(Title of each class)

The NASDAQ Stock Market LLC
(NASDAQ Global Market)
(Name of each exchange on which registered)

Securities registered pursuant to Section 12(b) of the Act: Common Stock, \$.001 par value

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES NO

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 YES NO

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). YES NO

As of June 30, 2008, the last business day of the registrant's most recently completed second quarter, the aggregate market value of the common stock of the registrant held by non-affiliates was \$159,319,685 based upon the closing sale price of such stock as reported on the Nasdaq Global Market on that date. For purposes of such calculation, only executive officers, board members, and beneficial owners of more than 10% of the registrant's outstanding common stock are deemed to be affiliates.

As of February 23, 2009, there were 31,399,593 shares of common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for the 2009 Annual Meeting of Stockholders to be filed under the Securities Exchange Act of 1934 are incorporated by reference in Part III of this report.

SPECIAL NOTE REGARDING FORWARD LOOKING STATEMENTS

In this document, the terms Smith Micro, Company, we, us, and our refer to Smith Micro Software, Inc. and its subsidiaries.

This report contains forward-looking statements regarding Smith Micro which include, but are not limited to, statements concerning projected revenues, expenses, gross profit and income, the competitive factors affecting our business, market acceptance of products, customer concentration, the success and timing of new product introductions and the protection of our intellectual property. These forward-looking statements are based on our current expectations, estimates and projections about our industry, management's beliefs, and certain assumptions made by us. Words such as anticipates, expects, intends, plans, predicts, potential, believes, seeks, estimates, should, may, will and variations of these words or similar expressions are intended to identify forward-looking statements. Forward-looking statements also include the assumptions underlying or relating to any of the foregoing statements. These statements are not guarantees of future performance and are subject to risks, uncertainties and assumptions that are difficult to predict. Therefore, our actual results could differ materially and adversely from those expressed or implied in any forward-looking statements as a result of various factors. Such factors include, but are not limited to, the following:

The duration and depth of the current economic slowdown and its effects on capital expenditures by our customers and their end users;

our ability to predict consumer needs, introduce new products, gain broad market acceptance for such products and ramp up manufacturing in a timely manner;

changes in demand for our products from our customers and their end-users;

the intensity of the competition and our ability to successfully compete;

the pace at which the market for new products develop;

the response of competitors, many of whom are bigger and better financed than us;

our ability to successfully execute our business plan and control costs and expenses;

our ability to protect our intellectual property and our ability to not infringe on the rights of others; and

those additional factors which are listed under the section 1A. Risk Factors beginning on page 11 of this report.

The forward-looking statements contained in this report are made on the basis of the views and assumptions of management regarding future events and business performance as of the date this report is filed with the Securities and Exchange Commission (the SEC). We do not undertake any obligation to update these statements to reflect events or circumstances occurring after the date this report is filed.

Table of Contents

PART I

Item 1. BUSINESS

General

Smith Micro Software, Inc. designs, develops and markets software products and services primarily for the mobile industry. The Company is focused on developing connectivity, multimedia, and device management solutions for a converging world of wireless and wired networks. The Company's portfolio of wireless software products and services include the QuickLink family of desktop and mobile products to manage wireless data communications, including software applications for 3G and 4G broadband mobile networks, Wi-Fi, personal information management, mobile content management, device management, and data compression solutions. We sell our products and services to many of the world's leading wireless service providers (carriers), original equipment manufacturers (OEM), PC and device manufacturers, enterprise businesses, as well as direct to consumers. The proliferation of broadband mobile wireless technologies is providing new opportunities for our products and services on a global basis. When these broadband wireless technologies EVDO, UMTS/HSPA, Wi-Fi, and WiMAX are combined with new devices such as mobile phones, Personal Computers (PCs), Smartphones, and Ultra-Mobile PCs (UMPCs), opportunities emerge for new communications software products. Our core technologies are designed to address these emerging mobile convergence opportunities.

We also distribute our consumer product line and a variety of third party Mac and Windows PC software products worldwide through our online stores and third-party wholesalers, retailers and value-added resellers. We offer software products that operate on Windows, Mac, UNIX, Linux, Windows Mobile, Symbian, and Java platforms.

The underlying design concept common across our products is our ability to improve the customer's experience. This philosophy is based on the combination of solid engineering and exceptional design that reinforces our brand's competitive differentiation. We have over 25 years of experience in design, creation and custom engineering services for software products.

We are actively involved and maintain industry affiliations with leading groups such as the Wi-Fi Alliance, OMA, GSMA, and CTIA to help develop industry standards and drive the proliferation of various wireless technologies.

Our research and development expenses amounted to \$30.8, \$14.8, and \$7.9 million for the years ended December 31, 2008, 2007 and 2006, respectively. Our research and development expenses consist primarily of personnel and equipment costs required to conduct our software development efforts. We remain focused on the development and expansion of our technologies, particularly in the wireless, diagnostic, utility and Internet areas.

We were incorporated in California in November 1983, and we reincorporated in Delaware in June 1995. Our principal executive offices are located at 51 Columbia, Aliso Viejo, California 92656. Our telephone number is (949) 362-5800. Our website address is www.smithmicro.com. We make our SEC filings available on the Investor Relations page of our website. Information contained on our website is not part of this Annual Report on Form 10-K.

Business Segments

Our operations are organized into two business segments: Wireless and Consumer. We do not separately allocate operating expenses, nor do we allocate specific assets to these groups. Therefore, segment information reported includes only revenues and cost of revenues. See Note 6 of Notes to Consolidated Financial Statements for financial information related to our operating groups.

Table of Contents

Wireless

The Wireless Group's primary focus is to develop mobile connectivity, mobile information management, and mobile security solutions. QuickLink Mobile, the group's leading product, provides mobile users the ability to easily connect a notebook or wireless devices to wireless wide area networks (WWANs) and Wi-Fi hotspots. Many of the largest wireless carriers worldwide including AT&T, Alltel, Orange, NTT DoCoMo, Sprint, T-Mobile USA, Verizon Wireless, Vodafone and others rely on QuickLink Mobile technology to help their subscribers easily connect to their wireless networks every day. We also maintain strong relationships with leading device, hardware and infrastructure manufactures including: Dell, HTC, Kyocera Wireless, LG Electronics, Novatel Wireless, Pantech, Qualcomm, Siemens, Sierra Wireless, Sony Ericsson, and UTStarcom.

In addition to marketing products to wireless carriers and device manufacturers, the Wireless Group also delivers wireless mobility solutions direct to customers. Our QuickLink Mobility products are designed to address the security and mobility needs of an enterprise marketplace that is rapidly becoming more reliant on remote access to many types of wireless networks. In addition to addressing the need for robust security, the QuickLink Mobility suite allows persistent connectivity for the user operating on WWANs, corporate Local Area Networks (LAN s) and Wi-Fi networks. The applications support most IP services and interoperate with approximately 200 carriers worldwide, as well as hundreds of the popular broadband mobile devices and embedded WWAN PC notebooks.

Our Professional Services team supports our wireless mobility business direction. This area of business development leverages our experience providing custom-tooled, web-based applications to support growing businesses. From basic web design to complex solutions involving complete customer management, online commerce and fulfillment services, the Professional Services team helps businesses refine their processes and implement cost-effective web systems.

Smith Micro develops innovative applications in the multimedia and personal information management spaces for wireless carriers. Today, the group ships music and media manager applications for PCs and support for mobile devices to leading wireless carriers such as Verizon Wireless, Sprint, and Livewire.

Smith Micro continues to focus on the mobile convergence space. We are developing solutions in the Device Management and IP Multimedia Subsystem (IMS) areas, and working to integrate our technologies into more mobile devices, networks and other developers' applications. It is becoming both a smart and a connected world. Not only is there a need for Device Management on mobile devices, but Device Management also applies to other electronic devices including automobiles, home appliances, and entertainment devices.

Consumer

The Consumer Group focuses on developing software for the Mac and Windows PC productivity, utility, and graphic markets. Smith Micro's complete line of consumer, prosumer, and professional products is available through direct sales on the Smith Micro website, on partner websites, direct through customer service order desks and through traditional retail outlets. In addition, the Consumer Group also focuses on republishing and marketing third party software titles that complement our existing line of products. The Consumer Group is focused on the following market segments: Compression, Graphics, Utilities including Diagnostics, Performance, Security and Internet, Compilation and Lifestyle.

The Consumer Group's lead product line is StuffIt, which is driven by its patented and patent pending image compression, with a focus on our innovative JPEG compression technology. StuffIt provides superior lossless compression, encryption and archive capability. In addition to compression technology, the Company is focused on growing its line of graphic titles, in particular Poser, Anime Studio and Manga Studio. These product lines have a loyal following and are growing in market awareness.

Table of Contents**Industry Background**

Smith Micro offers products in the following technology and communications related markets:

Wireless To help drive revenue growth and profitability, wireless carriers have introduced new value-added products and services that coincide with a number of key enabling trends. Namely, traditional mobile devices are being replaced with multimedia-enabled devices, carriers are deploying wireless broadband network infrastructures, and consumers are increasingly adopting mobile data and multimedia services. As carriers seek to enhance their competitive position, they have increasingly focused on customer acquisition and customer service. This creates opportunities for Smith Micro, as carriers increase the use of third-party applications, services and custom solutions.

With IMS being deployed in service providers' networks around the globe and with a rich new set of wireless network options available for communication, significant changes are occurring in mobile handsets as well as the networks that support them. New intelligent handsets are being introduced to serve both Wi-Fi and cellular networks. Smith Micro provides IMS software for mobile devices.

Mobile Multimedia Digital audio players and internet-based music download services have transformed music consumption into a personal and mobile experience. As wireless carriers seek to offer premium services and mobile devices support multimedia functionality, the market for digital music distribution over wireless networks and use on wireless devices continues to grow rapidly.

Data Compression Data compression is critical to both efficient storage and transmission of data and multimedia content. As subscriber demand increases for mobile access to larger image, audio and video files, we believe wireless carriers and mobile device manufacturers face a pressing need to use better compression technologies to reduce the size of digital content sent over their networks and to maximize the efficient use of limited device memory.

Device Management Device Management solutions deliver proven standards-based management for updating increasingly complex mobile devices. Our product line offers both a client and server solution. The ability to deploy software to configure, update, diagnose, secure, and synchronize devices remotely results in significantly reduced customer care expenses. Greater control results in better customer service and a richly enhanced customer experience.

Graphic Software Poser's 3D figure design and animation program, Manga Studio, originally created in Japan as ComicStudio, has become the number one selling Manga software worldwide in the fast growing global animation and 3D markets. Anime Studio is a complete animation solution for creating 2D movies, cartoons, anime or cut-out animations and is ideal for animators of any caliber. Many of the animations that people create with Anime Studio can be seen on social networking websites and YouTube.

Diagnostic & Utility Software The growing prevalence and complexity of PCs and mobility operating systems require increasingly sophisticated diagnostic and utility software solutions to improve the consumer's overall computing and mobile experience. Consumers demand products that can enhance PC performance, protect against spam, spyware and computer hacking and remove malicious code. Businesses rely on cross-platform solutions that can quickly identify and repair a broad range of computer-related problems. The Company's software solutions for Windows and Mac platforms perform diagnostic, maximizes performance, and helps to protect consumer's online identity. The Company develops and republishes a growing line of products including Spring Cleaning, CheckIt, Internet Cleanup and VMWare.

Products and Services

Our primary product lines and products consist of the following:

Product Groups	Products	Description
Wireless	QuickLink Mobile QuickLink Mobility QuickLink Server	Centralized connection management application to control, customize and automate wireless connections of all types.

Table of Contents

Product Groups	Products	Description
	QuickLink PhoneManager	The products can include a Connectivity and Device Management Server for management of software and firmware updates. The QuickLink Mobility Suite also includes a mobile VPN with session persistence for laptops and smart devices.
	QuickLink Music QuickLink Media	An intuitive music and multimedia manager to sync digital content to and from mobile devices.
	StuffIt Wireless Insignia Device Management Suite QuickLink Voice & Messenger Active Images	StuffIt Wireless enables compression of data files to facilitate storage in mobile devices and transmission over wireless networks; and file compression for storage on Internet photo sites. Insignia Device Management (DM) Suite allows you to intelligently manage a diverse population of mobile devices including the most advanced next-generation mobile phones and PDAs.
Consumer	StuffIt Deluxe StuffIt Mobile CheckIt Registry Cleaner Spring Cleaning Internet Cleanup Executive Synch Poser Anime Studio Manga Studio Aquazone	Utility & diagnostic solutions and graphics products.

Wireless carriers and mobile device manufacturers incorporate our products into their branded product and service offerings, selling directly to their market segments. Our technologies are utilized in many major wireless networks to facilitate data communications via mobile devices, multimedia solutions, and device management. Our primary products include QuickLink Mobile, QuickLink Mobility, QuickLink Music, QuickLink Media, Insignia Device Management, as well as a variety of consumer products, which are described above.

Wireless Products. QuickLink Mobile provides Windows, Mac, and Linux users with a centralized application to control, customize and automate wireless connections, including 3G and 4G, WWAN, Wi-Fi and WiMAX. In addition, the QuickLink Configuration Manager provides a server solution designed to manage deployment and configuration of the QuickLink Mobile connection manager. Our QuickLink Music technology allows users to purchase music from any compatible store(s), and transfer it to or from any music-capable mobile device. Our Insignia Device Management Suite is a client server solution to update and manage mobile devices. We are positioning our technology to reach a much broader audience than just the updating of mobile handset devices, and as more and more companies understand the true value of our Device Management solutions, we believe we can expand into new market segments.

QuickLink Mobility is designed for the enterprise customer providing not only connection management but expanded security functionality, session persistence and a world-class mobile Virtual Private Network (VPN). Additionally, QuickLink Mobility supports approximately 200 carriers worldwide and interoperates with many different types of mobile devices, PC Cards, USB modems and embedded modems.

Table of Contents

Consumer Products. We offer consumer products that provide compression, utility, diagnostic, productivity, and graphic solutions. These products are designed to enhance PC performance, protect against spam, spyware and computer hacking and remove malicious code. Our graphic products enable customers to create 2D and 3D images. Many of our leading products work with both the Mac and Windows OS. Our line of consumer products is available through direct sales on our website, indirect sales on partner websites and through traditional retail outlets.

Marketing & Sales Distribution Strategy

Today's communication technologies are in a constant state of evolution, where ever more advanced devices, chips and networking platforms promise ever greater speed and capacity. Yet, for all the advances, it is the software that empowers the world of mobile convergence and makes these next-generation platforms accessible to the user. The opportunity before us now is to draw together the technologies under development across our product lines into converged solutions the market now demands. We believe this is at the forefront of our innovation.

We continue to develop innovative, enabling technology and infrastructure products that facilitate the usage of wireless data and other premium mobile services, thereby providing our customers with additional revenue opportunities and differentiated services that encourage customer loyalty.

A core strategy is our ability to enable our wireless carrier and device manufacturer customers to introduce new products to their markets that generate revenue more quickly. Our industry knowledge and our research are used to help determine the next market opportunities for our customers in the mobile market.

Our sales distribution strategy is as follows:

Leverage Carrier and OEM Relationships. We intend to continue to capitalize on our strong relationships with the world's leading wireless carriers and mobile device manufacturers. For example, our carrier customers serve as a valuable distribution channel, providing access to millions of end-users and also providing market feedback for future product offerings.

Focus on Multiple High-Growth Markets. We continue to focus on the wireless communications, multimedia and enterprise Device Management markets and believe we are well-positioned to capitalize on the favorable trends in mobility services. Among these trends are the ongoing introduction of new data services by wireless carriers, the increasing availability of multimedia-enabled mobile devices and the need for consumers and enterprises to manage their wireless access to the Internet.

Expand our Customer Base. In addition to introducing new products to our customer, we intend to grow our domestic and international business through cross-selling our portfolio of products to our current customer base.

Selectively Pursue Acquisitions of Complementary Products and Services. In line with the Company's strategy, we plan to continue to pursue selected acquisition opportunities in an effort to expand our product and technological abilities, enter complementary markets and extend our geographic reach. In the past, we have used acquisitions to enhance our technology features and customer base, and to extend our offerings into new markets.

The Company utilizes a variety of direct and indirect sales distribution channels. We believe that sales of our differentiated product lines are enhanced by knowledgeable sales persons who can convey the value of the software. Our worldwide sales organization delivers value by understanding their client's businesses and needs, bringing together new mobile products that allow our customers and potential customers to enter new market opportunities as demand for these innovative services emerges.

Smith Micro is expanding its ability to serve wireless carriers, OEMs and enterprise customers in Europe and Asia through international sales and support offices based in Sweden, Norway, the United Kingdom, Australia, China, and Singapore.

Table of Contents

Our market continues to evolve as we continuously offer new communications and content and image management products and our customers adopt new technologies and software bundling techniques. These manufacturers bundle our software products with their own products. We have translated selected products into as many as 18 languages to allow our customers the flexibility of offering multi-language products that meet the needs of their worldwide markets.

Our three largest customers (Verizon Wireless, AT&T, and Sprint in 2008, Verizon Wireless, UTStarcom, and Sprint in 2007, Verizon Wireless, Kyocera Wireless and Alltel in 2006), and their respective affiliates, in each year, have accounted for 47.0% of our revenues in 2008, 68.5% of our revenues in 2007, and 77.4% of our revenue in 2006. Our major customers could reduce their orders of our products in favor of a competitor's product or for any other reason. The loss of any of our major customers or decisions by a significant customer to substantially reduce purchases could have a material adverse effect on our business. Sales to Verizon Wireless amounted to 30.9%, 64.4%, and 74.4% of the Company's net revenues for 2008, 2007 and 2006, respectively.

Integration Initiatives

Smith Micro is committed to the integration of recent acquisitions for engineering, sales and marketing within the Company. The Company continues to drive greater productivity, flexibility and cost savings by transforming and integrating its own business processes and function, including eliminating redundancies.

Customer Service and Technical Support

We provide technical support and customer service through our online knowledge base, email, and voice. OEM customers generally provide their own primary customer support functions and rely on us for support to their own technical support personnel.

Product Development

The software industry, particularly the wireless market, is characterized by rapid and frequent changes in technology and user needs. We work closely with industry groups and customers, both current and potential, to help us anticipate changes in technology and determine future customer needs. Software functionality depends upon the capabilities of the hardware. Accordingly, we maintain engineering relationships with various hardware manufacturers and we develop our software in tandem with their product development. Our engineering relationships with manufacturers, as well as with our major customers, are central to our product development efforts. We remain focused on the development and expansion of our technology, particularly in the wireless space. Research and development expenditures amounted to \$30.8, \$14.8, and \$7.9 million for the years ended December 2008, 2007 and 2006, respectively.

Manufacturing

Our software is sold in several forms. We offer a package or kit that may include: CD-ROM(s); a cable; and certain other documentation or marketing material. We also permit selected OEM customers to duplicate our products on their own CD-ROM's, USB devices, or embedded devices, and pay a royalty based on usage. The majority of our OEM business requires that we provide a CD, which includes a soft copy of a user guide. Finally, we grant licenses to certain OEM customers that enable those customers to preload a copy of our software onto a personal computer. With the enterprise sales program, we offer site licenses under which a corporate user is allowed to distribute copies of the software to users within the corporate sites.

Our product development group produces a product master for each product that is then duplicated and packaged into products by the manufacturing organization. All product components are purchased by our personnel in our Aliso Viejo, California facility. Our manufacturing is subcontracted to outside vendors and includes the replication of CD-ROM's and the printing of documentation materials. Assembly of the final package is completed by an outside vendor or in our Aliso Viejo, California facility.

Table of Contents

Competition

The markets in which we operate are highly competitive and subject to rapid changes in technology. Rapidly changing technology combined with relatively low barriers to entry in the mobile software market is constantly creating new opportunities, and we expect new competitors to enter the market. We also believe that competition from established and emerging software companies will continue to intensify as the emerging mobile, wireless and Internet markets evolve. We compete with other software vendors for the attention of customers as well as in our efforts to acquire technology and qualified personnel.

We believe that the principal competitive factors affecting the mobile software market include: product features, ease of use, customization to customer-specific needs, product quality, price, customer service and effective sales and marketing efforts. Although we believe that our products currently compete favorably with respect to these factors, there can be no assurance that we can maintain our competitive position against current and potential competitors. We believe that the market for our software products has been and will continue to be characterized by significant price competition. A material reduction in the price of our products could negatively affect our profitability. We face competition from Microsoft due to its market dominance and the fact that it is the publisher of the most prevalent personal computer operating system, Windows.

Many existing and potential OEM customers have technological capabilities to develop products that compete directly with our products. In such event, these customers may discontinue purchases of our products. Our future performance is substantially dependent upon the extent to which existing OEM customers elect to purchase communication software from us rather than design and develop their own software. Because our customers are not contractually obligated to purchase any of our products, they may cease to rely, or fail to expand their reliance on us as a source for communication software in the future.

Proprietary Rights and Licenses

Our success and ability to compete is dependent upon our software code base, our programming methodologies and other intellectual properties. To protect our proprietary technology, we rely on a combination of trade secrets, nondisclosure agreements, patents, and copyright and trademark law that may afford only limited protection. As of December 31, 2008, we own 15 effective U.S. patents, and 21 patent applications are currently pending. These patents provide generalized protection to our intellectual property base, and we will continue to apply for various patents and trademarks in the future.

We seek to avoid disclosure of our intellectual property by requiring employees and consultants with access to our proprietary information to execute confidentiality agreements with us and by restricting access to our source code. The steps that we have taken to protect our proprietary technology may not be adequate to deter misappropriation of our proprietary information or prevent the successful assertion of an adverse claim to software utilized by us. In addition, we may not be able to detect unauthorized use of our intellectual property rights or take effective steps to enforce those rights.

In selling our products, we primarily rely on shrink wrap licenses that are not signed by licensees and may be unenforceable under the laws of certain jurisdictions. In addition, the laws of some foreign countries do not protect our proprietary rights to as great an extent as do the laws of the United States. Accordingly, the means we use currently to protect our proprietary rights may not be adequate. Moreover, our competitors may independently develop technology similar to ours. We also license technology on a non-exclusive basis from several companies for inclusion in our products and anticipate that we will continue to do so in the future. If we are unable to continue to license these technologies or to license other necessary technologies for inclusion in our products, or if we experience substantial increases in royalty payments under these third party licenses, our business could be materially and adversely affected.

Employees

As of December 31, 2008, we had a total of 359 employees within the following departments: 219 in engineering; 85 in sales and marketing; 34 in management and administration; 11 in manufacturing and 10 in customer

Table of Contents

support. We utilize temporary labor to assist during peak periods of manufacturing volume. We believe that our future success will depend in large part upon our continuing ability to attract and retain highly skilled managerial, sales, marketing, customer support, research and development personnel and consulting staff. Like other software companies, we face intense competition for such personnel, and we have at times experienced and continue to experience difficulty in recruiting qualified personnel. There can be no assurance that we will be successful in attracting, assimilating and retaining other qualified personnel in the future. We are not subject to any collective bargaining agreement and we believe that our relationships with our employees are good.

Item 1A. RISK FACTORS

Our future operating results are highly uncertain. Before deciding to invest in our common stock or to maintain or increase your investment, you should carefully consider the risks described below, in addition to the other information contained in this report and in our other filings with the SEC, including our reports on Forms 10-K, 10-Q and 8-K. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also affect our business operations. If any of these risks actually occur, that could seriously harm our business, financial condition or results of operations. In that event, the market price for our common stock could decline and you may lose all or part of your investment.

Our operating results may be adversely impacted by the current worldwide economic slowdown and uncertainties in the marketplace.

Recently worldwide economic conditions have experienced a general deterioration due to credit conditions resulting from the recent financial crisis affecting the banking system and financial markets and other factors, including slower economic activity, decreased consumer confidence, reduced corporate profits and capital spending, adverse business conditions and liquidity concerns, and the current recession, which is projected to last at least through much of 2009. These conditions make it difficult for our wireless carrier and OEM customers and their end users to accurately forecast and plan future business activities and capital expenditures, which could cause them to slow spending on our products and services. Furthermore, during challenging economic times our customers may face issues gaining timely access to sufficient credit, which could result in an impairment of their ability to make timely payments to us. We cannot predict the timing, strength or duration of the current economic slowdown or subsequent economic recovery. If the economy or markets in which we operate do not continue at their present levels or continue to deteriorate, we may need to record charges related to restructuring costs and the impairment of goodwill and other long-lived assets, and our business, financial condition and results of operations will likely be materially and adversely affected.

Our quarterly revenues and operating results are difficult to predict and could fall below analyst or investor expectations, which could cause the price of our common stock to fall.

Our quarterly revenue and operating results have fluctuated significantly in the past and may continue to vary from quarter to quarter due to a number of factors, many of which are not within our control. If our operating results do not meet the expectations of securities analysts or investors, our stock price may decline. Fluctuations in our operating results may be due to a number of factors, including the following:

the gain or loss of a key customer;

the size and timing of orders from and shipments to our major customers;

the size and timing of any return product requests for our products;

our ability to maintain or increase gross margins;

variations in our sales channels or the mix of our product sales;

Table of Contents

our ability to anticipate market needs and to identify, develop, complete, introduce, market and produce new products and technologies in a timely manner to address those needs;

the availability and pricing of competing products and technologies and the resulting effect on sales and pricing of our products;

acquisitions;

the effect of new and emerging technologies;

the timing of acceptance of new mobile services by users of our customers' services;

deferrals of orders by our customers in anticipation of new products, applications, product enhancements or operating systems; and

general economic and market conditions.

We have difficulty predicting the volume and timing of orders. In any given quarter, our sales have involved, and we expect will continue to involve, large financial commitments from a relatively small number of customers. As a result, the cancellation or deferral of even a small number of orders would reduce our revenues, which would adversely affect our quarterly financial performance. Also, we have often booked a large amount of our sales in the last month of the quarter and often in the last week of that month. Accordingly, delays in the closing of sales near the end of a quarter could cause quarterly revenues to fall substantially short of anticipated levels. Significant sales may also occur earlier than expected, which could cause operating results for later quarters to compare unfavorably with operating results from earlier quarters.

A large portion of our operating expenses, including rent, depreciation and amortization is fixed and difficult to reduce or change. Accordingly, if our total revenue does not meet our expectations, we may not be able to adjust our expenses quickly enough to compensate for the shortfall in revenue. In that event, our business, financial condition and results of operations would be materially and adversely affected.

Due to all of the foregoing factors, and the other risks discussed in this report, you should not rely on quarter-to-quarter comparisons of our operating results as an indication of future performance.

Our total revenues currently depend on a small number of products, so our operating results are vulnerable to unexpected shifts in demand.

Substantially all of our total revenue in recent years was derived from sales of our wireless connectivity software products until the third quarter of 2005, when we began including sales of products acquired in the Allume Systems, Inc. acquisition. In addition, during 2006, a substantial portion of our total revenue was derived from sales of our music management software, particularly sales of V CAST Music Essentials Kit for Verizon Wireless. Although our strategy is to continue to introduce new products, these efforts may not reduce the extent to which our total revenues are dependent on one or more of our products in future periods.

We also derive a significant portion of our revenues from a few vertical markets. In particular, our music management software products are primarily sold to wireless carriers. In order to sustain and grow our business, we must continue to sell our software products into these vertical markets. Shifts in the dynamics of these vertical markets, such as new product introductions by our competitors, could seriously harm our results of operations, financial condition and prospects.

To increase our sales outside our core vertical markets, for example to large enterprises, requires us to devote time and resources to hire and train sales employees familiar with those industries. Even if we are successful in hiring and training sales teams, customers in other vertical markets may not need or sufficiently value our current products or new product introductions.

Table of Contents***Competition within our target markets is intense and includes numerous established competitors, which could negatively affect our revenues and results of operations.***

We operate in markets that are extremely competitive and subject to rapid changes in technology. Specifically, Microsoft Corporation poses a significant competitive threat to us because Microsoft operating systems may include some capabilities now provided by certain of our OEM and retail software products. If users are satisfied relying on the capabilities of Windows-based systems or other hardware or operating systems, sales of our products are likely to decline. In addition, because there are low barriers to entry into the software markets in which we participate and may participate in the future, we expect significant competition from both established and emerging software companies in the future. In fact, our growth opportunities in new product markets could be limited to the extent established and emerging software companies enter or have entered those markets. Furthermore, our existing and potential OEM customers may acquire or develop products that compete directly with our products.

Microsoft and many of our other current and prospective competitors have significantly greater financial, marketing, service, support, technical and other resources than we do. As a result, they may be able to adapt more quickly than we to new or emerging technologies and changes in customer requirements or to devote greater resources to the promotion and sale of their products. Announcements of competing products by large competitors such as Microsoft or other vendors could result in the cancellation of orders by customers in anticipation of the introduction of such new products. In addition, some of our competitors currently make complementary products that are sold separately. Such competitors could decide to enhance their competitive position by bundling their products to attract customers seeking integrated, cost-effective software applications. Some competitors have a retail emphasis and offer OEM products with a reduced set of features. The opportunity for retail upgrade sales may induce these and other competitors to make OEM products available at their own cost or even at a loss. We also expect competition to increase as a result of software industry consolidations, which may lead to the creation of additional large and well-financed competitors. Increased competition is likely to result in price reductions, fewer customer orders, reduced margins and loss of market share.

Acquisitions of companies or technologies may disrupt our business and divert management attention and cause our current operations to suffer.

In 2007, we acquired Ecutel Systems, Inc. and the assets of Insignia Solutions, plc and eFrontier America, Inc., and in January 2008, we completed the acquisition of the Mobility Solutions Group of PCTEL. As part of any acquisition, we will be required to assimilate the operations, products and personnel of the acquired businesses and train, retain and motivate key personnel from the acquired businesses. We may not be able to maintain uniform standards, controls, procedures and policies if we fail in these efforts. Similarly, acquisitions may cause disruptions in our operations and divert management's attention from our company's day-to-day operations, which could impair our relationships with our current employees, customers and strategic partners. Acquisitions may also subject us to liabilities and risks that are not known or identifiable at the time of the acquisition.

We may also have to incur debt or issue equity securities in order to finance future acquisitions. Our financial condition could be harmed to the extent we incur substantial debt or use significant amounts of our cash resources in acquisitions. The issuance of equity securities for any acquisition could be substantially dilutive to our existing stockholders. In addition, we expect our profitability could be adversely affected because of acquisition-related accounting costs, write offs, amortization expenses, and charges related to acquired intangible assets. In consummating acquisitions, we are also subject to risks of entering geographic and business markets in which we have had limited or no prior experience. If we are unable to fully integrate acquired businesses, products or technologies within existing operations, we may not receive the intended benefits of acquisitions.

We have recently entered new, emerging markets in which we have limited experience; if these markets do not develop or we are unable to otherwise succeed in them, our revenues will suffer and the price of our common stock will likely decline.

Our recent and planned product introductions, such as StuffIt Wireless, Active Images, our planned connection management products for the WiMAX market, and the technology that underlies our Device Management products have allowed us to enter new markets. We have a short operating history in these emerging markets and limited experience with image and Device Management software and platforms. A viable market for these products may not

develop or be sustainable, and we may face intense competition in these markets. In

Table of Contents

addition, our success in these markets depends on our carrier customers' ability to successfully introduce new mobile services enabled by our products and our ability to broaden our carrier customer base, which we believe will be difficult and time-consuming. If the expected benefits from entering new markets do not materialize, our revenues will suffer and the price of our common stock would likely decline. In addition, to the extent we enter new markets through acquisitions of companies or technologies, our financial condition could be harmed or our stockholders could suffer dilution without a corresponding benefit to our company if we do not realize expected benefits of entering such new markets.

If the adoption of and investments in new technologies and services grows more slowly than anticipated in our product planning and development, our operating results, financial condition and prospects may be negatively affected.

If the adoption of and investments in new technologies and services does not grow or grows more slowly than anticipated, we will not obtain the anticipated returns from our planning and development investments. For example, our new QuickLink Mobile and QuickLink Enterprise products incorporate Mobile IP technology which allows notebook users the ability to roam between wireless wide area networks and Wi-Fi hot spots, and to seamlessly hand off to the enterprise LAN without losing connectivity. In addition, our Device Management products allow our customers to update mobile devices from a home office; technology that provides a mechanism to allow for efficient firmware updates for mobile devices. Future sales and any future profits from these and related products are substantially dependent upon the acceptance and use of Wi-Fi, and on the continued adoption of mobile device services.

Many of our customers and other communications service providers have made and continue to make major investments in next generation networks that are intended to support more complex applications. If communications service providers delay their deployment of networks or fail to deploy such networks successfully, demand for our products could decline, which would adversely affect our revenues. Also, to the extent we devote substantial resources and incur significant expenses to enable our products to be interoperable with new networks that have failed or have been delayed or not deployed, our operating results, financial condition and prospects may be negatively affected.

Our growth depends in part on our customers' ability and willingness to promote services and attract and retain new customers or achieve other goals outside of our control.

We sell our products for use on handheld devices primarily through our carrier customers. Losing the support of these customers may limit our ability to compete in existing and potential markets and could negatively affect our revenues. In addition, the success of these customers and their ability and willingness to market services supported by our products are critical to our future success. Our ability to generate revenues from sales of our software is also constrained by our carrier customers' ability to attract and retain customers. We have no input into or influence upon their marketing efforts and sales and customer retention activities. If our carrier customers, particularly our largest customer, Verizon Wireless, fail to maintain or grow demand for their services, revenues or revenue growth from our products designed for use on mobile devices will decline and our results of operations will suffer.

Our gross margins may continue to change due to shifts in our sales mix.

Our gross margins can change quarter to quarter and year to year due to a change in our sales mix. Gross margins have ranged from 62.8% in 2006 to 71.9% in 2007 to 79.6% in 2008. As we have shifted to more downloads and license revenue, our gross margins have increased. Gross margins on our music kits increased due to a shift in how the product was merchandised by our primary music customers. In early 2007, this product was sold primarily as a higher revenue, lower margin music kit (including software, cable and ear buds). In late 2007 and in 2008, the music product was being delivered more as downloadable software or as a software-only CD, resulting in lower revenue per unit, but at a much higher margin per unit. Our future gross margin could fluctuate based on the mix of products sold in a quarter, and how our products are delivered to the customer.

Table of Contents***Our products may contain undetected software defects, which could negatively affect our revenues.***

Our software products are complex and may contain undetected defects. In the past, we have discovered software defects in certain of our products and have experienced delayed or lost revenues during the period it took to correct these problems. Although we and our OEM customers test our products, it is possible that errors may be found or occur in our new or existing products after we have commenced commercial shipment of those products. Defects, whether actual or perceived, could result in adverse publicity, loss of revenues, product returns, a delay in market acceptance of our products, loss of competitive position or claims against us by customers. Any such problems could be costly to remedy and could cause interruptions, delays, or cessation of our product sales, which could cause us to lose existing or prospective customers and could negatively affect our results of operations.

Technology and customer needs change rapidly in our market, which could render our products obsolete and negatively affect our business, financial condition and results of operations.

Our success depends on our ability to anticipate and adapt to changes in technology and industry standards. We will also need to continue to develop and introduce new and enhanced products to meet our target markets changing demands, keep up with evolving industry standards, including changes in the Microsoft operating systems with which our products are designed to be compatible, and to promote those products successfully. The communications and utilities software markets in which we operate are characterized by rapid technological change, changing customer needs, frequent new product introductions, evolving industry standards and short product life cycles. Any of these factors could render our existing products obsolete and unmarketable. In addition, new products and product enhancements can require long development and testing periods as a result of the complexities inherent in today's computing environments and the performance demanded by customers and called for by evolving wireless networking technologies. If our target markets do not develop as we anticipate, our products do not gain widespread acceptance in these markets, or we are unable to develop new versions of our software products that can operate on future wireless networks and PC and mobile device operating systems and interoperate with other popular applications, our business, financial condition and results of operations could be materially and adversely affected.

Regulations affecting our customers and us and future regulations to which they or we may become subject to, may harm our business.

Certain of our customers in the communications industry are subject to regulation by the Federal Communications Commission, which could have an indirect effect on our business. In addition, the United States telecommunications industry has been subject to continuing deregulation since 1984. We cannot predict when, or upon what terms and conditions, further regulation or deregulation might occur or the effect regulation or deregulation may have on demand for our products from customers in the communications industry. Demand for our products may be indirectly affected by regulations imposed upon potential users of those products, which may increase our costs and expenses.

We may be unable to adequately protect our intellectual property and other proprietary rights, which could negatively impact our revenues.

Our success is dependent upon our software code base, our programming methodologies and other intellectual properties and proprietary rights. In order to protect our proprietary technology, we rely on a combination of trade secrets, nondisclosure agreements, patents, and copyright and trademark law. We currently own United States trademark registrations for certain of our trademarks and United States patents for certain of our technologies. However, these measures afford us only limited protection. Furthermore, we rely primarily on shrink wrap licenses that are not signed by the end user and, therefore, may be unenforceable under the laws of certain jurisdictions. Accordingly, it is possible that third parties may copy or otherwise obtain our rights without our authorization. It is also possible that third parties may independently develop technologies similar to ours. It may be difficult for us to detect unauthorized use of our intellectual property and proprietary rights.

We may be subject to claims of intellectual property infringement as the number of trademarks, patents, copyrights and other intellectual property rights asserted by companies in our industry grows and the coverage of these patents and other rights and the functionality of software products increasingly overlap. From time to time, we have received communications from third parties asserting that our trade name or features, content, or trademarks of

Table of Contents

certain of our products infringe upon intellectual property rights held by such third parties. We have also received correspondence from third parties separately asserting that our products may infringe on certain patents held by each of the parties. Although we are not aware that any of our products infringe on the proprietary rights of others, third parties may claim infringement by us with respect to our current or future products. Additionally, our customer agreements require that we indemnify our customers for infringement claims made by third parties involving our intellectual property embedded in their products. Infringement claims, whether with or without merit, could result in time-consuming and costly litigation, divert the attention of our management, cause product shipment delays or require us to enter into royalty or licensing agreements with third parties. If we are required to enter into royalty or licensing agreements, they may not be on terms that are acceptable to us. Unfavorable royalty or licensing agreements could seriously impair our ability to market our products.

If we are unable to retain key personnel, the loss of their services could materially and adversely affect our business, financial condition and results of operations.

Our future performance depends in significant part upon the continued service of our senior management and other key technical and consulting personnel. We do not have employment agreements with our key employees that govern the length of their service. The loss of the services of our key employees would materially and adversely affect our business, financial condition and results of operations. Our future success also depends on our ability to continue to attract, retain and motivate qualified personnel, particularly highly skilled engineers involved in the ongoing research and development required to develop and enhance our products. Competition for these employees remains high and employee retention is a common problem in our industry. Our inability to attract and retain the highly trained technical personnel that are essential to our product development, marketing, service and support teams may limit the rate at which we can generate revenue, develop new products or product enhancements and generally would have an adverse effect on our business, financial condition and results of operations.

If we fail to continue to establish and maintain strategic relationships with mobile device manufacturers, market acceptance of our products, and our profitability, may suffer.

Most of our strategic relationships with mobile device manufacturers are not subject to written contract, but rather are in the form of informal working relationships. We believe these relationships are valuable to our success. In particular, these relationships provide us with insights into product development and emerging technologies, which allows us to keep abreast of, or anticipate, market trends and helps us serve our current and prospective customers. Because these relationships are not typically governed by written agreements, there is no obligation for many of our partners to continue working with us. If we are unable to maintain our existing strategic relationships with mobile device manufacturers or if we fail to enter into additional strategic relationships or the parties with whom we have strategic relationships favor one of our competitors, our ability to provide products that meet our current and prospective customers' needs could be compromised and our reputation and future revenue prospects could suffer. For example, if our software does not function well with a popular mobile device because we have not maintained a relationship with its manufacturer, carriers seeking to provide that device to their respective customers could choose a competitor's software over ours or develop their own. Even if we succeed in establishing these relationships, they may not result in additional customers or revenues.

We may raise additional capital through the issuance of additional equity or convertible debt securities or by borrowing money, in order to meet our capital needs. Additional funds may not be available on terms acceptable to us to allow us to meet our capital needs.

We believe that the cash, cash equivalents and short-term investments on hand and the cash we expect to generate from operations will be sufficient to meet our capital needs for at least the next twelve months. However, it is possible that we may need or choose to obtain additional financing to fund our activities in the future. We could raise these funds by selling more stock to the public or to selected investors, or by borrowing money. We may not be able to obtain additional funds on favorable terms, or at all. If adequate funds are not available, we may be required to curtail our operations or other business activities significantly or to obtain funds through arrangements with strategic partners or others that may require us to relinquish rights to certain technologies or potential markets. If we raise additional funds by issuing additional equity or convertible debt securities, the ownership percentages of

Table of Contents

existing stockholders would be reduced. In addition, the equity or debt securities that we issue may have rights, preferences or privileges senior to those of the holders of our common stock. We currently have no established line of credit or other business borrowing facility in place.

It is possible that our future capital requirements may vary materially from those now planned. The amount of capital that we will need in the future will depend on many factors, including:

the market acceptance of our products;

the levels of promotion and advertising that will be required to launch our products and achieve and maintain a competitive position in the marketplace;

our business, product, capital expenditure and research and development plans and product and technology roadmaps;

the levels of inventory and accounts receivable that we maintain;

capital improvements to new and existing facilities;

technological advances;

our competitors' response to our products; and

our relationships with suppliers and customers.

In addition, we may raise additional capital to accommodate planned growth, hiring, infrastructure and facility needs or to consummate acquisitions of other businesses, products or technologies.

Our business, financial condition and operating results could be adversely affected as a result of legal, business and economic risks specific to international operations.

In recent years, our revenues derived from sales to customers outside the United States have not been material. Our revenues derived from such sales can vary from quarter to quarter and from year to year. We also frequently ship products to our domestic customers' international manufacturing divisions and subcontractors. In the future, we may expand these international business activities. International operations are subject to many inherent risks, including:

general political, social and economic instability;

trade restrictions;

the imposition of governmental controls;

exposure to different legal standards, particularly with respect to intellectual property;

burdens of complying with a variety of foreign laws;

import and export license requirements and restrictions of the United States and any other country in which we operate;

unexpected changes in regulatory requirements;

foreign technical standards;

changes in tariffs;

difficulties in staffing and managing international operations;

difficulties in securing and servicing international customers;

Table of Contents

difficulties in collecting receivables from foreign entities;

fluctuations in currency exchange rates and any imposition of currency exchange controls; and

potentially adverse tax consequences.

These conditions may increase our cost of doing business. Moreover, as our customers are adversely affected by these conditions, our business with them may be disrupted and our results of operations could be adversely affected.

Item 1B. UNRESOLVED STAFF COMMENTS

None.

Item 2. PROPERTIES

Our corporate headquarters, including our principal administrative, sales and marketing, customer support and research and development facility, is located in Aliso Viejo, California, where we currently lease and occupy approximately 33,000 square feet of space pursuant to leases that expire May 31, 2016.

We lease approximately 14,400 square feet in Chicago, Illinois under a lease that expires August 31, 2012. We lease approximately 13,300 square feet in Watsonville, California under a lease that expires September 30, 2013. We lease approximately 7,300 square feet in Herndon, Virginia under a lease that expires November 30, 2009. We lease approximately 3,400 square feet in Campbell, California under a lease that expired January 31, 2009. Internationally, we lease space in Stockholm, Sweden; Seoul, South Korea; Belgrade, Serbia; Oslo, Norway; and Vancouver, Canada. These leases are for one to three-year terms.

We believe that suitable additional or alternative space will be available in the future on commercially reasonable terms as needed.

Item 3. LEGAL PROCEEDINGS

The Company is not involved in any pending material legal proceedings at this time although we may become subject to legal proceedings or claims that arise in the ordinary course of business or otherwise.

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

Table of Contents**PART II****Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market Information**

Our common stock is traded on the NASDAQ Global Market under the symbol SMSI. The high and low sale prices for our common stock as reported by NASDAQ are set forth below for the periods indicated.

	High	Low
YEAR ENDED DECEMBER 31, 2008:		
First Quarter	\$ 8.68	\$ 4.44
Second Quarter	9.15	5.68
Third Quarter	8.44	5.37
Fourth Quarter	7.39	4.00
YEAR ENDED DECEMBER 31, 2007:		
First Quarter	\$20.04	\$12.13
Second Quarter	21.20	11.91
Third Quarter	18.60	13.27
Fourth Quarter	16.95	7.32

On February 23, 2009, the closing sale price for our common stock as reported by NASDAQ was \$4.23.

For information regarding Securities Authorized for Issuance under Equity Compensation Plans, please refer to Item 12.

Stock Performance Graph

The following graph and information compares the cumulative total stockholder return on our common stock against the cumulative total return of the S&P Midcap 400 Index and the S&P Midcap Applications Software Index (Peer Group) for the same period.

The graph covers the period from December 31, 2003 through December 31, 2008. The graph assumes that \$100 was invested in our common stock on December 31, 2003, and in each index, and that all dividends were reinvested. No cash dividends have been declared on our common stock. Stockholder returns over the indicated period should not be considered indicative of future stockholder returns.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and the related notes and other financial information appearing elsewhere in this Annual Report. Readers are also urged to carefully review and consider the various disclosures made by us which attempt to advise interested parties of the factors which affect our business, including without limitation the disclosures made in Item 1A of Part I of this Annual Report under the caption Risk Factors.

Risk factors that could cause actual results to differ from those contained in the forward-looking statements including but are not limited to: the duration and depth of the current economic slowdown and its effects on the capital expenditures by our customers and their end users; our dependence upon a single customer for a significant portion of our revenues; potential fluctuations in quarterly results; deriving revenues from a small number of products; failure to successfully compete; failure to successfully integrate acquisitions; entry into new markets; failure of our customers to adopt new technologies; dependence upon relationships with carrier customers; declines in gross margins; undetected software defects; changes in technology; delays or failure in deliveries from component suppliers; failure of our products to achieve broad acceptance; failure to protect intellectual property; exposure to intellectual property claims; and loss of key personnel.

Introduction and Overview

Our business model is based primarily upon the design, development and sale of software that supports the wireless industry. Our products are utilized in major wireless networks throughout the world that support data communications through the use of mobile devices or other wireless communication devices such as PC cards, USB modems, and embedded modems in PCs. Our other mobility product lines are designed to improve the use of content management, personal information management, and to provide over-the-air updates to mobile devices. Wireless network providers and device manufacturers generally incorporate our products into their products sold directly to businesses and consumers or on servers in the network environment to facilitate the management for mobile devices and including firmware over-the-air updates.

Our business is primarily dependent upon the demand for mobile communications solutions and the corresponding requirements for software solutions to support this demand. During the last three years, demand for these types of products has increased as wireless providers compete to introduce higher network speeds, and launch new services that utilize these improving wireless broadband networks.

In addition, we have a strong consumer products business and we continue to invest in this area of the business.

We continue to invest in research and development and have built one of the industry's leading wireless product lines. We believe that we are well positioned to capitalize on market opportunities as we leverage the strength of our technology capabilities with our growing global reach and expanding product lines.

During 2008, we have been focused on integrating our most recent acquisitions while organically growing our business. As such, there has been an increase in revenues accompanied by an increase in operating expenses, including significant non-cash expenses, such as stock-based compensation, amortization of intangibles associated with acquisitions, and non-cash tax expense. We believe there will continue to be excellent growth opportunities within the wireless communications software marketplace and we continue to focus on positioning Smith Micro to benefit from these opportunities.

One customer in the Wireless business segment, Verizon Wireless, accounted for 30.9% of total revenues in for the year ended December 31, 2008 and 64.4% for the year ended December 31, 2007. One customer, Verizon Wireless, accounted for 20% of accounts receivable at December 31, 2008 and 49% at December 31, 2007.

Table of Contents**Results of Operations**

The following table sets forth certain consolidated statement of operating data as a percentage of total revenues for the periods indicated:

	Year Ended December 31,		
	2008	2007	2006
Revenues	100.0%	100.0%	100.0%
Cost of revenues	20.4%	28.1%	37.2%
Gross profit	79.6%	71.9%	62.8%
Operating expenses:			
Selling and marketing	25.2%	25.1%	16.6%
Research and development	31.3%	20.1%	14.5%
General and administrative	20.3%	20.9%	15.6%
Total operating expenses	76.8%	66.1%	46.7%
Operating income	2.8%	5.8%	16.1%
Interest and other income	0.7%	5.8%	2.6%
Profit before taxes	3.5%	11.6%	18.7%
Income tax expense	4.2%	7.3%	2.3%
Net income (loss)	-0.7%	4.3%	16.4%

Revenues and Expense Components

The following is a description of the primary components of our revenues and expenses:

Revenues. Revenues are net of sales returns and allowances. Our operations are organized into two business units:

Wireless, which includes our connection manager solutions for both the OEM and Enterprise channels, music, photo and video content management, device management; and

Consumer, which includes retail sales of our compression and broad consumer-based software.

The following table shows the revenues generated by each business unit (in thousands):

	Year Ended December 31,		
	2008	2007	2006
Wireless	\$ 73,219	\$ 57,819	\$ 43,001
Consumer	23,925	14,368	10,511
Corporate/Other	1,280	1,190	957
Total Revenues	98,424	73,377	54,469
Cost of revenues	20,108	20,644	20,259
Gross Profit	\$ 78,316	\$ 52,733	\$ 34,210

Other includes the consulting portion of our services sector which has been de-emphasized and is no longer considered a strategic element of our future plans.

Table of Contents

Cost of revenues. Cost of revenues consists of direct product costs, royalties, and the amortization of purchased intangibles and capitalized software.

Selling and marketing. Selling and marketing expenses consist primarily of personnel costs, advertising costs, sales commissions, trade show expenses, and the amortization of certain purchased intangibles. These expenses vary significantly from quarter to quarter based on the timing of trade shows and product introductions.

Research and development. Research and development expenses consist primarily of personnel and equipment costs required to conduct our software development efforts, and the amortization of acquired intangibles. We remain focused on the development and expansion of our technology, particularly our wireless, compression and multimedia software technologies.

General and administrative. General and administrative expenses consist primarily of personnel costs, professional services and fees paid for external service providers, travel, legal, and other public company costs.

Interest and other income. Interest and other income are directly related to our average cash balance during the period and vary among periods. On January 4, 2008, we purchased substantially all of the assets of the Mobile Solutions Group of PCTEL at a cost of \$59.7 million. In June 2008 we changed our investment strategy to include short-term investments in equity and debt securities with maturity dates within three to 12 months. Our other excess cash is invested in short term marketable equity and debt securities classified as cash equivalents.

Income tax expense. The Company accounts for income taxes under the provision of Statement of Financial Accounting Standards (SFAS) No. 109, *Accounting for Income Taxes*. This statement requires the recognition of deferred tax assets and liabilities for the future consequences of events that have been recognized in the Company's financial statements or tax returns. Measurement of the deferred items is based on enacted tax laws. In the event the future consequences of differences between financial reporting bases and tax bases of the Company's assets and liabilities result in a deferred tax asset, SFAS No. 109 requires an evaluation of the probability of being able to realize the future benefits indicated by such asset. A valuation allowance related to a deferred tax asset is recorded when it is more likely than not that some portion or all of the deferred tax asset will not be realized. Effective January 1, 2007, the Company adopted Financial Accounting Standards Board (FASB) Interpretation Number (FIN) No. 48, *Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109*. Based on our evaluation, we have concluded that there are no significant uncertain tax positions requiring recognition in our financial statements.

Year Ended December 31, 2008 Compared to the Year Ended December 31, 2007

Revenues. Revenues of \$98.4 million for fiscal year 2008 increased \$25.0 million, or 34.1%, from \$73.4 million for fiscal year 2007. Wireless revenues of \$73.2 million increased \$15.4 million, or 26.6%, primarily due to the PCTEL MSG group acquisition that occurred in January 2008 of \$17.2 million, new customer licenses of \$7.9 million, and continued strong demand from our existing key customers of \$5.4 million. These increases were partially offset by a \$15.1 million sales decrease in our music kits due to a shift in how the product was merchandised by our primary music customers. In early 2007, this product was sold primarily as a higher revenue, lower margin music kit (including software, cable and ear buds). In late 2007 and in 2008, the music product was being delivered more as downloadable software or as a software-only CD, resulting in lower revenue per unit, but at a much higher margin per unit. Consumer revenues of \$23.9 million increased \$9.6 million, or 66.5%, primarily due to new product sales of VMware Fusion and the acquisition of eFrontier in December 2007.

Cost of revenues. Cost of revenues of \$20.1 million for fiscal year 2008 decreased \$0.5 million, or 2.6%, from \$20.6 million for fiscal year 2007. Direct product costs decreased \$2.7 million even on the higher overall sales volume primarily due to the lower sales and cost of revenues associated with the change in how we are delivering music kits to the customer. This decrease was partially offset by higher amortization of intangibles due to the PCTEL MSG group and Insignia acquisitions which increased from \$1.6 million to \$3.7 million, or \$2.1 million, and higher stock based compensation expense which increased from \$0.3 million to \$0.4 million, or \$0.1 million.

Gross profit. Gross profit of \$78.3 million, or 79.6% of revenues for fiscal year 2008 increased by \$25.6 million, or 48.5%, from \$52.7 million, or 71.9% of revenues for fiscal year 2007. The 7.7 percentage point increase was primarily due to

Table of Contents

improved product margins of 9.4 points on higher music product margins due to the change in how the product was delivered, a favorable product mix, and additional license income. This increase was partially offset by higher amortization of intangibles due to the PCTEL MSG group and Insignia acquisitions of 1.7 points.

Selling and marketing. Selling and marketing expenses of \$24.8 million for fiscal year 2008 increased \$6.4 million, or 34.9%, from \$18.4 million for fiscal year 2007. This increase was primarily due to increased personnel, recruiting and travel costs associated with higher headcount driven by acquisitions of \$5.8 million, higher amortization of intangibles due to our acquisitions which increased from \$0.7 million to \$2.4 million, or \$1.7 million, more trade shows and product advertising due to our acquired product lines of \$0.6 million, and higher commissions due to the increased volume of \$0.3 million. These cost increases were partially offset by lower stock-based compensation which decreased from \$5.7 million to \$3.7 million, or \$2.0 million.

Research and development. Research and development expenses of \$30.8 million for fiscal year 2008 increased \$16.0 million, or 108.6%, from \$14.8 million for fiscal year 2007. This increase was primarily due to increased personnel and recruiting costs associated with acquired and new hired headcount of \$12.5 million, increased consulting and travel associated with our various new projects of \$1.7 million, amortization of purchased technologies which increased from \$0.6 million to \$1.2 million, or \$0.6 million, stock-based compensation which increased from \$2.6 million to \$3.4 million, or \$0.8 million, and other cost increases of \$0.4 million.

General and administrative. General and administrative expenses of \$20.0 million for fiscal year 2008 increased \$4.7 million, or 30.5%, from \$15.3 million for fiscal year 2007. This increase was primarily due to increased personnel and recruiting costs associated with higher headcount of \$2.0 million, increased building rent, infrastructure, and depreciation associated with our acquisitions of \$2.1 million, and all other cost increases of \$1.0 million. These cost increases were partially offset by lower stock-based compensation which decreased from \$6.0 million to \$5.6 million, or \$0.4 million.

Interest and other income. Interest and other income of \$0.7 million for fiscal year 2008 decreased \$3.5 million from \$4.2 million for fiscal year 2007. This decrease was due to having less cash on hand as a result of our acquisition of the PCTEL MSG group in January 2008.

Income tax expense. We recorded income tax expense for fiscal year 2008 in the amount of \$4.2 million as a result of our pre-tax operating profit for the period and the relatively large amount of incentive stock option expense which is not deductible for tax purposes. The provision for income taxes was \$5.3 million for fiscal year 2007 as a result of our operating profit for that period. We began fiscal year 2008 with a net operating loss carryforward of approximately \$11.3 million for Federal and \$6.3 million for States. Cash basis income taxes in 2008 are estimated to be \$2.2 million.

Year Ended December 31, 2007 Compared to the Year Ended December 31, 2006

Revenues. Revenues of \$73.4 million for fiscal year 2007 increased \$18.9 million, or 34.7%, from \$54.5 million for fiscal year 2006. Wireless revenues of \$57.8 million increased \$14.8 million, or 34.5%, primarily due to the success of the EVDO (a wireless Internet standard) rollout by our carrier customers and the introduction of Rev A-EVDO hardware in late 2006 and continued rollout in 2007 of \$15.0 million, and \$1.7 million of added revenue as a result of our Insignia acquisition in April 2007. These increases were partially offset by a \$1.9 million sales decrease in our music kits due to a shift in how the product was merchandised by our primary music customers. In 2006 and early 2007, this product was sold primarily as a higher revenue, lower margin music kit (including software, cable and ear buds). In late 2007, the music product was being delivered more as downloadable software or as a software-only CD, resulting in lower revenue per unit, but at a much higher margin per unit. Consumer revenues of \$14.4 million increased \$3.9 million, or 36.7%, primarily due to new a new publishing deal with VMware to market their Fusion product.

Cost of revenues. Cost of revenues of \$20.6 million for fiscal year 2007 increased \$0.4 million, or 1.9%, from \$20.2 million for fiscal year 2006. Direct product costs decreased \$0.4 million even on the higher overall sales volume primarily due to the lower sales and cost of revenues associated with the change in how we are delivering music kits to the customer. This decrease was more than offset by higher amortization of intangibles due to

Table of Contents

acquisitions which increased from \$1.1 million to \$1.6 million, or \$0.5 million, and higher stock based compensation expense which increased from \$0.0 million to \$0.3 million, or \$0.3 million.

Gross profit. Gross profit of \$52.7 million, or 71.9% of revenues for fiscal year 2007 increased by \$18.5 million, or 54.1%, from \$34.2 million, or 62.8% of revenues for fiscal year 2006. The 9.1 percentage point increase was primarily due to improved product margins of 9.5 points on higher music product margins due to the change in how the product was delivered and a favorable product mix. This increase was partially offset by stock-based compensation of 0.3 points and higher amortization of intangibles due to acquisitions of 0.1 points.

Selling and marketing. Selling and marketing expenses of \$18.4 million for fiscal year 2007 increased \$9.3 million, or 103.1%, from \$9.1 million for fiscal year 2006. This increase was primarily due to increased personnel, recruiting and travel costs associated with higher headcount driven by acquisitions of \$4.5 million, higher stock-based compensation which increased from \$2.1 million to \$5.8 million, or \$3.7 million, higher amortization of intangibles due to our acquisitions which increased from \$0.5 million to \$0.7 million, or \$0.2 million, and more consulting, trade shows, and product advertising due to our acquired product lines of \$0.9 million.

Research and development. Research and development expenses of \$14.8 million for fiscal year 2007 increased \$6.9 million, or 87.0%, from \$7.9 million for fiscal year 2006. This increase was primarily due to increased personnel and recruiting costs associated with acquired and new hired headcount of \$2.7 million, increased consulting and travel associated with our various new projects of \$2.0 million, stock-based compensation which increased from \$1.1 million to \$2.6 million, or \$1.5 million, amortization of purchased technologies which increased from \$0.0 million to \$0.6 million, or \$0.6 million, and other cost increases of \$0.1 million.

General and administrative. General and administrative expenses of \$15.3 million for fiscal year 2007 increased \$6.8 million, or 80.9%, from \$8.5 million for fiscal year 2006. This increase was primarily due to higher stock-based compensation which increased from \$2.3 million to \$6.0 million, or \$3.7 million, increased personnel and recruiting costs associated with higher headcount of \$1.1 million, increased building rent, infrastructure, and depreciation associated with our acquisitions of \$1.1 million, and increased costs associated with the implementation of Sarbanes-Oxley of \$0.9 million.

Interest and other income. Interest and other income of \$4.3 million for fiscal year 2007 increased \$2.9 million from \$1.4 million for fiscal year 2006. On December 14, 2006, we closed a fully marketed secondary offering, resulting in the issuance of 4 million shares with net cash proceeds to the company of \$55.0 million in 2006. On January 18, 2007 an additional 0.4 million shares were sold under the same agreement, resulting in additional net proceeds of \$5.3 million. This excess cash resulted in increased interest income.

Income tax expense. We recorded income tax expense for fiscal year 2007 in the amount of \$5.3 million as a result of our operating profit for that period. The provision for income taxes was \$1.2 million for fiscal year 2006 as a result of our operating profit for that period. We began fiscal year 2007 with a net operating loss carryforward of approximately \$15 million for Federal and \$12 million for States.

Liquidity and Capital Resources

At December 31, 2008, we had \$36.6 million in cash and cash equivalents and short-term investments and \$47.7 million of working capital. On January 4, 2008, we acquired the Mobile Solutions Group of PCTEL at a cost of \$59.7 million in cash. We currently have no significant capital commitments, and currently anticipate that capital expenditures will not vary significantly from recent periods. We believe that our existing cash, cash equivalents, and short-term investment balances and cash flow from operations will be sufficient to finance our working capital and capital expenditure requirements through at least the next twelve months. We may require additional funds to support our working capital requirements or for other purposes and may seek to raise additional funds through public or private equity or debt financing or from other sources. If additional financing is needed, we cannot assure that such financing will be available to us at commercially reasonable terms or at all.

Table of Contents***Stock offerings***

On December 14, 2006, we completed a public offering, issuing 4 million shares of our common stock, at a purchase price of \$14.75 per share, resulting in aggregate gross cash proceeds to the Company of \$59.0 million before deducting commissions and other expenses. Offering costs related to the transaction totaled \$4.0 million comprised of \$3.3 million in underwriting discounts and commissions and \$0.7 million cash payments for legal and investment services, resulting in net proceeds to the Company of \$55.0 million.

On January 18, 2007, an additional 0.4 million shares were sold in the over-allotment option granted to the underwriters, resulting in additional gross proceeds of \$5.7 million before deducting commissions and other expenses. Offering costs incurred in 2007 include underwriting discounts and commissions of \$0.3 million and \$0.1 million cash payments for legal and accounting services, resulting in additional net proceeds to the Company of \$5.3 million.

Operating Activities

In 2008, net cash provided by operations was \$16.4 million primarily due to our net loss adjusted for depreciation, amortization, non-cash stock-based compensation, and inventory and accounts receivable reserves of \$21.2 million and a decrease in deferred income tax assets of \$2.0 million. These increases were partially offset by an increase of accounts receivable due to our increased revenue of \$6.6 million and an increase of all other net assets of \$0.2 million.

In 2007, net cash provided by operations was \$18.3 million primarily due to our net income adjusted for depreciation, amortization, non-cash stock-based compensation, and inventory and accounts receivable reserves of \$15.7 million, a decrease in deferred income tax assets of \$5.3 million, and a decrease of all other net assets of \$0.1 million. These increases were partially offset by an increase of accounts receivable due to our increased revenue of \$2.8 million.

In 2006, net cash provided by operations was \$9.9 million primarily due to our net income adjusted for depreciation, amortization, non-cash stock-based compensation, and inventory and accounts receivable reserves of \$11.4 million, a decrease of income tax receivable of \$4.8 million, and a decrease in all other net assets of \$0.9 million. These increases were partially offset by an increase of deferred income tax assets of \$3.7 million and an increase of accounts receivable due to our increased revenue of \$3.5 million.

Investing Activities

In 2008, we used cash of \$90.2 million for investing activities to acquire the net assets of PCTEL's Mobile Solutions Group of \$60.9 million, purchase short-term investments of \$22.6 million, and for capital expenditures which primarily were leasehold improvements of \$3.5 million, and for other acquisitions of \$3.2 million.

In 2007, cash used for investing activities of \$36.2 million was to acquire Insignia of \$17.4 million, acquire Ecutel of \$8.0 million, acquire eFrontier of \$5.1 million, acquire PhoTags of \$3.5 million, other increases to intangible assets of \$1.2 million, and capital expenditures of \$1.0 million.

In 2006, cash used for investing activities of \$2.6 million was to acquire PhoTags of \$2.2 million and for capital expenditures of \$0.4 million.

Financing Activities

In 2008, cash provided by financing activities of \$0.2 million was related to the exercise of stock options of \$0.1 million and tax benefits associated with stock-based compensation of \$0.1 million.

In 2007, cash provided by financing activities of \$12.9 million was related to the issuance of common stock as a result of our over-allotment as mentioned above of \$5.3 million, the exercise of stock options of \$3.8 million, and tax benefits associated with stock-based compensation of \$3.8 million.

Table of Contents

In 2006, cash provided by financing activities of \$64.1 million was related to the issuance of common stock as a result of our 4 million shares stock offering as mentioned above of \$55.0 million, tax benefits associated with stock-based compensation of \$4.9 million, and the exercise of stock options of \$4.2 million.

Contractual obligations and commercial commitments

As of December 31, 2008 we had no debt. The following table summarizes our contractual obligations as of December 31, 2008 (in thousands):

	Total	Payments due by period			More than 5 years
		Less than 1 year	1-3 years	3-5 years	
Contractual obligations:					
Operating Lease Obligations	\$ 7,762	\$ 1,536	\$ 2,798	\$ 2,004	\$ 1,424
Employment Agreement	235	235			
Purchase Obligations	354	354			
Total	\$ 8,351	\$ 2,125	\$ 2,798	\$ 2,004	\$ 1,424

During our normal course of business, we have made certain indemnities, commitments and guarantees under which we may be required to make payments in relation to certain transactions. These include: intellectual property indemnities to our customers and licensees in connection with the use, sale and/or license of our products; indemnities to various lessors in connection with facility leases for certain claims arising from such facility or lease; indemnities to vendors and service providers pertaining to claims based on the negligence or willful misconduct; indemnities involving the accuracy of representations and warranties in certain contracts; and indemnities to directors and officers of the Company to the maximum extent permitted under the laws of the State of Delaware. In addition, we have made contractual commitments to employees providing for severance payments upon the occurrence of certain prescribed events. We may also issue a guarantee in the form of a standby letter of credit as security for contingent liabilities under certain customer contracts. The duration of these indemnities, commitments and guarantees varies, and in certain cases, may be indefinite. The majority of these indemnities, commitments and guarantees may not provide for any limitation of the maximum potential for future payments we could be obligated to make. We have not recorded any liability for these indemnities, commitments and guarantees in the accompanying consolidated balance sheets.

Real Property Leases

Our corporate headquarters, including our principal administrative, sales and marketing, customer support and research and development facility, is located in Aliso Viejo, California, where we currently lease and occupy approximately 33,000 square feet of space pursuant to leases that expire May 31, 2016. We lease approximately 14,400 square feet in Chicago, Illinois under a lease that expires August 31, 2012. We lease approximately 13,300 square feet in Watsonville, California under a lease that expires September 30, 2013. We lease approximately 7,300 square feet in Herndon, Virginia under a lease that expires November 30, 2009. We lease approximately 3,400 square feet in Campbell, California under a lease that expired January 31, 2009. Internationally, we lease space in Stockholm, Sweden; Seoul, South Korea; Belgrade, Serbia; Oslo, Norway; and Vancouver, Canada. These leases are for one to three-year terms.

Off-Balance Sheet Arrangements

As of December 31, 2008, we did not have any off-balance sheet arrangements.

Critical Accounting Policies and Estimates

Our discussion and analysis of results of operations, financial condition and liquidity are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally

Table of Contents

accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may materially differ from these estimates under different assumptions or conditions. On an on-going basis, we review our estimates to ensure that the estimates appropriately reflect changes in our business or new information as it becomes available.

We believe the following critical accounting policies affect our more significant estimates and assumptions used in the preparation of our consolidated financial statements:

Revenue Recognition

We currently report our net revenues under two operating groups: Wireless and Consumer. Within each of these groups software revenue is recognized based on the customer and contract type. We recognize revenue in accordance with the AICPA Statement of Position (SOP) No. 97-2, *Software Revenue Recognition*, as amended, when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed and determinable, and collectibility is probable. We recognize revenues from sales of our software to OEM customers or end users as completed products are shipped and titles passes; or from royalties generated as authorized customers duplicate our software, if the other requirements of SOP No. 97-2 are met. If the requirements of SOP No. 97-2 are not met at the date of shipment, revenue is not recognized until these elements are known or resolved. Returns from OEM customers are limited to defective goods or goods shipped in error. Historically, OEM customer returns have not exceeded the very nominal estimates and reserves. Management reviews available retail channel information and makes a determination of a return provision for sales made to distributors and retailers based on current channel inventory levels and historical return patterns. Certain sales to distributors or retailers are made on a consignment basis. Revenue for consignment sales are not recognized until sell through to the final customer is established. Within the Consumer group certain revenues are booked net of revenue sharing payments, pursuant to the consensus of Emerging Issues Task Force (EITF) No. 99-19, *Reporting Revenue Gross as a Principal versus Net as an Agent*. We have a few multiple element agreements for which we have contracted to provide a perpetual license for use of proprietary software, to provide non-recurring engineering, and in some cases to provide software maintenance (post contract support). For multiple element agreements, vendor specific objective evidence of fair value for all contract elements is reviewed and the timing of the individual element revenue streams is determined and recognized consistent with SOP No. 97-2. Sales directly to end-users are recognized upon delivery. End users have a thirty day right of return, but such returns are reasonably estimable and have historically been immaterial. We also provide technical support to our customers. Such costs have historically been insignificant.

Sales Incentives

Pursuant to the consensus of EITF No. 01-09, *Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Product)*, effective January 1, 2002, the cost of sales incentives the Company offers without charge to customers that can be used in, or that are exercisable by a customer as a result of, a single exchange transaction is accounted for as a reduction of revenue. We track incentives by program and use historical redemption rates to estimate the cost of customer incentives. Total sales incentives were \$0.8, \$0.6, and \$0.3 million for the years ended December 31, 2008, 2007 and 2006, respectively.

Accounts Receivable and Allowance for Doubtful Accounts

We sell our products worldwide. We perform ongoing credit evaluations of our customers and adjust credit limits based upon payment history, the customer's current credit worthiness and various other factors, as determined by our review of their current credit information. We continuously monitor collections and payments from our customers. We estimate credit losses and maintain an allowance for doubtful accounts reserve based upon these estimates. While such credit losses have historically been within our estimated reserves, we cannot guarantee that we will continue to experience the same credit loss rates that we have in the past. If not, this could have an adverse effect on our consolidated financial statements.

Table of Contents***Internal Software Development Costs***

Development costs incurred in the research and development of new software products and enhancements to existing software products are expensed as incurred until technological feasibility has been established. The Company considers technological feasibility to be established when all planning, designing, coding and testing has been completed according to design specifications. After technological feasibility is established, any additional costs are capitalized. Through December 31, 2008, software has been substantially completed concurrently with the establishment of technological feasibility; and, accordingly, no costs have been capitalized to date.

Capitalized Software and Amortization

Pursuant to the provisions of SFAS No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased or Otherwise Marketed*, we capitalize internally developed software and software purchased from third parties if the related software product under development has reached technological feasibility or if there are alternative future uses for the purchased software. These costs are amortized on a product-by-product basis, typically over an estimated life of five to seven years, using the larger of the amount calculated using the straight-line method or the amount calculated using the ratio between current period gross revenues and the total of current period gross revenues and estimated future gross revenues. At each balance sheet date, we evaluate on a product-by-product basis the unamortized capitalized cost of computer software compared to the net realizable value of that product. The amount by which the unamortized capitalized costs of a computer software product exceed its net realizable value is written off.

Intangible Assets and Amortization

Amortization expense related to other intangibles acquired in acquisitions is calculated on a straight line basis over their useful lives. Certain assets acquired in the Allume acquisition in 2005 had previously been amortized on a discounted cash flow basis through 2007. Effective January 1, 2008, we changed to the straight line basis of amortization as these assets have been integrated into our core operations and as such it is no longer feasible to separate the cash flows generated by such assets to allow us to update the discounted cash flow analysis originally developed. This change is classified as a change in estimate and will be accounted for on a prospective basis.

Impairment or Disposal of Long Lived Assets

The Company accounts for the impairment and disposition of long-lived assets in accordance with SFAS No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets*. This statement addresses financial accounting and reporting for the impairment of long-lived assets and for the disposal of long-lived assets. In accordance with SFAS No. 144, long-lived assets to be held are reviewed for events or changes in circumstances which indicate that their carrying value may not be recoverable. The Company periodically reviews the carrying value of long-lived assets to determine whether or not impairment to such value has occurred. The Company has determined that there was no impairment at December 31, 2008.

Valuation of Goodwill and Intangible Assets

The Company accounts for goodwill and intangible assets in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*. As a result of the adoption, we are no longer required to amortize goodwill. Prior to the adoption of SFAS No. 142, goodwill was amortized over 7 years.

This statement requires us to periodically assess the impairment of our goodwill and intangible assets, which requires us to make assumptions and judgments regarding the carrying value of these assets. These assets are considered to be impaired if we determine that their carrying value may not be recoverable based upon our assessment of the following events or changes in circumstances:

a determination that the carrying value of such assets cannot be recovered through undiscounted cash flows;

loss of legal ownership or title to the assets;

Table of Contents

significant changes in our strategic business objectives and utilization of the assets; or

the impact of significant negative industry or economic trends.

If the intangible assets are considered to be impaired, the impairment we recognize is the amount by which the carrying value of the intangible assets exceeds the fair value of the intangible assets. In addition, we base the useful lives and the related amortization expense on our estimate of the useful life of the intangible assets. Due to the numerous variables associated with our judgments and assumptions relating to the carrying value of our intangible assets and the effects of changes in circumstances affecting these valuations, both the precision and reliability of the resulting estimates are subject to uncertainty, and as additional information becomes known, we may change our estimate, in which case, the likelihood of a material change in our reported results would increase.

In accordance with SFAS No. 142, we review the recoverability of the carrying value of goodwill at least annually or whenever events or circumstances indicate a potential impairment. Our annual impairment testing date is December 31. Recoverability of goodwill is determined by comparing the estimated fair value of our reporting units to the carrying value of the underlying net assets in the reporting units. If the estimated fair value of a reporting unit is determined to be less than the fair value of its net assets, goodwill is deemed impaired and an impairment loss is recognized to the extent that the carrying value of goodwill exceeds the difference between the estimated fair value of the reporting unit and the fair value of its other assets and liabilities. At December 31, 2006, we elected to write off all goodwill associated with our services sector, or \$0.3 million. The consulting portion of our services sector has been de-emphasized and is no longer considered a strategic element of our go forward plan. We determined that we did not have any impairment of goodwill at December 31, 2007 or 2008. Estimates of reporting unit fair value are based upon market capitalization and therefore are volatile being sensitive to market fluctuations. To the extent that our market capitalization decreases significantly or the allocation of value to our reporting units change, we could be required to write off some or all of our goodwill.

Deferred Income and Income Taxes

We account for income taxes under SFAS No. 109, *Accounting for Income Taxes*. This statement requires the recognition of deferred tax assets and liabilities for the future consequences of events that have been recognized in our financial statements or tax returns. The measurement of the deferred items is based on enacted tax laws. In the event the future consequences of differences between financial reporting bases and the tax bases of our assets and liabilities result in a deferred tax asset, SFAS No. 109 requires an evaluation of the probability of being able to realize the future benefits indicated by such asset. A valuation allowance related to a deferred tax asset is recorded when it is more likely than not that some portion or all of the deferred tax asset will not be realized. Effective January 1, 2007, the Company adopted FIN No. 48, *Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109*. Based on our evaluation, we have concluded that there are no significant uncertain tax positions requiring recognition in our financial statements.

Stock-Based Compensation

Effective January 1, 2006, we adopted SFAS No. 123(R), *Share-Based Payment*, which revises SFAS No. 123, *Accounting for Stock-Based Compensation* and, supersedes Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees*. SFAS No. 123(R) requires that share-based payment transactions with employees be recognized in the financial statements based on their fair value and recognized as compensation expense over the vesting period. Prior to SFAS No. 123(R), we disclosed the pro forma effects of applying SFAS No. 123 under the minimum value method. We adopted SFAS No. 123(R) effective January 1, 2006, prospectively for new equity awards issued subsequent to January 1, 2006.

Recent Accounting Pronouncements

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*. SFAS No. 162 identifies the sources of accounting principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (GAAP) in the United States. This Statement is effective 60 days following the SEC's approval of the

Table of Contents

Public Company Accounting Oversight Board amendments to AU Section 411, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles*. The Company currently adheres to the hierarchy of GAAP as presented in SFAS No. 162, and does not expect its adoption will have a material impact on its consolidated results of operations and financial condition.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*, which defines the fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. On February 12, 2008, the FASB issued FASB Staff Position (FSP) No. 157-2 which defers the effective date of SFAS No. 157 for one year for non-financial assets and non-financial liabilities that are not recognized or disclosed at fair value in the financial statements on a recurring basis. Our adoption of SFAS No. 157 on January 1, 2008 did not have a material impact on the Company's financial position, results of operations or cash flows.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS No. 159 permits entities to choose to measure at fair value many financial instruments and certain other items that are not currently required to be measured at fair value. Subsequent changes in fair value for designated items will be required to be reported in earnings in the current period. SFAS No. 159 also establishes presentation and disclosure requirements for similar types of assets and liabilities measured at fair value. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. As permitted by SFAS No. 159, we have elected not to use the fair value option to measure our available-for-sale securities under SFAS No. 159 and will continue to report under SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. We have made this election because the nature of our financial assets and liabilities are not of such complexity that they would benefit from a change in valuation to fair value.

In December 2007, the FASB issued SFAS No. 141(R) (Revised 2007), *Business Combinations*. The objective of SFAS No. 141(R) is to improve reporting by creating greater consistency in the accounting and financial reporting of business combinations, resulting in more complete, comparable and relevant information for investors and other users of financial statements. SFAS No. 141(R) requires the acquiring entity in a business combination to recognize all (and only) the assets acquired and liabilities assumed in the transaction; establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed; and requires the acquirer to disclose to investors and other users all of the information they need to evaluate and understand the nature and financial effect of the business combination. SFAS No. 141(R) includes both core principles and pertinent application guidance, eliminating the need for numerous EITF issues and other interpretative guidance, thereby reducing the complexity of existing United States GAAP. SFAS No. 141(R) is effective as of the start of fiscal years beginning after December 15, 2008. Early adoption is not allowed. The Company is in the process of evaluating this standard and has not yet determined the impact that the adoption of SFAS No. 141(R) will have on its financial position, results of operations or cash flows.

In December 2007, the FASB issued SFAS No. 160, *Non-controlling Interests in Consolidated Financial Statements*. SFAS No. 160 improves the relevance, comparability, and transparency of financial information provided to investors by requiring all entities to report non-controlling (minority) interests in subsidiaries in the same way as equity in the consolidated financial statements. Moreover, SFAS No. 160 eliminates the diversity that currently exists in accounting for transactions between an entity and non-controlling interests by requiring they be treated as equity transactions. SFAS No. 160 is effective as of the start of fiscal years beginning after December 15, 2008. Early adoption is not allowed. The Company is in the process of evaluating this standard and has not yet determined the impact that the adoption of SFAS No. 160 will have on its financial position, results of operations or cash flows.

Table of Contents

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk

Our financial instruments include cash and cash equivalents, and short-term investments. At December 31, 2008, the carrying values of our financial instruments approximated fair values based on current market prices and rates.

Foreign Currency Risk

While a majority of our business is denominated in U.S. dollars, we do invoice in foreign currencies. For the three years ended December 31, 2008, 2007, and 2006, our revenues denominated in foreign currencies were \$1.8, \$1.6, and \$0.0 million, respectively. Fluctuations in the rate of exchange between the U.S. dollar and certain other currencies may affect our results of operations and period-to-period comparisons of our operating results. We do not currently engage in hedging or similar transactions to reduce these risks. The operational expenses of our foreign entities reduce the currency exposure we have because our foreign currency revenues are offset in part by expenses payable in foreign currencies. As such, we do not believe we have a material exposure to foreign currency rate fluctuations at this time.

Item 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Our consolidated financial statements and schedule appear in a separate section of this Annual Report on Form 10-K beginning on page F-1 and S-1, respectively.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

Item 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports pursuant to the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in SEC Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this Annual Report on Form 10-K. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were: (1) designed to ensure that material information relating to us is made known to our Chief Executive Officer and Chief Financial Officer by others within our company, particularly during the period in which this report was being prepared and (2) effective, in that they provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act, is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

Table of Contents

Changes in Internal Control over Financial Reporting.

There has been no change in our internal controls over financial reporting in the 2008 fiscal year that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

Report of Management on Internal Control Over Financial Reporting

Our management, including the our Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934).

Our management, including the our Chief Executive Officer and Chief Financial Officer, assessed the effectiveness of our internal control over financial reporting as of December 31, 2008. Management based this assessment on criteria for effective internal control over financial reporting described in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on this assessment, management determined that, as of December 31, 2008, we maintained effective internal control over financial reporting.

SingerLewak LLP, an independent registered public accounting firm, who audited the consolidated financial statements included in this Annual Report on Form 10-K, has also audited the effectiveness of our internal control over financial reporting as stated in its report appearing elsewhere in this Annual Report on Form 10-K.

Item 9B. OTHER INFORMATION

None.

Table of Contents**PART III****Item 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

The following table sets forth certain information regarding our executive officers as of March 6, 2009.

Name	Age	Position
William W. Smith, Jr.	61	Chairman of the Board, President and Chief Executive Officer
Andrew C. Schmidt	47	Vice President and Chief Financial Officer
David P. Sperling	40	Vice President and Chief Technical Officer
Jonathan Kahn	51	Executive Vice President Business Operations
Robert E. Elliott	57	Vice President and Chief Marketing Officer
Von Cameron	45	Executive Vice President Worldwide Sales

Mr. Smith co-founded Smith Micro and has served as our Chairman of the Board, President and Chief Executive Officer since inception in 1982. Mr. Smith was employed by Rockwell International Corporation in a variety of technical and management positions from 1975 to 1984. Mr. Smith served with Xerox Data Systems from 1972 to 1975 and RCA Computer Systems Division from 1969 to 1972 in mainframe sales and pre-sale technical roles. Mr. Smith received a B.A. in Business Administration from Grove City College.

Mr. Schmidt joined the Company in June 2005 and serves as the Company's Chief Financial Officer. Prior to joining Smith Micro, Mr. Schmidt was the Chief Financial Officer of Genius Products, Inc., a publicly traded entertainment company from August 2004 to June 2005. From April 2003 to June 2004, he was Vice President (Finance) and acting Chief Accounting Officer of Peregrine Systems, Inc., a publicly held provider of enterprise level software then in Chapter 11 reorganization. From July 2000 to January 2003, he was Executive Vice President and Chief Financial Officer of Mad Catz Interactive, Inc., a publicly traded provider of console video game accessories. He holds a B.B.A. in Finance from the University of Texas and an M.S. in Accountancy from San Diego State University.

Mr. Sperling joined the Company in April 1989 and has been our Director of Software Engineering since April 1992. He assumed the Chief Technology Officer position in September 1999. Mr. Sperling began his professional career as a software engineer with us and he currently has two patents and three patents pending for various telephony and Internet technologies. Mr. Sperling holds a B.S. degree in Computer Science and an MBA from the University of California, Irvine.

Mr. Kahn joined the Company with the acquisition of Allume Systems, Inc. in July 2005. Prior to the acquisition, Mr. Kahn was President of the company. Mr. Kahn was one of the co-founders of Aladdin Systems, Inc. which later became Allume Systems. Mr. Kahn was Chairman, President and Chief Executive Officer of Monterey Bay Tech, Inc (OTC BB:MBYI), a public company from 1999 to May 2005 until its merger with SecureLogic Inc. Mr. Kahn is a member of the Digital River Advisory Board and is a graduate of the University of Rhode Island with a B.A. in Economics. Mr. Kahn assumed the position as Executive Vice President Business Operations in late 2007.

Table of Contents

Mr. Elliott joined the Company in May of 1999 and soon after was appointed General Manager of Smith Micro's Mac Division, then later as Vice President of Corporate Marketing and CMO, which he has held to date. An experienced technology and marketing leader with over fifteen years of executive level experience managing business units in the information technology industry, he has held executive level positions with Informix Software, DataStorm Technologies and QuarterDeck Corporation. Mr. Elliott is a graduate of Northwood University, Midland, MI.

Mr. Cameron joined the Company in April of 2008 as the Executive Vice President of Worldwide Sales. Mr. Cameron has held executive management positions with Openwave, Oracle, FoxT and Booz Allen & Hamilton. Mr. Cameron served proudly in the United States Air Force and earned his B.S. in Math-Operations Research from the United States Air Force Academy in Colorado, Springs, CO and an MBA from Golden Gate University in San Francisco, CA.

Officers are elected by, and serve at the discretion of, the Board of Directors.

For information about our Directors, please see the section titled "Directors and Executive Officers" appearing in our Proxy Statement for our 2009 Annual Meeting of Stockholders, which is hereby incorporated by reference.

The section titled "Corporate Governance" appearing in our Proxy Statement for our 2009 Annual Meeting of Stockholders is hereby incorporated by reference.

Audit Committee; Audit Committee Financial Expert

Our Board of Directors has a standing Audit Committee. The members of the Audit Committee are Messrs. Campbell, Gulko and Szabo. Our Board has determined that Mr. Gulko, Chairman of the Audit Committee, is an audit committee financial expert as defined by Item 401(h) of Regulation S-K and that each member of the Audit Committee is independent within the meaning of Nasdaq Marketplace Rule 4200(a)(15).

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act requires certain of the company's executive officers, as well as its directors and persons who own more than ten percent (10%) of a registered class of the Company's equity securities to file reports of ownership and changes in ownership with the Securities and Exchange Commission.

Based solely on its review of the copies of such forms received by the Company, or written representations from certain reporting person, the Company believes that during the last fiscal year all executive officers and directors complied with their filing requirements under Section 16(a) for all reportable transactions during the year.

Code of Ethics

We have adopted a Code of Ethics that applies to all of our employees, including our principal executive officer, our principal financial officer, and all members of our finance department performing similar functions. Our Code of Ethics was filed as Exhibit 14 to the Annual Report on Form 10-K for the year ended December 31, 2003 which was filed on March 25, 2004. In the event of an amendment to, or a waiver from, certain provisions of our Code of Ethics, we intend, to the extent possible, to satisfy Form 8-K disclosure requirements by disclosing this information on our website at www.smithmicro.com.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
Smith Micro Software, Inc.

We have audited the consolidated balance sheets of Smith Micro Software, Inc. and subsidiaries (collectively, the Company) as of December 31, 2008 and 2007, and the related consolidated statements of operations, stockholders equity and cash flows for each of the three years in the period ended December 31, 2008. Our audits also included the financial statement schedule of the Company listed in Item 15(a)(2). These financial statements and financial statement schedule are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2008 and 2007, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2008, in conformity with U. S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in Note 1 to the consolidated financial statements, the Company has adopted the provisions of Statement of Financial Accounting Standard No. 157, Fair Value Measurements and Statement of Financial Accounting Standard No. 159, The Fair Value Option for Financial Assets and Liabilities Including an Amendment to FASB Statement No. 115 on January 1, 2008.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company s internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 9, 2009 expressed an unqualified opinion on the effectiveness of the Company s internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders

Smith Micro Software, Inc.

We have audited Smith Micro Software Inc. and subsidiaries (collectively, the Company) internal control over financial reporting as of December 31, 2008 based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Report of Management on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets as of December 31, 2008 and 2007, and the related consolidated statements of operations, stockholders' equity, and cash flows, and the financial statement schedule, for each of the three years in the period ended December 31, 2008 of the Company, and our report dated March 9, 2009 expressed an unqualified opinion.

Table of Contents**SMITH MICRO SOFTWARE, INC.****Notes to the Consolidated Financial Statements****1. Organization, Basis of Presentation and Summary of Significant Accounting Policies*****The Company***

Smith Micro Software, Inc. (we, us, our, Smith Micro, or the Company) designs, develops and markets software products and services primarily for the mobile industry. The Company is focused on developing connectivity, multimedia, and device management solutions for a converging world of wireless and wired networks. The Company's portfolio of wireless software products and services include the QuickLink family of desktop and mobile products to manage wireless data communications, including software applications for 3G and 4G broadband mobile networks, Wi-Fi, personal information management, mobile content management, device management, and data compression solutions. We sell our products and services to many of the world's leading wireless service providers (carriers), original equipment manufacturers (OEM), PC and device manufacturers, enterprise businesses, as well as direct to consumers. The proliferation of broadband mobile wireless technologies is providing new opportunities for our products and services on a global basis. When these broadband wireless technologies EVDO, UMTS/HSPA, Wi-Fi, and WiMAX are combined with new devices such as mobile phones, Personal Computers (PCs), Smartphones, and Ultra-Mobile PCs (UMPCs), opportunities emerge for new communications software products. Our core technologies are designed to address these emerging mobile convergence opportunities.

In addition, the Company distributes its consumer product lines and a variety of third party Mac and Windows PC software products worldwide through our online stores and third-party wholesalers, retailers and value-added resellers. We offer software products that operate on Windows, Mac, UNIX, Linux, Windows Mobile, Symbian, and Java platforms.

The underlying design concept common across our products is our ability to improve the customer's experience and this philosophy is based on the combination of solid engineering and exceptional design that reinforces our brand's competitive differentiation and customer value. We have over 25 years of experience in design, creation and custom engineering services for software products. We create value by leveraging our business model to build new services and solutions that allow our customers to quickly enter a market with new product offerings that target their customer segments.

On December 10, 2007, Smith Micro entered into an Asset Purchase Agreement with PCTEL, Inc. pursuant to which Smith Micro agreed to acquire substantially all of the assets of PCTEL's Mobility Solutions Group (MSG). The acquisition was completed on January 4, 2008. Pursuant to the terms of the Asset Purchase Agreement, Smith Micro paid \$59.7 million in cash to PCTEL at the closing on January 4, 2008.

Basis of Presentation

The accompanying consolidated financial statements reflect the operating results and financial position of Smith Micro Software, Inc. and its wholly owned subsidiaries in accordance with accounting principles generally accepted in the United States of America. All intercompany amounts have been eliminated in consolidation.

Foreign Currency Transactions

The Company has international operations resulting from several acquisitions over the past four years. The countries in which the Company has a subsidiary or branch office in are Sweden, Norway, South Korea, Serbia, the United Kingdom, and Canada. The functional currency for all of these foreign entities is the U.S. dollar in accordance with Statement of Financial Accounting Standards (SFAS) No. 52, *Foreign Currency Translation*. Foreign currency transactions that increase or decrease expected functional currency cash flows is a foreign currency transaction gain or loss that are included in determining net income for the period in which the exchange rate changes. Likewise, a transaction gain or loss (measured from the transaction date or the most recent intervening balance sheet date, whichever is later) realized upon settlement of a foreign currency transaction is included in determining net income for the period in which the transaction is settled.

Table of Contents***Use of Estimates***

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the reported amounts in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Fair Value of Financial Instruments

The carrying value of accounts receivable, foreign cash accounts, prepaid expenses, other current assets, accounts payable, and accrued expenses are considered to be representative of their respective fair values because of the short-term nature of those instruments.

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 157, *Fair Value Measurements*, which defines the fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. On February 12, 2008, the FASB issued FASB Staff Position (FSP) No. 157-2 which defers the effective date of SFAS No. 157 for one year for non-financial assets and non-financial liabilities that are not recognized or disclosed at fair value in the financial statements on a recurring basis. Our adoption of SFAS No. 157 on January 1, 2008 did not have a material impact on the Company's financial position, results of operations or cash flows.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS No. 159 permits entities to choose to measure at fair value many financial instruments and certain other items that are not currently required to be measured at fair value. Subsequent changes in fair value for designated items will be required to be reported in earnings in the current period. SFAS No. 159 also establishes presentation and disclosure requirements for similar types of assets and liabilities measured at fair value. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. As permitted by SFAS No. 159, we have elected not to use the fair value option to measure our available-for-sale securities under SFAS No. 159 and will continue to report under SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. We have made this election because the nature of our financial assets and liabilities are not of such complexity that they would benefit from a change in valuation to fair value.

Significant Concentrations

For the year ended December 31, 2008, one customer, Verizon Wireless, made up 30.9% of revenues and 20% of accounts receivable, and four suppliers, each with more than 10% of inventory purchases, totaled 10% of accounts payable. For the year ended December 31, 2007, one customer, Verizon Wireless, made up 64.4% of revenues and 49% of accounts receivable, and three suppliers, each with more than 10% of inventory purchases, totaled 13% of accounts payable. For the year ended December 31, 2006, one customer, Verizon Wireless, made up 74.4% of revenues and 67% of accounts receivable.

Cash and Cash Equivalents

Cash and cash equivalents generally consist of cash, government securities, mutual funds, and money market funds. These securities are all held in two financial institutions and are uninsured except for the minimum Federal Deposit Insurance Corporation (FDIC) coverage, and have original maturity dates of three months or less. As of December 31, 2008 and 2007, bank balances totaling approximately \$14.0 million and \$87.2 million, respectively, were uninsured.

Short-Term Investments

Short-term investments consist of U.S. government agency and government sponsored enterprise obligations. The Company accounts for these short-term investments in accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. These debt and equity securities are not classified as either

Table of Contents

held-to-maturity securities or trading securities. As such, they are classified as available-for-sale securities and reported at fair value, with unrealized gains and losses excluded from earnings and reported in a separate component of stockholders' equity.

Accounts Receivable and Allowance for Doubtful Accounts

We sell our products worldwide. We perform ongoing credit evaluations of our customers and adjust credit limits based upon payment history, the customer's current credit worthiness and various other factors, as determined by our review of their current credit information. We continuously monitor collections and payments from our customers. We estimate credit losses and maintain an allowance for doubtful accounts reserve based upon these estimates. While such credit losses have historically been within our estimated reserves, we cannot guarantee that we will continue to experience the same credit loss rates that we have in the past. If not, this could have an adverse effect on our consolidated financial statements. Allowances for product returns are included in other adjustments to accounts receivable on the accompanying consolidated balance sheets. Product returns are estimated based on historical experience and have also been within management's estimates.

Inventories

Inventories consist principally of cables, compact disks (CDs), boxes and manuals and are stated at the lower of cost (determined by the first-in, first-out method) or market. The Company regularly reviews its inventory quantities on hand and records a provision for excess and obsolete inventory based primarily on management's forecast of product demand and production requirements. At December 31, 2008, our net inventory balance of \$1.1 million consisted of approximately \$0.2 million of assembled products and \$0.9 million of components.

Equipment and Improvements

Equipment and improvements are stated at cost. Depreciation is computed using the straight-line method based on the estimated useful lives of the assets, generally ranging from three to seven years. Leasehold improvements are amortized using the straight-line method over the shorter of the estimated useful life of the asset or the lease term.

Intangible Assets and Amortization

Amortization expense related to other intangibles acquired in acquisitions is calculated on a straight line basis over their useful lives. Certain assets acquired in the Allume acquisition in 2005 had previously been amortized on a discounted cash flow basis through 2007. Effective January 1, 2008, we changed to the straight line basis of amortization as these assets have been integrated into our core operations and as such it is no longer feasible to separate the cash flows generated by such assets to allow us to update the discounted cash flow analysis originally developed. This change is classified as a change in estimate and will be accounted for on a prospective basis.

Impairment or Disposal of Long Lived Assets

The Company accounts for the impairment and disposition of long-lived assets in accordance with SFAS No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets*. This statement addresses financial accounting and reporting for the impairment of long-lived assets and for the disposal of long-lived assets. In accordance with SFAS No. 144, long-lived assets to be held are reviewed for events or changes in circumstances which indicate that their carrying value may not be recoverable. The Company periodically reviews the carrying value of long-lived assets to determine whether or not impairment to such value has occurred. The Company has determined that there was no impairment at December 31, 2008.

Valuation of Goodwill and Intangible Assets

The Company accounts for goodwill and intangible assets in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*. As a result of the adoption, we are no longer required to amortize goodwill. Prior to the adoption of SFAS No. 142, goodwill was amortized over 7 years.

Table of Contents

This statement requires us to periodically assess the impairment of our goodwill and intangible assets, which requires us to make assumptions and judgments regarding the carrying value of these assets. These assets are considered to be impaired if we determine that their carrying value may not be recoverable based upon our assessment of the following events or changes in circumstances:

a determination that the carrying value of such assets cannot be recovered through undiscounted cash flows;

loss of legal ownership or title to the assets;

significant changes in our strategic business objectives and utilization of the assets; or

the impact of significant negative industry or economic trends.

If the intangible assets are considered to be impaired, the impairment we recognize is the amount by which the carrying value of the intangible assets exceeds the fair value of the intangible assets. In addition, we base the useful lives and the related amortization expense on our estimate of the useful life of the intangible assets. Due to the numerous variables associated with our judgments and assumptions relating to the carrying value of our intangible assets and the effects of changes in circumstances affecting these valuations, both the precision and reliability of the resulting estimates are subject to uncertainty, and as additional information becomes known, we may change our estimate, in which case, the likelihood of a material change in our reported results would increase.

In accordance with SFAS No. 142, we review the recoverability of the carrying value of goodwill at least annually or whenever events or circumstances indicate a potential impairment. Our annual impairment testing date is December 31. Recoverability of goodwill is determined by comparing the estimated fair value of our reporting units to the carrying value of the underlying net assets in the reporting units. If the estimated fair value of a reporting unit is determined to be less than the fair value of its net assets, goodwill is deemed impaired and an impairment loss is recognized to the extent that the carrying value of goodwill exceeds the difference between the estimated fair value of the reporting unit and the fair value of its other assets and liabilities. At December 31, 2006, we elected to write off all goodwill associated with our services sector, or \$0.3 million. The consulting portion of our services sector has been de-emphasized and is no longer considered a strategic element of our go forward plan. We determined that we did not have any impairment of goodwill at December 31, 2007 or 2008. Estimates of reporting unit fair value are based upon market capitalization and therefore are volatile being sensitive to market fluctuations. To the extent that our market capitalization decreases significantly or the allocation of value to our reporting units change, we could be required to write off some or all of our goodwill.

Deferred Income Taxes

We account for income taxes under SFAS No. 109, *Accounting for Income Taxes*. This statement requires the recognition of deferred tax assets and liabilities for the future consequences of events that have been recognized in our financial statements or tax returns. The measurement of the deferred items is based on enacted tax laws. In the event the future consequences of differences between financial reporting bases and the tax bases of our assets and liabilities result in a deferred tax asset, SFAS No. 109 requires an evaluation of the probability of being able to realize the future benefits indicated by such asset. A valuation allowance related to a deferred tax asset is recorded when it is more likely than not that some portion or all of the deferred tax asset will not be realized. Effective January 1, 2007, the Company adopted FASB Interpretation Number (FIN) No. 48, *Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109*. Based on our evaluation, we have concluded that there are no significant uncertain tax positions requiring recognition in our financial statements.

Long-Term Liabilities

The Long-term liability is for an earn-out accrual that extends beyond one year for one of our other acquisitions.

Table of Contents***Revenue Recognition***

We currently report our net revenues under two operating groups: Wireless and Consumer. Within each of these groups software revenue is recognized based on the customer and contract type. We recognize revenue in accordance with the AICPA Statement of Position (SOP) No. 97-2, *Software Revenue Recognition*, as amended, when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed and determinable, and collectibility is probable. We recognize revenues from sales of our software to OEM customers or end users as completed products are shipped and titles passes; or from royalties generated as authorized customers duplicate our software, if the other requirements of SOP No. 97-2 are met. If the requirements of SOP No. 97-2 are not met at the date of shipment, revenue is not recognized until these elements are known or resolved. Returns from OEM customers are limited to defective goods or goods shipped in error. Historically, OEM customer returns have not exceeded the very nominal estimates and reserves. Management reviews available retail channel information and makes a determination of a return provision for sales made to distributors and retailers based on current channel inventory levels and historical return patterns. Certain sales to distributors or retailers are made on a consignment basis. Revenue for consignment sales are not recognized until sell through to the final customer is established. Within the Consumer group certain revenues are booked net of revenue sharing payments, pursuant to the consensus of Emerging Issues Task Force (EITF) No. 99-19, *Reporting Revenue Gross as a Principal versus Net as an Agent*. We have a few multiple element agreements for which we have contracted to provide a perpetual license for use of proprietary software, to provide non-recurring engineering, and in some cases to provide software maintenance (post contract support). For multiple element agreements, vendor specific objective evidence of fair value for all contract elements is reviewed and the timing of the individual element revenue streams is determined and recognized consistent with SOP No. 97-2. Sales directly to end-users are recognized upon delivery. End users have a thirty day right of return, but such returns are reasonably estimable and have historically been immaterial. We also provide technical support to our customers. Such costs have historically been insignificant.

Sales Incentives

Pursuant to the consensus of EITF No. 01-09, *Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Product)*, effective January 1, 2002, the cost of sales incentives the Company offers without charge to customers that can be used in, or that are exercisable by a customer as a result of, a single exchange transaction is accounted for as a reduction of revenue. We track incentives by program and use historical redemption rates to estimate the cost of customer incentives. Total sales incentives were \$0.8, \$0.6, and \$0.3 million for the years ended December 31, 2008, 2007 and 2006, respectively

Internal Software Development Costs

Development costs incurred in the research and development of new software products and enhancements to existing software products are expensed as incurred until technological feasibility has been established. The Company considers technological feasibility to be established when all planning, designing, coding and testing has been completed according to design specifications. After technological feasibility is established, any additional costs are capitalized. Through December 31, 2008, software has been substantially completed concurrently with the establishment of technological feasibility; and, accordingly, no costs have been capitalized to date.

Capitalized Software and Amortization

Pursuant to the provisions of SFAS No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased or Otherwise Marketed*, we capitalize internally developed software and software purchased from third parties if the related software product under development has reached technological feasibility or if there are alternative future uses for the purchased software. These costs are amortized on a product-by-product basis, typically over an estimated life of five to seven years, using the larger of the amount calculated using the straight-line method or the amount calculated using the ratio between current period gross revenues and the total of current period gross revenues and estimated future gross revenues. At each balance sheet date, we evaluate on a product-by-product basis the unamortized capitalized cost of computer software compared to the net realizable value of that product. The amount by which the unamortized capitalized costs of a computer software product exceed its net realizable value is written off.

Table of Contents***Advertising Expense***

Advertising costs are expensed as incurred. Advertising expenses were \$0.9, \$0.5, and \$0.4 million for the years ended December 31, 2008, 2007 and 2006, respectively.

Income Taxes

The Company accounts for income taxes under SFAS No. 109, *Accounting for Income Taxes*. This statement requires the recognition of deferred tax assets and liabilities for the future consequences of events that have been recognized in the Company's financial statements or tax returns. The measurement of the deferred items is based on enacted tax laws. In the event the future consequences of differences between financial reporting bases and the tax bases of the Company's assets and liabilities result in a deferred tax asset, SFAS No. 109 requires an evaluation of the probability of being able to realize the future benefits indicated by such asset. A valuation allowance related to a deferred tax asset is recorded when it is more likely than not that some portion or all of the deferred tax asset will not be realized. In 2006, the Company reversed all of its valuation allowance on its deferred tax assets as a result of the Company's improving financial performance and projected income in future years. In 2008, the Company recorded a valuation allowance of \$0.1 million against certain foreign net operating losses since it is more likely than not such operating losses will not be realized.

Stock-Based Compensation

Effective January 1, 2006, the Company adopted SFAS No. 123(R), *Share-Based Payment*, which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors, including stock options based on their fair values. SFAS No. 123(R) supersedes Accounting Principles Board Opinion (APB) No. 25, *Accounting for Stock Issued to Employees*, which the Company previously followed in accounting for stock-based awards. In March 2005, the SEC issued Staff Accounting Bulletin (SAB) No. 107 to provide guidance on SFAS No. 123(R). The Company has applied SAB No. 107 in its adoption of SFAS No. 123(R).

The Company adopted SFAS No. 123(R) using the modified prospective transition method as of January 1, 2006. In accordance with the modified prospective transition method, the Company's financial statements for prior periods have not been restated to reflect, and do not include, the impact of SFAS No. 123(R). Share-based compensation expense recognized is based on the value of the portion of share-based payment awards that is ultimately expected to vest. Share-based compensation expense recognized in the Company's consolidated statement of operations for the years ended December 31, 2008, 2007, and 2006 includes compensation expense for share-based payment awards granted prior to, but not yet vested as of, December 31, 2005 based on the grant date fair value estimated in accordance with the pro forma provisions of SFAS No. 123 (see Note 8 - Stock-Based Compensation).

Net Income (Loss) Per Share

The Company calculates earnings per share in accordance with the SFAS No. 128, *Earnings per Share*. Basic earnings per share (EPS) is calculated by dividing the net income/loss available to common stockholders by the weighted average number of common shares outstanding for the period, excluding common stock equivalents. Diluted EPS is computed by dividing the net income/loss available to common stockholders by the weighted average number of common shares outstanding for the period plus the weighted average number of dilutive common stock equivalents outstanding for the period determined using the treasury-stock method. For purposes of this calculation, common stock subject to repurchase by the Company and options are considered to be common stock equivalents and are only included in the calculation of diluted earnings per share when their effect is dilutive.

Table of Contents

Recent Accounting Pronouncements

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*. SFAS No. 162 identifies the sources of accounting principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (GAAP) in the United States. This Statement is effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles*. The Company currently adheres to the hierarchy of GAAP as presented in SFAS No. 162, and does not expect its adoption will have a material impact on its consolidated results of operations and financial condition.

In December 2007, the FASB issued SFAS No. 141(R) (Revised 2007), *Business Combinations*. The objective of SFAS No. 141(R) is to improve reporting by creating greater consistency in the accounting and financial reporting of business combinations, resulting in more complete, comparable and relevant information for investors and other users of financial statements. SFAS No. 141(R) requires the acquiring entity in a business combination to recognize all (and only) the assets acquired and liabilities assumed in the transaction; establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed; and requires the acquirer to disclose to investors and other users all of the information they need to evaluate and understand the nature and financial effect of the business combination. SFAS No. 141(R) includes both core principles and pertinent application guidance, eliminating the need for numerous EITF issues and other interpretative guidance, thereby reducing the complexity of existing United States GAAP. SFAS No. 141(R) is effective as of the start of fiscal years beginning after December 15, 2008. Early adoption is not allowed. The Company is in the process of evaluating this standard and has not yet determined

the impact that the adoption of SFAS No. 141(R) will have on its financial position, results of operations or cash flows.

In December 2007, the FASB issued SFAS No. 160, *Non-controlling Interests in Consolidated Financial Statements*. SFAS No. 160 improves the relevance, comparability, and transparency of financial information provided to investors by requiring all entities to report non-controlling (minority) interests in subsidiaries in the same way as equity in the consolidated financial statements. Moreover, SFAS No. 160 eliminates the diversity that currently exists in accounting for transactions between an entity and non-controlling interests by requiring they be

F-13

Table of Contents

treated as equity transactions. SFAS No. 160 is effective as of the start of fiscal years beginning after December 15, 2008. Early adoption is not allowed. The Company is in the process of evaluating this standard and has not yet determined the impact that the adoption of SFAS No. 160 will have on its financial position, results of operations or cash flows.

2. Acquisitions***PCTEL S Mobility Solutions Group***

On January 4, 2008, the Company acquired substantially all of the assets of PCTEL S Mobility Solutions Group in exchange for \$59.7 million in cash. The direct acquisition costs incurred to date include \$1.2 million of legal and professional services.

The results of operations of the business acquired have been included in the Company's consolidated financial statements from the date of acquisition. Depreciation and amortization related to the acquisition were calculated based on the estimated fair market values and estimated lives for property and equipment and certain identifiable intangible assets acquired.

The total purchase price is summarized as follows (in thousands):

Cash consideration	\$ 59,700
Acquisition related costs	1,231
Total purchase price	\$ 60,931

The Company's allocation of the purchase price is summarized as follows (in thousands):

Assets:	
Property & Equipment	\$ 718
Intangible Assets	13,050
Goodwill	50,319
Total Assets	64,087
Liabilities:	
Deferred Revenue	3,156
Total Liabilities	3,156
Total purchase price	\$ 60,931

Table of Contents

Unaudited pro forma consolidated results of operations for the years ended December 31, 2007 and 2006 as if the acquisition had occurred as of January 1 of each year are as follows (in thousands, except per share data):

	Year Ended December 31, 2007		Year Ended December 31, 2006	
	Historical	Proforma	Historical	Proforma
Net Revenues	\$ 73,377	\$ 83,714	\$ 54,469	\$ 64,263
Net Income (loss)	\$ 3,161	\$ (1,774)	\$ 8,956	\$ 4,719
Net Income (loss) per share, basic	\$ 0.11	\$ (0.06)	\$ 0.38	\$ 0.20
Net Income (loss) per share, diluted	\$ 0.10	\$ (0.06)	\$ 0.35	\$ 0.19

Weighted average shares outstanding, diluted	30,998	29,768	25,330	25,330

Pro forma adjustments for each year include \$2.7 million for additional amortization related to intangible assets acquired, \$0.5 million for reduced stock based compensation expense and \$3.1 million for the elimination of interest income earned on the cash used in the acquisition.

e Frontier, Inc.

In November 2007, the Company acquired certain assets of e frontier America, Inc., a wholly-owned subsidiary of e Frontier, Inc., including e Frontier's Aquazone, Poser and Shad® product suites. The Company paid a total of \$5.6 million and incurred \$0.1 million in direct costs (legal and professional services) to complete the transaction.

The total purchase price is summarized as follows (in thousands):

Cash consideration	\$ 5,600
Acquisition related costs	115
Total purchase price	\$ 5,715

The Company's allocation of the purchase price is summarized as follows (in thousands):

Assets:	
Accounts Receivable, net	\$ 124
Inventory, net	377
Intangible Assets	3,172
Goodwill	2,042
Total Assets	5,715
Liabilities:	
Total purchase price	\$ 5,715

The results of operations of the business acquired have been included in the Company's consolidated financial statements from the date of acquisition. Amortization related to the acquisition was calculated based on an independent valuation for certain identifiable intangibles acquired which will be amortized over periods ranging from one to ten years. The pro-forma effect of the acquisition on historical periods is not material and therefore is not included.

F-15

Table of Contents***Insignia Solutions, plc.***

On April 4, 2007, the Company, IS Acquisition Sub, Inc., a wholly-owned subsidiary of the Company, and Insignia Solutions, plc and its subsidiaries Insignia Solutions Inc., Insignia Solutions AB and Insignia Asia Corporation (collectively *Insignia*) entered into an Amendment (the *Amendment*) to the Asset Purchase Agreement dated February 11, 2007 by and among the Company, Acquisition Sub and Insignia (the *Asset Purchase Agreement*).

Pursuant to the Asset Purchase Agreement, as amended by the Amendment, the Company, Acquisition Sub and Insignia agreed that, among other things, the aggregate consideration to be paid by the Company under the Asset Purchase Agreement would be \$18.8 million, consisting of: \$14.5 million in cash; forgiveness of all indebtedness payable by Insignia under the Promissory Note initially delivered to the Company on December 22, 2006 (the principal amount of the note was \$0.8 million as of December 31, 2006 and was included in Accounts Receivable on the Consolidated Balance Sheet, and was \$2.0 million at the closing of the acquisition), and a cash sum equal to the product of \$2.6 million less the dollar amount of the Employee Liabilities (as defined in the Amendment) assumed by the Company at closing.

In accordance with the Asset Purchase Agreement, the Company held back \$1.5 million in cash from the aggregate purchase price for twelve months as security for satisfaction of Insignia's indemnification obligations under the Asset Purchase Agreement. In the quarter ended March 31, 2008, the Company filed an indemnification claim against Insignia and demanded that the full amount of the holdback payment be cancelled in partial satisfaction of Insignia's indemnification obligations. In June, 2008 the Company received \$0.5 million in settlement of the Company's indemnification claim and was relieved from any obligation to pay the \$1.5 million holdback. This payment has been accounted for as a reduction of the purchase price and has been credited to Goodwill. A total of \$0.7 million in direct cost (legal and professional services) were incurred relating to this transaction.

The total purchase price at this date is summarized as follows (in thousands):

Cash consideration	\$ 12,500
Insignia liabilities paid at closing	1,977
Loan forgiveness	2,000
Acquisition related costs	666
Total purchase price	 \$ 17,143

Ecutel Systems, Inc.

On February 9, 2007, the Company, TEL Acquisition Corp., a wholly-owned subsidiary of the Company, Ecutel Systems, Inc., John J. McDonnell, Jr. and the Principal Stockholders of Ecutel consummated the merger of Ecutel with and into TEL Acquisition Co. pursuant to the terms of that certain Agreement and Plan of Merger dated as of January 31, 2007.

In connection with the Merger, all outstanding shares of capital stock of Ecutel were converted into the right to receive a portion of the merger consideration. The aggregate merger consideration paid by the Company in

Table of Contents

connection with the Merger was \$7.9 million in cash. The consideration for and the other terms and conditions of the Merger were determined by arms-length negotiations between the Company, Ecutel and the Principal Stockholders of Ecutel. The Company paid \$0.1 million in direct costs (legal and professional services) that were incurred to close the transaction. A copy of the Merger Agreement was filed under Form 8-K with the Securities and Exchange Commission.

The results of operations of the business acquired have been included in the Company's consolidated financial statements from the date of acquisition. Amortization related to the acquisition was calculated based on an independent valuation for certain identifiable intangibles acquired which will be amortized over periods ranging from five to seven years.

The total purchase price is summarized as follows (in thousands):

Cash consideration	\$ 7,936
Acquisition related costs	127
Total purchase price	 \$ 8,063

The Company's allocation of the purchase price is summarized as follows (in thousands):

Assets:

Photags, Inc.

On April 3, 2006, the Company entered into an Agreement and Plan of Merger (the Merger Agreement) by and among the Company, Tag Acquisition Corporation, a Delaware corporation and a wholly owned subsidiary of the Company (Merger Sub), Tag Acquisition Corporation II, a Delaware corporation and wholly owned subsidiary of the Company (Merger Sub II), PhoTags, Inc., a Delaware corporation (PhoTags), Harry Fox, as Stockholders Agent, and certain stockholders of PhoTags, that provides for, among other things, the merger of Merger Sub with and into PhoTags and, immediately upon the completion thereof, the merger of PhoTags with and into Merger Sub II pursuant to which PhoTags became a wholly owned subsidiary of the Company (the Merger). The transaction closed on April 5, 2006.

In connection with the Merger, the Company acquired the underlying technology of PhoTags, Inc. which includes patented JPEG enhancements. As a result, the Company paid approximately \$2.0 million to PhoTags, Inc. who paid their existing liabilities at closing, and issued 384,897 shares of the Company's common stock with an aggregate fair market value of \$4.7 million (based on a closing share price on the closing date, April 5, 2006, of \$12.29) as consideration for the purchase of all of the outstanding shares of PhoTags. In connection with the Merger, the Company paid an earn-out of \$3.5 million in March 2007, based on the achievement of certain milestones which was recorded as an addition to Goodwill. The Company paid \$0.2 million in direct cash costs (legal and professional services) and \$0.1 million of non-cash direct costs were incurred to close the transaction.

As part of the transaction, CDI, a company organized under the laws of the State of Israel and a related party of PhoTags (CDI), agreed to grant the Company an option to acquire CDI for a period of ten (10) years following the effective time of the Merger at a purchase price of \$3,000.

The Merger is intended to constitute a reorganization under Section 368 of the Internal Revenue Code of 1986, as amended.

As part of the transaction, the Company filed a registration statement with the Securities and Exchange Commission covering the resale of the shares of the Company's common stock issued to the stockholders of PhoTags at closing. The registration statement was filed on July 28, 2006 and became effective August 3, 2006.

A copy of the Merger Agreement has been filed under Form 8-K with the Securities and Exchange Commission.

The results of operations of the business acquired have been included in the Company's consolidated financial statements from the date of acquisition. Amortization related to the acquisition was calculated based on an independent valuation for certain identifiable intangibles acquired.

Table of Contents

The total purchase price is summarized as follows (in thousands):

Deferred:			
Federal	2,784	526	(58)
State	(230)	339	(33)
Foreign	(148)		
Excess tax benefits related to stock based compensation	72	3,775	4,900
Tax deficiencies related to restricted stock expense	(625)		
Release of valuation allowance related to stock based compensation net operating loss			4,667
Purchase price adjustment PhoTags			(500)
Other adjustments	(40)	674	21
Change in valuation allowance	148		(7,786)
Total deferred	1,961	5,314	1,211
Total provision	\$ 4,172	\$ 5,314	\$ 1,234

For the year ended December 31, 2007, in addition to the \$5,314,000 United States income tax provision detailed in the table above, the Company also paid approximately \$28,000 in foreign withholding taxes for a total of \$5,342,000 as shown on the Consolidated Statement of Operations.

Table of Contents

A reconciliation of the provision (benefit) for income taxes to the amount of income tax expense (benefit) that would result from applying the federal statutory rate (34%) to the income (loss) before income taxes is as follows:

	Year Ended December 31,		
	2008	2007	2006
Federal statutory rate	34%	34%	34%
State tax, net of federal benefit	17	9	6
Equity compensation	69	19	3
Other	(3)		
Change in valuation allowance	4		(31)
	121%	62%	12%

The major components of the Company's deferred tax assets and liabilities are as follows (in thousands):

	Year Ended December	
	2008	2007
Various reserves	\$ 340	\$ 94
Nondeductible accruals	851	423
State taxes	(170)	(470)
Prepaid expenses	(1)	(2)
Credit carryforwards	1,718	1,699
Net operating loss carryforwards	1,107	4,653
Fixed assets	(95)	106
Amortization	602	376
Identifiable intangibles acquired	(189)	(192)
Equity based compensation	331	216
Other	111	108
Subtotal	4,605	7,011
Valuation allowance	(148)	
	\$ 4,457	\$ 7,011

The Company has federal and state net operating loss carryforwards of approximately \$1.2 million and \$6.3 million respectively, at December 31, 2008. These federal and state net operating loss carryforwards will expire from 2011 through 2027.

In addition, the Company has federal and state tax credit carryforwards of approximately \$1.1 million and \$0.6 million, respectively, at December 31, 2008. These tax credits will begin to expire in 2010.

As of December 31, 2008 the Company recorded a valuation allowance to reserve certain foreign net operating loss carryforwards based on the Company's assessment that the realization of the deferred tax assets did not meet the "more likely than not" criterion.

Effective January 1, 2007, the Company adopted FIN 48, *Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109*. FIN 48 provides guidance on recognition, derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 requires an entity to recognize the financial statement impact of a tax position when it is more likely than not that the position will be sustained upon examination. The amount recognized is measured as the largest amount of benefit that is greater than

fifty percent likely of being realized upon ultimate settlement. In addition, FIN 48 permits an entity to recognize interest and penalties related to tax uncertainties either as income tax expense or operating expenses. The Company has chosen to recognize interest and penalties related to tax uncertainties as operating expense.

F-23

Table of Contents

The Company has concluded that there are no significant uncertain tax positions requiring recognition in its financial statements. As a result, the adoption of FIN 48 did not have a material impact on the Company's results of operation and financial position.

The Company is subject to U.S. federal income tax as well as to income tax of multiple state jurisdictions. Federal income tax returns of the Company are subject to IRS examination for the 2005 through 2007 tax years. State income tax returns are subject to examination for a period of three to four years after filing.

5. Commitments and Contingencies***Leases***

The Company leases its buildings under operating leases that expire on various dates through 2016. Future minimum annual lease payments under such leases as of December 31, 2008 are as follows (in thousands):

Year Ending December 31,	Operating
2009	1,536
2010	1,397
2011	1,401
2012	1,239
2013	765
2014	578
Beyond	846
Total	\$ 7,762

Total rent expense was \$1.8, \$1.0, and \$0.6 million for the years ended December 31, 2008, 2007, and 2006, respectively.

Litigation

From time to time the Company is subject to litigation in the normal course of business, none of which management believes will likely have a material adverse effect on the Company's consolidated financial condition or results of operations.

Other Contingent Contractual Obligations

During its normal course of business, the Company has made certain indemnities, commitments and guarantees under which it may be required to make payments in relation to certain transactions. These include: intellectual property indemnities to the Company's customers and licensees in connection with the use, sale and/or license of Company products; indemnities to various lessors in connection with facility leases for certain claims arising from such facility or lease; indemnities to vendors and service providers pertaining to claims based on the negligence or willful misconduct of the Company; indemnities involving the accuracy of representations and warranties in certain contracts; and indemnities to directors and officers of the Company to the maximum extent permitted under the laws of the State of Delaware. In addition, the Company has made contractual commitments to employees providing for severance payments upon the occurrence of certain prescribed events. The Company may also issue a guarantee in the form of a standby letter of credit as security for contingent liabilities under certain customer contracts. The duration of these indemnities, commitments and guarantees varies, and in certain cases, may be indefinite. The majority of these indemnities, commitments and guarantees may not provide for any limitation of the maximum potential for future payments the Company could be obligated to make. The Company has not recorded any liability for these indemnities, commitments and guarantees in the accompanying consolidated balance sheets.

Table of Contents**6. Segment and Geographical Information***Segment Information*

The Company applies the provisions of SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*. SFAS No. 131 requires public companies to report financial and descriptive information about their reportable operating segments. The Company identifies its operating segments based on how management internally evaluates separate financial information, business activities and management responsibility. During the quarter ending December 31, 2008, the Company re-organized our operations into two primary business units. Wireless includes our connection manager solutions for both the OEM and Enterprise channels, music, photo and video content management, firmware over the air and products for the IMS application layer. The Company aggregated the Connectivity & Security, Multimedia, and Mobile Device Solutions operating segments into one business segment. The reason for this was because their economic characteristics are similar, as are the nature of the products and services, the software engineering and development (production), and the type/class of customers. It was becoming increasingly difficult to separate these operating segments from a reporting and management viewpoint. Consumer includes retail sales of our compression and broad consumer-based software. Other revenue includes the consulting portion of our services sector which has been de-emphasized and is no longer considered a strategic element of our future plans.

The Company does not separately allocate operating expenses to these business units, nor does it allocate specific assets. Therefore, business unit information reported includes only revenues.

The following table shows the revenues generated by each business unit (in thousands):

	Year Ended December 31,		
	2008	2007	2006
Wireless	\$ 73,219	\$ 57,819	\$ 43,001
Consumer	23,925	14,368	10,511
Corporate/Other	1,280	1,190	957
Total Revenues	98,424	73,377	54,469
Cost of revenues	20,108	20,644	20,259
Gross Profit	\$ 78,316	\$ 52,733	\$ 34,210

One customer in the Wireless business segment, Verizon Wireless, accounted for 30.9% of total revenues in for the year ended December 31, 2008, 64.4% for the year ended December 31, 2007, and 74.4% for the year ended December 31, 2006.

Geographical Information

During the years ended December 31, 2008, 2007, and 2006, the Company operated in three geographic locations; the Americas, Asia Pacific, and EMEA (Europe, the Middle East, and Africa). Revenues, attributed to the geographic location of the customer's bill-to address, were as follows (in thousands):

	Year ended December 31,		
	2008	2007	2006
Americas	\$ 88,350	\$ 68,974	\$ 53,810
Asia Pacific	5,011	2,151	259
EMEA	5,063	2,252	400
Total Revenues	\$ 98,424	\$ 73,377	\$ 54,469

The Company does not separately allocate specific assets to these geographic locations.

Table of Contents**7. Profit Sharing**

The Company offers its employees a 401(k) plan, in which the Company matches the employee contribution at a rate of 20%, subject to a vesting schedule. Total employer contributions amounted to \$0.3, \$0.2, and \$0.1 million for the years ended December 31, 2008, 2007 and 2006, respectively.

8. Stock-Based Compensation***Stock Plans***

On July 28, 2005, our Shareholders approved the 2005 Stock Option / Stock Issuance Plan (2005 Plan). The 2005 Plan, which became effective the same date, replaced the 1995 Stock Option / Stock Issuance Plan (1995 Plan), which expired on May 24, 2005. All outstanding options under the 1995 Plan remained outstanding, but no further grants will be made under that Plan.

The 2005 Plan provides for the issuance of non-qualified or incentive stock options and restricted stock to employees, non-employee members of the board and consultants. The exercise price per share is not to be less than the fair market value per share of the Company's common stock on the date of grant. The Board of Directors has the discretion to determine the vesting schedule. Options may be exercisable immediately or in installments, but generally vest over a four-year period from the date of grant. In the event the holder ceases to be employed by the Company, all unvested options terminate and all vested options may be exercised within a period following termination. Restricted stock is valued using the closing stock price on the date of the grant. The total value is expensed over the vesting period of 12 to 48 months. In general, options expire ten years from the date of grant. The maximum number of shares of the Company's common stock that were available for issuance over the term of the original 2005 Plan could not exceed 5,000,000 shares, plus that number of additional shares equal to 2.5% of the number of shares of common stock outstanding on the last trading day of the calendar year commencing with calendar year 2006 (but not in excess of 750,000 shares). On October 11, 2007, our shareholders voted to approve an amendment to the 2005 Plan to increase the maximum number of shares of common stock that may be issued under the 2005 Plan from 5,000,000 shares (plus an annual increase) to 7,000,000 shares (plus an annual increase).

SFAS 123(R)

Effective January 1, 2006, the Company adopted SFAS No. 123(R), *Share-Based Payment*, which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors, including stock options based on their fair values. SFAS No. 123(R) supersedes APB No. 25, *Accounting for Stock Issued to Employees*, which the Company previously followed in accounting for stock-based awards. In March 2005, the SEC issued SAB No. 107 to provide guidance on SFAS No. 123(R). The Company has applied SAB No. 107 in its adoption of SFAS No. 123(R).

The Company adopted SFAS No. 123(R) using the modified prospective transition method as of January 1, 2006. In accordance with the modified prospective transition method, the Company's financial statements for prior periods have not been restated to reflect, and do not include, the impact of SFAS No. 123(R). Share-based compensation expense recognized is based on the value of the portion of share-based payment awards that is ultimately expected to vest. Share-based compensation expense recognized in the Company's consolidated statement of operations during the years ended December 31, 2008, 2007, and 2006 includes compensation expense for share-based payment awards granted prior to, but not yet vested as of, December 31, 2005 based on the grant date fair value estimated in accordance with the pro forma provisions of SFAS No. 123.

Table of Contents**Valuation of Stock Option and Restricted Stock Awards**

The weighted average grant-date fair value of stock options granted during the years ended December 31, 2008, 2007, and 2006 was \$3.74, \$7.70 and \$7.13, respectively. The assumptions used to compute the share-based compensation costs for the stock options granted during the years ended December 31, 2008, 2007, and 2006, respectively, using the Black-Scholes option pricing model, were as follows:

	Year Ended December 31,		
	2008	2007	2006
<i>Assumptions</i>			
Risk-free interest rate (average)	2.8%	4.6%	4.9%
Expected dividend yield			
Weighted average expected life (years)	4	4	4
Volatility (average)	71.0%	66.0%	84.0%
Forfeiture rate	3.5%	10.0%	10.0%

The risk-free interest rate assumption was based on the United States Treasury's rates for U.S. Treasury zero-coupon bonds with maturities similar to those of the expected term of the award being valued. The Company assumed no dividend yield because it does not expect to pay dividends for the foreseeable future.

Grants of restricted stock are valued using the closing stock price on the date of grant. In the year ended December 31, 2008 a total of 50,000 shares of restricted stock, with a total value of \$0.4 million, were granted to non-employee members of the Board of Directors. This cost will be amortized over a period of 12 months. In addition, 1.1 million shares of restricted stock, with a total value of \$8.6 million, were granted to key officers and employees of the Company. This cost will be amortized over a period of 48 months.

Compensation Costs

In conjunction with the adoption of SFAS No. 123(R), the Company elected to attribute the value of share-based compensation to expense using the straight-line method over the requisite service period for each award, which was previously used for its pro forma information required under SFAS No. 123. Share-based non-cash compensation expenses related to stock options and restricted stock grants were recorded in the financial statements as follows (in thousands):

	Year Ended December 31,		
	2008	2007	2006
Cost of Revenues	\$ 430	\$ 295	\$ 33
Selling and Marketing	3,460	4,920	1,770
Research and Development	3,201	2,353	989
General and Administrative	4,886	4,804	1,870
Total Non-Cash Stock Compensation Expense	\$ 11,977	\$ 12,372	\$ 4,662

Total share-based compensation for each year includes cash payment of income taxes related to grants of restricted stock in the amounts of \$1.2 million, \$2.2 million, and \$0.8 million for the years ended December 31, 2008, 2007, and 2006, respectively.

Table of Contents**Stock Options**

A summary of the Company's stock options outstanding under the 2005 Plan as of December 31, 2008 are as follows:

	Shares	Weighted Ave. Exercise Price	Aggregate Intrinsic Value
	(in thousands except per share amounts)		
Outstanding as of December 31, 2005	3,856	\$ 3.57	\$
(898 options, exercisable at a weighted average exercise price of \$1.85)			
Granted (weighted average fair value of \$7.13)	266	\$ 11.69	
Exercised	(1,462)	\$ 2.86	
Cancelled	(142)	\$ 4.39	
Outstanding as of December 31, 2006	2,518	\$ 4.80	\$
(914 options, exercisable at a weighted average exercise price of \$3.91)			
Granted (weighted average fair value of \$7.70)	3,142	\$ 14.61	
Exercised	(900)	\$ 4.23	
Cancelled	(106)	\$ 13.89	
Outstanding as of December 31, 2007	4,654	\$ 11.33	\$
(911 options, exercisable at a weighted average exercise price of \$4.93)			
Granted (weighted average fair value of \$3.74)	135	\$ 7.51	
Exercised	(49)	\$ 2.64	
Cancelled	(451)	\$ 14.28	
Outstanding as of December 31, 2008	4,289	\$ 10.94	\$
Exercisable as of December 31, 2008	2,481	\$ 9.31	\$
Vested and expected to vest at December 31, 2008	4,116	\$ 10.84	\$

During the year ended December 31, 2008, options to acquire 49,000 shares were exercised with an intrinsic value of \$143,000, resulting in cash proceeds to the Company of \$129,000. The weighted-average grant-date fair value of options granted during the year ended December 31, 2008 was \$3.74. For the year ended December 31, 2008 there were \$11.8 million of total unrecognized compensation costs related to non-vested stock options granted under the Plan, which will be recognized over a period not to exceed four years. At December 31, 2008, there were 1.3 million shares available for future grants under the 2005 Stock Issuance / Stock Option Plan.

Additional information regarding options outstanding as of December 31, 2008 is as follows:

Range of exercise prices	Number outstanding (in thousands)	Options outstanding		Options exercisable	
		Weighted average remaining contractual life (years)	Weighted average exercise price	Number exercisable (in thousands)	Weighted average exercise price
\$0.24 \$4.00	332	5.1	\$ 1.69	332	\$ 1.69
\$4.01 \$6.00	954	6.6	\$ 4.95	789	\$ 4.95
\$6.01 \$12.00	331	8.0	\$ 8.67	170	\$ 8.64
\$12.01 \$14.00	1,320	8.1	\$12.68	613	\$12.70
\$14.01 \$16.00	827	8.2	\$15.19	371	\$15.20
\$16.01 \$19.00	525	8.4	\$18.06	206	\$18.16
	4,289	7.6	\$10.94	2,481	\$ 9.31

Table of Contents**Restricted Stock Awards**

A summary of the Company's restricted stock awards outstanding under the 2005 Plan as of December 31, 2008, and the activity during years ended therein, are as follows (in thousands):

	Number of shares	Weighted average grant date fair value	
Unvested at December 31, 2005			
Granted	450		
Vested	(187)		
Unvested at December 31, 2006	263		
Granted	527		
Vested	(440)		
Unvested at December 31, 2007	350	\$	12.32
Granted	1,164	\$	7.73
Vested	(444)	\$	10.59
Cancelled	(72)	\$	(11.16)
Unvested at December 31, 2008	998	\$	7.82

9. Comprehensive Income

Comprehensive income includes unrealized gains and losses on short-term investments of U.S. government agency and government sponsored enterprise debt and equity securities. The following table sets forth the calculation of comprehensive income (in thousands):

	Year Ended December 31,		
	2008	2007	2006
Net income (loss)	\$ (732)	\$ 3,161	\$ 8,956
Change in unrealized gain on investments, after tax	69		
Total comprehensive income (loss)	\$ (663)	\$ 3,161	\$ 8,956

10. Equity Transactions

On December 14, 2006, the Company completed a fully marketed secondary, issuing 4 million shares of our common stock, \$0.001 par value, at a price of \$14.75 per share, resulting in aggregate gross cash proceeds to the Company of \$59.0 million before deducting commissions and other expenses. Offering costs related to the transaction incurred in 2006 totaled \$4.0 million, comprised of \$3.3 million in underwriting discounts and commissions and \$0.7 million cash payments for legal and investment services, resulting in net proceeds to the Company of \$55.0 million as of December 31, 2006. On January 18, 2007 an additional 0.4 million shares were sold under the same agreement. Offering costs related to the transaction incurred in 2007 totaled \$0.4 million, comprised of \$0.3 million in underwriting discounts and commissions and \$0.1 million cash payments for legal and investment services, resulting in additional net proceeds to the Company of \$5.3 million as of December 31, 2007.

A Special Meeting of the Stockholders of the Company was held on September 28, 2007. This meeting was adjourned, and reconvened on October 11, 2007. At the reconvened Special Meeting, the Stockholders voted to approve an amendment to the 2005 Stock Option / Stock Issuance plan to increase the maximum number of shares of common stock that may be issued under the 2005 Plan from 5 million shares (plus an annual increase) to 7 million shares (plus an annual increase).

Table of Contents**11. Quarterly Financial Data (Unaudited)**

The following financial information reflects all normal recurring adjustments, which are, in the opinion of management, necessary for a fair statement of the results of the interim periods. Summarized quarterly data for fiscal 2008 and 2007 are as follows (in thousands, except per share data):

	Year ended December 31, 2008			
	1st Quarter	2nd Quarter	3rd Quarter	4th Quarter
Selected quarterly financial data:				
Revenues	\$21,880	\$23,452	\$26,641	\$26,451
Gross Profit	\$16,764	\$17,989	\$21,444	\$22,119
Operating Income (Loss)	\$ (1,888)	\$ (469)	\$ 2,026	\$ 3,032
Net Income (Loss)	\$ (317)	\$ (158)	\$ (1,576)	\$ 1,319
Net Income (Loss) Per Share, Basic (1)	\$ (0.01)	\$ (0.01)	\$ (0.05)	\$ 0.04
Weighted Average Shares Outstanding, Basic	30,406	30,855	31,289	31,340
Net Income (Loss) Per Share, Diluted (1)	\$ (0.01)	\$ (0.01)	\$ (0.05)	\$ 0.04
Weighted Average Shares Outstanding, Diluted	30,406	30,855	31,289	31,658
	Year ended December 31, 2007			
	1st Quarter	2nd Quarter	3rd Quarter	4th Quarter
Selected quarterly financial data:				
Revenues	\$17,667	\$15,346	\$20,393	\$19,971
Gross Profit	\$11,988	\$11,365	\$14,008	\$15,372
Operating Income (Loss)	\$ 2,211	\$ (257)	\$ 1,270	\$ 1,025
Net Income	\$ 1,842	\$ 194	\$ 472	\$ 653
Net Income Per Share, Basic (1)	\$ 0.06	\$ 0.01	\$ 0.02	\$ 0.02
Weighted Average Shares Outstanding, Basic	29,051	29,739	30,031	30,258
Net Income Per Share, Diluted (1)	\$ 0.06	\$ 0.01	\$ 0.02	\$ 0.02
Weighted Average Shares Outstanding, Diluted	30,684	31,434	31,429	31,165

(1) Basic and diluted net income (loss) per share is computed independently for each of the quarters presented.

Therefore, the sum of the quarterly per share amounts will not necessarily equal the total for the year.
