Table of Contents

Forward-Looking Information.

The information included in this Form 10-Q contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements may relate to the Corporation's financial condition, results of operations, plans, objectives, future performance and business, including, but not limited to, statements with respect to the adequacy of the allowance for loan losses, market risk and the impact of interest rate changes, capital adequacy and liquidity, and the effect of legal proceedings and new accounting standards on the Corporation's financial condition and results of operations. All statements contained herein that are not clearly historical in nature are forward-looking, and the words anticipate, believe, continues, expect, estimate, intend, and similar expressions and future or conditional verbs such as will, would, should, could, might, can, may, expressions are generally intended to identify forward-looking statements.

These statements are not guarantees of future performance and involve certain risks, uncertainties, estimates and assumptions by management that are difficult to predict. Various factors, some of which are beyond the Corporation's control, could cause actual results to differ materially from those expressed in, or implied by, such forward-looking statements. Factors that might cause such a difference include, but are not limited to: the rate of growth in the economy, as well as general business and economic conditions; changes in interest rates, as well as the magnitude of such changes; the fiscal and monetary policies of the federal government and its agencies; the relative strength or weakness of the consumer and commercial credit sectors and of the real estate markets; the performance of the stock and bond markets; competition in the financial services industry; possible legislative, tax or regulatory changes; and difficulties in combining the operations of acquired entities.

Moreover, the outcome of legal proceedings, as discussed in Part II, Item I. Legal Proceedings, is inherently uncertain and depends on judicial interpretations of law and the findings of regulators, judges and juries.

All forward-looking statements included in this document are based upon information available to the Corporation as of the date of this document, and we assume no obligation to update or revise any such forward-looking statements to reflect occurrences or unanticipated events or circumstances after the date of such statements.

The accompanying notes are an integral part of these unaudited consolidated financial statements.

Table of Contents**Notes to Unaudited Consolidated Financial Statements****Note 1 Nature of operations and basis of presentation**

Popular, Inc. (the Corporation, Popular) is a diversified, publicly owned financial holding company subject to the supervision and regulation of the Board of Governors of the Federal Reserve System. The Corporation is a full service financial services provider with operations in Puerto Rico, the United States, the Caribbean and Latin America. As the leading financial institution in Puerto Rico, the Corporation offers retail and commercial banking services through its banking subsidiary, Banco Popular de Puerto Rico (BPPR), as well as investment banking, auto and equipment leasing and financing, mortgage loans, consumer lending and insurance services through specialized subsidiaries. In the United States, the Corporation provides complete financial solutions to all the communities it serves through branches of Banco Popular North America (BPNA) in California, Texas, Illinois, New York, New Jersey and Florida, and financial services stores under the name of Popular Cash Express. The Corporation's consumer finance subsidiary in the United States, Popular Financial Holdings, Inc. (PFH), offers mortgage and personal loans, and also maintains a substantial wholesale loan brokerage network, a warehouse lending division and loan servicing and assets acquisition units. The Corporation strives to use its expertise in technology and electronic banking as a competitive advantage in its Caribbean and Latin America expansion, as well as internally servicing many of its subsidiaries' system infrastructures and transactional processing businesses. EVERTEC, Inc. (EVERTEC), the Corporation's main subsidiary in this business segment, is the leading provider of financial transaction processing and information technology solutions in Puerto Rico and the Caribbean. With offices in San Juan, Caracas, Santo Domingo, and Miami, EVERTEC has a solid record of success in 11 Latin American countries. Note 16 to the unaudited consolidated financial statements presents information about each of the Corporation's business segments. The unaudited consolidated financial statements include the accounts of Popular, Inc. and its majority-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation. These unaudited statements are, in the opinion of management, a fair statement of the results for the periods reported and include all necessary adjustments, of a normal recurring nature, for a fair statement of such results. Certain reclassifications have been made to the prior period unaudited consolidated financial statements to conform to the 2005 presentation.

In the normal course of business, except for the Corporation's banks and the parent holding company, the Corporation utilized a one-month lag in the consolidation of the financial results of its other subsidiaries (the non-banking subsidiaries), mainly to facilitate timely reporting. In 2005, the Corporation commenced a two-year plan to change the reporting period of its non-banking subsidiaries to a calendar period. The impact of this change in net income was included as a cumulative effect of accounting change in the Corporation's consolidated financial results for the quarter ended March 31, 2005, and corresponds to the financial results for the month of December 2004 of the non-banking subsidiaries which implemented the change in the first reporting period of 2005. Refer to Note 17 for further information on the subsidiaries which continue to have a fiscal year-end in November 2005.

Certain information and note disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States of America have been condensed or omitted from these statements pursuant to the rules and regulations of the Securities and Exchange Commission and, accordingly, these financial statements should be read in conjunction with the audited Consolidated Financial Statements of the Corporation for the year ended December 31, 2004, included in the Corporation's Annual Report on Form 10-K.

Table of Contents**Principal acquisition during 2005**

In January 2005, the Corporation completed the acquisition of Kislak Financial Corporation (Kislak), the holding company of Kislak National Bank, based in South Florida. Immediately prior to the acquisition, Kislak had assets of approximately \$965 million, a loan portfolio of approximately \$590 million and deposits of approximately \$659 million.

Expected Acquisitions announced in the third quarter of 2005

Popular, Inc. completed the acquisition of 100% of the issued and outstanding shares of common stock and common stock equivalents of E-LOAN, Inc. (E-LOAN), a California-based online consumer direct lender, for \$4.25 per share in cash, or approximately \$300 million. E-LOAN, which becomes a wholly-owned subsidiary of PFH, originated over \$5 billion in mortgage, home equity, and auto loans in 2004. Through this merger, Popular, Inc. further expands its presence in the mainland U.S. market, complements its existing non-prime and warehouse lending businesses, and significantly enhances its technology platform to support its growth strategy in which the internet plays an important role. This transaction became effective on November 1, 2005.

Also, in September 2005, Popular, Inc. announced a definitive merger agreement to acquire the assets of Infinity Mortgage Corporation, based in New Jersey. The operations of Infinity Mortgage will become part of the mortgage business of Equity One, Inc., a subsidiary of PFH. The transaction, which is expected to be completed during the fourth quarter of 2005, will help increase Popular, Inc.'s market share in the U.S. as well as strengthen its existing mortgage and loan servicing businesses. Infinity Mortgage Corporation originated over \$220 million in mortgage loans during 2004 and operates in New Jersey, New York, Connecticut, Maryland, Massachusetts and Pennsylvania.

Operations to be disposed of by sale

On September 21, 2005, Popular, Inc. announced that ACE Cash Express, Inc. (ACE) will acquire substantially all of the assets of Popular Cash Express, Inc. (PCE), our wholly-owned check cashing business in the U.S., for \$36 million. The Corporation has been constrained in its ability to compete against non-bank owned check cashing operations, which are less regulated than banking institutions, but is committed to remain an active participant in the industry as a lender and servicer to other retail check cashing institutions, and will continue to collaborate with regulators and lawmakers to accelerate the integration of unbanked and underbanked individuals into mainstream financial services. The agreements signed by Popular and ACE do not require regulatory approval and are subject to customary closing terms and conditions. PCE had approximately \$62 million in total assets as of September 30, 2005, consisting principally of cash, premises and equipment, and goodwill. Total revenues for the nine months ended September 30, 2005 were approximately \$19 million and pre-tax losses approximated \$4.3 million. The financial results of PCE are part of the United States Financial Services reportable segment in Note 16 Segment Reporting, included in the accompanying notes to the unaudited consolidated financial statements in this Form 10-Q. The transaction is expected to be completed during the fourth quarter of 2005. No significant gain or loss is expected on this sale transaction.

Subsequent event

On January 18, 2005, the Corporation announced that it had been informed by the Antitrust Division of the U.S. Department of Justice that the Department of Justice was conducting an investigation concerning the participation by its subsidiary, GM Group, Inc. (which after a reorganization in 2004 became part of EVERTEC), in the E-rate program, which is administered by the Federal Communications Commission (FCC) and pays for telecommunications services and related equipment for schools and libraries.

On October 13, 2005, the Corporation entered into a Settlement Agreement with the Department of Justice and the Federal Communications Commission in connection with this matter. Pursuant to the Settlement Agreement, EVERTEC, without admitting liability and denying any allegations of misconduct, agreed to make a \$4.8 million payment to the United States and agreed to voluntarily disqualify itself from bidding on or performing any work related to contracts funded by the Federal Communications Commission for a three year period. EVERTEC also agreed to cooperate with U.S. governmental authorities in any investigation or

Table of Contents

litigation related to its participation in the E-rate program. The Settlement Agreement did not have and is not expected to have an impact on the Corporation's third or fourth quarter results of operations or the Corporation's financial condition because the full amount of the settlement payment has been previously accrued and because EVERTEC is not engaged in work related to Federal Communications Commission contracts.

Foreign Currency Translation

Assets and liabilities denominated in foreign currencies are translated to U.S. dollars using prevailing rates of exchange at the end of the period. Revenues, expenses, gains and losses are translated using weighted average rates for the period. The resulting foreign currency translation adjustment from operations for which the functional currency is other than the U.S. dollar is reported in accumulated other comprehensive (loss) income, except for highly inflationary environments in which the effects are included in other operating income, as described below. The Corporation conducts business in certain Latin American markets through several of its processing and information technology services and products subsidiaries. Also, it holds interests in Consorcio de Tarjetas Dominicanas, S.A. (CONTADO) and Centro Financiero BHD, S.A. in the Dominican Republic. Although not significant, some of these businesses are conducted in the country's foreign currency. At September 30, 2005, the Corporation had approximately \$36 million in an unfavorable foreign currency translation adjustment as part of accumulated other comprehensive (loss) income (December 31, 2004 \$36 million; September 30, 2004 \$35 million). The Corporation has been monitoring the inflation levels in the Dominican Republic to evaluate whether it still meets the highly inflationary economy test prescribed by SFAS No. 52, Foreign Currency Translation. Such statement defines highly inflationary as a cumulative inflation of approximately 100 percent or more over a 3-year period. The cumulative inflation in the Dominican Republic for the 36 months ended September 30, 2005 exceeded the 100 percent threshold. In accordance with the provisions of SFAS No. 52, the financial statements of a foreign entity in a highly inflationary economy are remeasured as if the functional currency were the reporting currency. Accordingly, the Corporation's interests in the Dominican Republic were remeasured into the U.S. dollar. During the quarter ended September 30, 2005, approximately \$1.0 million in remeasurement gains on the investments held by the Corporation in the Dominican Republic were reflected in other operating income instead of accumulated other comprehensive (loss) income. For the nine months ended September 30, 2005, net remeasurement gains totaled \$1.3 million. These net gains relate to improvement in the Dominican peso's exchange rate to the U.S. dollar from \$45.50 at June 30, 2004, when the economy reached the highly inflationary threshold, to \$30.85 at December 31, 2004 and \$29.05 at September 30, 2005. These remeasurement gains / losses will continue to be reflected in earnings until the economy is no longer considered highly inflationary. The unfavorable cumulative translation adjustment associated with these interests at the reporting date in which the economy became highly inflationary approximated \$32 million. The cumulative inflation rate in the Dominican Republic over a 3-year period approximated 101.5 percent at September 30, 2005.

Table of Contents**Note 2 Recent Accounting Developments****Statement of Position 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer**

In December 2003, the Accounting Standards Executive Committee issued Statement of Position 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (SOP 03-3). This statement addresses accounting for differences between contractual cash flows and cash flows expected to be collected from an investor's initial investment in loans or debt securities acquired in a transfer if those differences are attributable, at least in part, to credit quality. SOP 03-3 does not apply to loans originated by the entity. SOP 03-3 limits the yield that may be accreted (accretable yield) to the excess of the investor's estimate of undiscounted expected principal, interest, and other cash flows (cash flows expected at acquisition to be collected) over the investor's initial investment in the loan. SOP 03-3 requires that the excess of contractual cash flows over cash flows expected to be collected (nonaccretable difference) not be recognized as an adjustment of yield, loss accrual, or valuation allowance. SOP 03-3 prohibits investors from displaying accretable securities, yield and nonaccretable difference in the balance sheet. Subsequent substantial increases in cash flows expected to be collected generally should be recognized prospectively through adjustment of the loan's yield over its remaining life. Decreases in cash flows expected to be collected should be recognized as impairments.

SOP 03-3 prohibits carrying over or the creation of valuation allowances in the initial accounting of all loans acquired in a transfer that are within the scope of this statement. The prohibition of the valuation allowance carryover applies to the purchase of an individual loan, a pool of loans, a group of loans, and loans acquired in a purchase business combination, subject to certain exceptions stipulated in the statement. SOP 03-3 is effective for loans acquired in fiscal years beginning after December 31, 2004.

Issue 03-1, Meaning of Other Than Temporary Impairment

In March 2004, the Emerging Issues Task Force reached a consensus on EITF Issue 03-1, Meaning of Other Than Temporary Impairment and Its Application to Certain Investments (Issue 03-1). Issue 03-1 provides recognition and measurement guidance regarding when impairments of equity and debt securities are considered other-than-temporary requiring a charge to earnings, and also requires additional annual disclosures for investments in unrealized loss positions. The additional annual disclosure requirements were implemented by the Corporation for the year ended December 31, 2003. In September 2004, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) EITF Issue 03-1-a, to address the application of Issue 03-1 to debt securities that are impaired solely because of interest rates and / or sector spread increases and that are analyzed for impairment under paragraph 16 of Issue 03-1. EITF Issue 03-1-1 expanded the scope of the deferral to include all securities covered by Issue 03-1. Both delayed the recognition and measurement provisions of Issue 03-1 pending the issuance of further implementation guidance.

In June 2005, the FASB decided to not provide additional guidance on the meaning of other-than-temporary impairment, but directed the staff to issue proposed FSP EITF 03-1-a, Implementation Guidance for the Application of Paragraph 16 of EITF Issue No. 03-1, as final. The final FSP will supersede EITF Issue No. 03-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments and EITF Topic No. D-44,

Recognition of Other-Than-Temporary Impairment upon the Planned Sale of a Security Whose Cost Exceeds Fair Value. The final FSP (retitled FSP FAS 115-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments) will replace the guidance set forth in paragraphs 10-18 of Issue 03-1 with references to existing other than temporary impairment guidance, such as SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, SEC Staff Accounting Bulletin 59, *Accounting for Noncurrent Marketable Equity Securities*, and APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*. FSP FAS 115-1 will codify the guidance set forth in EITF Topic D-44 and clarify that an investor should recognize an impairment loss no later than when the impairment is deemed other-than-temporary, even if a decision to sell has not been made. The FASB directed the staff to proceed to a draft of a final FSP for vote by written ballot. The FASB decided that FSP FAS 115-1 would be effective for other-than-temporary impairment analysis conducted in periods beginning after September 15, 2005.

Table of Contents

The Corporation is waiting for the issuance of the final guidance to evaluate the effects of the recognition and measurement provisions that the proposed statement, as amended, may have on its financial condition and results of operations.

SFAS No. 123-R, Share-Based Payment

In December 2004, the FASB issued a revision to SFAS No. 123, Accounting for Stock-Based Compensation, SFAS No. 123-R, Share-Based Payment. SFAS No. 123-R focuses primarily on transactions in which an entity exchanges its equity instruments for employee services and generally establishes standards for the accounting for transactions in which an entity obtains goods or services in share-based payment transactions. SFAS No. 123-R requires companies to (1) use fair value to measure stock-based compensation awards and (2) cease using the intrinsic value method of accounting, which APB 25 allowed and resulted in no expense for many awards of stock options for which the exercise price of the option did not exceed the price of the underlying stock at the grant date. In addition, SFAS No. 123-R retains the modified grant date model from SFAS No. 123. Under that model, compensation cost is measured at the grant date fair value of the award and is adjusted to reflect actual forfeitures and the outcome of certain conditions. The fair value of an award is not remeasured after its initial estimation on the grant date, except in the case of a liability award or if the award is modified, based on specific criteria included in SFAS No. 123-R. Also, SFAS 123-R clarifies the financial impact of vesting and/or acceleration clauses due at retirement. Under the revised SFAS, the expense should be fully accrued for any employee that is eligible to retire regardless of the actual retirement experience of the employer. In April 2005, the Securities and Exchange Commission approved a rule that delays the effective date of SFAS No. 123-R to annual, rather than interim, periods that begin after September 15, 2005. Management is currently evaluating the effect of the adoption of SFAS No. 123-R, but does not expect the adoption to have a material effect on the Corporation's financial condition, results of operations or cash flows due to the fact that in 2002, the Corporation voluntarily adopted the fair value recognition method under SFAS No. 123. The Corporation will prospectively apply SFAS No. 123-R to its financial statements as of January 1, 2006.

SFAS No. 153, Exchanges of Nonmonetary Assets

In December 2004, the FASB issued SFAS No. 153, Exchanges of Nonmonetary Assets, an amendment of APB Opinion No. 29, Accounting for Nonmonetary Transactions. This statement amends the principle that exchanges of nonmonetary assets should be measured based on the fair value of the assets exchanged and more broadly provides for exceptions regarding exchanges of nonmonetary assets that do not have commercial substance. A nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. The entity's future cash flows are expected to significantly change if either of the following criteria is met: a) the configuration (risk, timing, and amount) of the future cash flows of the asset(s) received differs significantly from the configuration of the future cash flows of the asset(s) transferred; b) the entity-specific value of the asset(s) received differs from the entity-specific value of the asset(s) transferred, and the difference is significant in relation to the fair values of the assets exchanged. A qualitative assessment will, in some cases, be conclusive in determining that the estimated cash flows of the entity are expected to significantly change as a result of the exchange. SFAS No. 153 is effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005. The adoption of this statement is not expected to have a material impact on the Corporation's financial condition, results of operations, or cash flows.

SFAS No. 154, Accounting Changes and Error Corrections

In May 2005, the FASB has issued SFAS No. 154, Accounting Changes and Error Corrections, a replacement of APB Opinion No. 20 and FASB Statement No. 3. The Statement applies to all voluntary changes in accounting principle, and changes the requirements for accounting for and reporting of a change in accounting principle.

SFAS No. 154 requires retrospective application to prior periods' financial statements of a voluntary change in accounting principle unless it is impracticable. Statement 154 is the result of a broader effort by the FASB to improve the comparability of cross-border financial reporting by working with the International Accounting Standards Board toward development of a single set of high-quality accounting standards. SFAS No. 154 requires

Table of Contents

that a change in method of depreciation, amortization, or depletion for long-lived, nonfinancial assets be accounted for as a change in accounting estimate that is effected by a change in accounting principle. APB Opinion No. 20 previously required that such a change be reported as a change in accounting principle.

SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. Earlier application is permitted for accounting changes and corrections of errors occurring in fiscal years beginning after June 1, 2005. The Statement does not change the transition provisions of any existing accounting pronouncements, including those that are in a transition phase as of the effective date of this Statement. The Corporation is currently evaluating the impact that this new accounting pronouncement may have on its financial condition and results of operations.

FIN No. 47, Accounting for Conditional Asset Retirement Obligations – an interpretation of FASB Statement No. 143
In March 2005, the FASB issued financial interpretation (FIN) No. 47, Accounting for Conditional Asset Retirement Obligations – an interpretation of FASB Statement No. 143. This Interpretation clarifies the term conditional asset retirement obligation as used in SFAS No. 143 and requires a liability to be recorded if the fair value of the obligation can be reasonably estimated. The types of asset retirement obligations that are covered by this Interpretation are those for which an entity has a legal obligation to perform an asset retirement activity, however the timing and (or) method of settling the obligation are conditional on a future event that may or may not be within the control of the entity. FIN No. 47 also clarifies when an entity would have sufficient information to reasonably estimate the fair value of an asset retirement obligation. This Interpretation is effective no later than the end of fiscal years ending after December 15, 2005. The adoption of this statement is not expected to have a material impact on the Corporation's financial condition, results of operations, or cash flows.

FASB Staff Position No. FAS 109-2, Accounting and Disclosure Guidance for the Foreign Earnings Repatriation Provision within the American Jobs Creation Act of 2004

In December 2004, the FASB issued FASB Staff Position No. FAS 109-2, Accounting and Disclosure Guidance for the Foreign Earnings Repatriation Provision within the American Jobs Creation Act of 2004 (FSP 109-2). The American Jobs Creation Act of 2004 (the Act) provides for a special one-time deduction of 85 percent of certain foreign earnings repatriated into the U.S. from non-U.S. subsidiaries through September 30, 2006. To date, the Corporation has not provided for income taxes on unremitted earnings generated by the non-U.S. subsidiary given the Corporation's intent to permanently reinvest those earnings.

Note 3 Investment Securities Available-For-Sale

The amortized cost, gross unrealized gains and losses and approximate market value (or fair value for certain investment securities where no market quotations are available) of investment securities available-for-sale as of September 30, 2005, December 31, 2004 and September 30, 2004 were as follows:

(In thousands)	Amortized Cost	AS OF SEPTEMBER 30, 2005		
		Gross Unrealized Gains	Gross Unrealized Losses	Market Value

During the quarter ended September 30, 2005, the Corporation reassessed the appropriateness of the classification of certain earning assets and reclassified \$42 million from investment securities available-for-sale to commercial loans based on the underlying characteristics of the instrument and the source of its cash flows. The assets were transferred at cost and evaluated for any credit risk exposure.

The following table shows the Corporation's gross unrealized losses and market value of investment securities available-for-sale, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at September 30, 2005, December 31, 2004 and September 30, 2004:

The unrealized loss positions of available-for-sale securities at September 30, 2005 are primarily associated with U.S. Agency and Treasury obligations, and to a lesser extent, U.S. Agency-issued collateralized mortgage obligations, and mortgage-backed securities. The vast majority of these securities are rated the equivalent of AAA by the major rating agencies. The investment portfolio is structured primarily with highly liquid securities which possess a large and efficient secondary market. Valuations are performed at least on a quarterly basis using third party providers and dealer quotes. Management believes that the unrealized losses in the available-for-sale portfolio at September 30, 2005 are substantially related to market interest rate fluctuations and not to deterioration in the creditworthiness of the issuers.

During the nine months ended September 30, 2005, the Corporation recognized through earnings approximately \$12.6 million in losses in the available-for-sale portfolio that management considered to be other than temporarily

Table of Contents

impaired. These realized losses were associated with interest only strips and equity securities.

The following table states the name of issuers, and the aggregate amortized cost and market value of the securities of such issuer (includes available-for-sale and held-to-maturity securities), when the aggregate amortized cost of such securities exceeds 10% of stockholders' equity. This information excludes securities of the U.S. Government agencies and corporations. Investments in obligations issued by a state of the U.S. and its political subdivisions and agencies which are payable and secured by the same source of revenue or taxing authority, other than the U.S. Government, are considered securities of a single issuer.

	\$25,848	\$ 216	\$25,632

Management believes that the unrealized losses in the held-to-maturity portfolio at September 30, 2005 are substantially related to market interest rate fluctuations and not to deterioration in the creditworthiness of the issuers.

Note 5 Pledged and Other Restricted Assets

Certain securities and loans were pledged to secure public and trust deposits, assets sold under agreements to repurchase, other borrowings and credit facilities available. The classification and carrying amount of the Corporation's pledged assets, in which the secured parties are not permitted to sell or repledge the collateral, were as follows:

(In thousands)	September 30, 2005	December 31, 2004	September 30, 2004
Investment securities available-for-sale	\$ 2,928,729	\$ 2,802,647	\$ 2,842,033
Investment securities held-to-maturity	1,255	1,378	1,380
Loans	11,289,750	10,749,244	10,892,942
	\$14,219,734	\$13,553,269	\$13,736,355

Pledged securities and loans in which the creditor has the right by custom or contract to repledge are presented separately in the consolidated statements of condition.

In compliance with rules and regulations of the Securities and Exchange Commission, at September 30, 2005, the Corporation had securities with a market value of \$699 thousand segregated in a special reserve bank account for the benefit of brokerage customers of its broker-dealer subsidiary (December 31, 2004 \$899 thousand; September 30, 2004 \$895 thousand). These securities are classified in the consolidated statements of condition within the trading securities category.

Table of Contents

As required by the Puerto Rico International Banking Center Law, at September 30, 2005, December 31, 2004 and September 30, 2004, the Corporation maintained separately for its two international banking entities (IBEs), \$600 thousand, equally split for the two IBEs, in assets which were considered restricted.

Note 6 Derivative Instruments and Hedging Activities

In managing its market risk, the Corporation enters, to a limited extent, into certain derivative transactions, primarily interest rate swaps, interest rate forwards and future contracts, interest rate caps, index options, foreign exchange contracts, floors and options embedded in financial contracts.

There were no changes in derivative instruments and hedging activities having a significant impact in the Corporation's financial condition or results of operations from December 31, 2004 to September 30, 2005.

Note 7 Goodwill and Other Intangible Assets

The changes in the carrying amount of goodwill for the nine months ended September 30, 2004 and 2005, allocated by reportable segment, and in the case of Popular Puerto Rico, as an additional disclosure, by business area, were as follows (refer to Note 16 for the definition of the Corporation's reportable segments):

(In thousands)	Balance at January 1, 2005	Goodwill acquired	Balance at September 30, 2005
Popular Puerto Rico:			
P.R. Commercial Banking	\$ 14,674		\$ 14,674

(1) Negative amount represents adjustment to purchase accounting

entries during
the allowable
period after
purchase date.

No goodwill was written-down during the nine months ended September 30, 2005 and 2004.

The Corporation performed the annual impairment test required by SFAS No. 142, Goodwill and Other Intangible Assets. The results of this test did not reveal impairment in the Corporation's recorded goodwill.

23

Table of Contents

At September 30, 2005 and December 31, 2004, other than goodwill, the Corporation had \$65 thousand of identifiable intangibles with an indefinite useful life related to a trademark. There were no identifiable intangibles with an indefinite useful life at September 30, 2004. The following table reflects the components of other intangible assets subject to amortization:

(In thousands)	September 30, 2005		December 31, 2004		September 30, 2004	
	Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
Core deposits	\$76,956	\$38,901	\$86,327	\$50,376	\$88,771	\$48,215
Other customer relationships	2,875	229	726	59	550	46
Other intangibles	4,328	1,528	3,295	877	3,345	794
Total	\$84,159	\$40,658	\$90,348	\$51,312	\$92,666	\$49,055

The increase in goodwill from the end of 2004 to September 30, 2005 was mostly the result of the acquisition of Kislak. Other intangible assets subject to amortization decreased from December 31, 2004 partly due to certain core deposits intangibles that became fully amortized during 2005 and, as such, their gross amount and accumulated amortization were eliminated from the accounting records and the tabular disclosure presented above.

During the quarter and nine months ended September 30, 2005, the Corporation recognized \$2.4 million and \$6.8 million, respectively, in amortization expense related to other intangible assets with definite lives (September 30, 2004 \$2.0 million and \$5.6 million, respectively).

The following table presents the estimated aggregate annual amortization expense of the intangible assets with definite lives for each of the following fiscal years:

	(In thousands)
2005	\$ 9,063
2006	9,002
2007	6,796
2008	5,142
2009	4,621

No significant events or circumstances have occurred that would reduce the fair value of any reporting unit below its carrying amount.

Note 8 Retained Interests on Sales of Mortgage Loans

During the nine-month period ended September 30, 2005, the Corporation, through its mortgage and consumer lending subsidiary in the mainland United States, PFH, retained servicing responsibilities and interest-only strips on securitization transactions involving the transfer of non-prime mortgage loans to a special purpose entity, which in turn transferred the loans to a securitization trust vehicle.

During the first nine months of 2005, the Corporation completed four off-balance sheet securitizations which met the criteria for sale accounting under SFAS No. 140. Approximately, \$1.7 billion in adjustable (ARM) and fixed rate non-prime mortgage loans were securitized and sold by the Corporation during this period, with a gain on sale of \$24.8 million. As part of these transactions, the Corporation recognized mortgage servicing rights (MSR) of \$36 million and interest-only strips (IOs) of \$49 million. Key economic assumptions used in measuring the retained interests at the date of these securitizations were: discount rates ranging from 14% to 15%, conditional prepayment rates ranging from 28% to 35% in adjustable rate loans and 20% to 28% in fixed rate loans; and loss rates ranging from 1.28% to 2.34%.

Table of Contents

When the Corporation transfers financial assets and the transfer fails any one of the SFAS No. 140 criteria, the Corporation is not permitted to derecognize the transferred financial assets and the transaction is accounted for as a secured borrowing. In these cases, the assets remain on the Corporation's financial statements and a liability is recorded for the related asset-backed bonds (on-balance sheet securitizations). The loans transferred to the trusts are included on the balance sheet as loans pledged as collateral for secured borrowings. Since the Corporation retains the servicing of the loans in on-balance sheet securitizations, it recognizes MSR's at the time of securitization as they become a distinct asset that can be contractually separated from the underlying loans.

During the first nine months of 2005, the Corporation completed two on-balance sheet securitizations involving approximately \$1.2 billion in adjustable and fixed rate non-prime mortgage loans. As part of these transactions, the Corporation recognized mortgage servicing rights of \$25 million. Key economic assumptions used in measuring the retained interests at the date of these securitizations were: discount rate of 14% and conditional prepayment rates ranging from 28% to 35% in adjustable rate loans and 20% to 25% in fixed rate loans.

IOs retained as part of off-balance sheet securitizations of non-prime mortgage loans have been classified as investment securities available-for-sale and are presented at fair value in the unaudited consolidated statements of condition. The Corporation reviews the IOs for potential impairment on a quarterly basis and records impairment in accordance with SFAS No. 115. During the nine-month period ended September 30, 2005, the Corporation recorded other-than-temporary impairment losses of \$11.7 million related with the IOs derived from the off-balance sheet securitizations.

As of September 30, 2005, key economic assumptions used to estimate the fair value of IOs and MSR's derived from PFH's securitizations and the sensitivity to immediate changes in those assumptions were as follows:

(In thousands)	Interest-only Strips	MSR's	
		Fixed	ARM
Carrying amount of retained interests	\$ 52,246	\$34,545	\$21,562
Fair value of retained interests	\$ 52,246	\$35,341	\$22,926
Weighted average collateral life (in years)	2.1 years	3.4 years	2.4 years
	28% Fixed / 35%		
Conditional prepayment rate	ARM	28%	35%
Impact on fair value of 10% adverse change	\$ (5,425)	\$ (45)	\$ 146
Impact on fair value of 20% adverse change	\$ (10,052)	\$ 357	\$ 267
Discount rate (annual rate)	15%	14%	14%
Impact on fair value of 10% adverse change	\$ (2,507)	\$ (827)	\$ (392)
Impact on fair value of 20% adverse change	\$ (4,846)	\$ (1,622)	\$ (771)

PFH as servicer collects prepayment penalties on a substantial portion of the underlying serviced loans, as such, an adverse change in the prepayment assumptions with respect to the MSR's could be partially offset by the benefit derived from the prepayment penalties estimated to be collected.

Also, BPPR retains servicing responsibilities on the sale of mortgage loans, which substantially have fixed interest rates. BPPR as servicer does not earn significant prepayment penalties on the underlying loans serviced. As of September 30, 2005, key economic assumptions used to estimate the fair value of MSR's recorded by BPPR and the sensitivity to immediate changes in those assumptions were as follows:

Table of Contents

(In thousands)	MSRs
Carrying amount of retained interests	\$ 60,837
Fair value of retained interests	\$ 66,340
Weighted average life (in years)	9.0 years
Conditional prepayment rate	11.5%
Impact on fair value of 10% adverse change	\$ (2,212)
Impact on fair value of 20% adverse change	\$ (4,281)
Discount rate (annual rate)	10.0%
Impact on fair value of 10% adverse change	(2,246)
Impact on fair value of 20% adverse change	\$ (4,351)

The sensitivity analyses presented above for IOs and MSRs are hypothetical and should be used with caution. As the figures indicate, changes in fair value based on a 10 and 20 percent variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in the sensitivity tables included herein, the effect of a variation in a particular assumption on the fair value of the retained interest is calculated without changing any other assumption; in reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

Note 9 Commitments and Contingencies

In the normal course of business the Corporation has outstanding commercial letters of credit and stand-by letters of credit, which contract amounts at September 30, 2005 were \$15 million and \$251 million, respectively (December 31, 2004 \$19 million and \$187 million; September 30, 2004 \$17 million and \$151 million). There were also other commitments outstanding and contingent liabilities, such as commitments to extend credit and commitments to originate mortgage loans, which were not reflected in the accompanying financial statements.

At September 30, 2005, the Corporation recorded a liability of \$425 thousand (December 31, 2004 - \$333 thousand; September 30, 2004 \$277 thousand), which represents the fair value of the obligations undertaken in issuing the guarantees under the standby letters of credit issued or modified after December 31, 2002. This liability was included as part of other liabilities in the consolidated statements of condition. The standby letters of credit were issued to guarantee the performance of various customers to third parties. The contract amounts in standby letters of credit outstanding represent the maximum potential amount of future payments the Corporation could be required to make under the guarantees in the event of nonperformance by the customers. These standby letters of credit are used by the customer as a credit enhancement and typically expire without being drawn upon. The Corporation's standby letters of credit are generally secured, and in the event of nonperformance by the customers, the Corporation has rights to the underlying collateral provided, which normally includes cash and marketable securities, real estate, receivables and others.

The Corporation fully and unconditionally guarantees certain borrowing obligations issued by certain of its wholly-owned consolidated subsidiaries which aggregated \$4.0 billion at September 30, 2005 (December 31, 2004 \$3.9 billion; September 30, 2004 \$3.9 billion). In addition, at September 30, 2005, the Corporation fully and unconditionally guaranteed \$824 million of capital securities (December 31, 2004 \$824 million; September 30, 2004 \$444 million) issued by four (December 31, 2004 four; September 30, 2004 two) wholly-owned issuing trust entities that have been deconsolidated pursuant to FIN No. 46R. During the quarter ended March 31, 2005, Popular North America, Inc. concluded its full and unconditional guarantee of certain borrowing obligations issued by one of its non-banking subsidiaries, which as of September 30, 2004 and December 31, 2004 amounted to \$495 million and \$210 million, respectively.

The Corporation is a defendant in a number of legal proceedings arising in the normal course of business. Based on the opinion of legal counsel, management believes that the final disposition of these matters will not have a material adverse effect on the Corporation's financial position or results of operations.

Table of Contents**Note 10 Stock Option and Other Incentive Plans**

Since 2001, the Corporation maintained a Stock Option Plan (the "Stock Option Plan"), which permitted the granting of incentive awards in the form of qualified stock options, incentive stock options, or non-statutory stock options of the Corporation. In April 2004, the Corporation's shareholders adopted the Popular, Inc. 2004 Omnibus Incentive Plan (the "Incentive Plan"), which replaced and superseded the Stock Option Plan. All outstanding award grants under the Stock Option Plan continue to remain outstanding at September 30, 2005 under the original terms of the Stock Option Plan. The Corporation recognized \$1.3 million and \$3.0 million in stock option expense for the quarter and nine months ended September 30, 2005, respectively (September 30, 2004 \$0.6 million and \$2.6 million, respectively). The following table presents information on stock options at September 30, 2005:

(Not in thousands)

Exercise Price Range per Share	Options Outstanding	Weighted Average Exercise Price of Options Outstanding	Weighted Average Remaining Life of Options Outstanding	Options Exercisable	Weighted Average Exercise Price of Options Exercisable
\$14.39 - \$18.50	1,600,385	\$ 15.80	6.98 years	817,366	\$ 15.61
\$19.25 - \$27.20	1,653,991	\$ 25.29	8.76 years	241,340	\$ 23.74
\$14.39 - \$27.20	3,254,376	\$ 20.62	7.88 years	1,058,706	\$ 17.46

The following table summarizes the stock option activity and related information:

(Not in thousands)	Options Outstanding	Weighted-Average Exercise Price
Outstanding at January 1, 2004	1,779,219	\$ 15.88
Granted	997,232	23.95
Exercised	(110,681)	15.82
Forfeited	(81,150)	23.22
Outstanding at December 31, 2004	2,584,620	\$ 18.76
Granted	707,342	27.20
Exercised	(37,586)	16.56
Outstanding at September 30, 2005	3,254,376	\$ 20.62

The stock options exercisable at September 30, 2005 totaled 1,058,706 (September 30, 2004 642,545).

The fair value of the options was estimated on the date of the grants using the Black-Scholes Option Pricing Model. The weighted average assumptions used for the grants issued during 2005 and 2004 were:

	2005	2004
Expected dividend yield	2.56%	2.00%
Expected life of options	10 years	10 years
Expected volatility	17.54%	16.50%
Risk-free interest rate	4.16%	4.06%

Weighted average fair value of options granted (per option)	\$ 5.95	\$ 5.74
---	----------------	---------

During the quarter ended September 30, 2005, the Corporation granted 750 shares of restricted stock under the Incentive Plan for members of the Board of Directors of Popular, Inc. and BPPR. For the nine months ended September 30, 2005 there were 200,214 shares purchased and granted under the Incentive Plan for both corporate executive officers and members of the Board of Directors of Popular, Inc. and BPPR.

27

Table of Contents

Also, during the first quarter of 2005, the Compensation Committee approved incentive awards for certain corporate executive officers under the Incentive Plan based on the 2005 performance, payable in the form of restricted stock. Shares of restricted stock will be granted at the beginning of 2006 subject to the attainment of the established performance goals for 2005. During the quarter and nine months ended September 30, 2005, the Corporation recognized \$1.3 million and \$2.5 million, respectively, of restricted stock expense related to the executive officers incentive awards. The compensation cost was estimated based upon the shorter of the vesting period stipulated in the short and long-term incentive awards or the participant attaining 55 years of age.

During the quarter and nine months ended September 30, 2005, the Corporation recognized \$158 thousand and \$421 thousand, respectively, of restricted stock expense related to shares of restricted stock granted to members of the Board of Directors of Popular, Inc. and BPPR.

Note 11 Pension and Other Benefits

The Corporation has noncontributory defined benefit pension plans and supplementary pension plans for regular employees of certain of its subsidiaries.

The components of net periodic pension cost for the quarters and nine months ended September 30, 2005 and 2004 were as follows:

(In thousands)	Pension Plans				Benefit Restoration Plans			
	Quarters ended		Nine months ended		Quarters ended		Nine months ended	
	September 30, 2005	2004	September 30, 2005	2004	September 30, 2005	2004	September 30, 2005	2004
Service cost	\$ 3,858	\$ 3,465	\$ 11,689	\$ 10,864	\$ 240	\$ 163	\$ 720	\$ 489
Interest cost	7,438	6,956	22,314	20,939	313	233	939	699
Expected return on plan assets	(10,281)	(9,340)	(30,462)	(28,002)	(203)	(172)	(609)	(516)

28

Table of Contents

As of September 30, 2005, contributions made to the postretirement benefit plan approximated \$4.6 million. The Corporation presently expects to contribute \$6.7 million to the postretirement benefit plan during 2005.

Note 12 Trust Preferred Securities

At September 30, 2005, the Corporation had established four trusts for the purpose of issuing trust preferred securities (the capital securities) to the public. The proceeds from such issuances, together with the proceeds of the related issuances of common securities of the trusts (the common securities), were used by the trusts to purchase junior subordinated deferrable interest debentures (the junior subordinated debentures) issued by the Corporation. The sole assets of the trusts consisted of the junior subordinated debentures of the Corporation and the related accrued interest receivable. These trusts are not consolidated by the Corporation under the provisions of FIN No. 46.

The junior subordinated debentures are included by the Corporation as notes payable in the consolidated statements of condition. The Corporation also recorded in the caption of other investment securities in the consolidated statements of condition, the common securities issued by the issuer trusts. The common securities of each trust are wholly-owned, or indirectly wholly-owned, by the Corporation.

(In thousands, including reference notes)

Issuer	BanPonce Trust I	Popular Capital Trust I	Popular North America Capital Trust I	Popular Capital Trust II
Issuance date	February 1997	October 2003	September 2004	November 2004
Capital Securities	\$ 144,000	\$ 300,000	\$ 250,000	\$ 130,000
Distribution rate	8.327%	6.700%	6.564%	6.125%
Common Securities	\$ 4,640	\$ 9,279	\$ 7,732	\$ 4,021
Junior Subordinated Debentures aggregate liquidation amount	\$ 148,640	\$ 309,279	\$ 257,732	\$ 134,021
Stated maturity date	February 2027	November 2033	September 2034	December 2034
Reference notes	(a),(c),(e),(f),(g)	(b),(d),(f)	(a),(c),(f)	(b),(d),(f)

(a) Statutory business trust that is wholly-owned by Popular North America (PNA) and indirectly wholly-owned by the Corporation.

(b) Statutory business trust that is wholly-owned by the Corporation.

(c) The obligations of PNA under the junior subordinated debentures and its guarantees of the capital securities under the trust are fully and unconditionally guaranteed on a subordinated basis by the Corporation to the extent set forth in the applicable guarantee agreement.

(d) These capital securities are fully and unconditionally guaranteed on a subordinated basis by the Corporation to the extent set forth in the applicable guarantee agreement.

(e) The original issuance was for \$150,000. In 2003, the Corporation reacquired \$6,000 of the 8.327% capital securities.

(f) The Corporation has the right, subject to any required prior approval from the Federal Reserve, to redeem the junior subordinated debentures at a redemption price equal to 100% of the principal amount, plus accrued and unpaid interest to the date of redemption. The maturity of the junior subordinated debentures may be shortened at the option of the Corporation prior to their stated maturity dates (i) on or after the stated optional redemption dates stipulated in the agreements, in whole at any time or in part from time to time, or (ii) in whole, but not in part, at any time within 90 days following the occurrence and during the continuation of a tax event, an investment company event or a capital treatment event as set forth in the indentures relating to the capital securities, in each case subject to regulatory

approval. A capital treatment event would include a change in the regulatory capital treatment of the capital securities as a result of the recent accounting changes affecting the criteria for consolidation of variable interest entities such as the trust under FIN 46R.

(g) Same as (f) above, except that the investment company event does not apply for early redemption.

Table of Contents

The Capital Securities of Popular Capital Trust I and Popular Capital Trust II are traded on the NASDAQ under the symbols BPOPNI and BPOPNI, respectively.

Under the Federal Reserve Board's risk-based capital guidelines, the capital securities are includable in the Corporation's Tier I capital.

Note 13 Stockholders Equity

The Corporation has a dividend reinvestment and stock purchase plan under which stockholders may reinvest their quarterly dividends in shares of common stock at a 5% discount from the average market price at the time of issuance, as well as purchase shares of common stock directly from the Corporation by making optional cash payments at prevailing market prices.

The Corporation's authorized preferred stock may be issued in one or more series, and the shares of each series shall have such rights and preferences as shall be fixed by the Board of Directors when authorizing the issuance of that particular series. The Corporation's only outstanding class of preferred stock is its 6.375% noncumulative monthly income preferred stock, 2003 Series A. These shares of preferred stock are perpetual, nonconvertible and are redeemable solely at the option of the Corporation beginning on March 31, 2008. The redemption price per share is \$25.50 from March 31, 2008 through March 30, 2009, \$25.25 from March 31, 2009 through March 30, 2010 and \$25.00 thereafter.

The Banking Act of the Commonwealth of Puerto Rico requires that a minimum of 10% of BPPR's net income for the year be transferred to a statutory reserve account until such statutory reserve equals the total of paid-in capital on common and preferred stock. Any losses incurred by a bank must first be charged to retained earnings and then to the reserve fund. Amounts credited to the reserve fund may not be used to pay dividends without the prior consent of the Puerto Rico Commissioner of Financial Institutions. The failure to maintain sufficient statutory reserves would preclude BPPR from paying dividends. BPPR's statutory reserve fund totaled \$285 million at September 30, 2005 (December 31, 2004 \$285 million; September 30, 2004 \$338 million). During the nine months ended September 30, 2005 and September 30, 2004 there were no transfers between the statutory reserve account and the retained earnings account.

Note 14 Earnings per Common Share

The computation of earnings per common share and diluted earnings per common share follows:

(In thousands, except share information)	Quarter ended September 30,		Nine months ended September 30,	
	2005	2004	2005	2004
Net income	\$ 115,216	\$ 115,381	\$ 410,455	\$ 361,684
Less: Preferred stock dividends	2,979	2,979	8,935	8,935
Net income applicable to common stock after cumulative effect of accounting change	\$ 112,237	\$ 112,402	\$ 401,520	\$ 352,749
Net income applicable to common stock before cumulative effect of accounting change	\$ 112,237	\$ 112,402	\$ 397,913	\$ 352,749
Average common shares outstanding	267,244,997	266,414,016	267,043,298	266,197,350
Average potential common shares	590,367	404,362	539,824	310,586
Average common shares outstanding assuming dilution	267,835,364	266,818,378	267,583,122	266,507,936

Edgar Filing: POPULAR INC - Form 10-Q

Basic earnings per common share before cumulative effect of accounting change	\$	0.42	\$	0.42	\$	1.49	\$	1.32
Diluted earnings per common share before cumulative effect of accounting change	\$	0.42	\$	0.42	\$	1.49*	\$	1.32
Basic and diluted earnings per common share after cumulative effect of accounting change	\$	0.42	\$	0.42	\$	1.50	\$	1.32

* Quarterly amounts for 2005 do not add to the year-to-date total due to rounding.

30

Table of Contents

Potential common shares consist of common stock issuable under the assumed exercise of stock options and under restricted stock awards using the treasury stock method. This method assumes that the potential common shares are issued and the proceeds from exercise in addition to the amount of compensation cost attributed to future services are used to purchase common stock at the exercise date. The difference between the number of potential shares issued and the shares purchased is added as incremental shares to the actual number of shares outstanding to compute diluted earnings per share. Stock options that result in lower potential shares issued than shares purchased under the treasury stock method are not included in the computation of dilutive earnings per share since their inclusion would have an antidilutive effect in earnings per share. For the quarter and nine months periods ended September 30, 2005, there were 245,332 and 555,961 weighted average antidilutive stock options outstanding, respectively (September 30, 2004 943,347 and 929,350, respectively). All shares of restricted stock are treated as outstanding for purposes of this computation.

Note 15 Supplemental Disclosure on the Consolidated Statements of Cash Flows

For the nine months ended September 30, 2005, the Corporation paid interest and income taxes amounting to \$848 million and \$158 million, respectively (September 30, 2004 \$562 million and \$95 million, respectively). Loans receivable transferred to other real estate and other property for the nine months ended September 30, 2005, amounted to \$105 million and \$18 million, respectively (September 30, 2004 \$85 million and \$20 million, respectively). In addition, during the nine months ended September 30, 2005, the Corporation transferred \$2.3 billion of mortgage loans held-in-portfolio to loans held-for-sale with the intent to securitize the financial assets in transactions structured as sales under the provisions of SFAS No. 140, or for future whole-loan sales in the secondary market. The transfer was accounted at lower of cost or fair value. Since the beginning of 2005, the Corporation, through its subsidiary PFH, completed four securitization transactions of mortgage loans held-for-sale which met the criteria for sale accounting under SFAS No. 140. The cash inflows from these transactions were reflected as part of operating activities in the consolidated statement of cash flows. During 2004, PFH's securitization transactions did not meet the criteria for sale accounting under SFAS No. 140, as such the transactions were accounted as secured borrowings and the cash inflows were reflected as financing activities in the consolidated statement of cash flows.

Note 16 Segment Reporting

In connection with the reorganization of the Corporation's corporate structure during 2004, the Corporation realigned its business segments to reflect its new business structure, referred to by management as business circles. There is one circle for each of the Corporation's four principal businesses Popular Puerto Rico, United States Financial Services, Popular Financial Holdings and Processing. Each business circle has been identified as a reportable segment. Also, a corporate circle has been defined to support the business circles.

Management determined the reportable segments based on the internal reporting used to evaluate performance and to assess where to allocate resources. The segments were determined based on the new organizational structure which focuses primarily towards products and services as well as on the markets the segments serve. Other factors, such as the credit risk characteristics of the loan products, distribution channels and clientele, were also considered in the determination of reportable segments.

Popular Puerto Rico:

Given that Popular Puerto Rico constitutes approximately 72% of the Corporation's net income and 56% of its total assets as of September 30, 2005, additional disclosures are provided for the business areas included in this reportable segment, as described below:

Commercial banking represents the Corporation's banking operations conducted at BPPR, which are targeted mainly to corporate, small and middle size businesses. It includes aspects of the lending and depository businesses, as well as other finance and advisory services. BPPR allocates funds across segments based on duration matched transfer pricing at market rates. This area also incorporates income

Table of Contents

related with the investment of excess funds as well as a proportionate share of the investment function of BPPR.

Consumer and retail banking represents the branch banking operations of BPPR which focus on retail clients. It includes the consumer lending business operations of BPPR, as well as the lending operations of Popular Auto, Popular Finance, and Popular Mortgage. These three subsidiaries focus respectively on auto and lease financing, small personal loans and mortgage loan originations. This area also incorporates income related with the investment of excess funds from the branch network, as well as a proportionate share of the investment function of BPPR.

Other financial services include the trust and asset management service units of BPPR, the brokerage and investment banking operations of Popular Securities, and the insurance agency and reinsurance businesses of Popular Insurance, Popular Insurance V.I. and Popular Life Re. Most of the services that are provided by these subsidiaries generate profits based on fee income.

United States Financial Services:

This reportable segment includes principally the activities of BPNA, including its subsidiaries Popular Leasing, U.S.A. and Popular Insurance Agency, U.S.A. BPNA operates through a branch network of over 135 branches in six states. Popular Insurance Agency, U.S.A. offers investment and insurance services across the BPNA branch network. Popular Leasing, U.S.A. provides mainly small to mid-ticket commercial and medical equipment financing. The U.S. Financial Services segment also includes the retail financial services of Popular Cash Express, a fee driven business that serves the unbanked, retail customer. As stated in Note 1, the sale of PCE's operations is expected to be completed during the fourth quarter of 2005.

Popular Financial Holdings:

This reportable segment corresponds to the Corporation's consumer lending subsidiaries in the United States, principally Popular Financial Holdings, Inc. and its wholly-owned subsidiaries Equity One, Inc., Popular Financial Management, LLC, Popular Mortgage Servicing, Inc. and Popular Housing Services, Inc. These subsidiaries are primarily engaged in the business of originating non-prime mortgage and personal loans, acquiring retail installment contracts and providing warehouse lines to small and medium-sized mortgage companies. This segment also maintains a substantial wholesale broker network as well as loan servicing and asset acquisition units.

Processing:

This reportable segment includes the financial transaction processing and technology functions of the Corporation, including EVERTEC with offices in Puerto Rico, Florida, the Dominican Republic and Venezuela; and ATH Costa Rica, S.A. and CreST, S.A., located in Costa Rica. In addition, this reportable segment includes the equity investments in CONTADO and Servicios Financieros, S.A. de C.V. (Serfinsa), which operate in the Dominican Republic and El Salvador, respectively. This segment provides processing and technology services to other units of the Corporation as well as to third parties, principally other financial institutions in Puerto Rico, the Caribbean and Central America.

Corporate:

Corporate consists primarily of the Holding companies: Popular, Inc., Popular North America and Popular International Bank, excluding the equity investments in CONTADO and Serfinsa, which due to the nature of their operations are included as part of the processing segment. The holding companies obtain funding in the capital markets to finance the Corporation's growth, including acquisitions. The Corporate circle also includes the expenses of the four administrative corporate areas that were identified as critical for the organization: Finance, Risk Management, Legal and People, Communications and Planning. These corporate administrative areas have the responsibility of establishing policy, setting up controls and coordinating the activities of their corresponding groups in each of the business circles.

The Corporation may periodically reclassify business segment results based on modifications to its management reporting and profitability measurement methodologies and changes in organizational alignment.

Table of Contents

The accounting policies of the individual operating segments are the same as those of the Corporation described in Note 1. Transactions between operating segments are primarily conducted at fair value, resulting in profits that are eliminated for reporting consolidated results of operations.

Prior period amounts corresponding to the periods ended September 30, 2004 and December 31, 2004 have been restated to reflect changes in segment reporting.

During the nine-month period ended September 30, 2005, Popular Financial Holdings recorded other-than temporary impairment losses of \$11.7 million on the valuation of the interest-only strips derived from the off-balance sheet securitizations. These unfavorable adjustments are included in the caption of other income in the corresponding tables above and resulted primarily from higher prepayments than anticipated caused by continued low long-term interest rates.

Table of Contents

During the quarter and nine months ended September 30, 2005, the holding companies realized net gains on sale of marketable equity securities (before tax) of approximately \$9.2 million and \$59.7 million, respectively. No such net gains were realized in the third quarter of 2004, while for the nine-month period ended September 30, 2004, the net gains (before tax) approximated \$12.7 million. These net gains are included in other income within the Corporate circle.

The increase in intersegment revenues for the nine months ended September 30, 2005, compared with the corresponding period in the previous year, for the Processing segment corresponds to financial transaction processing and information technology services provided by EVERTEC to other subsidiaries of the Corporation. As a result of the reorganization to consolidate the information processing and technology functions into EVERTEC effective during the second quarter of 2004, certain internal services previously provided by BPPR or internally serviced by other subsidiaries, are being provided by EVERTEC. The revenues are categorized by the service provider as other income while the service receivers categorize the amounts billed as other operating expenses.

Note 17 Condensed Consolidating Financial Information of Guarantor and Issuers of Registered Guaranteed Securities:

The following condensed consolidating financial information presents the financial position of Popular, Inc. Holding Company (PIHC) (parent only), Popular International Bank, Inc. (PIBI), Popular North America, Inc. (PNA) and all other subsidiaries of the Corporation as of September 30, 2005, December 31, 2004 and September 30, 2004, and the results of their operations and cash flows for the periods ended September 30, 2005 and 2004.

PIBI, PNA, and their wholly-owned subsidiaries, except for Banco Popular North America (BPNA) and Banco Popular, National Association (BP, N.A.), had a fiscal year that ended on November 30. Accordingly, the consolidated financial information of PIBI and PNA as of August 31, 2004 and November 30, 2004, corresponded to their financial information included in the consolidated financial statements of Popular, Inc. as of September 30, 2004 and December 31, 2004.

As stated in Note 1, in 2005, the Corporation commenced a two-year plan to change its non-banking subsidiaries to a calendar reporting year-end. As of September 30, 2005, Popular Securities, Inc., Popular North America (holding company), Popular FS, LLC and Popular Financial Holdings, Inc. (PFH), including its wholly-owned subsidiaries, continue to have a fiscal year that ends on November 30. Accordingly, their financial information as of August 31, 2005 corresponds to their financial information included in the consolidated financial statements of Popular, Inc. as of September 30, 2005. All other subsidiaries have aligned their year end closing to that of the Corporation's calendar year.

Table of Contents

PIBI is an operating subsidiary of PIHC and is the holding company of its wholly-owned subsidiaries, ATH Costa Rica, CreST, S.A., Popular Insurance V.I., Inc. and PNA.

PNA is an operating subsidiary of PIBI and is the holding company of its wholly-owned subsidiaries:

- Popular Cash Express, Inc.;
- PFH, including its wholly-owned subsidiaries Equity One, Inc., Popular Financial Management, LLC, Popular Housing Services, Inc. and Popular Mortgage Servicing, Inc.
- BPNA, including its wholly-owned subsidiaries Popular Leasing, U.S.A., Popular Insurance Agency, U.S.A. and Popular FS, LLC;
- BP, N.A., including its wholly-owned subsidiary Popular Insurance, Inc.

PIHC, PIBI and PNA are authorized issuers of debt securities and preferred stock under a shelf registration filed with the SEC.

PIHC fully and unconditionally guarantees all registered debt securities and preferred stock issued by PIBI and PNA. The principal source of income for PIHC consists of dividends from BPPR. As a member of the Federal Reserve System, BPPR is subject to the regulations of the Federal Reserve Board. BPPR must obtain the approval of the Federal Reserve Board for any dividend if the total of all dividends declared by it during the calendar year would exceed the total of its net income for that year, as defined by the Federal Reserve Board, combined with its retained net income for the preceding two years, less any required transfers to surplus or to a fund for the retirement of any preferred stock. The payment of dividends by BPPR may also be affected by other regulatory requirements and policies, such as the maintenance of certain minimum capital levels. At September 30, 2005, BPPR could have declared a dividend of approximately \$210 million without the approval of the Federal Reserve Board (September 30, 2004 \$272 million; December 31, 2004 \$222 million). Refer to Popular, Inc.'s Form 10-K for the year ended December 31, 2004 for further information on dividend restrictions imposed by regulatory requirements and policies on the payment of dividends by BPPR, BPNA and BP, N.A.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

This discussion contains an analysis of the consolidated financial position and financial performance of Popular, Inc. and its subsidiaries (the Corporation or Popular). All accompanying tables, financial statements and notes included elsewhere in this report should be considered an integral part of this analysis.

Popular, Inc. is a full service financial services provider with operations in Puerto Rico, the United States, the Caribbean and Latin America. As the leading financial institution in Puerto Rico with over 280 branches and offices, the Corporation offers retail and commercial banking services through its banking subsidiary, Banco Popular de Puerto Rico (BPPR), as well as investment banking, auto and equipment leasing and financing, mortgage loans, consumer lending and insurance services through specialized subsidiaries. In the United States, the Corporation has established the largest Hispanic-owned financial services franchise, providing complete financial solutions to all the communities it serves. Banco Popular North America (BPNA) operates over 135 branches in California, Texas, Illinois, New York, New Jersey and Florida. The Corporation's finance subsidiary in the United States, Popular Financial Holdings, Inc. (PFH), offers mortgage and personal loans, and also maintains a substantial wholesale broker network, a warehouse lending division and loan servicing and assets acquisition units. The Corporation continues to use its expertise in technology and electronic banking as a competitive advantage in its Caribbean and Latin America expansion, as well as internally servicing many of its subsidiaries systems infrastructures and transactional processing businesses. EVERTEC, Inc. (EVERTEC), the Corporation's main subsidiary in this business segment, is the leading provider of financial transaction processing and information technology solutions in Puerto Rico and the Caribbean. With offices in San Juan, Caracas, Santo Domingo, and Miami, EVERTEC has a solid record of success in 11 Latin American countries.

Table A provides selected financial data for the quarter and nine months ended September 30, 2005, compared with the same periods in 2004.

Financial highlights for the quarter ended September 30, 2005 follow:

Net interest income for the quarter ended September 30, 2005 decreased slightly compared with the same period of 2004. On a taxable equivalent basis, net interest income increased 5% for the third quarter of 2005, compared with the same quarter in 2004. The increase in net interest income, on a taxable equivalent basis, was derived from the growth in average earning assets, principally loans, partially offset by a reduction in the net interest margin. The spread between short-term and long-term interest rates compressed as a result of the flattening of the yield curve. The increase in the cost of funds from wholesale borrowings and interest bearing deposits outpaced the increase in yields from interest earning assets. Tables B and C provide information on the Corporation's net interest income on a taxable equivalent basis.

The provision for loan losses increased for the quarter ended September 30, 2005, when compared with the same quarter in the previous year primarily due to higher charge-offs combined with portfolio growth in all loan categories. In general, credit quality statistics reflected stable to favorable trends in most lending categories. Refer to the Credit Risk Management and Loan Quality section, including Tables J, K and L, for a more detailed analysis of the allowance for loan losses, net charge-offs, non-performing assets and credit quality statistics.

*** Non-interest expense divided by net interest income plus non-interest income (excludes gain (loss) on sale and valuation adjustments of investment securities and non-recurring income, such as gains on the sale of real estate)

Table of Contents

Non-interest income for the quarter ended September 30, 2005 increased 21% compared with the same period in 2004, mostly associated with higher service charges on deposit accounts, other service fees, gain on sale of loans and trading account profits. Refer to the Non-Interest Income section of the Management's Discussion and Analysis (MD&A) for further explanations, including Table D for a breakdown of other service fees by major categories. Also, the Corporation recorded during the third quarter of 2005 unfavorable valuation adjustments on interest-only strips totaling \$10.7 million, related principally to interest-only strips retained on securitizations performed during the first half of 2005. Refer to Note 8 to the unaudited consolidated financial statements for further information on the securitization transactions and retained interests. These unfavorable adjustments were partially offset by higher gains on the sale of investment securities by \$9.8 million, primarily marketable equity securities.

Operating expenses increased 11% compared with the same period in 2004, principally in the categories of personnel costs, net occupancy, business promotion, equipment expenses, professional fees, and other general operating expenses. The increase included expenses associated with the operations acquired by the Corporation's banking subsidiary in the U.S. mainland, as well as costs incurred in support of business strategies and growth, promotional campaigns and the implementation of new systems, among other factors, as further described in the Operating Expenses section of this MD&A.

In August 2005, the Government of Puerto Rico approved a temporary, two-year additional tax of 2.5% for corporations, which increases the marginal tax rate from a 39% to 41.5%. The unfavorable impact of this additional tax in the third quarter of 2005, which considers the retroactive application to taxable income since January 1, 2005, was subsequently offset by the favorable effect of the higher tax rate on the measurement of recorded deferred tax assets and consequently, did not have a significant impact in the Corporation's results of operations for the period. Total ending loans at September 30, 2005 grew 6%, from December 31, 2004. The increase in loans was driven primarily by growth in commercial loans, including construction loans, and in the consumer and leasing portfolios as evidenced by data presented in Table E. The increases in these loan categories were partially offset by a decrease in mortgage loans which resulted from various off-balance sheet loan securitizations completed during the nine months ended September 30, 2005. For more detailed information on lending activities, refer to the Balance Sheet Comments section of this report. Contributing to the increase in loans from December 31, 2004 were the loans acquired from Kislak, which approximated \$0.6 billion immediately prior to the acquisition.

Asset growth from December 31, 2004 to September 30, 2005 was funded principally through deposits, which increased 10% from the end of 2004. The growth in deposits supported 73% of the increase in total assets from the end of 2004, while borrowings accounted for 27% of the assets increase. Kislak contributed approximately \$0.7 billion in deposits at its acquisition date, excluding purchase accounting entries. Borrowed funds at September 30, 2005 increased 4% from December 31, 2004, primarily associated with repurchase agreements. For more detailed information on borrowings and deposits refer to the Balance Sheet Comments section of this report. In the normal course of business, except for the Corporation's banks and the parent holding company, the Corporation has utilized a one-month lag in the consolidation of the financial results of its other subsidiaries (the non-banking subsidiaries), mainly to facilitate timely reporting. In 2005, the Corporation commenced a two-year plan to change the reporting period of its non-banking subsidiaries to a calendar period. The impact of this change in the net income was included as a cumulative effect of accounting change in the Corporation's consolidated financial results for the nine months ended September 30, 2005, and corresponds to the financial results for the month of December 2004 of those non-banking subsidiaries which implemented the change in the first reporting period of 2005.

Further discussion of operating results, financial condition and market / liquidity risks is presented in the narrative and tables included herein.

Popular, Inc. completed the acquisition of 100% of the issued and outstanding shares of common stock and common stock equivalents of E-LOAN, Inc. (E-LOAN), a California-based online consumer direct

Table of Contents

lender, for \$4.25 per share in cash, or approximately \$300 million. E-LOAN, which becomes a wholly-owned subsidiary of PFH, originated over \$5 billion in mortgage, home equity, and auto loans in 2004. Through this merger, Popular, Inc. further expands its presence in the mainland U.S. market, complements its existing non-prime and warehouse lending businesses, and significantly enhances its technology platform to support its growth strategy in which the internet plays an important role. This transaction became effective on November 1, 2005.

In September 2005, Popular, Inc. announced a definitive merger agreement to acquire the assets of Infinity Mortgage Corporation, based in New Jersey. The operations of Infinity Mortgage will become part of the mortgage business of Equity One, Inc., a subsidiary of PFH. The transaction, which is expected to be completed during the fourth quarter of 2005, will help increase Popular, Inc.'s market share in the U.S. as well as strengthen its existing mortgage and loan servicing businesses. Infinity Mortgage Corporation originated over \$220 million in mortgage loans during 2004 and operates in New Jersey, New York, Connecticut, Maryland, Massachusetts and Pennsylvania.

On September 21, 2005, Popular announced that ACE Cash Express, Inc. will acquire substantially all of the assets of Popular Cash Express, Inc. (PCE), our wholly-owned check cashing business in U.S., for \$36 million. The Corporation has been constrained in its ability to compete against non-bank owned check cashing operations, which are less regulated than banking institutions, but is committed to remain an active participant in the industry as a lender and servicer to other retail check cashing institutions, and will continue to collaborate with regulators and lawmakers to accelerate the integration of unbanked and underbanked individuals into mainstream financial services. The agreements signed by Popular and ACE do not require regulatory approval and are subject to customary closing terms and conditions. PCE had approximately \$62 million in total assets as of September 30, 2005, comprising principally cash, premises and equipment and goodwill. Total revenues for the nine months ended September 30, 2005 approximated \$19 million and pre-tax losses approximated \$4.3 million. The financial results of PCE are part of the United States Financial Services reportable segment in Note 16 Segment Reporting, included in the accompanying unaudited consolidated financial statements in this Form 10-Q. The transaction is expected to be completed during the fourth quarter of 2005. No significant gain or loss is expected on this sale transaction.

On January 18, 2005, the Corporation announced that it had been informed by the Antitrust Division of the U.S. Department of Justice that the Department of Justice was conducting an investigation concerning the participation by its subsidiary, GM Group, Inc. (which after a reorganization in 2004 became part of EVERTEC), in the E-rate program, which is administered by the Federal Communications Commission (FCC) and pays for telecommunications services and related equipment for schools and libraries. On October 13, 2005, the Corporation entered into a Settlement Agreement with the Department of Justice and the Federal Communications Commission in connection with this matter. Pursuant to the Settlement Agreement, EVERTEC, without admitting liability and denying any allegations of misconduct, agreed to make a \$4.8 million payment to the United States and agreed to voluntarily disqualify itself from bidding on or performing any work related to contracts funded by the Federal Communications Commission for a three year period. EVERTEC also agreed to cooperate with U.S. governmental authorities in any investigation or litigation related to its participation in the E-rate program. The Settlement Agreement did not have and is not expected to have an impact on the Corporation's third or fourth quarter results of operations or the Corporation's financial condition because the full amount of the settlement payment has been previously accrued and because EVERTEC is not engaged in work related to Federal Communications Commission contracts.

The shares of the Corporation's common and preferred stock are traded on the National Association of Securities Dealers Automated Quotation (NASDAQ) under the symbols BPOP and BPOPO, respectively.

Table of Contents**OTHER MATTERS****Transactions with Doral Financial Corporation**

Doral Announcements. Doral Financial Corporation (Doral) has announced that its previously filed financial statements for periods from January 1, 2000 through December 31, 2004 should no longer be relied on and that the financial statements for some or all of the periods included therein should be restated because of issues relating to the methodology used to calculate the fair value of its portfolio of floating rate interest-only strips (IOs). On September 22, 2005, Doral estimated that its consolidated stockholders' equity at December 31, 2004, would be reduced, on a pre-tax basis, by approximately \$615 million related to corrections to the valuation of its IOs. In addition, on October 25, 2005, Doral announced that it was investigating its mortgage loan sales to local financial institutions. Doral has also announced that the Securities and Exchange Commission is conducting a formal investigation, and that the U.S. Attorney's Office for the Southern District of New York is also conducting an investigation of these matters. Actions have been brought by or on behalf of securities holders of Doral in relation to these matters.

Estimates of Value Provided by Popular Securities. Between October 2002 and December 2004, Popular Securities, Inc., a wholly-owned subsidiary of the Corporation, provided quarterly estimates of the value of portfolios of IOs on behalf of Doral. In accordance with its understanding regarding the engagement, in providing those estimates of value, Popular Securities utilized assumptions provided by Doral that may not have been consistent with the actual terms of the IO portfolios. Doral's Form 10-K for the year ended December 31, 2004 stated that to determine the fair value of its IO portfolio, Doral engaged a party to provide an external valuation that consists of a cash flow valuation model in which all economic and portfolio assumptions are determined by the preparer. Popular Securities believes that this characterization is not appropriate if it was meant to apply to Popular Securities' work.

Transactions with Doral Relating to Mortgage Loans and IOs. Between 1996 and 2004, BPPR purchased approximately \$1.6 billion of mortgage loans from Doral. The remaining balance of these mortgage loans recorded on the Corporation's consolidated statement of condition at September 30, 2005 was \$570 million. In the first six months of 2000 the Corporation also sold \$200 million of mortgage loans to Doral Bank, a subsidiary of Doral. The Corporation recorded a gain of \$2.2 million in the first quarter of 2000 and of \$1.9 million in the second quarter of 2000 from the sales of mortgages to Doral Bank. The purchases and sales of loans were often accompanied by separate recourse and other financial arrangements. Between 1996 and 2004, the Corporation purchased \$110 million in IOs from Doral. The remaining balance of these IOs recorded on the Corporation's consolidated statement of condition at September 30, 2005 was \$42 million. These IOs have been reclassified from investments available-for-sale to loans to Doral because they are accompanied by 100% yield and principal guarantees from Doral and because of the source of the cash flow for payments on the IOs. See Note 3 to the Corporation's financial statements for the quarter ended September 30, 2005. The Corporation has concluded that its previously filed financial statements are fairly stated and that no restatement is necessary.

Transactions with R&G Financial Corporation

R&G Announcements. R&G Financial Corporation (R&G) has announced that its previously filed financial statements for periods from January 1, 2002 through December 31, 2004 need to be restated and should no longer be relied upon because of issues relating to the methodology used in valuing its portfolio of residual interests retained in securitization transactions. R&G has announced that the Securities and Exchange Commission is conducting a

Table of Contents

formal investigation of this matter. Actions have been brought by or on behalf of securities holders of R&G in relation to these matters.

Purchases of Mortgage Loans from R&G. Between 2003 and 2004, BPPR entered into various mortgage purchase transactions with R&G in the amount of \$176 million. These purchase transactions had recourse provisions and other financial arrangements. At September 30, 2005, the remaining balance of the mortgage loans purchased from R&G recorded on the Corporation's consolidated statement of condition was \$136 million. The Corporation has concluded that its previously filed financial statements are fairly stated and that no restatement is necessary.

Cooperation with Investigations; Possible Consequences

The Corporation and its employees have provided information in connection with certain of the above-mentioned investigations by the Securities and Exchange Commission and the U.S. Attorney's Office for the Southern District of New York and are continuing to cooperate in connection with the investigations of these matters. The Corporation is unable to predict what adverse consequences, if any, or other effects the Corporation's dealings with Doral or R&G, the civil litigation related to Doral or R&G matters or the related investigations could have on the Corporation or BPPR.

Table of Contents**CRITICAL ACCOUNTING POLICIES**

The accounting and reporting policies followed by the Corporation and its subsidiaries conform to generally accepted accounting principles in the United States and general practices within the financial services industry. These policies require management to make estimates and assumptions which involve significant judgment about the effect of matters that are inherently uncertain and that involve a high degree of subjectivity. These estimates are made under facts and circumstances at a point in time and changes in those facts and circumstances could produce actual results that differ from those estimates.

Various elements of the Corporation's accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. As described in Popular, Inc.'s 2004 Financial Review and Supplementary Information to Stockholders, incorporated by reference in Popular, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2004 (the "2004 Annual Report"), the Corporation has identified as critical accounting policies those related to securities classification and related values, loans and allowance for loan losses, income taxes, goodwill and other intangible assets, and pension and postretirement benefit obligations. The determination and evaluation of these critical accounting policies has been discussed with the Corporation's Audit Committee. For a summary of the Corporation's critical accounting policies, refer to that particular section in the MD&A included in Popular, Inc.'s 2004 Annual Report. Also, refer to Note 1 to the consolidated financial statements included in the 2004 Annual Report for a summary of the Corporation's significant accounting policies.

NET INTEREST INCOME

Table B and C present the different components of the Corporation's net interest income, on a taxable equivalent basis, for the quarter and nine months ended September 30, 2005, as compared with the same periods in 2004, segregated by major categories of interest earning assets and interest bearing liabilities. A portion of the Corporation's interest earning assets, mostly investments in obligations of the U.S. Government and its agencies and the Puerto Rico Commonwealth and its agencies, generate interest which is exempt from income tax, principally in Puerto Rico. Also, the taxable equivalent adjustment includes interest earned on earning assets held by the Corporation's international banking entities, which are tax-exempt under Puerto Rico law. To facilitate the comparison of all interest data related to these assets, the interest income has been converted to a taxable equivalent basis, using the applicable statutory income tax rates. The statutory income tax rate in Puerto Rico was 39% for the quarter and nine-months ended September 30, 2004. In the third quarter of 2005, the Government of Puerto Rico approved a temporary, two-year additional tax of 2.5% for corporations, which increased the marginal tax rate from a 39% to 41.5%. The impact of the additional tax, including the retroactive amounts corresponding to the first semester of 2005, was included in the Corporation's results of operations in the third quarter of 2005. The taxable equivalent adjustment includes the favorable impact to the Corporation of tax exempt income associated to this change, which was not deemed significant for additional disclosures. The taxable equivalent computation considers the interest expense disallowance required by Puerto Rico tax law, also affected by the mentioned increase in tax rate. The statutory income tax rate considered for the Corporation's U.S. operations was approximately 35%.

Average outstanding securities balances are based upon amortized cost excluding any unrealized gains or losses on securities available-for-sale. Non-accrual loans have been included in the respective average loans and leases categories. Loan fees collected and costs incurred in the origination of loans are deferred and amortized using the interest method over the term of the loan as an adjustment to interest yield. Interest income for the quarter and nine months ended September 30, 2005, included unfavorable impacts of \$14.4 million and \$28.6 million, respectively, consisting principally of amortization of net loan origination costs (net of fees), amortization of net premiums on loans purchased, and prepayment penalties and late payment charges. These amounts approximated \$13.3 million and \$24.4 million, respectively, for the quarter and nine months ended September 30, 2004.

Table of Contents

Table B shows the analysis of levels and yields on a taxable equivalent basis for the quarter ended September 30, 2005 compared with the same period in 2004.

Note: The changes that are not due solely to volume or rate are allocated to volume and rate based on the proportion of the change in each category.

The favorable impact on interest income resulting from the increase in average earning assets for the quarter ended September 30, 2005, compared with the third quarter of 2004, was principally due to the 14% increase in the average loan portfolio. Commercial loans contributed 69% of the total increase in average loans, while consumer and mortgage loans contributed 17% and 9%, respectively. This growth includes the impact of the acquisitions of Kislak and Quaker City which had approximately \$0.4 billion and \$1.1 billion, respectively, in ending commercial (including construction) loans immediately prior to the acquisitions. A substantial portion of the loan portfolios of these acquired institutions, consisted primarily of commercial real estate secured loans. Loan growth continues to be attained due to stronger sales efforts, promotional campaigns, business initiatives, and acquired mortgage loan portfolios in the U.S. mainland. Also, contributing to the increase in interest income

Table of Contents

was the rise in the average volume of investment securities, mainly in the form of U.S. Government agencies, in part due to the portfolios of the acquired banking institutions.

The increase in the volume of earning assets was funded mainly through a combination of interest bearing deposits and short and long-term borrowings. The average balance of interest bearing deposits rose due to the impact of the acquisitions of Kislak and Quaker City and to successful marketing campaigns and sales efforts directed to money market accounts and certificates of deposit, principally in the U.S. mainland. Also, during the second half of 2004, the Corporation issued long-term debt, including medium-term notes, junior subordinated debentures (trust preferred securities) and secured borrowings, to fund the acquisitions and growth in the balance sheet.

The decrease in the net interest margin on a taxable equivalent basis for the quarter ended September 30, 2005, compared with the same quarter in 2004, was mainly due to an increase in the average cost of interest bearing liabilities, principally due to an increase in the cost of short-term borrowings reflecting the upward trend that resulted from revisions in interest rates by the Federal Reserve (FED) commencing in June 2004. During the nine months ended September 30, 2005, the FED increased the federal funds target rate an additional 150 basis points, which together with increases experienced in 2004, brought the federal funds target rate from 1.25% in June 2004 to 3.75% in September 2005. Also, there was an increase in the cost of long-term debt principally resulting from secured debt derived from mortgage loan securitization transactions. Furthermore, the increase in average deposits has been substantially in time deposits, a higher-cost category, combined with the impact of higher costs in savings accounts to sustain marketing campaigns and intense competition.

The average yield on earning assets, on a taxable equivalent basis, for the quarter ended September 30, 2005, increased compared with the same quarter in the previous year, mostly related to higher yields in commercial loans which continue being favorably impacted by rising interest rates due to a high proportion of commercial loans with floating rates. Also, there was an increase in yields in investment securities, partly due to new investments in higher yielding securities and a favorable change in the taxable equivalent adjustment, principally related with the consideration of a higher average volume of securities and the impact of the aforementioned increase in the statutory tax rate in Puerto Rico. These favorable variances were partially offset by lower yields in mortgage loans due to lower long term rates which have an impact in new volumes. Also, the yield on consumer loans was lower mainly due to the implementation of risk-based pricing strategies and promotional campaigns. The yield in the lease financing portfolio was also adversely impacted by the interest rate scenario and promotional campaigns.

As shown in Table C, for the nine-month period ended September 30, 2005, net interest income, on a taxable equivalent basis, increased by 5%, compared with the same period of 2004. This improvement was also the result of higher average volume of earning assets, partially offset by the impact of a lower net interest margin.

Average earning assets for the nine-month period ended September 30, 2005, increased by 17%, compared with the same period of 2004, primarily associated with higher average volume of loans and investment securities. The increase was funded through a combination of short and long-term debt and growth in deposits. The compression in the net interest margin for the nine months ended September 30, 2005, shown in Table C was also attributed to the factors previously described in this section for the quarterly results and in the Overview section of this MD&A. Following the guidance in EITF Issue No. 03-11, Reporting Realized Gains and Losses on Derivative Instruments that are Subject to FASB Statement No. 133 and Not Held for Trading Purposes as Defined in Issue No. 02-3, and from the meetings held by the AICPA SEC Regulations Committee on September 16, 2003 and the AICPA Insurance Expert Panel, the Corporation included as part of interest expense, approximately \$484 thousand and \$513 thousand in derivative gains, for the quarter and nine months ended September 30, 2005, respectively. For the quarter and nine months ended September 30, 2004, the Corporation included approximately \$10 thousand and \$124 thousand in derivative losses, respectively. These net derivative gains and losses represent unrealized gains and losses on derivatives not designated as hedges, but that were considered economic hedges. EITF 03-11 requires that both realized and unrealized results of such economic hedges be shown within the same financial statement caption.

Note: The changes that are not due solely to volume or rate are allocated to volume and rate based on the proportion of the change in each category.

NON-INTEREST INCOME

Refer to the unaudited consolidated statements of income included in this Form 10-Q for a breakdown of non-interest income by major categories.

Service charges on deposit accounts for the third quarter of 2005 increased by 13% compared with the same quarter of 2004, principally associated with the banking operations acquired and deposit marketing initiatives in the U.S. mainland. Also, the increase was due to higher service charges related with Automated Clearing House (ACH) electronic transactions in Puerto Rico, principally from an increase in the

Table of Contents

volume of electronic transactions and also from revisions in the pricing structure. These favorable variances were partially offset by lower account analysis fees on commercial accounts mainly due to a higher earnings credit to customers due to higher interest rates in the current quarter.

Refer to Table D for a breakdown of other service fees by major categories. Other service fees for the quarter ended September 30, 2005 increased 20% when compared with the same quarter in the previous year. This growth was mostly associated with increased credit card fees, primarily due to higher merchant business income resulting from increased sales, higher interchange income as a result of increased transactional volume, and higher credit card late payment fees derived from higher volume and a price change. Also, the increase in other service fees was related to revenues derived from the mortgage banking business, principally related to services provided to loan brokers in the origination of mortgage loans for other institutions, such as for underwriting efforts; and higher prepayment penalty income on loans serviced by the Corporation in the mainland U.S. There were also higher fees from the Corporation's insurance business in Puerto Rico due in part to increased volume in credit life, dwelling and title and the reinsurance business, among factors. The increase in fees on the sale and administration of investment products included higher commissions from retail broker transactions, including mutual fund sales, and higher commissions from Popular Securities New York office opened in the second quarter of 2004. Another category which contributed to the increase in fees was that related to processing services, principally as a result of increased transactional volume. The increase in other fees was partly related with SBA loan servicing fees, loan syndication fees and standby letters of credit related fees, among other diverse items.

TABLE D**Other Service Fees**

(In thousands)	Quarter ended September 30,			Nine months ended September 30,		
	2005	2004	Variance	2005	2004	Variance
Other service fees:						
Credit card fees and discounts	\$21,111	\$17,011	\$ 4,100	\$ 59,694	\$ 51,656	\$ 8,038
Debit card fees	12,832	12,365	467	39,047	38,020	1,027
Insurance fees	12,986	10,705	2,281	37,420	28,589	8,831
Processing fees	11,311	9,550	1,761	31,888	30,521	1,367
Sale and administration of investment products	7,138	5,158	1,980	21,105	16,728	4,377
Check cashing fees	4,372	4,636	(264)	14,841	16,770	(1,929)
Mortgage banking and servicing fees, net of amortization	4,591	1,984	2,607	11,126	7,364	3,762
Trust fees	2,135	2,268	(133)	6,268	6,816	(548)
Other fees	8,528	7,386	1,142	26,471	22,012	4,459
Total other service fees	\$85,004	\$71,063	\$13,941	\$247,860	\$218,476	\$29,384

For the nine-month period ended September 30, 2005, non-interest income increased 27% compared with the nine-month period ended September 30, 2004. As shown in the unaudited consolidated statements of income included in this Form 10-Q, the increase in non-interest income was mostly associated with higher net gains on the sale and valuation adjustments of investment securities. Gains on the sale of investment securities increased by \$37.5 million, mainly from the sale of marketable equity securities, offset by the unfavorable valuation adjustments of interest-only strips by PFH discussed in the Overview section and Note 8 to the unaudited consolidated financial statements.

Non-interest income for the first nine months of 2005 was also favorably impacted by higher trading account profits derived principally from mortgage banking activities. Also, approximately \$16 million of the trading account profits

for the period were derived from the pooling of \$552 million in mortgage loans and the sale of the mortgage-backed securities in June 2005. Also, as noted in Table D, other service fees made a substantial contribution to the growth in non-interest income for the nine-months period ended September 30, 2005, mostly impacted by the same factors described for the quarterly results. The decrease in check cashing fees was due in part to lower volume resulting from a lesser number of retail outlets of Popular Cash Express due to the sale or closure of several of these outlets during 2004, price competition and lower wire transfer revenues

Table of Contents

due to stricter requirements imposed on customers by certain state laws. Service charges on deposit accounts increased 10% for the nine months ended September 30, 2005, compared with the same period in the previous year due to the acquired operations and other factors already mentioned, and higher consumer accounts non-sufficient funds fees. Furthermore, gains on sale of loans contributed to the growth in non-interest income for the period with a rise of \$12.5 million, principally resulting from mortgage loans securitizations at PFH.

OPERATING EXPENSES

Refer to the unaudited consolidated statements of income included in this Form 10-Q for a breakdown of operating expenses by major categories.

Operating expenses for the quarter ended September 30, 2005 increased 11% compared with the same period in 2004. Personnel costs rose by \$12.0 million, or 8%, and accounted for 38% of the increase in operating expenses. This increase resulted mostly from higher salaries and related taxes, due in part to merit increases and higher headcount, including the acquired operations in the U.S. mainland, growth in PFH, and reinforcement of the retail network in Puerto Rico. Full-time equivalent employees were 12,685 at September 30, 2005, an increase of 683 employees from the same date in 2004. Incentive compensation and other performance bonuses for the quarter ended September 30, 2005 decreased in general compared with the same quarter in the previous year. All other operating expenses for the quarter ended September 30, 2005, excluding personnel costs, increased 13% compared with the same quarter in 2004. Contributing to this increase were higher net occupancy expenses related in part with the U.S. mainland acquisitions and business growth. Also, there were higher business promotion expenses as a result of sales efforts in the U.S. banking operations directed to deposit gathering campaigns, the New York Mets sponsorship, and promotional campaigns for the ATH network in Puerto Rico. Other increases in operating expenses included higher equipment expenses resulting in part from the operations of the banks acquired in the U.S. mainland and the implementation of new application systems and costs to support business initiatives, and higher professional fees, which rose in part due to higher support fees for system conversions, including consulting and computer services, and legal expenses. Other operating expenses increased due to higher credit and debit cards interchange expenses, costs of the reinsurance business, as well as other diverse items.

For the nine-month period ended September 30, 2005, operating expenses increased 12% compared with the same period in 2004. Categories with the major variances included personnel costs, business promotion, professional fees, net occupancy, equipment and other operating expenses. Most of the variances were associated with the same factors previously described for the quarterly results. Personnel costs for the nine months ended September 30, 2004 included \$2.4 million in early-retirement window costs and net curtailment gains recorded in the first quarter of that year, which were associated with the realignment of the Corporation's processing and technology operations. Besides the aforementioned reasons for the unfavorable variance in costs, professional fees also rose in part due to higher collection and other credit related costs to support the lending business. Other operating expenses also increased due to higher insurance business related costs incurred in 2005 due to growth, traveling expenses and costs related with foreclosed properties derived from the lending business.

INCOME TAX

Income tax expense for the quarter ended September 30, 2005 decreased 13% compared with the same quarter of 2004. The decrease was primarily due to lower income before tax and to an increase in exempt interest income, net of the disallowance of expenses attributed to such exempt income. Also, during the third quarter of 2005, the proportion of the Corporation's income derived from the mainland U.S., which is subject to a higher income tax rate, was lower than in the same quarter in 2004. The decrease in the income tax expense was partially offset by the unfavorable impact of \$5.9 million resulting from the change in the Puerto Rico statutory income tax rate from 39% to 41.5% in the third quarter of 2005 (adjusted retroactively to January 1, 2005 as required by law), net of the income tax benefit of \$3.1 million which results from adjusting the deferred tax asset to reflect the increase in rate. The effective tax rate for the quarter ended September 30, 2005 was 19.87%, compared with 22.18% in the same quarter in the previous year.

Table of Contents

Income tax expense for the nine-month period ended September 30, 2005 increased 7% compared with the same period in 2004. This rise was primarily due to higher pretax earnings and by the aforementioned change in the statutory tax rate, partially offset by an increase in exempt interest income, net of disallowance of expenses attributed to such exempt income, and by the recognition of an income tax benefit due to the increase in the deferred tax asset as a consequence of the change in tax rate. Also, there was an increase in income subject to a lower preferential tax rate when compared with the same nine-month period in the previous year. The capital gains realized during 2005 were subject to the transitory provisions effective until June 30, 2005 that reduced the preferential tax rate from 12.5% to 6.25%. The effective tax rate for the first nine months of 2005 was 21.65%, compared with 22.46% in 2004.

BALANCE SHEET COMMENTS

Refer to the consolidated financial statements included in this report for the Corporation's consolidated statements of condition as of September 30, 2005, December 31, 2004 and September 30, 2004. Earning assets at September 30, 2005 totaled \$43.9 billion, an increase of \$2.1 billion, or 5%, from December 31, 2004. At September 30, 2004, earning assets totaled \$40.3 billion.

A breakdown of the Corporation's loan portfolio is presented in Table E.

TABLE E**Loans Ending Balances**

(In thousands)	September 30, 2005	December 31, 2004	Variance	September 30, 2004	Variance
			September 30, 2005 vs. December 31, 2004		September 30, 2005 vs. September 30, 2004

Total	\$30,550,083	\$28,742,261	\$ 1,807,822	\$27,517,298	3,032,785

* Includes loans held-for-sale

The commercial and construction loan portfolio at September 30, 2005 increased 13% from December 31, 2004, which included the impact of the commercial loans acquired from Kislak, primarily loans secured by real estate. This commercial and construction portfolio growth was also associated with business initiatives and stronger sales efforts. Moreover, the consumer loan portfolio, which breakdown is provided in Table F, increased 11%, compared with December 31, 2004. The growth in this portfolio was mostly reflected in personal and auto loans and is the result of aggressive marketing campaigns, attractive loan rates and portfolio acquisitions.

TABLE F**Breakdown of Consumer Loans**

	Variance	Variance
	September 30, 2005	September 30, 2005

Edgar Filing: POPULAR INC - Form 10-Q

(In thousands)	September 30, 2005	December 31, 2004	vs. December 31, 2004	September 30, 2004	vs. September 30, 2004

Auto	1,392,582	1,244,164	148,418	1,212,946	179,636
Credit cards	913,972	826,961	87,011	793,745	120,227
Other	150,794	150,505	289	153,359	(2,565)
Total	\$4,482,790	\$4,038,579	\$ 444,211	\$3,951,952	\$530,838

The lease financing portfolio at September 30, 2005 increased 13% from December 31, 2004, principally from sales efforts and from the portfolio acquired from Kislak.

Table of Contents

At September 30, 2005, the mortgage loan portfolio (including loans held-for-sale) declined 1% from December 31, 2004. This decline was associated with the sale of approximately \$1.7 billion in residential mortgage loans as part of four off-balance sheet securitizations completed by PFH during the nine-month period ended September 30, 2005. This reduction was principally compensated by a greater volume of purchased mortgage loans by PFH. During the nine-months ended September 30, 2005, PFH also completed two securitization transactions involving approximately \$1.2 billion in purchased mortgage loans, which were accounted for as on-balance sheet securitizations, as such the loans remained in the Corporation's statement of condition. Refer to Note 8 to the unaudited consolidated financial statements for further information on the securitization transactions performed in 2005.

As reflected in the consolidated statements of condition, loans held-for-sale at September 30, 2005 increased \$116 million from the end of 2004. These loans represent primarily mortgage loans that have been originated and are pending securitization or sale in the secondary market. At September 30, 2005, loans held-for-sale consisted primarily of conforming loans for which aggregate fair value exceeded their cost.

Variances in loan categories from September 30, 2004 to the same date in 2005 were also related to the same factors described above.

At September 30, 2005, investment securities, including trading securities, totaled \$12.7 billion, compared with \$12.2 billion at December 31, 2004 and \$12.0 billion at September 30, 2004. Refer to notes 3 and 4 to the unaudited consolidated financial statements for a breakdown of the Corporation's available-for-sale and held-to-maturity investment portfolios. The increase in the investment portfolio from December 31, 2004 was principally due to the reinvestment of funds derived from the mortgage loans pooling and sale transaction by BPPR in the second quarter of 2005 (approximately \$552 million in loans), into securities from the U.S. Government and its Agencies, some of which are tax-exempt in Puerto Rico, and from Kislak's investment securities portfolio.

Premises and equipment at September 30, 2005 increased \$47 million from December 31, 2004 and \$57 million from September 30, 2004. The increase was mostly associated with buildings under construction for business expansion and relocations and land acquisitions for future branch sites, primarily in Puerto Rico. During the nine-month period ended September 30, 2005, the Corporation capitalized approximately \$0.6 million in interest costs associated with major building projects under construction that are intended principally for the Corporation's own use.

Goodwill and other intangible assets at September 30, 2005 increased \$118 million from December 31, 2004, primarily associated with the acquisition of Kislak. Note 7 to the consolidated financial statements provide additional information on goodwill and the composition of other intangible assets. As further described in the MD&A included in the 2004 Annual Report, the increase since September 30, 2004 was also associated with the acquisition of Quaker City.

Table of Contents

Table G presents the categories with the most significant variances within the Other Assets caption included in the consolidated statements of condition.

TABLE G**Breakdown of Other Assets**

(In thousands)	September 30, 2005	December 31, 2004	Variance September 30, 2005 vs. December 31, 2004	September 30, 2004	Variance
					September 30, 2005
Net deferred tax assets	\$ 284,075	\$ 231,892	\$ 52,183	\$ 233,156	\$ 50,919
Securitization advances and related assets	247,565	240,304	7,261	186,360	61,205
Bank-owned life insurance program	195,119	155,527	39,592	104,473	90,646
Prepaid expenses	156,950	120,577	36,373	115,252	41,698
Investments under the equity method	62,682	56,996	5,686	54,041	8,641
Derivative assets	39,354	24,554	14,800	12,135	27,219
Servicing rights	121,752	57,183	64,569	60,854	60,898
Others	169,079	159,341	9,738	179,937	(10,858)
Total	\$ 1,276,576	\$ 1,046,374	\$ 230,202	\$ 946,208	\$ 330,368

The increase in the net deferred tax assets from December 31, 2004 and September 30, 2004 to September 30, 2005 was primarily the result of the net unrealized loss position of the portfolio of available-for-sale securities at the end of the third quarter of 2005, compared with net unrealized gains in the periods presented for 2004. Securitization advances and related assets at September 30, 2005 increased compared with September 30, 2004 and December 31, 2004 principally as a result of on-balance sheet securitizations completed in the fourth quarter of 2004 and the first nine months of 2005. The advances represent payments received on loans held-in-trust available to pay down security holders under scheduled terms specified in the agreements. The increase in bank-owned life insurance since September 30, 2004 and December 31, 2004 was related to additional funding permitted as a result of an increased salary base resulting from the acquired institutions. The increase in prepaid expenses at September 30, 2005 compared with both periods in 2004 was primarily related to software packages supporting new branch network and other specialized systems. The increase in derivative assets since September 30, 2004 was mostly related to additional volume of interest rate swaps used to hedge the exposure to changes in the fair value of certain loans, investments and deposits, due to movements in the benchmark interest rate index and to the impact of indexed options used to economically hedge the risk associated with certificates of deposit, which returns are tied to a stock market index. The rise in servicing rights from December 31, 2004 and September 30, 2004 was principally associated with the servicing rights derived from the securitizations performed by PFH during 2005, as further described in note 8 to the unaudited consolidated financial statements.

Asset growth from December 31, 2004 to September 30, 2005 was funded principally through deposits. Refer to the Liquidity section of this Form 10-Q for a table with the composition of the Corporation's financing to total assets at September 30, 2005 and December 31, 2004.

Table H provides a breakdown of the Corporation's deposits by categories. Included within time deposits, at September 30, 2005, were brokered certificates of deposit amounting to \$1.3 billion, compared with \$559 million at

December 31, 2004 and \$643 million at September 30, 2004.

TABLE H**Deposits ending balances**

(In thousands)	September 30,	December 31,	Variance September 30, 2005 vs. December 31, 2004	September 30,	Variance September 30, 2005 vs. September 30, 2004
	2005	2004		2004	
Demand deposits	\$ 4,182,281	\$ 4,173,267	\$ 9,014	\$ 4,076,534	\$ 105,747
Savings deposits	8,944,495	8,865,832	78,663	8,660,080	284,415
Time deposits	9,451,933	7,554,061	1,897,872	7,746,604	1,705,329
Total	\$22,578,709	\$20,593,160	\$ 1,985,549	\$20,483,218	\$ 2,095,491

Table of Contents

At September 30, 2005, borrowed funds reached \$20.6 billion, compared with \$19.9 billion at December 31, 2004 and \$18.7 billion at September 30, 2004. The increase in borrowings since December 31, 2004 was mostly comprised of repurchase agreements. The rise from September 30, 2004 to the same date in 2005 included higher balances of repurchase agreements, federal funds purchased, debt issuance in the form of junior subordinated debentures (trust preferred securities), and secured borrowings from on-balance sheet securitizations.

The Federal Home Loan Banks provide funding to the Corporation's banking subsidiaries through advances. At September 30, 2005, Popular's short-term and long-term borrowings under these credit facilities totaled \$1.8 billion, compared with \$0.7 billion at September 30, 2004, and \$1.9 billion at December 31, 2004. Such advances are collateralized by investment securities and mortgages loans, do not have restrictive covenants and do not have any callable features.

Refer to the unaudited consolidated statements of condition and of stockholders' equity included in this Form 10-Q for information on the composition of stockholders' equity at September 30, 2005, December 31, 2004 and September 30, 2004. Also, the disclosures of accumulated other comprehensive (loss) income, an integral component of stockholders' equity, are included in the unaudited consolidated statements of comprehensive (loss) income. Other comprehensive (loss) income includes the Corporation's unrealized gain (loss) position on securities available-for-sale and the cumulative foreign currency translation adjustment at the end of each reporting period. The increase in stockholders' equity from December 31, 2004 and September 30, 2004 to September 30, 2005 was due to earnings retention, partially offset by an unfavorable change in the fair value of securities classified as available-for-sale. This change in the valuation of the securities when compared with December 31, 2004 was mostly due to unfavorable market interest rate fluctuations impacting the Corporation's U.S. Agency securities and to the marketable equity securities sold by the Corporation in the first quarter of 2005. The Corporation's market capitalization at September 30, 2005 was \$6.5 billion, compared with \$7.0 billion at September 30, 2004 and \$7.7 billion at December 31, 2004.

The Corporation offers a dividend reinvestment and stock purchase plan for its stockholders that allows them to reinvest their quarterly dividends in shares of common stock at a 5% discount from the average market price at the time of the issuance, as well as purchase shares of common stock directly from the Corporation by making optional cash payments at prevailing market rates.

The Corporation continues to exceed the well-capitalized guidelines under the federal banking regulations. Ratios and amounts of total risk-based capital, Tier 1 risk-based capital and Tier 1 leverage as of September 30, 2005 and 2004, and December 31, 2004 are presented on Table I. The reduction in the capital ratios since December 31, 2004 was associated with the assets acquired and the goodwill and other intangible assets recorded as a result of the Kislak acquisition, and general business growth. At September 30, 2005, December 31, 2004 and September 30, 2004, BPPR, BPNA and Banco Popular, National Association were all well-capitalized.

Table of Contents**TABLE I**
Capital Adequacy Data

(Dollars in thousands)	September 30, 2005	December 31, 2004	September 30, 2004

Leverage ratio *	7.71%	7.78%	7.12%

* All banks are required to have a minimum Tier I leverage ratio of 3% or 4% of adjusted quarterly average assets, depending on the bank's classification.

At September 30, 2005, the capital adequacy minimum requirement for Popular, Inc. was: Total Capital of \$2,453,750, Tier I Capital of

\$1,226,875, and
a Tier I
Leverage of
\$1,360,427
based on a 3%
ratio or
\$1,813,902
based on a 4%
ratio according
to the Bank's
classification.

OFF-BALANCE SHEET ACTIVITIES

The off-balance sheet securitizations conducted prior to 2001 and in 2005, the latter previously described in Note 8 to the unaudited consolidated financial statements, involved the transfer of mortgage loans to a qualifying special purpose entity (QSPE), which in turn transferred these assets, to different trusts, thus isolating those loans from the Corporation's assets. These transactions qualified for sale accounting and as such, these trusts are not consolidated in the Corporation's financial statements. The investors and the securitization trusts have no recourse to any of the Corporation's assets or revenues. The Corporation's creditors have no recourse to any assets or revenues of the special purpose entity, or the securitization trust funds. At September 30, 2005, these trusts held approximately \$1.7 billion in assets in the form of mortgage loans. Their liabilities in the form of principal due to investors approximated \$1.7 billion at the end of the third quarter of 2005. In connection with the securitizations accounted for as sales, the Corporation's retained interests are subordinated to investors' interests. Their value is subject to credit, prepayment and interest rate risks on the transferred financial assets.

CREDIT RISK MANAGEMENT AND LOAN QUALITY

NON-PERFORMING ASSETS

Non-performing assets consist of past-due loans that are no longer accruing interest, renegotiated loans and real estate property acquired through foreclosure. For a summary of the Corporation's policy in placing loans on non-accrual status, refer to the sections of Loans and Allowance for Loan Losses included in Note 1 to the audited consolidated financial statements included in Popular, Inc.'s 2004 Annual Report.

Table of Contents

A summary of non-performing assets by loan categories and related ratios is presented in Table J.

TABLE J**Non-Performing Assets**

	September 30, 2005	December 31, 2004	Variance September 30, 2005 vs. December 31, 2004	September 30, 2004	Variance September 30, 2005 vs. September 30, 2004
(Dollars in thousands)					
Commercial and construction	\$ 140,093	\$ 122,593	\$ 17,500	\$ 133,612	\$ 6,481
Lease financing	3,252	3,665	(413)	6,377	(3,125)
Mortgage	373,126	395,749	(22,623)	386,520	(13,394)
Consumer	35,479	32,010	3,469	37,762	(2,283)
Total non-performing loans	551,950	554,017	(2,067)	564,271	(12,321)
Other real estate	77,993	59,717	18,276	58,814	19,179
Total non-performing assets	\$ 629,943	\$ 613,734	\$ 16,209	\$ 623,085	\$ 6,858
Accruing loans past-due 90 days or more	\$ 80,401	\$ 79,091	\$ 1,310	\$ 71,024	\$ 9,377
Non-performing assets to total loans held-in-portfolio	2.12%	2.19%		2.29%	
Non-performing assets to total assets	1.34	1.38		1.45	

Non-performing commercial and construction loans represented 1.14% of that loan portfolio at September 30, 2005, compared with 1.28% at September 30, 2004, and 1.13% at December 31, 2004. The decline in that credit quality ratio since September 30, 2004 was mainly related to portfolio growth, principally due to the acquisition of Kislak's portfolio which had low levels of non-performing loans.

Non-performing financing leases represented 0.25% of the lease financing portfolio at September 30, 2005, compared with 0.55% at September 30, 2004, and 0.31% at December 31, 2004. The decline in non-performing leases from September 30, 2004 was the result of lower delinquency levels associated principally to the small ticket equipment leasing operations of the U.S. portfolio.

Non-performing mortgage loans represented 59% of total non-performing assets and 3.21% of mortgage loans held-in-portfolio at September 30, 2005, compared with 62% of total non-performing assets and 3.30% of mortgage loans held-in-portfolio at September 30, 2004. Non-performing mortgage loans represented 64% of total non-performing assets and 3.33% of mortgage loans held-in-portfolio at December 31, 2004. The decrease in non-performing mortgage loans since September 30, 2004 was mainly reflected at PFH where non-performing mortgage loans represented 3.93% of its mortgage loans held-in-portfolio at September 30, 2005, compared with 3.96% at December 31, 2004 and 3.85% at September 30, 2004. Historically, the Corporation has experienced a low level of losses in its mortgage portfolio.

Non-performing consumer loans were 0.79% of consumer loans at September 30, 2005, compared with 0.96% at September 30, 2004 and 0.79% at December 31, 2004. The decline in the non-performing consumer loans to

consumer loans ratio from September 30, 2004 was mainly due to portfolio growth, combined with better credit quality mix and improved delinquency levels.

In addition to the non-performing loans discussed earlier, there were \$51 million of loans at September 30, 2005, which in management's opinion are currently subject to potential future classification as non-performing, and are considered impaired under SFAS No. 114. At December 31, 2004 and September 30, 2004, these potential problem loans approximated \$32 million and \$31 million, respectively. The increase reflected in the third quarter of 2005 was mainly related to the commercial portfolio in the Puerto Rico operations.

Other real estate assets represented 12% of non-performing assets at September 30, 2005, compared with 9% at September 30, 2004, and 10% at December 31, 2004. The increase in other real estate assets since September 30, 2004 was associated with higher foreclosures in the mortgage business resulting from more dynamic foreclosure procedures.

Table of Contents

The impact of Hurricanes Katrina and Rita on the Corporation's U.S. operations is not considered significant. Under the standard industry practice, closed-end consumer loans are not customarily placed on non-accrual status prior to being charged-off. Excluding the closed-end consumer loans from non-accruing at September 30, 2005, adjusted non-performing assets would have been \$594 million or 2.00% of loans held-in-portfolio and the allowance to non-performing loans ratio would have been 88.95%. At December 31, 2004, adjusted non-performing assets would have been \$582 million or 2.08% of loans held-in-portfolio and the allowance to non-performing loans ratio would have been 83.73%. At September 30, 2004, adjusted non-performing assets would have been \$585 million or 2.15% of loans held-in-portfolio and the allowance to non-performing loans would have been 84.68%.

ALLOWANCE FOR LOAN LOSSES

In evaluating the adequacy of the allowance for loan losses, the Corporation's management considers current economic conditions, loan portfolio risk characteristics, prior loss experience, results of periodic credit reviews of individual loans, regulatory requirements and loan impairment measurement, among other factors. The methodology used to establish the allowance for loan losses is based on SFAS No. 114, Accounting by Creditors for Impairment of a Loan, and SFAS No. 5, Accounting for Contingencies. Under SFAS No. 114, certain commercial loans are identified for evaluation on an individual basis, and specific reserves are calculated based on impairment analyses. SFAS No. 5 provides for the recognition of a loss allowance for a group of homogeneous loans when it is probable that a loss has been incurred and the amount can be reasonably estimated. As of September 30, 2005, there have been no significant changes in evaluation methods or assumptions from December 31, 2004 that have an effect on the Corporation's methodology for assessing the adequacy of the allowance for loan losses.

Table K summarizes the movement in the allowance for loan losses and presents several loan loss statistics for the quarters and nine months ended September 30, 2005 and 2004. The ratio of allowance for loan losses to loans held-in-portfolio at September 30, 2005 when compared with September 30, 2004, reflects improvement in credit quality trends and a shift in the loan portfolio mix to include a greater proportion of real estate secured loans, which includes the portfolio from Kislak. At December 31, 2004, the allowance for loan losses amounted to \$437 million or 1.56% of loans held-in-portfolio, and the allowance for loan losses as a percentage of non-performing loans was 78.89%. The corresponding ratios as of September 30, 2004 and 2005 are shown in Table K. The Corporation's management considers the allowance for loan losses to be at a level sufficient to provide for estimated losses based on current economic conditions, the expected level of net loan losses and the methodology established to evaluate the adequacy of the allowance for loan losses.

The Corporation considers a loan to be impaired when interest and/or principal are past due 90 days or more, or, when based on current information and events, it is probable that the debtor will be unable to pay all amounts due according to the contractual terms of the loan agreement. An allowance for loan impairment is recognized to the extent that the carrying value of an impaired loan exceeds the present value of the expected future cash flows discounted at the loan's effective rate, the observable market price of the loan, or the fair value of the collateral if the loan is collateral dependent. The allowance for impaired loans is part of the Corporation's overall allowance for loan losses. Large groups of smaller balance homogeneous loans are collectively evaluated for impairment based on past experience adjusted for current conditions. Larger balance commercial loans are evaluated on a loan-by-loan basis. Once a specific measurement methodology is chosen, it is consistently applied unless there is a significant change in the financial position of the borrower. For more information regarding the Corporation's allowance for loan losses methodology refer to the Credit Risk Management and Loan Quality section in the MD&A included in Popular, Inc.'s 2004 Financial Review and Supplementary Information to Stockholders, incorporated by reference in Popular, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2004.

Table of Contents**TABLE K****Allowance for Loan Losses and Selected Loan Losses Statistics**

(Dollars in thousands)	Third Quarter			Nine months ended September 30,

Allowance to non-performing loans	83.24	79.01		83.24	79.01	
	2.12	2.29		2.12	2.29	

Non-performing assets to loans held-in-portfolio				
Non-performing assets to total assets	1.34	1.45	1.34	1.45
Net charge-offs to average loans held-in-portfolio	0.66	0.67	0.60	0.66
Provision to net charge-offs	1.05x	1.10x	1.13x	1.12x
Net charge-offs earnings coverage **	4.08	4.59	5.22	5.07

* Represents the net effect of provision for loan losses, less net charge-offs corresponding to the impact of the change in accounting principle described in Note 1 to the unaudited consolidated financial statements included in this Form 10-Q (change from fiscal to calendar reporting year for various subsidiaries).

** (Income before income tax and cumulative effect of accounting change plus provision for loan losses) divided by net charge-offs.

Table of Contents

The following table shows the Corporation's recorded investment in impaired loans and the related valuation allowance calculated under SFAS No. 114 at September 30, 2005, December 31, 2004 and September 30, 2004.

(In millions)	September 30, 2005		December 31, 2004		September 30, 2004	
	Recorded Investment	Valuation Allowance	Recorded Investment	Valuation Allowance	Recorded Investment	Valuation Allowance
Impaired loans:						
Valuation allowance required	\$ 89.7	\$27.1	\$ 69.2	\$30.7	\$ 74.5	\$30.7
No valuation allowance required	52.6		44.1		41.5	
Total impaired loans	\$142.3	\$27.1	\$113.3	\$30.7	\$116.0	\$30.7

Average impaired loans during the third quarter of 2005 and 2004 were \$138 million and \$120 million, respectively. The Corporation recognized interest income on impaired loans of \$1.4 million and \$0.5 million for the quarters ended September 30, 2005 and September 30, 2004, and \$3.5 million and \$2.0 million for the nine months ended in those dates, respectively.

Also, Table L presents annualized net charge-offs to average loans by loan category for the quarter and nine months ended September 30, 2005 and 2004.

TABLE L**Annualized Net Charge-offs to Average Loans Held-in-Portfolio**

	Quarter ended September 30,		Nine months ended September 30,	
	2005	2004	2005	2004
Commercial and construction	0.39%	0.50%	0.37%	0.50%
Lease financing	0.91	1.27	0.76	0.84
Mortgage	0.43	0.30	0.40	0.29
Consumer	1.91	1.95	1.69	2.08
	0.66%	0.67%	0.60%	0.66%

The decrease from 2004 in the commercial and construction loans net charge-offs ratio presented in Table L was mostly associated with collection efforts and an increase in the mix of the commercial loan portfolio to real estate secured loans, in part due to the loan portfolios acquired.

Also, the lease financing net charge-offs ratios reflected a reduction from 2004 primarily due to one vendor who filed bankruptcy during the third quarter of 2004 pertaining to the small ticket equipment leasing segment of the U.S. portfolio.

Consumer loans net charge-offs to average consumer loans for the quarter and nine months ended September 30, 2005 declined when compared with the same periods in 2004 primarily due to portfolio growth, mainly in personal and auto loans. Also, the decline in consumer loans net charge-offs was associated with lower delinquency levels, due to better portfolio credit quality supported in part by more rigorous underwriting standards and collection strategies.

The increase for 2005 in the mortgage loans net charge-offs ratio shown in Table L was primarily associated with PFH. Mortgage loans net charge-offs to average mortgage loans held-in-portfolio at PFH were 0.61% for the quarter and 0.59% for the nine months ended September 30, 2005, compared with 0.40% and 0.37%, respectively, in the same periods of 2004, due to higher levels of charge-offs and lower growth in the portfolio due to the change in the

accounting for the securitizations to also include off-balance sheet transactions during 2005.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk****MARKET RISK**

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments or other assets due to changes in interest rates, currency exchange rates or equity prices. Interest rate risk, a component of market risk, is the exposure to adverse changes in net interest income due to changes in interest rates. Management considers interest rate risk a prominent market risk in terms of its potential impact on earnings. Interest rate risk may occur for one or more reasons, such as the maturity or repricing of assets and liabilities at different times, changes in short and long-term market interest rates, or the maturity of assets or liabilities may be shortened or lengthened as interest rates change. Depending on the duration and repricing characteristics of the Corporation's assets, liabilities and off-balance sheet items, changes in interest rates could either increase or decrease the level of net interest income.

The techniques for measuring the potential impact of the Corporation's exposure to market risk from changing interest rates have remained substantially constant from the end of 2004. Due to the importance of critical assumptions in measuring market risk, the risk models currently incorporate third-party developed data for critical assumptions such as prepayment speeds on mortgage-related products and estimates on the duration of the Corporation's deposits. Potential interest rate scenarios continue to be modified in response to economic developments and their impact on interest rate outlooks.

The Corporation maintains a formal asset and liability management process to quantify, monitor and control interest rate risk and to assist management in maintaining stability in the net interest margin under varying interest rate environments. Management employs a variety of measurement techniques including the use of an earnings simulation model to analyze the net interest income sensitivity to changing interest rates. Sensitivity analysis is calculated on a monthly basis using a simulation model, which incorporates actual balance sheet figures detailed by maturity and interest yields or costs, the expected balance sheet dynamics, reinvestments, and other non-interest related data. Simulations are processed using various interest rate scenarios to determine potential changes to the future earnings of the Corporation.

Computations of the prospective effects of hypothetical interest rate changes are based on many assumptions, including relative levels of market interest rates, interest rate spreads, loan prepayments and deposit decay. Thus, they should not be relied upon as indicative of actual results. Further, the computations do not contemplate actions that management could take to respond to changes in interest rates. By their nature, these forward-looking computations are only estimates and may be different from what actually may occur in the future.

Based on the results of the sensitivity analyses as of September 30, 2005, the Corporation's net interest income for the next twelve months is estimated to decrease by \$30.6 million in a hypothetical 200 basis points rising rate scenario, and the change for the same period, utilizing a similar hypothetical decline in the rate scenario, is an estimated increase of \$13.2 million. Both hypothetical rate scenarios consider the gradual change to be achieved during a twelve-month period from the prevailing rates at September 30, 2005. These estimated changes are within the policy guidelines established by the Board of Directors.

Since December 31, 2004 there have been many uncertain market changes with respect to interest rate outlooks. The Corporation's net interest margin could continue to be negatively impacted by a flattened yield curve if the current environment persists, and by the intense pricing competition.

The Corporation maintains an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize significant unplanned fluctuations in net interest income that are caused by interest rate volatility. The Corporation's involvement in derivative activities since December 31, 2004 has not resulted in significant changes to its statement of condition or results of operations for the period ended September 30, 2005. The Corporation conducts business in certain Latin American markets through several of its processing and information technology services and products subsidiaries. Also, it holds interests in Consorcio de Tarjetas Dominicanas, S.A. (CONTADO) and Centro Financiero BHD, S.A. in the Dominican Republic. Although not

Table of Contents

significant, some of these businesses are conducted in the country's foreign currency. At September 30, 2005 and December 31, 2004, the Corporation had approximately \$36 million in an unfavorable foreign currency translation adjustment as part of accumulated other comprehensive (loss) income. At September 30, 2004, this figure approximated \$35 million.

The Corporation has been monitoring the inflation levels in the Dominican Republic to evaluate whether it still meets the highly inflationary economy test prescribed by SFAS No. 52, Foreign Currency Translation. Such statement defines highly inflationary as a cumulative inflation of approximately 100 percent or more over a 3-year period. The cumulative inflation in the Dominican Republic for the 36 months ended September 30, 2005 exceeded the 100 percent threshold. In accordance with the provisions of SFAS No. 52, the financial statements of a foreign entity in a highly inflationary economy are remeasured as if the functional currency were the reporting currency. Accordingly, the Corporation's interests in the Dominican Republic were remeasured into the U.S. dollar. During the quarter ended September 30, 2005, approximately \$1.0 million in remeasurement gains on the investments held by the Corporation in the Dominican Republic were reflected in other operating income instead of accumulated other comprehensive (loss) income. For the nine months ended September 30, 2005, net remeasurement gains totaled \$1.3 million. These net gains relate to improvement in the Dominican peso's exchange rate to the U.S. dollar from \$45.50 at June 30, 2004, when the economy reached the highly inflationary threshold, to \$29.05 at September 30, 2005. These remeasurement gains / losses will continue to be reflected in earnings until the economy is no longer highly inflationary. The unfavorable cumulative translation adjustment associated with these interests at the reporting date in which the economy became highly inflationary approximated \$32 million. The cumulative inflation rate in the Dominican Republic over a 3-year period approximated 101.5 percent at September 30, 2005.

LIQUIDITY

Liquidity risk may arise whenever the Corporation's ability to raise cash and the runoff of its assets are substantially less than the runoff of its liabilities and its commitments to fund loans. The Corporation has established policies and procedures to assist it in remaining sufficiently liquid to meet all of its financial obligations, finance expected future growth and maintain a reasonable safety margin for unexpected events.

The Corporation has contingency plans for raising financing under stress scenarios, where important sources of funds that are usually fully available are temporarily not willing to lend to the Corporation. These plans call for using alternate funding mechanisms such as the pledging or securitization of certain asset classes, committed credit lines, and loan facilities put in place with the Federal Reserve Bank of New York. The Corporation has a substantial amount of assets available for raising funds through non-traditional channels and is confident that it has adequate alternatives to rely on, under a scenario during which some primary funding sources are temporarily unavailable.

The Corporation's liquidity position is closely monitored on an ongoing basis. Management believes that available sources of liquidity are adequate to meet the funding needs in the normal course of business.

Table of Contents

The composition of the Corporation's financing to total assets at September 30, 2005 and December 31, 2004 were as follows:

(Dollars in millions)	September 30, 2005	December 31, 2004	% increase (decrease) from December 31, 2004 to September 30, 2005	% of total assets	
				September 30, 2005	December 31, 2004
Non-interest bearing deposits	3,733	4,173	(10.5%)	7.9%	9.4%
Interest-bearing core deposits	13,820	12,835	7.7%	29.3%	28.9%
Other interest-bearing deposits	5,026	3,585	40.2%	10.7%	8.1%
Federal funds and repurchase agreements	8,018	6,437	24.6%	17.0%	14.5%
Other short-term borrowings	2,909	3,140	(7.4%)	6.2%	7.1%
Notes payable and subordinated notes	9,689	10,306	(6.0%)	20.6%	23.2%
Others	704	821	(14.3%)	1.5%	1.8%
Stockholders' equity	3,221	3,105	3.7%	6.8%	7.0%

The decline in non-interest bearing deposits reflected in the table above is related with approximately \$449 million in certain public funds demand deposits which currently bear interest under revised contractual terms. The Corporation's core deposits, which consist of demand, savings, money markets, and time deposits under \$100 thousand, constituted 78% of total deposits at September 30, 2005. Certificates of deposit with denominations of \$100 thousand and over at September 30, 2005 represented 22% of total deposits. Their distribution by maturity was as follows:

(In thousands)

3 months or less	\$1,639,319
3 to 6 months	863,401
6 to 12 months	1,264,977
Over 12 months	1,258,114
	\$5,025,811

The Corporation diversifies the sources and the maturities of borrowings in order to avoid undue reliance on any single source and maintain an orderly volume of borrowings maturing in the future. The Corporation has established borrowing relationships with the Federal Home Loan Bank (FHLB), the Federal Reserve Bank of New York and other correspondent banks, which further support and enhance liquidity.

As of September 30, 2005, other than the strategy followed in 2005 with respect to PFH's securitization transactions described in Note 8 to the unaudited consolidated financial statements and the increased reliance in deposits to fund asset growth, there have been no significant changes in the Corporation's funding activities and strategy disclosed in the MD&A included in Popular, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2004. Also, there have been no significant changes in the Corporation's aggregate contractual obligations since the end of 2004. Refer to Note 9 to the unaudited consolidated financial statements for the Corporation's involvement in certain commitments at September 30, 2005.

Risks to Liquidity

Credit ratings by the major credit rating agencies are an important component of the Corporation's liquidity profile. Among other factors, the credit ratings are based on the financial strength, credit quality and concentrations in the loan portfolio, the level and volatility of earnings, capital adequacy, the quality of management, the liquidity of the balance sheet, the availability of a significant base of core retail and commercial deposits, and the Corporation's ability to access a broad array of wholesale funding sources. Changes in the credit rating of the Corporation or any of its subsidiaries to a level below investment grade may affect the Corporation's ability to raise funds in the capital markets. The Corporation's counterparties are sensitive to the risk of a rating downgrade. In the event of a downgrade, it may be expected that the cost of borrowing funds in

Table of Contents

the institutional market would increase. In addition, the ability of the Corporation to raise new funds or refinance maturing debt may be more difficult. In early August 2005, Fitch, a nationally recognized credit rating agency, changed the Corporation's rating outlook from stable to negative. In the opinion of management, this does not necessarily imply that a change in the actual rating of the Corporation is imminent, but does suggest that the agency has identified financial and / or business trends, which if left unchanged, may result in a rating change. Management anticipates that all concerns raised by the credit rating agency will be fully addressed. The Corporation is also rated by two other nationally recognized credit rating agencies. Management has not been advised by these agencies of any potential changes to either the Corporation's ratings or rating outlook.

The Corporation and BPPR's debt ratings at September 30, 2005 were as follows:

	Popular, Inc.		BPPR	
	Short-term debt	Long-term debt	Short-term debt	Long-term debt
Fitch	F-1	A	F-1	A
Moody's	P-2	A3	P-1	A2
S&P	A-2	BBB+	A-2	A-

The ratings above are subject to revisions or withdrawal at any time by the assigning rating agency. Each rating should be evaluated independently of any other rating.

Some of the Corporation's borrowings and deposits are subject to rating triggers, contractual provisions that accelerate the maturity of the underlying obligations in the case of a change in rating. Therefore, the need for the Corporation to raise funding in the marketplace could increase more than usual in the case of a rating downgrade. The amount of obligations subject to rating triggers that could accelerate the maturity of the underlying obligations was \$216 million at September 30, 2005.

In the course of borrowing from institutional lenders, the Corporation has entered into contractual agreements to maintain certain levels of debt, capital and asset quality, among other financial covenants. If the Corporation were to fail to comply with those agreements, it may result in an event of default. Such failure may accelerate the repayment of the related obligations. An event of default could also affect the ability of the Corporation to raise new funds or renew maturing borrowings. During the third quarter of 2005, one of the Corporation's subsidiaries breached a condition under an agreement with an investment bank whereby the subsidiary did not maintain the required unborrowed capacity in the credit line agreement with its holding company. Subsequently, the subsidiary paid down the credit line with the holding company and is now in compliance with the covenant. The company and the investment bank agreed to a covenant waiver. Also, the subsidiary breached an earnings covenant in a credit facility for which the Corporation also obtained a covenant waiver. Obligations subject to the covenant waivers as of quarter end approximated \$195 million. At September 30, 2005, the Corporation had \$846 million in outstanding obligations subject to covenants, including those which are subject to rating triggers and those outstanding under the commercial paper program.

Management believes that there have been no significant changes in liquidity risk compared with the disclosures in Popular, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2004.

Table of Contents**Item 4. Controls and Procedures****Disclosure Controls and Procedures**

The Corporation's management, with the participation of the Corporation's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Corporation's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based on such evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Corporation's disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Corporation in the reports that it files or submits under the Exchange Act.

Internal Control Over Financial Reporting

There have been no changes in the Corporation's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the quarter ended on September 30, 2005 that have materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Part II Other Information**Item 1. Legal Proceedings**

The Corporation and its subsidiaries are defendants in various lawsuits arising in the ordinary course of business. Management believes, based on the opinion of legal counsel, that the aggregate liabilities, if any, arising from such actions will not have a material adverse effect on the financial position and results of operations of the Corporation.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table sets forth the details of purchases of Common Stock during the quarter ended September 30, 2005 under the 2004 Omnibus Incentive Plan.

Issuer Purchases of Equity Securities

Not in thousands

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
July 1 - July 31	750	\$ 26.02	750	9,055,080
August 1 - August 31				9,055,080
September 1 - September 30				9,055,080
Total September 30, 2005	750	\$ 26.02	750	9,055,080
