MFS ORIGINAL RESEARCH(R)

RESEARCH HAS BEEN CENTRAL TO INVESTMENT MANAGEMENT AT MFS
SINCE 1932, WHEN WE CREATED ONE OF THE FIRST IN-HOUSE
RESEARCH DEPARTMENTS IN THE MUTUAL FUND (SM)
INDUSTRY. ORIGINAL RESEARCH(SM) AT MFS IS MORE ORIGINAL RESEARCH
THAN JUST CRUNCHING NUMBERS AND CREATING
ECONOMIC MODELS: IT'S GETTING TO KNOW MFS
EACH SECURITY AND EACH COMPANY PERSONALLY.
MAKES A DIFFERENCE

LETTER FROM THE CHAIRMAN

[Photo of Jeffrey L. Shames]
Jeffrey L. Shames

Dear Shareholders,
If you've been reading our fund reports for any length of time, you've probably
sensed the pride we have in our research process. More than anything else, we
think MFS Original Research(R) -- and the performance results it has yielded for
shareholders -- makes us unique among investment management companies. We think
that uniqueness stems from three factors: philosophy, process, and people.

PHILOSOPHY

Edgar Filing: MFS GOVERNMENT MARKETS INCOME TRUST - Form N-30D

In over 75 years in the investment management business, we've developed a number of beliefs about the best ways to invest over a variety of market conditions. First, we believe in bottom-up research, which means we use a company-by-company, one-security-at-a-time approach to building a portfolio. What we look for is the truth about the fundamentals of a company's business -- things such as the ability of management to execute its business plan, the ability of that plan to be scaled up as the company grows, actual demand for the company's products and services, cash flow, profits, and earnings.

Second, we believe that, over the long term, stock prices follow earnings. In our view, stock prices are basically a multiple of projected earnings, with the multiple increasing as the market perceives that a company has something customers want and will continue to want. One of the major elements of Original Research(SM) is doing our best to project a company's future earnings and determine how much the market will pay for those earnings.

Third, we believe there are at least three ways to potentially achieve competitive long-term performance: be early, uncover second chances, and avoid mistakes. All of these are based on bottom-up research. In both domestic and international markets, early discovery has historically been a hallmark of our investment style. Some of the stocks with which MFS has been most successful are those in which we've taken large positions before the market discovered or believed in them. Similarly, some of our best fixed-income investments have been early positions in companies or governments that our research revealed were potential candidates for credit upgrades. (A credit upgrade causes the value of a bond to rise because it indicates the market has increased confidence that principal and interest on the bond will be repaid.)

"Second-chance" opportunities are companies whose stock prices have stumbled but that we believe still have the potential to be market leaders. For example, a quarterly earnings shortfall of a few cents may cause the market to temporarily lose confidence in a company. If we believe the business remains fundamentally strong, we may use the price decline as a buying opportunity.

Avoiding mistakes is another way we feel Original Research may help performance. In fixed-income investing this means, among other things, trying to be better than our peers at avoiding bond issuers that may default. In equity investing, avoiding mistakes means we strive to know a company and its industry well enough to distinguish truth from hype.

PROCESS

We acquire our information firsthand, by researching thousands of companies to determine which firms may make good investments. Our analysis of an individual company may include

- o face-to-face contact with senior management as well as frontline workers
- o analysis of the company's financial statements and balance sheets
- o contact with the company's current and potential customers
- o contact with the company's competitors
- o our own forecasts of the company's future market share, cash flow, and earnings

Our analysts and portfolio managers disseminate this information in the form of daily notes e-mailed worldwide to all members of our investment team. This ensures that our best ideas are shared throughout the company, without barriers between equity and fixed-income, international and domestic, or value and growth investment areas. We believe this allows each of our portfolio managers -- and thus each of our investors -- to potentially benefit from any relevant item of Original Research.

John Ballen, our President and Chief Investment Officer, has often said that the thought he hopes managers will have when they read the daily notes is, "I could never perform as well at any other investment company, because nowhere else

Edgar Filing: MFS GOVERNMENT MARKETS INCOME TRUST - Form N-30D

could the quality of the research be this good."

PEOPLE

Our team of research analysts and portfolio managers traces its roots back to 1932, when we created one of the first in-house research departments in the industry. Today, we believe we have an investment team distinguished for its unique blend of talent, continuity, and cohesiveness.

MFS' team culture and commitment to quality research have proven to be of tremendous value in attracting some of the best and brightest talent from leading business schools and from other investment management companies. Our company culture was a key factor in our recognition by Fortune magazine in its January 10, 2000, issue as one of the "100 Best Companies to Work For" in America. As befits a great team, our people have tended to stick around -- the average MFS tenure of our portfolio managers is 11 years, with over 16 years in the investment industry. Contributing to this continuity is our policy that all equity portfolio managers are promoted from within, after distinguishing themselves first as research analysts. And because many of us who are now managing funds or managing the company itself have been working together for well over a decade, we have a cohesiveness, a shared philosophy of investing, and a unity of purpose that we believe bodes well for the future of the company.

We also have scale. Our research analyst team is over 55 members strong and growing. Each analyst is our in-house expert on a specific industry or group of industries in a specific region of the globe. In pursuing their research, our analysts and portfolio managers each year will visit more than 2,000 companies throughout the world, meet with representatives from more than 3,000 companies at one of our four worldwide offices, attend roughly 5,000 company presentations sponsored by major Wall Street firms, and consult with over 1,000 analysts from hundreds of U.S. and foreign brokerage houses.

All of this culminates in our analysts making buy and sell recommendations on a wide range of potential investments for all of our portfolios. In the end, the goal of Original Research is to try to give our portfolio managers an advantage over their peers -- to enable our managers to deliver competitive performance by finding opportunities before they are generally recognized by the market, and by avoiding mistakes whenever possible. Original Research does, we believe, make a difference.

As always, we appreciate your confidence in MFS and welcome any questions or comments you may have.

Respectfully,

/s/ Jeffrey L. Shames

MANAGEMENT REVIEW AND OUTLOOK

Dear Shareholders,

For the 12 months ended November 30, 2000, the trust provided a total return of 15.24% based on its beginning and ending stock market prices and assuming the

Edgar Filing: MFS GOVERNMENT MARKETS INCOME TRUST - Form N-30D

reinvestment of any distributions paid during the period. The trust's total return based on its net asset value (NAV) was 9.35%. During the same period, the Salomon Brothers Medium Term (1-to-10 year) Treasury Government Sponsored Index (the Salomon Index), an unmanaged index of medium-term U.S. Treasury and government-agency securities, returned 1.54%. The J.P. Morgan Non-Dollar Government Bond Index (the J.P. Morgan Index), an unmanaged index of actively traded government bonds issued by 12 countries (excluding the United States) with remaining maturities of at least one year, returned -6.59% over the same period.

Turbulent market conditions characterized the period as this year could truly be described as a tale of two bond markets. The U.S. Treasury market in particular, which was out of favor in 1999 and the early part of 2000, reversed course to become the big winner over the past year. Through the first half of the one-year period, a tight labor market, signs of rising inflation, and persistently robust economic growth applied downward pressure on bond prices as investors anticipated the Federal Reserve Board's (the Fed) next move. Investor sentiment shifted dramatically over the past few months as most fixed-income securities, especially U.S. Treasuries, posted strong gains amid increasing evidence that the Fed has successfully orchestrated a "soft landing" -- a gradual slowing of the economy, which would lead to noninflationary economic growth.

Given this environment, in the first half of the period we underweighted the portfolio in short- and intermediate-maturity Treasuries and mortgage-backed securities because they tend to perform poorly in a rising interest rate environment. At the same time, we overweighted long-term Treasuries, which have tended to be less affected when the Fed raises short-term interest rates.

As the U.S. and global economies began to show signs of slowing, we increased our holdings in mortgage-backed securities, government agency bonds, and longer-term Treasuries as a way to potentially take advantage of historically attractive spreads and to gain additional yield for the portfolio. In recent months, these strategies helped the portfolio outperform both the Salomon and Morgan indices. Our positions in federal agency securities rallied amid a more optimistic outlook on whether the implicit government guarantee on these issues would remain in place. Holdings in mortgage-backed securities benefited from reduced supply and a more favorable prepayment environment.

On the international side, due to the persistent decline in the euro and the potential for interest rate hikes, we reduced our exposure to European bonds. We maintained only limited exposure to international bonds as we generally found more attractive opportunities in the United States. However, the international markets we favored were all within the dollar-bloc countries, such as Australia, New Zealand, and Canada. We added to positions in these countries because we anticipated better return potential compared to European bonds of comparable credit quality.

Looking forward, we're fairly confident that global economic growth, especially in the United States, will continue to decelerate and dispel remaining fears of inflation, which could continue to benefit the fixed-income market. As a result, we believe above-average returns may be garnered through investing in high-quality intermediate-term mortgage-backed, agency, and government securities.

Respectfully,

NUMBER OF SHAREHOLDERS

As of November 30, 2000, our records indicate that there are 13,811 registered shareholders and approximately 28,000 shareholders owning trust shares in "street" name, such as through brokers, banks, and other financial intermediaries.

If you are a "street" name shareholder and wish to directly receive our reports, which contain important information about the trust, please write or call:

State Street Bank and Trust Company
P.O. Box 8200
Boston, MA 02266-8200
1-800-637-2304

In accordance with Section 23(c) of the Investment Company Act of 1940, the trust hereby gives notice that it may from time to time repurchase shares of the trust in the open market at the option of the Board of Trustees and on such terms as the Trustees shall determine.

OBJECTIVE: Seeks to provide a high level of current income

NEW YORK STOCK EXCHANGE SYMBOL: MGF

Edgar Filing: MFS GOVERNMENT MARKETS INCOME TRUST - Form N-30D

PERFORMANCE SUMMARY

(For the year ended November 30, 2000)

NET ASSET VALUE PER SHARE

November 30, 1999	\$6.94
November 30, 2000	\$7.01

NEW YORK STOCK EXCHANGE PRICE

November 30, 1999	\$5.8125
November 27, 2000 (high)*	\$6.2500
January 20, 2000 (low)*	\$5.6875
November 30, 2000	\$6.1875

*For the period from December 1, 1999, through November 30, 2000.

NOTES TO PERFORMANCE SUMMARY

Investments in foreign securities may be unfavorably affected by interest rate and currency exchange rate changes as well as by market, economic, and political conditions of the countries where investments are made. There may be greater returns but also greater risk than with U.S. investments. See the prospectus for details.

Government guarantees apply to the underlying securities only and not to the prices and yields of the managed portfolio. See the prospectus for details.

DIVIDEND REINVESTMENT AND CASH PURCHASE PLAN

MFS offers a Dividend Reinvestment and Cash Purchase Plan that allows you to reinvest either all of the distributions paid by the trust or only the long-term capital gains. Purchases are made at the market price unless that price exceeds the net asset value (the shares are trading at a premium). If the shares are trading at a premium, purchases will be made at a discounted price of either the net asset value or 95% of the market price, whichever is greater. Twice each year you can also buy shares. Investments from \$100 to \$500 can be made in January and July on the 15th of the month or shortly thereafter.

If your shares are in the name of a brokerage firm, bank, or other nominee, you can ask the firm or nominee to participate in the plan on your behalf. If the nominee does not offer the plan, you may wish to request that your shares be re-registered in your own name so that you can participate.

There is no service charge to reinvest distributions, nor are there brokerage charges for shares issued directly by the trust. However, when shares are bought on the New York Stock Exchange or otherwise on the open market, each participant pays a pro rata share of the commissions. A service fee of \$0.75 is charged for each cash purchase as well as a pro rata share of the brokerage commissions. The automatic reinvestment of distributions does not relieve you of any income tax that may be payable (or required to be withheld) on the distributions.

To enroll in or withdraw from the plan, or if you have any questions, call 1-800-637-2304 any business day from 8 a.m. to 8 p.m. Eastern time. Please have available the name of the trust and your account and Social Security numbers. For certain types of registrations, such as corporate accounts, instructions must be submitted in writing. Please call for additional details. When you withdraw, you can receive the value of the reinvested shares in one of two ways: a check for the value of the full and fractional shares, or a certificate for the full shares and a check for the fractional shares.

Edgar Filing: MFS GOVERNMENT MARKETS INCOME TRUST - Form N-30D

RESULTS OF SHAREHOLDER MEETINGS (Unaudited)

At the annual meeting of shareholders of MFS Government Markets Income Trust, which was held on September 19, 2000, the following actions were taken:

ITEM 1. The election of Arnold D. Scott and Jeffrey L. Shames as trustees of the trust.

ELECTION OF TRUSTEES	FOR	WITHHELD
Arnold D. Scott	45,761,832.8910	733,174.4099
Jeffrey L. Shames	45,728,033.3715	766,973.9294

ITEM 2. The ratification of the selection of Deloitte & Touche LLP as the independent accountants to be employed by the trust for the fiscal year ending November 30, 2001.

NOTES TO FINANCIAL STATEMENTS

(1) Business and Organization

MFS Government Markets Income Trust (the trust) is organized as a Massachusetts business trust and is registered under the Investment Company Act of 1940, as a nondiversified, closed-end management investment company.

(2) Significant Accounting Policies

General - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The trust can invest in foreign securities. Investments in foreign securities are vulnerable to the effects of changes in the relative values of the local currency and the U.S. dollar and to the effects of changes in each country's legal, political and economic environment.

Investment Valuations - Debt securities (other than short-term obligations which mature in 60 days or less), including listed issues, forward contracts, and swap agreements, are valued on the basis of valuations furnished by dealers or by a pricing service with consideration to factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics, and other market data, without exclusive reliance upon exchange or over-the-counter prices. Short-term obligations, which mature in 60 days or less, are valued at amortized cost, which approximates market value. Non-U.S. dollar denominated short-term obligations are valued at amortized cost as calculated in the foreign currency and translated into U.S. dollars at the closing daily exchange rate. Options and options on futures contracts listed on commodities exchanges are reported at market value using closing settlement prices. Over-the-counter options on securities are valued by brokers. Over-the-counter currency options are valued through the use of a pricing model which takes into account foreign currency exchange spot and forward rates, implied volatility, and short-term repurchase rates. Securities for which there are no such quotations or valuations are valued in good faith,

Edgar Filing: MFS GOVERNMENT MARKETS INCOME TRUST - Form N-30D

at fair value, by the Trustees.

Foreign Currency Translation - Investment valuations, other assets, and liabilities initially expressed in foreign currencies are converted each business day into U.S. dollars based upon current exchange rates. Purchases and sales of foreign investments, income, and expenses are converted into U.S. dollars based upon currency exchange rates prevailing on the respective dates of such transactions. Gains and losses attributable to foreign currency exchange rates on sales of securities are recorded for financial statement purposes as net realized gains and losses on investments. Gains and losses attributable to foreign exchange rate movements on income and expenses are recorded for financial statement purposes as foreign currency transaction gains and losses. That portion of both realized and unrealized gains and losses on investments that results from fluctuations in foreign currency exchange rates is not separately disclosed.

Written Options - The trust may write call or put options in exchange for a premium. The premium is initially recorded as a liability which is subsequently adjusted to the current value of the option contract. When a written option expires, the trust realizes a gain equal to the amount of the premium received. When a written call option is exercised or closed, the premium received is offset against the proceeds to determine the realized gain or loss. When a written put option is exercised, the premium reduces the cost basis of the security purchased by the trust. The trust, as writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and, as a result, bears the market risk of an unfavorable change in the price of the securities underlying the written option. In general, written call options may serve as a partial hedge against decreases in value in the underlying securities to the extent of the premium received. Written options may also be used as part of an income producing strategy reflecting the view of the trust's management on the direction of interest rates.

Security Loans - State Street Bank and Trust Company ("State Street") and Chase Manhattan Bank ("Chase"), as lending agents, may loan the securities of the trust to certain qualified institutions (the "Borrowers") approved by the trust. The loans are collateralized at all times by cash or U.S. Treasury securities in an amount at least equal to the market value of the securities loaned. State Street provides the trust with indemnification against Borrower default. The trust bears the risk of loss with respect to the investment of cash collateral.

Cash collateral is invested in short-term securities. A portion of the income generated upon investment of the collateral is remitted to the Borrowers, and the remainder is allocated between the trust and the lending agents. On loans collateralized by U.S. Treasury securities, a fee is received from the Borrower, and is allocated between the trust and the lending agent. Income from securities lending is included in interest income on the Statement of Operations. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income.

At November 30, 2000, the value of securities loaned was \$94,030,366. These loans were collateralized by cash of \$95,939,664 which was invested in the following short-term obligations:

	PRINCIPAL AMOUNT	AMORTIZED COST AND VALUE
Navigator Securities Lending Prime Portfolio	\$95,939,664	\$95,939,664

Forward Foreign Currency Exchange Contracts - The trust may enter into forward foreign currency exchange contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date. Risks may arise upon

Edgar Filing: MFS GOVERNMENT MARKETS INCOME TRUST - Form N-30D

entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The trust may enter into forward contracts for hedging purposes as well as for non-hedging purposes. For hedging purposes, the trust may enter into contracts to deliver or receive foreign currency it will receive from or require for its normal investment activities. The trust may also use contracts in a manner intended to protect foreign currency-denominated securities from declines in value due to unfavorable exchange rate movements. For non-hedging purposes, the trust may enter into contracts with the intent of changing the relative exposure of the trust's portfolio of securities to different currencies to take advantage of anticipated changes. The forward foreign currency exchange contracts are adjusted by the daily exchange rate of the underlying currency and any gains or losses are recorded as unrealized until the contract settlement date. On contract settlement date, the gains or losses are recorded as realized gains or losses on foreign currency transactions.

Swap Agreements - The trust may enter into swap agreements. A swap is an exchange of cash payments between the trust and another party which is based on a specific financial index. Cash payments are exchanged at specified intervals and the expected income or expense is recorded on the accrual basis. The value of the swap is adjusted daily and the change in value is recorded as unrealized appreciation or depreciation. Risks may arise upon entering into these agreements from the potential inability of counterparties to meet the terms of their contract and from unanticipated changes in the value of the financial index on which the swap agreement is based. The trust uses swaps for both hedging and non-hedging purposes. For hedging purposes, the trust may use swaps to reduce its exposure to interest and foreign exchange rate fluctuations. For non-hedging purposes, the trust may use swaps to take a position on anticipated changes in the underlying financial index.

Investment Transactions and Income - Investment transactions are recorded on the trade date. Interest income is recorded on the accrual basis. All discount is accreted for financial statement and tax reporting purposes as required by federal income tax regulations.

The trust will adopt the provisions of the AICPA Audit and Accounting Guide for Investment Companies, as revised, effective for fiscal years beginning after December 15, 2000. As required, the trust will begin amortizing premiums on debt securities effective December 1, 2001. Prior to this date, the trust did not amortize premiums on debt securities. The cumulative effect of this accounting change will have no impact on the total net assets of the trust. The impact of this accounting change has not been determined but will result in a decrease to cost of securities and a corresponding increase in net unrealized appreciation.

Fees Paid Indirectly - The trust's custody fee is reduced according to an arrangement that measures the value of cash deposited with the custodian by the trust. This amount is shown as a reduction of total expenses on the Statement of Operations.

Tax Matters and Distributions - The trust's policy is to comply with the provisions of the Internal Revenue Code (the Code) applicable to regulated investment companies and to distribute to shareholders all of its net taxable income, including any net realized gain on investments. Accordingly, no provision for federal income or excise tax is provided.

Distributions to shareholders are recorded on the ex-dividend date. The trust distinguishes between distributions on a tax basis and a financial reporting basis and only distributions in excess of tax basis earnings and profits are reported in the financial statements as distributions from paid-in capital. Differences in the recognition or classification of income between the financial statements and tax earnings and profits, which result in temporary

Edgar Filing: MFS GOVERNMENT MARKETS INCOME TRUST - Form N-30D

over-distributions for financial statement purposes, are classified as distributions in excess of net investment income or net realized gains. During the year ended November 30, 2000, \$8,095,791 was reclassified from accumulated undistributed net investment income to accumulated undistributed net realized gain on investments and foreign currency transactions due to differences between book and tax accounting for mortgage-backed securities and foreign currency transactions. This change had no effect on the net assets or net asset value per share. In addition, \$12,251,962 was redesignated as a tax return of capital distribution. At November 30, 2000, accumulated undistributed net investment income and accumulated net realized loss on investments and foreign currency transactions under book accounting were different from tax accounting due to temporary differences in accounting for capital losses and foreign currency transactions.

At November 30, 2000, the trust, for federal income tax purposes, had a capital loss carryforward of \$48,087,867 which may be applied against any net taxable realized gains of each succeeding year until the earlier of its utilization or expiration on:

November 30, 2002	\$21,490,437
November 30, 2004	196,662
November 30, 2005	8,818,381
November 30, 2007	11,594,208
November 30, 2008	5,988,179

(3) Transactions with Affiliates

Investment Adviser - The trust has an investment advisory agreement with Massachusetts Financial Services Company (MFS) to provide overall investment advisory and administrative services, and general office facilities. The management fee is computed daily and paid monthly at the lesser of 0.32% per annum of the trust's average daily net assets and 5.33% of investment income, or 0.85% per annum of average daily net assets. The effective rate for the year ended November 30, 2000, was 0.71%.

The trust pays no compensation directly to its trustees who are officers of the investment adviser, or to officers of the trust, all of whom receive remuneration for their services to the trust from MFS. Certain officers and trustees of the trust are officers or directors of MFS, and MFS Service Center, Inc. (MFSC). The trust has an unfunded defined benefit plan for all of its independent trustees. Included in trustees' compensation is a net periodic pension expense of \$45,305 for the year ended November 30, 2000.

Administrator - The trust has an administrative services agreement with MFS to provide the trust with certain financial, legal, shareholder servicing, compliance, and other administrative services. As a partial reimbursement for the cost of providing these services, the trust incurs an administrative fee at the following annual percentages of the trust's average daily net assets:

First \$2 billion	0.0175%
Next \$2.5 billion	0.0130%
Next \$2.5 billion	0.0005%
In excess of \$7 billion	0.0000%

Transfer Agent - MFSC acts as registrar and dividend disbursing agent for the trust. The agreement provides that the trust will pay MFSC an account maintenance fee of no more than \$9.00 and a dividend services fee of \$0.75 per reinvestment and will reimburse MFSC for reasonable out-of-pocket expenses.

(4) Portfolio Securities

Purchases and sales of investments, other than purchased option transactions and short-term obligations, were as follows:

Edgar Filing: MFS GOVERNMENT MARKETS INCOME TRUST - Form N-30D

	PURCHASES	SALES
U.S. government securities	\$535,399,231	\$509,787,403
Investments (non-U.S. government securities)	\$ 80,246,885	\$112,998,946

The cost and unrealized appreciation and depreciation in the value of the investments owned by the trust, as computed on a federal income tax basis, are as follows:

Aggregate cost	\$425,104,419
Gross unrealized appreciation	\$ 7,922,790
Gross unrealized depreciation	(8,154,445)
Net unrealized depreciation	\$ (231,655)

(5) Shares of Beneficial Interest

The trustees have authorized 97,911,555 full and fractional shares of beneficial interest. Transactions in trust shares were as follows:

	YEAR ENDED NOVEMBER 30, 2000		YEAR ENDED NOVEMBER 30, 1999	
	SHARES	AMOUNT	SHARES	AMOUNT
Treasury shares acquired	(4,231,200)	\$(25,591,692)	(3,808,400)	\$(23,857,500)

In accordance with the provisions of the trust's prospectus 4,231,200 shares of beneficial interest were purchased by the trust during the year ended November 30, 2000, at an average price of \$6.05 and a weighted average discount of 12.26% per share. The trust reacquired 3,808,400 shares of beneficial interest during the year ended November 30, 1999, at an average price per share of \$6.26 and a weighted discount of 12.50% per share.

(6) Line of Credit

The trust and other affiliated funds participate in a \$1.1 billion unsecured line of credit provided by a syndication of banks under a line of credit agreement. Borrowings may be made for temporary financing needs. Interest is charged to each fund, based on its borrowings, at a rate equal to the bank's base rate. In addition, a commitment fee, based on the average daily unused portion of the line of credit, is allocated among the participating funds at the end of each quarter. The commitment fee allocated to the trust for the year ended November 30, 2000, was \$2,945. The trust had no significant borrowings during the year.

(7) Financial Instruments

The trust trades financial instruments with off-balance-sheet risk in the normal course of its investing activities in order to manage exposure to market risks such as interest rates and foreign currency exchange rates. These financial instruments include written options, forward foreign currency exchange contracts, swap agreements, and futures contracts. The notional or contractual amounts of these instruments represent the investment the trust has in particular classes of financial instruments and does not necessarily represent the amounts potentially subject to risk. The measurement of the risks associated with these instruments is meaningful only when all related and offsetting

Edgar Filing: MFS GOVERNMENT MARKETS INCOME TRUST - Form N-30D

transactions are considered.

Written Option Transactions

	NUMBER OF CONTRACTS	PREMIUMS

At November 30, 2000, forward foreign currency purchases and sales under master netting agreements excluded above amounted to a net payable of \$577,552 with Union Bank of Switzerland, \$455,057 with Deutsche Bank and \$41,067 with First Boston and a net receivable of \$54,766 with Merrill Lynch.

At November 30, 2000, the trust had sufficient cash and/or securities to cover any commitment under these contracts.

(8) Restricted Securities

The trust may invest not more than 15% of its net assets in securities which are subject to legal or contractual restrictions on resale. At November 30, 2000, the trust owned the following restricted securities, excluding securities issued under Rule 144A, constituting 0.50% of net assets which may not be publicly sold without registration under the Securities Act of 1933. The trust does not have the right to demand that such securities be registered. The value of these securities is determined by valuations furnished by dealers or by a pricing service, or if not available, in good faith, at fair value, by the Trustees.

INDEPENDENT AUDITORS' REPORT

To the Trustees and Shareholders of MFS Government Markets Income Trust:

We have audited the accompanying statement of assets and liabilities of MFS Government Markets Income Trust, including the portfolio of investments, as of November 30, 2000, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of November 30, 2000, by correspondence with the custodian and brokers; where replies were not received from brokers, we performed other auditing procedures. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of MFS Government Markets Income Trust as of November 30, 2000, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.
