(1) Based on \$400,000,000 principal amount of notes outstanding.

(2) Assumes conversion of all of the holder's notes at a conversion price of approximately \$20.14 per share of common stock. However, this conversion price will be subject to adjustment as described under the section entitled "Description of the Notes-Conversion Rights." As a result, the amount of common stock issuable upon conversion of the notes may increase or decrease in the future.

(3) Calculated based on Rule 13d-3(d)(i) of the Exchange Act using 387,916,534 shares of common stock outstanding as of September 30, 2003. In calculating this amount, we treated as outstanding the number of shares

of common stock issuable upon conversion of all of that particular holder's notes. However, we did not assume the conversion of any other holder's notes. Assumes that any other holders of notes, or any future transferees, pledgees, donees or successors of or from any such other holders of notes, do not beneficially own any common stock other than the common stock issuable upon conversion of the notes at the initial conversion rate.
