities.

EBITDA (per our Amended and Restated Credit Facilities)

If the amount of availability under our first lien revolving credit facility plus our Available Cash (as defined in that facility) is less than \$150 million, we may not permit our ratio of EBITDA (as defined in that facility) (Covenant EBITDA) to Consolidated Interest Expense (as defined in that facility) to be less than 2.0 to 1.0 for any period of four consecutive fiscal quarters. Since our availability under our first lien revolving credit facility plus our Available Cash is in excess of \$150 million, this financial covenant is not currently applicable. Our amended and restated credit facilities also state that we may only incur additional debt or make restricted payments that are not otherwise

expressly permitted if, after giving effect to the debt incurrence or the restricted payment, our ratio of Covenant EBITDA to Consolidated Interest Expense for the prior four

-43-

Table of Contents

fiscal quarters would exceed 2.0 to 1.0. Certain of our senior note indentures have substantially similar limitations on incurring debt and making restricted payments. Our credit facilities and indentures also permit the incurrence of additional debt through other provisions in those agreements without regard to our ability to satisfy the ratio-based incurrence test described above. We believe that these other provisions provide us with sufficient flexibility to incur additional debt necessary to meet our operating, investing and financing needs without regard to our ability to satisfy the ratio-based incurrence test.

Covenant EBITDA is a non-GAAP financial measure that is presented not as a measure of operating results, but rather as a measure of limitations imposed under our credit facilities and indentures. Covenant EBITDA should not be construed as an alternative to either (i) income from operations or (ii) cash flows from operating activities. Our failure to comply with the financial covenants in our credit facilities could have a material adverse effect on our liquidity and operations. Limitations on our ability to incur debt in accordance with our credit facilities and indentures could affect our liquidity, and we believe that the presentation of Covenant EBITDA provides investors with important information.

The following table presents the calculation of EBITDA and the calculation of Covenant EBITDA for the periods indicated. Other companies may calculate similarly titled measures differently than we do. Certain line items in the table under Credit Facility Adjustments are presented as defined in the credit facilities and indentures and do not reflect amounts as presented in the Consolidated Financial Statements.

<i>(In millions)</i>	Three Months Ended		Nine Months Ended

⁽¹⁾ Includes the sale of certain properties in Akron, Ohio.

Potential Future Financings

In addition to our previous financing activities, we may seek to undertake additional financing actions which could include restructuring bank debt or capital markets transactions, possibly including the issuance of additional debt or equity. Given the challenges that we face and the uncertainties of the market conditions, access to the capital markets cannot be assured.

Our future liquidity requirements may make it necessary for us to incur additional debt. However, a substantial portion of our assets are already subject to liens securing our indebtedness. As a result, we are limited in our ability to

pledge our remaining assets as security for additional secured indebtedness. In addition, no assurance can be given as to our ability to raise additional unsecured debt.

Asset Dispositions

The restrictions on asset sales imposed by our material indebtedness have not affected our strategy of divesting non-core businesses, and those divestitures have not affected our ability to comply with those restrictions.

-44-

Table of Contents

Recoverability of Goodwill

We completed our 2010 annual impairment analysis as of July 31st. Goodwill balances at September 30, 2010 were \$94 million, \$519 million and \$78 million for North American Tire, EMEA and Asia Pacific Tire, respectively. For purposes of our annual impairment testing, we determined the estimated fair values using a discounted cash flow approach consistent with the methodology used in the prior year. The key assumptions incorporated in the discounted cash flow approach include growth rates, projected segment operating income, changes in working capital, our plan for capital expenditures, anticipated funding for pensions, and a discount rate equal to our assumed long-term cost of capital. The annual impairment test indicated there is no impairment of goodwill. Fair value would have to decline over 40% for North American Tire, over 45% for EMEA and over 20% for Asia Pacific Tire to reduce fair value below carrying value. The discount rate used would have to increase over two percentage points for North American Tire, over seven percentage points for EMEA and over two percentage points for Asia Pacific Tire or the assumed growth rate would have to be negative for all of the business units to indicate a potential impairment.

-45-

Table of Contents**COMMITMENTS AND CONTINGENT LIABILITIES****Contractual Obligations**

Significant updates to our contractual obligations and commitments to make future payments are provided below. Additional information regarding our contractual obligations and commitments can be found under the heading

Commitments and Contingent Liabilities in our 2009 Form 10-K. Items not included below can be found in the Contractual Obligations Table in our 2009 Form 10-K.

Payment Due by Period as of December 31, 2009

<i>(In millions)</i>	Total	2010	2011	2012	2013	2014	Beyond 2014
Debt Obligations (1)	\$4,522	\$335	\$ 11	\$ 93	\$ 23	\$1,207	\$2,853
Interest Payments (2)	2,278	291	276	272	268	250	921
Pension Benefits (3)	2,502	350	363	588	538	663	NA

(1) Debt obligations include Notes payable and overdrafts and reflect the maturities as of December 31, 2009 updated to include the issuance of \$1 billion aggregate principal amount of our 8.25% senior notes due 2020, the exchange of \$262 million of our 7.857% notes due 2011 for \$282 million aggregate principal amount of our 8.75% notes due 2020, and the redemption of \$388 million of our 7.857% notes due 2011, \$325 million of our 8.625% senior notes due 2011, and \$260 million of

our 9% senior notes due 2015.

- (2) These amounts represent future interest payments related to our existing debt obligations and capital leases based on fixed and variable interest rates specified in the associated debt and lease agreements. Payments related to variable rate debt are based on the six-month LIBOR rate at December 31, 2009 plus the specified margin in the associated debt agreements for each period presented. These amounts were updated to include the interest payments related to the issuance of \$1 billion aggregate principal amount of our 8.25% senior notes due 2020, the exchange of \$262 million of our 7.857% notes due 2011 for \$282 million aggregate

principal amount of our 8.75% notes due 2020, and the redemption of \$388 million of our 7.857% notes due 2011, \$325 million of our 8.625% senior notes due 2011, and \$260 million of our 9% senior notes due 2015.

- (3) Pension benefits have been revised to reflect updated funding estimates. These updates include the election of funding relief for the 2009 plan year and the expected election of funding relief for the 2011 plan year in the U.S. as allowed by the Pension Relief Act, completion of 2010 funding valuations worldwide, and reductions to funding interest rate assumptions.

FORWARD-LOOKING INFORMATION SAFE HARBOR STATEMENT

Certain information in this Form 10-Q (other than historical data and information) may constitute forward-looking statements regarding events and trends that may affect our future operating results and financial position. The words estimate, expect, intend and project, as well as other words or expressions of similar meaning, are intended to identify forward-looking statements. You are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date of this Form 10-Q. Such statements are based on current expectations and assumptions, are inherently uncertain, are subject to risks and should be viewed with caution. Actual results and experience may differ materially from the forward-looking statements as a result of many factors, including:

deteriorating economic conditions in any of our major markets, or an inability to access capital markets or third-party financing when necessary, may materially adversely affect our operating results, financial condition and liquidity;

if we do not achieve projected savings from various cost reduction initiatives or successfully implement other strategic initiatives, including the implementation of new information technology systems, our operating results, financial condition and liquidity may be materially adversely affected;

we face significant global competition, increasingly from lower cost manufacturers, and our market share could decline;

our pension plans are significantly underfunded and further increases in the underfunded status of the plans could significantly increase the amount of our required contributions and pension expenses;

higher raw material and energy costs may materially adversely affect our operating results and financial condition;

work stoppages, financial difficulties or supply disruptions at our major OE customers, dealers or suppliers could harm our business;

continued pricing pressures from vehicle manufacturers may materially adversely affect our business;

if we experience a labor strike, work stoppage or other similar event our financial position, results of operations and liquidity could be materially adversely affected;

our long term ability to meet current obligations and to repay maturing indebtedness is dependent on our ability to access capital markets in the future and to improve our operating results;

the challenges of the present business environment may cause a material reduction in our liquidity as a result of an adverse change in our cash flow from operations;

we have a substantial amount of debt, which could restrict our growth, place us at a competitive disadvantage or otherwise materially adversely affect our financial health;

any failure to be in compliance with any material provision or covenant of our secured credit facilities could have a material adverse effect on our liquidity and our results of operations;

our capital expenditures may not be adequate to maintain our competitive position and may not be implemented in a timely or cost-effective manner;

our variable rate indebtedness subjects us to interest rate risk, which could cause our debt service obligations to increase significantly;

we have substantial fixed costs and, as a result, our operating income fluctuates disproportionately with changes in our net sales;

we may incur significant costs in connection with product liability and other tort claims;

-47-

Table of Contents

our reserves for product liability and other tort claims and our recorded insurance assets are subject to various uncertainties, the outcome of which may result in our actual costs being significantly higher than the amounts recorded;

we may be required to provide letters of credit or post cash collateral if we are subject to a significant adverse judgment or if we are unable to obtain surety bonds, which may have a material adverse effect on our liquidity;

we are subject to extensive government regulations that may materially adversely affect our operating results;

our international operations have certain risks that may materially adversely affect our operating results;

we have foreign currency translation and transaction risks that may materially adversely affect our operating results;

the terms and conditions of our global alliance with SRI provide for certain exit rights available to SRI upon the occurrence of certain events, which could require us to make a substantial payment to acquire SRI's minority interests in GDTE and GDTNA following the determination of the fair value of those interests;

if we are unable to attract and retain key personnel, our business could be materially adversely affected; and

we may be impacted by economic and supply disruptions associated with events beyond our control, such as war, acts of terror, political unrest, public health concerns, labor disputes or natural disasters.

It is not possible to foresee or identify all such factors. We will not revise or update any forward-looking statement or disclose any facts, events or circumstances that occur after the date hereof that may affect the accuracy of any forward-looking statement.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.**

We utilize derivative financial instrument contracts and nonderivative instruments to manage interest rate, foreign exchange and commodity price risks. We have established a control environment that includes policies and procedures for risk assessment and the approval, reporting and monitoring of derivative financial instrument activities. We do not hold or issue derivative financial instruments for trading purposes.

Commodity Price Risk

The raw material costs to which our operations are principally exposed include the cost of natural rubber, synthetic rubber, carbon black, fabrics, steel cord and other petrochemical-based commodities. Approximately two-thirds of our raw materials are oil-based derivatives, whose cost may be affected by fluctuations in the price of oil. We currently do not hedge commodity prices. We do, however, use various strategies to partially offset cost increases for raw materials, including centralizing purchases of raw materials through our global procurement organization in an effort to leverage our purchasing power and expanding our capabilities to substitute lower-cost raw materials.

Interest Rate Risk

We continuously monitor our fixed and floating rate debt mix. Within defined limitations, we manage the mix using refinancing. At September 30, 2010, 45% of our debt was at variable interest rates averaging 3.72% compared to 44% at an average rate of 3.13% at December 31, 2009.

The following table presents information about long term fixed rate debt, excluding capital leases, at September 30:

(In millions)

Fixed Rate Debt	2010	2009
Carrying amount liability	\$2,627	\$2,452
Fair value liability	2,838	2,500
Pro forma fair value liability	2,941	2,580

The pro forma information assumes a 100 basis point decrease in market interest rates at September 30, 2010 and 2009, respectively, and reflects the estimated fair value of fixed rate debt outstanding at that date under that assumption. The sensitivity of our fixed rate debt to changes in interest rates was determined using current market pricing models.

Foreign Currency Exchange Risk

We enter into foreign currency contracts in order to reduce the impact of changes in foreign exchange rates on our consolidated results of operations and future foreign currency-denominated cash flows. These contracts reduce exposure to currency movements affecting existing foreign currency-denominated assets, liabilities, firm commitments and forecasted transactions resulting primarily from trade receivables and payables, equipment acquisitions, intercompany loans and royalty agreements and forecasted purchases and sales. Contracts hedging short-term trade receivables and payables normally have no hedging designation.

The following table presents foreign currency forward contract information at September 30:

(In millions)

	2010	2009
Fair value asset (liability)	\$ (31)	\$ (17)
Pro forma decrease in fair value	(121)	(175)
Contract maturities	10/10-10/19	10/09-10/19

The pro forma decrease in fair value assumes a 10% adverse change in underlying foreign exchange rates at September 30 of each year, and reflects the estimated change in the fair value of contracts outstanding at that date under that assumption. The sensitivity of our foreign currency positions to changes in exchange rates was determined using current market pricing models.

Table of Contents

Fair values are recognized on the Consolidated Balance Sheet at September 30 as follows:

<i>(In millions)</i>	2010	2009
Accounts receivable	\$ 13	\$ 13
Prepaid Expenses and Other Current Assets		3
Other Assets	1	
Other Current Liabilities	(45)	(33)

See Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources for a discussion of our management of counterparty risk.

ITEM 4. CONTROLS AND PROCEDURES.***Management's Evaluation of Disclosure Controls and Procedures***

We maintain disclosure controls and procedures which, consistent with Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, we define to mean controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and to ensure that such information is accumulated and communicated to our management, including our principal executive and financial officers, as appropriate, to allow timely decisions regarding required disclosure.

Our management, with the participation of our principal executive and financial officers, has evaluated the effectiveness of our disclosure controls and procedures. Based on such evaluation, our principal executive and financial officers have concluded that such disclosure controls and procedures were effective as of September 30, 2010 (the end of the period covered by this Quarterly Report on Form 10-Q).

Changes in Internal Control Over Financial Reporting

We are undertaking a phased implementation of enterprise resource planning systems in our EMEA, Latin American Tire and Asia Pacific Tire SBUs, a significant portion of which will be completed in 2010 and 2011. We believe we are maintaining and monitoring appropriate internal controls during the implementation period. There have been no other changes in our internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS*****Asbestos Litigation***

As reported in our Form 10-Q for the period ended June 30, 2010, we were one of numerous defendants in legal proceedings in certain state and Federal courts involving approximately 90,100 claimants relating to their alleged exposure to materials containing asbestos in products allegedly manufactured by us or asbestos materials present in our facilities. During the third quarter of 2010, approximately 600 new claims were filed against us and approximately 2,500 were settled or dismissed. The amount expended on asbestos defense and claim resolution by Goodyear and its insurance carriers during the third quarter and first nine months of 2010 was \$4 million and \$22 million, respectively. At September 30, 2010, there were approximately 88,200 asbestos claims pending against us. The plaintiffs are seeking unspecified actual and punitive damages and other relief. See Note 9, Commitments and Contingent Liabilities in this Form 10-Q for additional information on asbestos litigation.

South African Competition Tribunal Proceedings

On August 31, 2010, the South African Competition Commission referred a complaint to the South African Competition Tribunal alleging that Goodyear South Africa (Pty) Ltd., Apollo Tyres South Africa (Pty) Ltd., Continental Tyre South Africa (Pty) Ltd., Bridgestone South Africa (Pty) Ltd., and the South African Tyre Manufacturers Conference (Pty) Ltd. engaged in anti-competitive conduct in the tire market in South Africa in violation of the South African Competition Act. The Competition Commission is seeking a penalty of approximately \$30 million, which is based on a percentage of Goodyear South Africa's annual revenues in 2008. Goodyear South Africa has conducted an internal investigation regarding these allegations and intends to defend itself before the Competition Tribunal.

Reference is made to Item 3 of Part I of our 2009 Form 10-K for additional discussion of legal proceedings.

ITEM 1A. RISK FACTORS

Our 2009 Form 10-K includes a detailed discussion of our risk factors.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table presents information with respect to repurchases of common stock made by us during the three months ended September 30, 2010. These shares were delivered to us by employees as payment for the exercise price of stock options as well as the withholding taxes due upon the exercise of the stock options or the vesting or payment of stock awards.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
7/1/10-7/31/10		\$		
8/1/10-8/31/10	50,479	10.17		
9/1/10-9/30/10	90,160	10.67		
Total	140,639	\$ 10.49
