AMKOR TECHNOLOGY, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State of incorporation)

23-1722724

*(I.R.S. Employer
Identification Number)*

1900 South Price Road

Chandler, AZ 85286

(480) 821-5000

(Address of principal executive offices and zip code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a nonaccelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):
Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of outstanding shares of the registrant's Common Stock as of July 31, 2007 was 181,678,824.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)**

1. Interim Financial Statements

Basis of Presentation. The Consolidated Financial Statements and related disclosures as of June 30, 2007 and for the three and six months ended June 30, 2007 and 2006 are unaudited, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). The December 31, 2006 Consolidated Balance Sheet data was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America (U.S.). Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. In our opinion, these financial statements include all adjustments (consisting only of normal recurring adjustments) necessary for the fair statement of the results for the interim periods. These financial statements should be read in conjunction with the financial statements included in our latest annual report for the year ended December 31, 2006 filed on Form 10-K with the SEC on February 26, 2007. The results of operations for the three and six months ended June 30, 2007 are not necessarily indicative of the results to be expected for the full year. Certain previously reported amounts have been reclassified to conform to the current presentation.

Use of Estimates. The Consolidated Financial Statements have been prepared in conformity with accounting principles generally accepted in the U.S., using management's best estimates and judgments where appropriate. These estimates and judgments affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. The estimates and judgments will also affect the reported amounts for certain revenues and expenses during the reporting period. Actual results could differ materially from these estimates and judgments.

New Accounting Standards

Recently Adopted Standards

In February 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 155, *Accounting for Certain Hybrid Financial Instruments* (SFAS No. 155), which amends SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS No. 133) and SFAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* (SFAS No. 140). SFAS No. 155 simplifies the accounting for certain derivatives embedded in other financial instruments by allowing them to be accounted for as a whole if the holder elects to account for the whole instrument on a fair value basis. SFAS No. 155 also clarifies and amends certain other provisions of SFAS No. 133 and SFAS No. 140. SFAS No. 155 is effective for all financial instruments acquired, issued or subject to a remeasurement event occurring in fiscal years beginning after September 15, 2006. We adopted the provisions of SFAS No. 155 on January 1, 2007. The adoption of this statement did not have any impact on our financial statements and disclosures.

In June 2006, the FASB ratified Emerging Issues Task Force (EITF) Issue No. 06-03, *How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That Is, Gross Versus Net Presentation)* (Issue No. 06-03). Under Issue No. 06-03, a company must disclose its accounting policy regarding the gross or net presentation of certain taxes. If taxes included in gross revenues are significant, a company must disclose the amount of such taxes for each period for which an income statement is presented (i.e., both interim and annual periods). Taxes within the scope of this Issue are those that are imposed on and concurrent with a specific revenue-producing transaction. Taxes assessed on an entity's activities over a period of time, such as gross receipts

taxes, are not within the scope of the issue. Issue No. 06-03 is effective for the first annual or interim reporting period beginning after December 15, 2006. We adopted the provisions of EITF Issue No. 06-03 on January 1, 2007. We present applicable taxes on a net basis in our consolidated financial statements. The adoption of Issue No. 06-03 did not have an impact on our financial statements and disclosures.

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In July 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48), which clarifies the accounting and disclosure for uncertainty in income tax positions, as defined. FIN 48 seeks to reduce the diversity in practice associated with certain aspects of the recognition and measurement related to accounting for income taxes. FIN 48 requires that we recognize in our consolidated financial statements the impact of a tax position, if that position is more likely than not of being sustained on audit, based on the technical merits of the position. The provisions of FIN 48 also provide guidance on derecognition, classification, interest and penalties, accounting in interim periods, and disclosures. This interpretation is effective for fiscal years beginning after December 15, 2006, with the cumulative effect of the change in accounting principle recorded as an adjustment to the opening balance of retained earnings. We adopted the provisions of FIN 48 on January 1, 2007. The adoption of FIN 48 did not have a material impact on the opening balance of retained earnings. See Note 4 for more information.

In September 2006, the FASB issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans an amendment of SFAS Statement No. 87, Employers' Accounting for Pensions, SFAS No. 88, Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and Termination Benefits, SFAS No. 106, Employers' Accounting for Postretirement Benefits Other Than Pensions, and SFAS No. 132(R), Employers' Disclosure about Pensions and Other Postretirement Benefits* (SFAS No. 158). SFAS No. 158 requires the recognition of the funded status of a defined benefit pension plan (other than a multi-employer plan) as an asset or liability in the statement of financial position and the recognition of changes in the funded status through comprehensive income in the year in which such changes occur. We adopted the recognition provisions of SFAS No. 158 and initially applied those to the funded status of our defined benefit pension plans as of December 31, 2006. The initial recognition of the funded status of our defined benefit pension plans resulted in a decrease in stockholders' equity of \$11.8 million, which was net of a tax benefit of \$0.8 million.

SFAS No. 158 also requires that the funded status of a plan be measured as of the date of the year-end statement of financial position effective for fiscal years ending after December 15, 2008. We currently measure our funded status as of the balance sheet date. Accordingly, the adoption of the measurement provisions of SFAS No. 158 will have no impact on our financial statements.

Recently Issued Standards

The FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS No. 157), which provides guidance for using fair value to measure assets and liabilities. The standard also responds to investors' requests for more information about (1) the extent to which companies measure assets and liabilities at fair value, (2) the information used to measure fair value, and (3) the effect that fair value measurements have on earnings. SFAS No. 157 will apply whenever another standard requires (or permits) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value to any new circumstances. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. We are currently evaluating the impact of this standard on our financial statements and disclosures.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS No. 159). SFAS No. 159 provides the option to report certain financial assets and liabilities at fair value, with the intent to mitigate volatility in financial reporting that can occur when related assets and liabilities are recorded on different bases. SFAS No. 159 also amends SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, by providing the option to record unrealized gains and losses on held-for-sale and held-to-maturity securities currently. SFAS No. 159 is effective for financial statements issued for fiscal years

beginning after November 15, 2007, and interim periods within those fiscal years. We are currently evaluating the impact of this standard on our financial statements and disclosures.

2. Stock Compensation Plans

We account for our stock option plans in accordance with SFAS No. 123(R) *Share-Based Payments* (SFAS No. 123(R)). SFAS No. 123(R) requires that all share-based payments to employees, including grants

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

of employee stock options, be measured at fair value and expensed over the service period (generally the vesting period).

The following table presents stock-based employee compensation expense included in the Consolidated Statements of Income:

	For the Three Months		For the Six	
	Ended		Months Ended	
	June 30,		June 30,	
	2007	2006	2007	2006
	(In thousands)		(In thousands)	
Cost of sales	\$ 352	\$ 357	\$ 681	\$ 638
Selling, general, and administrative	678	845	1,150	1,659
Stock-based compensation expense	\$ 1,030	\$ 1,202	\$ 1,831	\$ 2,297

Stock Option Plans. Substantially all of the options granted are generally exercisable pursuant to a two, three or four-year vesting schedule and the term of the options granted is no longer than ten years. A summary of the stock option plans and the respective plan termination dates and shares available for grant as of June 30, 2007 is shown below.

Stock Option Plans	1998 Director Option Plan	1998 Stock Plan	2003 Inducement Plan
Contractual Life (yrs)	10	10	10
Plan termination date	January 2008	January 2008	Board of Directors Discretion
Shares available for grant at June 30, 2007	141,666	7,392,109	378,500

In order to calculate the fair value of stock options at the date of grant, we used the Black-Scholes option pricing model. Expected volatilities are weighted based on the historical performance of our stock. We also use historical data to estimate the timing and amount of option exercises and forfeitures within the valuation model. The expected term of the options is based on evaluations of historical and expected future employee exercise behavior and represents the period of time that options granted are expected to be outstanding. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

The following assumptions were used to calculate weighted average fair values of the options granted for the three and six months ended June 30, 2006. There were no grants during the three and six months ended June 30, 2007:

	For the Three Months Ended June 30, 2006	For the Six Months Ended June 30, 2006
Expected life (in years)	5.8	5.8
Risk-free interest rate	4.9%	4.6%
Volatility	74%	78%
Dividend yield		
Weighted average grant date fair value per option granted	\$ 7.09	\$ 4.84

The intrinsic value of options exercised for the three and six months ended June 30, 2007 was \$7.5 million and \$10.9 million, respectively. The intrinsic value of options exercised for the three and six months ended June 30, 2006 was \$0.9 million and \$1.5 million, respectively.

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following is a summary of all option activity for the six months ended June 30, 2007:

	Number of Shares	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at December 31, 2006	15,334,089	\$ 10.47		
Granted				
Exercised	(3,403,875)	10.13		
Forfeited or expired	(681,919)	12.83		
Outstanding at June 30, 2007	11,248,295	10.45	5.03	\$ 61,482,350
Exercisable at June 30, 2007	9,552,200	11.26	4.50	\$ 44,762,330
Fully vested and expected to vest at June 30, 2007	11,028,812	10.54	4.97	\$ 59,307,165

Total unrecognized compensation expense from stock options, excluding any forfeiture estimate, was \$5.2 million as of June 30, 2007, which is expected to be recognized over a weighted-average period of 1.1 years.

For the six months ended June 30, 2007 and 2006, cash received from option exercises under all share-based payment arrangements was \$34.5 million and \$5.0 million, respectively. There was no tax benefit realized. The related cash receipts are included in financing activities in the accompanying Condensed Consolidated Statements of Cash Flows.

3. Comprehensive Income

The components of comprehensive income are summarized below:

	For the Three Months Ended June 30, 2007 2006 (In thousands)		For the Six Months Ended June 30, 2007 2006 (In thousands)	
Net income	\$ 30,990	\$ 23,788	\$ 65,580	\$ 58,227
Unrealized loss on investments, net of tax	(292)		(1,004)	(2,571)

Reclassification adjustment for losses included in net income		2,624		2,624
Change in unrecognized pension costs, net of tax	128		251	
Foreign currency translation adjustment	(824)	(71)	(1,665)	2,230
Total comprehensive income	\$ 30,002	\$ 26,341	\$ 63,162	\$ 60,510

The components of accumulated other comprehensive loss consisted of the following:

	June 30, 2007	December 31, 2006
	(In thousands)	
Unrealized gains (losses) on securities	\$ (44)	\$ 960
Unrecognized pension costs	(11,584)	(11,835)
Cumulative unrealized foreign currency translation gains	3,148	4,813
Total accumulated other comprehensive loss	\$ (8,480)	\$ (6,062)

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****4. Income Taxes**

We operate in and file income tax returns in various U.S. and foreign jurisdictions that are subject to examination by tax authorities. Our estimated tax liability is subject to change as examinations of our tax returns are completed by the tax authorities in the respective jurisdictions. We believe that any additional taxes or related interest over the amounts accrued will not have a material effect on our financial condition, results of operations or cash flows, nor do we expect that such examinations will result in a material favorable impact. However, resolution of these matters involves uncertainties and there are no assurances that the outcome will be favorable.

Income tax expense for the three and six months ended June 30, 2007 and 2006 is attributable to foreign withholding taxes and income taxes at certain of our profitable foreign operations. Our effective tax rate of 11.2% for the six months ended June 30, 2007 reflects the utilization of foreign net operating loss carryforwards and tax holidays in certain foreign jurisdictions. At June 30, 2007, we had U.S. net operating loss carryforwards totaling \$400.6 million, which expire at various times through 2027. Additionally, at June 30, 2007, we had \$46.6 million of non-U.S. operating loss carryforwards, which expire at various times through 2012.

We maintain a valuation allowance on substantially all of our deferred tax assets, including our net operating loss carryforwards, and we will release such valuation allowance as the related tax benefits are realized on our tax returns or when sufficient net positive evidence exists to conclude that the deferred tax assets will be realized.

We adopted the provisions of FIN 48 on January 1, 2007. We recognized no cumulative effect of the adoption of FIN 48 to the opening balance of retained earnings as a result of the implementation of FIN 48. The gross amount of unrecognized tax benefits upon adoption of FIN 48 was \$11.8 million. The gross amount of unrecognized tax benefits resulting from prior periods decreased by \$0.2 million during the quarter ended June 30, 2007. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate is \$1.6 million as of January 1, 2007 and \$1.7 million as of June 30, 2007. It is reasonably possible that the total amount of unrecognized tax benefits will decrease within 12 months due to statutes of limitations expiring in certain foreign jurisdictions which would decrease our non-US unrecognized tax benefits related to foreign revenue attribution by less than \$1.0 million.

We have recognized less than \$0.1 million of interest and penalties in the Consolidated Statement of Income for the three and six months ended June 30, 2007 in connection with our unrecognized tax benefits. Interest and penalties are classified as income taxes in the financial statements. The total amount of interest and penalties included in long-term liabilities in connection with our unrecognized tax benefits is \$0.3 million and \$0.4 million as of January 1, 2007 and June 30, 2007, respectively.

As of January 1, 2007 and June 30, 2007, the following tax years remain subject to examination in the following major tax jurisdictions:

China 2001 through 2006
 Japan 2001 through 2006
 Korea 2001 through 2006
 Philippines 2003 through 2006
 Singapore 2004 through 2006
 Taiwan 2001 through 2006

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****5. Earnings Per Share**

Basic earnings per share (EPS) is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted EPS adjusts net income and the outstanding shares for the dilutive effect of stock options and convertible debt. The following table summarizes the computation of basic and diluted EPS:

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2007	2006	2007	2006
	(In thousands, except per share data)		(In thousands, except per share data)	
Net income	\$ 30,990	\$ 23,788	\$ 65,580	\$ 58,227
Adjustment for dilutive securities on net income:				
Interest on 2.5% convertible notes due 2011, net of tax	1,187	448	2,375	448
Interest on 6.25% convertible notes due 2013, net of tax	1,562	1,563	3,125	3,351
Net income diluted	\$ 33,739	\$ 25,799	\$ 71,080	\$ 62,026
Weighted average shares outstanding basic	180,392	177,689	179,456	177,245
Effect of dilutive securities:				
Stock options	3,102	677	2,452	760
2.5% convertible notes due 2011	13,023	5,152	13,023	2,590
6.25% convertible notes due 2013	13,351	13,351	13,351	13,351
Weighted average shares outstanding diluted	209,868	196,869	208,282	193,946
EPS:				
Basic	\$ 0.17	\$ 0.13	\$ 0.37	\$ 0.33
Diluted	\$ 0.16	\$ 0.13	\$ 0.34	\$ 0.32

The following table summarizes the potential shares of common stock that were excluded from diluted EPS, because the effect of including these potential shares was antidilutive:

**For the Six
Months Ended**

	For the Three Months Ended June 30,		June 30,	
	2007	2006	2007	2006
	(In thousands)		(In thousands)	
Stock options	1,148	12,330	2,007	12,956
5.0% convertible notes due 2007		2,572	1,021	2,564
5.75% convertible notes due 2013		2,514		3,143
Total potentially dilutive shares	1,148	17,416	3,028	18,663

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****6. Accounts Receivable**

Accounts receivable, trade consists of the following:

	June 30, 2007	December 31, 2006
	(In thousands)	
Accounts receivable	\$ 371,324	\$ 392,370
Allowance for sales credits	(7,589)	(9,247)
Allowance for doubtful accounts	(1,114)	(2,235)
	\$ 362,621	\$ 380,888

7. Inventories

Inventories consist of the following:

	June 30, 2007	December 31, 2006
	(In thousands)	
Raw materials and purchased components	\$ 106,497	\$ 126,492
Work-in-process	33,139	34,676
Finished goods	1,374	3,010
	\$ 141,010	\$ 164,178

We report inventories net of the allowance for excess and obsolete inventory of \$29.9 million and \$25.5 million at June 30, 2007 and December 31, 2006, respectively.

8. Property, Plant and Equipment

Property, plant and equipment consists of the following:

	June 30, 2007	December 31, 2006
	(In thousands)	

Edgar Filing: AMKOR TECHNOLOGY INC - Form 10-Q

Land	\$ 110,436	\$ 110,730
Land use rights in China	19,945	19,945
Buildings and improvements	793,980	790,847
Machinery and equipment	2,123,036	2,057,939
Furniture, fixtures and other equipment	142,583	141,621
Construction and assets in progress	26,284	8,617
	3,216,264	3,129,699
Less Accumulated depreciation and amortization	(1,798,171)	(1,686,096)
	\$ 1,418,093	\$ 1,443,603

Construction and assets in progress at June 30, 2007 and December 31, 2006, includes \$19.0 million and \$5.1 million, respectively, related to implementing a new enterprise resource planning system to replace many of our existing systems at significant locations.

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table reconciles our activity related to property, plant and equipment as presented on the Condensed Consolidated Statements of Cash Flows to property, plant and equipment additions as reflected in the Consolidated Balance Sheets:

	For the Six Months Ended June 30,	
	2007	2006
	(In thousands)	
Payments for property, plant, and equipment	\$ 102,212	\$ 169,469
Net increase in related accounts payable and deposits	12,607	26,805
Property, plant and equipment additions	\$ 114,819	\$ 196,274

9. Goodwill and Other Intangibles Assets

The change in the carrying value of goodwill, all of which relates to our packaging services segment, is as follows:

	(In thousands)	
Balance as of December 31, 2006	\$	671,900
Additions		782
Translation adjustments		(312)
Balance as of June 30, 2007	\$	672,370

In March 2007, we increased goodwill by \$0.8 million for additional consideration paid with respect to an earn-out provision in connection with our investment in Unitive Semiconductor Taiwan (UST).

During the second quarter of 2007, in accordance with the provisions of FASB Statement No. 142, *Goodwill and Other Intangible Assets*, we performed our annual impairment test on goodwill and concluded that goodwill was not impaired.

Intangibles as of June 30, 2007 consist of the following:

Gross	Accumulated Amortization (In thousands)	Net
--------------	--	------------

Patents and technology rights	\$ 74,824	\$ (54,884)	\$ 19,940
Customer relationship and supply agreements	8,858	(4,357)	4,501
	\$ 83,682	\$ (59,241)	\$ 24,441

Intangibles as of December 31, 2006 consist of the following:

	Gross	Accumulated Amortization (In thousands)	Net
Patents and technology rights	\$ 74,468	\$ (50,167)	\$ 24,301
Customer relationship and supply agreements	8,858	(3,465)	5,393
	\$ 83,326	\$ (53,632)	\$ 29,694

Amortization of identifiable intangible assets was \$2.4 million for the three months ended June 30, 2007 and 2006. Amortization of identifiable intangible assets was \$5.6 million and \$4.7 million for the six months ended June 30, 2007 and 2006, respectively.

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Based on the amortizing intangible assets recognized in our balance sheet at June 30, 2007, amortization for each of the next five fiscal years is estimated as follows:

	(In thousands)
2007 Remaining	\$ 4,755
2008	9,451
2009	4,693
2010	2,560
2011	926

10. Accrued Expenses

Accrued expenses consist of the following:

	June 30, 2007	December 31, 2006
	(In thousands)	
Accrued interest	\$ 21,569	\$ 22,721
Accrued payroll	25,305	39,998
Customer advances	11,707	17,533
Accrued income taxes	4,318	5,382
Other accrued expenses	70,145	59,867
	\$ 133,044	\$ 145,501

11. Debt

Following is a summary of short-term borrowings and long-term debt:

	June 30, 2007	December 31, 2006
	(In thousands)

Long-term debt (including related party)	\$ 1,653,412	\$ 1,819,901

Debt of Amkor Technology Inc.**Senior Secured Credit Facilities**

In November 2005, we entered into a \$100.0 million first lien revolving credit facility available through November 2009, with a letter of credit sub-limit of \$25.0 million. Interest is charged under the credit facility at a floating rate based on the base rate in effect from time to time plus the applicable margins which range from 0.0% to 0.5% for base rate revolving loans, or LIBOR plus 1.5% to 2.25% for LIBOR revolving loans. The LIBOR-based interest rate at June 30, 2007 was 6.86%; however, no borrowings were outstanding on this credit facility. As of June 30, 2007, we had utilized \$0.2 million of the available letter of credit sub-limit, and had \$99.8 million available under this facility. The borrowing base for the revolving credit facility is based on the valuation of our eligible accounts receivable. We incur commitment fees on the unused amounts of the revolving credit facility ranging from 0.25% to 0.50%, based on our liquidity. This facility includes a number of affirmative and negative covenants, which could restrict our operations. If we were to default under the first lien revolving credit facility, we would not be permitted to draw additional amounts, and the banks could accelerate our obligation to pay all outstanding amounts.

In October 2004, we entered into a \$300.0 million second lien term loan with a group of institutional lenders. The term loan bore interest at a rate of LIBOR plus 450 basis points (9.87% at December 31, 2006); and would have matured in October 2010. The loan was secured by a second lien on substantially all of our U.S. subsidiaries' assets, including a portion of the shares of certain of our foreign subsidiaries. The second lien term loan was refinanced and paid in full on April 5, 2007 with the proceeds of the \$300.0 million, 7-year secured credit facility with Woori Bank in Korea. In connection with the prepayment of the second lien term loan, we recorded a loss on debt retirement of \$15.7 million in April 2007, which included \$9.0 million in prepayment fees and \$6.7 million of unamortized deferred

debt issuance costs. This repayment transaction fully discharged all of our obligations under the second lien term loan and fully discharged all subsidiary guarantees and releases all the collateral securing the second lien term loan.

Senior and Senior Subordinated Notes

In February 2001, we issued \$500.0 million of 9.25% Senior Notes due February 2008 (the 2008 Notes). As of December 31, 2005, we had purchased \$29.5 million of these notes. In January 2006, we purchased an additional

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

\$30.0 million of these notes and recorded a gain on extinguishment of \$0.7 million which is included in debt retirement costs, net, which was partially offset by the write-off of a proportionate amount of our deferred debt issuance costs of \$0.2 million. A portion of the 2008 Notes are not redeemable prior to their maturity. In April 2006, we announced a tender offer for the 2008 Notes. We used the net proceeds from the 2016 Notes (described below) to purchase \$352.3 million in notes tendered. We recorded a \$20.2 million loss on extinguishment related to premiums paid for the purchase of the 2008 Notes and a \$2.2 million charge for the associated unamortized deferred debt issuance costs. Both charges are included in debt retirement costs, net in the Consolidated Statements of Income.

In March 2004, we issued \$250.0 million of 7.125% Senior Notes due March 2011 (the 2011 Notes). The 2011 Notes were priced at 99.321%, yielding an effective interest rate of 7.25%. The 2011 Notes are redeemable by us at any time provided we pay the holders a make-whole premium. Prior to March 15, 2007, we could have redeemed up to 35% of the aggregate principal amount of the 2011 Notes from the proceeds of one or more equity offerings at a price of 107.125% of the principal amount plus accrued and unpaid interest. No redemptions were made prior to March 15, 2007.

In May 2003, we issued \$425.0 million of 7.75% Senior Notes due May 2013 (the 2013 Notes). The 2013 Notes are not redeemable at our option until May 2008.

In May 2006, we issued \$400.0 million of 9.25% Senior Notes due June 2016 (the 2016 Notes). The Notes are redeemable by us prior to June 1, 2011 provided we pay the holders a make-whole premium. After June 1, 2011, the 2016 Notes are redeemable at specified prices. In addition, prior to June 1, 2009, we may redeem up to 35% of the 2016 Notes at a specified price with the proceeds of certain equity offerings. After deducting fees to the underwriter, the net proceeds were used to purchase a portion of the 2008 Notes, and to pay respective accrued interest and tender premiums.

In May 1999, we issued \$200.0 million of 10.5% Senior Subordinated Notes due May 2009 (the 2009 Notes). In June 2006, we used the proceeds from the May 2011 Notes (described below) in connection with a partial call of the 2009 Notes for which \$178.1 million of the 2009 Notes were repurchased. We recorded a \$3.1 million loss on extinguishment related to premiums paid for the purchase of the 2009 Notes and a \$2.2 million charge for the associated unamortized deferred debt issuance costs. Both charges are included in debt retirement costs, net. In June 2007, we redeemed the remaining \$21.9 million of the 2009 Notes outstanding with cash on hand, and the indenture has been terminated. We recorded a charge of \$0.2 million to write-off the unamortized deferred debt issuance costs in June 2007.

The senior notes contain a number of affirmative and negative covenants, which could restrict our operations.

Senior Subordinated and Subordinated Convertible Notes

In May 2006, we issued \$190.0 million of our 2.5% Convertible Senior Subordinated Notes due 2011 (the May 2011 Notes). The May 2011 Notes are convertible at any time prior to the maturity date into our common stock at a price of \$14.59 per share, subject to adjustment. The May 2011 Notes are subordinated to the prior payment in full of all of our senior debt. After deducting fees to the underwriter, the net proceeds from the issuance of the May 2011 Notes were used to repurchase a portion of the 2009 Notes, pay respective accrued interest and call premiums. The senior subordinated notes contain a number of affirmative and negative covenants which could restrict our operations.

In March 2000, we issued \$258.8 million of our 5.0% Convertible Subordinated Notes due March 2007 (the 2007 Notes). The 2007 Notes were subordinated to the prior payment in full of all of our senior and senior subordinated debt. In November 2003, we repurchased \$112.3 million of our 2007 Notes with the proceeds of an equity offering. In June 2006, we repurchased \$4.0 million of our 2007 Notes at 99.875%. In March 2007, we repaid the remaining balance of \$142.4 million at the maturity date with cash on hand.

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In November 2005, we issued \$100.0 million of our 6.25% Convertible Subordinated Notes due December 2013 (the December 2013 Notes) in a private placement to James J. Kim, our Chairman and Chief Executive Officer, and certain Kim family members. The December 2013 Notes are presented as long-term debt, related party on the Consolidated Balance Sheets. The December 2013 Notes are convertible at any time prior to the maturity date into our common stock at an initial price of \$7.49 per share (the market price of our common stock on the date of issuance of the December 2013 Notes was \$6.20 per share), subject to adjustment. The December 2013 Notes are subordinated to the prior payment in full of all of our senior and senior subordinated debt. In March 2006, we filed a registration statement with the SEC registering the notes and the shares of common stock issuable upon conversion, pursuant to the requirements of a registration rights agreement. The proceeds from the sale of the December 2013 Notes were used to purchase a portion of the 2006 Notes described above. The December 2013 Notes are not redeemable at our option until December 2010.

Debt of Subsidiaries**Secured Term Loans**

In April 2007, Amkor Technology Korea, Inc., a Korean subsidiary (ATK), entered into a \$300.0 million, 7-year secured term loan (Term Loan) with Woori Bank. The Term Loan is guaranteed on an unsecured basis by Amkor Technology, Inc (Amkor). The Term Loan is secured by substantially all the land, factories, and equipment located at our ATK facilities. The Term Loan bears interest at Woori's base rate plus 50 basis points (6.6% as of June 30, 2007) and amortizes in 28 equal quarterly payments through April 2014. The proceeds of the Term Loan were used to refinance Amkor's existing \$300.0 million second lien term loan, due October 2010 (see above). We incurred \$3.4 million in debt issuance costs in connection with the Woori loan, which amount was funded from cash on hand.

In June 2005, UST entered into a New Taiwan Dollar (NT\$) 400.0 million (approximately \$12.2 million) term loan due June 20, 2008 (the UST Note), which accrues interest at the Taiwan 90-Day Commercial Paper Secondary Market rate plus 2.25% (4.7% and 4.23% as of June 30, 2007 and December 31, 2006, respectively). The proceeds of the UST Note were used to satisfy notes previously held by UST. Amkor has guaranteed the repayment of this loan. The agreement governing the UST Note includes a number of affirmative and negative covenants which could restrict our operations. If we were to default under the facility, the lenders could accelerate our obligation to pay all outstanding amounts.

In November 2005, Amkor Technology Taiwan, Inc. (ATT) entered into a NT\$1.8 billion (approximately \$53.5 million) syndication loan due November 2010 (the Syndication Loan), which accrues interest at the Taiwan 90-Day Commercial Paper Primary Market rate plus 1.2% (4.21% and 3.22% as of June 30, 2007 and December 31, 2006, respectively). Amkor has guaranteed the repayment of this loan. The agreement governing the Syndication Loan includes a number of affirmative, negative and financial covenants, which could restrict our operations. If we were to default under the facility, the lenders could accelerate our obligation to pay all outstanding amounts.

Secured Equipment and Property Financing

Our secured equipment and property financing consists of loans secured with specific assets at our Japanese, Singaporean and Chinese subsidiaries. Our credit facility in Japan provides for equipment financing on a three-year basis for each piece of equipment purchased. The Japanese facility accrues interest at 3.59% on all outstanding balances and has maturities at various times between 2006 and 2008. In December 2005, our Singaporean subsidiary

entered into a loan with a finance company for \$10.0 million, which accrues interest at 4.86% and is due December 2008. The loan, guaranteed by Amkor is secured by a monetary security deposit and certain equipment in our Singapore facility. In May 2004, our Chinese subsidiary entered into a \$5.5 million credit facility secured with buildings at one of our Chinese production facilities and is payable ratably through January 2012. The interest rate for the Chinese financing at June 30, 2007 and December 31, 2006, was 6.73% and 6.14%, respectively. These equipment and property financings contain affirmative and negative covenants, which could restrict our operations,

Table of Contents

AMKOR TECHNOLOGY, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

and, if we were to default on our obligations under these financings, the lenders could accelerate our obligation to repay amounts borrowed under such facilities.

Revolving Credit Facilities

Amkor Iwate Corporation, a Japanese subsidiary (AIC), has a revolving line of credit with a Japanese bank for 2.5 billion Japanese yen (approximately \$21.2 million), maturing in September 2007, that accrues interest at the Tokyo Interbank Offering Rate (TIBOR) plus 0.6%. The interest rate at June 30, 2007 ranged from 1.23% to 1.24%, and December 31, 2006 ranged from 0.97% to 1.04%. Amounts drawn on the line of credit were \$2.4 million and \$7.6 million at June 30, 2007 and December 31, 2006, respectively.

Additionally, AIC has a revolving line of credit at a Japanese bank for 300.0 million Japanese yen (approximately \$2.4 million), maturing in June 2008, that accrues interest at TIBOR plus 0.5%. The interest rate at June 30, 2007 and at December 31, 2006 was 1.12% and 0.92%, respectively. There was \$2.4 million drawn on the line of credit as of June 30, 2007. There were no amounts outstanding at December 31, 2006.

Our Philippine subsidiary has a revolving line of credit of 895.0 million Philippine peso (approximately \$18.5 million), maturing October 2007, that accrues interest at LIBOR plus 1.0% (6.36% and 6.23% at June 30, 2007 and December 31, 2006, respectively). There were no amounts outstanding at June 30, 2007 and December 31, 2006.

In January 2006, Amkor Assembly & Test (Shanghai) Co. Ltd., a Chinese subsidiary (AATS), entered into a \$15.0 million working capital facility which accrues interest at LIBOR plus 1.25%, and was paid off at maturity in January 2007 with cash on hand. The borrowings outstanding as of December 31, 2006 were \$15.0 million. At December 31, 2006, the interest rate ranged from 6.62% to 6.81% based on the dates of borrowing.

UST had a revolving line of credit with a Taiwan bank for NT\$60.0 million (approximately \$1.9 million) that matured in June 2007. We expect to renew this facility for NT\$20.0 million (approximately \$0.6 million) in August 2007. The line of credit accrues interest at a variable interest rate. The interest rate at June 30, 2007 and December 31, 2006 was 3.98% and 3.60%, respectively. There were no amounts drawn on the line of credit as of June 30, 2007 and December 31, 2006.

These lines of credit contain certain affirmative and negative covenants, which could restrict our operations. If we were to default on our obligations under any of these lines of credit, we would not be permitted to draw additional amounts, and the lenders could accelerate our obligation to pay all outstanding amounts.

Other Debt

Other debt includes debt related to our Taiwanese subsidiaries with fixed and variable interest rates that matured in June 2007. The interest rate on this debt ranged from 3.14% to 4.5% as of December 31, 2006.

Interest expense related to short-term borrowings and long-term debt is presented net of interest income in the accompanying Consolidated Statements of Income. Interest income for the three and six months ended June 30, 2007 was \$1.7 million and \$3.8 million, respectively. For the three and six months ended June 30, 2006, interest income was \$2.2 million and \$3.6 million, respectively.

Compliance with Debt Covenants

We were in compliance with all of our covenants as of June 30, 2007 and December 31, 2006.

12. Pension and Severance Plans

Our Philippine, Taiwanese and Japanese subsidiaries sponsor defined benefit plans that cover substantially all of their respective employees who are not covered by statutory plans. Charges to expense are based upon costs

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

computed by independent actuaries. The components of net periodic pension cost for these defined benefit plans are as follows:

	For the Three Months		For the Six	
	Ended		Months Ended	
	June 30,		June 30,	
	2007	2006	2007	2006
	(In thousands)		(In thousands)	
Components of net periodic pension cost				
Service cost	\$ 1,564	\$ 1,025	\$ 3,069	\$ 2,182
Interest cost	902	682	1,762	1,366
Expected return on plan assets	(466)	(388)	(910)	(778)
Amortization of transitional obligation	19	17	38	34
Amortization of prior service cost	18	17	36	35
Recognized actuarial loss	113		220	
Total net periodic pension cost	\$ 2,150	\$ 1,353	\$ 4,215	\$ 2,839

For the three and six months ended June 30, 2007, \$0.5 million and \$1.0 million, respectively, was contributed to fund the pension plans. In 2007, we anticipate contributing an additional \$8.3 million to fund the pension plans.

Our Korean subsidiary participates in an accrued severance plan that covers employees and directors with at least one year of service. Eligible employees are entitled to receive a lump-sum payment upon termination of their employment, based on their length of service, seniority and rate of pay at the time of termination. Accrued severance benefits are estimated assuming all eligible employees were to terminate their employment at the balance sheet date. Our contributions to the National Pension Plan of the Republic of Korea are deducted from accrued severance benefit liabilities. For the three months ended June 30, 2007 and 2006, the provision recorded for severance benefits was \$8.9 million and \$7.8 million, respectively. For the six months ended June 30, 2007 and 2006, the provision recorded for severance benefits was \$23.4 million and \$17.1 million, respectively. The balance recorded in pension and severance obligations for accrued severance at our Korean subsidiary was \$162.3 million and \$142.3 million at June 30, 2007 and December 31, 2006, respectively.

13. Other Non-Current Liabilities

Other non-current liabilities consist of the following:

June 30,	December 31,
2007	2006
(In thousands)	

Customer advances	\$ 20,429	\$ 24,397
Other non-current liabilities	12,563	5,611
	\$ 32,992	\$ 30,008

Customer advances relate to supply agreements with customers where we commit capacity in exchange for customer prepayment of services.

14. Commitments and Contingencies

Indemnifications and Guarantees

We have indemnified members of our Board of Directors and our corporate officers against any threatened, pending or completed action or proceeding, whether civil, criminal, administrative or investigative by reason of the fact that the individual is or was a director or officer of the company. The individuals are indemnified, to the fullest

Table of Contents

AMKOR TECHNOLOGY, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

extent permitted by law, against related expenses, judgments, fines and any amounts paid in settlement. We also maintain directors and officers insurance coverage in order to mitigate our exposure to these indemnification obligations. The maximum amount of future payments is generally unlimited. There is no amount recorded for these indemnifications at June 30, 2007 and December 31, 2006. Due to the nature of these indemnifications, it is not possible to make a reasonable estimate of the maximum potential loss or range of loss. No assets are held as collateral and no specific recourse provisions exist related to these indemnifications.

As of June 30, 2007, we have outstanding \$0.2 million of standby letters of credit and have available an additional \$24.8 million. Such standby letters of credit are used in the ordinary course of our business and are collateralized by our cash balances.

We generally warrant that our services will be performed in a professional and workmanlike manner and in compliance with our customers' specifications. We accrue costs for known warranty issues. Historically, our warranty costs have been immaterial.

Legal Proceedings

We are involved in claims and legal proceedings and we may become involved in other legal matters arising in the ordinary course of our business. We evaluate these claims and legal matters on a case-by-case basis to make a determination as to the impact, if any, on our results of operations or financial condition. Except as indicated below, we currently believe that the ultimate outcome of these claims and proceedings, individually and in the aggregate, will not have a material adverse impact on our financial position, results of operations or cash flows. The estimate of the potential impact of these claims and legal proceedings on our financial position, results of operations or cash flows could change in the future.

We currently are party to the legal proceedings described below. Attorney fees related to legal matters are expensed as incurred. During the six months ended June 30, 2006, we recorded a provision of \$1.0 million related to the epoxy mold compound matter. There were no charges in 2007.

Tessera, Inc. v. Amkor Technology, Inc.

On March 2, 2006, Tessera, Inc. filed a Request for Arbitration (the "Request") with the International Court of Arbitration of the International Chamber of Commerce, captioned *Tessera, Inc. v. Amkor Technology, Inc.* The subject matter of the arbitration is a Limited TCC License Agreement ("Agreement") entered into between Tessera and our predecessor in 1996. The Agreement licenses certain patents and know-how relating to semiconductor packaging. In their Request, Tessera alleges breach of contract and asserts Amkor owes Tessera royalties under the Agreement in an amount between \$85 and \$115 million for semiconductor packages assembled by us through 2005 and that Amkor has thereafter continued to assemble semiconductor packages subject to royalties. In our Answer and Counterclaim, we denied that any royalties were owed, and asserted that we are not using any of the licensed Tessera patents or know-how. We also asserted defenses and counterclaims of invalidity and unenforceability of the four patents identified by Tessera in their Request as the basis for their claim (U.S. Patent Nos. 5,679,977, 5,852,326, 6,433,419 and 6,465,893). On November 10, 2006, Tessera provided their Preliminary Claim Charts and added two additional patents to the proceeding, U.S. Patent Nos. 6,133,627 and 5,861,666.

On April 17, 2007, Tessera served notice to Amkor that it has terminated the Agreement, which is the basis for the breach of contract dispute in the ICC Arbitration. Amkor has disputed Tessera's purported notice that it is entitled to terminate the Agreement. Also on April 17, 2007, Tessera instituted an action in Federal District Court for the Eastern District of Texas against certain of Amkor's customers, and on May 15, 2007, at Tessera's request, the United States International Trade Commission (ITC) instituted an investigation of certain Amkor customers. Both the ITC investigation and the Texas action allege infringement of two of the same patents asserted by Tessera in the arbitration, and Tessera may seek to include in those actions some of the same products packaged by Amkor that are at issue in the arbitration. Although Amkor has not been named as a respondent in the ITC investigation or a

Table of Contents

AMKOR TECHNOLOGY, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

defendant in the Texas action, Amkor has received notification from a customer of a request for indemnification in connection with Tessera's claims in those actions. Amkor has not accepted such request for indemnification.

The arbitration is currently set for a hearing beginning March 2008. Although we believe that we have meritorious defenses and counterclaims in this matter and will seek a judgment in our favor, it is not possible to predict the outcome of the arbitration or the total cost of resolving this controversy including the impact of possible future claims of additional royalties by Tessera. The final resolution of this controversy could result in significant liabilities and could have a material adverse effect on our financial condition, results of operations and cash flows.

Securities Class Action Litigation

On January 23, 2006, a purported securities class action suit entitled *Nathan Weiss et al. v. Amkor Technology, Inc. et al.*, was filed in U.S. District Court for the Eastern District of Pennsylvania against Amkor and certain of its current and former officers. Subsequently, other law firms filed two similar cases, which were consolidated with the initial complaint. In August 2006 and again in November 2006, the plaintiffs amended the complaint. The plaintiffs added additional officer, director and former director defendants and allege improprieties in certain option grants. The amended complaint further alleges that defendants improperly recorded and accounted for the options in violation of generally accepted accounting principles and made materially false and misleading statements and omissions in its disclosures in violation of the federal securities laws, during the period from July 2001 to July 2006. The amended complaint seeks certification as a class action pursuant to Fed. R. Civ. Proc. 23, compensatory damages, costs and expenses, and such other further relief as the Court deems just and proper. On December 28, 2006, pursuant to motion by defendants, the U.S. District Court for the Eastern District of Pennsylvania transferred this action to the U.S. District Court for the District of Arizona. Defendants have filed motions to dismiss the complaint.

Shareholder Derivative Lawsuits

On February 23, 2006, a purported shareholder derivative lawsuit entitled *Scimeca v. Kim, et al.* was filed in the U.S. District Court for the District of Arizona against certain of Amkor's current and former officers and directors. Amkor is named as a nominal defendant. In September 2006 and again in November 2006, the plaintiff amended the complaint to add allegations relating to option grants and added additional defendants, including the remaining members of the current board, former board members, and former officers. The complaint includes claims for violation of Section 14(a) of the Exchange Act, breach of fiduciary duty, abuse of control, waste of corporate assets, unjust enrichment and mismanagement, and is generally based on the same allegations as in the securities class action litigation described above. Defendants have filed motions to dismiss the complaint.

On March 2, 2006, a purported shareholder derivative lawsuit entitled *Khan v. Kim, et al.* was filed in the Superior Court of the State of Arizona against certain of Amkor's current and former officers and directors. Amkor is named as a nominal defendant. The complaint includes claims for breach of fiduciary duty and unjust enrichment, and is based on allegations similar to those made in the previously filed federal shareholder derivative action. This action has been stayed pending resolution of the federal derivative suit referenced above.

On or about October 10, 2006, a purported shareholder derivative lawsuit entitled *Feldgus v. Kim, et al.* was filed in the Superior Court of the State of Arizona against certain of Amkor's current and former officers and directors. Amkor is named as a nominal defendant. The complaint includes claims for breach of fiduciary duty and unjust enrichment and contains allegations relating to option grants similar to those made in the previously filed federal shareholder

derivative action referred to above. This action has been stayed pending resolution of the federal derivative suit referenced above.

Table of Contents

AMKOR TECHNOLOGY, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The derivative complaints seek monetary damages, an order directing the Company to take all necessary actions to improve corporate governance as may be necessary, equitable and/or injunctive relief as permitted by law, disgorgement, restitution, costs, fees, expenses and such other relief as the Court deems just and proper.

Securities and Exchange Commission Investigation

In August 2005, the Securities and Exchange Commission (SEC) issued a formal order of investigation regarding certain activities with respect to Amkor securities. The primary focus of the investigation appears to be activities during the period from June 2003 to July 2004. We believe that the investigation continues to relate primarily to transactions in our securities by certain individuals, and that the investigation may in part relate to whether tipping with respect to trading in our securities occurred. The matters at issue involve activities with respect to Amkor securities during the subject period by certain insiders or former insiders and persons or entities associated with them, including activities by or on behalf of certain current and former members of the Board of Directors and Amkor's Chief Executive Officer. Amkor has cooperated fully with the SEC on the formal investigation and the informal inquiry that preceded it. Amkor cannot predict the outcome of the investigation. We have learned that our former general counsel, whose employment with us terminated in March of 2005, has been indicted by the United States Attorney's Office for the Eastern District of Pennsylvania for violation of the securities laws. The indictment alleges that the former general counsel traded in Amkor securities on the basis of material non-public information. We have also learned that the SEC has filed a civil action against our former general counsel based on substantially the same allegations as contained in the indictment.

As previously disclosed, in July 2006, the Board of Directors established a Special Committee to review our historical stock option practices and informed the SEC of these efforts. The SEC informed us that it is expanding the scope of its investigation and has requested that we provide documentation related to these matters. We intend to continue to cooperate with the SEC. Additionally, we have voluntarily provided information to the Department of Justice relating to our historical stock option practices.

Amkor Technology, Inc. v. Motorola, Inc.

In August 2002, we filed a complaint against Motorola, Inc. (Motorola) seeking declaratory judgment relating to a controversy between us and Motorola concerning: (i) the assignment by Citizen Watch Co., Ltd. (Citizen) to us of a Patent License Agreement dated January 25, 1996 between Motorola and Citizen (the License Agreement) and concurrent assignment by Citizen to us of Citizen's interest in U.S. Patents 5,241,133 and 5,216,278 (the 133 and 278 Patents) which patents relate to ball grid array packages; and (ii) our obligation to make certain payments pursuant to an immunity agreement (the Immunity Agreement) dated June 30, 1993 between us and Motorola, pending in the Superior Court of the State of Delaware in and for New Castle County.

We and Motorola resolved the controversy with respect to all issues relating to the Immunity Agreement, and all claims and counterclaims filed by the parties in the case relating to the Immunity Agreement were dismissed or otherwise disposed of without further litigation. The claims relating to the License Agreement and the 133 and 278 Patents remained pending.

We and Motorola both filed motions for summary judgment on the remaining claims, and oral arguments were heard in September 2003. On October 6, 2003, the Superior Court of Delaware ruled in favor of us and issued an Opinion and Order granting our motion for summary judgment and denying Motorola's motion for summary judgment.

Motorola filed an appeal in the Supreme Court of Delaware. In May 2004, the Supreme Court reversed the Superior Court's decision, and remanded for further development of the factual record. The bench trial in this matter was concluded on January 27, 2006. Post-trial briefs were submitted and post-trial oral arguments were heard by the Court in April 2006. Additional post-trial oral arguments were heard by the Court on September 11, 2006. A decision from the Court is still pending. Although we believe that we have meritorious claims in this matter and will continue to seek judgment in our favor, as of the date of this Quarterly Report, it is not possible to predict the outcome of this litigation or the total cost of resolving this controversy, including the impact of possible future

Table of Contents

AMKOR TECHNOLOGY, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

claims for royalties which may be made by Motorola if the final outcome is unfavorable. The final resolution of this controversy could result in potential liabilities that could have a material adverse effect on our financial condition, results of operations and cash flows.

Alcatel Business Systems v. Amkor Technology, Inc., Anam Semiconductor, Inc.

On November 5, 1999, we agreed to sell certain semiconductor parts to Alcatel Microelectronics, N.V. (AME), a subsidiary of Alcatel S.A. The parts were manufactured for us by Anam Semiconductor, Inc. (ASI) and delivered to AME. AME transferred the parts to another Alcatel subsidiary, Alcatel Business Systems (ABS), which incorporated the parts into cellular phone products. In early 2001, a dispute arose as to whether the parts sold by us were defective.

Paris Commercial Court. On March 18, 2002, ABS and its insurer filed suit against us and ASI in the Paris Commercial Court of France, claiming damages of approximately 50.4 million Euros (approximately \$67.9 million based on the spot exchange rate at June 30, 2007.) We have denied all liability and have not established a loss accrual associated with this claim. Additionally, we have entered into a written agreement with ASI whereby ASI has agreed to indemnify us fully against any and all loss related to the claims of AME, ABS and ABS insurer. Dongbu Electronics (now known as Dongbu Hitek), successor in interest to ASI, has acknowledged that it is the indemnifying party with respect to claims against us in this matter and in the Arbitration matter described below. The Paris Commercial Court commenced a special proceeding before a technical expert to report on the facts of the dispute. The report of the court-appointed expert was put forth on December 31, 2003. The report does not specifically allocate liability to any particular party. On May 18, 2004, the Paris Commercial Court declared that it did not have jurisdiction over the matter. Following a 2004 ruling by the Court of Appeal of Paris confirming the first tier ruling, on March 27, 2007, the French Supreme Court (the highest court in the French judicial system) issued a final non-appealable ruling in our favor that the Paris Commercial Court does not have jurisdiction over this matter. Based on this ruling, we do not anticipate any further proceedings in the French courts on this matter.

Arbitration. In response to the French lawsuit described above, on May 22, 2002, we filed a petition to compel arbitration in the United States District Court for the Eastern District of Pennsylvania against ABS, AME and ABS insurer, claiming that the dispute is subject to the arbitration clause of the November 5, 1999 agreement between us and AME. That U.S. District Court proceeding was stayed pending resolution of the French lawsuit described above. Until recently, ABS had refused to arbitrate. However, in December 2006, ABS filed a demand with the American Arbitration Association (AAA) for arbitration under the 1999 agreement, which demand is based on substantially the same claims raised in the French lawsuit described above. Notwithstanding the French Supreme Court's final ruling in our favor described above, the arbitration filed with the AAA in December 2006 remains pending.

Amkor Technology, Inc. v. Carsem (M) Sdn Bhd, Carsem Semiconductor Sdn Bhd, and Carsem Inc.

In November 2003, we filed a complaint against Carsem (M) Sdn Bhd, Carsem Semiconductor Sdn Bhd, and Carsem Inc. (collectively Carsem) with the International Trade Commission (ITC) in Washington, D.C., alleging infringement of our United States Patent Nos. 6,433,277; 6,455,356 and 6,630,728 (collectively the Amkor Patents) and seeking an exclusionary order barring the importation by Carsem of infringing products. Subsequently, we filed a complaint in the Northern District of California, alleging infringement of the Amkor Patents and seeking an injunction enjoining Carsem from further infringing the Amkor Patents, treble damages plus interest, costs and attorney's fees. We allege that by making, using, selling, offering for sale, or importing into the U.S. the Carsem Dual and Quad Flat No-Lead Package, Carsem has infringed on one or more of our *Micro LeadFrame* packaging technology claims in the Amkor

Patents. The District Court action had been stayed pending resolution of the ITC case. The ITC Administrative Law Judge (ALJ) conducted an evidentiary hearing during July and August of 2004 in Washington D.C. and issued an initial determination that Carsem infringed some of our patent claims relating to our *Micro* LeadFrame package technology, that some of our 21 asserted patent claims are

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

valid, and that all of our asserted patent claims are enforceable. However, the ALJ did not find a statutory violation of the Tariff Act. We filed a petition in November 2004 to have the ALJ's ruling reviewed by the full International Trade Commission. The ITC ordered a new claims construction related to various disputed claim terms and remanded the case to the ALJ for further proceedings. On November 9, 2005, the ALJ issued an Initial Determination that Carsem infringed some of our patent claims and ruled that Carsem violated Section 337 of the Tariff Act. The ITC subsequently authorized the ALJ to reopen the record on certain discovery issues related to third party documents. On February 9, 2006, the ITC ordered a delay in issuance of the Final Determination, pending resolution of the third party discovery issues. The discovery issues are the subject of a subpoena enforcement action which is pending in the District Court for the District of Columbia. The case we filed in 2003 in the Northern District of California remains stayed pending completion of the ITC investigation.

15. Related Party Transactions

We purchase leadframe inventory from Acqutek Semiconductor & Technology Co., Ltd. James J. Kim is, our Chairman and Chief Executive Officer, ownership in Acqutek Semiconductor & Technology Co., Ltd. is approximately 17.7%. For the three months ended June 30, 2007 and 2006, purchases from Acqutek Semiconductor & Technology Co., Ltd. were \$4.3 million and \$4.6 million, respectively. For the six months ended June 30, 2007 and 2006, purchases from Acqutek Semiconductor and Technology Co., Ltd. were \$8.4 million and \$7.3 million, respectively. Amounts due to Acqutek Semiconductor & Technology Co., Ltd. at June 30, 2007 and December 31, 2006 were \$1.5 million and \$1.3 million, respectively.

Mr. JooHo Kim is an employee of Amkor and a brother of Mr. James J. Kim, our Chairman and Chief Executive Officer. Mr. JooHo Kim, together with his wife and children, own 96.1% of Jesung C&M, a company that provides cafeteria services to Amkor Technology Korea, Inc. For the three months ended June 30, 2007 and 2006, purchases from Jesung C&M were \$1.4 million and \$1.7 million, respectively. For the six months ended June 30, 2007 and 2006, purchases from Jesung C&M were \$3.0 million and \$3.3 million, respectively. Amounts due to Jesung C&M at June 30, 2007 and December 31, 2006 were \$0.4 million and \$0.5 million, respectively.

We had leased, through June 2007, 2,700 square feet of office space in West Chester, Pennsylvania from trusts related to James J. Kim. Amounts paid for this lease for the three and six months ended June 30, 2007 and 2006 were less than \$0.1 million. The lease expired on June 30, 2007 and was not renewed. We vacated the space in June 2007.

16. Business Segments

In accordance with SFAS No. 131 *Disclosures about Segments of an Enterprise and Related Information*, we have determined we have two reportable segments, packaging and test. Packaging and test are integral parts of the process of manufacturing semiconductor devices and our customers will engage with us for both packaging and test services, or just packaging or test services. Our packaging services process creates an electrical interconnect between the semiconductor chip and the system board through wire bonding or bumping technologies. In packaging, individual chips are separated from the fabricated semiconductor wafers, attached to a substrate and then encased in a protective material to provide optimal electrical connectivity and thermal performance. Our test services include the probing of fabricated wafers and testing of packaged chips using sophisticated equipment to ensure that design specifications are satisfied.

The accounting policies for segment reporting are the same as those for our consolidated financial statements. We evaluate our operating segments based on gross margin and gross property, plant and equipment. We do not specifically identify and allocate total assets by operating segment. Summarized financial information concerning

Table of Contents**AMKOR TECHNOLOGY, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

reportable segments is shown in the following table. The other column includes other corporate adjustments, sales office and corporate property, plant and equipment.

	Packaging	Test	Other	Total
	(In thousands)			
Three Months Ended Months June 30, 2007				
Net sales	\$ 583,818	\$ 68,668	\$	\$ 652,486
Gross profit	142,417	19,751	(476)	161,692
Three Months Ended Months June 30, 2006				
Net sales	\$ 616,540	\$ 70,334	\$ (243)	\$ 686,631
Gross profit	145,685	23,962	(323)	169,324
Six Months Ended Months June 30, 2007				
Net sales	\$ 1,162,543	\$ 141,171	\$ (240)	\$ 1,303,474

June 30, 2007	\$ 2,483,227	\$ 612,171	\$ 120,866	\$ 3,216,264
December 31, 2006	2,421,171	596,079	112,449	3,129,699

17. Restructuring and Reduction in Force

During the second quarter of 2007, we commenced a phased transition of wafer level processing production from our wafer bumping facility in North Carolina to our facility in Taiwan as part of our ongoing efforts to help our customers shorten time-to-market and get closer to the upstream production sources. The North Carolina facility will primarily focus on research and development activities after the transition is complete. We expect to complete the transition of production to Taiwan by April 2008. In April 2007, the specific details surrounding the related reduction in force were communicated to the impacted employees at our North Carolina facility. The costs associated with this activity are accounted for in accordance with SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities (as amended)*. We recorded a charge for termination benefits of \$0.4 million, primarily included in cost of goods sold during the quarter ended June 30, 2007. The amount recorded in accrued expenses for termination benefits was \$0.4 million as of June 30, 2007. We currently anticipate that an additional \$0.9 million related to termination benefits will be charged primarily to cost of goods sold over the remaining employment service period through April 2008. We anticipate total termination benefits of \$1.3 million will be paid through April 2008.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations****MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

This report contains forward-looking statements within the meaning of the federal securities laws. All statements other than statements of historical fact are considered forward looking statements including but not limited to statements regarding: trends in outsourcing and reductions in inventory, demand and selling prices for our services and products; future capacity utilization rates, revenue, gross margins and operating performance; our ability to focus capital investments on increasing wafer bumping, flip chip, test, advanced laminate packaging capacity and information systems; entry into supply agreements with customers and forecast customer demand; anticipated tax rate; sufficient cash flows and liquidity to fund working capital, estimated capital expenditures of \$275 million to \$300 million, debt service requirements and no declaration of cash dividends; our substantial indebtedness; our expectations regarding continued compliance with our debt covenants; the continued service of key senior management and technical personnel; increase in the scope and growth of our operations and ability to implement expansion plans; our ability to offset an increase in fixed commodity prices; the favorable outcome of litigation proceedings; our ability to comply with environmental regulations and foreign laws; our ability to quickly respond to a natural disaster or terrorist attack; the condition, growth and cyclical nature of the semiconductor industry; our contractual obligations; and other statements that are not historical facts. In some cases, you can identify forward-looking statements by terminology such as may, will, should, expects, plans, anticipates, believes, estimates, predicts, potential, negative of these terms or other comparable terminology. These forward-looking statements involve a number of risks, uncertainties, assumptions and other factors that could affect future results and cause actual results and events to differ materially from historical and expected results and those expressed or implied in the forward looking statements, including, but not limited to, those set forth in the following discussion as well as in Risk Factors that May Affect Future Operating Performance set forth in this quarterly report on Form 10-Q in Part II, Item 1A Risk Factors. The following discussion provides information and analysis of our results of operations for the three and six months ended June 30, 2007 and our liquidity and capital resources. You should read the following discussion in conjunction with our Consolidated Financial Statements and the related notes included elsewhere in this quarterly report, as well as other reports we file with the Securities and Exchange Commission.

Results of Operations***Overview***

Amkor is one of the world's largest subcontractors of semiconductor packaging and test services. Packaging and test are integral parts of the process of manufacturing semiconductor devices. This process begins with silicon wafers and involves the fabrication of electronic circuitry into complex patterns, thus creating large numbers of individual chips on the wafers. The fabricated wafers are then probed to ensure the individual devices meet design specifications. The packaging process creates an electrical interconnect between the semiconductor chip and the system board. In packaging, individual chips are separated from the fabricated semiconductor wafers, and typically attached through wire bond or wafer bump technologies to a substrate or leadframe, and then encased in a protective material. Packages are designed to provide optimal electrical connectivity and thermal performance. The packaged chips are then tested using sophisticated equipment to ensure that each packaged chip meets its design specifications. Increasingly, packages are custom designed for specific chips and specific end-market applications. We are able to provide turnkey solutions including semiconductor wafer bump, wafer probe, wafer backgrind, package design and assembly, test and drop shipment services.

Our second quarter net income was \$31.0 million, or \$0.16 per diluted share, versus net income in the second quarter of 2006 of \$23.8 million, or \$0.13 per diluted share. In the three months ended June 30, 2007, sales decreased \$34.1 million or 5.0% to \$652.5 million from \$686.6 million in the three months ended June 30, 2006. During the second quarter of 2007 compared to the second quarter of 2006, we experienced a volume decrease in wirebond packaging services partially offset by an increase in flip chip packaging services. Although sales declined, gross margin remained relatively flat for the second quarter of 2007 at 24.8% compared to 24.7% for the second quarter of 2006 largely because of a change in sales mix to packages with lower material costs. In connection with

Table of Contents

refinancing transactions during the second quarter of 2007 and 2006, \$15.9 million and \$27.9 million of net debt retirement costs were recorded, respectively.

We continue to manage our production lines, allocate assets and selectively expand our capacity. Second quarter 2007 capital additions totaled \$59.5 million. We expect that our full year 2007 capital additions will be in the range of \$275 million to \$300 million, which is subject to adjustment based on business conditions. Our capital investments have been, and we expect will continue to be, primarily focused on increasing our advanced laminate, test services, wafer bump and flip chip packaging capacity. In addition, we continue to make investments in our information systems.

Cash provided by operating activities increased \$14.2 million to \$254.0 million for the six months ended June 30, 2007 as compared to \$239.8 million for the six months ended June 30, 2006. Cash flow from operations generated during the six months ended June 30, 2007 funded capital purchases of \$102.2 million leaving \$151.8 million of Free Cash Flow (defined below). Please see the Liquidity and Capital Resources section below for a further analysis of the change in our balance sheet and cash flows during the first half of 2007.

The following table sets forth certain operating data as a percentage of net sales for the periods indicated:

	For the Three Months Ended		For the Six Months Ended	
	June 30,		June 30,	
	2007	2006	2007	2006
Net sales	100.0%	100.0%	100.0%	100.0%
Gross profit	24.8%	24.7%	23.7%	24.3%
Operating income	13.5%	14.6%	12.5%	13.8%
Income before income taxes and minority interests	5.5%	3.8%	5.7%	4.8%
Net income	4.7%	3.5%	5.0%	4.4%

Three Months Ended June 30, 2007 Compared to Three Months Ended June 30, 2006

Net Sales. Sales decreased \$34.1 million, or 5.0%, to \$652.5 million in the three months ended June 30, 2007 from \$686.6 million in the three months ended June 30, 2006 principally driven by decreases in wirebond packaging services, offset by an increase in flip chip packaging services.

Packaging Net Sales. Packaging net sales decreased \$32.7 million, or 5.3%, to \$583.8 million in the three months ended June 30, 2007 from \$616.5 million in the three months ended June 30, 2006 principally driven by decreased volume for wirebond packaging services partially offset by improved flip chip packaging services. Packaging unit volume decreased 4.9% to 2.1 billion units in the three months ended June 30, 2007 from 2.2 billion units in the second quarter of 2006.

Test Net Sales. Test net sales decreased \$1.6 million, or 2.3%, to \$68.7 million in the three months ended June 30, 2007 from \$70.3 million in the three months ended June 30, 2006 principally due to a decrease in unit volume.

Cost of Sales. Our cost of sales consists principally of materials, labor, depreciation and manufacturing overhead. Because a substantial portion of our costs at our factories is fixed, relatively insignificant increases or decreases in capacity utilization rates can have a significant effect on our gross margin.

Material costs as a percent of revenue decreased to 36.7% for the three months ended June 30, 2007 from 39.2% for the three months ended June 30, 2006 due to change in product mix resulting in lower material costs per product.

Labor costs as a percentage of net sales, increased to 16.5% for the three months ended June 30, 2007 from 14.9% for the three months ended June 30, 2006 due to lower net sales, higher labor and benefit costs driven in part by wage increases and the depreciation of the U.S. dollar, partially offset by a net reduction in headcount.

As a percentage of net sales, other manufacturing costs increased to 22.0% for the three months ended June 30, 2007 from 21.2% for the three months ended June 30, 2006. The second quarter of 2007 includes additional costs

Table of Contents

associated with our newer factories and increased depreciation costs as a result of our capital expenditures, which are focused on increasing our test, flip chip and advanced laminate packaging capacity.

Stock-based compensation included in cost of sales was \$0.4 million for the three months ended June 30, 2007 and June 30, 2006.

Gross Profit. Gross profit decreased \$7.6 million to \$161.7 million, or 24.8% of net sales in the three months ended June 30, 2007 from \$169.3 million, or 24.7% of net sales, in the three months ended June 30, 2006. The decrease in gross profit was due to higher labor costs offset by lower material costs due to a change in product mix.

Packaging Gross Profit. Gross profit for packaging decreased \$3.3 million to \$142.4 million, or 24.4% of packaging net sales, in the three months ended June 30, 2007 from \$145.7 million, or 23.6% of packaging net sales, in the three months ended June 30, 2006. The packaging gross profit decrease was primarily due to decreased volume partially offset by a change in product mix which improved gross profit.

Test Gross Profit. Gross profit for test decreased \$4.2 million to \$19.8 million, or 28.8% of test net sales, in the three months ended June 30, 2007 from \$24.0 million, or 34.1% of test net sales, in the three months ended June 30, 2006. This decrease was primarily due to increased depreciation costs as a result of our capital expenditures.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$3.4 million, or 5.8%, to \$62.4 million for the three months ended June 30, 2007, from \$59.0 million for the three months ended June 30, 2006 reflecting higher spending for professional fees and travel expenses.

Other (Income) Expense. Other expenses, net decreased \$21.4 million from the three months ended June 30, 2006 to the three months ended June 30, 2007. In the three months ended June 30, 2007 and 2006, we recognized \$15.9 million and \$27.9 million, respectively, of debt retirement costs, net. In addition, there was a decrease of \$9.5 million in net interest expense in the three months ended June 30, 2007 compared to the three months ended June 30, 2006, due to our continued focus on strengthening our liquidity by reducing debt as well as refinancing debt with lower interest rate borrowings.

Income Tax Expense. Income tax expense for the three months ended June 30, 2007 and 2006 is attributable to foreign withholding taxes and income taxes at certain of our profitable foreign operations. For the full year of 2007, we anticipate an effective income tax rate of approximately 9.2%, which reflects the utilization of foreign net operating loss carryforwards and tax holidays in certain foreign jurisdictions. The effective rate for the three months ended June 30, 2007 was 12.0% and 7.6% for the three months ended June 30, 2006. The increase is primarily attributable to a change in the mix of income reported in tax jurisdictions with varying tax rates.

At June 30, 2007, we had U.S. net operating loss carryforwards totaling \$400.6 million, which expire at various times through 2027. Additionally, at June 30, 2007, we had \$46.6 million of non-U.S. operating loss carryforwards, which expire at various times through 2012. We maintain a valuation allowance on substantially all of our deferred tax assets, including our net operating loss carryforwards, and will release such valuation allowance as the related deferred tax benefits are realized on our tax returns or when sufficient net positive evidence exists to conclude that the deferred tax assets will be realized.

Six Months Ended June 30, 2007 Compared to Six Months Ended June 30, 2006

Net Sales. Net sales decreased \$28.2 million, or 2.1%, to \$1,303.5 million for the six months ended June 30, 2007 from \$1,331.7 million for the six months ended June 30, 2006, principally driven by decreased unit volume for wirebond packaging services partially offset by an increase in flip chip packaging services.

Packaging Net Sales. Packaging net sales decreased \$37.7 million, or 3.1%, to \$1,162.5 million in the six months ended June 30, 2007 from \$1,200.2 million in the six months ended June 30, 2006 principally driven by decreased unit volume. Packaging unit volume decreased 7.2% to 4.1 billion units in the six months ended June 30, 2007 from 4.4 billion units in the 2006 period. The decrease in unit volume is principally attributed to our wirebond packaging services, partially offset by an increase in our flip chip packaging services.

Table of Contents

Test Net Sales. Test net sales increased \$9.3 million, or 7.1%, to \$141.2 million in the six months ended June 30, 2007 from \$131.9 million in the six months ended June 30, 2006, principally due to the production ramp of our new test facility in Singapore and an increase in test units in our other test facilities.

Cost of Sales. Our cost of sales consists principally of materials, labor, depreciation and manufacturing overhead. Because a substantial portion of our costs at our factories is fixed, relatively insignificant increases or decreases in capacity utilization rates can have a significant effect on our gross margin.

Material costs decreased due to the volume decrease. Material costs as a percent of revenue decreased from 38.9% for the six months ended June 30, 2006 to 38.0% for the six months ended June 30, 2007 primarily as a result of product mix and favorable pricing.

Labor costs in absolute dollars were up due to increased labor and benefit costs. Labor as a percentage of net sales, increased to 16.5% for the six months ended June 30, 2007, from 15.0% for the six months ended June 30, 2006, due to increased labor wages, lower utilization of our capacity and the depreciation of the U.S. dollar, partially offset by a net reduction in headcount.

Other manufacturing costs decreased as a result of the decreased volume partially offset by increased depreciation costs as a result of our capital expenditures which are focused on increasing our wafer bumping, flip chip, test and advanced laminate packaging capacity. As a percentage of net revenues, other manufacturing costs increased slightly to 21.8% for the six months ended June 30, 2007, from 21.7% for the six months ended June 30, 2006, due to lower overhead utilization.

Stock-based compensation included in cost of sales amount to \$0.7 million for the six months ended June 30, 2007 compared to \$0.6 million for the six months ended June 30, 2006.

Gross Profit. Gross profit decreased \$15.0 million to \$309.0 million, or 23.7% of net sales in the six months ended June 30, 2007 from \$324.1 million, or 24.3% of net sales, in the six months ended June 30, 2006. This decrease in gross profit was due to higher labor costs partially offset by lower material costs due to product mix.

Packaging Gross Profit. Gross profit for packaging decreased \$17.4 million to \$265.1 million, or 22.8% of packaging net sales, in the six months ended June 30, 2007 from \$282.5 million, or 23.5% of packaging net sales, in the six months ended June 30, 2006. The packaging gross profit decrease was primarily due to decreased utilization of our capacity and our significant fixed costs at our factories.

Test Gross Profit. Gross profit for test increased \$0.7 million to \$42.7 million, or 30.2% of test net sales, in the six months ended June 30, 2007 from \$42.0 million, or 31.8% of test net sales, in the six months ended June 30, 2006. This increase was primarily due to increased volume partially offset by increased depreciation costs as a result of our capital expenditures.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$4.9 million, or 4.0%, to \$125.0 million for the six months ended June 30, 2007, from \$120.2 million for the six months ended June 30, 2006 reflecting higher spending for professional fees, indirect factory costs and incentive compensation partially offset by a gain recognized on the disposition of real property used for administrative purposes.

Other (Income) Expense. Other expenses, net, decreased \$31.3 million to \$88.6 million, or 6.8% of net sales, for the six months ended June 30, 2007 from \$119.9 million, or 9.0% of net sales, for the six months ended June 30, 2006. In the six months ended June 30, 2007 and 2006, we recognized \$15.9 million and \$27.4 million, respectively, of debt retirement costs, net. In addition, there was a decrease of \$15.7 million in net interest expense in the six months ended

June 30, 2007 compared to the six months ended June 30, 2006, due to our continued focus to strengthen our liquidity by reducing debt as well as refinancing debt with lower interest rate instruments.

Income Tax Expense. Income tax expense for the six months ended June 30, 2007 and 2006 is attributable to foreign withholding taxes and income taxes at certain of our profitable foreign operations. For the full year of 2007, we anticipate an effective income tax rate of approximately 9.2%, which reflects the utilization of foreign net operating loss carryforwards and tax holidays in certain foreign jurisdictions. The effective rate for the six months ended June 30, 2007 was 11.2% and 8.7% for the six months ended June 30, 2006. The increase is primarily

Table of Contents

attributable to a change in the mix of income reported in tax jurisdictions with varying tax rates. Additionally, the effective tax rate for the six months ended June 30, 2007 reflects certain discrete period items recorded in the first and second quarters of 2007. We maintain a full valuation allowance on substantially all of our deferred tax assets, including our net operating loss carryforwards, and will release such valuation allowance as the related deferred tax benefits are realized on our tax returns or when sufficient net positive evidence exists to conclude that the deferred tax assets will be realized.

At June 30, 2007, we had U.S. net operating loss carryforwards totaling \$400.6 million, which expire at various times through 2027. Additionally, we had \$46.6 million of non-U.S. net operating loss carryforwards, which expire at various times through 2012.

Liquidity and Capital Resources

We generated net income of \$65.6 and \$58.2 for the six months ended June 30, 2007 and 2006, respectively. During the second quarter of 2007 and 2006, we recorded in connection with refinancing transactions \$15.9 million and \$27.9 million of net debt retirement costs, respectively. Our operating activities provided cash totaling \$254.0 and \$239.8 in the six months ended June 30, 2007 and 2006, respectively. In March 2007, we used existing cash resources to retire the remaining \$142.4 million in 5% convertible notes at maturity, and in June 2007 we redeemed the remaining \$21.9 million of the 2009 10.5% senior subordinated notes outstanding with cash on hand.

In April 2007, we entered into a \$300.0 million, 7-year secured credit facility with Woori Bank (Term Loan). The Term Loan is secured by substantially all the land, factories, and equipment located at our Korean facilities. The Term Loan bears interest at Woori's base rate plus 50 basis points (6.6% as of June 30, 2007) and amortizes in 28 equal quarterly payments through April 2014. The proceeds of the Term Loan were used to refinance our existing \$300.0 million second lien term loan due, October 2010, which bore interest at a rate of LIBOR plus 450 basis points (9.86% at March 31, 2007). This financing transaction, together with payment of prepayment fees and accrued and unpaid interest, fully discharged all of our obligations under the second lien term loan and fully discharged all subsidiary guarantees and releases all the collateral securing the second lien term loan.

We have a significant level of debt, with \$1,812.7 million outstanding at June 30, 2007, of which \$159.3 million is current. The terms of such debt require significant scheduled principal payments in the coming years, including \$34.3 million during the remainder of 2007, \$154.1 million in 2008, \$54.7 million in 2009, \$54.7 million in 2010, \$482.6 million in 2011 and \$1,032.3 million thereafter.

The interest payments required on our debt are also substantial. For example, in the six months ended June 30, 2007, we paid \$71.1 million of interest. (See Capital Additions and Contractual Obligations below for a summary of principal and interest payments.) We were in compliance with all debt covenants at June 30, 2007 and expect to remain in compliance with these covenants through June 30, 2008.

We operate in a capital intensive industry. Servicing our current and future customers requires that we incur significant operating expenses and continue to make significant capital expenditures, which are generally made in advance of the related revenues and without any firm customer commitments. During the first half of 2007, we had capital additions of \$114.8 million and for all of 2007 we currently anticipate making capital additions in the range of \$275 million to \$300 million, which estimate is subject to adjustment based on business conditions. Our 2007 capital additions budget remains focused on strategic growth areas of wafer bump, test and flip chip packaging.

The source of funds for our operations, including making capital expenditures and servicing principal and interest obligations with respect to our debt, are cash flows from our operations, current cash and cash equivalents, borrowings under available debt facilities, or proceeds from any additional debt or equity financing. As of June 30, 2007, we had

cash and cash equivalents of \$238.4 million and \$99.8 million available under our senior secured revolving credit facility.

We assess our liquidity based on our current expectations regarding sales, operating expenses, capital spending and debt service requirements. Based on this assessment, we believe that our cash flow from operating activities together with existing cash and cash equivalents and availability under our senior secured revolving credit facility will be sufficient to fund our working capital, capital expenditure and debt service requirements through at least June 30, 2008. Thereafter, our liquidity will continue to be affected by, among other things, the performance of our

Table of Contents

business, our capital expenditure levels and our ability to either repay debt out of operating cash flow or refinance debt with the proceeds of debt or equity offerings at or prior to maturity. If our performance or access to the capital markets differs materially from our expectations, our liquidity may be adversely impacted.

If we fail to generate the necessary net income or operating cash flows to meet the funding needs of our business beyond June 30, 2008 due to a variety of factors, including the cyclical nature of the semiconductor industry and the other factors discussed in Part II, Item 1A Risk Factors, our liquidity would be adversely affected. We would consider taking a variety of actions, including: attempting to reduce our high fixed costs (for example, closing facilities and reducing the size of our work force), curtailing or reducing planned capital additions, raising additional equity, borrowing additional funds, refinancing existing indebtedness or taking other actions. There can be no assurance, however, that we will be able to successfully take any of these actions, including adjusting our expenses sufficiently or in a timely manner, or raising additional equity, increasing borrowings or completing refinancings on any terms or on terms which are acceptable to us. Our inability to take these actions as and when necessary would materially adversely affect our liquidity, results of operations and financial condition.

Many of our debt agreements restrict our ability to pay dividends. We have never paid a dividend to our shareholders and we do not anticipate paying any cash dividends in the foreseeable future. We expect cash flows, if any, to be used in the operation and expansion of our business and the repayment of debt.

Cash flows

Cash provided by operating activities was \$254.0 million for the six months ended June 30, 2007 compared to \$239.8 million for the six months ended June 30, 2006. Free cash flow (defined below) increased by \$81.4 million to \$151.8 million for the six months ended June 30, 2007 compared to \$70.3 million for the six months ended June 30, 2006.

Net cash provided by (used in) operating, investing and financing activities for the six months ended June 30, 2007 and 2006 was as follows:

	For the Six Months Ended June 30,	
	2007	2006
	(In thousands)	
Operating activities	\$ 253,983	\$ 239,806
Investing activities	(99,115)	(168,136)
Financing activities	(161,329)	(135,804)

Operating activities: Our cash flow from operating activities for the six months ended June 30, 2007 increased \$14.2 million to \$254.0 million from \$239.8 million for the six months ended June 30, 2006. This increase in operating cash flows is a result of positive changes in assets and liabilities and lower interest paid offset by a decrease in our operating income and the payment of prepayment fees in connection with a refinancing. Our operating income adjusted for depreciation and amortization expenses and other operating activities and non-cash items decreased \$26.8 million largely attributed to decreased utilization of our capacity and our significant fixed costs at our factories together with increased selling, general and administrative costs. Interest expense for the six months ended June 30, 2007 decreased by \$15.7 million as compared with the six months ended June 30, 2006 as a result of reduced debt levels as well as refinancing debt with lower interest rate instruments. Operating cash flows for the six months ended June 30, 2007 were reduced by \$9.0 million in prepayment fees in connection with refinancing our second lien term

loan. Changes in assets and liabilities increased operating cash flows by \$33.4 million for the six months ended June 30, 2007 compared with the six months ended June 30, 2006 driven largely by reduced levels of receivables, inventory and accounts payable in line with the reduced unit volumes and changes in sales mix as well as an increase in employee benefit liabilities. Other changes in operating activities including foreign currency losses, other income and expenses, taxes and minority interest explained \$0.9 million of the increase in operating cash flows.

Investing activities: Our cash flows used in investing activities for the six months ended June 30, 2007 decreased by \$69.0 million to \$99.1 million from \$168.1 million for the six months ended June 30, 2006. This decrease was primarily due to a \$67.3 million decrease in payments for property, plant and equipment from

Table of Contents

\$169.5 million in the six months ended June 30, 2006 to \$102.2 million in the six months ended June 30, 2007. Investing activities were higher in 2006 principally as a result of our expansion of our facilities in China and Singapore. Investing activities during the six months ended June 30, 2007 included increased proceeds from the sale of property, plant and equipment of \$3.2 million primarily driven by a sale of real property in Korea used for administrative purposes.

Financing activities: Our net cash used in financing activities for the six months ended June 30, 2006 was \$135.8 million, compared with \$161.3 million for the six months ended June 30, 2007. The net cash used in financing activities for the six months ended June 30, 2007 was primarily driven by the repayment of the \$142.4 million of our 5% convertible notes at maturity in March 2007, and the redemption of the remaining \$21.9 million 2009 10.5% senior subordinated notes in June 2007. The net cash used in financing activities for the six months ended June 30, 2006 was primarily driven by the repayment of the \$132.0 million for our 5.75% convertible subordinated notes at maturity in June 2006. Proceeds from the issuance of stock through our stock compensation plans for the six months ended June 30, 2007 was \$34.5 million, compared with \$5.0 million for the six months ended June 30, 2006.

We provide the following supplemental data to assist our investors and analysts in understanding our liquidity and capital resources. Free cash flow represents net cash provided by operating activities less investing activities related to the acquisition of property, plant and equipment. Free cash flow is not defined by generally accepted accounting principles (GAAP) and our definition of free cash flow may not be comparable to similar companies and should not be considered a substitute for cash flow measures in accordance with GAAP. We believe free cash flow provides our investors and analysts useful information to analyze our liquidity and capital resources.

	For the Six Months Ended June 30, 2007 2006 (In thousands)	
Net cash provided by operating activities	\$ 253,983	\$ 239,806
Less purchases of property, plant and equipment	(102,212)	(169,469)
Free cash flow	\$ 151,771	\$ 70,337

Debt Instruments and Related Covenants

We now have, and for the foreseeable future will continue to have, a significant amount of indebtedness. Our indebtedness requires us to dedicate a substantial portion of our cash flow from operations to service payments on our debt. (See table included in *Capital Additions and Contractual Obligations* below). Total debt decreased to \$1,812.7 million at June 30, 2007 from \$2,005.3 at December 31, 2006. In March 2007, we used existing cash resources to retire the remaining \$142.4 million in 5% convertible notes at maturity. In June 2007, we redeemed the remaining \$21.9 million of the 2009 10.5% Senior Subordinated Notes outstanding with cash on hand. Amkor Technology, Inc. also guarantees certain debt of our subsidiaries.

We were in compliance with all our debt covenants contained in our loan agreements at June 30, 2007. Additional details about our debt are available in Note 11 accompanying the unaudited Consolidated Financial Statements included within Part I, Item 1 of this quarterly report.

Table of Contents**Capital Additions and Contractual Obligations**

Our capital additions were \$114.8 million for the six months ended June 30, 2007. We expect that our full year 2007 capital additions will be in the range of \$275 million to \$300 million, as discussed above in the Overview. Ultimately, the amount of our 2007 capital additions will depend on several factors including, among others, the performance of our business, the need for additional capacity to service anticipated customer demand and the availability of suitable cash flow from operations or financing. The following table reconciles our activity related to property, plant and equipment payments as presented on the Condensed Consolidated Statements of Cash Flow statement to property, plant and equipment additions as reflected in the Consolidated Balance Sheets:

	For the Six Months Ended June 30,	
	2007	2006
	(In thousands)	
Payments for property, plant, and equipment	\$ 102,212	\$ 169,469
Net increase in related accounts payable and deposits	12,607	26,805
Property, plant and equipment additions	\$ 114,819	\$ 196,274

The following table summarizes our contractual obligations at June 30, 2007, and the effect such obligations are expected to have on our liquidity and cash flow in future periods.

	Total	2007 Remaining	2008	2009	2010	2011	Thereafter
	(In thousands)						
Total debt(1)	\$ 1,812,709	\$ 34,326	\$ 154,108	\$ 54,686	\$ 54,728	\$ 482,541	\$ 1,032,320
Scheduled interest payment obligations(2)	723,549	62,008	118,228	113,995	110,656	89,797	228,865
Purchase obligations(3)	51,844	51,844					
Operating lease obligations	46,671	2,958	5,612	3,917	3,687	3,822	26,675
Total contractual obligations	\$ 2,634,773	\$ 151,136	\$ 277,948	\$ 172,598	\$ 169,071	\$ 576,160	\$ 1,287,860

(1) The decrease in our total debt from the Annual Report on Form 10-K as of December 31, 2006, is primarily driven by the repayment of \$142.4 million of our 5% convertible notes at maturity in March 2007, and \$21.9 million for the redemption of the remaining 10.5% Senior Subordinated 2009 Notes outstanding in June 2007.

(2) Scheduled interest payment obligations were calculated using stated coupon rates for fixed rate debt and interest rates applicable at June 30, 2007 for variable rate debt.

(3) Includes \$40.3 million of capital-related purchase obligations.

In addition to the obligations identified in the table above, non-current liabilities recorded in our unaudited Consolidated Balance Sheet at June 30, 2007, include \$195.1 million related to pension and severance obligations, which the timing of the ultimate payment of these obligations was uncertain at June 30, 2007. Additionally, \$20.4 million of customer advances are included in non-current liabilities and relate to supply agreements with customers where we commit capacity in exchange for customer prepayment of services. Generally customers forfeit the prepayment if the capacity is not utilized per contract terms.

The table above excludes liabilities we have with respect to unrecognized tax benefits. As discussed in Note 4 to our unaudited Consolidated Financial Statements, we adopted the provisions of FIN 48 on January 1, 2007. At June 30, 2007 the gross amount of our unrecognized tax benefits was approximately \$11.6 million, which does not generally represent future cash payments because of the interaction with other tax attributes available such as net operating loss or tax credit carryforwards. Due to the high degree of uncertainty regarding the amount and the timing of any future cash outflows associated with our FIN 48 liabilities, we are unable to reasonably estimate the amount and period of ultimate settlement with the various taxing authorities. As management would expect cash outflows with respect to FIN 48 liabilities to occur over an indeterminate number of future years, it is unlikely that any payment of existing liabilities would have a material adverse affect on our liquidity in any future period.

Table of Contents

Off-Balance Sheet Arrangements

We had no off-balance sheet guarantees or other off-balance sheet arrangements as of June 30, 2007. Operating lease commitments are included in the contractual obligation table above.

Contingencies, Indemnifications and Guarantees

Details about the company's contingencies, indemnifications and guarantees are available in Note 14 accompanying the unaudited Consolidated Financial Statements included within Part I, Item 1 of this quarterly report. As for our contingencies related to our patent litigation, securities litigation, and other litigation and legal matters, if an unfavorable ruling were to occur, there exists the possibility of a material adverse impact on our results of operations in the period in which the ruling occurs. The estimate of the potential impact from the legal proceedings, discussed in Note 14 accompanying the unaudited Consolidated Financial Statements, on our financial position, results of operations, or cash flows, could change in the future.

Critical Accounting Policies

Our critical accounting policies are disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2006. During the six months ended June 30, 2007, there have been no significant changes in our critical accounting policies.

New Accounting Pronouncements

For information regarding recent accounting pronouncements, see Note 1 to the unaudited Consolidated Financial Statements included within Part I, Item 1 of this quarterly report.

Item 3. *Quantitative and Qualitative Disclosures about Market Risk*

Market Risk Sensitivity

We are exposed to market risks, primarily related to foreign currency and interest rate fluctuations. In the normal course of business, we employ established policies and procedures to manage the exposure to fluctuations in foreign currency values and changes in interest rates. Our use of derivative instruments, including forward exchange contracts, has been historically insignificant, and it is expected that our use of derivative instruments will continue to be minimal.

Foreign Currency Risks

Our primary exposures to foreign currency fluctuations are associated with transactions and related assets and liabilities denominated in Chinese renminbi, Japanese yen, Korean won, Philippine pesos, Singapore dollar, and Taiwanese dollar. The objective in managing these foreign currency exposures is to minimize the risk through minimizing the level of activity and financial instruments denominated in those currencies. Our foreign currency financial instruments primarily consist of cash, trade receivables, investments, deferred taxes, trade payables, accrued expenses and debt.

For an entity with various financial instruments denominated in a foreign currency in a net asset position, an increase in the exchange rate would result in less net assets when converted to U.S. dollars. Conversely, for an entity with various financial instruments denominated in a foreign currency in a net liability position, a decrease in the exchange rate would result in more net liabilities when converted to U.S. dollars. Changes period over period are caused by

changes in our net asset or net liability position and changes in currency exchange rates. Based on our portfolio of foreign currency based financial instruments at June 30, 2007 and December 31, 2006, a 20% increase

Table of Contents

(decrease) in the foreign currency to U.S. dollar spot exchange rate would result in the following foreign currency risk for our entities in a net asset (liability) position:

	Chart of Foreign Currency Risk					
	Chinese Renminbi	Japanese Yen	Korean Won	Philippine Peso	Singapore Dollar	Taiwanese Dollar
	(In thousands)					
As of June 30, 2007	\$ (1,585)	\$ 1,934	\$ (1,378)	\$ (9,423)	\$ (458)	\$ (10,110)
As of December 31, 2006	(2,178)	2,048	(4,750)	(3,734)	(992)	(10,861)

In addition, at June 30, 2007 and December 31, 2006, we had other foreign currency denominated liabilities, including denominations of the Euro, Swiss franc and Great Britain pound, whereby a 20% decrease in the related exchange rates would result in an aggregate of less than \$0.1 million of additional foreign currency risk.

Interest Rate Risks

We have interest rate risk with respect to our long-term debt. As of June 30, 2007, we had a total of \$1,812.7 million of debt of which 80.4% was fixed rate debt and 19.6% was variable rate debt. Our variable rate debt principally relates to our foreign borrowings and any amounts outstanding under our \$100.0 million revolving line of credit, of which no amounts were drawn as of June 30, 2007 but which had been reduced by \$0.2 million related to outstanding letters of credit at that date. The fixed rate debt consists of senior notes, senior subordinated notes and subordinated notes. In April 2007, our second lien term loan was refinanced with a new term loan which is also a variable interest rate debt. As of December 31, 2006, we had a total of \$2,005.3 million of debt of which 80.9% was fixed rate debt and 19.1% was variable rate debt. Changes in interest rates have different impacts on our fixed and variable rate portions of our debt portfolio. A change in interest rates on the fixed portion of the debt portfolio impacts the fair value of the instrument but has no impact on interest incurred or cash flows. A change in interest rates on the variable portion of the debt portfolio impacts the interest incurred and cash flows but does not impact the fair value of the instrument. The fair value of the convertible notes is also impacted by changes in the market price of our common stock.

The table below presents the interest rates, maturities and fair value of our fixed and variable rate debt as of June 30, 2007.

	2007	2008	2009	2010	2011	Thereafter	Total	Fair Value
	(In thousands)							
Long term debt:								
Fixed rate debt	\$ 1,667	\$ 91,539	\$	\$	\$ 438,993	\$ 925,000	\$ 1,457,199	\$ 1,618,135
Average interest rate	4.9%	9.1%			5.1%	8.2%	7.4%	
Variable rate	\$ 32,659	\$ 62,569	\$ 54,686	\$ 54,728	\$ 43,548	\$ 107,320	\$ 355,510	\$ 355,510

debt							
Average							
interest							
rate	5.6%	5.8%	6.2%	6.2%	6.7%	6.7%	6.3%

Equity Price Risks

We have convertible notes that are convertible into our common stock. We currently intend to repay our remaining convertible notes upon maturity, unless converted, repurchased or refinanced. If investors were to decide to convert their notes to common stock, our future earnings would benefit from a reduction in interest expense and our common stock outstanding would be increased. If we paid a premium to induce such conversion, our earnings could include an additional charge.

Further, the trading price of our common stock has been and is likely to continue to be highly volatile and could be subject to wide fluctuations. Such fluctuations could impact our decision or ability to utilize the equity markets as a potential source of our funding needs in the future.

Table of Contents

Item 4. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our periodic reports to the Securities and Exchange Commission (SEC) is recorded, processed, summarized and reported within the time periods specified in the SEC 's rules and forms, and that such information is accumulated and communicated to our management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure, based on the definition of disclosure controls and procedures in Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934. In designing and evaluating the disclosure controls and procedures, management recognizes that any disclosure controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily is required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures.

We carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of June 30, 2007. Based on the foregoing, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2007.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during our most recent quarter that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting.

In July 2007 we implemented, as planned, several significant modules of our new enterprise resource planning (ERP) system at our largest subsidiary which has materially affected our business processes and internal control over financial reporting beginning in the third quarter of 2007.

PART II. OTHER INFORMATION

Item 1. *Legal Proceedings*

Information about legal proceedings is set forth in Note 14 to the Consolidated Financial Statements included in this quarterly report.

Item 1A. *Risk Factors*

RISK FACTORS THAT MAY AFFECT FUTURE OPERATING PERFORMANCE

The factors discussed below are cautionary statements that identify important factors that could cause actual results to differ materially from those anticipated by the forward-looking statements contained in this report. For more information regarding the forward-looking statements contained in this report, see the introductory paragraph to Part I, Item 2 of this quarterly report. You should carefully consider the risks and uncertainties described below, together with all of the other information included in this report, in considering our business and prospects. The risks and uncertainties described below are not the only ones facing Amkor. Additional risks and uncertainties not presently known to us also may impair our business operations. The occurrence of any of the following risks could affect our

business, financial condition or results of operations.

The matters relating to the Special Committee's review of our historical stock option granting practices and the restatement of our consolidated financial statements has resulted in expanded litigation and regulatory proceedings against us and may result in future litigation, which could have a material adverse effect on us.

On July 24, 2006, we established a Special Committee, consisting of independent members of the Board of Directors, to conduct a review of our historical stock option granting practices during the period from our initial

Table of Contents

public offering on May 1, 1998 through June 30, 2006. As previously disclosed, the Special Committee identified a number of occasions on which the measurement date used for financial accounting and reporting purposes for stock options granted to certain of our employees was different from the actual grant date. To correct these accounting errors, we amended our Annual Report on Form 10-K for the year ended December 31, 2005 and our Quarterly Report on Form 10-Q for the three months ended March 31, 2006, to restate our financial information from 1998 through March 31, 2006. The review of our historical stock option granting practices, related activities and the resulting restatements, required us to incur substantial expenses for legal, accounting, tax and other professional services and diverted our management's attention from our business and could in the future adversely affect our business, financial condition, results of operations and cash flows.

Our historical stock option granting practices and the restatement of our prior financial statements have exposed us to greater risks associated with litigation and regulatory proceedings. As described in Note 14 to our consolidated financial statements, the complaints in several of our existing litigation matters were subsequently amended to include allegations relating to stock option grants. In addition, the scope of the existing SEC investigation that began in August 2005 has been expanded to include an investigation into our historical stock option grant practices. We cannot assure you that this litigation, the SEC investigation or any future litigation or regulatory action will result in the same conclusions reached by the Special Committee. The conduct and resolution of these matters will be time consuming, expensive and distracting from the conduct of our business. Furthermore, if we are subject to adverse findings in any of these matters, we could be required to pay damages or penalties or have other remedies imposed upon us which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

As a result of our delayed filing of Form 10-Q for the quarter ended June 30, 2006, we will be ineligible to register our securities on Form S-3 for sale by us or resale by others until we have timely filed all periodic reports under the Securities Exchange Act of 1934 for one year from the date the Form 10-Q for the quarter ended June 30, 2006 was due. We may use Form S-1 to raise capital or complete acquisitions, which could increase transaction costs and adversely impact our ability to raise capital or complete acquisitions of other companies in a timely manner.

Pending SEC Investigation – The Pending SEC Investigation Could Adversely Affect Our Business and the Trading Price of Our Securities.

In August 2005, the SEC issued a formal order of investigation regarding certain activities with respect to Amkor securities. We previously announced that the primary focus of the investigation appears to be activities during the period from June 2003 to July 2004. We believe that the investigation in part relates to transactions in Amkor's securities by certain individuals, and that the investigation may in part relate to whether tipping with respect to trading in Amkor securities occurred. The matters at issue involve activities with respect to Amkor securities during the subject period by certain insiders or former insiders and persons or entities associated with them, including activities by or on behalf of certain current and former members of the Board of Directors and Amkor's Chief Executive Officer. We have learned that our former general counsel, whose employment with us terminated in March of 2005, has been indicted by the United States Attorney's Office for the Eastern District of Pennsylvania for violation of the securities laws. The indictment alleges that the former general counsel traded in Amkor securities on the basis of material non-public information. We have also learned that the SEC has filed a civil action against our former general counsel based on substantially the same allegations as contained in the indictment.

In July 2006, the Board of Directors established a Special Committee to review Amkor's historical stock option practices and informed the SEC of these efforts. The SEC subsequently informed us that it is expanding the scope of its investigation and has requested that Amkor provide documentation related to these matters. We have cooperated fully with the SEC on the formal investigation and the informal inquiry that preceded it. We cannot predict the outcome of the investigation. In the event that the investigation leads to SEC action against any current or former officer or director of Amkor, or Amkor itself, our business (including our ability to complete financing transactions)

or the trading price of our securities may be adversely impacted. In addition, if the SEC investigation continues for a prolonged period of time, it may have the same impact regardless of the ultimate outcome of the investigation. Additionally, we have voluntarily provided information to the Department of Justice relating to our historical stock option practices.

Table of Contents

Fluctuations in Operating Results and Cash Flows Our Operating Results and Cash Flows Have Varied and May Vary Significantly as a Result of Factors That We Cannot Control.

Many factors could materially and adversely affect our net sales, gross profit, operating results and cash flows, or lead to significant variability of quarterly or annual operating results. Our profitability and ability to generate cash from operations is principally dependent upon demand for semiconductors, the utilization of our capacity, semiconductor package mix, the average selling price of our services and our ability to control our costs including labor, material, overhead and financing costs.

Our operating results and cash flows have varied significantly from period to period. Our net sales, gross margins, operating income and cash flows have historically fluctuated significantly as a result of many of the following factors, for which we have little or no control over and which we expect to continue to impact our business:

- Fluctuation in demand for semiconductors and conditions in the semiconductor industry;
- changes in our capacity utilization;
- changes in average selling prices;
- changes in the mix of semiconductor packages;
- evolving package and test technology;
- absence of backlog and the short-term nature of our customers' commitments and the impact of these factors on the timing and volume of orders relative to our production capacity;
- changes in costs, availability and delivery times of raw materials and components;
- changes in labor costs to perform our services;
- the timing of expenditures in anticipation of future orders;
- changes in effective tax rates;
- the availability and cost of financing;
- intellectual property transactions and disputes;
- high leverage and restrictive covenants;
- warranty and product liability claims;
- costs associated with litigation judgments and settlements;
- international events or environmental or natural events, such as earthquakes, that impact our operations;
- difficulties integrating acquisitions; and
- our ability to attract qualified employees to support our geographic expansion.

We have historically been unable to accurately predict the impact of these factors upon our results for a particular period. These factors, as well as the factors set forth below which have not significantly impacted our recent historical results, may impair our future business operations and may materially and adversely affect our net sales, gross profit, operating results and cash flows, or lead to significant variability of quarterly or annual operating results:

loss of key personnel or the shortage of available skilled workers;

rescheduling and cancellation of large orders; and

fluctuations in our manufacturing yields.

Table of Contents***Dependence on the Highly Cyclical Semiconductor and Electronic Products Industries We Operate in Volatile Industries, and Industry Downturns Harm Our Performance.***

Our business is tied to market conditions in the semiconductor industry, which is cyclical by nature. The semiconductor industry has experienced significant, and sometimes prolonged, downturns. Because our business is, and will continue to be, dependent on the requirements of semiconductor companies for subcontracted packaging and test services, any downturn in the semiconductor industry or any other industry that uses a significant number of semiconductor devices, such as consumer electronic products, telecommunication devices, or computing devices could have a material adverse effect on our business and operating results. If industry conditions deteriorate, we could suffer significant losses, as we have in the past, which could materially impact our business, results of operations and financial condition.

High Fixed Costs Due to Our High Percentage of Fixed Costs, We Will Be Unable to Maintain Our Gross Margin at Past Levels if We Are Unable to Achieve Relatively High Capacity Utilization Rates.

Our operations are characterized by relatively high fixed costs. Our profitability depends in part not only on pricing levels for our products and services, but also on the utilization rates for our testing and packaging equipment, commonly referred to as capacity utilization rates. In particular, increases or decreases in our capacity utilization rates can significantly affect gross margins since the unit cost of packaging and test services generally decreases as fixed costs are allocated over a larger number of units. In periods of low demand, we experience relatively low capacity utilization rates in our operations, which lead to reduced margins during that period. From time to time we have experienced lower than optimum utilization rates in our operations due to a decline in worldwide demand for our packaging and test services. This can lead to significantly reduced margins during that period. Although our capacity utilization rates at times have been strong, we cannot assure you that we will be able to achieve or maintain relatively high capacity utilization rates, and if we fail to do so, our gross margins may decrease. If our gross margins decrease, our results of operations and financial condition could be materially adversely affected.

In addition, our fixed operating costs have increased in part as a result of our efforts to expand our capacity through significant capital additions in connection with the opening of a wafer bump facility in Singapore in 2006. In the event that forecasted customer demand for which we have made and, on a more limited basis, expect to make advance capital additions does not materialize, our sales may not adequately cover our substantial fixed costs resulting in reduced profit levels or causing significant losses, both of which may adversely impact our liquidity, results of operations and financial condition. Additionally, we could suffer significant losses if current industry conditions deteriorate, which could materially impact our business including our liquidity.

Guidance Our Failure to Meet Our Guidance or Analyst Projections Could Adversely Impact the Trading Prices of Our Securities.

We periodically provide guidance to investors with respect to certain financial information for future periods. Securities analysts also periodically publish their own projections with respect to our future operating results. As discussed above under *Fluctuations in Operating Results and Cash Flows Our Operating Results and Cash Flows Have Varied and May Vary Significantly as a Result of Factors That We Cannot Control*, our operating results and cash flow vary significantly and are difficult to accurately predict. To the extent we fail to meet or exceed our own guidance or the analyst projections for any reason, the trading prices of our securities may be adversely impacted. Moreover, even if we do meet or exceed that guidance or those projections, the analysts and investors may not react favorably, and the trading prices of our securities may be adversely impacted.

Declining Average Selling Prices The Semiconductor Industry Places Downward Pressure on the Prices of Our Products.

Prices for packaging and test services have generally declined over time. Historically, we have been able to partially offset the effect of price declines by successfully developing and marketing new packages with higher prices, such as advanced leadframe and laminate packages, by negotiating lower prices with our material vendors, recovering material cost increases from our customers, and by driving engineering and technological changes in our

Table of Contents

packaging and test processes which resulted in reduced manufacturing costs. We expect general downward pressure on average selling prices for our packaging and test services in the future. If we are unable to offset a decline in average selling prices, including developing and marketing new packages with higher prices, reducing our purchasing costs, recovering more of our material cost increases from our customers and reducing our manufacturing costs, our future operating results will suffer.

Decisions by Our IDM Customers to Curtail Outsourcing May Adversely Affect Our Business.

Historically, we have been dependent on the trend in outsourcing of packaging and test services by integrated device manufacturers (IDM). Our IDM customers continually evaluate the outsourced services against their own in-house packaging and test services. As a result, at any time, and for a variety of reasons, IDMs may decide to shift some or all of their outsourced packaging and test services to internally sourced capacity.

The reasons IDMs may shift their internal capacity include:

- their desire to realize higher utilization of their existing test and packaging capacity, especially during downturns in the semiconductor industry;
- their unwillingness to disclose proprietary technology;
- their possession of more advanced packaging and test technologies; and
- the guaranteed availability of their own packaging and test capacity.

Furthermore, to the extent we continue to limit capacity commitments for certain customers, these customers may begin to increase their level of in-house packaging and test capabilities, which could adversely impact our sales and profitability and make it more difficult for us to regain their business when we have available capacity. Any shift or a slowdown in this trend of outsourcing packaging and test services is likely to adversely affect our business, financial condition and results of operations.

In a downturn in the semiconductor industry, IDMs may be especially likely to respond by shifting some outsourced packaging and test services to internally serviced capacity on a short term basis. This would have a material adverse effect on our business, financial condition and results of operations, especially during a prolonged industry downturn.

High Leverage and Restrictive Covenants Our Substantial Indebtedness Could Adversely Affect Our Financial Condition and Prevent Us from Fulfilling Our Obligations.

We now have, and for the foreseeable future will continue to have, a significant amount of indebtedness. As of June 30, 2007, our total debt balance was \$1,812.7 million, of which \$159.3 million was classified as a current liability. In addition, despite current debt levels, the terms of the indentures governing our indebtedness allow us or our subsidiaries to incur more debt, subject to certain limitations. If new debt is added to our consolidated debt level, the related risks that we now face could intensify.

Covenants in the agreements governing our existing debt, and debt we may incur in the future, may materially restrict our operations, including our ability to incur debt, pay dividends, make certain investments and payments, and encumber or dispose of assets. The agreements also impose affirmative covenants on us including financial reporting obligations. In addition, financial covenants contained in agreements relating to our existing and future debt could lead to a default in the event our results of operations do not meet our plans and we are unable to amend such financial covenants. Bondholder groups may be aggressive and may attempt to call defaults for technical violations of

covenants that have little or nothing to do with our financial performance in an effort to extract consent fees from us or to force a refinancing. A default and acceleration under one debt instrument may also trigger cross-acceleration under our other debt instruments. A default or event of default under one or more of our revolving credit facilities would also preclude us from borrowing additional funds under such facilities. An event of default under any debt instrument, if not cured or waived, could have a material adverse effect on us.

For example, on August 11, 2006, we received a letter dated August 10, 2006 from U.S. Bank National Association (US Bank) as trustee for the holders of our 5% Convertible Subordinated Notes due 2007,

Table of Contents

10.5% Senior Subordinated Notes due 2009, 9.25% Senior Notes due 2008, 9.25% Senior Notes due 2016, 6.25% Convertible Subordinated Notes Due 2013, 7.75% Senior Notes due 2013 and 2.5% Convertible Senior Subordinated Notes due 2011 stating that US Bank, as trustee, had not received our financial statements for the quarter ended June 30, 2006, and that we have 60 days from the date of the letter to file our Quarterly Report on Form 10-Q for the fiscal quarter ended June 30, 2006 or it will be considered an Event of Default under the indentures governing each of the above-listed notes. On the same day, we received a letter from Wells Fargo Bank National Association (Wells Fargo), as trustee for our 7.125% Senior Notes due 2011, stating that we failed to file our Quarterly Report on Form 10-Q for the fiscal quarter ended June 30, 2006, demanding that we immediately file such quarterly report and indicating that unless we file a Form 10-Q within 60 days after the date of such letter, it will ripen into an Event of Default under the indenture governing our 7.125% Senior Notes due 2011.

We cured the alleged defaults described in the US Bank and Wells Fargo letters by filing our Quarterly Report for the quarter ended June 30, 2006 within the 60 day period and avoided the occurrence of an alleged Event of Default. However, had we not filed our Quarterly Report on Form 10-Q for the quarter ended June 30, 2006 within the requisite period, the bondholders may have been able to accelerate all outstanding amounts under the above listed notes and trigger acceleration under our other debt agreements, which could have resulted in a material adverse effect.

Our substantial indebtedness could:

Make it more difficult for us to satisfy our obligations with respect to our indebtedness;

increase our vulnerability to general adverse economic and industry conditions;

limit our ability to fund future working capital, capital expenditures, research and development and other general corporate requirements;

require us to dedicate a substantial portion of our cash flow from operations to service payments on our debt;

limit our flexibility to react to changes in our business and the industry in which we operate;

Place us at a competitive disadvantage to any of our competitors that have less debt; and

limit, along with the financial and other restrictive covenants in our indebtedness, among other things, our ability to borrow additional funds.

History of Losses.

Although we achieved net income and positive operating cash flow in 2006 and the first half of 2007, we have had net losses in four of the previous five years and negative operating cash flow in several previous quarters. There is no assurance that we will be able to sustain our current profitability or avoid net losses in the future.

Ability to Fund Liquidity Needs.

We operate in a capital intensive industry. Servicing our current and future customers requires that we incur significant operating expenses and continue to make significant capital expenditures, which are generally made in advance of the related revenues and without any firm customer commitments. During 2006, we had capital additions of \$299 million and in 2007 we currently anticipate making capital additions of approximately \$275 million to \$300 million, which estimate is subject to adjustment based on business conditions. In addition, we have a significant level of debt, with \$1,812.7 million outstanding at June 30, 2007, \$159.3 million of which is current. The terms of

such debt require significant scheduled principal payments in the coming years, including \$34.3 million due during the remainder of 2007, \$154.1 million due in 2008, \$54.7 million due in 2009, \$54.7 million due in 2010, \$482.6 million due in 2011 and \$1,032.3 million due thereafter. The interest payments required on our debt are also substantial. For example, in the six months ended June 30, 2007, we paid \$71.1 million of interest. (See Part I, Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations - Capital Additions and Contractual Obligations for a summary of principal and interest payments.) The source of funds to fund our operations, including making capital expenditures and servicing principal and interest obligations with respect to our debt, are cash flows from our operations, current cash and cash equivalents,

Table of Contents

borrowings under available debt facilities, or proceeds from any additional debt or equity financing. As of June 30, 2007, we had cash and cash equivalents of \$238.4 million and \$99.8 million available under our senior secured revolving credit facility.

We assess our liquidity based on our current expectations regarding sales, operating expenses, capital spending and debt service requirements. Based on this assessment, we believe that our cash flow from operating activities together with existing cash and cash equivalents and availability under our senior secured revolving credit facility will be sufficient to fund our working capital, capital expenditure and debt service requirements through June 30, 2008. Thereafter, our liquidity will continue to be affected by, among other things, the performance of our business, our capital expenditure levels and our ability to repay debt out of our operating cash flow or refinance the debt with the proceeds of debt or equity offerings at or prior to maturity. If our performance or access to the capital markets differs materially from our expectations, our liquidity may be adversely impacted.

If we fail to generate the necessary net income or operating cash flows to meet the funding needs of our business beyond June 30, 2008 due to a variety of factors, including the cyclical nature of the semiconductor industry and the other factors discussed in this Risk Factors section, our liquidity would be adversely affected. We would consider taking a variety of actions, including: attempting to reduce our high fixed costs (for example, closing facilities and reducing the size of our work force), curtailing or reducing planned capital additions, raising additional equity, borrowing additional funds, refinancing existing indebtedness or taking other actions. There can be no assurance, however, that we will be able to successfully take any of these actions, including adjusting our expenses sufficiently or in a timely manner, or raising additional equity, or increasing borrowings or completing refinancings on any terms or on terms that are acceptable to us. Our inability to take these actions as and when necessary would materially adversely affect our liquidity, results of operations and financial condition.

Absence of Backlog The Lack of Contractually Committed Customer Demand May Adversely Affect Our Sales.

Our packaging and test business does not typically operate with any material backlog. Our quarterly net sales from packaging and test services are substantially dependent upon our customers' demand in that quarter. None of our customers have committed to purchase any significant amount of packaging or test services or to provide us with binding forecasts of demand for packaging and test services for any future period, in any material amount. In addition, our customers often reduce, cancel or delay their purchases of packaging and test services for a variety of reasons including industry-wide, customer-specific and Amkor-related reasons. Recently, our customers' demand for our services has been stable; however, we cannot predict if this demand trend will continue. Because a large portion of our costs is fixed and our expense levels are based in part on our expectations of future revenues, we may not be able to adjust costs in a timely manner to compensate for any sales shortfall. If we are unable to do so, it would adversely affect our margins, operating results, cash flows and financial condition. If customer demand does not materialize as anticipated, our net sales, margins, operating results, cash flows and financial condition will be materially and adversely affected.

Risks Associated With International Operations We Depend on Our Factories and Operations in China, Japan, Korea, the Philippines, Singapore and Taiwan. Many of Our Customers and Vendors Operations Are Also Located Outside of the U.S.

We provide packaging and test services through our factories and other operations located in the China, Japan, Korea, the Philippines, Singapore and Taiwan. Moreover, many of our customers' and vendors' operations are located outside the U.S. The following are some of the risks inherent in doing business internationally:

regulatory limitations imposed by foreign governments;

fluctuations in currency exchange rates;

political, military and terrorist risks;

disruptions or delays in shipments caused by customs brokers or government agencies;

unexpected changes in regulatory requirements, tariffs, customs, duties and other trade barriers;

Table of Contents

difficulties in staffing and managing foreign operations; and

potentially adverse tax consequences resulting from changes in tax laws.

Our Management Information Systems May Prove Inadequate We Face Risks in Connection With Our Current Project to Install a New Enterprise Resource Planning System For Our Business.

We depend on our management information systems for many aspects of our business. Some of our key software has been developed by our own programmers and this software may not be easily integrated with other software and systems. We are implementing a new enterprise resource planning system to replace many of our existing systems at significant locations. We face risks in connection with our current project to install a new enterprise resource system for our business. These risks include:

we may face delays in the design and implementation of that system;

the cost of the system may exceed our plans and expectations; and

such system may damage our ability to process transactions or harm our control environment.

Our business will be materially and adversely affected if our management information systems are disrupted or if we are unable to improve, upgrade, integrate or expand upon our systems, particularly in light of our intention to implement a new enterprise resource planning system.

Difficulties Expanding and Evolving Our Operational Capabilities We Face Challenges as We Integrate New and Diverse Operations and Try to Attract Qualified Employees to Support Our Operations.

We have experienced, and expect to continue to experience, growth in the scope and complexity of our operations. For example, each business we have acquired had, at the time of acquisition, multiple systems for managing its own production, sales, inventory and other operations. Migrating these businesses to our systems typically is a slow, expensive process requiring us to divert significant amounts of resources from multiple aspects of our operations. This growth has strained our managerial, financial, plant operations and other resources. Future expansions may result in inefficiencies as we integrate new operations and manage geographically diverse operations. Our success depends to a significant extent upon the continued service of our key senior management and technical personnel, any of whom may be difficult to replace. Competition for qualified employees is intense, and our business could be adversely affected by the loss of the services of any of our existing key personnel, including senior management, as a result of competition or for any other reason. We evaluate our management team and engage in long-term succession planning in order to ensure orderly replacement of key personnel. We cannot assure you that we will be successful in these efforts or in hiring and properly training sufficient numbers of qualified personnel and in effectively managing our growth. Our inability to attract, retain, motivate and train qualified new personnel could have a material adverse effect on our business.

Dependence on Materials and Equipment Suppliers Our Business May Suffer If The Cost, Quality or Supply of Materials or Equipment Changes Adversely.

We obtain from various vendors the materials and equipment required for the packaging and test services performed by our factories. We source most of our materials, including critical materials such as leadframes, laminate substrates and gold wire, from a limited group of suppliers. Furthermore, we purchase the majority of our materials on a purchase order basis. From time to time, we enter into supply agreements, generally up to one year in duration, to

guarantee supply to meet projected demand. Our business may be harmed if we cannot obtain materials and other supplies from our vendors in a timely manner, in sufficient quantities, in acceptable quality or at competitive prices.

We need to purchase new test and packaging equipment if we decide to expand our operations (sometimes in anticipation of expected market demand), to manufacture some new types of packaging, perform some different testing or to replace equipment that breaks down or wears out. From time to time, increased demand for new equipment may cause lead times to extend beyond those normally required by equipment vendors. For example, in the past, increased demand for equipment caused some equipment suppliers to only partially satisfy our equipment

Table of Contents

orders in the normal lead time frame or increase prices during market upturns for the semiconductor industry. The unavailability of equipment or failures to deliver equipment could delay implementation of our future expansion plans and impair our ability to meet customer orders. If we are unable to implement our future expansion plans or meet customer orders, we could lose potential and existing customers. Generally, we do not enter into binding, long-term equipment purchase agreements and we acquire our equipment on a purchase order basis, which exposes us to substantial risks. For example, changes in foreign currency exchange rates could result in increased prices for equipment purchased by us, which could have a material adverse effect on our results of operations.

We are a large buyer of gold and other commodity materials including substrates and copper. The price of gold and other commodities used in our business fluctuate. Historically, we have been able to partially offset the effect of commodity price increases through price adjustments to some customers and changes in our product designs. Significant price increases may adversely impact our gross margin in future quarters to the extent we are unable to pass along past or future commodity price increases to our customers.

Loss of Customers – The Loss of Certain Customers May Have a Significant Adverse Effect on the Operations and Financial Results.

The loss of a large customer or disruption of our strategic partnerships or other commercial arrangements may result in a decline in our sales and profitability. Although we have over 300 customers, we have derived and expect to continue to derive a large portion of our revenues from a small group of customers during any particular period due in part to the concentration of market share in the semiconductor industry. Our five largest customers together accounted for approximately 30.1%, 27.9% and 25.2% of our net sales in the first half of 2007, and the fiscal years 2006 and 2005, respectively. No customer accounts for more than 10% of our net sales.

The demand for our services from each customer is directly dependent upon that customer's level of business activity, which could vary significantly from year to year. The loss of a large customer may adversely affect our sales and profitability. Our key customers typically operate in the cyclical semiconductor business and, in the past, order levels have varied significantly from period to period based on a number of factors. Our business is likely to remain subject to this variability in order levels, and we cannot assure you that these key customers or any other customers will continue to place orders with us in the future at the same levels as in past periods. The loss of one or more of our significant customers, or reduced orders by any one of them, and our inability to replace these customers or make up for such orders could reduce our profitability. For example, our facility in Iwate, Japan, is primarily dedicated to a single customer, Toshiba Corporation. If we were to lose Toshiba as a customer or if it were to materially reduce its business with us, it could be difficult for us to find one or more new customers to utilize the capacity, which could have a material adverse effect on our operations and financial results.

Capital Additions – We Believe We Need To Make Substantial Capital Additions, Which May Adversely Affect Our Business If Our Business Does Not Develop As We Expect.

We believe that our business requires us to make significant capital additions in order to capitalize on what we believe is an overall trend to outsource packaging and test services. The amount of capital additions will depend on several factors, including the performance of our business, our assessment of future industry and customer demand, our capacity utilization levels and availability, our liquidity position and the availability of financing. Our ongoing capital addition requirements may strain our cash and short-term asset balances, and we expect that depreciation expense and factory operating expenses associated with our recent capital additions to increase production capacity will put downward pressure on our gross margin, at least over the near term.

Furthermore, if we cannot generate or borrow additional funds to pay for capital additions as well as research and development activities, our growth prospects and future profitability may be adversely affected. Our ability to obtain

external financing in the future is subject to a variety of uncertainties, including:

our future financial condition, results of operations and cash flows;

general market conditions for financing activities by semiconductor companies; and

economic, political and other global conditions.

Table of Contents

The lead time needed to order, install and put into service various capital additions is often significant, and as a result we often need to commit to capital additions in advance of our receipt of firm orders or advance deposits based on our view of anticipated future demand with only very limited visibility. Although we seek to limit our exposure in this regard, in the past we have from time to time expended significant capital for additions for which the anticipated demand did not materialize for a variety of reasons, many of which were outside of our control. To the extent this occurs in the future, our margins, liquidity, results of operations and financial condition could be materially adversely affected.

Impairment Charges Any Impairment Charges Required Under GAAP May Have a Material Adverse Effect on Our Net Income.

Under GAAP, we review our long-lived assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. In addition, goodwill and other intangible assets with indefinite lives are tested for impairment at least annually. We may be required in the future to record a significant charge to earnings in our financial statements during the period in which any impairment of our long-lived assets is determined. Such charges have a significant adverse impact on our results of operations and financial condition.

Increased Litigation Incident to Our Business Our Business May Suffer as a Result of Our Involvement in Various Lawsuits.

We are currently a party to various legal proceedings, including those described in Note 14 to the Consolidated Financial Statements included in the quarterly report. For example, we are engaged in an arbitration proceeding entitled *Tessera, Inc. v. Amkor Technology, Inc.* We were also named as a party in a purported securities class action suit entitled *Nathan Weiss et al. v. Amkor Technology, Inc. et al.* (and several similar cases which have now been consolidated), and in purported shareholder derivative lawsuits entitled *Scimeca v. Kim, et al.*, *Khan v. Kim, et al.* and *Feldgus v. Kim, et al.* If an unfavorable ruling or outcome were to occur in arbitration or litigation, there exists the possibility of a material adverse impact on our results of operations, financial condition or cash flows. An unfavorable ruling or outcome could also have a negative impact on the trading price of our securities. The estimate of the potential impact from the legal proceedings referred to in this annual report on our financial condition, results of operations or cash flows could change in the future.

We Could Suffer Adverse Tax and Other Financial Consequences if Taxing Authorities Do Not Agree with Our Interpretation of Applicable Tax Laws.

Our corporate structure and operations are based, in part, on interpretations of various tax laws, including withholding tax and other relevant laws of applicable taxing jurisdictions. From time to time, the taxing authorities of the relevant jurisdictions may conduct examinations of our income tax returns and other regulatory filings. We cannot assure you that the taxing authorities will agree with our interpretations. To the extent they do not agree, we may seek to enter into settlements with the taxing authorities which require significant payments or otherwise adversely affect our results of operations or financial condition. We may also appeal the taxing authorities' determinations to the appropriate governmental authorities, but we can not be sure we will prevail. If we do not prevail, we may have to make significant payments or otherwise record charges (or reduce tax assets) that adversely affect our results of operations or financial condition.

For example, during 2003 the Internal Revenue Service (IRS) conducted an examination of our U.S. federal income tax returns relating to years 2000 and 2001, which resulted in a settlement pursuant to which various adjustments were made, including reductions in our U.S. net operating loss carryforwards. In addition, during 2005, the IRS conducted a limited scope examination of our U.S. federal income tax returns relating to years 2002 and 2003, primarily reviewing

inter-company transfer pricing and cost-sharing issues carried over from the 2000 and 2001 examination cycle, as a result of which we agreed to further reductions in our net operating loss carryforwards. Future examinations by the taxing authorities in the United States or other jurisdictions may result in additional adverse tax consequences.

Table of Contents

Rapid Technological Change Our Business Will Suffer If We Cannot Keep Up With Technological Advances in Our Industry.

The complexity and breadth of semiconductor packaging and test services are rapidly increasing. As a result, we expect that we will need to offer more advanced package designs in order to respond to competitive industry conditions and customer requirements. Our success depends upon our ability to acquire, develop and implement new manufacturing processes and package design technologies and tools. The need to develop and maintain advanced packaging capabilities and equipment could require significant research and development and capital expenditures and acquisitions in future years. In addition, converting to new package designs or process methodologies could result in delays in producing new package types, which could adversely affect our ability to meet customer orders and adversely impact our business.

Technological advances also typically lead to rapid and significant price erosion and may make our existing products less competitive or our existing inventories obsolete. If we cannot achieve advances in package design or obtain access to advanced package designs developed by others, our business could suffer.

Packaging and Test The Packaging and Test Process Is Complex and Our Production Yields and Customer Relationships May Suffer from Defects in the Services We Provide.

Semiconductor packaging and test are complex processes that require significant technological and process expertise. The packaging process is complex and involves a number of precise steps. Defective packages primarily result from:

- contaminants in the manufacturing environment;
- human error;
- equipment malfunction;
- changing processes to address environmental requirements;
- defective raw materials; or
- defective plating services.

Testing is also complex and involves sophisticated equipment and software. Similar to most software programs, these software programs are complex and may contain programming errors or bugs. The testing equipment is also subject to malfunction. In addition, the testing process is subject to operator error by our employees who operate our testing equipment and related software.

These and other factors have, from time to time, contributed to lower production yields. They may also do so in the future, particularly as we expand our capacity or change our processing steps. In addition, to be competitive we must continue to expand our offering of packages. Our production yields on new packages typically are significantly lower than our production yields on our more established packages.

Our failure to maintain high standards or acceptable production yields, if significant and prolonged, could result in loss of customers, increased costs of production, delays, substantial amounts of returned goods and claims by customers relating thereto. Any of these problems could have a material adverse effect on our business, financial condition and results of operations.

In addition, in line with industry practice, new customers usually require us to pass a lengthy and rigorous qualification process that may take several months, at a significant cost to the customer. If we fail to qualify packages with potential customers or customers with which we have recently become qualified, our operating results and financial condition could be adversely affected.

Competition We Compete Against Established Competitors in the Packaging and Test Business as Well as Internal Customer Capabilities.

The subcontracted semiconductor packaging and test market is very competitive. We face substantial competition from established packaging and test service providers primarily located in Asia, including companies

Table of Contents

with significant processing capacity, financial resources, research and development operations, marketing and other capabilities. These companies also have established relationships with many large semiconductor companies that are our current or potential customers.

We also face competition from the internal capabilities and capacity of many of our current and potential IDM customers.

In addition, we may in the future have to compete with a number of companies that may enter the market and with companies that may offer new or emerging technologies that compete with our products and services.

We cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our customers will not rely on internal sources for packaging and test services, or that our business, financial condition and results of operations will not be adversely affected by such increased competition.

Environmental Regulations Future Environmental Regulations Could Place Additional Burdens on Our Manufacturing Operations.

The semiconductor packaging process uses chemicals, materials and gases and generates byproducts that are subject to extensive governmental regulations. For example, at our foreign facilities we produce liquid waste when silicon wafers are diced into chips with the aid of diamond saws, then cooled with running water. In addition, semiconductor packages have historically utilized metallic alloys containing lead (Pb) within the interconnect terminals typically referred to as leads, pins or balls. Federal, state and local regulations in the U.S., as well as international environmental regulations, impose various controls on the storage, handling, discharge and disposal of chemicals used in our production processes and on the factories we occupy and are increasingly imposing restrictions on the materials contained in semiconductor products.

Increasingly, public attention has focused on the environmental impact of semiconductor operations and the risk to neighbors of chemical releases from such operations and to the materials contained in semiconductor products. For example, the European Union's recently enacted Directives on Waste Electrical and Electronic Equipment (WEEE), and Restriction of Use of Certain Hazardous Substances (RoHS) impose strict restrictions on the use of lead and other hazardous substances in electrical and electronic equipment. WEEE and RoHS became effective on July 1, 2006. In response to these directives, we have implemented changes in a number of our manufacturing processes in an effort to achieve RoHS compliance across all of our package types. Complying with existing and future environmental regulations may impose upon us the need for additional capital equipment or other process requirements, restrict our ability to expand our operations, disrupt our operations, subject us to liability or cause us to curtail our operations.

Intellectual Property We May Become Involved in Intellectual Property Litigation.

We maintain an active program to protect our investment in technology by augmenting and enforcing our intellectual property rights. Intellectual property rights that apply to our various products and services include patents, copyrights, trade secrets and trademarks. We have filed and obtained a number of patents in the U.S. and abroad the duration of which varies depending on the jurisdiction in which the patent is filed. While our patents are an important element of our intellectual property strategy and our success as a whole, we are not materially dependent on any one patent or any one technology. We expect to continue to file patent applications when appropriate to protect our proprietary technologies, but we cannot assure you that we will receive patents from pending or future applications.

Any patents we do obtain may be challenged, invalidated or circumvented and may not provide meaningful protection or other commercial advantage to us. The semiconductor industry is characterized by frequent claims regarding patent and other intellectual property rights. If any third party makes an enforceable infringement claim against us or our

customers, we could be required to:

discontinue the use of certain processes;

cease to provide the services at issue;

pay substantial damages;

Table of Contents

develop non-infringing technologies; or

acquire licenses to the technology we had allegedly infringed.

We may need to enforce our patents or other intellectual property rights or defend ourselves against claimed infringement of the rights of others through litigation, which could result in substantial cost and diversion of our resources. Furthermore, if we fail to obtain necessary licenses, our business could suffer. We are currently involved in three legal proceedings involving the acquisition of intellectual property rights, the enforcement of our existing intellectual property rights or the enforcement of the intellectual property rights of others. We refer you to the matters of *Tessera, Inc. v. Amkor Technology, Inc.*, *Amkor Technology, Inc. v. Motorola, Inc.*, and *Amkor Technology, Inc. v. Carsem, et al.*, which are described in more detail in Note 14 to the Consolidated Financial Statements included in this quarterly report. Unfavorable outcomes in one or more of these matters could result in significant liabilities and could have a material adverse effect on our financial condition, results of operations or cash flows. An unfavorable ruling or outcome could also have a negative impact on the trading price of our securities. The estimate of the potential impact from the legal proceedings referred to in this report on our financial condition, results of operations, or cash flows could change in the future.

Fire, Flood or Other Calamity With Our Operations Conducted in a Limited Number of Facilities, a Fire, Flood or Other Calamity at one of Our Facilities Could Adversely Affect Us.

We conduct our packaging and test operations at a limited number of facilities. Significant damage or other impediments to any of these facilities, whether as a result of fire, weather, disease, civil strife, industrial strikes, breakdowns of equipment, difficulties or delays in obtaining materials and equipment, natural disasters, terrorist incidents, industrial accidents or other causes could temporarily disrupt or even shut down our operations, which would have a material adverse effect on our business, financial condition and results of operations. In the event of such a disruption or shutdown, we may be unable to reallocate production to other facilities in a timely or cost-effective manner (if at all) and may not have sufficient capacity to service customer demands in our other facilities. For example, our operations in Asia are vulnerable to regional typhoons that can bring with them destructive winds and torrential rains, which could in turn cause plant closures and transportation interruptions. In addition, some of the processes that we utilize in our operations place us at risk of fire and other damage. For example, highly flammable gases are used in the preparation of wafers holding semiconductor devices for flip-chip packaging. While we maintain insurance policies for various types of property, casualty and other risks, we do not carry insurance for all the above referred risks and with regard to the insurance we do maintain, we cannot assure you that it would be sufficient to cover all of our potential losses.

SARS, Avian Flu and Other Contagious Diseases Any Recurrence of SARS or Outbreak of Avian Flu or Other Contagious Disease May Have an Adverse Effect on the Economies and Financial Markets of Certain Asian Countries and May Adversely Affect Our Results of Operations.

In the first half of 2003, various countries encountered an outbreak of severe acute respiratory syndrome, or SARS, which is a highly contagious form of atypical pneumonia. In addition, there have been outbreaks of avian flu and other contagious diseases in various parts of the world. There is no guarantee that an outbreak of SARS, avian flu or other contagious disease will not occur again in the future (and maybe with much more widespread and devastating effects) and that any such future outbreak of SARS, avian flu or other contagious disease, or the measures taken by the governments of the affected countries against such potential outbreaks, will not seriously disrupt our production operations or those of our suppliers and customers, including by resulting in quarantines or closures. In the event of such a facility quarantine or closure, if we were unable to quickly identify alternate manufacturing facilities, this would have a material adverse effect on our financial condition and results of operations, as would the inability of our

suppliers to continue to supply us and our customers continuing to purchase from us.

Continued Control By Existing Stockholders Mr. James J. Kim and Members of His Family Can Substantially Control The Outcome of All Matters Requiring Stockholder Approval.

As of June 30, 2007, Mr. James J. Kim, our Chief Executive Officer and Chairman of the Board, and certain Family trusts beneficially owned approximately 45% of our outstanding common stock. This percentage includes beneficial ownership of the securities underlying our 6.25% convertible subordinated notes due 2013.

Table of Contents

Mr. James J. Kim's family, acting together, have the ability to effectively determine matters (other than interested party transactions) submitted for approval by our stockholders by voting their shares, including the election of all of the members of our Board of Directors. There is also the potential, through the election of members of our Board of Directors, that Mr. Kim's family could substantially influence matters decided upon by the Board of Directors. This concentration of ownership may also have the effect of impeding a merger, consolidation, takeover or other business consolidation involving us, or discouraging a potential acquirer from making a tender offer for our shares, and could also negatively affect our stock's market price or decrease any premium over market price that an acquirer might otherwise pay.
