PART I

ITEM 1. *Business*

Overview

Sysco Corporation, acting through its subsidiaries and divisions (collectively referred to as **SYSCO** or the company), is the largest North American distributor of food and related products primarily to the foodservice or food-prepared-away-from-home industry. Founded in 1969, SYSCO provides its products and services to approximately 394,000 customers, including restaurants, healthcare and educational facilities, lodging establishments and other foodservice customers.

SYSCO, which was formed when the stockholders of nine companies exchanged their stock for SYSCO common stock, commenced operations in March 1970. Since its formation, the company has grown from \$115 million to over \$32 billion in annual sales, both through internal expansion of existing operations and through acquisitions. Through the end of fiscal 2006, SYSCO had acquired 137 companies or divisions of companies.

During fiscal 2006, SYSCO completed the following acquisitions:

Desert Meats & Provisions, Inc., the largest independent specialty meat distributor in the Las Vegas and southern Nevada foodservice markets;

Thomas Brothers Produce, Inc., the largest independent produce distributor in the state of Oklahoma;

City Produce, Inc. and a related group of companies, which together comprise the largest independent produce distributor in the Austin, San Antonio, Corpus Christi and Harlingen, Texas foodservice markets;

Incredible Fresh Produce, a distributor of fresh produce servicing southwest Florida;

A-One-A Produce & Dairy, Inc., the largest fresh produce distributor in South Florida;

Western Foods, Inc., a broadline foodservice distributor located in Little Rock, Arkansas; and

The Fowler & Hunting Company, Inc., a full-line fresh fruit and vegetable distributor headquartered in Hartford, Connecticut.

SYSCO is organized under the laws of Delaware. The address and telephone number of the company's executive offices are 1390 Enclave Parkway, Houston, Texas 77077-2099, (281) 584-1390. This annual report on Form 10-K, as well as all other reports filed or furnished by SYSCO pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, are available free of charge on SYSCO's website at www.sysco.com as soon as reasonably practicable after they are electronically filed with or furnished to the Securities and Exchange Commission.

Operating Segments

SYSCO provides food and related products to the foodservice or food-prepared-away-from-home industry. Under the provisions of Statement of Financial Accounting Standards (SFAS) No. 131, Disclosures about Segments of an Enterprise and Related Information, the company has aggregated its operating companies into a number of segments, of which only Broadline and SYGMA are reportable segments as defined in SFAS No. 131. Broadline operating companies distribute a full line of food products and a wide variety of non-food products to both our traditional and chain restaurant customers. SYGMA operating companies distribute a full line of food products and a wide variety of non-food products to chain restaurant customer locations. Other financial information is attributable to the company's other segments, including the company's specialty produce, custom-cut meat and lodging industry products segments. The company's specialty produce companies distribute fresh produce and, on a limited basis, other foodservice products. Specialty meat companies distribute custom-cut fresh steaks, other meat, seafood and poultry. Our lodging industry products company distributes personal care guest amenities, equipment, housekeeping supplies, room accessories and textiles to the lodging industry. Selected financial data for each of the company's reportable segments as well as financial information concerning geographic areas can be found in Note 17, Business Segment Information,

Table of Contents**Customers and Products**

The foodservice industry consists of two major customer types — traditional and chain restaurant. Traditional foodservice customers include restaurants, hospitals, schools, hotels and industrial caterers. SYSCO's chain restaurant customers include regional and national hamburger, sandwich, pizza, chicken, steak and other chain operations.

Services to the company's traditional foodservice and chain restaurant customers are supported by similar physical facilities, vehicles, material handling equipment and techniques, and administrative and operating staffs.

Products distributed by the company include a full line of frozen foods, such as meats, fully prepared entrees, fruits, vegetables and desserts; a full line of canned and dry foods; fresh meats; imported specialties; and fresh produce. The company also supplies a wide variety of non-food items, including: paper products such as disposable napkins, plates and cups; tableware such as china and silverware; cookware such as pots, pans and utensils; restaurant and kitchen equipment and supplies; and cleaning supplies. SYSCO's operating companies distribute nationally-branded merchandise, as well as products packaged under SYSCO's private brands.

The company believes that prompt and accurate delivery of orders, close contact with customers and the ability to provide a full array of products and services to assist customers in their foodservice operations are of primary importance in the marketing and distribution of products to traditional customers. SYSCO's operating companies offer daily delivery to certain customer locations and have the capability of delivering special orders on short notice. Through the more than 13,900 sales and marketing representatives and support staff of SYSCO and its operating companies, SYSCO stays informed of the needs of its customers and acquaints them with new products and services. SYSCO's operating companies also provide ancillary services relating to foodservice distribution, such as providing customers with product usage reports and other data, menu-planning advice, food safety training and assistance in inventory control, as well as access to various third party services designed to add value to our customers' businesses.

No single customer accounted for 10% or more of SYSCO's total sales for its fiscal year ended July 1, 2006.

SYSCO's sales to chain restaurant customers consist of a variety of food products. The company believes that consistent product quality and timely and accurate service are important factors in the selection of a chain restaurant supplier. One chain restaurant customer (Wendy's International, Inc.) accounted for 5% of SYSCO's sales for its fiscal year ended July 1, 2006. Although this customer represents approximately 37% of the SYGMA segment sales, the company does not believe that the loss of this customer would have a material adverse effect on SYSCO as a whole.

Based upon available information, the company estimates that sales by type of customer during the past three fiscal years were as follows:

Type of Customer	2006	2005	2004
Restaurants	63%	64%	64%
Hospitals and nursing homes	10	10	10
Schools and colleges	5	5	5
Hotels and motels	6	6	6
Other	16	15	15
Totals	100%	100%	100%

Sources of Supply

SYSCO purchases from thousands of suppliers, none of which individually accounts for more than 10% of the company's purchases. These suppliers consist generally of large corporations selling brand name and private label merchandise and independent regional brand and private label processors and packers. Generally, purchasing is carried out through centrally developed purchasing programs and direct purchasing programs established by the company's various operating companies. The company continually develops relationships with suppliers but has no material long-term purchase commitments with any supplier.

In the second quarter of fiscal 2002, SYSCO began a project to restructure its supply chain (National Supply Chain project). This project is intended to increase profitability by lowering aggregate inventory levels, operating costs, and future facility expansion needs at SYSCO's broadline operating companies while providing greater value to our suppliers and customers.

Table of Contents

The National Supply Chain project involved the creation of the Bough Supply Chain Cooperative, Inc. (BSCC) which administers a consolidated product procurement program designed to develop, obtain and ensure consistent quality food and non-food products. The program covers the purchasing and marketing of SYSCO Brand merchandise as well as products from a number of national brand suppliers, encompassing substantially all product lines. The operating companies can choose to purchase product from the suppliers participating in the cooperative's programs or from other suppliers, although SYSCO Brand products are only available to the operating companies through the cooperative's programs.

The National Supply Chain project has three major supply change initiatives actively underway. The first initiative involves the construction and operation of regional distribution centers which will aggregate inventory demand to optimize the supply chain activities for certain products for all SYSCO broadline operating companies in the region. The company expects to build from seven to nine regional distribution centers (RDCs). The first of these centers, the Northeast RDC located in Front Royal, Virginia, opened during the third quarter of fiscal 2005. SYSCO has purchased the sites for two additional RDCs. The second initiative is the national transportation management initiative which provides the capability to view and manage all of SYSCO's inbound freight, both to RDCs and the operating companies, as a network and not as individual locations. The third initiative relates to inventory management software that helps SYSCO forecast inventory demand and manage inventories more effectively.

Working Capital Practices

SYSCO's growth is funded through a combination of cash flow from operations, commercial paper issuances and long-term borrowings. See the discussion in Liquidity and Capital Resources in Management's Discussion and Analysis in Item 7 regarding the company's liquidity, financial position and sources and uses of funds.

Credit terms extended by SYSCO to its customers can vary from cash on delivery to 30 days or more based on SYSCO's assessment of the customers' credit risk. SYSCO monitors the customers' accounts and will suspend shipments to customers if necessary.

A majority of SYSCO's sales orders are filled within 24 hours of when the customers' orders are placed. SYSCO will generally maintain inventory on hand to be able to meet customer demand. The level of inventory on hand will vary by product depending on product shelf-life, supplier order fulfillment lead times and customer demand. SYSCO also makes purchases of product based on supply or pricing opportunities.

SYSCO takes advantage of suppliers' cash discounts where appropriate and otherwise generally receives payment terms from its suppliers ranging from weekly to 30 days or more.

Corporate Headquarters Services

SYSCO's corporate staff makes available a number of services to the company's operating companies. Members of the corporate staff possess experience and expertise in, among other areas, accounting and finance, cash management, information technology, employee benefits, engineering and insurance. The corporate office makes available legal, marketing, payroll, human resources, information technology and tax compliance services. The corporate office also makes available warehousing and distribution services, which provide assistance in space utilization, energy conservation, fleet management and work flow.

Capital Improvements

To maximize productivity and customer service, the company continues to construct and modernize its distribution facilities. During fiscal 2006, 2005 and 2004, approximately \$514,751,000, \$390,203,000 and \$530,086,000, respectively, were invested in facility expansions, fleet additions and other capital asset enhancements. The company estimates its capital expenditures in fiscal 2007 should be in the range of \$575,000,000 to \$625,000,000. During the three years ended July 1, 2006, capital expenditures were financed primarily by internally generated funds, the company's commercial paper program and bank and other borrowings. The company expects to finance its fiscal 2007 capital expenditures from the same sources.

Employees

As of July 1, 2006, SYSCO and its operating companies had approximately 49,600 full-time employees, approximately 18% of whom were represented by unions, primarily the International Brotherhood of Teamsters. Contract negotiations are handled by each individual operating company. Collective bargaining agreements covering approximately 23% of the company's union employees expire

Table of Contents

during fiscal 2007. SYSCO considers its labor relations to be satisfactory. During fiscal 2006, the number of customer contact associates increased 6% over the levels at the end of fiscal 2005. The company intends to continue increasing the number of customer contact associates in fiscal 2007.

Competition

The business of SYSCO is competitive with numerous companies engaged in foodservice distribution. Foodservice operators may also choose to purchase products directly from retail outlets. While competition is encountered primarily from local and regional distributors, a few companies compete with SYSCO on a national basis. The company believes that the principal competitive factors in the foodservice industry are effective customer contacts, the ability to deliver a wide range of quality products and related services on a timely and dependable basis and competitive prices. The company estimates that it serves about 14% of an approximately \$232 billion annual market that includes the North American foodservice and hotel amenity, furniture and textile markets. SYSCO believes, based upon industry trade data, that its sales to the North American food-prepared-away-from-home industry were the highest of any foodservice distributor during fiscal 2006. While adequate industry statistics are not available, the company believes that in most instances its local operations are among the leading distributors of food and related non-food products to foodservice customers in their respective trading areas.

Government Regulation

As a marketer and distributor of food products, SYSCO is subject to the U.S. Federal Food, Drug and Cosmetic Act and regulations promulgated thereunder by the U.S. Food and Drug Administration (FDA) and the Canadian Food and Drugs Act and the regulations thereunder.

The FDA regulates manufacturing and holding requirements for foods through its manufacturing practice regulations, specifies the standards of identity for certain foods and prescribes the format and content of certain information required to appear on food product labels. For certain product lines, SYSCO is also subject to the Federal Meat Inspection Act, the Poultry Products Inspection Act, the Perishable Agricultural Commodities Act, the Packers and Stockyard Act and regulations promulgated thereunder by the U.S. Department of Agriculture (USDA). The USDA imposes standards for product quality and sanitation including the inspection and labeling of meat and poultry products and the grading and commercial acceptance of produce shipments from the company's suppliers. SYSCO is also subject to the Public Health Security and Bioterrorism Preparedness and Response Act of 2002, which imposes certain registration and record keeping requirements on facilities that manufacture, process, pack or hold food for human or animal consumption.

In Canada, the Canadian Food Inspection Agency administers and enforces the food safety and nutritional quality standards established by Health Canada under the Canadian Food and Drugs Act and under other related federal legislation, including the Canada Agricultural Products Act, the Meat Inspection Act, the Fish Inspection Act and the Consumer Packaging and Labeling Act (as it relates to food). These laws regulate the processing, storing, grading, packaging, marking, transporting and inspection of certain SYSCO product lines as well as the packaging, labeling, sale, importation and advertising of pre-packaged and certain other products.

The company and its products are also subject to state, provincial and local regulation through such measures as the licensing of its facilities; enforcement by state, provincial and local health agencies of state, provincial and local standards for the company's products; and regulation of the company's trade practices in connection with the sale of its products. SYSCO's facilities are subject to inspections and regulations issued pursuant to the U.S. Occupational Safety and Health Act by the U.S. Department of Labor, together with similar occupational health and safety laws in each Canadian province. These regulations require the company to comply with certain manufacturing, health and safety standards to protect its employees from accidents and to establish hazard communication programs to transmit information on the hazards of certain chemicals present in products distributed by the company.

The company also is subject to regulation by numerous U.S. and Canadian federal, state, provincial and local regulatory agencies, including, but not limited to, the U.S. Department of Labor and each Canadian provincial ministry of labour, which set employment practice standards for workers, and the U.S. Department of Transportation and the Canadian Transportation Agency, which regulate transportation of perishable and hazardous materials and waste, and similar state, provincial and local agencies.

Most of the company's distribution facilities have ammonia-based refrigeration systems and tanks for the storage of diesel fuel and other petroleum products which are subject to laws regulating such systems and storage tanks. Other U.S. and Canadian federal,

4

Table of Contents

state, provincial and local provisions relating to the protection of the environment or the discharge of materials do not materially impact the company's use or operation of its facilities.

Compliance with these laws has not had and is not anticipated to have a material effect on the capital expenditures, earnings or competitive position of SYSCO.

General

SYSCO has numerous trademarks which are of significant importance to the company. The loss of the SYSCO® trademark would have a material adverse effect on SYSCO's results of operations.

SYSCO is not engaged in material research and development activities relating to the development of new products or the improvement of existing products.

The company's sales do not generally fluctuate significantly on a seasonal basis; therefore, the business of the company is not deemed to be seasonal.

As of July 1, 2006, SYSCO and its operating companies operated 188 facilities throughout the United States and Canada, of which 171 were principal distribution facilities.

Item 1A. Risk Factors

Low Margin Business; Inflation and Economic Sensitivity

The foodservice distribution industry is characterized by relatively high inventory turnover with relatively low profit margins. SYSCO makes a significant portion of its sales at prices that are based on the cost of products it sells plus a percentage markup. As a result, SYSCO's profit levels may be negatively impacted during periods of product cost deflation, even though SYSCO's gross profit percentage may remain relatively constant. Prolonged periods of product cost inflation also may have a negative impact on the company's profit margins and earnings to the extent such product cost increases are not passed on to customers due to resistance to higher prices and the timing needed to pass on such increases. The foodservice industry is sensitive to national and regional economic conditions. Inflation, fuel costs and other factors affecting consumer confidence and the frequency and amount spent by consumers for food prepared away from home may negatively impact SYSCO's sales and operating results. SYSCO's operating results are also sensitive to, and may be adversely affected by, other factors, including difficulties collecting accounts receivable, competitive price pressures, severe weather conditions and unexpected increases in fuel or other transportation-related costs. Although these factors have not had a material adverse impact on SYSCO's past operations, there can be no assurance that one or more of these factors will not adversely affect future operating results.

Increased Fuel Costs

Increased fuel costs have recently had a negative impact on the company's results of operations. The high cost of fuel can negatively impact consumer confidence and discretionary spending and thus reduce the frequency and amount spent by consumers for food prepared away from home. The high cost of fuel can also increase the price paid by SYSCO for products as well as the costs incurred by SYSCO to deliver products to its customers. These factors in turn negatively impact SYSCO's sales, margins, operating expenses and operating results.

Interruption of Supplies and Increases in Product Costs

SYSCO obtains substantially all of its foodservice and related products from third party suppliers. For the most part, SYSCO does not have long-term contracts with its suppliers committing them to provide products to SYSCO. Although SYSCO's purchasing volume can provide leverage when dealing with suppliers, suppliers may not provide the foodservice products and supplies needed by SYSCO in the quantities and at the prices requested. Because SYSCO does not control the actual production of the products it sells, it also is subject to delays caused by interruption in production and increases in product costs based on conditions outside its control. These conditions include work slowdowns, work interruptions, strikes or other job actions by employees of suppliers, weather, crop conditions, transportation interruptions, unavailability of fuel or increases in fuel costs, competitive demands and natural disasters or other catastrophic events (including, but not limited to, the outbreak of avian flu or similar food-borne illnesses in the United States and

Table of Contents

Canada). SYSCO's inability to obtain adequate supplies of its foodservice and related products as a result of any of the foregoing factors or otherwise could mean that SYSCO could not fulfill its obligations to customers, and customers may turn to other distributors.

Baugh Supply Chain Cooperative Structure

The National Supply Chain project involved the creation of BSCC which administers a consolidated product procurement program to develop, obtain and ensure consistent quality food and non-food products. BSCC is a cooperative for income tax purposes. SYSCO believes that the cooperative entity is appropriate for BSCC based on the business operations of this affiliate and on the legal structure applied. However, if the application of the cooperative structure was to be disallowed by any federal, state or local tax authority, SYSCO could be required to accelerate the payment of a portion or all of its income tax liabilities that it otherwise has deferred until future periods and be liable for interest on such amounts. Amounts included as deferred income tax liabilities related to BSCC deferred supply chain distributions were \$924,902,000 as of July 1, 2006. If SYSCO was required to accelerate a significant portion of these deferred tax liabilities, the company may be required to raise additional capital through debt financing or the issuance of equity or it may be required to forego or defer planned capital expenditures or share repurchases or a combination thereof and may be required to pay interest on amounts deferred.

Leverage and Debt Service

Because a substantial part of SYSCO's growth historically has been the result of acquisitions and capital expansion, SYSCO's continued growth depends, in large part, on its ability to continue this expansion. As a result, its inability to finance acquisitions and capital expenditures through borrowed funds could restrict its ability to expand. Moreover, any default under the documents governing the indebtedness of SYSCO could have a significant adverse effect on the company's cash flows, as well as the market value of SYSCO's common stock. Further, SYSCO's leveraged position may also increase its vulnerability to competitive pressures.

Product Liability Claims

SYSCO, like any other seller of food, faces the risk of exposure to product liability claims in the event that the use of products sold by the company causes injury or illness. With respect to product liability claims, SYSCO believes it has sufficient primary or excess umbrella liability insurance. However, this insurance may not continue to be available at a reasonable cost, or, if available, may not be adequate to cover all of SYSCO's liabilities. SYSCO generally seeks contractual indemnification and insurance coverage from parties supplying its products, but this indemnification or insurance coverage is limited, as a practical matter, to the creditworthiness of the indemnifying party and the insured limits of any insurance provided by suppliers. If SYSCO does not have adequate insurance or contractual indemnification available, product liability relating to defective products could materially reduce SYSCO's net earnings and earnings per share.

Reputation and Media Exposure

Maintaining a good reputation is critical to SYSCO's business, particularly to selling SYSCO Brand products. Anything that damages that reputation (whether or not justified), including adverse publicity about the quality, safety or integrity of the company's products, could quickly affect its revenues and profits. Reports, whether true or not, of food-borne illnesses (such as e-coli, avian flu, bovine spongiform encephalopathy, hepatitis A, trichinosis or salmonella) and injuries caused by food tampering could also severely injure the company's reputation. If patrons of the company's restaurant customers become ill from food-borne illnesses, the customers could be forced to temporarily close restaurant locations and SYSCO's sales would be correspondingly decreased. In addition, instances of food-borne illnesses or food tampering or other health concerns, even those unrelated to the use of SYSCO products, can result in negative publicity about the food service distribution industry and cause our sales to decrease dramatically.

Labor Relations and Availability of Qualified Labor

As of July 1, 2006, approximately 8,800 employees at 55 operating companies were members of 61 different local unions associated with the International Brotherhood of Teamsters and other labor organizations. In fiscal 2007, 16 agreements covering approximately 2,000 employees will expire. Failure of the operating companies to effectively renegotiate these contracts could result in work stoppages. Although SYSCO's operating subsidiaries have not experienced any significant labor disputes or work stoppages to date, and SYSCO believes they have satisfactory

relationships with their unions, a work stoppage due to failure of multiple operating subsidiaries to renegotiate union contracts could have a material adverse effect on SYSCO.

6

Table of Contents

SYSCO's operations rely heavily on its employees, particularly drivers, and any shortage of qualified labor could significantly affect the company's business. Our recruiting and retention efforts and efforts to increase productivity gains may not be successful and there may be a shortage of qualified drivers in future periods. Any such shortage would decrease SYSCO's ability to effectively serve its customers. Such a shortage would also likely lead to higher wages for employees and a corresponding reduction in the company's revenue and earnings.

Charter and Preferred Stock

Under its Restated Certificate of Incorporation, SYSCO's Board of Directors is authorized to issue up to 1.5 million shares of preferred stock without stockholder approval. Issuance of these shares could make it more difficult for anyone to acquire SYSCO without approval of the Board of Directors, depending on the rights and preferences of the stock issued. In addition, if anyone attempts to acquire SYSCO without approval of the Board of Directors of SYSCO, the existence of this undesignated preferred stock could allow the Board of Directors to adopt a shareholder rights plan without obtaining stockholder approval, which could result in substantial dilution to a potential acquiror. As a result, hostile takeover attempts that might result in an acquisition of SYSCO that could otherwise have been financially beneficial to SYSCO's stockholders could be deterred.

Tax Audit

As of July 1, 2006, the company's 2003 and 2004 federal income tax returns were under audit by the Internal Revenue Service (IRS). The company believes that it has appropriate support for the positions taken on these tax returns and has recorded a liability for its best estimate of the probable loss on certain of these positions. However, if the IRS disagrees with the positions taken by the company on its tax returns, SYSCO could have additional tax liability, including interest and penalties. If material, payment of such amounts upon final adjudication of any disputes could have an adverse effect on the company's financial results and cash flows.

Reliance on Technology

SYSCO's ability to decrease costs and increase profits, as well as its ability to serve customers most effectively, depends on the reliability of its technology network. The company uses software and other technology systems to load trucks in the most efficient manner to optimize the use of storage space and minimize the time spent at each stop. Any disruption to these computer systems could adversely impact SYSCO's customer service, decrease the volume of its business and result in increased costs. While SYSCO has invested and continues to invest in technology security initiatives and disaster recovery plans, these measures cannot fully insulate the company from technology disruption that could result in adverse effects on operations and profits.

Item 1B. *Unresolved Staff Comments*

None.

Table of Contents**Item 2. Properties**

The table below shows the number of distribution facilities and self-serve centers occupied by SYSCO in each state or province and the aggregate cubic footage devoted to cold and dry storage as of July 1, 2006.

8

Table of Contents

SYSCO owns approximately 464,285,000 cubic feet of its distribution facilities and self-serve centers (or 78.3% of the total cubic feet), and the remainder is occupied under leases expiring at various dates from fiscal 2007 to fiscal 2041, exclusive of renewal options. Certain of the facilities owned by the company are either subject to mortgage indebtedness or industrial revenue bond financing arrangements totaling \$15,789,000 at July 1, 2006. Such mortgage indebtedness and industrial revenue bond financing arrangements mature at various dates through fiscal 2026.

The company owns its approximately 175,000 square foot headquarters office complex in Houston, Texas and leases approximately 218,000 square feet of additional office space in Houston, Texas. The company began the expansion of its headquarters office complex in fiscal 2006, the first phase of which is expected to be completed in the fall of 2006. Upon completion of the first phase of the expansion, the company's headquarters office complex will be approximately 325,000 and 150,000 owned and leased square feet, respectively.

Facilities in Riviera Beach, Florida; Albuquerque, New Mexico; and Columbia, South Carolina (which in the aggregate accounted for approximately 2.6% of fiscal 2006 sales) are operating near capacity and the company is currently constructing expansions or replacements for these distribution facilities. The company has also announced plans to construct new distribution facilities in Knoxville, Tennessee and Longview, Texas. The company expects its second regional redistribution facility, to be located in Alachua, Florida, and will be operational in fiscal 2008. The company has also purchased the site of its third regional distribution facility to be built in Hamlet, Indiana.

As of July 1, 2006, SYSCO's fleet of approximately 8,900 delivery vehicles consisted of tractor and trailer combinations, vans and panel trucks, most of which are either wholly or partially refrigerated for the transportation of frozen or perishable foods. The company owns approximately 87% of these vehicles and leases the remainder.

Item 3. Legal Proceedings

SYSCO is engaged in various legal proceedings which have arisen in the normal course of business but have not been fully adjudicated. These proceedings, in the opinion of management, will not have a material adverse effect upon the consolidated financial position or results of operations of the company when ultimately concluded.

Item 4. Submission of Matters to a Vote of Security Holders

None.

PART II**Item 5. Market for Registrant's Common Equity and Related Stockholder Matters**

The principal market for SYSCO's Common Stock (SYY) is the New York Stock Exchange. The table below sets forth the high and low sales prices per share for SYSCO's Common Stock as reported on the New York Stock Exchange Composite Tape and the cash dividends declared for the periods indicated.

	Common Stock Prices		Dividends Declared Per Share
	High	Low	
Fiscal 2005:			
First Quarter	\$ 36.00	\$ 29.48	\$ 0.13
Second Quarter	38.43	29.71	0.15
Third Quarter	37.83	32.57	0.15
Fourth Quarter	38.04	34.23	0.15
Fiscal 2006:			
First Quarter	\$ 37.30	\$ 30.96	\$ 0.15
Second Quarter	33.59	29.98	0.17
Third Quarter	32.72	29.11	0.17
Fourth Quarter	32.15	29.11	0.17

The number of record owners of SYSCO's Common Stock as of August 26, 2006 was 14,091.

Table of Contents

On March 31, 2006, a total of 35,522 dividend access shares, convertible on a one-for-one basis into SYSCO shares, were released by a Canadian subsidiary of the company to the former shareholders of North Douglas Distributors, Ltd. n/k/a North Douglas Sysco Food Services, Inc. pursuant to the terms of an earnout agreement executed in connection with Sysco Holdings of BC, Inc.'s acquisition of North Douglas Distributors, Ltd. in December 2000.

The above issuance was made pursuant to the exemption from registration provided by Section 4(2) of the Securities Act of 1933, as amended.

SYSCO made the following share repurchases during the fourth quarter of fiscal 2006:

ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total Number of Shares Purchased(1)	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares That May Yet be Purchased Under the Plans or Programs
Month #1				
April 2 - April 29	420,141	\$ 31.59	418,000	19,448,900
Month #2				
April 30 - May 27	133,354	30.04	110,000	19,338,900
Month #3				
May 28 - July 1	12,131	30.36		19,338,900
Total	565,626	\$ 31.20	528,000	19,338,900

(1) The total number of shares purchased includes 2,141, 23,354 and 12,131 shares tendered by individuals in connection with stock option exercises in Month #1, Month #2 and Month #3, respectively.

On February 18, 2005, the company announced that the Board of Directors approved the repurchase of 20,000,000 shares. On November 10, 2005, the company announced that the Board of Directors approved the repurchase of an additional 20,000,000 shares upon the completion of the February 2005 program. Pursuant to these repurchase programs, shares may be acquired in the open market or in privately negotiated transactions at the company's discretion, subject to market conditions and other factors. In July 2004, the Board of Directors authorized the company to enter into agreements from time to time to extend its ongoing repurchase program to include repurchases during company announced blackout periods of such securities in compliance with Rule 10b5-1 promulgated under the Exchange Act.

On March 6, 2006, the company entered into a stock purchase plan with Wells Fargo Securities, LLC to purchase up to 1,500,000 shares of SYSCO common stock as authorized under the February 2005 and November 2005 repurchase programs pursuant to Rules 10b5-1 and 10b-18 under the Exchange Act. A total of 902,000 shares were purchased between March 6, 2006 and May 2, 2006, including during company blackout periods. By its terms, the agreement terminated on May 2, 2006.

From July 2, 2006 through August, 26, 2006, an additional 673,400 shares were purchased. As of August 26, 2006, no shares remained available for repurchase under the February 2005 repurchase program, and there were 18,665,500 shares remaining available for repurchase under the November 2005 repurchase program.

(1) In fiscal 2006, SYSCO recorded a one-time, after-tax, non-cash increase to earnings of \$9,285,000 as a result of changing the measurement date of its pension and other postretirement benefit plans from fiscal year-end to May 31st which represents a change in accounting. The pro forma effects of retroactive application of the change in the measurement date for fiscal 2005, 2004, 2003 and 2002 are not material.

(2)

SYSCO adopted the provisions of SFAS 123(R), *Share-Based Payment* effective at the beginning of fiscal 2006. As a result, the results of operations include incremental share-based compensation cost over what would have been recorded had the company continued to account for share-based compensation under APB No. 25, *Accounting for Stock Issued to Employees*.

- (3) SYSCO adopted the provisions of SFAS No. 142, *Accounting for Goodwill and Other Intangible Assets* effective at the beginning of fiscal 2003. As a result, the amortization of goodwill and intangibles with indefinite lives was discontinued.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Highlights

Sales increased 7.8% in fiscal 2006 over the prior year. Gross margins as a percentage of sales were 19.28% for fiscal 2006, or 0.18% greater as a percentage of sales than the prior year. Operating expenses as a percentage of sales for fiscal 2006 increased from the prior year, primarily due to incremental share-based compensation expense; increased fuel costs and increased pension costs, partially offset by lower management performance-based incentive compensation. Interest expense increased in fiscal 2006 over the prior year due to a combination of increased borrowing rates and increased borrowing levels. The increase in the effective tax rate for fiscal 2006 was due to the combination of the adoption of SFAS 123(R), coupled with the impact of certain tax benefits recorded in fiscal 2005. Primarily as a result of these factors, net earnings before the cumulative effect of accounting change for fiscal 2006 decreased 12.0% over the prior year.

The Northeast Redistribution Center (Northeast RDC) began operations in the third quarter of fiscal 2005; therefore, the net impact of the National Supply Chain project in fiscal 2006 includes both expenses incurred by the project as well as certain direct benefits. Current direct benefits have been realized in the areas of cost of sales and operating expenses. Management estimates that expenses

Table of Contents

and direct benefits related to the National Supply Chain project had a net negative impact on earnings before income taxes of approximately \$40,000,000 during fiscal 2006.

In fiscal 2006, SYSCO adopted the provisions of FASB Statement No. 123(R), Share-Based Payment, (SFAS 123(R)) utilizing the modified-prospective transition method under which prior period results have not been restated. The results of operations for fiscal 2006 include incremental share-based compensation cost over what would have been recorded had the company continued to account for share-based compensation under APB 25 of \$118,038,000 (\$105,810,000, net of tax).

SYSCO adopted accounting pronouncement EITF 04-13 Accounting for Purchases and Sales of Inventory With the Same Counterparty, (EITF 04-13) at the beginning of the fourth quarter of fiscal 2006. The accounting standard requires certain transactions, where inventory is purchased by SYSCO from a customer and then resold at a later date to the same customer (as defined), to be presented in the income statement on a net basis. The impact of adopting this new standard resulted in sales being reduced by \$99,803,000. Cost of sales were also reduced by the same amount and thus net earnings are unaffected by the adoption of this standard. SYSCO adopted this accounting pronouncement beginning in the fourth quarter of fiscal 2006 and will apply it to similar transactions prospectively. Prior year's sales and cost of sales have not been restated. Therefore, the calculation of sales growth and the comparison of gross margins, operating expenses and earnings as a percentage of sales between the two years are affected.

In the first quarter of fiscal 2006, SYSCO recorded a cumulative effect of a change in accounting, due to a change in the measurement date for pension and other postretirement benefit plans to assist the company in meeting accelerated SEC filing dates, which increased net earnings for fiscal 2006 by \$9,285,000, net of tax.

General economic conditions, including fuel costs and their impact on consumer spending, can have an impact on SYSCO's sales growth. Management believes that SYSCO's continued focus on customer account penetration through the use of business reviews with customers, increases in the number of customer contact personnel and efforts of the company's marketing associates overcame these economic conditions and contributed to the company's sales growth in fiscal 2006. These economic conditions may continue to be a factor to SYSCO's sales growth in future periods.

Overview

SYSCO distributes food and related products to restaurants, healthcare and educational facilities, lodging establishments and other foodservice customers. SYSCO's operations are located throughout the United States and Canada and include broadline companies, specialty produce companies, custom-cut meat operations, hotel supply operations, and SYGMA, the company's chain restaurant distribution subsidiary.

The company estimates that it serves about 14% of an approximately \$232 billion annual market that includes the North American foodservice and hotel amenity, furniture and textile markets. According to industry sources, the foodservice, or food-prepared-away-from-home, market represents approximately one-half of the total dollars spent on food purchases made at the consumer level. This share grew from about 37% in 1972 to about 50% in 1998 and has not changed materially since that time.

General economic conditions and consumer confidence can affect the frequency of purchases and amounts spent by consumers for food-prepared-away-from-home and in turn can impact SYSCO's sales. SYSCO historically has grown at a faster rate than the overall industry and has grown its market share in this fragmented industry.

The company intends to continue to expand its market share and grow earnings through strategies which include:

Sales growth: The company plans to grow sales by gaining an increased share of products purchased by existing customers, development of new customers, the use of foldouts (new operating companies created in established markets previously served by other SYSCO operating companies) and a disciplined acquisition program. The company uses market information to estimate the potential sales and profitability of new and existing customers. Marketing resources, SYSCO Brand products and value-added services provided by SYSCO can be custom-tailored to the purchasing needs of customers. Additionally, the investment of resources in any particular account can be made in proportion to the account's potential profitability.

Brand management: SYSCO Brand products are manufactured by suppliers to meet the company's product specifications using strict quality assurance standards. Management believes that SYSCO Brand products provide

a greater value to customers and differentiate the company from its competitors. Management also believes that SYSCO Brand products generally provide higher profitability than national brand products.

12

Table of Contents

Productivity gains: The company's investment in warehousing and transportation technology and the implementation of best business practices allows SYSCO to leverage operating expenses relative to sales growth.

Sales force effectiveness: The company invests in the development and expansion of its customer contact resources by hiring additional customer contact personnel through targeted recruiting, hiring and promotion practices, effective use of training programs and improved compensation systems. Expanded business review and business development functions allow the sales force to strengthen customer relationships and increase sales.

Supply chain management: The company's National Supply Chain project and related organization is being developed to reduce total supply chain costs, operating costs and working capital requirements of the company.

National Supply Chain Project

The company's National Supply Chain project is intended to optimize the supply chain activities for products for SYSCO's operating companies in each respective region and is expected to result in increased sales and profitability. In addition, it will lower inventory, operating costs, working capital requirements and future facility expansion needs at SYSCO's operating companies while providing greater value to our suppliers and customers. The company expects to build from seven to nine regional distribution centers in the United States. The first of these centers, the Northeast RDC located in Front Royal, Virginia, opened during the third quarter of fiscal 2005.

During fiscal 2006 management identified a number of operational changes that they believed would make the Northeast RDC more efficient and held case volumes constant while these changes were being implemented. Additional case volume began to flow through the Northeast RDC after implementing these changes and case volumes continued to increase at a controlled and measured pace. Management continues to believe that the long-term economic objectives of the project will be achieved. The long-term benefits expected to be realized from the National Supply Chain project will be reflected in the sales, cost of sales, operating expenses and interest expense line items in the Results of Operations statement.

In January 2006, SYSCO completed the purchase of land in Alachua, Florida for the future site of its second RDC, which will service the company's five broadline operating companies in Florida. This facility is expected to be operational in fiscal 2008. The company has also purchased the site for construction of a third RDC in Hamlet, Indiana.

Results of Operations

The following table sets forth the components of the Results of Operations expressed as a percentage of sales for the periods indicated:

	2006	2005	2004
Sales	100.0%	100.0%	100.0%

Basic earnings per share	(8.6)	7.1
Diluted earnings per share	(7.5)	7.3
Average shares outstanding	(2.3)	(1.0)
Diluted shares outstanding	(3.7)	(1.3)

Sales

Sales for fiscal 2006 were 7.8% greater than fiscal 2005. Acquisitions contributed 1.4% to the overall sales growth rate for fiscal 2006 and 0.8% for fiscal 2005. The adoption of EITF 04-13 at the beginning of the fourth quarter of fiscal 2006 reduced sales growth in fiscal 2006 by 0.3%, or \$99,803,000. Sales for fiscal 2005 were 3.2% greater than fiscal 2004, or 5.3% greater after adjusting for the additional week in fiscal 2004. Because the fourth quarter of fiscal 2004 contained an additional week as compared to fiscal 2005, sales growth for fiscal years 2005 and 2004 are not directly comparable. In order to provide a more comparable picture of sales growth, management believes that it is appropriate to adjust the sales figures for fiscal 2004 by the estimated impact of the additional week. As a result, sales for fiscal 2004 presented in the table below are adjusted by one-fourteenth of total sales for the fourth quarter. Set forth below is a reconciliation of actual sales growth to adjusted sales growth for the periods presented:

	2006 (52 Weeks)	2005 (52 Weeks)	2004 (53 Weeks)
Sales for the fiscal year	\$ 32,628,438,000	\$ 30,281,914,000	\$ 29,335,403,000
Estimated sales for the additional week			581,358,000
Adjusted sales	\$ 32,628,438,000	\$ 30,281,914,000	\$ 28,754,045,000

Actual percentage increase	7.8%	3.2%	12.2%
Adjusted percentage increase	7.8%	5.3%	10.0%

SYSCO generally expects to pass product cost increases to its customers; however, the actual amount of inflation reflected as sales price increases is difficult to quantify. Estimated product cost increases were 0.6% during fiscal 2006 as compared to 3.5% during fiscal 2005.

Table of Contents

SYSCO's continued focus on customer account penetration through the use of business reviews with customers, increases in the number of customer contact personnel and efforts of the company's marketing associates contributed to the sales growth in fiscal 2006. The number of customer contact personnel has increased approximately 6% since the end of fiscal 2005.

Management believes that prolonged periods of rising product costs together with general economic conditions, including the impact of increased fuel costs on consumer spending, contributed to the softness in the foodservice market and thus a slowing of SYSCO's sales growth beginning in the latter half of the fourth quarter of fiscal 2004 and continuing into the first half of fiscal 2005. After adjusting for the additional week in fiscal 2004, sales growth remained relatively stable over the course of fiscal 2005. Management believes that the declining rate of product cost increases over the course of fiscal 2005 has lessened the overall gross margin pressures experienced during the year and has contributed to the underlying unit growth in the latter half of fiscal 2005 and all of fiscal 2006. Additionally, management believes that the continued focus on the company's business review process has contributed to unit sales growth.

Industry sources estimate the total foodservice market experienced real sales growth of approximately 1.9% in calendar year 2005 and 2.3% in calendar year 2004.

A comparison of the sales mix in the principal product categories during the last three years is presented below:

	2006	2005	2004
Fresh and frozen meats	19%	19%	19%
Canned and dry products	18	18	18
Frozen fruits, vegetables, bakery and other	14	14	14
Poultry	10	11	11

Beverage products	3	3	3
Equipment and smallwares	2	2	2
Janitorial products	2	2	2
Medical supplies	1	1	1
	100%	100%	100%

A comparison of sales by type of customer during the last three years is presented below:

	2006	2005	2004
Restaurants	63%	64%	64%
Hospitals and nursing homes	10	10	10
Schools and colleges	5	5	5
Hotels and motels	6	6	6
All other	16	15	15
	100%	100%	100%

Gross Margins

Gross margins as a percentage of sales were 19.3% for fiscal 2006, as compared to 19.1% for fiscal 2005. The adoption of EITF 04-13 contributed 0.06% to the increase in gross margins as a percentage of sales in fiscal 2006. Management believes that the remaining gross margin increase was aided by several factors, including low product cost inflation and effective merchandising.

Estimated product cost increases, an internal measure of inflation, were 0.6% during fiscal 2006, as compared to 3.5% during fiscal 2005. SYSCO generally expects to pass product cost increases to its customers; however, during periods of rapidly increasing product costs, price increases to customers generally lag. This lag impacted gross margins in fiscal 2005 as discussed below. Conversely, in fiscal 2006, the moderation of product cost increases allowed SYSCO to be more effective in managing pricing to its customers. This was achieved by maintaining stable pricing and avoiding the absorption of significant product cost increases before pricing to customers was adjusted. The benefits realized by the National Supply Chain project and better leveraging of our purchasing power resulted in lower overall product costs.

Table of Contents

Gross margins as a percentage of sales were 19.1% for fiscal 2005, as compared to 19.3% for fiscal 2004. Management believes that this gross margin decline was caused by several factors, including product cost increases, changes in segment mix, customer mix and pricing pressure. The decline in gross margins as a percentage of sales slowed during the course of fiscal 2005 due in part to a lessening of the rate of product cost increases during the fiscal year. Product cost increases in most of the product categories had the impact of reducing gross margins as a percentage of sales. The gross margin reduction is generally due to two reasons: i) the resulting higher sales dollar base impacts the comparison of the ratio between the two years and ii) price increases passed on to customers lag behind the product cost increases incurred from vendors. In periods of rising product costs, even when gross margin dollars are maintained or slightly increased, the resulting gross margin percentage of sales ratio will be lower than the prior year due to the higher sales dollar base.

During periods of rapidly increasing product costs like those experienced in fiscal 2005, price increases to customers generally lag. In the case of marketing associate served customers, marketing associates will generally encounter resistance and may not be able to immediately raise prices. In the case of multi-unit customers, prices are agreed to contractually. The contracted prices are fixed for periods of up to 30 days and thus price increases to these customers will also lag. The contracted prices are frequently also fee-based which results in the same gross margin dollars with a higher sales price and therefore a lower gross margin as a percentage of sales.

Changes in segment mix also contributed to the decline in gross margins in fiscal 2005 when compared to the prior year. Sales at the SYGMA segment, which traditionally have lower margins than Broadline segment sales, grew faster than sales at the Broadline segment. Changes in customer mix also contributed to the decline in gross margins in fiscal 2005 when compared to the prior year. Multi-unit customer sales in the Broadline segment, which traditionally yield lower gross margins and lower expenses than marketing associate-served customer sales, grew faster, and thus represented a greater percentage of total sales in fiscal 2005 than in fiscal 2004. Management also believes that competitive pricing pressures contributed to the decline in gross margins.

Operating Expenses

Operating expenses include the costs of warehousing and delivering products as well as selling, administrative and occupancy expenses. Changes in the percentage relationship of operating expenses to sales result from an interplay of several factors, including improved efficiencies, customer mix, and product cost increases which result in increases in sales prices.

Operating expenses as a percentage of sales were 14.7% for fiscal 2006, as compared to 13.9% for fiscal 2005. The increase in operating expenses as a percentage of sales included incremental share-based compensation, increased fuel costs, increased pension costs and increased expenses associated with the National Supply Chain project, partially offset by reduced management performance based incentive bonuses.

Operating expenses for fiscal 2006 include incremental share-based compensation cost of \$118,038,000 resulting from the adoption of SFAS 123(R) (See Note 13 to the consolidated financial statements in Item 8). Fuel costs increased \$48,600,000 fiscal 2006 over the prior year. Net pension costs increased \$23,734,000 in fiscal 2006 over the prior year. Operating expenses were reduced by the recognition of a gain of \$9,702,000 in fiscal 2006 to adjust the carrying value of life insurance assets to their cash surrender value, as compared to a gain of \$13,803,000 in fiscal 2005. Management performance based incentive bonuses were reduced by \$27,270,000 in fiscal 2006 as compared to fiscal 2005.

Management estimates that expenses and direct benefits related to the National Supply Chain project had a net negative impact on earnings before income taxes of approximately \$40,000,000 during fiscal 2006. Direct benefits from the National Supply Chain project in fiscal 2006 were primarily realized in reduced cost of sales. The long-term benefits expected to be realized from the National Supply Chain project will be reflected in the sales, cost of sales, operating expenses and interest expense line items in the Results of Operations statement.

Operating expenses as a percentage of sales were 13.9% for fiscal 2005, as compared to 14.1% for fiscal 2004. The decrease in operating expenses as a percentage of sales was aided by improved operating efficiencies. For example, the Broadline segment continues to demonstrate improving trends in key expense metrics, including miles driven per trip, pieces per stop and pieces per error. Increases in product costs and the resulting increased average sales price per item also favorably impacted expenses as a percentage of sales as operating costs increased at a lower rate than sales.

Operating expenses for fiscal 2005 were negatively impacted by increased costs to deliver product to customers due to increased fuel costs of approximately \$31,000,000 over the prior year. Operating expenses related to the National Supply Chain project were \$46,450,000 in fiscal 2005, as compared to \$29,333,000 in fiscal 2004. Also included in operating expenses was the recognition of a

Table of Contents

gain of \$13,803,000 in fiscal 2005 to adjust the carrying value of life insurance assets to their cash surrender value, as compared to a gain of \$19,124,000 in fiscal 2004. Operating expenses were reduced by a reduction of management performance based incentive bonuses of \$26,989,000 and a decrease in net pension cost of \$7,374,000 in fiscal 2005 as compared to fiscal 2004.

In order to partially manage the volatility and uncertainty of fuel costs, SYSCO from time to time will enter into forward purchase commitments for a portion of SYSCO's projected monthly diesel fuel requirements. Forward diesel fuel purchase commitments outstanding as of July 1, 2006 and July 2, 2005, respectively, were not material.

Net pension costs for fiscal 2007 are expected to decrease \$53,900,000 from fiscal 2006 due primarily to an increase in the discount rate utilized to determine net pension costs.

Interest Expense

The increase in interest expense of \$34,100,000 in fiscal 2006 over fiscal 2005 was due to a combination of increased borrowing rates and increased borrowing levels.

In fiscal 2006, commercial paper and short-term bank borrowing rates increased over the prior year. Effective borrowing rates on long-term debt also increased over the comparable prior year period. In fiscal 2005, effective borrowing rates on long-term debt were lowered through the use of fixed-to-floating interest rate swaps.

Higher overall borrowing levels are a result of the level of share repurchases, increased working capital requirements driven primarily by sales growth and continued capital investments in the form of additions to plant and equipment and acquisitions of new businesses.

The increase in interest expense of \$5,120,000 in fiscal 2005 over fiscal 2004, was due to increased borrowing interest rates. The increase in the company's overall borrowing interest rates was primarily due to an increase in the percentage of the company's debt with fixed interest rates in fiscal 2005 as compared to fiscal 2004. In fiscal 2004, the company's debt portfolio included a larger percentage of floating rate debt in the form of either commercial paper issuances or fixed rate debt converted to floating through interest rate swap agreements. In addition, market interest rates increased during fiscal 2005.

Other, Net

Changes between the years result from fluctuations in miscellaneous activities, primarily gains and losses on the sale of surplus facilities.

Income Taxes

The effective tax rate was 39.35% in fiscal 2006, 36.97% in fiscal 2005 and 38.50% in fiscal 2004.

The increase in the effective tax rate for fiscal 2006 was a combination of the adoption of SFAS 123(R), which is discussed in Note 13, Share-Based Compensation, and Note 14, Income Taxes, to the Consolidated Financial Statements in Item 8, and certain tax benefits recorded in fiscal 2005. SYSCO recorded a tax benefit of \$12,228,000, or 10.4% of the \$118,038,000 in incremental share-based compensation expense recorded in fiscal 2006, as a result of the adoption of SFAS 123(R).

The income tax expense in fiscal 2005 was reduced by tax benefits totaling \$19,500,000 primarily related to the reversal of a tax contingency accrual and to the reversal of valuation allowances previously recorded on certain state net operating loss carryforwards.

Net Earnings

Net earnings decreased 11.0% in fiscal 2006 over the prior year. The decrease was due primarily to the factors discussed above. In addition, in the first quarter of fiscal 2006, SYSCO recorded a cumulative effect of a change in accounting due to a change in the measurement date for pension and other postretirement benefits, which increased net earnings for fiscal 2006 by \$9,285,000, net of tax.

The increases in net earnings in fiscal 2005 over fiscal 2004 were due to the factors discussed above. In addition, the comparison of fiscal 2005's net earnings to fiscal 2004 was negatively impacted by the additional 53rd week in fiscal 2004.

Table of Contents*Earnings Per Share*

Basic earnings per share and diluted earnings per share decreased 8.6% and 7.5%, respectively, in fiscal 2006 over the prior year. These decreases were due primarily to the result of factors discussed above, partially offset by a net reduction in shares outstanding. The net reduction in average shares outstanding used to calculate basic earnings per share is primarily due to share repurchases. The net reduction in diluted shares outstanding is primarily due to share repurchases, the exclusion of certain options from the diluted share calculation due to their anti-dilutive effect and a modification of the treasury stock method calculation utilized to compute the dilutive effect of stock options as a result of the adoption of SFAS 123(R). This modification results in lower diluted shares outstanding than would have been calculated had compensation cost not been recorded for stock options and stock issuances under the Employees Stock Purchase Plan.

Basic earnings per share and diluted earnings per share increased 7.1% and 7.3%, respectively, in fiscal 2005 over prior year. The increases in earnings per share were the result of factors discussed above, as well as a net reduction of shares outstanding due primarily to share repurchases.

Return on Average Shareholders' Equity

The return on average shareholders' equity was approximately 30% in fiscal 2006, 35% in fiscal 2005 and 39% in fiscal 2004. The lower return in fiscal 2006 was impacted by the reduction in earnings resulting from the adoption of SFAS 123(R) as discussed above. The higher return in fiscal 2004 was primarily due to the impact of minimum pension liability adjustments to shareholders' equity. Since its inception, SYSCO has averaged approximately 20% return on average shareholders' equity.

Segment Results

The following table sets forth the change in the selected financial data of each of the company's reportable segments expressed as a percentage increase over the prior year and should be read in conjunction with Business Segment Information in Note 17 to the Consolidated Financial Statements in Item 8:

	2006		2005	
	Sales	Earnings Before Taxes	Sales	Earnings Before Taxes
Broadline	5.8%	1.9%	1.7%	5.0%
SYGMA	10.8	(55.4)	10.4	(28.1)
Other	23.4	28.6	8.4	11.7

The following table sets forth sales and earnings before taxes of each of the company's reportable segments expressed as a percentage of the respective consolidated total and should be read in conjunction with Business Segment Information in Note 17 to the Consolidated Financial Statements in Item 8:

	2006		2005		2004	
	Sales	Earnings Before Taxes	Sales	Earnings Before Taxes	Sales	Earnings Before Taxes
Broadline	78.7%	110.8%	80.1%	99.4%	81.3%	97.9%
SYGMA	13.3	0.6	12.9	1.2	12.1	1.7
Other	9.2	7.9	8.1	5.6	7.7	5.2
Intersegment sales	(1.2)		(1.1)		(1.1)	
Unallocated corporate expenses		(19.3)		(6.2)		(4.8)

Total	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
-------	--------	--------	--------	--------	--------	--------

The company does not allocate share-based compensation related to stock option grants, issuances of stock pursuant to the Employees Stock Purchase Plan and restricted stock grants to non-employee directors and corporate officers. The increase in unallocated corporate expenses as a percentage of consolidated earnings before taxes in fiscal 2006 over fiscal 2005 is primarily attributable to these items. See further discussion of Share-Based Compensation in Note 13 to the Consolidated Financial Statements in Item 8.

Table of Contents*Broadline Segment*

Sales for fiscal 2006 were 5.8% greater than fiscal 2005. The adoption of EITF 04-13 in the fourth quarter of fiscal 2006 reduced sales growth in fiscal 2006 by 0.2%, or \$57,211,000. Sales for fiscal 2005 were 1.7% greater than fiscal 2004. Acquisitions contributed 0.1% to the overall sales growth rate for both fiscal 2006 and fiscal 2005. Management believes that SYSCO's continued focus on customer account penetration through the use of business reviews with customers, increases in the number of customer contact personnel and efforts of the company's marketing associates contributed to the sales growth in fiscal 2006.

The fiscal 2005 sales growth was primarily due to increased sales to marketing associate-served customers and multi-unit customers, including increased sales of SYSCO Brand products and increases in both sales prices and unit volumes. The comparison of fiscal 2005 sales to fiscal 2004 is negatively impacted by the additional week in fiscal 2004.

The decrease of Broadline segment sales as a percentage of total SYSCO sales in fiscal 2006 and fiscal 2005 was due primarily to strong sales growth in the SYGMA and other segments outpacing the Broadline sales growth, as well as the contributions to sales growth from the acquisitions of specialty meat, specialty produce and SYGMA operations during fiscal 2006 and fiscal 2005.

Marketing associate-served sales as a percentage of Broadline sales in the U.S. remained the same at 54.0% in fiscal 2006 and 2005. SYSCO Brand sales as a percentage of Broadline sales in the U.S. decreased to 55.4% for fiscal 2006 as compared to 57.4% in fiscal 2005.

The increase in earnings before income taxes for fiscal 2006 were primarily due to increases in sales partially offset by higher fuel costs and the continued investment in the National Supply Chain project.

The increase in earnings before income taxes for fiscal 2005 was primarily due to increases in sales and increased operating efficiencies aided by lower expenses as a percentage of sales. Factors contributing to the lower expenses as a percentage of sales were reduced performance based management incentive compensation and decreased net periodic pension costs, which overcame higher fuel costs and increased expenditures related to the National Supply Chain project. The comparison of fiscal 2005's earnings before income taxes to fiscal 2004 was also negatively impacted by the additional 53rd week in fiscal 2004.

SYGMA Segment

Sales for fiscal 2006 were 10.8% greater than fiscal 2005. The adoption of EITF 04-13 in the fourth quarter of fiscal 2006 reduced sales growth in fiscal 2006 by 1.1%, or \$42,560,000. Sales for fiscal 2005 were 10.4% greater than fiscal 2004. Acquisitions contributed 0.5% to the overall sales growth rate for fiscal 2006 and 2.6% for fiscal 2005. Fiscal 2006 growth was due primarily to sales to new customers and sales growth in SYGMA's existing customer base related to new locations added by those customers, each of which temporarily increases SYGMA's cost to service the customers. In addition, certain customers were transferred from Broadline operations to be serviced by SYGMA operations, contributing to the sales increase.

Fiscal 2005 sales growth was due primarily to sales to new customers, sales growth in SYGMA's existing customer base related to new locations added by those customers, as well as increases in sales to existing locations, price increases resulting primarily from higher product costs and sales from acquisitions. The comparison of fiscal 2005 sales to fiscal 2004 is negatively impacted by the additional week in fiscal 2004.

The decrease in earnings before income taxes in fiscal 2006 was due to several factors. Certain of SYGMA's customers have experienced a slowdown in their business. This in turn results in lower cases per delivery and therefore reduced gross margin dollars per stop. In addition, SYGMA has experienced increased fuel costs, startup costs related to new facilities, costs incurred on information systems projects and increased workers compensation costs.

The decrease in earnings before income taxes in fiscal 2005 was due to several factors. During the fourth quarter of fiscal 2004 and the first quarter of fiscal 2005, SYGMA discontinued servicing a portion of its largest customer's locations due to that customer's geographic supply chain realignment. SYGMA offset these lost sales by obtaining sales from additional locations from this customer and obtaining new business from other customers. In many cases, this new business is being served out of different SYGMA locations than those that originally served the discontinued business. SYGMA opened a new facility to serve a portion of the new business which it began serving in the fourth

quarter of fiscal 2005. As a result, during the fourth quarter of fiscal 2004 and throughout fiscal 2005, SYGMA's operating profits have been impacted by increased operating expenses as it transitioned its operations to serve the new business it has acquired. In addition, SYGMA's gross margins as a percentage of sales in fiscal 2005 have declined from the comparable period in fiscal 2004 due to product cost increases and lower agreed upon pricing with its customers.

Table of Contents**Liquidity and Capital Resources**

SYSCO provides marketing and distribution services to foodservice customers primarily throughout the United States and Canada. The company intends to continue to expand its market share through profitable sales growth, foldouts and acquisitions. The company also strives to increase the effectiveness of its customer contact personnel and its consolidated buying programs, as well as the productivity of its warehousing and distribution activities. These objectives require continuing investment. SYSCO's resources include cash provided by operations and access to capital from financial markets.

SYSCO's operations historically have produced significant cash flow. Cash generated from operations is first allocated to working capital requirements; investments in facilities, fleet and other equipment required to meet customers' needs; cash dividends; and acquisitions compatible with the company's overall growth strategy. Any remaining cash generated from operations may, at the discretion of management, be applied toward a portion of the cost of the share repurchase program, while the remainder of the cost may be financed with additional long-term debt. SYSCO's share repurchase program is used primarily to offset shares issued under various employee benefit and compensation plans, for acquisitions, to reduce shares outstanding (which may have the net effect of increasing earnings per share) and to aid in managing the ratio of long-term debt to total capitalization. Management targets a long-term debt to total capitalization ratio between 35% and 40%. The ratio may exceed the target range from time to time, due to borrowings incurred in order to fund acquisitions and internal growth opportunities, and due to fluctuations in the timing and amount of share repurchases. The ratio also may fall below the target range due to strong cash flow from operations and fluctuations in the timing and amount of share repurchases. This ratio was 36.2% and 33.1% at July 1, 2006 and July 2, 2005, respectively. For purposes of calculating this ratio, long-term debt includes both the current maturities and long-term portion.

Operating Activities

Cash flow from operations in fiscal 2006 was negatively impacted by an increase in inventory balances of \$119,392,000 and an increase in accounts receivable balances of \$162,586,000, partially offset by an increase in accounts payable balances of \$49,775,000. Cash flow from operations in fiscal 2005 was negatively impacted by an increase in inventory balances of \$35,014,000 and an increase in accounts receivable balances of \$72,829,000, partially offset by an increase in accounts payable balances of \$28,080,000. Cash flow from operations in fiscal 2004 was negatively impacted by an increase in inventory balances of \$162,502,000 and an increase in accounts receivable balances of \$177,058,000, partially offset by an increase in accounts payable balances of \$95,874,000.

The increases in accounts receivable and inventory balances were primarily a result of sales growth. Accounts payable balances are impacted by many factors, including changes in product mix, cash discount terms and changes in payment terms with vendors due to the use of more efficient electronic payment methods.

Also impacting cash flow from operations was an increase in accrued expenses of \$29,161,000 in fiscal 2006, a decrease in accrued expenses of \$52,423,000 in fiscal 2005 and an increase in accrued expenses of \$26,687,000 in fiscal 2004. The increase in accrued expenses for fiscal 2006, was related to various miscellaneous accruals while the changes in accrued expenses for fiscal 2005 and 2004 were primarily due to the amount of accrued incentive bonuses related to those years.

Also impacting cash flow from operations was an increase in other long term liabilities and prepaid pension cost of \$75,382,000 in fiscal 2006, and decreases of \$86,338,000 in fiscal 2005 and \$35,056,000 in fiscal 2004. The increases in other long-term liabilities and prepaid pension cost in fiscal 2006 are primarily due to the amount of net pension cost recognized exceeding the amount of pension contribution during the year. The decreases in other long-term liabilities and prepaid pension cost in fiscal 2005 and fiscal 2004 are primarily due to the amount of pension contributions exceeding the net pension cost recognized in each year. The company's contributions to its defined benefit plans were \$73,764,000, \$220,361,000 and \$165,512,000 during fiscal 2006, fiscal 2005 and fiscal 2004, respectively. Included in the amounts contributed in fiscal 2006 was \$66,000,000 voluntarily contributed to the qualified pension plan representing the maximum tax deductible amount. Included in the amount contributed for fiscal 2005 was \$134,000,000 voluntarily contributed to the qualified pension plan in the fourth quarter in addition to the \$80,000,000 which was contributed during the year. The decision to increase the contributions to the Retirement Plan in fiscal 2005 was primarily due to the decrease in the discount rate used to measure the year-end obligation, which

increased the pension obligation and negatively impacted the fiscal 2005 year-end pension funded status prior to the additional \$134,000,000 contribution. The company expects to contribute approximately \$90,000,000 to its defined benefit plans in fiscal 2007.

Table of Contents

One of the factors increasing the amount of taxes paid in fiscal 2006 as compared to the amounts paid in fiscal 2005 was the amount of deductible pension contributions made during the year. As discussed above, the company's pension contributions were substantially lower in fiscal 2006 than in the preceding fiscal years.

The amount of taxes paid in fiscal 2004 was reduced by \$70,615,000 as the result of the utilization of a U.S. federal net operating loss carryforward. This net operating loss carryforward was generated in fiscal 2003 primarily as a result of the deferral of supply chain distributions.

Investing Activities

Fiscal 2006 capital expenditures included the construction of fold-out facilities in Springfield, Illinois; Geneva, Alabama; and Knoxville, Tennessee, replacement or significant expansion of facilities in Raleigh, North Carolina; Columbus, Ohio; Albuquerque, New Mexico; and Denver, Colorado, and continuing work on the corporate headquarters expansion.

Fiscal 2005 capital expenditures included the construction of fold-out facilities in Spokane, Washington and Geneva, Alabama, replacement or significant expansion of facilities in Baltimore, Maryland; Cleveland, Ohio; Denver, Colorado; Milwaukee, Wisconsin; Miami, Florida; and Hartford, Connecticut, and the completion of the Northeast Redistribution Center in Front Royal, Virginia.

Fiscal 2004 capital expenditures included the construction of fold-out facilities in Oxnard, California and Fargo, North Dakota, replacement or significant expansion of facilities in Billings, Montana; Cleveland, Ohio; Jacksonville, Florida; Miami, Florida; and San Antonio, Texas, and the Northeast Redistribution Center in Front Royal, Virginia, as well as continued expenditures related to the National Supply Chain project.

Total capital expenditures in fiscal 2007 are expected to be in the range of \$575,000,000 to \$625,000,000. Fiscal 2007 expenditures will include the continuation of the fold-out program; facility, fleet and other equipment replacements and expansions; the corporate office expansion; the company's National Supply Chain project; and investments in technology.

During fiscal 2006, SYSCO acquired for cash one broadline foodservice operation, one custom meat-cutting operation and five specialty produce distributors. During fiscal 2005, SYSCO acquired for cash one broadline foodservice operation, four custom meat-cutting operations, and two specialty produce distributors. During fiscal 2004, SYSCO acquired for cash certain assets of two broadline foodservice operations, a specialty produce distributor, and one quickservice operation.

Financing Activities

The company routinely engages in Board-approved share repurchase programs. The number of shares acquired and their cost during the past three fiscal years was 16,479,800 shares for \$544,131,000 in fiscal 2006, 16,790,200 shares for \$597,660,000 in fiscal 2005, and 16,454,300 shares for \$608,506,000 in fiscal 2004. An additional 673,400 shares have been purchased at a cost of \$20,191,000 through August 26, 2006, resulting in 18,665,500 shares remaining available for repurchase as authorized by the Board as of that date.

The company made four regular quarterly dividend payments during each of fiscal years 2006, 2005 and 2004. SYSCO began paying the current quarterly dividend rate of \$0.17 per share in January 2006, an increase from the \$0.15 per share that became effective in January 2005. In May 2006, SYSCO declared its regular quarterly dividend for the first quarter of fiscal 2007 of \$0.17 per share, which was paid in July 2006. In September 2006, SYSCO also declared its regular quarterly dividend for the second quarter of fiscal 2007 of \$0.17 per share, payable in October 2006.

In November 2000, the company filed with the Securities and Exchange Commission a shelf registration statement covering 30,000,000 shares of common stock to be offered from time to time in connection with acquisitions. As of August 26, 2006, 29,477,835 shares remained available for issuance under this registration statement.

In March 2004, SYSCO issued 4.60% notes totaling \$200,000,000 due March 15, 2014 in a private offering. Proceeds from the notes were utilized to retire outstanding commercial paper.

In June 2005, SYSCO repaid the 6.5% senior notes totaling \$150,000,000 at maturity utilizing a combination of cash flow from operations and commercial paper issuances. In July 2005, SYSCO repaid the 4.75% senior notes totaling \$200,000,000 at maturity also utilizing a combination of cash flow from operations and commercial paper issuances.

Table of Contents

In April 2005, SYSCO filed with the Securities and Exchange Commission a shelf registration statement covering \$1,500,000,000 in debt securities. The registration statement was declared effective in May 2005. In September 2005, SYSCO issued 5.375% senior notes totaling \$500,000,000 due on September 21, 2035, under its April 2005 shelf registration. These notes, which were priced at 99.911% of par, are unsecured, are not subject to any sinking fund requirement and include a redemption provision which allows SYSCO to retire the notes at any time prior to maturity at the greater of par plus accrued interest or an amount designed to ensure that the noteholders are not penalized by the early redemption. Proceeds from the notes were utilized to retire commercial paper issuances outstanding as of September 2005.

In March 2005, SYSCO entered into a forward-starting interest rate swap with a notional amount of \$350,000,000 as a cash flow hedge of the variability in the cash outflows of interest payments on the forecasted debt issuance due to changes in the benchmark interest rate. The fair value of the swap as of July 2, 2005 was (\$32,584,000), which is reflected in Accrued expenses on the Consolidated Balance Sheet, with the corresponding amount reflected as a loss, net of tax, in Other comprehensive income (loss). In September 2005, in conjunction with the issuance of the 5.375% senior notes described above, SYSCO settled the \$350,000,000 notional amount forward-starting interest rate swap. Upon termination, SYSCO paid cash of \$21,196,000, which represented the fair value liability associated with the swap agreement at the time of termination. This amount is being amortized as interest expense over the 30-year term of the debt, and the unamortized balance is reflected as a loss, net of tax, in Other comprehensive income (loss).

In May 2006, SYSCO repaid at maturity the 7.0% senior notes totaling \$200,000,000 utilizing a combination of cash flow from operations and commercial paper issuances.

SYSCO has uncommitted bank lines of credit, which provided for unsecured borrowings for working capital of up to \$145,000,000, of which \$29,300,000 was outstanding as of July 1, 2006 and \$13,400,000 was outstanding as of August 26, 2006.

In November 2005, SYSCO and one of its subsidiaries, SYSCO International, Co., entered into a new revolving credit facility to support the company's U.S. and Canadian commercial paper programs. The facility, which was increased to \$750,000,000 in March 2006, may be increased up to \$1,000,000,000 at the option of the company, and terminates on November 4, 2010, subject to extension. The facility replaced the previous \$450,000,000 (U.S. dollar) and \$100,000,000 (Canadian dollar) revolving credit agreements in the U.S. and Canada, respectively, both of which were terminated.

In April 2006, SYSCO initiated a new commercial paper program allowing the company to issue short-term unsecured notes in aggregate not to exceed \$1.3 billion. This new commercial paper program replaced notes that were issued under SYSCO's previous commercial paper program as they matured and became due and payable.

During fiscal 2006, 2005 and 2004, aggregate outstanding commercial paper issuances and short-term bank borrowings ranged from approximately \$126,846,000 to \$774,530,000, \$28,560,000 to \$253,384,000, and \$73,102,000 to \$478,114,000, respectively. Outstanding commercial paper issuances were \$399,568,000 as of July 1, 2006 and \$464,917,000 as of August 26, 2006.

Total debt at July 1, 2006 was \$1,762,692,000, of which approximately 75% was at fixed rates averaging 6.0% and the remainder was at floating rates averaging 5.2%. Included in current maturities of long-term debt at July 1, 2006 are the 7.25% senior notes totaling \$100,000,000, which mature in April 2007. It is the company's intention to fund the repayment of these notes at maturity through issuances of commercial paper, senior notes or a combination thereof.

As part of normal business activities, SYSCO issues letters of credit through major banking institutions as required by certain vendor and insurance agreements. As of July 1, 2006 and July 2, 2005, letters of credit outstanding were \$60,000,000 and \$76,817,000, respectively.

SYSCO's affiliate, BSCC, is a cooperative for income tax purposes. SYSCO believes that the cooperative entity is appropriate for BSCC based on the business operations of this affiliate and on the legal structure applied. However, if the application of the cooperative structure was to be disallowed by any federal, state or local tax authority, SYSCO could be required to accelerate the payment of a portion or all of its income tax liabilities that it otherwise has deferred until future periods and be liable for interest on such amounts. Amounts included as deferred income tax liabilities related to BSCC deferred supply chain distributions were \$924,902,000 as of July 1, 2006. If SYSCO was required to accelerate a significant portion of these deferred tax liabilities, the company may be required to raise additional capital

through debt financing or the issuance of equity or it may be required to forego or defer planned capital expenditures or share repurchases or a combination thereof and may be required to pay interest on amounts deferred.

Table of Contents

In summary, management believes that the company's cash flows from operations, as well as the availability of additional capital under its existing commercial paper programs, bank lines of credit, debt shelf registration and its ability to access capital from financial markets in the future, will be sufficient to meet its cash requirements while maintaining proper liquidity for normal operating purposes.

Off-Balance Sheet Arrangements

In the normal course of business with customers, vendors and others, SYSCO has entered into off-balance sheet arrangements, such as letters of credit, which totaled \$60,000,000 as of July 1, 2006. Additionally, other than normal long-term non-capitalized leases included in the Contractual Obligations table below, the company does not have any material off-balance sheet financing arrangements. None of these off-balance sheet arrangements either has, or is likely to have, a material effect on SYSCO's current or future financial condition, results of operations, liquidity or capital resources.

Contractual Obligations

The following table sets forth certain information concerning SYSCO's obligations and commitments to make contractual future payments:

	Payments Due by Period				
	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
(In thousands)					
Recorded Contractual Obligations:					
Short-term debt and commercial paper	\$ 428,868	\$ 29,300	\$	\$ 399,568	\$
Long-term debt	1,305,415	102,269	3,852	7,403	1,191,891
Capital lease obligations	28,409	3,996	1,706	1,388	21,319
Deferred compensation(1)	116,236	6,641	9,556	9,159	90,880
SERP and other postretirement plans(2)	211,691	9,356	25,104	37,413	139,818
Unrecorded Contractual Obligations:					
Interest payments related to debt(3)	1,293,133	67,874	123,760	123,760	977,739
Long-term non-capitalized leases	331,278	56,499	86,803	58,995	128,981
Purchase obligations(4)	1,050,109	810,903	74,613	66,185	98,408
Total contractual cash obligations	\$ 4,765,139	\$ 1,086,838	\$ 325,394	\$ 703,871	\$ 2,649,036

(1) The estimate of the timing of future payments under the Executive Deferred Compensation Plan involves the use of certain assumptions, including retirement ages and payout periods.

(2) Includes estimated contributions to the unfunded SERP and other postretirement benefit plans made in amounts needed to fund benefit payments for vested participants in these plans through fiscal 2015, based on actuarial assumptions.

(3) Includes payments on floating rate debt based on rates as of July 1, 2006, assuming amount remains unchanged until maturity, and payments on fixed rate debt based on maturity dates.

(4) For purposes of this table, purchase obligations include agreements for purchases of product in the normal course of business, for which all significant terms have been confirmed. Such amounts included in the table above are based on estimates. Purchase obligations also includes amounts committed with a third party to provide hardware and hardware hosting services (See discussion under Note 16, Commitments and Contingencies, in the Notes to

Consolidated Financial Statements in Item 8). Purchase obligations exclude full requirements electricity contracts where no stated minimum purchase volume is required.

Certain acquisitions involve contingent consideration, typically payable only in the event that certain operating results are attained or certain outstanding contingencies are resolved. Aggregate contingent consideration amounts outstanding as of July 1, 2006 included \$147,572,000 in cash. This amount is not included in the table above.

No obligations were included in the table above for the qualified retirement plan because as of July 1, 2006, SYSCO does not have a minimum funding requirements under ERISA guidelines for this plan due to its previous voluntary contributions.

Table of Contents**Critical Accounting Policies**

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, sales and expenses in the accompanying financial statements. Significant accounting policies employed by SYSCO are presented in the notes to the financial statements.

Critical accounting policies are those that are most important to the portrayal of the company's financial condition and results of operations. These policies require management's most subjective or complex judgments, often employing the use of estimates about the effect of matters that are inherently uncertain. Senior management has reviewed with the Audit Committee of the Board of Directors the development and selection of the critical accounting estimates and this related disclosure. SYSCO's most critical accounting policies pertain to the allowance for doubtful accounts receivable, self-insurance programs, pension plans, income taxes, vendor consideration, accounting for business combinations and share-based compensation.

Allowance for Doubtful Accounts

SYSCO evaluates the collectibility of accounts receivable and determines the appropriate reserve for doubtful accounts based on a combination of factors. In circumstances where the company is aware of a specific customer's inability to meet its financial obligation, a specific allowance for doubtful accounts is recorded to reduce the receivable to the net amount reasonably expected to be collected. In addition, allowances are recorded for all other receivables based on analysis of historical trends of write-offs and recoveries. The company utilizes specific criteria to determine uncollectible receivables to be written off, including bankruptcy, accounts referred to outside parties for collection and accounts past due over specified periods. If the financial condition of SYSCO's customers were to deteriorate, additional allowances may be required.

Self-Insurance Program

SYSCO maintains a self-insurance program covering portions of workers' compensation, group medical, general liability and vehicle liability costs. The amounts in excess of the self-insured levels are fully insured by third party insurers. Liabilities associated with these risks are estimated in part by considering historical claims experience, medical cost trends, demographic factors, severity factors and other actuarial assumptions. Projections of future loss expenses are inherently uncertain because of the random nature of insurance claims occurrences and could be significantly affected if future occurrences and claims differ from these assumptions and historical trends. In an attempt to mitigate the risks of workers' compensation, vehicle and general liability claims, safety procedures and awareness programs have been implemented.

Pension Plans

Amounts related to defined benefit plans recognized in the financial statements are determined on an actuarial basis. Three of the more critical assumptions in the actuarial calculations are the discount rate for determining the current value of plan benefits, the assumption for the rate of increase in future compensation levels and the expected rate of return on plan assets.

The measurement date for the pension and other postretirement benefit plans is fiscal year end for fiscal years 2005 and prior. Beginning in fiscal 2006, the measurement date is May 31st which represents a change in accounting. The one-month acceleration of the measurement date allows additional time for management to evaluate and report the actuarial pension measurements in the year-end financial statements and disclosures within the accelerated filing deadlines of the Securities and Exchange Commission. The cumulative effect of this change in accounting resulted in an increase to earnings in the first quarter of fiscal 2006 of \$9,285,000, net of tax.

For guidance in determining the discount rate, SYSCO calculates the implied rate of return on a hypothetical portfolio of high-quality fixed-income investments for which the timing and amount of cash outflows approximates the estimated payouts of the pension plan. The discount rate assumption is reviewed annually and revised as deemed appropriate. The discount rate assumption utilized impacts the recorded amount of net pension costs. The discount rate utilized to determine net pension costs for fiscal 2006 decreased 0.65% to 5.60% from the discount rate utilized to determine net pension costs for fiscal 2005 of 6.25%. This 0.65% decrease in the discount rate increased SYSCO's net pension costs for fiscal 2006 by approximately \$29,300,000. The discount rate for determining fiscal 2007 net pension costs, which was determined as of the May 31, 2006 measurement date, increased 1.13% to 6.73%. This 1.13%

increase will decrease SYSCO's net pension costs for fiscal 2007 by an estimated \$53,079,000.

24

Table of Contents

SYSCO looks to actual plan experience in determining the rates of increase in compensation levels. SYSCO used a plan specific age-related set of rates for the qualified pension plan (Retirement Plan), which are equivalent to a single rate of 6.17% and 5.89%, respectively, as of July 1, 2006 and July 2, 2005. The Supplemental Executive Retirement Plan assumes annual salary increases of 10% through fiscal 2007 and 7% thereafter as of July 1, 2006 and July 2, 2005.

The expected long-term rate of return on plan assets of the Retirement Plan was 9.00% for fiscal 2006 and 2005. The expectations of future returns are derived from a mathematical asset model that incorporates assumptions as to the various asset class returns, reflecting a combination of rigorous historical performance analysis and the forward-looking views of the financial markets regarding the yield on long-term bonds and the historical returns of the major stock markets. Although not determinative of future returns, the effective annual rate of return on plan assets, developed using geometric/compound averaging, was approximately 10.3%, 8.4%, 4.0% and 5.9% over the 20-year, 10-year, 5-year and 1-year periods ended December 31, 2005, respectively. In addition, in nine of the last 15 years, the actual return on plan assets has exceeded 9.00%. The rate of return assumption is reviewed annually and revised as deemed appropriate.

The expected return on plan assets impacts the recorded amount of net pension costs. A 1.0% increase (decrease) in the assumed rate of return for fiscal 2007 would decrease (increase) SYSCO's net pension costs for fiscal 2007 by approximately \$12,972,000.

Minimum pension liability adjustments result when the accumulated benefit obligation exceeds the fair value of plan assets and are recorded so that the recorded pension liability is at a minimum equal to the unfunded accumulated benefit obligation. Minimum pension liability adjustments are non-cash adjustments that are reflected as an increase (or decrease) in the pension liability and an offsetting charge (or benefit) to shareholders' equity, net of tax, through accumulated other comprehensive loss (or income). Amounts reflected in accumulated other comprehensive income or loss related to minimum pension liability, were charges, net of tax, of \$11,106,000 as of July 1, 2006, and \$54,286,000 as of July 2, 2005.

Changes in the assumptions, including changes to the discount rate discussed above, together with the normal growth of the plan, the impact of actuarial losses from prior periods and the timing and amount of contributions, increased net pension costs \$23,700,000 in fiscal 2006 and is expected to decrease net pension costs in fiscal 2007 by approximately \$53,900,000.

The company made cash contributions to its pension plans of \$73,764,000 and \$220,361,000 in fiscal years 2006 and 2005, respectively, including voluntary contributions to the Retirement Plan of \$66,000,000 and \$214,000,000 in fiscal 2006 and fiscal 2005, respectively. In fiscal 2006, the company's voluntary contribution to the Retirement Plan represented the maximum tax-deductible amount. In fiscal 2005, the company made a voluntary contribution of \$134,000,000 in the fourth quarter in addition to the \$80,000,000 which was contributed during the year. The decision to increase the contributions to the Retirement Plan in fiscal 2005 was primarily due to the decrease in the discount rate used to measure the year-end obligation, which increased the pension obligation and negatively impacted the fiscal 2005 year-end pension funded status prior to the additional \$134,000,000 contribution. In fiscal 2007, as in the previous years, contributions to the Retirement Plan will not be required to meet ERISA minimum funding requirements but the company anticipates that it will make voluntary contributions of approximately \$80,000,000, which is not greater than the estimated maximum amount that will be tax deductible in fiscal 2007. The estimated fiscal 2007 contributions to fund benefit payments for the SERP and other post-retirement plans together are approximately \$10,000,000.

Income Taxes

The determination of the company's provision for income taxes requires significant judgment, the use of estimates and the interpretation and application of complex tax laws. The company's provision for income taxes reflects a combination of income earned and taxed in the various U.S. federal and state, as well as Canadian federal and provincial jurisdictions. Jurisdictional tax law changes, increases or decreases in permanent differences between book and tax items, accruals or adjustments of accruals for tax contingencies or valuation allowances, and the company's change in the mix of earnings from these taxing jurisdictions all affect the overall effective tax rate.

In evaluating the exposures connected with the various tax filing positions, the company establishes an accrual when, despite management's belief that the company's tax return positions are supportable, management believes that certain positions may be successfully challenged and a loss is probable. When facts and circumstances change, these accruals are adjusted.

Table of Contents*Vendor Consideration*

SYSCO recognizes consideration received from vendors when the services performed in connection with the monies received are completed and when the related product has been sold by SYSCO. There are several types of cash consideration received from vendors. In many instances, the vendor consideration is in the form of a specified amount per case or per pound. In these instances, SYSCO will recognize the vendor consideration as a reduction of cost of sales when the product is sold. In the situations where the vendor consideration is not related directly to specific product purchases, SYSCO will recognize these as a reduction of cost of sales when the earnings process is complete, the related service is performed and the amounts realized. In certain of these latter instances, the vendor consideration represents a reimbursement of a specific incremental identifiable cost incurred by SYSCO. In these cases, SYSCO classifies the consideration as a reduction of those costs with any excess funds classified as a reduction of cost of sales and recognizes these in the period in which the costs are incurred and related services performed.

Accounting for Business Combinations

Goodwill and intangible assets represent the excess of consideration paid over the fair value of tangible net assets acquired. Certain assumptions and estimates are employed in determining the fair value of assets acquired, including goodwill and other intangible assets, as well as determining the allocation of goodwill to the appropriate reporting unit. In addition, SYSCO assesses the recoverability of these intangibles by determining whether the fair values of the applicable reporting units exceed their carrying values. The evaluation of fair value requires the use of projections, estimates and assumptions as to the future performance of the operations in performing a discounted cash flow analysis, as well as assumptions regarding sales and earnings multiples that would be applied in comparable acquisitions in the industry. Actual results could differ from these assumptions and projections, resulting in the company revising its assumptions and, if required, recognizing an impairment loss.

Share-Based Compensation

SYSCO provides compensation benefits to employees and non-employee directors under several share-based payment arrangements including various employee stock option plans, the Employees' Stock Purchase Plan, the Management Incentive Plans and the Non-Employee Directors Stock Plan.

Prior to July 3, 2005, SYSCO accounted for its stock option plans and the Employees' Stock Purchase Plan using the intrinsic value method of accounting provided under APB Opinion No. 25, Accounting for Stock Issued to Employees, (APB 25) and related interpretations, as permitted by FASB Statement No. 123, Accounting for Stock-Based Compensation, (SFAS 123) under which no compensation expense was recognized for stock option grants and issuances of stock pursuant to the Employees' Stock Purchase Plan. However, share-based compensation expense was recognized in periods prior to fiscal 2006 (and continues to be recognized) for stock issuances pursuant to the Management Incentive Plans and stock grants to non-employee directors. Share-based compensation was included as a pro forma disclosure in the financial statement footnotes and continues to be provided for periods prior to fiscal 2006.

Effective July 3, 2005, SYSCO adopted the fair value recognition provisions of SFAS 123(R) using the modified-prospective transition method. Under this transition method, compensation cost recognized in fiscal 2006 includes: a) compensation cost for all share-based payments granted through July 2, 2005, but for which the requisite service period had not been completed as of July 2, 2005, based on the grant date fair value estimated in accordance with the original provisions of SFAS 123, and b) compensation cost for all share-based payments granted subsequent to July 2, 2005, based on the grant date fair value estimated in accordance with the provisions of SFAS 123(R). Results for prior periods have not been restated.

As a result of adopting SFAS 123(R) on July 3, 2005, SYSCO's earnings before income taxes and net earnings for fiscal 2006 were \$118,038,000 and \$105,810,000 lower, respectively, than if the company had continued to account for share-based compensation under APB 25. Basic and diluted earnings per share before the cumulative effect of the accounting change for fiscal 2006 were both \$0.17 lower than if the company had continued to account for share-based compensation under APB 25.

As of July 1, 2006, there was \$112,111,000 of total unrecognized compensation cost related to share-based compensation arrangements. That cost is expected to be recognized over a weighted-average period of 2.72 years.

The fair value of each option award is estimated on the date of grant using a Black-Scholes option pricing model. Expected volatility is based on historical volatility of SYSCO's stock, implied volatilities from traded options on SYSCO's stock and other factors. SYSCO utilizes historical data to estimate option exercise and employee termination behavior within the valuation model; separate

Table of Contents

groups of employees that have similar historical exercise behavior are considered separately for valuation purposes. The risk-free rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

The fair value of the stock issued under the Employee Stock Purchase Plan is calculated as the difference between the stock price and the employee purchase price. The fair value of the stock issued under the Management Incentive Plans is based on the stock price less a 12% discount for post-vesting restrictions. The discount for post-vesting restrictions is estimated based on restricted stock studies and by calculating the cost of a hypothetical protective put option over the restriction period.

The compensation cost related to these share-based awards is recognized over the requisite service period. The requisite service period is generally the period during which an employee is required to provide service in exchange for the award.

The compensation cost related to stock issuances resulting from awards under the Management Incentive Plans is accrued over the fiscal year to which the incentive bonus relates. The compensation cost related to stock issuances resulting from employee purchases of stock under the Employees Stock Purchase Plan is recognized during the quarter in which the employee payroll withholdings are made.

Certain of SYSCO's option awards are generally subject to graded vesting over a service period. In those cases, SYSCO will recognize compensation cost on a straight-line basis over the requisite service period for the entire award. In other cases, certain of SYSCO's option awards provide for graded vesting over a service period but include a performance-based provision allowing for the vesting to accelerate. In these cases, if it is probable that the performance condition will be met, SYSCO recognizes compensation cost on a straight-line basis over the shorter performance period; otherwise, it recognizes compensation cost over the probable longer service period.

In addition, certain of SYSCO's options provide that if the optionee retires at certain age and years of service thresholds, the options continue to vest as if the optionee continued to be an employee. In these cases, for awards granted prior to July 2, 2005, SYSCO will recognize the compensation cost for such awards over the service period and accelerate any remaining unrecognized compensation cost when the employee retires. For awards granted subsequent to July 3, 2005, SYSCO will recognize compensation cost for such awards over the period from the date of grant to the date the employee first becomes eligible to retire with his options continuing to vest after retirement.

New Accounting Standards

The Financial Accounting Standards Board (FASB) issued FASB Staff Position No. FSP 85-4-1, *Accounting for Life Settlement Contracts by Third-Party Investors* (FSP FTB 85-4-1), in March 2006 which allows an investor to account for its investments in a life settlement contract using either the investment method or the fair value method. The investment method requires the initial investment to be recognized at the transaction price, while the fair value method requires the initial investment to be recognized at its transaction price and remeasured to fair value each subsequent reporting period. This standard was adopted by the FASB to address volatility concerns when underlying investments are maintained in the stock market. The election of the investment method or fair value method is irrevocable and should be made on an instrument-by-instrument basis. Previously, only the fair value method was available. FSP FTB 85-4-1 is effective for SYSCO in the first quarter of fiscal 2007. Prospective application is required for all new investments in life settlement contracts, and a cumulative-effect adjustment to retained earnings should be made at the date of adoption to recognize the impact on existing life settlement contract investments. SYSCO will adopt FSP FTB 85-4-1 in the first quarter of fiscal 2007 using the investment method which will result in a cumulative change in accounting principle charge of approximately \$39,735,000.

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an Interpretation of FASB Statement No. 109 (FIN 48), which clarifies the accounting for uncertainty in income taxes recognized in accordance with FASB Statement No. 109 (SFAS 109). FIN 48 clarifies the application of SFAS 109 by defining criteria that an individual tax position must meet for any part of the benefit of that position to be recognized in the financial statements. Additionally, FIN 48 provides guidance on the measurement, derecognition, classification and disclosure of tax positions, along with accounting for the related interest and penalties. The provisions of FIN 48 are effective for fiscal years beginning after December 15, 2006, with the cumulative effect of the change in accounting principle recorded as an adjustment to opening retained earnings. SYSCO is currently evaluating the

impact the adoption of FIN 48 will have on the company's financial position, results of operations and cash flows.

Table of Contents**Forward-Looking Statements**

Certain statements made herein that look forward in time or express management's expectations or beliefs with respect to the occurrence of future events are forward-looking statements under the Private Securities Litigation Reform Act of 1995. They include statements about SYSCO's ability to increase its market share and sales, long-term debt to capitalization target ratios, anticipated capital expenditures, timing and expected benefits of the National Supply Chain project and related regional distribution centers, the potential outcome of ongoing tax audits and SYSCO's ability to meet future cash requirements and remain profitable.

These statements are based on management's current expectations and estimates; actual results may differ materially due in part to the risk factors discussed above. In addition, SYSCO's ability to increase its market share and sales, meet future cash requirements and remain profitable could be affected by conditions in the economy and the industry and internal factors such as the ability to control expenses, including fuel costs. The ability to meet long-term debt to capitalization target ratios also may be affected by cash flow including amounts spent on share repurchases and acquisitions and internal growth.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

SYSCO does not utilize financial instruments for trading purposes. SYSCO's use of debt directly exposes the company to interest rate risk. Floating rate debt, where the interest rate fluctuates periodically, exposes the company to short-term changes in market interest rates. Fixed rate debt, where the interest rate is fixed over the life of the instrument, exposes the company to changes in market interest rates reflected in the fair value of the debt and to the risk that the company may need to refinance maturing debt with new debt at a higher rate.

SYSCO manages its debt portfolio to achieve an overall desired position of fixed and floating rates and may employ interest rate swaps as a tool to achieve that goal. The major risks from interest rate derivatives include changes in the interest rates affecting the fair value of such instruments, potential increases in interest expense due to market increases in floating interest rates and the creditworthiness of the counterparties in such transactions.

In September 2005, SYSCO issued 5.375% senior notes totaling \$500,000,000 due on September 21, 2035. In conjunction with the issuance of the 5.375% senior notes, SYSCO settled a \$350,000,000 notional amount forward-starting interest rate swap which was designated as a cash flow hedge of the variability in the cash outflows of interest payments on the debt issuance due to changes in the benchmark interest rate.

At July 1, 2006, the company had outstanding \$399,568,000 of commercial paper at variable rates of interest with maturities through July 3, 2006. The company's total long-term debt obligations of \$1,733,392,000 were primarily at fixed rates of interest. The company had no interest rate swaps outstanding at July 1, 2006.

In the following table as of July 1, 2006, commercial paper issuances are reflected as floating rate debt and both the U.S. and Canadian commercial paper issuances outstanding are classified as long-term based on the maturity date of the company's revolving loan agreement which supports the company's U.S. and Canadian commercial paper programs and the company's intent to continue to refinance this facility on a long-term basis.

The following table presents the company's interest rate position as of July 1, 2006. All amounts are stated in U.S. dollar equivalents.

Table of Contents

At July 2, 2005, the company had \$157,851,000 of commercial paper outstanding at variable rates of interest with maturities through July 29, 2005. The company's total long-term debt obligations of \$1,367,110,000 were primarily at fixed rates of interest.

At that time, management believed that present market conditions reflected fixed long term rates near historical lows. As such, management believed that fixed long term rates presented a better opportunity than in the recent past and had the intent to issue between \$350,000,000 and \$500,000,000 of long term debt at fixed rates with extended terms in September 2005, the amount to be issued depending upon market conditions at the time of issuance. In March 2005, SYSCO entered into a forward-starting interest rate swap with a notional amount of \$350,000,000 as a cash flow hedge of the variability in the cash outflows of interest payments on \$350,000,000 of the forecasted debt issuance due to changes in the benchmark interest rate. The issuance of this long-term debt in fiscal 2006 is discussed above.

During part of fiscal 2005, SYSCO had several fixed to floating interest rate swaps outstanding. These were entered into in fiscal 2004 as management believed that floating interest rates were more advantageous. During fiscal 2005, SYSCO terminated the fixed to floating interest rate swaps outstanding locking in effective yields on the related debt.

In the following tables as of July 2, 2005, commercial paper issuances are reflected as floating rate debt and the U.S. commercial paper is classified as long-term based on the maturity date of the company's revolving loan agreement which supports the company's U.S. commercial paper program and the company's intent to continue to refinance this facility on a long-term basis.

The following tables present the company's interest rate position as of July 2, 2005. All amounts are stated in U.S. dollar equivalents.

The company has Canadian subsidiaries, all of which use the Canadian dollar as their functional currency with the exception of a financing subsidiary. To the extent that business transactions are not denominated in Canadian dollars, the company is exposed to foreign currency exchange rate risk. SYSCO will also incur gains and losses within shareholders' equity due to translation of the financial statements from Canadian dollars to U.S. dollars. The Canadian financing subsidiary has notes denominated in U.S. dollars, which has the potential to create taxable income in Canada when the debt is paid due to changes in the exchange rate from the inception of the debt through the payment date. A 10% unfavorable change in the fiscal 2006 year end exchange rate would not materially increase the tax liability associated with these notes. The company does not routinely enter into material agreements to hedge foreign currency risks.

Table of Contents

The price and availability of diesel fuel fluctuates due to changes in production, seasonality and other market factors generally outside of our control. Increased fuel costs may have a negative impact on the company's results of operations in three areas. First, the high cost of fuel can negatively impact consumer confidence and discretionary spending and thus reduce the frequency and amount spent by consumers for food prepared away from home. Second, the high cost of fuel can increase the price paid by SYSCO for product purchases for which SYSCO may not be able to pass these costs fully to its customers. Third, increased fuel costs impact the costs incurred by SYSCO to deliver product to its customers. During fiscal 2006, 2005 and 2004, fuel costs represented approximately 0.5%, 0.4% and 0.3% of sales, respectively. Fuel costs incurred by SYSCO in fiscal 2006 increased by approximately \$48,600,000 over fiscal 2005.

In order to partially manage the volatility and uncertainty of fuel costs, SYSCO from time to time will enter into forward purchase commitments for a portion of SYSCO's projected monthly diesel fuel requirements. Forward diesel fuel purchase commitments outstanding as of July 1, 2006 were not material.

REPORT OF MANAGEMENT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of SYSCO Corporation (SYSCO) is responsible for establishing and maintaining adequate internal control over financial reporting for the company. SYSCO s internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

SYSCO s management assessed the effectiveness of SYSCO s internal control over financial reporting as of July 1, 2006. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control – Integrated Framework*. Based on this assessment, management concluded that, as of July 1, 2006, SYSCO s internal control over financial reporting was effective based on those criteria.

Ernst & Young LLP has issued an audit report on management s assessment of SYSCO s internal control over financial reporting as of July 1, 2006.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors
SYSCO Corporation

We have audited management's assessment, included in the accompanying Report of Management on Internal Control Over Financial Reporting, that SYSCO Corporation and its subsidiaries (SYSCO or the Company) maintained effective internal control over financial reporting as of July 1, 2006, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). SYSCO's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that SYSCO maintained effective internal control over financial reporting as of July 1, 2006, is fairly stated, in all material respects, based on the COSO criteria. Also, in our opinion, SYSCO maintained, in all material respects, effective internal control over financial reporting as of July 1, 2006, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), SYSCO's consolidated balance sheets as of July 1, 2006 and July 2, 2005 and the related consolidated results of operations, shareholders' equity and cash flows for each of the three years in the period ended July 1, 2006 and our report dated September 12, 2006 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors
SYSCO Corporation

We have audited the accompanying consolidated balance sheets of SYSCO Corporation (a Delaware Corporation) and subsidiaries as of July 1, 2006 and July 2, 2005, and the related consolidated results of operations, shareholders equity, and cash flows for each of the three years in the period ended July 1, 2006. Our audits also included the financial statement schedule at Item 15(a), No. 2. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of SYSCO Corporation and subsidiaries at July 1, 2006 and July 2, 2005, and the consolidated results of their operations and their cash flows for each of the three years in the period ended July 1, 2006, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

As discussed in Note 3 to the consolidated financial statements, in 2006 the Company changed the measurement date for its pension and other postretirement benefit plans. As discussed in Note 13 to the consolidated financial statements, effective July 3, 2005, SYSCO Corporation adopted Financial Accounting Standards Board Statement No. 123(R), Share Based Payment.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of SYSCO Corporation's internal control over financial reporting as of July 1, 2006, based on criteria established in the Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated September 12, 2006 expressed an unqualified opinion thereon.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****1. SUMMARY OF ACCOUNTING POLICIES****Business and Consolidation**

Sysco Corporation (SYSCO or the company) is engaged in the marketing and distribution of a wide range of food and related products primarily to the foodservice or food-prepared-away-from-home industry. These services are performed for approximately 394,000 customers from 171 principal distribution facilities located throughout the United States and Canada.

The accompanying financial statements include the accounts of SYSCO and its subsidiaries. All significant intercompany transactions and account balances have been eliminated. Certain amounts in the prior years have been reclassified to conform to the fiscal 2006 presentation.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates that affect the reported amounts of assets, liabilities, sales and expenses. Actual results could differ from the estimates used.

Cash and Cash Equivalents

For cash flow purposes, cash includes cash equivalents such as time deposits, certificates of deposit, short-term investments and all highly liquid instruments with original maturities of three months or less.

Accounts Receivable

Accounts receivable consist primarily of trade receivables from customers and receivables from suppliers for marketing or incentive programs. SYSCO determines the past due status of trade receivables based on contractual terms with each customer. SYSCO evaluates the collectibility of accounts receivable and determines the appropriate reserve for doubtful accounts based on a combination of factors. In circumstances where the company is aware of a specific customer's inability to meet its financial obligation to SYSCO, a specific allowance for doubtful accounts is recorded to reduce the receivable to the net amount reasonably expected to be collected. In addition, allowances are recorded for all other receivables based on an analysis of historical trends of write-offs and recoveries. The company utilizes specific criteria to determine uncollectible receivables to be written off including bankruptcy, accounts referred to outside parties for collection and accounts past due over specified periods. The allowance for doubtful accounts receivable was \$29,100,000 as of July 1, 2006 and \$29,604,000 as of July 2, 2005. Customer accounts written off, net of recoveries, were \$21,128,000 or 0.06% of sales, \$20,840,000 or 0.07% of sales, and \$28,485,000 or 0.10% of sales for fiscal 2006, 2005 and 2004, respectively.

Inventories

Inventories consisting primarily of finished goods include food and related products held for resale and are valued at the lower of cost (first-in, first-out method) or market. Elements of costs include the purchase price of the product and freight charges to deliver the product to the company's warehouses and are net of certain cash or non-cash consideration received from vendors (see Vendor Consideration).

Plant and Equipment

Capital additions, improvements and major replacements are classified as plant and equipment and are carried at cost. Depreciation is recorded using the straight-line method, which reduces the book value of each asset in equal amounts over its estimated useful life. Maintenance, repairs and minor replacements are charged to earnings when they are incurred. Upon the disposition of an asset, its accumulated depreciation is deducted from the original cost, and any gain or loss is reflected in current earnings.

Applicable interest charges incurred during the construction of new facilities and development of software for internal use are capitalized as one of the elements of cost and are amortized over the assets' estimated useful lives. Interest capitalized for the past three years was \$2,853,000 in 2006, \$4,316,000 in 2005 and \$7,495,000 in 2004.

Table of Contents**Long-Lived Assets**

Management reviews long-lived assets for indicators of impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Cash flows expected to be generated by the related assets are estimated over the asset's useful life based on updated projections. If the evaluation indicates that the carrying amount of the asset may not be recoverable, the potential impairment is measured based on a projected discounted cash flow model.

Goodwill and Intangibles

Goodwill and intangibles represent the excess of cost over the fair value of tangible net assets acquired. Goodwill and intangibles with indefinite lives are not amortized. Intangibles with definite lives are amortized over their useful lives, generally ranging from three to ten years.

Goodwill is assigned to the reporting units that are expected to benefit from the synergies of the combination. The recoverability of goodwill and intangibles is assessed annually, or more frequently as needed when events or changes have occurred that would suggest an impairment of carrying value, by determining whether the fair values of the applicable reporting units exceed their carrying values. The evaluation of fair value requires the use of projections, estimates and assumptions as to the future performance of the operations in performing a discounted cash flow analysis, as well as assumptions regarding sales and earnings multiples that would be applied in comparable acquisitions.

Derivative Financial Instruments

SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, requires the recognition of all derivatives as assets or liabilities within the Consolidated Balance Sheets at fair value. Gains or losses on derivative financial instruments designated as fair value hedges are recognized immediately in the Consolidated Results of Operations, along with the offsetting gain or loss related to the underlying hedged item.

Gains or losses on derivative financial instruments designated as cash flow hedges are recorded as a separate component of shareholders' equity until settlement (or until hedge ineffectiveness is determined), whereby gains or losses are reclassified to the Consolidated Results of Operations in conjunction with the recognition of the underlying hedged item. To the extent that the periodic changes in the fair value of the derivatives are not effective, or if the hedge ceases to qualify for hedge accounting, the ineffective portion of the periodic non-cash changes are recorded in Operating expenses in the Consolidated Results of Operations in the period of the change.

Treasury Stock

The company records treasury stock purchases at cost. Shares removed from treasury are valued at cost using the average cost method.

Foreign Currency Translation

The assets and liabilities of all Canadian subsidiaries are translated at current exchange rates. Related translation adjustments are recorded as a component of Accumulated other comprehensive income.

Revenue Recognition

The company recognizes revenue from the sale of a product when it is considered to be realized or realizable and earned. The company determines these requirements to be met at the point at which the product is delivered to the customer. The company grants certain customers sales incentives such as rebates or discounts and treats these as a reduction of sales at the time the sale is recognized. Purchases and sales of inventory with the same counterparty that are entered into in contemplation of one another are considered to be a single nonmonetary transaction. Beginning in the fourth quarter of fiscal 2006, the company recorded the net effect of such transactions in the Consolidated Results of Operations within Sales as a result of a new accounting standard. See further discussion in Note 3.

Table of Contents**Vendor Consideration**

SYSCO recognizes consideration received from vendors when the services performed in connection with the monies received are completed and when the related product has been sold by SYSCO. There are several types of cash consideration received from vendors. In many instances, the vendor consideration is in the form of a specified amount per case or per pound. In these instances, SYSCO will recognize the vendor consideration as a reduction of cost of sales when the product is sold. In the situations where the vendor consideration is not related directly to specific product purchases, SYSCO will recognize these as a reduction of cost of sales when the earnings process is complete, the related service is performed and the amounts realized. In certain of these latter instances, the vendor consideration represents a reimbursement of a specific incremental identifiable cost incurred by SYSCO. In these cases, SYSCO classifies the consideration as a reduction of those costs with any excess funds classified as a reduction of cost of sales and recognizes these in the period in which the costs are incurred and related services performed.

Shipping and Handling Costs

Shipping and handling costs include costs associated with the selection of products and delivery to customers. Included in operating expenses are shipping and handling costs of approximately \$1,857,093,000 in fiscal 2006, \$1,718,485,000 in fiscal 2005, and \$1,624,552,000 in fiscal 2004.

Insurance Program

SYSCO maintains a self-insurance program covering portions of workers' compensation, group medical, general and vehicle liability costs. The amounts in excess of the self-insured levels are fully insured by third party insurers. Liabilities associated with these risks are estimated in part by considering historical claims experience, medical cost trends, demographic factors, severity factors and other actuarial assumptions. Amounts accrued for self-insurance were \$91,356,000 and \$87,029,000 as of July 1, 2006 and July 2, 2005, respectively.

Share-Based Compensation

SYSCO recognizes expense for its share-based compensation based on the fair value of the awards that are granted. The fair value of the stock options is estimated at the date of grant using the Black-Scholes option pricing model. Option pricing methods require the input of highly subjective assumptions, including the expected stock price volatility. Measured compensation cost is recognized ratably over the vesting period of the related share-based compensation award.

Acquisitions

Acquisitions of businesses are accounted for using the purchase method of accounting and the financial statements include the results of the acquired operations from the respective dates they joined SYSCO.

The purchase price of the acquired entities is allocated to the net assets acquired and liabilities assumed based on the estimated fair value at the dates of acquisition, with any excess of cost over the fair value of net assets acquired, including intangibles, recognized as goodwill. The balances included in the Consolidated Balance Sheets related to recent acquisitions are based upon preliminary information and are subject to change when final asset and liability valuations are obtained. Material changes to the preliminary allocations are not anticipated by management.

2. NEW ACCOUNTING STANDARDS

The Financial Accounting Standards Board (FASB) issued FASB Staff Position No. FTB 85-4-1, *Accounting for Life Settlement Contracts by Third-Party Investors* (FSP FTB 85-4-1), in March 2006 which allows an investor to account for its investments in a life settlement contract using either the investment method or the fair value method. The investment method requires the initial investment to be recognized at the transaction price, while the fair value method requires the initial investment to be recognized at its transaction price and remeasured to fair value each subsequent reporting period. This standard was adopted by the FASB to address volatility concerns when underlying investments are maintained in the stock market. The election of the investment method or fair value method is irrevocable and should be made on an instrument-by-instrument basis. Previously, only the fair value method was available. FSP FTB 85-4-1 is effective for SYSCO in the first quarter of fiscal 2007. Prospective application is required for all new investments in life settlement contracts, and a cumulative-effect adjustment to retained earnings should be made at the date of adoption to recognize the

Table of Contents

impact on existing life settlement contract investments. SYSCO will adopt FSP FTB 85-4-1 in the first quarter of fiscal 2007 using the investment method which will result in a cumulative change in accounting principle charge of approximately \$39,735,000.

In June 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109 (FIN 48), which clarifies the accounting for uncertainty in income taxes recognized in accordance with FASB Statement No. 109 (SFAS 109). FIN 48 clarifies the application of SFAS 109 by defining criteria that an individual tax position must meet for any part of the benefit of that position to be recognized in the financial statements. Additionally, FIN 48 provides guidance on the measurement, derecognition, classification and disclosure of tax positions, along with accounting for the related interest and penalties. The provisions of FIN 48 are effective for fiscal years beginning after December 15, 2006, with the cumulative effect of the change in accounting principle recorded as an adjustment to opening retained earnings. SYSCO is currently evaluating the impact the adoption of FIN 48 will have on the company's financial position, results of operations and cash flows.

3. CHANGES IN ACCOUNTING

Beginning in fiscal 2006, SYSCO changed the measurement date for the pension and other postretirement benefit plans from fiscal year-end to May 31st, which represents a change in accounting. Management believes this accounting change was preferable, as the one-month acceleration of the measurement date allows additional time for management to evaluate and report the actuarial pension measurements in the year-end financial statements and disclosures within the accelerated filing deadlines of the Securities and Exchange Commission. The cumulative effect of this change in accounting resulted in an increase to earnings in the first quarter of fiscal 2006 of \$9,285,000, net of tax.

Pro forma net earnings and earnings per share adjusted for the effect of retroactive application of the change in measurement date on net pension costs, net of tax, are as follows:

	2005	2004 (53 Weeks)
Reported net earnings	\$ 961,457,000	\$ 907,214,000
Retroactive effect, net of tax	5,781,000	(1,254,000)
Pro forma net earnings	\$ 967,238,000	\$ 905,960,000
Basic earnings per share:		
Reported net earnings	\$ 1.51	\$ 1.41
Retroactive effect, net of tax	0.01	
Pro forma net earnings	\$ 1.52	\$ 1.41
Diluted earnings per share:		
Reported net earnings	\$ 1.47	\$ 1.37
Retroactive effect, net of tax	0.01	
Pro forma net earnings	\$ 1.48	\$ 1.37

In September 2005, the Emerging Issues Task Force (EITF) reached a consensus of Issue No. 04-13, Accounting for Purchases and Sales of Inventory With the Same Counterparty, which requires that two or more inventory transactions with the same counterparty (as defined) should be viewed as a single nonmonetary transaction, if the transactions were entered into in contemplation of one another. Exchanges of inventory between entities in the same

line of business should be accounted for at fair value or recorded at carrying amounts, depending on the classification of such inventory. This guidance was effective for the fourth quarter of fiscal 2006 for SYSCO. SYSCO has certain transactions where finished goods are purchased from a customer for warehousing and distribution and resold to the same customer. These are evidenced by title transfer and are separately invoiced. Historically, the company has recorded such transactions in the Consolidated Results of Operations for purchases within Cost of Sales and sales within Sales. Beginning in the fourth quarter of fiscal 2006, the company recorded the net effect of such transactions in the Consolidated Results of Operations within Sales by reducing sales and cost of sales in the amount of \$99,803,000. The amount included in the Consolidated Results of Operations within Cost of Sales for the 39 week period ended April 1, 2006 and fiscal 2005 and 2004 which were recorded on a gross

42

Table of Contents

basis prior to the adoption of EITF 04-13 were \$279,746,000, \$347,018,000 and \$276,041,000, respectively. Such amounts were not restated when the new standard was adopted because prospective treatment is required.

4. PLANT AND EQUIPMENT

A summary of plant and equipment, including the related accumulated depreciation, appears below:

	July 1, 2006	July 2, 2005	Estimated Useful Lives
Plant and equipment, at cost:			
Land	\$ 220,542,000	\$ 208,189,000	
Buildings and improvements	2,140,786,000	1,916,454,000	10-40 years
Fleet, equipment and software	2,277,612,000	2,121,307,000	3-20 years
	4,638,940,000	4,245,950,000	
Accumulated depreciation	(2,174,040,000)	(1,977,649,000)	
Net plant and equipment	\$ 2,464,900,000	\$ 2,268,301,000	

Depreciation expense, including capital leases, for the past three years was \$320,669,000 in 2006, \$298,111,000 in 2005 and \$273,030,000 in 2004.

5. GOODWILL AND OTHER INTANGIBLES

The changes in the carrying amount of goodwill and the amount allocated by reportable segment for the years presented are as follows:

	Broadline	SYGMA	Other	Total
Carrying amount at July 3, 2004	\$ 660,098,000	\$ 43,875,000	\$ 470,818,000	\$ 1,174,791,000
Goodwill acquired during year	3,589,000	606,000	21,198,000	25,393,000
Currency translation/ Other	12,659,000		(240,000)	12,419,000
Carrying amount at July 2, 2005	676,346,000	44,481,000	491,776,000	1,212,603,000
Goodwill acquired during year	11,488,000	2,449,000	54,173,000	68,110,000
Currency translation/ Other	21,580,000		298,000	21,878,000
Carrying amount at July 1, 2006	\$ 709,414,000	\$ 46,930,000	\$ 546,247,000	\$ 1,302,591,000

The following table presents details of the company's other intangible assets:

	July 1, 2006			July 2, 2005

Amortization expense for the past three years was \$10,773,000 in 2006, \$7,569,000 in 2005 and \$4,244,000 in 2004. The estimated future amortization expense on intangible assets for the next five fiscal years is shown below:

	Amount
2007	\$ 12,304,000
2008	11,725,000
2009	11,567,000
2010	11,315,000
2011	11,116,000

Table of Contents**6. RESTRICTED CASH**

SYSCO is required by its insurers to collateralize a part of the self-insured portion of its workers' compensation and liability claims. SYSCO has chosen to satisfy these collateral requirements by depositing funds in insurance trusts or by issuing letters of credit.

In addition, for certain acquisitions, SYSCO has placed funds into escrow to be disbursed to the sellers in the event that specified operating results are attained or contingencies are resolved. Escrowed funds related to certain acquisitions in the amount of \$1,700,000 were released during fiscal 2006, which included \$800,000 that was disbursed to sellers.

A summary of restricted cash balances appears below:

	July 1, 2006	July 2, 2005
Funds deposited in insurance trusts	\$ 82,653,000	\$ 80,410,000
Escrow funds related to acquisitions	19,621,000	21,321,000
Total	\$ 102,274,000	\$ 101,731,000

7. DERIVATIVE FINANCIAL INSTRUMENTS

SYSCO manages its debt portfolio by targeting an overall desired position of fixed and floating rates and may employ interest rate swaps from time to time to achieve this goal. The company does not use derivative financial instruments for trading or speculative purposes.

During fiscal years 2003, 2004 and 2005, the company entered into various interest rate swap agreements designated as fair value hedges of the related debt. The terms of these swap agreements and the hedged items were such that the hedges were considered perfectly effective against changes in the fair value of the debt due to changes in the benchmark interest rates over their terms. As a result, the shortcut method provided by SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, was applied and there was no need to periodically reassess the effectiveness of the hedges during the terms of the swaps. Interest expense on the debt was adjusted to include payments made or received under the hedge agreements. The fair value of the swaps was carried as an asset or a liability on the Consolidated Balance Sheet and the carrying value of the hedged debt was adjusted accordingly. There were no fair value hedges outstanding as of July 1, 2006 or July 2, 2005.

The amount received upon termination of fair value hedge swap agreements was \$5,316,000 and \$1,305,000 in fiscal years 2005 and 2004, respectively. There were no terminations of fair value hedge swap agreements in fiscal 2006. The amount received upon termination of swap agreements is reflected as an increase in the carrying value of the related debt to reflect its fair value at termination. This increase in the carrying value of the debt is amortized as a reduction of interest expense over the remaining term of the debt.

In March 2005, SYSCO entered into a forward-starting interest rate swap with a notional amount of \$350,000,000. In accordance with SFAS No. 133, the company designated this derivative as a cash flow hedge of the variability in the cash outflows of interest payments on \$350,000,000 of the September 2005 forecasted debt issuance due to changes in the benchmark interest rate. The fair value of the swap as of July 2, 2005 was (\$32,584,000), which is reflected in Accrued expenses on the Consolidated Balance Sheet, with the corresponding amount reflected as a loss, net of tax, in Other comprehensive income (loss).

In September 2005, in conjunction with the issuance of the 5.375% senior notes, SYSCO settled the \$350,000,000 notional amount forward-starting interest rate swap. Upon settlement, SYSCO paid cash of \$21,196,000, which represented the fair value of the swap agreement at the time of settlement. This amount is being amortized as interest expense over the 30-year term of the debt, and the unamortized balance is reflected as a loss, net of tax, in Other comprehensive income (loss).

In the normal course of business, SYSCO enters into forward purchase agreements for the procurement of fuel, electricity and product commodities related to SYSCO's business. Certain of these agreements meet the definition of a

derivative and qualify for the normal purchase and sale exemption under relevant accounting literature. The company has elected to use this exemption for these agreements and thus they are not recorded at fair value.

44

Table of Contents**8. DEBT AND OTHER FINANCING ARRANGEMENTS**

SYSCO's debt consists of the following:

	July 1, 2006	July 2, 2005
Short-term borrowings, interest at 5.4% as of July 1, 2006 and 3.6% as of July 2, 2005	\$ 29,300,000	\$ 31,000,000
Commercial paper, interest averaging 5.3% as of July 1, 2006 and 3.2% as of July 2, 2005	399,568,000	157,851,000
Senior notes, interest at 7.0%, maturing in fiscal 2006		198,011,000
Senior notes, interest at 4.75%, maturing in fiscal 2006		200,551,000
Senior notes, interest at 7.25%, maturing in fiscal 2007	99,295,000	98,335,000
Senior notes, interest at 6.1%, maturing in fiscal 2012	200,561,000	200,655,000
Senior notes, interest at 4.6%, maturing in fiscal 2014	208,540,000	209,644,000
Debentures, interest at 7.16%, maturing in fiscal 2027	50,000,000	50,000,000
Debentures, interest at 6.5%, maturing in fiscal 2029	224,474,000	224,453,000
Senior notes, interest at 5.375%, maturing in fiscal 2036	499,566,000	
Industrial Revenue Bonds, mortgages and other debt, interest averaging 6.9% as of July 1, 2006 and 5.7% as of July 2, 2005, maturing at various dates to fiscal 2026	51,388,000	60,608,000
Total debt	1,762,692,000	1,431,108,000
Less current maturities and short-term debt	(135,565,000)	(474,931,000)
Net long-term debt	\$ 1,627,127,000	\$ 956,177,000

The principal payments required to be made on debt during the next five fiscal years are shown below:

	Amount
2007	\$ 135,565,000
2008	4,596,000
2009	962,000
2010	894,000
2011	407,465,000

Short-term Borrowings

As of July 2, 2005, SYSCO has uncommitted bank lines of credit, which provided for unsecured borrowings for working capital of up to \$95,000,000. Borrowings outstanding under these lines of credit were \$31,000,000 as of July 2, 2005.

As of July 1, 2006, SYSCO has uncommitted bank lines of credit, which provided for unsecured borrowings for working capital of up to \$145,000,000. Borrowings outstanding under these lines of credit were \$29,300,000 as of July 1, 2006.

Commercial Paper

As of July 2, 2005, SYSCO had a revolving loan agreement in the amount of \$450,000,000, maturing in fiscal 2008, which supported the company's United States commercial paper program. The company had intent to refinance this facility on a long-term basis and did so in the fall of 2005. As a result, the commercial paper issuances supported by this agreement have been classified as long-term debt. The United States commercial paper issuances outstanding

at July 2, 2005 were \$124,853,000.

At July 2, 2005, SYSCO also had a revolving loan agreement in the amount of \$100,000,000 in Canadian dollars (CAD), maturing in fiscal 2006, which supported the company's Canadian commercial paper program. The Canadian commercial paper issuances outstanding at July 2, 2005 were CAD \$40,996,000 (\$32,998,000 in U.S. dollars).

In November 2005, SYSCO and one of its subsidiaries, SYSCO International, Co., entered into a new revolving credit facility to support the company's U.S. and Canadian commercial paper programs. The facility, which was increased to \$750,000,000 in March 2006, may be increased up to \$1,000,000,000 at the option of the company, and terminates on November 4, 2010, subject to extension. The facility replaced the previous \$450,000,000 (U.S. dollar) and \$100,000,000 (Canadian dollar) revolving credit agreements in the U.S.

Table of Contents

and Canada, respectively, both of which were terminated. Since this long-term facility supports the company's commercial paper programs, the \$399,568,000 of commercial paper issuances outstanding at July 1, 2006 were classified as long-term debt.

In April 2006, SYSCO initiated a new commercial paper program allowing the company to issue short-term unsecured notes in an aggregate not to exceed \$1.3 billion. This new commercial paper program replaced notes that were issued under SYSCO's existing commercial paper program as they matured and became due and payable.

During fiscal 2006, 2005 and 2004, aggregate outstanding commercial paper issuances and short-term bank borrowings ranged from approximately \$126,846,000 to \$774,530,000, \$28,560,000 to \$253,384,000, and \$73,102,000 to \$478,114,000, respectively. Outstanding commercial paper issuances were \$399,568,000 as of July 1, 2006.

Fixed Rate Debt

In April 2005, SYSCO filed with the Securities and Exchange Commission a shelf registration statement covering \$1,500,000,000 in debt securities. The registration statement was declared effective in May 2005.

In June 2005, SYSCO repaid the 6.5% senior notes totaling \$150,000,000 at maturity utilizing a combination of cash flow from operations and commercial paper issuances. In July 2005, SYSCO repaid the 4.75% senior notes totaling \$200,000,000 at maturity also utilizing a combination of cash flow from operations and commercial paper issuances.

In September 2005, SYSCO issued 5.375% senior notes totaling \$500,000,000 due on September 21, 2035, under its April 2005 shelf registration. These notes, which were priced at 99.911% of par, are unsecured, are not subject to any sinking fund requirement and include a redemption provision which allows SYSCO to retire the notes at any time prior to maturity at the greater of par plus accrued interest or an amount designed to ensure that the noteholders are not penalized by the early redemption. Proceeds from the notes were utilized to retire commercial paper issuances outstanding as of September 2005.

In September 2005, in conjunction with the issuance of the 5.375% senior notes, SYSCO settled a \$350,000,000 notional amount forward-starting interest rate swap which was designated as a cash flow hedge of the variability in the cash outflows of interest payments on the debt issuance due to changes in the benchmark interest rate. See Note 7, Derivative Financial Instruments, for further discussion.

In May 2006, SYSCO repaid the 7.0% senior notes totaling \$200,000,000 at maturity utilizing a combination of cash flow from operations and commercial paper issuances.

The 6.5% debentures due August 1, 2028 and the 4.60% senior notes due March 15, 2014 are unsecured, are not subject to any sinking fund requirement and include a redemption provision which allows SYSCO to retire the debentures and notes at any time prior to maturity at the greater of par plus accrued interest or an amount designed to ensure that the debenture and note holders are not penalized by the early redemption.

The 7.25% senior notes due April 15, 2007 are unsecured, are not redeemable prior to maturity and are not subject to any sinking fund requirement.

The 7.16% debentures due April 15, 2027 are unsecured, are not subject to any sinking fund requirement and are redeemable at the option of the holder on April 15, 2007, but otherwise are not redeemable prior to maturity.

The 6.10% senior notes due June 1, 2012, issued by SYSCO International, Co., a wholly-owned subsidiary of SYSCO, are fully and unconditionally guaranteed by Sysco Corporation, are not subject to any sinking fund requirement, and include a redemption provision which allow SYSCO International, Co. to retire the notes at any time prior to maturity at the greater of par plus accrued interest or an amount designed to ensure that the note holders are not penalized by the early redemption.

SYSCO's Industrial Revenue Bonds have varying structures. Final maturities range from five to 20 years and certain of the bonds provide SYSCO the right to redeem (or call) the bonds at various dates. These call provisions generally provide the bondholder a premium in the early call years, declining to par value as the bonds approach maturity.

Included in current maturities of long-term debt at July 1, 2006 are the 7.25% senior notes due April 2007 totaling \$100,000,000. It is the company's intention to fund the repayment of these notes at maturity through issuances of commercial paper, senior notes or a combination thereof.

Table of Contents*Total Debt*

Total debt at July 1, 2006 was \$1,762,692,000, of which approximately 75% was at fixed rates averaging 6.0% with an average life of 19 years, and the remainder was at floating rates averaging 5.2%. Certain loan agreements contain typical debt covenants to protect noteholders, including provisions to maintain the company's long-term debt to total capital ratio below a specified level. SYSCO was in compliance with all debt covenants at July 1, 2006.

The fair value of SYSCO's total long-term debt is estimated based on the quoted market prices for the same or similar issues or on the current rates offered to the company for debt of the same remaining maturities. The fair value of total long-term debt approximated \$1,669,999,000 at July 1, 2006 and \$1,442,721,000 at July 2, 2005, respectively.

Other

As of July 1, 2006 and July 2, 2005, letters of credit outstanding were \$60,000,000 and \$76,817,000, respectively.

9. LEASES

Although SYSCO normally purchases assets, it has obligations under capital and operating leases for certain distribution facilities, vehicles and computers. Total rental expense under operating leases was \$100,690,000, \$92,710,000, and \$86,842,000 in fiscal 2006, 2005 and 2004, respectively. Contingent rentals, subleases and assets and obligations under capital leases are not significant.

Aggregate minimum lease payments by fiscal year under existing non-capitalized long-term leases are as follows:

	Amount
2007	\$ 56,499,000
2008	46,899,000
2009	39,904,000
2010	33,329,000
2011	25,666,000
Later years	128,981,000

10. EMPLOYEE BENEFIT PLANS

SYSCO has defined benefit and defined contribution retirement plans for its employees. Also, the company contributes to various multi-employer plans under collective bargaining agreements and provides certain health care benefits to eligible retirees and their dependents.

SYSCO maintains a qualified retirement plan (Retirement Plan) that pays benefits to employees at retirement, using formulas based on a participant's years of service and compensation.

The defined contribution 401(k) plan provides that under certain circumstances the company may make matching contributions of up to 50% of the first 6% of a participant's compensation. SYSCO's contributions to this plan were \$21,898,000 in 2006, \$28,109,000 in 2005, and \$27,390,000 in 2004.

In addition to receiving benefits upon retirement under the company's defined benefit plan, participants in the Management Incentive Plan (see *Management Incentive Compensation* under *Stock Based Compensation Plans*) will receive benefits under a Supplemental Executive Retirement Plan (SERP). This plan is a nonqualified, unfunded supplementary retirement plan. In order to meet its obligations under the SERP, SYSCO maintains life insurance policies on the lives of the participants with carrying values of \$153,659,000 at July 1, 2006 and \$138,931,000 at July 2, 2005. These policies are not included as plan assets or in the funded status amounts in the table below. SYSCO is the sole owner and beneficiary of such policies. Projected benefit obligations and accumulated benefit obligations for the SERP were \$327,450,000 and \$238,599,000, respectively, as of July 1, 2006 and \$375,491,000 and \$264,010,000, respectively, as of July 2, 2005.

The company made cash contributions to its pension plans of \$73,764,000 and \$220,361,000 in fiscal years 2006 and 2005, respectively, including \$66,000,000 and \$214,000,000 in voluntary contributions to the Retirement Plan in fiscal 2006 and 2005, respectively. In fiscal 2006, the company's voluntary contribution to the Retirement Plan represented the maximum tax-deductible amount. In fiscal 2005, the company made a voluntary contribution of

\$134,000,000 in the fourth quarter in addition to the \$80,000,000

Table of Contents

which was contributed during the year. The decision to increase the contributions to the Retirement Plan in fiscal 2005 was primarily due to the decrease in the discount rate used to measure the year-end obligation, which increased the pension obligation and negatively impacted the fiscal 2005 year-end pension funded status prior to the additional \$134,000,000 contribution. In fiscal 2007, as in previous years, contributions to the Retirement Plan will not be required to meet ERISA minimum funding requirements, yet the company anticipates it will make voluntary contributions of approximately \$80,000,000. The company's contributions to the SERP and other post-retirement plans are made in the amounts needed to fund current year benefit payments. The estimated fiscal 2007 contributions to fund benefit payments for the SERP and other post-retirement plans are \$9,041,000 and \$315,000, respectively.

Estimated future benefit payments are as follows:

	Pension Benefits	Other Postretirement Plans
2007	\$ 29,446,000	\$ 315,000
2008	34,043,000	396,000
2009	40,230,000	500,000
2010	47,685,000	594,000
2011	55,205,000	714,000
Subsequent five years	408,689,000	4,581,000

The funded status of the defined benefit plans is as follows (including the SERP benefit obligations but excluding from plan assets the cash surrender values of life insurance policies):

	Pension Benefits		Other Postretirement Plans	
	July 1, 2006	July 2, 2005	July 1, 2006	July 2, 2005
Change in benefit obligation:				
Benefit obligation at beginning of year	\$ 1,574,718,000	\$ 1,192,357,000	\$ 8,818,000	\$ 7,996,000
Service cost	100,028,000	81,282,000	510,000	477,000
Interest cost	83,600,000	73,824,000	472,000	488,000
Amendments	7,800,000	25,617,000		
Actuarial (gain) loss	(284,307,000)	230,052,000	(1,473,000)	(65,000)
Actual expenses	(7,906,000)	(6,815,000)		
Total disbursements	(24,331,000)	(21,599,000)	(57,000)	(78,000)
Settlements/ Adjustments (Measurement date change)	(68,193,000)		(225,000)	
Benefit obligation at end of year	1,381,409,000	1,574,718,000	8,045,000	8,818,000
Change in plan assets:				
Fair value of plan assets at beginning of year	1,141,638,000	859,279,000		
Actual return on plan assets	106,584,000	90,412,000		
Employer contribution	207,645,000	220,361,000	57,000	78,000
Actual expenses	(7,906,000)	(6,815,000)		
Total disbursements	(24,331,000)	(21,599,000)	(57,000)	(78,000)
	(141,328,000)			

Settlements/ Adjustments
(Measurement date change)

Fair value of plan assets at end of year	1,282,302,000	1,141,638,000		
Funded status	(99,107,000)	(433,080,000)	(8,045,000)	(8,818,000)
Unrecognized net actuarial loss (gain)	264,855,000	644,116,000	(2,515,000)	(773,000)
Unrecognized net obligation due to initial application of SFAS No. 87/106			1,074,000	1,227,000
Unrecognized prior service cost	47,953,000	45,087,000	793,000	994,000
Prepaid (accrued) benefit cost at measurement date	213,701,000	256,123,000	(8,693,000)	(7,370,000)
Contributions after measurement date, before end of year	666,000			
Prepaid (accrued) benefit cost at end of year	\$ 214,367,000	\$ 256,123,000	\$ (8,693,000)	\$ (7,370,000)

Table of Contents

Additional information related to SYSCO's defined benefit plans is as follows:

	July 1, 2006	July 2, 2005
Amount recognized in consolidated balance sheet:		
Prepaid pension cost	\$ 388,651,000	\$ 389,766,000
Accrued benefit liability	(238,599,000)	(264,010,000)
Intangible asset	45,619,000	42,240,000
Accumulated other comprehensive loss	18,030,000	88,127,000
Net amount recognized	\$ 213,701,000	\$ 256,123,000
Plans with accumulated benefit obligation in excess of fair value of plan assets:		
Projected benefit obligation	\$ 327,450,000	\$ 375,491,000
Accumulated benefit obligation	238,599,000	264,010,000
Fair value of plan assets at end of year		
Additional information:		
Accumulated benefit obligation	\$ 1,187,185,000	\$ 1,329,725,000
Increase (decrease) in minimum liability included in other comprehensive income	(70,097,000)	54,414,000

Minimum pension liability adjustments result when the accumulated benefit obligation exceeds the fair value of plan assets and are recorded so that the recorded pension liability is at a minimum equal to the unfunded accumulated benefit obligation. Minimum pension liability adjustments are non-cash adjustments that are reflected as an increase (or decrease) in the pension liability and an offsetting charge (or benefit) to shareholders' equity, net of tax, through comprehensive loss (or income) rather than net income.

Amounts reflected in accumulated other comprehensive income or loss related to minimum pension liability, were charges, net of tax, of \$11,106,000 as of July 1, 2006, and \$54,286,000 as of July 2, 2005.

As a result of changes in assumptions, including the decrease in the discount rate to 5.60% for fiscal 2006, which is based on the new measurement date of May 31st discussed below, from 6.25% in fiscal 2005, together with the normal growth of the plan, the impact of losses from prior periods and the amount and timing of contributions, net pension costs increased \$23,734,000 in fiscal 2006. Net pension costs in fiscal 2007 are expected to decrease by approximately \$53,900,000 due primarily to an increase in the discount rate to 6.73% for fiscal 2007. The components of net pension costs for each fiscal year are as follows:

	Pension Benefits		
	2006	2005	2004 (53 Weeks)
Service cost	\$ 100,028,000	\$ 81,282,000	\$ 74,934,000
Interest cost	83,600,000	73,824,000	61,162,000
Expected return on plan assets	(104,174,000)	(82,613,000)	(61,148,000)
Amortization of prior service cost	4,934,000	1,760,000	1,308,000
Recognized net actuarial loss	46,204,000	32,605,000	37,697,000
Amortization of net transition obligation			279,000
Net pension costs	\$ 130,592,000	\$ 106,858,000	\$ 114,232,000

The components of other postretirement benefit costs for each fiscal year are as follows:

	Other Postretirement Plans		
	2006	2005	2004 (53 Weeks)
Service cost	\$ 510,000	\$ 477,000	\$ 422,000
Interest cost	472,000	488,000	402,000
Expected return on plan assets			
Amortization of prior service cost	202,000	202,000	202,000
Recognized net actuarial gain	(15,000)		(40,000)
Amortization of net transition obligation	153,000	154,000	153,000
Net other postretirement benefit costs	\$ 1,322,000	\$ 1,321,000	\$ 1,139,000

Multi-employer pension costs were \$29,796,000, \$28,822,000, and \$29,479,000 in fiscal 2006, 2005 and 2004, respectively.

Table of Contents

Weighted-average assumptions used to determine benefit obligations at year end were:

	Pension Benefits		Other Postretirement Plans	
	July 1, 2006	July 2, 2005	July 1, 2006	July 2, 2005
Discount rate	6.73%	5.40%	6.73%	5.40%
Rate of compensation increase Retirement Plan	6.17	5.89		

For determining the benefit obligations at year end, the SERP calculations assume annual salary increases of 10% through fiscal 2007 and 7% thereafter as of July 1, 2006 and July 2, 2005.

Weighted-average assumptions used to determine net pension costs and other postretirement benefit costs for each fiscal year were:

	Pension Benefits			Other Postretirement Plans		
	2006	2005	2004	2006	2005	2004
Discount rate	5.60%	6.25%	6.00%	5.60%	6.25%	6.00%
Expected rate of return	9.00	9.00	9.00			
Rate of compensation increase Retirement Plan	5.89	5.89	5.89			

For determining net pension costs related to the SERP for each fiscal year, the calculations for fiscal 2006 and fiscal 2005 assume annual salary increases of 10% through fiscal 2007 and 7% thereafter, and for fiscal 2004, the calculations assume annual salary increases of 8% through fiscal 2005 and 7% thereafter.

The measurement date for the pension and other postretirement benefit plans is fiscal year end for fiscal years 2005 and prior. Beginning in fiscal 2006, the measurement date is May 31st which represents a change in accounting. The one-month acceleration of the measurement date allows additional time for management to evaluate and report the actuarial pension measurements in the year-end financial statements and disclosures within the accelerated filing deadlines of the Securities and Exchange Commission. The cumulative effect of this change in accounting resulted in an increase to earnings in the first quarter of fiscal 2006 of \$9,285,000, net of tax.

A healthcare cost trend rate is not used in the calculations of post-retirement benefits obligations because SYSCO subsidizes the cost of postretirement medical coverage by a fixed dollar amount with the retiree responsible for the cost of coverage in excess of the subsidy, including all future cost increases.

For guidance in determining the discount rate, SYSCO calculates the implied rate of return on a hypothetical portfolio of high-quality fixed-income investments for which the timing and amount of cash outflows approximates the estimated payouts of the pension plans. The discount rate assumption is reviewed annually and revised as deemed appropriate.

The expected long-term rate of return on plan assets is derived from a mathematical asset model that incorporates assumptions as to the various asset class returns, reflecting a combination of rigorous historical performance analysis and the forward-looking views of the financial markets regarding the yield on long-term bonds and the historical returns of the major stock markets. The rate of return assumption is reviewed annually and revised as deemed appropriate.

SYSCO's investment objectives target a mix of investments that can potentially achieve an above-average rate of return. SYSCO has determined that this strategy is appropriate due to the relatively low ratio of retirees as a percentage of participants, low average years of participant service and low average age of participants and is willing to accept the above-average level of short-term risk and variability in returns to attempt to achieve a higher level of

long-term returns. As a result, the company's strategy targets a mix of investments which include 70% stocks (including a mix of large capitalization U.S. stocks, small- to mid-capitalization U.S. stocks and international stocks) and 30% fixed income investments and cash equivalents.

The percentage of the fair value of plan assets by asset category is as follows:

	July 1, 2006	July 2, 2005
Equity securities	70.9%	71.2%
Debt securities	29.1	28.8
Total	100.0%	100.0%

Table of Contents**11. SHAREHOLDERS EQUITY**

Basic earnings per share have been computed by dividing net earnings by the weighted average number of shares of common stock outstanding for each respective year. Diluted earnings per share have been computed by dividing net earnings by the weighted average number of shares of common stock outstanding during those respective years adjusted for the dilutive effect of stock options outstanding using the treasury stock method.

A reconciliation of the numerators and the denominators of the basic and diluted per share computations for the periods presented follows:

	2006	2005	2004 (53 Weeks)
Numerator:			
Earnings before cumulative effect of accounting change	\$ 846,040,000	\$ 961,457,000	\$ 907,214,000
Cumulative effect of accounting change	9,285,000		
Net earnings	\$ 855,325,000	\$ 961,457,000	\$ 907,214,000
Denominator:			
Weighted-average basic shares outstanding	621,382,766	636,068,266	642,688,614
Dilutive effect of share-based awards	7,417,881	17,088,851	19,230,620
Weighted-average diluted shares outstanding	628,800,647	653,157,117	661,919,234
Basic earnings per share:			
Earnings before cumulative effect of accounting change	\$ 1.36	\$ 1.51	\$ 1.41
Cumulative effect of accounting change	0.02		
Net earnings	\$ 1.38	\$ 1.51	\$ 1.41
Diluted earnings per share:			
Earnings before cumulative effect of accounting change	\$ 1.35	\$ 1.47	\$ 1.37
Cumulative effect of accounting change	0.01		
Net earnings	\$ 1.36	\$ 1.47	\$ 1.37

The number of options which were not included in the diluted earnings per share calculation because the effect would have been anti-dilutive was approximately 28,500,000, 68,000 and zero for fiscal 2006, 2005 and 2004, respectively.

Dividends declared were \$408,264,000, \$368,792,000 and \$321,353,000 in fiscal 2006, 2005 and 2004, respectively. Included in dividends declared for each year were dividends declared but not yet paid at year end of approximately \$105,000,000, \$95,000,000 and \$83,000,000 in fiscal 2006, 2005 and 2004, respectively.

In May 1986, the Board of Directors adopted a Warrant Dividend Plan designed to protect against those unsolicited attempts to acquire control of SYSCO that the Board believes are not in the best interests of the shareholders. This plan was amended and replaced by the Amended and Restated Rights Agreement (the Plan) in May 1996. The Board adopted further amendments in May 1999. By its terms, the Plan expired on May 31, 2006.

Table of Contents**12. COMPREHENSIVE INCOME**

Comprehensive income is net earnings plus certain other items that are recorded directly to shareholders' equity.

The following table provides a summary of the changes in accumulated other comprehensive income (loss) for the years presented:

	Minimum Pension Liability	Foreign Currency Translation	Interest Rate Swap	Total
Balance at June 28, 2003	\$ (185,118,000)	\$ 32,737,000	\$	\$ (152,381,000)
Minimum pension liability adjustment	164,385,000			164,385,000
Foreign currency translation adjustment		5,636,000		5,636,000
Balance at July 3, 2004	(20,733,000)	38,373,000		17,640,000
Minimum pension liability adjustment	(33,553,000)			(33,553,000)
Foreign currency translation adjustment		22,357,000		22,357,000
Change in fair value of interest rate swap			(20,121,000)	(20,121,000)
Balance at July 2, 2005	(54,286,000)	60,730,000	(20,121,000)	(13,677,000)
Minimum pension liability adjustment	43,180,000			43,180,000
Foreign currency translation adjustment		47,718,000		47,718,000
Change in fair value of interest rate swap			7,064,000	7,064,000
Amortization of cash flow hedge			333,000	333,000
Balance at July 1, 2006	\$ (11,106,000)	\$ 108,448,000	\$ (12,724,000)	\$ 84,618,000

A summary of the components of other comprehensive income (loss) and the related tax effects for each of the years presented is as follows:

	2006		
	Before-Tax Amount	Income Tax	After-Tax Amount
Minimum pension liability adjustment	\$ 70,097,000	\$ 26,917,000	\$ 43,180,000
Foreign currency translation adjustment	47,718,000		47,718,000
Change in fair value of interest rate swap	11,388,000	4,324,000	7,064,000
Amortization of cash flow hedge	540,000	207,000	333,000

Other comprehensive income	\$ 129,743,000	\$ 31,448,000	\$ 98,295,000
----------------------------	----------------	---------------	---------------

2005

	Before-Tax Amount	Income Tax	After-Tax Amount
Minimum pension liability adjustment	\$ (54,414,000)	\$ (20,861,000)	\$ (33,553,000)
Foreign currency translation adjustment	22,357,000		22,357,000
Change in fair value of interest rate swap	(32,584,000)	(12,463,000)	(20,121,000)
Other comprehensive income	\$ (64,641,000)	\$ (33,324,000)	\$ (31,317,000)

2004

	Before-Tax Amount	Income Tax	After-Tax Amount
Minimum pension liability adjustment	\$ 266,074,000	\$ 101,689,000	\$ 164,385,000
Foreign currency translation adjustment	5,636,000		5,636,000
Other comprehensive income	\$ 271,710,000	\$ 101,689,000	\$ 170,021,000

13. SHARE-BASED COMPENSATION

Prior to July 3, 2005, SYSCO accounted for its stock option plans and its Employees Stock Purchase Plan using the intrinsic value method of accounting provided under APB Opinion No. 25, Accounting for Stock Issued to Employees, (APB 25) and related

52

Table of Contents

interpretations, as permitted by FASB Statement No. 123, Accounting for Stock-Based Compensation, (SFAS 123) under which no compensation expense was recognized for stock option grants and issuances of stock pursuant to the Employees Stock Purchase Plan. However, share-based compensation expense was recognized in periods prior to fiscal 2006 (and continues to be recognized) for stock issuances pursuant to the Management Incentive Plans and stock grants to non-employee directors. Share-based compensation was a pro forma disclosure in the financial statement footnotes and continues to be provided for periods prior to fiscal 2006.

Effective July 3, 2005, SYSCO adopted the fair value recognition provisions of FASB Statement No. 123(R), Share-Based Payment, (SFAS 123(R)) using the modified-prospective transition method. Under this transition method, compensation cost recognized in fiscal 2006 includes: a) compensation cost for all share-based payments granted through July 2, 2005, but for which the requisite service period had not been completed as of July 2, 2005, based on the grant date fair value estimated in accordance with the original provisions of SFAS 123, and b) compensation cost for all share-based payments granted subsequent to July 2, 2005, based on the grant date fair value estimated in accordance with the provisions of SFAS 123(R). Results for prior periods have not been restated.

As a result of adopting SFAS 123(R) on July 3, 2005, SYSCO's earnings before income taxes and cumulative effect of accounting change and net earnings for fiscal 2006 were \$118,038,000 and \$105,810,000 lower, respectively, than if the company had continued to account for share-based compensation under APB 25. Basic and diluted earnings per share before the cumulative effect of the accounting change for fiscal 2006 were both \$0.17 lower than if the company had continued to account for share-based compensation under APB 25.

The adoption of SFAS 123(R) results in lower diluted shares outstanding than would have been calculated had compensation cost not been recorded for stock options and stock issuances under the Employees Stock Purchase Plan. This is due to a modification required by SFAS 123(R) of the treasury stock method calculation utilized to compute the dilutive effect of stock options.

Prior to the adoption of SFAS 123(R), the company presented all tax benefits of deductions resulting from the exercise of options as operating cash flows in the Consolidated Cash Flow statement. SFAS 123(R) requires the cash flows resulting from tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows. The \$6,569,000 excess tax benefit classified as a financing cash inflow for fiscal 2006 would have been classified as an operating cash inflow if the company had not adopted SFAS 123(R).

SYSCO provides compensation benefits to employees and non-employee directors under several share-based payment arrangements including various employee stock option plans, the Employees Stock Purchase Plan, the Management Incentive Plans and the 2005 Non-Employee Directors Stock Plan.

Stock Option Plans

SYSCO's 2004 Stock Option Plan was adopted in fiscal 2005 and reserves 23,500,000 shares of SYSCO common stock for grants of options and dividend equivalents to directors, officers and other employees of the company and its subsidiaries at the market price at the date of grant. This plan provides for the issuance of options qualified as incentive stock options under the Internal Revenue Code of 1986, options which are non-qualified, and dividend equivalents. To date, SYSCO has only issued options under this plan. Vesting requirements for awards under this plan will vary by individual grant and may include either time-based vesting or time-based vesting subject to acceleration based on performance criteria. The contractual life of all options granted under this plan will be no greater than seven years. As of July 1, 2006, there were 18,656,450 remaining shares authorized and available for grant under the 2004 Stock Option Plan.

SYSCO has also granted employee options under several previous employee stock option plans for which previously granted options remain outstanding at July 1, 2006. No new options will be issued under any of the prior plans, as future grants to employees will be made through the 2004 Stock Option Plan or subsequently adopted plans. Vesting requirements for awards under these plans vary by individual grant and include either time-based vesting or time-based vesting subject to acceleration based on performance criteria. The contractual life of all options granted under these plans through July 3, 2004 is 10 years; options granted after July 3, 2004 have a contractual life of seven years.

SYSCO's 2005 Non-Employee Directors Stock Plan was adopted in fiscal 2006 and reserves 550,000 shares of common stock for grants to non-employee directors in the form of options, stock grants, restricted stock units and dividend equivalents. In addition, options and unvested common shares also remained outstanding as of July 1, 2006 under previous non-employee director stock plans. No further grants will be made under these previous plans, as all future grants to non-employee directors will be made through the 2005 Non-Employee Directors Stock Plan or subsequently adopted plans. Vesting requirements for awards under these plans vary by

Table of Contents

individual grant and include either time-based vesting or time-based vesting subject to acceleration based on performance criteria. The contractual life of all options granted under these plans through July 3, 2004 is 10 years; options granted after July 3, 2004 have a contractual life of seven years. As of July 1, 2006, there were 478,593 remaining shares authorized and available for grant under the 2005 Non-Employee Directors Stock Plan.

Certain of SYSCO's option awards are generally subject to graded vesting over a service period. In those cases, SYSCO recognizes compensation cost on a straight-line basis over the requisite service period for the entire award. In other cases, certain of SYSCO's option awards provide for graded vesting over a service period but include a performance-based provision allowing for accelerated vesting. In these cases, if it is probable that the performance condition will be met, SYSCO recognizes compensation cost on a straight-line basis over the shorter performance period; otherwise, it will recognize compensation cost over the longer service period.

In addition, certain of SYSCO's options provide that the options continue to vest as if the optionee continued to be an employee if the optionee meets certain age and years of service thresholds upon retirement. In these cases, for awards granted through July 2, 2005, SYSCO will recognize the compensation cost for such awards over the service period and accelerate any remaining unrecognized compensation cost when the employee retires. Due to the adoption of SFAS 123(R), for awards granted subsequent to July 2, 2005, SYSCO will recognize compensation cost for such awards over the period from the grant date to the date the employee first becomes eligible to retire with the options continuing to vest after retirement. If SYSCO had recognized compensation cost for such awards over the period from the grant date to the date the employee first became eligible to retire with the options continuing to vest after retirement for all periods presented, recognized compensation cost would have been \$23,907,000 lower for fiscal 2006. There would be no impact to recognized compensation cost for fiscal 2005 and 2004, as the company was accounting for stock compensation under APB 25, under which no compensation expense was recognized for stock option grants.

The fair value of each option award is estimated as of the date of grant using a Black-Scholes option pricing model. The weighted average assumptions for the periods indicated are noted in the following table. Expected volatility is based on historical volatility of SYSCO's stock, implied volatilities from traded options on SYSCO's stock and other factors. SYSCO utilizes historical data to estimate option exercise and employee termination behavior within the valuation model; separate groups of employees that have similar historical exercise behavior are considered separately for valuation purposes. The risk-free rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant. The following weighted-average assumptions were used for each fiscal year presented:

	2006	2005	2004
Dividend yield	1.40%	1.45%	1.49%
Expected volatility	23%	22%	22%
Risk-free interest rate	3.9%	3.4%	3.2%
Expected life	5 years	5 years	5 years

The following summary presents information regarding outstanding options as of July 1, 2006 and changes during the fiscal year then ended with regard to options under all stock option plans:

	Shares Under Option	Weighted Average Exercise Price Per Share	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value
Outstanding at July 2, 2005	65,963,380	\$ 27.82		

Edgar Filing: SYSCO CORP - Form 10-K

Granted	4,859,000		32.99		
Exercised	(4,004,355)		20.73		
Forfeited	(1,009,865)		29.42		
Expired	(291,491)		30.10		
Outstanding at July 1, 2006	65,516,669	\$	28.60	5.56	\$ 168,690,000
Vested or expected to vest at July 1, 2006	63,468,460	\$	28.49	5.54	\$ 168,550,000
Exercisable at July 1, 2006	45,316,732	\$	27.23	5.35	\$ 162,057,000

The total number of employee options granted was 4,826,500, 8,515,000 and 13,344,746 in fiscal years 2006, 2005 and 2004, respectively. During fiscal 2006, 876,000 options were granted to 17 executive officers and 3,950,500 options were granted to approximately 1,200 other key employees. During fiscal 2005, 2,763,000 options were granted to approximately 2,700 non-executive

Table of Contents

employees based on tenure, 557,000 options were granted to 18 executive officers and 5,195,000 options were granted to approximately 1,700 other key employees. During fiscal 2004, 2,482,000 options were granted to approximately 2,400 non-executive employees based on tenure, 821,000 options were granted to 17 executive officers and 10,041,746 options were granted to approximately 2,000 other key employees.

The weighted average grant-date fair value of options granted fiscal 2006, 2005 and 2004 were \$7.83, \$7.12 and \$6.74, respectively. The total intrinsic value of options exercised during fiscal 2006, 2005 and 2004, was \$48,928,000, \$81,220,000 and \$100,385,000, respectively.

Employees Stock Purchase Plan

SYSCO has an Employees Stock Purchase Plan which permits employees to invest in SYSCO common stock by means of periodic payroll deductions at 85% of the closing price on the last business day of each calendar quarter. The total number of shares which may be sold pursuant to the plan may not exceed 68,000,000 shares, of which 4,894,348 remained available at July 1, 2006.

During fiscal 2006, 1,840,764 shares of SYSCO common stock were purchased by the participants as compared to 1,712,244 shares purchased in fiscal 2005 and 1,620,535 shares purchased in fiscal 2004. In July 2006, 475,488 shares were purchased by participants.

The weighted average fair value of employee stock purchase rights issued pursuant to the Employees Stock Purchase Plan was \$4.88, \$5.19 and \$5.17 per share during fiscal 2006, 2005 and 2004, respectively. The fair value of the stock purchase rights was calculated as the difference between the stock price at date of issuance and the employee purchase price.

Management Incentive Compensation

In November 2005, SYSCO adopted the 2005 Management Incentive Plan. The first bonus under the 2005 Plan will be earned during fiscal 2007 (at which time no further bonuses will be earned under the 2000 Management Incentive Plan) and paid in the following fiscal year.

SYSCO's Management Incentive Plans compensate key management personnel for specific performance achievements. The bonuses earned and expensed under these plans were \$23,235,000 in fiscal 2006, \$50,505,000 in fiscal 2005 and \$77,494,000 in fiscal 2004; these amounts were paid in the following fiscal year in both cash and stock or deferred for payment in future years at the election of each participant. The stock awards under these plans immediately vest upon issuance; however, participants are restricted from selling, transferring, giving or otherwise conveying the shares for a period of two years from the date of issuance of such shares. The fair value of the stock issued under the Management Incentive Plans is based on the stock price less a 12% discount for post-vesting restrictions. The discount for post-vesting restrictions is estimated based on restricted stock studies and by calculating the cost of a hypothetical protective put option over the restriction period. There were 180, 174 and 174 participants in the plan in fiscal 2006, 2005 and 2004, respectively. Participants in the Management Incentive Plan also have the option to defer portions of their salary and bonuses pursuant to the Executive Deferred Compensation Plan.

A total of 617,637 shares, 1,001,624 shares and 940,843 shares at a fair value of \$36.25, \$34.80 and \$29.55 were issued pursuant to this plan in fiscal 2006, 2005 and 2004, respectively, for bonuses earned in the preceding fiscal years. As of July 1, 2006, there were 4,000,000 remaining shares that may be issued under the Management Incentive Plans. In August 2006, 323,822 shares were issued in payment of the portion of the bonuses earned in fiscal 2006 elected to be received in stock.

Non-Employee Director Stock Grants

Each newly elected director is granted a one-time retainer award of 6,000 shares of SYSCO common stock under the 2005 Non-Employee Directors Stock Plan. These shares vest one-third every year over a three-year period. In addition, there are one-time retainer awards outstanding under the Non-Employee Directors Stock Plan, which was replaced by the 2005 Non-Employee Directors Stock Plan. The total amount of unvested shares related to the one-time retainer awards as of July 1, 2006, July 2, 2005 and July 3, 2004 was not significant.

The 2005 Non-Employee Directors Stock Plan provides for the issuance of restricted stock. During fiscal 2006, 27,000 shares of restricted stock were granted to non-employee directors. These shares will vest ratably over a three-year period.

Non-employee directors may also elect to receive up to 50% of their annual directors' fees in SYSCO common stock. As a result of such elections, a total of 12,907, 11,836 and 11,640 shares with a weighted-average grant date fair value of \$33.63, \$35.38 and \$30.82 per share were issued in fiscal 2006, 2005 and 2004, respectively.

Table of Contents*All Share-Based Payment Arrangements*

The total share-based compensation cost that has been recognized in results of operations was \$126,837,000, \$19,749,000 and \$34,857,000 for fiscal 2006, 2005 and 2004, respectively, and is included within the line item Operating expenses within the Consolidated Results of Operations. The total income tax benefit recognized in results of operations for share-based compensation arrangements was \$15,607,000, \$8,597,000 and \$13,385,000 for fiscal 2006, 2005 and 2004, respectively.

As of July 1, 2006, there was \$112,111,000 of total unrecognized compensation cost related to share-based compensation arrangements. That cost is expected to be recognized over a weighted-average period of 2.72 years.

Cash received from option exercises was \$93,337,000, \$124,701,000 and \$104,791,000 during fiscal 2006, 2005 and 2004, respectively. The actual tax benefit realized for the tax deductions from option exercises totaled \$12,507,000, \$20,887,000 and \$20,551,000 during fiscal 2006, 2005 and 2004, respectively.

Pro Forma Net Earnings

The following table provides pro forma net earnings and earnings per share had SYSCO applied the fair value method of SFAS 123 for fiscal 2005 and 2004:

	2005	2004 (53 Weeks)
Net earnings:		
Reported net earnings	\$ 961,457,000	\$ 907,214,000
Add: Stock-based employee compensation expense included in reported earnings, net of related tax effects(1)	11,152,000	21,472,000
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(98,815,000)	(106,747,000)
Pro forma net earnings	\$ 873,794,000	\$ 821,939,000
Basic earnings per share:		
Reported basic earnings per share	\$ 1.51	\$ 1.41
Pro forma basic earnings per share	1.37	1.28
Diluted earnings per share:		
Reported diluted earnings per share	\$ 1.47	\$ 1.37
Pro forma diluted earnings per share	1.36	1.26

(1) Amounts represent the after-tax compensation costs for stock grants.

The pro forma presentation includes only options granted after 1995. The pro forma effects for the periods presented are not necessarily indicative of the pro forma effects in future years.

14. INCOME TAXES

The income tax provision for each fiscal year consists of the following:

	2006	2005	2004 (53 Weeks)
United States federal income taxes	\$ 486,642,000	\$ 485,499,000	\$ 473,757,000
State, local and foreign income taxes	62,264,000	78,480,000	94,173,000
Total	\$ 548,906,000	\$ 563,979,000	\$ 567,930,000

Included in the income taxes charged to earnings are net deferred tax provisions of \$533,108,000, \$554,850,000, and \$608,152,000 in fiscal 2006, 2005 and 2004, respectively. The deferred tax provisions result from the effects of net changes during the year in deferred tax assets and liabilities arising from temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. In addition to the deferred tax provision, changes in the deferred tax liability balances in fiscal 2006, 2005 and 2004 were also impacted by the reclassification of deferred supply chain distributions from current deferred tax liabilities to accrued income taxes based on the timing of when payments related to these items become payable. These reclassifications were \$497,830,000 and \$473,970,000 in fiscal 2006 and 2005, respectively. Deferred supply chain distributions

56

Table of Contents

are classified as current or deferred tax liabilities based on when the related income tax payments will become payable. The net cash flow impact of supply chain distribution deferrals in fiscal 2006 was incrementally positive when compared to what would have been paid on an annual basis without the deferral, due to increased volume through the Baugh Supply Chain Cooperative.

Significant components of SYSCO's deferred tax assets and liabilities are as follows:

	July 1, 2006	July 2, 2005
Deferred tax liabilities:		
Deferred supply chain distributions	\$ 924,902,000	\$ 856,741,000
Excess tax depreciation and basis differences of assets	383,636,000	398,690,000
Pension	58,406,000	59,836,000
Other	7,987,000	13,864,000
Total deferred tax liabilities	1,374,931,000	1,329,131,000
Deferred tax assets:		
Net operating tax loss carryforwards	112,593,000	83,609,000
Deferred compensation	45,878,000	40,640,000
Casualty insurance	35,254,000	33,246,000
Receivables	25,208,000	25,081,000
Inventory	22,549,000	32,856,000
Other	37,251,000	31,766,000
Total deferred tax assets	278,733,000	247,198,000
Valuation allowances	80,851,000	77,334,000
Total net deferred tax liabilities	\$ 1,177,049,000	\$ 1,159,267,000

The amount of taxes paid in fiscal 2004 was reduced by \$70,615,000 as the result of the utilization of a U.S. federal net operating loss carryforward. This net operating loss carryforward was generated in fiscal 2003 primarily as a result of the deferral of supply chain distributions.

Also impacting the amount of taxes paid in each year is the amount of deductible pension contributions made in each year. Pension contributions were substantially lower in fiscal 2006 as compared to fiscal 2005 and 2004. The company expects that its pension contributions in fiscal 2007 will be approximately \$90,000,000.

The company had state and Canadian net operating losses at July 1, 2006 and July 2, 2005, respectively. The net operating losses outstanding at July 1, 2006 expire in fiscal years 2007 through 2026. A valuation allowance of \$80,851,000 and \$77,334,000 was recorded as of July 1, 2006 and July 2, 2005, respectively, as management believes that it is more likely than not that a portion of the benefits of these state and Canadian tax loss carryforwards will not be realized.

Reconciliations of the statutory federal income tax rate to the effective income tax rates for each fiscal year are as follows:

	2006	2005	2004
United States statutory federal income tax rate	35.00%	35.00%	35.00%
State and local income taxes, net of federal income tax benefit	2.17	2.74	3.21

Other	2.18	(0.77)	0.29
	39.35%	36.97%	38.50%

SYSCO recorded a tax benefit of \$12,228,000, or 10.4% of the \$118,038,000, in incremental share-based compensation expense recorded in fiscal 2006 as a result of the adoption of SFAS 123(R), causing an increase in the fiscal 2006 effective tax rate compared to fiscal 2005. In addition, the comparison of the effective rate for fiscal 2006 with fiscal 2005 is affected by the adjustments to fiscal 2005 income tax expense. The income tax provision in fiscal 2005 included a tax benefit of \$19,500,000 primarily related to the reversal of a tax contingency accrual and to the reversal of valuation allowances previously recorded on certain state net operating loss carryforwards.

SYSCO's option grants include options which qualify as incentive stock options for income tax purposes. The treatment of the potential tax deduction, if any, related to incentive stock options is the primary reason for the company's increased effective tax rate in fiscal 2006 and may cause variability in the company's effective tax rate in future periods. In the period the compensation cost related

Table of Contents

to incentive stock options is recorded, a corresponding tax benefit is not recorded as it is assumed that the company will not receive a tax deduction related to such incentive stock options. The company may be eligible for tax deductions in subsequent periods to the extent that there is a disqualifying disposition of the incentive stock option. In such cases, the company would record a tax benefit related to the tax deduction in an amount not to exceed the corresponding cumulative compensation cost recorded in the financial statements on the particular options multiplied by the statutory tax rate.

In evaluating the exposures connected with the various tax filing positions, the company establishes an accrual when, despite management's belief that the company's tax return positions are supportable, management believes that certain positions may be successfully challenged and a loss is probable. When facts and circumstances change, these accruals are adjusted.

The company intends to permanently reinvest the undistributed earnings of its Canadian subsidiaries in those businesses outside of the United States and, therefore, has not provided for U.S. deferred income taxes on such undistributed foreign earnings. The determination of the amount of the unrecognized deferred tax liability related to the undistributed earnings is not practicable.

The determination of the company's provision for income taxes requires significant judgment, the use of estimates and the interpretation and application of complex tax laws. The company's provision for income taxes reflects a combination of income earned and taxed in the various U.S. federal and state, as well as Canadian federal and provincial jurisdictions. Jurisdictional tax law changes, increases or decreases in permanent differences between book and tax items, accruals or adjustments of accruals for tax contingencies or valuation allowances, and the company's change in the mix of earnings from these taxing jurisdictions all affect the overall effective tax rate.

As of July 1, 2006, the company's 2003 and 2004 federal income tax returns were under audit by the Internal Revenue Service (IRS). The company believes that it has appropriate support for the positions taken on these tax returns and has recorded a liability of approximately \$10,000,000 for its best estimate of the probable loss on certain of these positions. However, if the IRS disagrees with the positions taken by the company on its tax returns, SYSCO could have additional tax liability, including interest and penalties.

Table of Contents**15. ACQUISITIONS**

During fiscal 2006, SYSCO acquired for cash one broadline foodservice operation, one custom meat-cutting operation and five specialty produce distributors. During fiscal 2005, SYSCO acquired for cash one broadline foodservice operation, four custom meat-cutting operations, and two specialty produce distributors. During fiscal 2004, SYSCO acquired for cash certain assets of two broadline foodservice operations, a specialty produce distributor, and one quickservice operation. The acquisitions were immaterial, individually and in the aggregate, to the consolidated financial statements.

During fiscal 2006, in the aggregate, the company paid cash of \$114,378,000 and issued 161,549 shares with a value of \$3,055,000 for acquisitions during fiscal 2006 and for contingent consideration related to operations acquired in previous fiscal years. In addition, escrowed funds related to certain acquisitions in the amount of \$800,000 were released to sellers during fiscal 2006.

Certain acquisitions involve contingent consideration typically payable only in the event that certain operating results are attained or certain outstanding contingencies are resolved. Aggregate contingent consideration amounts outstanding as of July 1, 2006 included \$147,572,000 in cash, which, if distributed, could result in the recording of additional goodwill. Such amounts typically are to be paid out over periods of up to five years from the date of acquisition.

16. COMMITMENTS AND CONTINGENCIES

SYSCO has committed with a third party service provider to provide hardware and hardware hosting services. The services are to be provided over a ten year period beginning in fiscal 2005 and ending in fiscal 2015. The total cost of the services over that period is expected to be approximately \$300,000,000. This amount may be reduced by SYSCO utilizing less than estimated resources and can be increased by SYSCO utilizing more than estimated resources and the adjustments for inflation provided for in the agreements. SYSCO may also cancel a portion or all of the services provided beginning in fiscal 2007 subject to termination fees which decrease over time. Although it does not expect to, if SYSCO were to terminate all of the services in fiscal 2007, the estimated termination fee incurred in fiscal 2007 would be approximately \$8,300,000. SYSCO believes that these agreements will provide a more secure and reliable environment for its data processing as well as reduce overall operating costs over the ten year period.

SYSCO is engaged in various legal proceedings which have arisen but have not been fully adjudicated. These proceedings, in the opinion of management, will not have a material adverse effect upon the consolidated financial position or results of operations of the company when ultimately concluded.

17. BUSINESS SEGMENT INFORMATION

The company has aggregated its operating companies into a number of segments, of which only Broadline and SYGMA are reportable segments as defined in SFAS No. 131. Broadline operating companies distribute a full line of food products and a wide variety of non-food products to both traditional and chain restaurant customers. SYGMA operating companies distribute a full line of food products and a wide variety of non-food products to certain chain restaurant customer locations. Other financial information is attributable to the company's other segments, including the company's specialty produce, custom-cut meat and lodging industry products segments.

The accounting policies for the segments are the same as those disclosed by SYSCO. Intersegment sales represent specialty produce and meat company products distributed by the Broadline and SYGMA operating companies. The segment results include allocation of centrally incurred costs for shared services that eliminate upon consolidation. Centrally incurred costs are allocated based upon the relative level of service used by each operating company.

Table of Contents

The following table sets forth the financial information for SYSCO's business segments:

	Fiscal Year		
	2006	2005	2004 (53 Weeks)
	(In thousands)		
Sales:			
Broadline	\$ 25,678,728	\$ 24,266,978	\$ 23,852,420

Total	\$ 514,751	\$ 390,203	\$ 530,086
Assets:			
Broadline	\$ 5,242,561	\$ 4,885,175	\$ 4,826,535
SYGMA	389,771	301,729	240,418

Edgar Filing: SYSCO CORP - Form 10-K

Other	807,230	636,549	554,335
Total segments	6,439,562	5,823,453	5,621,288
Corporate	2,552,463	2,444,449	2,226,344
Total	\$ 8,992,025	\$ 8,267,902	\$ 7,847,632

The company does not allocate share-based compensation related to stock option grants, issuances of stock pursuant to the Employees Stock Purchase Plan and stock grants to non-employee directors and corporate officers. The increase in unallocated corporate expenses in fiscal 2006 over fiscal 2005 is primarily attributable to these items. See further discussion of Share-Based Compensation in Note 13.

Table of Contents

The sales mix for the principal product categories for each fiscal year is as follows:

	2006	2005	2004 (53 Weeks)
	(In thousands)		
Fresh and frozen meats	\$ 6,153,468	\$ 5,732,834	\$ 5,533,217
Canned and dry products	5,849,082	5,417,418	5,370,859
Frozen fruits, vegetables, bakery and other	4,405,908	4,104,170	3,946,468
Poultry	3,283,174	3,222,927	3,166,806

(2) Long-lived assets represents net property, plant and equipment reported in the country in which they are held.

18. SUPPLEMENTAL GUARANTOR INFORMATION

SYSCO International, Co. is an unlimited liability company organized under the laws of the Province of Nova Scotia, Canada and is a wholly-owned subsidiary of SYSCO. In May 2002, SYSCO International, Co. issued, in a private offering, \$200,000,000 of 6.10% notes due in 2012 (see Note 8, Debt). In December 2002, these notes were exchanged for substantially identical notes in an exchange offer registered under the Securities Act of 1933. These notes are fully and unconditionally guaranteed by SYSCO. SYSCO International, Co. is a holding company with no significant sources of income or assets, other than its equity interests in its subsidiaries and interest income from loans made to its subsidiaries. The proceeds from the issuance of the 6.10% notes were used to repay commercial paper issued to fund the fiscal 2002 acquisition of a Canadian broadline foodservice operation.

The following condensed consolidating financial statements present separately the financial position, results of operations and cash flows of the parent guarantor (SYSCO), the subsidiary issuer (SYSCO International) and all other non-guarantor subsidiaries of SYSCO (Other Non-Guarantor Subsidiaries) on a combined basis and eliminating entries.

Table of Contents**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

None.

Item 9A. Controls and Procedures

The company's management, with the participation of the company's chief executive officer and chief financial officer, evaluated the effectiveness of the company's disclosure controls and procedures as of July 1, 2006. The term disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding the required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of the company's disclosure controls and procedures as of July 1, 2006, the company's chief executive officer and chief financial officer concluded that, as of such date, the company's disclosure controls and procedures were effective at the reasonable assurance level.

No change in the company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended July 1, 2006 that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting. See Management's Report on Internal Control Over Financial Reporting included under Item 8.

Item 9B. Other Information

In a Current Report on Form 8-K filed with the Securities and Exchange Commission on June 15, 2006, the company reported that the Compensation Committee of its Board of Directors had approved forms of the (1) Fiscal Year 2007 Supplemental Bonus Agreement under the 2006 Supplemental Performance Based Bonus Plan and (2) Fiscal Year 2007 Bonus Award under the 2005 Management Incentive Plan to be entered into by the company and each of the Named Executive Officers, which agreements were expected to be entered into no later than June 30, 2006. The forms of agreements are filed as exhibits with this Annual Report on Form 10-K. The agreements were actually entered into by the company and each of the Named Executive Officers effective June 30, 2006.

PART III**Item 10. Directors and Executive Officers of the Registrant**
