CENTRAL FEDERAL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands except per share data)

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation:

The accompanying consolidated financial statements have been prepared pursuant to rules and regulations of the Securities and Exchange Commission (the SEC) and in compliance with U.S. generally accepted accounting principles. Because this report is based on an interim period, certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted.

In the opinion of the management of Central Federal Corporation (the Company), the accompanying consolidated financial statements as of September 30, 2006 and December 31, 2005 and for the three and nine months ended September 30, 2006 and 2005 include all adjustments necessary for a fair presentation of the financial condition and the results of operations for those periods. The financial performance reported for the Company for the three and nine months ended September 30, 2006 is not necessarily indicative of the results to be expected for the full year. This information should be read in conjunction with the Company's Annual Report to Shareholders and Form 10-KSB for the year ended December 31, 2005. Reference is made to the accounting policies of the Company described in Note 1 of the Notes to Consolidated Financial Statements contained in the Company's 2005 Annual Report that was filed as Exhibit 13 to the Form 10-KSB and information contained in Note 1 of the Notes to Consolidated Financial Statements contained in this form 10-QSB regarding the Company's adoption of SFAS No. 123 (revised 2004), *Share Based Payment* (SFAS 123R) on January 1, 2006. The Company has consistently followed those policies in preparing this Form 10-QSB.

Earnings Per Share:

Basic earnings per common share is net income divided by the weighted average number of common shares outstanding during the period. Stock-based incentive plan shares are considered outstanding as they are earned over the vesting period. Diluted earnings per common share include the dilutive effect of stock-based incentive plan shares and additional potential common shares issuable under stock options.

8.

Table of Contents

CENTRAL FEDERAL CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Dollars in thousands except per share data)

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

The factors used in the earnings (loss) per share computation follow.

	Three months ended September 30,		Nine months ended September 30,	
	2006	2005	2006	2005
Basic				
Net income (loss)	\$ 94	\$ (2,068)	\$ (124)	\$ (2,627)
Weighted average common shares outstanding	4,527,194	2,208,071	4,425,953	2,200,176
Basic earnings (loss) per common share	\$ 0.02	\$ (0.94)	\$ (0.03)	\$ (1.19)
Diluted				
Net income (loss)	\$ 94	\$ (2,068)	\$ (124)	\$ (2,627)
Weighted average common shares outstanding for basic earnings (loss) per share	4,527,194	2,208,071	4,425,953	2,200,176
Add: Dilutive effects of assumed exercises of stock options and stock based incentive plan shares				
Average shares and dilutive potential common shares	4,527,194	2,208,071	4,425,953	2,200,176
Diluted earnings (loss) per common share	\$ 0.02	\$ (0.94)	\$ (0.03)	\$ (1.19)

The following potential average common shares were anti-dilutive and not considered in computing diluted earnings (loss) per share because the Company (i) had a loss from continuing operations, (ii) the exercise price of the options was greater than the average stock price for the periods or (iii) the fair value of the stock-based incentive plan shares at the date of grant was greater than the average stock price for the periods.

	Three months ended September 30,		Nine months ended September 30,	
	2006	2005	2006	2005
Stock options	276,605	297,539	279,116	261,550
Stock based incentive plan shares	13,501	33,537	16,878	30,187

Derivatives:

All derivative instruments are recorded at their fair values. If derivative instruments are designated as hedges of fair values, both the change in the fair value of the hedge and the hedged item are included in current earnings. Fair value adjustments related to cash flow hedges are recorded in other comprehensive income and reclassified to earnings when the hedged transaction is reflected in earnings. Ineffective portions of hedges are reflected in earnings as they occur.

9.

Table of Contents

CENTRAL FEDERAL CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Dollars in thousands except per share data)

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**Stock-based Compensation:**

Prior to January 1, 2006, the Company accounted for stock-based compensation expense using the intrinsic value method as required by Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* and as permitted by Statement of Financial Accounting Standards (SFAS) No. 123, *Accounting for Stock-based Compensation*. No stock-based compensation cost was reflected in net income for stock options, as all options granted had an exercise price equal to the market price of the underlying common stock at the date of grant.

On January 1, 2006, the Company adopted SFAS No. 123 (revised 2004), *Share Based Payment* (SFAS 123R), which requires measurement of compensation cost for all stock-based awards based on the grant-date fair value and recognition of compensation cost over the service period of stock-based awards, which is usually the same as the vesting period. The fair value of stock options is determined using the Black-Scholes valuation model, which is consistent with the Company's valuation methodology previously utilized for options in footnote disclosures required under SFAS No. 123. The fair value of stock grants will also be determined using the Black-Scholes valuation model. The Company has adopted SFAS 123R using the modified prospective method, which provides for no retroactive application to prior periods and no cumulative adjustment to equity. It also provides for expense recognition for both new and existing stock-based awards as the required services are rendered. SFAS 123R also amends SFAS No. 95, *Statement of Cash Flows*, and requires tax benefits related to excess stock-based compensation deductions be presented in the statement of cash flows as financing cash inflows.

On March 29, 2005, the SEC published Staff Accounting Bulletin No. 107 (SAB107), which expressed the views of the Staff regarding the interaction between SFAS 123R and certain SEC rules and regulations regarding the valuation of stock-based payment arrangements for public companies. SAB 107 requires that stock-based compensation be classified in the same expense category as cash compensation. Accordingly, the Company has included employees stock-based compensation expense in salaries and employee benefits and directors' stock-based compensation expense in director fees in the consolidated statements of operations.

The adoption of SFAS 123R had no impact on reported results of operations, basic or diluted earnings (loss) per share for the three and nine months ended September 30, 2006 related to stock options since there were no unvested options at January 1, 2006 and no options were granted during the nine months ended September 30, 2006. Future option grants will be accounted for in accordance with SFAS 123R.

The following table illustrates the effect on net income and earnings per share if expense were measured using the fair value recognition provisions of SFAS 123 in the prior periods.

	Three months ended September 30, 2005	Nine months ended September 30, 2005
Net loss as reported	\$ (2,068)	\$ (2,627)
Deduct: Stock-based compensation expense determined under fair value based method	59	358
Pro forma net loss	\$ (2,127)	\$ (2,985)
Basic loss per share as reported	\$ (0.94)	\$ (1.19)
Pro forma basic loss per share	(0.96)	(1.36)

Edgar Filing: CENTRAL FEDERAL CORP - Form 10QSB

Diluted loss per share as reported	\$	(0.94)	\$	(1.19)
Pro forma diluted loss per share		(0.96)		(1.36)

NOTE 2 LOANS

Loans at period-end were as follows:

	September 30, 2006	December 31, 2005
Commercial	\$ 26,921	\$ 16,347
Real estate:		
Single-family residential	26,748	23,627
Multi-family residential	44,686	30,206
Commercial	42,236	25,937
Construction	159	
Consumer	31,393	29,540
Subtotal	172,143	125,657
Less: Net deferred loan fees	(258)	(136)
Allowance for loan losses	(2,032)	(1,495)
Loans, net	\$ 169,853	\$ 124,026

Activity in the allowance for loan losses was as follows.

	Three months ended September 30,		Nine months ended September 30,	
	2006	2005	2006	2005
Beginning balance	\$ 1,988	\$ 1,242	\$ 1,495	\$ 978
Provision for loan losses	120	50	702	402
Loans charged-off	(79)	(83)	(229)	(200)
Recoveries	3	16	64	45
Ending balance	\$ 2,032	\$ 1,225	\$ 2,032	\$ 1,225

Impaired loans were not material for any period presented.

Nonperforming loans were as follows:

	September 30, 2006	December 31, 2005
Loans past due over 90 days still on accrual	\$	\$
Nonaccrual loans	332	800

Nonperforming loans include both smaller balance single-family mortgage and consumer loans that are collectively evaluated for impairment and individually classified impaired loans. There were no nonperforming commercial, commercial real estate or multi-family loans at September 30, 2006 or December 31, 2005.

NOTE 3 FEDERAL HOME LOAN BANK ADVANCES

Advances from the Federal Home Loan Bank were as follows.

	September 30, 2006	December 31, 2005
Maturity October 2006 at 5.35% floating rate	\$ 15,000	\$
Maturity January 2006 at 4.33% floating rate		12,725
Maturities March 2007 thru June 2009, fixed at rates from 2.44% to 5.60%, averaging 4.16% at September 30, 2006, and maturities March 2006 thru September 2008, fixed at rates from 2.03% to 3.41%, averaging 2.91% at December 31, 2005	11,270	10,270
Total	\$ 26,270	\$ 22,995

The fixed rate advances are due in full at their maturity date, with a penalty if prepaid. Floating rate advances can be prepaid at any time with no penalty. The \$15,000 floating rate advances that matured in October 2006 were replaced with floating rate advances.

The advances were collateralized as follows.

	September 30, 2006	December 31, 2005
First mortgage loans under a blanket lien arrangement	\$ 26,212	\$ 23,308
Second mortgage loans	772	783
Multi-family mortgage loans	14,699	8,885
Home equity lines of credit	11,322	9,109
Commercial real estate loans	30,019	18,014
Securities	14,084	15,689
Total	\$ 97,108	\$ 75,788

Based on this collateral and the Company's holdings of FHLB stock, the Company is eligible to borrow up to \$27,840 at September 30, 2006.

Payment information

Required payments over the next five years are:

September 30, 2007	\$ 19,270
September 30, 2008	2,000
September 30, 2009	5,000
Total	\$ 26,270

NOTE 4 STOCK COMPENSATION PLANS

Stock-based incentive plans (SBIP) provide for stock option grants and restricted stock awards to directors, officers and employees. The 1999 Stock-based Incentive Plan was approved by shareholders on July 13, 1999. The plan provided 193,887 shares for stock option grants and 77,554 shares for restricted stock awards. The 2003 Equity Compensation Plan was ratified by shareholders on April 23, 2003 and provided an aggregate of 100,000 shares for stock option grants and restricted stock awards, including up to a maximum of 30,000 shares for restricted stock awards. An amendment and restatement of the 2003 Equity Compensation Plan was approved by stockholders on April 20, 2004 to provide an additional 100,000 shares of Company stock for stock option grants and restricted stock awards, including up to a maximum of 30,000 shares for restricted stock awards. A second amendment and restatement of the 2003 Equity Compensation Plan was approved by stockholders on May 20, 2005 to provide an additional 100,000 shares of Company stock for stock option grants and restricted stock awards, including up to a maximum of 30,000 shares for restricted stock awards. Both plans provide for options to be granted for terms of up to but not exceeding ten years from the date of grant, and options cannot be granted at a price less than the fair market value of the common stock on the date of grant. The Plans provide for accelerated vesting if there is a change in control (as defined in the Plans). Shares related to forfeited stock options and restricted stock awards become available for subsequent grant under the terms of the plans. Exercise price is the market price at date of grant for stock options, so no compensation expense was recognized in the consolidated statements of operations for periods prior to the Company's adoption of FAS 123R on January 1, 2006. There were no unvested stock options at January 1, 2006, and no options were granted during the nine months ended September 30, 2006; therefore, no compensation expense related to stock options was recognized in the consolidated statement of operations for the nine months ended September 30, 2006.

A summary of stock option activity is as follows.

	Nine months ended September 30, 2006		
	Shares	Weighted Average Exercise Price	Weighted Average Grant-Date Fair Value
Options outstanding, beginning of period	290,872	\$ 11.32	\$ 3.68
Granted			
Exercised			
Forfeited or expired	(17,600)	12.84	3.12
Options outstanding, end of period	273,272	\$ 11.23	\$ 3.72
Options exercisable, end of period	273,272	\$ 11.23	\$ 3.72

The outstanding and exercisable options at September 30, 2006 had no intrinsic value as the Company's stock price on that date was lower than the exercise price of all options.

NOTE 4 STOCK COMPENSATION PLANS (continued)

There were no options exercised during the nine months ended September 30, 2006. Cash received from options exercised for the nine months ended September 30, 2005 was \$375, and the tax benefit realized for the tax deduction from options exercised totaled \$54. The intrinsic value of options exercised during the nine months ended September 30, 2005 was \$157.

Options outstanding at September 30, 2006 were as follows.

Range of Exercise Prices	Number	Outstanding	Weighted Average Price	Weighted Average Exercise Price	Exercisable	Weighted Average Exercise Price
		Remaining Contractual Life in Years			Number	
\$9.19 \$10.42	131,640	6.6	\$ 10.00	\$ 10.00	131,640	\$ 10.00
\$11.50 \$12.70	131,000	7.1	\$ 12.26	\$ 12.26	131,000	\$ 12.26
\$13.76 \$13.94	10,632	7.5	\$ 13.76	\$ 13.76	10,632	\$ 13.76

A summary of the activity for restricted stock awards is as follows:

	Nine months ended September 30, 2006	
	Shares	Weighted Average Grant- Date Fair Value
Unvested shares outstanding at beginning of period	45,827	\$ 11.48
Granted		
Vested	(14,775)	11.59
Forfeited		
Unvested shares outstanding at end of period	31,052	\$ 11.42

The total fair value of shares vested during the nine months ended September 30, 2006 and 2005 was \$111 and \$127. Compensation expense for restricted stock awards is recognized over the vesting period of the shares based on the fair value of the shares on the date of grant. Compensation expense for the nine months ended September 30, 2006 and 2005 was \$138 and \$190. The total recognized tax benefit related to compensation expense for the nine months ended September 30, 2006 and 2005 was \$47 and \$65. At September 30, 2006, there was \$138 of total unrecognized compensation expense related to unvested restricted stock awards which is expected to be recognized over a weighted average period of 1.4 years.

NOTE 5 DERIVATIVES AND HEDGING ACTIVITIES

In August 2006, the Company entered into an interest rate swap agreement to make fixed interest payments in exchange for variable interest payments. The interest rate swap is a component of the Company's asset liability management strategy to reduce the risk that changes in interest rates will change net interest margin. The notional amount of the interest rate swap does not represent amounts exchanged by the parties. The amount exchanged is determined by reference to the notional amount and the other terms of the interest rate swap.

The objective of the interest rate swap was to protect the related fixed rate commercial real estate loan from changes in fair value due to changes in interest rates. The loan agreement contains a yield maintenance clause which will be invoked in the event of prepayment of the loan and is expected to exactly offset the unwind value of the swap. The yield maintenance clause is an embedded derivative which is bifurcated from the host loan contract in accordance with Statement of Financial Accounting Standards (SFAS) No. 133, *Accounting for Derivatives and Hedging Activities*, and, as such, the swap and embedded derivative are not designated as hedges under FAS 133. Accordingly, both instruments are carried at fair value while the changes in fair value offset each other in the income statement. The change in the fair value of the interest rate swap, which was (\$35) for the nine months ended September 30, 2006, was exactly offset by the change in fair value of the embedded derivative and resulted in no impact on net income. The fair value of the swap, \$35, is included in accrued interest payable and other liabilities, and the fair value of the yield maintenance clause, \$35, is included in accrued interest receivable and other assets in the accompanying Consolidated Balance Sheets at September 30, 2006.

Summary information about the interest rate swap is as follows:

	September 30, 2006
Notional amount	\$ 1,098
Weighted average pay rate	5.48%
Weighted average receive rate	5.32%
Weighted average maturity (years)	9.9

NOTE 6 SEGMENT INFORMATION

The reportable segments are determined by the products and services offered, primarily distinguished between banking and mortgage banking operations. Loans, securities, deposits and servicing fees provide the revenues in the banking operation, and single-family residential mortgage loan sales provide the revenues in mortgage banking. All operations are domestic.

The accounting policies used are the same as those described in the summary of significant accounting policies. Segment performance is evaluated using net income. Goodwill was allocated to mortgage banking. Income taxes are allocated and transactions among segments are made at fair value. Parent and Other includes activities that are not directly attributed to the reportable segments and is comprised of the parent company and elimination entries between all segments. Information reported internally for performance assessment follows:

Item 2.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following analysis discusses changes in financial condition and results of operations during the periods included in the Consolidated Financial Statements which are part of this filing.

Forward-Looking Statements

This Form 10-QSB contains forward-looking statements which may be identified by the use of such words as may, believe, expect, anticipate, should, plan, estimate, predict, continue and potential or the negative of these words or other comparable terminology. Examples of forward-looking statements include, but are not limited to, estimates with respect to our financial condition, results of operations and business that are subject to various factors which could cause actual results to differ materially from these estimates. These factors include, but are not limited to (i) general and local economic conditions, (ii) changes in interest rates, deposit flows, demand for mortgages and other loans, real estate values and competition, (iii) changes in accounting principles, policies or guidelines, (iv) changes in legislation or regulation and (v) other economic, competitive, governmental, regulatory and technological factors affecting our operations, pricing, products and services.

Any or all of our forward-looking statements in this Form 10-QSB and in any other public statements we make may turn out to be wrong. They can be affected by inaccurate assumptions we might make or by known or unknown risks and uncertainties. Consequently, no forward-looking statement can be guaranteed and we caution readers not to place undue reliance on any such forward-looking statements. We undertake no obligation to publicly release revisions to any forward-looking statements to reflect events or circumstances after the date of such statements.

Business Overview

Central Federal Corporation is a savings and loan holding company incorporated in Delaware in 1998. Our primary business is the operation of our principal subsidiary, CFBank, a federally chartered savings association formed in Ohio in 1892.

CFBank is a community-oriented financial institution offering a variety of financial services to meet the needs of the communities we serve. Our client-centric method of operation emphasizes personalized service, clients' access to decision makers, solution-driven lending and quick execution, efficient use of technology and the convenience of telephone banking, corporate cash management and online internet banking. We attract deposits from the general public and use the deposits, together with borrowings and other funds, primarily to originate commercial and commercial real estate loans, single-family and multi-family residential mortgage loans and home equity lines of credit.

Management Strategy

We continued to successfully execute our strategic plan for growth in the third quarter of 2006. As previously reported, we achieved profitability in the second quarter of 2006 for the first time since implementing the plan in 2003, with net income for the second quarter of \$6,000. For the third quarter of 2006, net income was \$94,000. Total assets increased 30% or \$52.1 million during the first nine months of 2006 and totaled \$225.1 million at September 30, 2006. Commercial, commercial real estate and multi-family loans grew \$41.3 million to \$113.8 million at September 30, 2006. Net interest income increased 43% during the third quarter and 38% year to date at September 30, 2006 compared to the prior year periods. Year to date improvement in performance was achieved with no increase in normal, recurring operating expenses.

As a result of growth in assets, particularly commercial, commercial real estate and multi-family loans, gross interest income increased 67% from \$2.2 million in the third quarter of 2005 to \$3.7 million in the third quarter of 2006. The flat and recently inverted yield curve has put negative pressure on funding costs, and interest expense increased 98% from \$960,000 in the third quarter of 2005 to \$1.9 million during the third quarter of 2006. The result was a 43% increase in net interest income from \$1.2 million during the third quarter of 2005 to \$1.8 million during the third quarter of 2006. Net interest income increased 38% from \$3.6 million during the first nine months of 2005 to \$5.0 million during the comparable period of 2006.

Table of Contents

CENTRAL FEDERAL CORPORATION

Item 2.

MANAGEMENT'S DISCUSSION AND ANALYSIS

We completed the issuance of 2.3 million shares of common stock in January 2006, and the \$14.6 million in net proceeds provided additional capital to execute the growth component of the business plan.

We continued to provide appropriate reserves for loan losses in response to growth in commercial, commercial real estate and multi-family loans. The provision for loan losses totaled \$120,000 for the quarter ended September 30, 2006 compared to \$50,000 in the prior year quarter. For the nine months ended September 30, 2006, the provision totaled \$702,000 compared to \$402,000 in the prior year period. Current year amounts are higher than the prior year periods due to increased commercial, commercial real estate and multi-family loan growth in the current year periods. Because of the up-front provision recorded when loans are originated, periods of rapid loan growth will tend to show lower profitability levels than other periods. However, management believes that prudent continued expansion of the loan portfolio will enhance the Company's long-term profitability.

We have transitioned from a retail savings and loan association to a growth-oriented community bank. We are a diversified provider of financial products focused on businesses and individuals who demand great service and access to decision-makers who can provide alternatives and create value. Part of this transition involved restructuring and expansion of our mortgage operations, and we can now originate mortgage loans in all 50 states and the District of Columbia with the ability, the technology and the products to serve any customer's needs and financial situation. As part of the growth strategy, the Company plans to expand its staff by 10 to 25 additional residential mortgage loan originators over the coming months.

In September 2006, we announced the future relocation of our Columbus regional office to Worthington. The new high traffic, high visibility location will provide us with access to approximately \$1 billion in retail deposits available in the Worthington area and access to a larger group of commercial and retail customers. The office will serve both as a retail community bank location and call center for our mortgage loan business. Relocation is expected to occur in the 2nd quarter of 2007.

Other than as described above, we are not aware of any market or institutional trends, events or uncertainties that are expected to have a material effect on liquidity, capital resources or operations or any current recommendations by regulators which would have a material effect if implemented.

Comparison of the Results of Operations for the Three Months Ended September 30, 2006 and 2005

General. Net income in the third quarter of 2006 was \$94,000, or \$.02 per diluted share compared to a \$2.1 million loss or \$.94 per diluted share in the prior year quarter. The net loss for the quarter ended September 30, 2005 included a non-cash after-tax impairment loss to write off the value of goodwill and other intangible assets related to the October 2004 acquisition of Reserve Mortgage Services, Inc. which increased the net loss by \$1.9 million or \$.86 per share. Not including the impairment loss, the loss for the quarter ended September 30, 2005 totaled \$175,000 or \$.08 per diluted share. Net income for the third quarter of 2006 increased \$269,000 from the prior year quarter's loss exclusive of the impairment charge.

Net interest income. Growth positively impacted net interest income, which totaled \$1.8 million during the third quarter of 2006, and increased \$532,000 or 43.4% compared to \$1.2 million in the third quarter of 2005. Despite rising short term interest rates and the resultant increase in funding costs, net interest margin was 3.45% during the third quarter of 2006, the same as during the prior year quarter. This was largely due to employment of the additional capital raised in our public offering and higher yields on adjustable rate assets tied to prime, primarily commercial loans and home equity lines of credit. Management of the net interest margin in the current interest rate environment will continue to be a challenge, and continued downward pressure on margins is expected.

Total interest income increased 67.3% during the third quarter of 2006 and totaled \$3.7 million compared to \$2.2 million in the prior year quarter. Both the volume and yield on interest-earning assets increased in the third quarter of 2006 compared to the prior year quarter. Growth in interest income was partially offset by a 97.9% increase in

Table of Contents

CENTRAL FEDERAL CORPORATION

Item 2.

MANAGEMENT'S DISCUSSION AND ANALYSIS

interest expense during the third quarter of 2006, which totaled \$1.9 million compared to \$960,000 in the prior year quarter. Both volume and cost of interest-bearing liabilities increased in the third quarter of 2006 compared to the prior year quarter.

Average interest earning assets increased \$60.7 million or 42.5% to \$203.5 million in the third quarter of 2006 from \$142.8 million in the third quarter of 2005 due to loan growth pursuant to our strategy to expand into business financial services in the Fairlawn and Columbus, Ohio markets. The yield on interest earning assets increased 103 basis points (bp) to 7.18% in the third quarter of 2006 from 6.15% in the prior year quarter reflecting higher yields on home equity lines of credit, commercial, commercial real estate and multi-family loans due to higher market interest rates. Interest income on loans increased 87.1% to \$3.2 million in the third quarter of 2006 compared to \$1.7 million in the prior year quarter. Average loan balances increased 61.3% to \$170.4 million in the third quarter of 2006 from \$105.6 million in the prior year quarter and the average yield on loans increased 104 bp to 7.57% in the third quarter of 2006 from 6.53% in the prior year quarter due to growth in commercial, commercial real estate and multi-family mortgage loan balances and yields and an increase in yields on home equity lines of credit caused by the increase in short-term market interest rates and the resultant increase in the prime rate. Interest income on securities decreased \$25,000 to \$386,000 in the third quarter of 2006 from \$411,000 in the prior year quarter. Average securities balances decreased 10.5% or \$3.5 million and totaled \$29.8 million in the third quarter of 2006 from \$33.3 million in the prior year quarter due to repayments and prepayments on mortgage-backed securities. The average yield on securities increased 13 bp to 5.14% in the third quarter of 2006 from 5.01% in the prior year quarter due to current purchases at higher yields.

Average interest-bearing liabilities increased 36.0% to \$180.0 million in the third quarter of 2006 from \$132.4 million in the third quarter of 2005 due to an increase in both the cost and average balance of deposits and borrowings. The average cost of interest-bearing liabilities increased 132 bp to 4.22% in the third quarter of 2006 from 2.90% in the third quarter of 2005 primarily due to higher short-term interest rates in the current year quarter which increased both deposit and borrowing costs. Interest expense on deposits increased \$667,000 to \$1.4 million for the quarter ended September 30, 2006 from \$758,000 in the prior year quarter. Average deposit balances increased 27.6% to \$144.6 million in the third quarter of 2006 from \$113.3 million in the prior year quarter due to an increase in certificate of deposit and money market accounts. The average cost of deposits increased 126 bp to 3.94% in the third quarter of 2006 from 2.68% in the prior year quarter in response to higher market interest rates during the current year quarter. Interest expense on borrowings, which include FHLB advances and subordinated debentures, increased \$273,000 to \$475,000 in the third quarter of 2006 from \$202,000 in the prior year quarter due to an increase in both the average balance and cost of borrowings. The average balance of borrowings increased \$16.4 million in the third quarter of 2006 to \$35.5 million compared to \$19.1 million in the prior year quarter due to the use of FHLB advances to fund loan growth during the current year quarter. The cost of borrowings increased 113 bp to 5.36% in the third quarter of 2006 from 4.23% in the prior year quarter and reflected higher market interest rates in the current year quarter.

Provision for loan losses. Management analyzes the adequacy of the allowance for loan losses regularly through reviews of the performance of the loan portfolio considering economic conditions, changes in interest rates and the effect of such changes on real estate values and changes in the composition of the loan portfolio. The allowance for loan losses is established through a provision for loan losses based on management's evaluation of the risk in its loan portfolio. The evaluation includes a review of all loans for which full collectibility may not be reasonably assured and considers, among other matters, the estimated fair value of the underlying collateral, economic conditions, historical loan loss experience, changes in the size and growth of the loan portfolio and additional factors that warrant recognition in providing for an adequate loan loss allowance. Future additions to the allowance for loan losses will be dependent on these factors.

Based on management's review, the provision for loan losses totaled \$120,000 in the third quarter of 2006, an increase of \$70,000 from \$50,000 in the prior year quarter reflecting higher commercial, commercial real estate and

multi-family loan growth in the current year period. In the third quarter of 2006, growth in these loan types totaled 21.

Table of Contents

CENTRAL FEDERAL CORPORATION

Item 2.

MANAGEMENT'S DISCUSSION AND ANALYSIS

\$6.1 million and increased 5.7% compared to a \$5.1 million decline in the third quarter of 2005. The provision for loan losses during the quarter ended September 30, 2005 primarily represented additional reserves on the mortgage portfolio, which incurred \$65,000 in write-offs during the quarter ended September 30, 2005.

At September 30, 2006, the allowance for loan losses was \$2.0 million compared to \$1.5 million at December 31, 2005. The amount of the allowance allocated to commercial, commercial real estate and multi-family mortgage loans at September 30, 2006 was \$1.9 million, an increase of \$577,000 or 43.8% from \$1.3 at December 31, 2005 as these loan types increased from 57.7% of the loan portfolio at year-end 2005 to 66.1% at September 30, 2006. At September 30, 2006, the allowance for loan losses represented 1.18% of total loans compared to 1.19% at December 31, 2005. Nonperforming loans, all of which are nonaccrual loans, decreased \$468,000 to \$332,000 or 0.2% of total loans at September 30, 2006 compared to \$800,000 or 0.6% of total loans at December 31, 2005 due to single-family mortgage loan properties moving through the foreclosure process and lower delinquencies. Single-family homes in our primary market area secure all of the nonaccrual loan balances at September 30, 2006. Management believes the allowance for loan losses is adequate to absorb probable incurred credit losses in the loan portfolio at September 30, 2006; however future additions to the allowance may be necessary based on changes in economic conditions and the factors discussed in the previous paragraph.

Noninterest income. Noninterest income increased \$53,000 or 32.9% and totaled \$214,000 for the quarter ended September 30, 2006 compared to \$161,000 in the prior year quarter. Net gain on sales of loans totaled \$112,000 in the third quarter of 2006 and was \$58,000 higher than the prior year quarter. Mortgage loan originations and sales increased 19.2% and totaled \$12.4 million in the third quarter of 2006 compared to \$10.4 million in the third quarter of 2005.

Noninterest expense. Noninterest expense was approximately \$1.7 for the each of the quarters ended September 30, 2006 and September 30, 2005 exclusive of the impairment loss. However, there actually was a slight increase of \$48,000 or 2.9% in noninterest expense for the third quarter of 2006 as compared with the third quarter of 2005. That increase primarily was due to higher salaries and increased employee benefits offset by lower professional fees and franchise taxes in the current year quarter.

For the quarter ended September 30, 2006, the efficiency ratio improved to 87.43% from 120.82% (exclusive of the impairment loss) during the prior year quarter. The ratio of noninterest expense to average assets improved to 3.11% for the quarter ended September 30, 2006 from 4.23% (exclusive of the impairment loss) for the prior year quarter. The improvement in these measures was the result of growth in the balance sheet, coupled with control of noninterest expenses. We anticipate a continued improvement in these measures as we continue execution of our growth strategy.

Income taxes. Income tax expense for the quarter ended September 30, 2006 totaled \$34,000 compared to an income tax benefit of \$237,000 in the prior year quarter associated with the loss in that quarter.

Comparison of the Results of Operations for the Nine Months Ended September 30, 2006 and 2005

General. The net loss in the nine months ended September 30, 2006 was \$124,000, or \$.03 per diluted share compared to a \$2.6 million loss or \$1.19 loss per diluted share in the prior year period. The net loss for the nine months ended September 30, 2005 included a non-cash after-tax impairment loss that which increased the net loss for that period by \$1.9 million or \$.86 per share. Not including the impairment loss, the loss for the nine months ended September 30, 2005 totaled \$734,000 or \$.33 per diluted share. Performance in the first nine months of 2006 increased \$610,000 from the prior year period's loss exclusive of the impairment charge.

Net interest income. Growth positively impacted net interest income, which totaled \$5.0 million during the nine months ended September 30, 2006, and increased \$1.4 million or 37.6% compared to \$3.2 million for the nine months ended September 30, 2005. Despite rising short term interest rates and the resultant increase in funding costs, net interest margin was 3.50% during the first nine months of 2006, an increase of 12bp from 3.38% for the

MANAGEMENT'S DISCUSSION AND ANALYSIS

prior year period. This was largely due to employment of the additional capital raised in our public offering and higher yields on adjustable rate assets tied to prime, primarily commercial loans and home equity lines of credit. Net interest margin declined from 3.56% in the 1st quarter of 2006 to 3.45% in the third quarter of 2006 as higher short-term market interest rates and a flat to inverted yield curve negatively impacted the cost of funding. Management of the net interest margin in the current interest rate environment will continue to be a challenge and continued downward pressure on margins is expected.

Total interest income increased \$3.6 million or 57.0% for the nine months ended September 30, 2006 and totaled \$9.8 million compared to \$6.2 million in the prior year period. Both the volume and yield on interest-earning assets increased during the nine months ended September 30, 2006 compared to the nine months ended September 30, 2005. Growth in interest income was partially offset by an 84.4% increase in interest expense to \$4.8 million during the nine months ended September 30, 2006 compared to \$2.6 million in the prior year period. Both volume and cost of interest-bearing liabilities increased in the first nine months of 2006 compared to the prior year period.

Average interest earning assets increased \$46.7 million or 32.7% to \$190.4 million in the nine months ended September 30, 2006 from \$143.7 million in the prior year period due to loan growth pursuant to our strategic growth plan. The yield on interest earning assets increased 106 bp to 6.84% in the nine months ended September 30, 2006 from 5.78% in the prior year period reflecting higher yields on home equity lines of credit, commercial, commercial real estate and multi-family loans due to higher market interest rates. Interest income on loans increased 59.2% to \$8.4 million in the first nine months of 2006 compared to \$5.3 million in the first nine months of 2005. Average loan balances increased 38.8% to \$155.4 million in the first nine months of 2006 from \$112.0 million in the prior year period, and the average yield on loans increased 92 bp to 7.20% in the first nine months of 2006 from 6.28% in the prior year period due to growth in commercial, commercial real estate and multi-family mortgage loan balances and yields and an increase in yields on home equity lines of credit caused by the increase in short-term market interest rates and the resultant increase in the prime rate. Interest income on securities increased \$504,000 to \$1.2 million for the nine months ended September 30, 2006 from \$727,000 in the prior year period. Average securities balances increased 34.6% or \$8.1 million and totaled \$31.5 million for the nine months ended September 30, 2006 from \$23.4 million in the prior year period due to a securitization of single-family residential mortgage loans with an outstanding principal balance of \$18.6 million with Freddie Mac in the second quarter of 2005 and current period purchases offset by principal repayments on these securities over the last year and current year security sales. The average yield on securities increased 99 bp to 5.18% during the nine months ended September 30, 2006 from 4.19% in the prior year period due to the securitization transaction which added higher earning mortgage securities to the portfolio and current period purchases of securities at higher yields.

Average interest-bearing liabilities increased 25.2% to \$166.0 million during the nine months ended September 30, 2006 from \$132.6 million in the prior year period due to an increase in the average balance of both deposits and borrowings. The average cost of interest-bearing liabilities increased 123 bp to 3.83% in the nine months ended September 30, 2006 from 2.60% for the nine months ended September 30, 2005 primarily due to higher short-term interest rates in the current year period which increased both deposit and borrowing costs. Interest expense on deposits increased \$1.7 million to \$3.6 million for the nine months ended September 30, 2006 from \$1.9 million in the prior year period. Average deposit balances increased 23.4% to \$133.5 million in the nine months ended September 30, 2006 from \$108.1 million in the prior year period due to an increase in certificate of deposit and money market accounts. The average cost of deposits increased 121 bp to 3.60% in the nine months ended September 30, 2006 from 2.39% in the prior year period in response to higher market interest rates during the current year period. Interest expense on borrowings, which include FHLB advances and subordinated debentures, increased \$513,000 to \$1.2 million in the nine months ended September 30, 2006 from \$646,000 in the prior year period due to an increase in both the average balance and cost of borrowings. The average balance of borrowings increased \$8.1 million in the nine months ended September 30, 2006 to \$32.5 million compared to \$24.4 million in the prior year period due to the use of FHLB advances to fund loan growth during the current year period. The cost of borrowings increased 123 bp to

4.76% in the nine months ended September 30, 2006 from 3.53% in the prior year period and reflected higher market interest rates in the current year period.

Item 2.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Net interest margin increased 12 bp to 3.50% for the nine months ended September 30, 2006 compared to 3.38% in the prior year period. Use of proceeds from the stock offering to fund growth in the current year period positively impacted the net interest margin.

Provision for loan losses. Based on management's review described previously, the provision for loan losses totaled \$702,000 for the nine months ended September 30, 2006, an increase of \$300,000 from \$402,000 for the nine months ended September 30, 2005, reflecting higher commercial, commercial real estate and multi-family loan growth in the current year period. During the nine months ended September 30, 2006, growth in these loan types totaled \$41.3 million compared to \$12.2 million growth during the nine months ended September 30, 2005.

Noninterest income. Noninterest income during the nine months ended September 30, 2006 totaled \$611,000 and was \$62,000 or 9.2% lower than the prior year period due to a decline in gains on loan sales for the first nine months of 2006. Net gain on sales of loans declined 33.8% and totaled \$239,000 during the first nine months of 2006 as mortgage loan production in the first quarter of 2006 was negatively impacted by changes in staffing and processes in the mortgage division. Mortgage loan originations and sales totaled \$34.2 million for the nine months ended September 30, 2006 compared to \$42.0 million for the prior year period. We do not retain the servicing on the loans we currently sell.

Noninterest expense. Noninterest expense totaled \$5.1 million during each of the nine month periods ended September 30, 2006 and 2005, not including the impairment loss in 2005. No increase in noninterest expense was necessary to support the 40.1% annualized balance sheet growth achieved during the first nine months of 2006. For the first nine months of 2006, the efficiency ratio improved to 90.98% from 118.70% (exclusive of the impairment loss) during the prior year period. The ratio of noninterest expense to average assets for the first nine months of 2006 improved to 3.28% from 4.26% (exclusive of the impairment loss) during the prior year period. The improvement in these measures was the result of growth in the balance sheet, coupled with control of noninterest expense. We anticipate a continued improvement in these measures as we continue execution of our growth strategy.

Income taxes. The income tax benefit for the nine months ended September 30, 2006 totaled \$76,000 compared to \$547,000 in the prior year period due to a larger pre-tax loss in the prior year.

Financial Condition

General. Assets totaled \$225.1 million at September 30, 2006, an increase of \$52.1 million or 30.1% from \$173.0 million at December 31, 2005 due to growth in the loan portfolio, which was funded with proceeds from the stock offering, deposit growth and FHLB advances.

Loans. Loans totaled \$169.9 million at September 30, 2006, an increase of \$45.8 million or 36.9% compared to \$124.0 million at December 31, 2005. The increase was driven by growth in commercial, commercial real estate and multi-family loans, which totaled \$113.8 million at September 30, 2006, an increase of \$41.3 million or 57.0% compared to \$72.5 million at December 31, 2005. Consumer loans totaled \$31.4 million at September 30, 2006 and increased \$1.8 million or 6.2% compared to \$29.5 million at December 31, 2005. Mortgage loans totaled \$26.7 million at September 30, 2006 and increased \$3.1 million or 13.2% compared to \$23.6 million at December 31, 2005.

Deposits. Deposits totaled \$162.6 million at September 30, 2006, an increase of \$35.0 million or 27.4% compared to \$127.6 million at December 31, 2005. The increase in deposits was due to growth of \$26.5 million in certificate of deposit accounts, \$9.7 million in money market accounts and \$3.3 million in noninterest bearing deposits offset by a decline of \$2.3 million in interest bearing checking accounts and \$2.2 million in traditional savings account balances. The increase in interest bearing deposits was principally due to growth in retail customer relationships and, to a lesser degree, growth in brokered certificate of deposit accounts, which increased \$14.0 million during the nine months ended September 30, 2006. During the quarter ended September 30, 2006, we issued \$6.7 million in

MANAGEMENT'S DISCUSSION AND ANALYSIS

callable brokered certificates of deposit which will assist with asset/liability management should we see a shift in the short end of the interest rate curve and also will lock in longer term funding should rates increase. Growth in noninterest bearing deposits reflected increased commercial customer relationships.

FHLB advances. FHLB advances totaled \$26.3 million at September 30, 2006, an increase of \$3.3 million or 14.2% compared to \$23.0 million at December 31, 2005. These borrowings were used to fund loan growth.

Shareholders' equity. Shareholders' equity totaled \$29.3 million at September 30, 2006, an increase of \$13.2 million or 82.3% compared to \$16.1 million at December 31, 2005 as a result of proceeds from the stock offering discussed above less dividends and the net loss for the nine month period ended September 30, 2006.

Critical Accounting Policies

We follow financial accounting and reporting policies that are in accordance with U. S. generally accepted accounting principles and conform to general practices within the banking industry. These policies are presented in Note 1 to the audited consolidated financial statements in our 2005 Annual Report to Shareholders incorporated by reference into our 2005 Annual Report on Form 10-KSB. Some of these accounting policies are considered to be critical accounting policies, which are those policies that require management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Application of assumptions different than those used by management could result in material changes in our financial position or results of operations. Management believes that the judgments, estimates and assumptions used in the preparation of the consolidated financial statements are appropriate given the factual circumstances at the time.

We have identified accounting policies that are critical accounting policies and an understanding of these is necessary to understand our financial statements. One critical accounting policy relates to determining the adequacy of the allowance for loan losses. The Allowance for Loan Losses Policy provides a thorough, disciplined and consistently applied process that incorporates management's current judgments about the credit quality of the loan portfolio into determination of the allowance for loan losses in accordance with generally accepted accounting principles and supervisory guidance. Management estimates the required allowance balance using past loan loss experience, the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions, and other factors. Management believes that an adequate allowance for loan losses has been established. Additional information regarding this policy is set forth above under the section captioned "Provision for loan losses" and in the notes to the consolidated financial statements in our 2005 Annual Report to Shareholders incorporated by reference into our 2005 Annual Report on Form 10-KSB, Note 1 (Summary of Significant Accounting Policies) and Note 4 (Loans).

Another critical accounting policy relates to the valuation of the deferred tax asset for net operating losses. Net operating losses totaling \$2.8 million, \$2.7 million and \$696,000 expire in 2023, 2024 and 2025, respectively. No valuation allowance has been recorded against the deferred tax asset for net operating losses because the benefit is more likely than not to be realized. As we continue our strategy to expand into business financial services and focus on growth, the resultant increase in interest-earning assets is expected to increase profitability. Additional information is included in Notes 1 and 15 to the audited consolidated financial statements in our 2005 Annual Report to Shareholders incorporated by reference into our 2005 Annual Report on Form 10-KSB.

Liquidity and Capital Resources

In general terms, liquidity is a measurement of ability to meet cash needs. The primary objective in liquidity management is to maintain the ability to meet loan commitments or to repay deposits and other liabilities in accordance with their terms without an adverse impact on current or future earnings. Principal sources of funds are deposits, amortization and prepayments of loans, maturities, sales and principal receipts of securities available for sale, borrowings and operations. While maturities and scheduled amortization of loans are predictable sources of funds, deposit flows and loan prepayments are greatly influenced by general interest rates, economic conditions and competition.

MANAGEMENT'S DISCUSSION AND ANALYSIS

CFBank is required by regulation to maintain sufficient liquidity to ensure its safe and sound operation. Thus, adequate liquidity may vary depending on CFBank's overall asset/liability structure, market conditions, the activities of competitors and the requirements of its own deposit and loan customers. Management believes that CFBank's liquidity is sufficient.

Liquidity management is both a daily and long-term responsibility of management. We adjust our investments in liquid assets, primarily cash, short-term investments and other assets that are widely traded in the secondary market, based on management's assessment of expected loan demand, deposit flows, yields available on interest-earning deposits and securities and the objective of our asset/liability management program. In addition to liquid assets, we have other sources of liquidity available including, but not limited to access to advances from the FHLB, use of brokered deposits and the ability to obtain deposits by offering above-market interest rates.

CFBank relies primarily on competitive rates, customer service and relationships with customers to retain deposits. Based on our historical experience with deposit retention and current retention strategies, we believe that, although it is not possible to predict future terms and conditions upon renewal, a significant portion of deposits will remain with CFBank.

Office of Thrift Supervision (OTS) regulations require savings institutions to maintain certain minimum levels of regulatory capital. Additionally, the regulations establish a framework for the classification of savings institutions into five categories: well-capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized. Generally, an institution is considered well-capitalized if it has a core (Tier 1) capital ratio of at least 5.0% (based on adjusted total assets); a core (Tier 1) risk-based capital ratio of at least 6.0%; and a total risk-based capital ratio of at least 10.0%. At September 30, 2006, CFBank exceeded all of its regulatory capital requirements to be considered well-capitalized with a Tier 1 capital level of \$22.5 million, or 10.1% of adjusted total assets, which exceeds the required level of \$11.1 million, or 5.0%; Tier 1 risk-based capital level of \$22.5 million, or 12.3% of risk-weighted assets, which exceeds the required level of \$11.0 million, or 6.0%; and risk-based capital of \$24.6 million, or 13.4% of risk-weighted assets, which exceeds the required level of \$18.3 million, or 10.0%. In January 2006, the holding company contributed \$10.4 million in capital to CFBank, and operating losses at CFBank may require additional capital contributions from the holding company.

CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures. We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our principal executive and financial officers, as appropriate to allow timely decisions regarding required disclosure. Management, with the participation of our principal executive and financial officers, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)) as of the end of the period covered by this report. Based on such evaluation, our principal executive and financial officers have concluded that, as of the end of such period, our disclosure controls and procedures were effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by us in the reports we file or submit under the Exchange Act.

Changes in internal control over financial reporting. We made no change in our internal control over financial reporting during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
