Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A")

INTRODUCTION

The Bank of New York Company, Inc.'s (the "Company") actual results of future operations may differ from those estimated or anticipated in certain forward-looking statements contained herein for reasons that are discussed below and under the heading "Forward-Looking Statements and Risk Factors That Could Affect Future Results." When used in this report, the words "estimate," "forecast," "project," "anticipate," "expect," "intend," "believe," "plan," "goal," "should," "may," "strategy," "target," and words of similar meaning are intended to identify forward-looking statements in addition to statements specifically identified as forward-looking statements. In addition, certain business terms used in this document are defined in the Company's 2005 Annual Report on Form 10-K.

OVERVIEW

The Bank of New York Company, Inc. (NYSE: BK) is a global leader in providing a comprehensive array of services that enable institutions and individuals to move and manage their financial assets in more than 100 markets worldwide. The Company has a long tradition of collaborating with clients to deliver innovative solutions through its core competencies: institutional services, private banking, and asset management. The Company's extensive global client base includes a broad range of leading financial institutions, corporations, government entities, endowments, and foundations. Its principal subsidiary, The Bank of New York, founded in 1784, is the oldest bank in the United States and has consistently played a prominent role in the evolution of financial markets worldwide.

The Company's strategy over the past decade has been to focus on highly scalable, fee-based securities servicing and fiduciary businesses, and it has achieved top three market share in most of its major product lines. The

Company distinguishes itself competitively by offering one of the industry's broadest arrays of products and services around the investment lifecycle. These include:

* advisory and asset management services to support the investment decision;
* extensive trade execution, clearance and settlement capabilities;
* custody, securities lending, accounting, and administrative services for investment portfolios;
* sophisticated risk and performance measurement tools for analyzing portfolios; and
* services for issuers of both equity and debt securities.

By providing integrated solutions for clients' needs, the Company strives to be the preferred partner in helping its clients succeed in the world's rapidly evolving financial markets.

The Company's key objectives include:

* achieving positive operating leverage on an annual basis; and
* sustaining top-line growth by expanding client relationships and winning new ones.

To achieve its key objectives, the Company has grown both through internal reinvestment as well as execution of strategic acquisitions to expand product offerings and increase market share in its scale businesses. Internal reinvestment occurs through increased technology spending, staffing levels, marketing/branding initiatives, quality programs, and product development. The Company consistently invests in technology to improve the breadth and quality of its product offerings, and to increase economies of scale. The Company has

4

acquired over 90 businesses over the past ten years, almost exclusively in its securities servicing and asset management areas. The acquisition of Pershing LLC ("Pershing") in 2003 for $2 billion was the largest of these acquisitions completed to date. The acquisition of the corporate trust business of JPMorgan Chase & Co. ("JPMorgan Chase"), announced in April 2006, will also contribute to the Company's ability to achieve its key objectives. See "Other Developments."

As part of the transformation to a leading securities servicing provider, the Company has also de-emphasized or exited several of its slower growth traditional banking businesses over the past decade. The Company's more significant actions include selling its credit card business in 1997 and its factoring business in 1999, significantly reducing non-financial corporate credit exposures by 41% from December 31, 2001 to December 31, 2005, and, most recently, announcing an agreement to sell retail and regional middle market businesses to JPMorgan Chase. To the extent these actions generated capital, the capital has been reallocated to the Company's higher-growth businesses.

The Company's business model is well positioned to benefit from a number of long-term secular trends. These include:

* growth of worldwide financial assets,
* globalization of investment activity,
* structural market changes, and
* increased outsourcing.

These trends benefit the Company by driving higher levels of financial asset trading volume and other transactional activity, as well as higher asset price levels and growth in client assets, all factors by which the Company

prices its services. In addition, international markets offer excellent growth opportunities.

FIRST QUARTER 2006 HIGHLIGHTS

The Company reported first quarter net income of $422 million, compared with $379 million in the year-ago quarter and diluted earnings per share of 55 cents, up 12% over the 49 cents earned in the first quarter of 2005. In the fourth quarter of 2005, earnings were $405 million and 53 cents.

Additional highlights for the quarter include:

* Positive operating leverage over year-ago and sequential periods.
* Securities servicing fees up 11% versus the year-ago quarter. The growth was led by strong performance in issuer services, broker-dealer services, and execution and clearing services.
* Net interest income was up 7% over last year, reflecting growth in liquidity from the Company's core servicing businesses.
* Foreign exchange and other trading revenues were up 20% from the year-ago quarter.
* Private banking and asset management revenues were up 16% from the year-ago quarter reflecting both organic growth and the acquisition of Alcentra Group Limited and Urdang Capital Management.

On April 8, 2006, the Company announced a definitive agreement with JPMorgan Chase to acquire its corporate trust business, with JPMorgan Chase acquiring the Company's retail and regional middle market banking businesses. The transaction will strengthen the Company's leadership position in corporate trust both in the U.S. and internationally, serving a combined client base with $8 trillion in total debt outstanding in 20 countries.

CONSOLIDATED INCOME STATEMENT REVIEW

Noninterest Income

(Dollars in millions)	1Q06	4Q05	1Q05	Percent Inc/(Dec) 1Q06 vs. 4Q05	Percent Inc/(Dec) 1Q06 vs. 1Q05
Servicing Fees					
Securities	$ 831	$ 814	$ 750	2%	11%
Global Payment Services	70	68	75	3	(7)
	901	882	825	2	9
Private Banking and Asset Management Fees	141	128	122	10	16
Service Charges and Fees	89	94	92	(5)	(3)
Foreign Exchange and Other Trading Activities	115	98	96	17	20
Securities Gains	17	18	12	(6)	42
Other	69	53	31	30	123
Total Noninterest Income	$1,332	$1,273	$1,178	5	13

The increase in noninterest income versus the first quarter of 2005

reflects positive revenue trends in securities servicing, foreign exchange and other trading, private banking and asset management, and other income. On a sequential-quarter basis, noninterest income primarily reflects increases in foreign exchange and other trading, private banking and asset management, and other income.

The following table provides the breakdown of securities servicing fees.

(Dollars in millions)	1Q06	4Q05	1Q05	Percent Inc/(Dec) 1Q06 vs. 4Q05	1Q06 vs. 1Q05
Execution and Clearing Services	$ 339	$ 321	$ 293	6%	16%
Issuer Services	154	171	139	(10)	11
Investor Services	277	264	263	5	5
Broker-Dealer Services	61	58	55	5	11
Securities Servicing Fees	$ 831	$ 814	$ 750	2	11

Double-digit securities servicing fee growth over the first quarter of 2005 reflects strong performance within issuer services, broker-dealer services, and execution and clearing services. On a sequential-quarter basis, fees were moderately higher, reflecting strong growth in execution and clearing services, broker-dealer services and investor services, partially offset by seasonally slower activity in issuer services. See "Institutional Services Segment" in "Business Segment Review" for additional details.

Global payment services fees decreased from the first quarter of 2005 but increased moderately on a sequential-quarter basis. The year-over-year decline reflects customers choosing to pay with higher compensating balances, which benefits net interest income. The sequential increase reflects growth from U.S. financial institutions. On an invoiced services basis, total revenue was up 6% over the first quarter of 2005 and 1% sequentially.

Private banking and asset management fees increased significantly from the first quarter of 2005 and on a sequential-quarter basis primarily due to the

6

acquisition of Alcentra Group Limited ("Alcentra") on January 3, 2006 and the acquisition of Urdang Capital Management ("Urdang") on March 2, 2006, as well as higher fees in private banking. Total assets under management were $113 billion, up from $105 billion at March 31, 2005 and December 31, 2005.

Service charges and fees were down from the first quarter of 2005 and the fourth quarter of 2005. The year-over-year decline reflects lower underwriting fees. The sequential quarter decrease is due to lower syndication fees.

Foreign exchange and other trading revenues were up significantly from the first quarter of 2005 and on a sequential-quarter basis. Foreign exchange was up from the first quarter of 2005 and sequentially due to higher volumes fueled by cross-border investment, particularly in emerging markets. On a year-over-year basis, other trading decreased slightly reflecting a decline in interest

rate derivative activity and lower trading revenues at Pershing. On a sequential-quarter basis, other trading increased primarily as a result of improved performance in fixed income trading.

Securities gains in the first quarter increased $5 million from the year-ago quarter and decreased slightly on a sequential-quarter basis. The gains in the quarter were primarily attributable to the Company's sponsor fund portfolio.

Other noninterest income is attributable to asset-related gains, equity investments, and other transactions. Asset-related gains include gains on lease residuals, as well as loan and real estate dispositions. Equity investment income primarily reflects the Company's proportionate share of the income from its investment in Wing Hang Bank Limited, AIB/BNY Securities Services (Ireland) Limited, and RBSI Securities Services (Holdings) Limited. Other income primarily includes income or loss from insurance contracts, low income housing and other investments as well as various miscellaneous revenues. The breakdown among these three categories is shown below:

Other Noninterest Income

(In millions)	1Q06	4Q05	1Q05
Asset-Related Gains	$ 47	$ 27	$ 14
Equity Investment Income	11	9	12
Other	11	17	5
Total Other Noninterest Income	$ 69	$ 53	$ 31

Other noninterest income increased versus the first quarter of 2005 and the fourth quarter of 2005. In the first quarter of 2006, asset-related gains included a pre-tax gain of $31 million related to the conversion of the Company's New York Stock Exchange seats into cash and shares of NYSE. Asset-related gains in the fourth quarter of 2005 included the sale of a building for a $10 million pre-tax gain and four New York Stock Exchange seats for a $6 million pre-tax gain.

During the first quarter of 2006, the higher than anticipated gain on the NYSE seats was partially offset by several items, affecting both revenues and expenses of the Company including: the impact of the loss of a major Pershing customer ($6 million) for which the Company is pursuing a termination fee; a final adjustment to the Company's reserve position with the Federal Reserve Bank ($6 million); and severance tied to relocation initiatives ($6 million).

7

Net Interest Income

(Dollars in millions)	1Q06	4Q05	1Q05	Percent Inc/(Dec) 1Q06 vs. 4Q05	Percent Inc/(Dec) 1Q06 vs. 1Q05
Net Interest Income	$ 488	$ 492	$ 455	(1)%	7%
Tax Equivalent Adjustment*	7	7	7		

Net Interest Income on a Tax Equivalent Basis	$ 495	$ 499	$ 462	(1)	7
Net Interest Rate Spread	1.73%	1.71%	1.94%		
Net Yield on Interest Earning Assets	2.35	2.35	2.36		

* A number of amounts related to net interest income are presented on a "tax equivalent basis" for better comparability. To calculate the tax equivalent revenues and profit or loss, the Company adjusts tax-exempt revenues and the income or loss from such tax-exempt revenues to show these items as if they were taxable, applying an assumed tax rate of 35 percent. The Company believes that this presentation provides comparability of net interest income arising from both taxable and tax-exempt sources and is consistent with industry standards.

Net interest income increased on a year-over-year quarterly basis reflecting higher earning assets and the higher value of interest-free balances in a rising rate environment. Average earning assets increased to $84.5 billion in the first quarter of 2006 from $79.5 billion in last year's first quarter. Net interest income decreased on a sequential-quarter basis reflecting a decline in interest earning assets, the loss of a major Pershing customer, the funding of Alcentra and Urdang acquisitions, and fewer days in the quarter. The first quarter of 2006 included a $6 million impact of a cumulative adjustment in the Company's reserve position with the Federal Reserve Bank, which concludes this matter, while the fourth quarter of 2005 reflected $8 million related to this item.

The net interest income rate spread was 1.73% in the first quarter of 2006, compared with 1.94% in the first quarter of 2005 and 1.71% in the fourth quarter of 2005. The net yield on interest earning assets was 2.35% in the first quarter of 2006, compared with 2.36% in the first quarter of 2005 and 2.35% in the fourth quarter of 2005.

8

Noninterest Expense and Income Taxes

				Percent Inc/(Dec)	
(Dollars in million)	1Q06	4Q05	1Q05	1Q06 vs. 4Q05	1Q06 vs. 1Q05
Salaries and Employee Benefits	$ 668	$ 647	$ 618	3%	8%
Net Occupancy	88	84	78	5	13
Furniture and Equipment	53	53	52	-	2
Clearing	50	50	46	-	9
Sub-custodian Expenses	34	24	23	42	48
Software	56	53	53	6	6
Communications	27	26	23	4	17
Amortization of Intangibles	13	12	8	8	63
Other	189	199	176	(5)	7
Total Noninterest Expense	$1,178	$1,148	$1,077	3	9

====== ====== ======

Noninterest expense increased compared with the first quarter of 2005 and the fourth quarter of 2005. The increase versus the year-ago quarter reflects increased staffing costs associated with new business and acquisitions, as well as higher pension expenses. Occupancy increased reflecting acquisitions and higher business continuity expenses.

Relative to the year-ago quarter, salaries rose 6% as tight headcount control and reengineering and relocation projects offset the impact of growth related to business wins, and acquisitions, as well as the impact of severance and additional legal and compliance personnel. Severance expense, which was largely related to relocation initiatives, was $6 million in the first quarter of 2006. Benefit expense increased due to higher pension and medical costs, as well as higher incentives tied to growth in revenues. Salaries and employee benefits expense for the first quarter increased on a sequential-quarter basis, reflecting higher seasonal social security expense, higher pension expenses reflecting the new 2006 assumptions, and increased expenses associated with acquisitions. During the quarter, headcount increased by 49 people reflecting additions related to Alcentra and Urdang.

Occupancy expenses were up on a year-over-year quarter basis reflecting the costs associated with the Company's new out-of-region data center in the mid-south region of the U.S. and the growth center in Manchester, England. On a sequential-quarter basis, occupancy expenses were up 5%, primarily reflecting acquisitions.

Clearing and sub-custodian expenses, which are tied to transaction volumes, were up $10 million, or 14%, sequentially on a combined basis to $84 million. Sub-custodian expenses increased on a year-over-year basis and on a sequential-quarter basis reflecting higher level of business activity.

The increase in software expense versus a year ago reflects spending and development to support business growth.

Other noninterest expense is attributable to vendor services, business development, legal expenses, settlements and claims, and other. Vendor services include professional fees, computer services, market data, courier, and other services. Business development includes advertising, charitable contributions, travel, and entertainment expenses. The breakdown among these four categories is shown below:

Other Noninterest Expense

(In millions)	1Q06	4Q05	1Q05
Vendor Services	$ 81	$ 88	$ 80
Business Development	32	37	26
Legal Fees, Settlements and Claims	23	23	20
Other	53	51	50
Total Other Noninterest Expense	$ 189	$ 199	$ 176

Other expenses were higher compared with the first quarter of 2005 reflecting higher costs for advertising and travel and entertainment in business development, as well as other expenses associated with business growth. On a sequential-quarter basis, the decline in vendor services was due to lower Depository Trust Company and consulting expenses. The sequential

decrease in business development primarily reflects seasonally lower travel and entertainment expenses.

The effective tax rate for the first quarter of 2006 was 33.7%, compared to 33.1% in the first quarter of 2005 and 33.3% in the fourth quarter of 2005. The increases primarily reflect lower expected Section 29 tax credits.

Credit Loss Provision and Net Charge-Offs

(In millions)	1Q06	4Q05	1Q05
Provision	$ 5	$ 10	$ (10)
Net Charge-offs:			
Commercial	$ 1	$ (139)	$ (3)
Foreign	2	(1)	-
Regional Commercial	1	(3)	(2)
Consumer	(8)	(8)	(5)
Total	$ (4)	$ (151)	$ (10)

The provision was $5 million in the first quarter of 2006, compared to a credit to the provision of $10 million in the first quarter of 2005 and a provision of $10 million in the fourth quarter of 2005. The sequential decline in the provision reflects a decline in charge-offs and a decline in nonperforming loans.

The total allowance for credit losses was $566 million at March 31, 2006, $716 million at March 31, 2005 and $565 million at December 31, 2005. The total allowance for credit losses as a percent of non-margin loans was 1.63% at March 31, 2006, compared with 2.19% at March 31, 2005 and 1.63% at December 31, 2005.

Net charge-offs were $4 million in the first quarter of 2006 versus $10 million in the first quarter of 2005 and $151 million in the fourth quarter of 2005. These represent 0.04% of total loans in the most recent quarter, compared with 0.10% in the quarter-ended March 31, 2005 and 1.48% in the quarter-ended December 31, 2005. During the fourth quarter of 2005, the Company charged-off $140 million of leases with two domestic bankrupt airline customers.

10

BUSINESS SEGMENT REVIEW

Segment Data

The Company has an internal information system that produces performance data for its four business segments along product and service lines.

Business Segments Accounting Principles

The Company's segment data has been determined on an internal management basis of accounting, rather than the generally accepted accounting principles used for consolidated financial reporting. These measurement principles are designed so that reported results of the segments will track their economic performance. Segment results are subject to restatement whenever improvements are made in the measurement principles or when organizational changes are made.

In 2005, the Company determined that it is appropriate to modify its segment presentation in order to provide more transparency into its results of operations and to better reflect modifications in the management structure that the Company implemented during the fourth quarter of 2005. As such, the Company identified four major business segments for assessing its overall performance, with the Institutional Services Segment being further subdivided into four business groupings. These segments are shown below:

* Institutional Services Segment
  - Investor & Broker-Dealer Services Business
  - Execution & Clearing Services Business
  - Issuer Services Business
  - Treasury Services Business
* Private Bank & BNY Asset Management Segment
* Retail & Middle Market Banking Segment
* Corporate and Other Segment

All prior periods have been restated to reflect this realignment. Other specific accounting principles employed include:

* The measure of revenues and profit or loss by a segment has been adjusted to present segment data on a tax equivalent basis.
* The provision for credit losses allocated to each segment is based on management's judgment as to average credit losses that will be incurred in the operations of the segment over a credit cycle of a period of years. Management's judgment includes the following factors among others: historical charge-off experience and the volume, composition, and size of the credit portfolio. This method is different from that required under generally accepted accounting principles as it anticipates future losses which are not yet probable and therefore not recognizable under generally accepted accounting principles.
* Balance sheet assets and liabilities and their related income or expense are specifically assigned to each segment.
* Net interest income is allocated to segments based on the yields on the assets and liabilities generated by each segment. Assets and liabilities generated by credit-related activities are allocated to businesses based on borrower usage of those businesses' products or services. Credit-only relationships and borrowers using both credit and payment services remain in Treasury Services. Segments with a net liability position are allocated assets primarily from the securities portfolio.
* Revenues and expenses associated with specific client bases are included in those segments. For example, foreign exchange activity associated with clients using custody products is allocated to Investor & Broker-Dealer services business (which includes the Company's custody operations.)
* Noninterest income associated with Treasury-related services (global payment services for corporate customers, as well as lending and credit-

related services) is similarly allocated back to the other Institutional Services businesses.
* Support and other indirect expenses are allocated to segments based on internally-developed methodologies.

DESCRIPTION OF BUSINESS SEGMENTS

The activities within each business segment are described below.

Institutional Services Segment

Investor & Broker-Dealer Services Business

Investor & Broker-Dealer Services includes global custody, global fund services, securities lending, global liquidity services, outsourcing, government securities clearance, collateral management, credit-related services, and other linked revenues, principally foreign exchange and execution and clearing revenues.

In Investor Services, the Company is one of the leading custodians with $11.3 trillion of assets under custody at March 31, 2006. The Company is one of the largest mutual fund custodians for U.S. funds and one of the largest providers of fund services in the world with over $1.7 trillion in total assets. The Company also services more than 15% of the total industry assets for exchange-traded funds, and is a leading U.K. custodian. In securities lending, the Company is the largest lender of U.S. Treasury securities and depositary receipts with a lending pool of approximately $1.5 trillion in 27 markets around the world.

The Company's Broker-Dealer Services business clears approximately 50% of transactions in U.S. Government securities. The Company is a leader in global clearance, clearing equity and fixed income transactions in 101 markets. With over $1.2 trillion in tri-party balances worldwide, the Company is the world's largest collateral management agent.

Execution & Clearing Services Business

The Company provides execution, clearing and financial services outsourcing solutions in over 80 global markets, executing trades for 675 million shares and clearing one million trades daily. In Execution Services, the Company provides broker-assisted and electronic trading services, transition management, and independent research services. The Company's Execution Services business is one of the largest global institutional agency brokerage organizations. In addition, it is one of the leading institutional electronic brokers for non-U.S. dollar equity execution.

The Company's Pershing subsidiary provides clearing, execution, financing, and custody for introducing broker-dealers and registered investment advisors. Pershing services more than 1,100 retail and institutional financial organizations and independent investment advisors who collectively represent nearly six million individual investors.

Issuer Services Business

Issuer Services includes corporate trust, depositary receipts, employee investment plan services, stock transfer, and credit-related services.

In Issuer Services, the Company is depositary for more than 1,230 American and global depositary receipt programs, with a 64% market share, servicing leading companies from 60 countries. As a trustee, the Company provides diverse services for corporate, municipal, structured, and international debt securities. Over 90,000 appointments for more than 30,000 worldwide clients have resulted in the Company being trustee for more than $3 trillion in outstanding debt securities. The Company is the third largest stock transfer agent in the United States, servicing more than 16 million shareowners. Employee Investment Plan Services has more than 124 clients with 650,000 employees in over 54 countries.

Treasury Services Business

Treasury Services includes global payment services for corporate customers as well as lending and credit-related services.

Corporate global payment services offers leading-edge technology, innovative products, and industry expertise to help its clients optimize cash flow, manage liquidity, and make payments around the world in more than 90 different countries. The Company maintains a global network of branches, representative offices and correspondent banks to provide comprehensive payment services including funds transfer, cash management, trade services and liquidity management. The Company is one of the largest funds transfer banks in the U.S. transferring over $1.18 trillion daily via more than 150,000 wire transfers.

The Company provides lending and credit-related services to large public and private corporations nationwide. Special industry groups focus on industry segments such as media, telecommunications, cable, energy, real estate, retailing, and healthcare. Credit-related revenues are allocated to businesses other than Treasury Services to the extent the borrower uses that businesses' products or services. Credit-only relationships and borrowers using both credit and payment services remain in Treasury Services. Through BNY Capital Markets, Inc., the Company provides a broad range of capital markets and investment banking services including syndicated loans, bond underwriting, private placements of corporate debt and equity securities, and merger, acquisition, and advisory services. The Company is an active arranger or agent of syndicated financings for clients in the U.S., having completed during the first quarter of 2006 21 transactions totaling in excess of $11.5 billion.

For its credit services business overall, the Company's corporate lending strategy is to focus on those clients and industries that are major users of securities servicing and global payment services.

Private Bank & BNY Asset Management Segment

The Private Bank & BNY Asset Management Segment includes traditional banking and trust services for wealthy clients and investment management services for institutional and high-net-worth clients. In private banking, the Company offers a full array of wealth management services to help individuals plan, invest, and arrange intergenerational wealth transition, which includes financial and estate planning, trust and fiduciary services, customized banking services, brokerage and investment solutions.

BNY Asset Management provides investment solutions for some of the wealthiest individuals, largest corporations and most prestigious organizations around the world applying a broad spectrum of investment strategies and wealth management solutions. BNY Asset Management's alternative strategies have expanded to include funds of hedge funds, private equity, alternative fixed income, and real estate.

The Company's asset management subsidiaries include:

* Ivy Asset Management Corporation, one of the country's leading fund of hedge funds firms, offers a comprehensive range of multi-manager hedge fund products and customized portfolio solutions.

* Alcentra offers sophisticated alternative credit investments, including leveraged loans and subordinated and distressed debt.

* Urdang, a real estate investment firm, offers the opportunity to invest in real estate through separate accounts, a closed-end commingled fund that invests directly in properties, and a separate account that invests in publicly-traded REITs.

* Estabrook Capital Management LLC offers value-oriented investment management strategies, including socially responsible investing.

* Gannett Welsh & Kotler specializes in tax-exempt securities management and equity portfolio strategies.

The Company also provides investment management services directly to institutions and manages the "Hamilton" family of mutual funds.

Retail & Middle Market Banking Segment

The Retail Bank includes branch banking, consumer, small business, residential mortgage and asset management activities conducted through the Company's investment centers. The Company's retail franchise includes more than 600,000 consumer relationships and 100,000 business relationships. As of March 31, 2006, the Company operates 342 branches in 23 counties in the New York tri-state region. The Company has 241 branches in New York, 93 in New Jersey and 8 in Connecticut. The New York branches are primarily suburban-based with 118 in upstate New York, 85 on Long Island and 38 in New York City. The retail network is a significant source of low-cost funding and provides a platform to cross-sell core services to both individuals and small businesses in the New York metropolitan area. The branches have been a source of private client referrals. Small business and investment centers are set up in the largest 100 branches.

Investment centers provide personalized professional investment counseling to individuals. Products include mutual funds, annuities, and discount brokerage services.

In middle market lending, the Company's regional commercial banking and regional commercial real estate divisions provide financing for a variety of businesses based in the New York metropolitan area. The types of financing include lines of credit, term loans, global trade services, and commercial mortgages.

The Company has entered into a definitive agreement to sell to JPMorgan Chase substantially all of the assets of the Company's retail and regional middle market banking businesses. At closing, the Company will retain four branch offices as part of a network of offices in the tri-state area for private banking clients. For further details, see "Other Developments."

The Company will report the businesses in this segment as discontinued operations in the second quarter of 2006. Effective upon the close of the transaction, the Company will cease to report this segment.

Corporate and Other Segment

The Corporate and Other Segment primarily includes the Company's leasing operations and corporate overhead. Net interest income in this segment primarily reflects the funding cost of goodwill and intangibles. The tax equivalent adjustment on net interest income is eliminated in this segment. Provision for credit losses reflects the difference between the aggregate of

the credit provision over a credit cycle for the other three reportable segments and the Company's recorded provision. The Company's approach to acquisitions is highly centralized and controlled by senior management. Accordingly, the resulting goodwill and other intangible assets are included in this segment's assets. Noninterest expense includes the related amortization. Noninterest income primarily reflects leasing, securities gains, and income from the sale of other corporate assets. Noninterest expenses include direct expenses supporting the leasing activities as well as certain corporate overhead not directly attributable to the operations of the other segments.

Segment Analysis

Institutional Services Segment

(In millions)	1Q06	4Q05	1Q05	Inc/(Dec) 1Q06 vs. 4Q05	Inc/(Dec) 1Q06 vs. 1Q05
Net Interest Income	$ 315	$ 314	$ 280	$ 1	$ 35
Noninterest Income	1,123	1,079	1,001	44	122
Total Revenue	1,438	1,393	1,281	45	157
Provision for Credit Losses	16	14	16	2	-
Noninterest Expense	906	881	833	25	73
Income Before Taxes	516	498	432	18	84
Average Assets	79,032	78,333	73,832	699	5,200
Average Deposits	48,840	48,284	42,574	556	6,266

The Company's Institutional Services business is conducted in four business groupings: Investor & Broker-Dealer Services, Execution & Clearing Services, Issuer Services, and Treasury Services. Income before taxes was up 19% to $516 million for the first quarter of 2006 from $432 million in the first quarter of 2005, and up 4% from $498 million in the fourth quarter of 2005.

Equity volumes and pricing levels were up during the most recent quarter, and cross-border activity levels were strong. As a result, the Company's equity-linked businesses performed well. Execution and clearing and depositary receipts businesses both showed good year-over-year growth. The fixed income markets were stable, and as a result the Company's securities lending, broker-dealer services and institutional trust businesses all improved on a year-over-year basis. Other areas demonstrating strong growth include foreign exchange and alternative investment servicing.

Market Data

	1Q06	4Q05	1Q05	Percent Inc/(Dec) 1Q06 vs. 4Q05	Percent Inc/(Dec) 1Q06 vs. 1Q05
S&P 500 (registered trademark) Index	1,295	1,248	1,181	4%	10%
NASDAQ (registered trademark) Index	2,340	2,205	1,999	6	17

Lehman Brothers Aggregate Bond (registered service mark) Index	205.9	206.2	214.0	-	(4)
MSCI (registered trademark) EAFE	1,827.7	1,680.1	1,503.9	9	22
NYSE Volume (In billions)	108.4	105.9	99.4	2	9
NASDAQ (registered trademark) Volume (In billions)	129.4	110.6	121.2	17	7

The S&P 500 (registered teredemark) Index was up 4% sequentially for the quarter, with average daily price levels up 4% from the fourth quarter of 2005. Performance for the NASDAQ (registered trademark) Index was up 6% sequentially for the first quarter of 2006, with average daily prices up by 5%. Globally, the MSCI (registered trademark) EAFE index was up 9%. On a sequential-quarter basis, combined NYSE and NASDAQ (registered trademark) non-program trading volumes were up an estimated 13%. Average fixed-income trading volume was up 5% sequentially.

As of March 31, 2006, assets under custody rose to $11.3 trillion, from $9.9 trillion at March 31, 2005 and $10.9 trillion at December 31, 2005. The increase in assets under custody relative to both time periods primarily reflects rising equity prices and new business wins. Equity securities comprised 33% of the assets under custody at March 31, 2006 compared with 32% at December 31, 2005, while fixed income securities were 67% compared with 68% at December 31, 2005. Assets under custody in the first quarter consisted of assets related to the custody and mutual funds businesses of $7.6 trillion, broker-dealer services assets of $2.3 trillion, and all other assets of $1.4 trillion.

15

The results for the businesses in the Institutional Services Segment are discussed below.

Investor & Broker-Dealer Services Business

(In millions)	1Q06	4Q05	1Q05	Inc/(Dec) 1Q06 vs. 4Q05	Inc/(Dec) 1Q06 vs. 1Q05
Net Interest Income	$ 149	$ 148	$ 139	$ 1	$ 10
Noninterest Income	491	469	441	22	50
Total Revenue	640	617	580	23	60
Provision for Credit Losses	3	2	2	1	1
Noninterest Expense	438	425	393	13	45
Income Before Taxes	199	190	185	9	14
Average Assets	38,163	38,138	36,376	25	1,787
Average Deposits	31,357	30,799	27,498	558	3,859
Nonperforming Assets	6	5	25	1	(19)
Net Charge-offs	1	-	-	1	1

In the first quarter of 2006, income before taxes in the Investor & Broker-Dealer Services business increased to $199 million from $185 million in the first quarter of 2005 and $190 million in the fourth quarter of 2005. The year-over-year increase reflects improvements in net interest income and noninterest income. The sequential quarter increase reflects higher noninterest income.

Noninterest income was $491 million in the first quarter of 2006, compared with $441 million in the first quarter of 2005 and $469 million in the fourth quarter of 2005. The increase in noninterest income in the first quarter of 2006 relative to both time periods is attributable to an increase in both investor and broker-dealer service fees as well as foreign exchange and other trading revenue generated by clients in this segment.

Investor services fees increased compared with a year ago and the fourth quarter of 2005. The year-over-year and sequential increases reflect strong performance in securities lending and alternative asset servicing as well as higher custody fees. Securities lending fees showed good growth in the first quarter benefiting from higher loan volumes, driven by new business wins as well as a favorable spread environment. Offsetting this strong performance were revenue losses due to mutual fund clients that transferred to another provider during late 2005.

Broker-dealer services fees increased compared with a year ago and the fourth quarter of 2005. The increases reflect greater domestic and global collateral management fees due to strong growth in cross-border activity between the U.S. and Europe and higher values in global markets. The Company now handles approximately $1.2 trillion of financing for the Company's broker-dealer clients daily through tri-party collateralized financing agreements, up approximately 20% from a year ago.

Net interest income in the Investor & Broker-Dealer Services business was $149 million in the first quarter of 2006, compared with $139 million in the first quarter of 2005 and $148 million in the fourth quarter of 2005. On a year-over-year basis, net interest income growth in the first quarter reflects increased deposit flows from customers in both businesses and higher rates. Average deposits generated by the Investor & Broker-Dealer Services business were $31.4 billion in the first quarter of 2006, compared with $27.5 billion in the first quarter of 2005 and $30.8 billion in the fourth quarter of 2005. Average assets in the business were $38.2 billion in the first quarter of 2006, compared with $36.4 billion in the first quarter of 2005 and $38.1 billion in the fourth quarter of 2005.

Noninterest expense was $438 million in the first quarter of 2006, compared with $393 million in the first quarter of 2005 and $425 million in the fourth quarter of 2005. The year-over-year increase in noninterest expense was due to higher costs tied to increased activity levels, as well as the upfront

expenses associated with the implementation of cost reduction initiatives and higher pension and occupancy expense. The sequential rise in noninterest expense in the first quarter was attributable primarily to higher salaries, benefits and sub-custody expenses, seasonal increases in social security expenses, increased technology costs, and higher pension expenses.

Net charge-offs were $1 million in the first quarter of 2006, compared with zero in the first quarter of 2005 and in the fourth quarter of 2005. Nonperforming assets were $6 million at March 31, 2006, compared with $25 million at March 31, 2005, and $5 million at December 31, 2005.

Execution & Clearing Services Business

(In millions)	1Q06	4Q05	1Q05	Inc/(Dec) 1Q06 vs. 4Q05	Inc/(Dec) 1Q06 vs. 1Q05
Net Interest Income	$ 61	$ 59	$ 45	$ 2	$ 16
Noninterest Income	390	351	317	39	73
Total Revenue	451	410	362	41	89
Provision for Credit Losses	-	1	-	(1)	-
Noninterest Expense	297	293	280	4	17
Income Before Taxes	154	116	82	38	72
Average Assets	14,980	14,547	14,211	433	769
Average Payables to Customers and Broker-Dealers	5,231	5,979	6,385	(748)	(1,154)
Nonperforming Assets	-	-	2	-	(2)
Net Charge-offs	(2)	1	-	(3)	(2)

In the first quarter of 2006, income before taxes in the Execution & Clearing Services Business increased to $154 million from $82 million a year ago and $116 million in the fourth quarter of 2005. The increase over the first quarter of 2005 reflects a $31 million gain on the New York Stock Exchange seats, incremental revenues and earnings contribution from Lynch, Jones & Ryan, Inc. ("LJR"), an execution-services business that the Company acquired in July 2005, strong growth in net interest income, and higher fees at Pershing for value-added services. The sequential quarter increase reflects the same factors as the year-over-year increase except for LJR and net interest income growth was not as strong.

Noninterest income was $390 million in the first quarter of 2006, compared with $317 million in the first quarter of 2005 and $351 million in the fourth quarter of 2005.

Execution services fees were up reflecting the LJR acquisition, strong market conditions, and higher cross-border trading volumes.

Pershing's first quarter 2006 servicing fees were also up, reflecting organic growth from value-added services such as providing access to research, market data and mutual fund investments, as well as strong market conditions, partially offset by the loss of a significant customer. The loss of this customer resulted in a decrease of over $6 million in Pershing's revenues, mainly interest, commissions and trading revenues. Excluding the impact of the loss of this client, Pershing's commissions were up 12% sequentially. The Company expects the impact of the customer loss to be greater in the second quarter. Pershing currently is in discussions seeking compensation for the termination of the relationship.

Net interest income in the Execution & Clearing Services business was $61 million in the first quarter of 2006, compared with $45 million in the first quarter of 2005 and $59 million in the fourth quarter of 2005. Net interest income growth in the first quarter of 2006 versus the first quarter of 2005 reflects the benefit of rising interest rates on spreads at Pershing, partially offset by the loss of the customer discussed above. The increase over the fourth quarter of 2005 also reflects the benefit of rising rates. Average assets in the business were $15.0 billion in the first quarter of 2006, compared with $14.2 billion in the first quarter of 2005 and $14.5 billion in the fourth quarter of 2005. Average payables to customers and broker-dealers

were $5.2 billion in the first quarter of 2006, compared with $6.4 billion in

the first quarter of 2005 and $6.0 billion in the fourth quarter of 2005. The decrease in first quarter balances reflects the previously mentioned loss of a significant customer.

Noninterest expense was $297 million in the first quarter of 2006, compared with $280 million in the first quarter of 2005 and $293 million in the fourth quarter of 2005. The increase in noninterest expense on a year-over-year basis was due to stronger business activity, higher technology expenses and the additional expenses of LJR. The rise in noninterest expense sequentially was attributable to higher salaries, benefits and technology costs tied to higher overall business activity.

Net charge-offs were a recovery of $2 million in the first quarter of 2006, zero in the first quarter of 2005 and $1 million in the fourth quarter of 2005, respectively. Nonperforming assets were zero at March 31, 2006, compared with $2 million at March 31, 2005 and zero at December 31, 2005.

Issuer Services Business

				Inc/(Dec)	
(In millions)	1Q06	4Q05	1Q05	1Q06 vs. 4Q05	1Q06 vs. 1Q05
Net Interest Income	$ 67	$ 66	$ 53	$ 1	$ 14
Noninterest Income	179	199	167	(20)	12
Total Revenue	246	265	220	(19)	26
Provision for Credit Losses	4	2	3	2	1
Noninterest Expense	122	117	112	5	10
Income Before Taxes	120	146	105	(26)	15
Average Assets	14,588	14,394	13,302	194	1,286
Average Deposits	8,303	7,917	7,506	386	797
Nonperforming Assets	6	5	27	1	(21)
Net Charge-offs	1	-	-	1	1

In the first quarter of 2006, income before taxes in the Issuer Services Business increased to $120 million from $105 million in the first quarter of 2005 and decreased from $146 million in the fourth quarter of 2005. The year-over-year increase in the first quarter reflects growth in net interest income and higher corporate trust and depositary receipt fees. The sequential quarter decline reflects seasonally lower depositary receipt fees as well as an increase in sub-custodian expense.

Noninterest income was $179 million in the first quarter of 2006, compared with $167 million in the first quarter of 2005 and $199 million in the fourth quarter of 2005. Year-over-year, the double-digit growth in issuer services fees reflects strong performance in structured and global trust products as well as higher transactional activity in depositary receipts. The sequential decrease is primarily due to seasonally lower dividend-related activity in depositary receipts as well as the strong fourth quarter performance by Corporate Trust in structured products.

Net interest income in the Issuer Services business was $67 million in the first quarter of 2006, compared with $53 million in the first quarter of 2005 and $66 million in the fourth quarter of 2005. The increase in net interest income year-over-year was driven primarily by the increase in interest rates and higher average assets. Average deposits generated by the Issuer Services business were $8.3 billion in the first quarter of 2006, compared with $7.5

billion in the first quarter of 2005 and $7.9 billion in the fourth quarter of 2005 reflecting increased liquidity from the Company's issuer services customers. Average assets in the business were $14.6 billion in the first quarter of 2006, compared with $13.3 billion in the first quarter of 2005 and $14.4 billion in the fourth quarter of 2005.

Noninterest expense was $122 million in the first quarter of 2006, compared with $112 million in the first quarter of 2005 and $117 million in the fourth quarter of 2005. The rise in noninterest expense year-over-year and

18

sequentially was attributable to increased client activity as well as higher sub-custodian and pension expenses.

Net charge-offs were $1 million in the first quarter of 2006, compared with zero in the first quarter of 2005 and in the fourth quarter of 2005. Nonperforming assets were $6 million at March 31, 2006, compared with $27 million at March 31, 2005 and $5 million at December 31, 2005.

Treasury Services Business

				Inc/(Dec)	
(In millions)	1Q06	4Q05	1Q05	1Q06 vs. 4Q05	1Q06 vs. 1Q05
Net Interest Income	$ 38	$ 41	$ 43	$ (3)	$ (5)
Noninterest Income	63	60	76	3	(13)
Total Revenue	101	101	119	-	(18)
Provision for Credit Losses	9	9	11	-	(2)
Noninterest Expense	49	46	48	3	1
Income Before Taxes	43	46	60	(3)	(17)
Average Assets	11,301	11,254	9,943	47	1,358
Average Deposits	9,002	9,095	7,411	(93)	1,591
Nonperforming Assets	21	16	83	5	(62)
Net Charge-offs	1	2	-	(1)	1

In the first quarter of 2006, income before taxes in the Treasury Services Business was $43 million, compared with $60 million in the first quarter of 2005 and $46 million in the fourth quarter of 2005. The lower income versus a year ago reflects both the Company's overall strategy to reduce corporate credit risk, as well as higher asset-related gains in the year-ago quarter.

The decrease in noninterest income to $63 million in the current period from $76 million in the first quarter of 2005 was due to a decline in asset-related gains, lower underwriting fees from clients in this segment and lower global payments fees as more clients used compensating balances to pay for services. The sequential quarter increase in noninterest income reflects higher foreign exchange related income partially offset by lower syndication fees.

Net interest income was $38 million in the first quarter of 2006, compared with $43 million in the first quarter of 2005 and $41 million in the fourth quarter of 2005. On a year-over-year basis, the decrease reflects lower credit spreads due to the higher asset quality of the portfolio. Average assets for the first quarter of 2006 were $11.3 billion, compared with $9.9 billion in the first quarter of 2005 and $11.3 billion in the fourth quarter of 2005. Average deposits were $9.0 billion in the first quarter of 2006, compared with $7.4 billion in the first quarter of 2005 and $9.1 billion in the fourth quarter of 2005.

The provision for credit losses, which is assessed on a long-term credit cycle basis (see "Business Segments Accounting Principles"), was $9 million in the first quarter of 2006, compared with $11 million in the first quarter of 2005 and $9 million in the fourth quarter of 2005. The year-over-year decrease reflects improved credit quality.

Net charge-offs in the Treasury Services business were $1 million, zero, and $2 million in the first quarter of 2006, the first quarter of 2005, and the fourth quarter of 2005, respectively. Nonperforming assets were $21 million at March 31, 2006, compared with $83 million at March 31, 2005 and $16 million at December 31, 2005.

Noninterest expense in the first quarter of 2006 was $49 million, compared to $48 million in the first quarter of 2005 and $46 million in the fourth quarter of 2005. The increase in noninterest expense year-over-year was due in part to higher compensation and pension expenses.

19

Private Bank & BNY Asset Management Segment

				Inc/(Dec)	
(In millions)	1Q06	4Q05	1Q05	1Q06 vs. 4Q05	1Q06 vs. 1Q05
Net Interest Income	$ 17	$ 17	$ 17	$ -	$ -
Noninterest Income	127	117	111	10	16
Total Revenue	144	134	128	10	16
Provision for Credit Losses	-	-	1	-	(1)
Noninterest Expense	87	83	78	4	9
Income Before Taxes	57	51	49	6	8
Average Assets	2,543	2,459	2,106	84	437
Average Deposits	1,745	1,517	1,752	228	(7)
Nonperforming Assets	1	1	1	-	-
Net Charge-offs	-	-	-	-	-

In the first quarter of 2006, income before taxes in the Private Bank & BNY Asset Management Segment was $57 million, compared with $49 million in the first quarter of 2005 and $51 million in the fourth quarter of 2005. The improvement over the prior periods is attributable to the acquisitions of Alcentra and Urdang as well as higher fee levels in Private Banking.

Noninterest income was $127 million in the first quarter of 2006, compared with $111 million in the first quarter of 2005 and $117 million in the fourth quarter of 2005. Private Bank & BNY Asset Management revenues in the first quarter of 2006 were up sequentially and year-over-year. The growth reflects the acquisitions of Alcentra and Urdang as well as mid-single digit year-over-year organic growth. The S&P 500 (registered trademark) Index was up 4% for the quarter, with average daily price levels up 4% from December 31, 2005. Performance for the NASDAQ (registered trademark) Index was up 6% for the quarter, with average daily prices up by 5%. Sequential quarter performance reflects the same factors that drove year-over-year performance.

Assets Under Management - Asset Management Sector

(In billions)- Estimated	1Q06	4Q05	1Q05

Equity Securities	$ 37	$ 37	$ 37
Fixed Income Securities	21	21	21
Alternative Investments	26	15	16
Liquid Assets	29	32	31
Total Assets Under Management	$113	$105	$105

Assets under management ("AUM") were $113 billion at March 31, 2006, compared with $105 billion at March 31, 2005 and December 31, 2005. The year-over-year and sequential quarter increases in AUM primarily reflect the acquisitions of Alcentra and Urdang. Institutional clients represent 72% of AUM while individual clients equal 28%. At March 31, 2006, such assets were invested 33% in equities, 18% in fixed income, and 23% in alternative investments, with the remaining amount invested in liquid assets.

Net interest income in the Private Bank & BNY Asset Management Segment was $17 million in the first quarter of 2006, flat in comparison to the first quarter of 2005 and the fourth quarter of 2005. Average deposits generated by the Private Bank & BNY Asset Management Segment were $1.7 billion in first quarter of 2006, compared with $1.8 billion in the first quarter of 2005 and $1.5 billion in the fourth quarter of 2005. Average assets in the segment were $2.5 billion in the first quarter of 2006, compared with $2.1 billion in the first quarter of 2005 and $2.5 billion in the fourth quarter of 2005.

Noninterest expense was $87 million in the first quarter of 2006, compared with $78 million in the first quarter of 2005 and $83 million in the fourth quarter of 2005. Relative to a year ago, the increase reflects the acquisitions of Alcentra and Urdang as well as higher compensation, technology,

20

and legal staffing costs. The increase in noninterest expense on a sequential basis was primarily attributable to the acquisitions of Alcentra and Urdang.

Net charge-offs were zero in the first quarter of 2006, the first quarter of 2005, and the fourth quarter of 2005, respectively. Nonperforming assets were $1 million at March 31, 2006, March 31, 2005 and December 31, 2005.

Income Before Taxes	91	98	85	(7)	6
Average Assets	14,466	14,377	13,630	89	836
Average Noninterest-Bearing Deposits	5,256	5,329	5,808	(73)	(552)
Average Deposits	15,055	15,069	16,253	(14)	(1,198)
Nonperforming Assets	28	34	48	(6)	(20)
Net Charge-offs	7	8	10	(1)	(3)
Number of Branches	342	342	341	-	1

Number of ATMs	411	401	375	10	36

In the first quarter of 2006, income before taxes was $91 million, compared with $85 million in the first quarter of 2005 and $98 million in the fourth quarter of 2005.

Net interest income in the Retail & Middle Market Banking Segment was $163 million in the first quarter of 2006, compared with $159 million in the first quarter of 2005 and $166 million in the fourth quarter of 2005. Net interest income growth on a year-over-year basis reflects the benefit of widening interest-rate spreads, growth in loans, and small business customers' increasing use of compensating balances to pay for services. The sequential decline in net interest income reflects a narrowing of the spread on loans and lower demand deposits.

Average deposits generated by the Retail & Middle Market Banking Segment were $15.1 billion in the first quarter of 2006, compared with $16.3 billion in the first quarter of 2005 and $15.1 billion in the fourth quarter of 2005. Average noninterest-bearing deposits were $5.3 billion in the first quarter of 2006, compared with $5.8 billion in the first quarter of 2005 and $5.3 billion in the fourth quarter of 2005. Average assets in the Retail & Middle Market Banking Segment were $14.5 billion in the first quarter of 2006, compared with $13.6 billion in the first quarter of 2005 and $14.4 billion in the fourth quarter of 2005.

Noninterest income was $69 million in the first quarter of 2006, compared with $58 million in the first quarter of 2005 and $69 million in the fourth quarter of 2005. The growth on a year-over-year basis reflects higher asset-related gains.

Noninterest expense was $135 million in the first quarter of 2006, compared with $125 million in the first quarter of 2005 and $130 million in the fourth quarter of 2005. The rise in noninterest expense year-over-year and sequentially was primarily attributable to higher salary, pension, marketing, and occupancy expenses.

Net charge-offs were $7 million in the first quarter of 2006, compared with $10 million in the first quarter of 2005 and $8 million in the fourth quarter of 2005. Nonperforming assets were $28 million at March 31, 2006, compared with $48 million at March 31, 2005 and $34 million at December 31, 2005.

21

Corporate and Other Segment

				Inc/(Dec)	
(In millions)	1Q06	4Q05	1Q05	1Q06 vs. 4Q05	1Q06 vs. 1Q05
Net Interest Income	$ (7)	$ (5)	$ (1)	$ (2)	$ (6)
Noninterest Income	13	8	8	5	5
Total Revenue	6	3	7	3	(1)
Provision for Credit Losses	(17)	(11)	(34)	(6)	17
Noninterest Expense	50	54	41	(4)	9
Income Before Taxes	(27)	(40)	-	13	(27)
Average Assets	10,092	9,898	9,674	194	418
Nonperforming Assets	4	18	6	(14)	(2)

Net Charge-offs	(4)	140	-	(144)	(4)

In the first quarter of 2006, income before taxes in the Corporate and Other Segment was a loss of $27 million, compared with zero in the first quarter of 2005 and a loss of $40 million in the fourth quarter of 2005.

Net interest income in the Corporate and Other Segment was a loss of $7 million in the first quarter of 2006, compared with a loss of $1 million in the first quarter of 2005 and a loss of $5 million in the fourth quarter of 2005. The decrease in net interest income over the first quarter of 2005 reflects the impact of a $6 million cumulative adjustment in the Company's reserve position with the Federal Reserve Bank.

Noninterest income was $13 million in the first quarter of 2006, compared with $8 million in the first quarter of 2005 and $8 million in the fourth quarter of 2005. The increase in noninterest income in the first quarter of 2006 over the first quarter of 2005 is attributable to higher securities gains. Securities gains were $17 million in the first quarter of 2006, compared with $12 million in the first quarter of 2005 and $18 million in the fourth quarter of 2005. The increase in noninterest income of $5 million on a sequential quarter basis reflects higher other investment income.

Provision for credit losses was a credit of $17 million in the first quarter of 2006, compared with a $34 million credit in the first quarter of 2005 and a $11 million credit in the fourth quarter of 2005. The provision for credit losses reflects the difference between the aggregate of the credit provision over a credit cycle assigned to the other segments and the Company's recorded provision. As such, the favorable credit environment has currently resulted in the business segments absorbing more than the Company's aggregate reported credit provision.

Noninterest expense, largely reflecting unallocated corporate overhead, amortization of goodwill, and nonrecurring items, was $50 million in the first quarter of 2006, compared with $41 million in the first quarter of 2005 and $54 million in the fourth quarter of 2005. The year-over-year growth includes higher intangible amortization. The decrease in noninterest expense on a sequential basis was due to lower corporate overhead.

Net charge-offs were a recovery of $4 million in the first quarter of 2006, compared with zero in the first quarter of 2005 and $140 million in the fourth quarter of 2005. The charge-offs in the fourth quarter of 2005 were attributable to the Company's airline leasing portfolio. Nonperforming assets were $4 million at March 31, 2006, compared with $6 million at March 31, 2005, and $18 million at December 31, 2005.

22

Significant other items related to the Corporate and Other Segment are presented in the following table.

(In millions)	1Q06	4Q05	1Q05
Items impacting net interest income:			
Cost to Carry Goodwill and Intangibles	$ (49)	$ (49)	$ (50)
Tax Equivalent Basis	(7)	(7)	(7)
Items impacting noninterest expense:			

Goodwill and Intangibles Amortization	$ 13	$ 12	$ 8

Other items - Acquisitions are the responsibility of corporate management. Accordingly, goodwill and the funding cost of goodwill are assigned to the Corporate and Other Segment. If the funding cost of goodwill were allocated to the other three segments, it would be assigned on the basis of the goodwill attributable to each segment.

The tax equivalent adjustment is eliminated in the Corporate and Other Segment. Certain revenue and expense items have been driven by corporate decisions and have been included in the Corporate and Other Segment. In the first quarter of 2006 and fourth quarter of 2005, these included the impact of the $6 million and $8 million cumulative adjustment in the Company's reserve position with the Federal Reserve Bank. Alternatively, this item could be allocated to the Institutional Services Segment.

The consolidating schedule below shows the contribution of the Company's businesses to its overall profitability.

(Dollars in millions) For the Quarter Ended March 31, 2006	Investor & Broker-Dealer Services	Execution & Clearing Services	Issuer Services	Treasury Services	Sub-total Institutional Services	Private Bank & BNY Asset Management	Reta & Midd Mark
Net Interest Income	$ 149	$ 61	$ 67	$ 38	$ 315	$ 17	$
Noninterest Income	491	390	179	63	1,123	127	
Total Revenue	640	451	246	101	1,438	144

24

CRITICAL ACCOUNTING POLICIES

The Company's significant accounting policies are described in the "Notes to Consolidated Financial Statements" under "Summary of Significant Accounting and Reporting Policies" in the Company's 2005 Annual Report on Form 10-K. Four of the Company's more critical accounting policies are those related to the allowance for credit losses, the valuation of derivatives and securities where quoted market prices are not available, goodwill and other intangibles, and pension accounting.

Allowance for Credit Losses

The allowance for credit losses and allowance for lending-related commitments consist of four elements: (1) an allowance for impaired credits; (2) an allowance for higher risk rated loans and exposures; (3) an allowance for pass rated loans and exposures; and (4) an unallocated allowance based on general economic conditions and certain risk factors in the Company's individual portfolio and markets. Further discussion on the four elements can be found under "Consolidated Balance Sheet Review" in the MD&A section.

The allowance for credit losses represents management's estimate of probable losses inherent in the Company's loan portfolio. This evaluation process is subject to numerous estimates and judgments. Probability of default ratings are assigned after analyzing the credit quality of each borrower/counterparty and the Company's internal rating are generally consistent with external ratings agency's default databases. Loss given default ratings are driven by the collateral, structure, and seniority of each individual asset and are consistent with external loss given default/recovery databases. The portion of the allowance related to impaired credits is based on the present value of future cash flows. Changes in the estimates of probability of default, risk ratings, loss given default/recovery rates, and

cash flows could have a direct impact on the allocated allowance for loan losses.

To the extent actual results differ from forecasts or management's judgment, the allowance for credit losses may be greater or less than future charge-offs.

The Company considers it difficult to quantify the impact of changes in forecast on its allowance for credit losses. Nevertheless, the Company believes the following discussion may enable investors to better understand the variables that drive the allowance for credit losses.

A key variable in determining the allowance is management's judgment in determining the size of the unallocated allowance. At March 31, 2006, the unallocated allowance was 18% of the total allowance. If the unallocated allowance were five percent higher or lower, the allowance would have increased or decreased by $28 million, respectively.

The credit rating assigned to each credit is another significant variable in determining the allowance. If each credit were rated one grade better, the allowance would have decreased by $91 million, while if each credit were rated one grade worse, the allowance would have increased by $147 million.

Similarly, if the loss given default were one rating worse, the allowance would have increased by $61 million, while if the loss given default were one rating better, the allowance would have decreased by $51 million.

For impaired credits, if the fair value of the loans were 10% higher or lower, the allowance would have decreased or increased by $3 million, respectively.

25

Valuation of Derivatives and Securities Where Quoted Market Prices Are Not Available

When quoted market prices are not available for derivatives and securities values, such values are determined at fair value, which is defined as the value at which positions could be closed out or sold in a transaction with a willing counterparty over a period of time consistent with the Company's trading or investment strategy. Fair value for these instruments is determined based on discounted cash flow analysis, comparison to similar instruments, and the use of financial models. Financial models use as their basis independently sourced market parameters including, for example, interest rate yield curves, option volatilities, and currency rates. Discounted cash flow analysis is dependent upon estimated future cash flows and the level of interest rates. Model-based pricing uses inputs of observable prices for interest rates, foreign exchange rates, option volatilities and other factors. Models are benchmarked and validated by independent parties. The Company's valuation process takes into consideration factors such as counterparty credit quality, liquidity and concentration concerns. The Company applies judgment in the application of these factors. In addition, the Company must apply judgment when no external parameters exist. Finally, other factors can affect the Company's estimate of fair value including market dislocations, incorrect model assumptions, and unexpected correlations.

These valuation methods could expose the Company to materially different results should the models used or underlying assumptions be inaccurate. See "Use of Estimates" in "Summary of Significant Accounting and Reporting Policies" of the Notes to Consolidated Financial Statement in the Company's

2005 Annual Report on Form 10-K.

To assist in assessing the impact of a change in valuation, at March 31, 2006, approximately $2.3 billion of the Company's portfolio of securities and derivatives is not priced based on quoted market prices because no such quoted market prices are available. A change of 2.5% in the valuation of these securities and derivatives would result in a change in pre-tax income of $58 million.

Goodwill and Other Intangibles

The Company records all assets and liabilities acquired in purchase acquisitions, including goodwill, indefinite-lived intangibles, and other intangibles, at fair value as required by FASB Statement No. 141 ("SFAS 141"), "Business Combination". Goodwill ($3,848 million at March 31, 2006) and indefinite-lived intangible assets ($378 million at March 31, 2006) are not amortized but are subject to annual tests for impairment or more often if events or circumstances indicate they may be impaired. Other intangible assets are amortized over their estimated useful lives and are subject to impairment if events or circumstances indicate a possible inability to realize the carrying amount. The initial recording of goodwill and other intangibles requires subjective judgments concerning estimates of the fair value of acquired assets. The goodwill impairment test is performed in two phases. The first step of the goodwill impairment test compares the fair value of the reporting unit with its carrying amount, including goodwill. If the fair value of the reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not impaired; however, if the carrying amount of the reporting unit exceeds its fair value, an additional procedure must be performed. That additional procedure compares the implied fair value of the reporting unit's goodwill with the carrying amount of that goodwill. An impairment loss is recorded to the extent that the carrying amount of goodwill exceeds its implied fair value. Indefinite-lived intangible assets are evaluated for impairment at least annually by comparing their fair value to their carrying value.

Other identifiable intangible assets ($518 million at March 31, 2006) are evaluated for impairment if events and circumstances indicate a possible impairment. Such evaluation of other intangible assets is based on undiscounted cash flow projections. Fair value may be determined using: market

26

prices, comparison to similar assets, market multiples, discounted cash flow analysis and other determinates. Estimated cash flows may extend far into the future and, by their nature, are difficult to determine over an extended timeframe. Factors that may significantly affect the estimates include, among others, competitive forces, customer behaviors and attrition, changes in revenue growth trends, cost structures and technology, and changes in discount rates and specific industry or market sector conditions. Other key judgments in accounting for intangibles include useful life and classification between goodwill and indefinite-lived intangibles or other intangibles that require amortization. See Note "Goodwill and Intangibles" in the Notes to Consolidated Financial Statements for additional information regarding intangible assets.

The following discussion may assist investors in assessing the impact of a goodwill or intangible asset impairment charge. The Company has $4.7 billion of goodwill and intangible assets at March 31, 2006. The impact of a 5% impairment charge would result in a change of pre-tax income of approximately $237 million.

Pension Accounting

The Company has defined benefit plans covering approximately 13,900 U.S. employees and approximately 3,175 non-US employees at September 30, 2005.

The Company has three defined benefit pension plans in the U.S. and six overseas. The U.S. plans account for 82% of the projected benefit obligation. Pension expense was $26 million in 2005 while there were pension credits in 2004 and 2003 of $24 million and $39 million. In addition to its pension plans, the Company also has an Employee Stock Ownership Plan ("ESOP") which may provide additional benefits to certain employees. Upon retirement, covered employees are entitled to the higher of their benefit under the ESOP or the defined benefit plan. If the benefit is higher under the defined benefit plan, the employees' ESOP account is contributed to the pension plan.

A number of key assumption and measurement date values determine pension expense. The key elements include the long-term rate of return on plan assets, the discount rate, the market-related value of plan assets, and for the primary U.S. plan the price used to value stock in the ESOP. Since 2003, these key elements have varied as follows:

(Dollars in millions, except per share amounts)	2006	2005	2004	2003
Domestic Plans:				
Long-Term Rate of Return on Plan Assets	7.88%	8.25%	8.75%	9.00%
Discount Rate	5.88	6.00	6.25	6.50
Market-Related Value of Plan Assets(1)	$ 1,324	$ 1,502	$ 1,523	$ 1,483
ESOP Stock Price(1)	30.46	30.67	27.88	33.30
Net U.S Pension Credit/(Expense)		$ (17)	$ 31	$ 46
All other Pension Credit/(Expense)		(9)	(7)	(7)
Total Pension Credit/(Expense)		$ (26)	$ 24	$ 39

----

(1) Actuarially smoothed data. See "Summary of Significant Accounting and Reporting Policies" in Notes to the Consolidated Financial Statements in the 2005 Annual Report on Form 10-K.

The discount rate for U.S. pension plans was determined after reviewing a number of high quality long-term bond indices whose yields were adjusted to match the duration of the Company's pension liability. The Company also reviewed the results of several models that matched bonds to the Company's pension cash flows. The various indices and models produced discount rates ranging from 5.68% to 6.2%. After reviewing the various indices and models, the Company selected a discount rate of 5.875%. The discount rates for foreign

27

pension plans are based on high quality corporate bonds rates in countries that have an active corporate bond market. In those countries with no active corporate bond market, discount rates are based on local government bond rates plus a credit spread.

The Company's expected long-term rate of return on plan assets is based on anticipated returns for each asset class. At September 30, 2005 and 2004, the assumptions for the long-term rates of return on plan assets were 7.88% and 8.25%, respectively. Anticipated returns are weighted for the target

allocation for each asset class. Anticipated returns are based on forecasts for prospective returns in the equity and fixed income markets, which should track the long-term historical returns for these markets. The Company also considers the growth outlook for U.S. and global economies, as well as current and prospective interest rates.

The market-related value of plan assets also influences the level of pension expense. Differences between expected and actual returns are recognized over five years to compute an actuarially derived market-related value of plan assets. In 2005, the market-related value of plan assets declined as the extraordinary actual return in 2000 was replaced with a more modest return.

Unrecognized actuarial gains and losses are amortized over the future service period (11 years) of active employees if they exceed a threshold amount. The Company currently has unrecognized losses which are being amortized.

For 2005, U.S. pension expense increased by $48 million reflecting changes in assumptions, the amortization of unrecognized pension losses and a decline in the market-related value of plan assets. These same factors are expected to further increase pension expense in 2006. To reduce the impact of these factors, the Company changed certain of its domestic defined benefit pension plans during the third quarter of 2005. The primary change was to switch the computation of the benefits from final average pay to career average pay effective January 1, 2006. As a result U.S. pension expense is expected to increase by approximately $21 million.

The annual impacts on the primary U.S. plan of hypothetical changes in the key elements on the pension expense are shown in the tables below.

(Dollars in millions)	Increase in Pension Expense		2006 Base	Decrease in Pension Expense	
Long-Term Rate of Return on Plan Assets	6.88%	7.38%	7.88%	8.38%	8.88%
Change in Pension Expense	$ 16.0	$ 7.9	N/A	$ 7.9	$ 15.7
Discount Rate	5.38%	5.63%	5.88%	6.13%	6.38%
Change in Pension Expense	$ 14.9	$ 7.2	N/A	$ 6.9	$ 13.4
Market-Related Value of Plan Assets	-20.00%	-10.00%	$1,324	+10.00%	+20.00%
Change in Pension Expense	$ 50.8	$ 25.4	N/A	$ 25.4	$ 50.8
ESOP Stock Price	$20.46	$25.46	$30.46	$35.46	$40.46
Change in Pension Expense	$ 15.2	$ 7.3	N/A	$ 6.7	$ 12.9

28

CONSOLIDATED BALANCE SHEET REVIEW

Total assets were $103.6 billion at March 31, 2006, compared with $96.5 billion at March 31, 2005 and $102.1 billion at December 31, 2005. The increase in assets from December 31, 2005 reflects increase in short-term high quality assets such as federal funds sold, securities purchased under resale agreements, and trading assets. Total shareholders' equity was $10.1 billion at March 31, 2006, compared with $9.3 billion at March 31, 2005 and $9.9 billion at December 31, 2005. The increase in shareholders' equity from December 31, 2005, reflects the retention of earnings.

Return on average common equity for the first quarter of 2006 was 17.31%,

compared with 16.52% in the first quarter of 2005 and 16.57% in the fourth quarter of 2005.

Return on average assets for the first quarter of 2006 was 1.61%, compared with 1.55% in the first quarter of 2005 and 1.53% in the fourth quarter of 2005.

Investment Securities

The table below shows the distribution of the Company's securities portfolio:

Investment Securities (at Fair Value)

(In millions)	03/31/06	12/31/05
Fixed Income:		
Mortgage-Backed Securities	$ 22,673	$ 22,483
Asset-Backed Securities	364	305
Corporate Debt	1,263	1,034
Short-Term Money Market Instruments	978	975
U.S. Treasury Securities	209	226
U.S. Government Agencies	643	620
State and Political Subdivisions	210	224
Emerging Market Debt (Collateralized By U.S. Treasury Zero Coupon Obligations)	117	117
Other Foreign Debt	150	363
Subtotal Fixed Income	26,607	26,347
Equity Securities:		
Money Market Funds	571	922
Other	68	31
Subtotal Equity Securities	639	953
Total Securities	$ 27,246	$ 27,300

Total investment securities were $27.2 billion at March 31, 2006, compared with $27.3 billion at December 31, 2005. Average investment securities were $27.1 billion in the first quarter of 2006, compared with $23.5 billion in the first quarter of last year and $26.9 billion in the fourth quarter of 2005. The increases were primarily due to growth in the Company's portfolio of highly rated mortgage-backed securities, which are 89% rated AAA, 8% AA, and 3% A. The Company has been adding either adjustable or short life classes of structured mortgage-backed securities, both of which have short durations. The effective duration of the Company's mortgage portfolio at March 31, 2006 was approximately 2.0 years.

Net unrealized losses for securities available-for-sale was $195 million at March 31, 2006, compared with net unrealized losses of $108 million at December 31, 2005. The change in the value of available-for-sale securities at March 31, 2006 from December 31, 2005 reflects the increase in long-term interest rates over the quarter. The asymmetrical accounting treatment of the impact of a change in interest rates on the Company's balance sheet may create a situation in which an increase in interest rates can adversely affect reported equity and regulatory capital, even though economically there may be

no impact on the economic capital position of the Company. For example, an increase in rates will result in a decline in the value of the fixed rate portion of the Company's fixed income investment portfolio, which will be reflected through a reduction in other comprehensive income in the Company's shareholders' equity, thereby affecting the tangible common equity ("TCE") ratio. Under current accounting rules, there is no corresponding change in value of the Company's fixed rate liabilities, even though economically these liabilities are more valuable as rates rise.

Loans

(Dollars in billions)	Period End			Quarterly Average		
	Total	Non-Margin	Margin	Total	Non-Margin	Margin
March 31, 2006	$40.1	$ 34.8	$ 5.3	$39.6	$ 33.9	$ 5.7
December 31, 2005	40.7	34.6	6.1	40.8	34.3	6.5
March 31, 2005	38.8	32.8	6.0	38.8	32.4	6.4

Total loans were $40.1 billion at March 31, 2006 compared with $40.7 billion at December 31, 2005. The decrease in total loans from December 31, 2005 primarily reflects a decrease in margin loans reflecting the loss of a significant customer at Pershing. Average total loans were $39.6 billion in the first quarter of 2006, compared with $38.8 billion in the first quarter of 2005. The increase in average loans from March 31, 2005 results from increased lending to financial institutions.

The following tables provide additional details on the Company's credit exposures and outstandings at March 31, 2006 in comparison to December 31, 2005.

Overall Loan Portfolio

(In billions)	Loans	Unfunded Commitments	Total Exposure	Loans	Unfunded Commitments	Total Exposure
	03/31/06	03/31/06	03/31/06	12/31/05	12/31/05	12/31/05
Financial Institutions	$ 12.7	$ 25.1	$ 37.8	$ 13.0	$ 22.5	$ 35.5
Corporate	4.0	19.2	23.2	3.7	19.6	23.3
	16.7	44.3	61.0	16.7	42.1	58.8
Consumer & Middle Market	10.5	4.8	15.3	10.3	4.8	15.1
Leasing Financings	5.6	0.1	5.7	5.5	-	5.5
Commercial Real Estate	2.0	1.4	3.4	2.1	1.4	3.5
Margin loans	5.3	-	5.3	6.1	-	6.1
Total	$ 40.1	$ 50.6	$ 90.7	$ 40.7	$ 48.3	$ 89.0

Financial Institutions

The financial institutions portfolio exposure was $37.8 billion at March 31, 2006 compared to $35.5 billion at December 31, 2005. The increase in exposure from year-end 2005 reflects greater activity in the capital markets in the first quarter of 2006, which drove increased demands for credit from financial institutions. These exposures are of high quality with 85% meeting the investment grade criteria of the Company's rating system. These exposures are generally short-term, with 75% expiring within one year and are frequently secured. For example, mortgage banking, securities industry, and investment managers often borrow against marketable securities held in custody at the Company. The diversity of the portfolio is shown in the accompanying table.

(In billions)

	March 31, 2006					December 31, 2005	
Lending Division	Loans	Unfunded Commitments	Total Exposures	%Inv Grade	%due	Unfunded	Total

Included in the Company's corporate exposures are automotive and airline exposures. The Company continues to seek to selectively reduce automotive exposures given ongoing weakness in the domestic automotive industry. Total exposures reported in the Automotive Division were down $43 million at March 31, 2006 compared with December 31, 2005. At March 31, 2006, this broadly defined industry portfolio consists of exposures of $184 million to Big Three automotive manufacturing, $191 million to finance subsidiaries, $453 million to highly rated asset-backed securitization vehicles, $289 million to suppliers, and $141 million of other.

The Company's exposure to the airline industry consists of a $325 million leasing portfolio (including a $16 million real estate lease exposure). The airline-leasing portfolio consists of $129 million to major U.S. carriers, $134 million to foreign airlines and $62 million to U.S. regionals.

During the first quarter of 2006, the airline industry continued to face liquidity issues driven by persistently high fuel prices and the inability to implement meaningful fare increases. The industry's considerable excess capacity and higher oil prices continue to negatively impact the valuations of aircraft, especially the less fuel-efficient models, in the secondary market. Because of these factors, the Company continues to maintain a sizable allowance for loan losses against these exposures and to closely monitor the portfolio.

Counterparty Risk Ratings Profile

The table below summarizes the risk ratings of the Company's foreign exchange and interest rate derivative counterparty credit exposure for the past year.

	For the Quarter Ended				
Rating(1)	3/31/06	12/31/05	9/30/05	6/30/05	3/31/05
AAA to AA-	77%	74%	71%	68%	74%
A+ to A-	8	13	13	15	13
BBB+ to BBB-	9	9	13	14	10
Noninvestment Grade	6	4	3	3	3

Total	100%	100%	100%	100%	100%

(1) Represents credit rating agency equivalent of internal credit ratings.

Nonperforming Assets

(Dollars in millions)	3/31/06	12/31/05	Change 3/31/06 vs. 12/31/05	Percent Inc/ (Dec)
Category of Loans:				
Domestic:				
Other Commercial	$ 24	$ 17	$ 7	41%
Regional Commercial	29	35	(6)	(17)
Foreign	13	14	(1)	(7)
Total Nonperforming Loans	66	66	-	-
Other Assets Owned	-	13	(13)	(100)
Total Nonperforming Assets	$ 66	$ 79	$ (13)	(16)
Nonperforming Assets Ratio	0.2%	0.2%		
Allowance for Loan Losses/Nonperforming Loans	635.2	629.7		
Allowance for Loan Losses/Nonperforming Assets	635.2	524.0		
Total Allowance for Credit Losses/Nonperforming Loans	858.8	865.4		
Total Allowance for Credit Losses/Nonperforming Assets	858.8	720.2		

Nonperforming assets declined by $13 million, or 16%, during the first quarter of 2006 to $66 million and are down 66% from a year ago. The decrease from the first quarter of 2005 reflects loan sales, paydowns, and charge-offs of commercial loans. The decrease from the fourth quarter of 2005 primarily reflects the sale of aircraft. The ratio of the total allowance for credit losses to nonperforming assets was 858.8% at March 31, 2006, compared with 373.4% at March 31, 2005 and 720.2% at December 31, 2005.

Activity in Nonperforming Assets

(In millions)	Quarter End March 31, 2006	Quarter End December 31, 2005
Balance at Beginning of Period	$ 79	$ 107
Additions	10	21
Charge-offs	(5)	(7)
Paydowns/Sales	(18)	(42)
Balance at End of Period	$ 66	$ 79

Interest income would have been increased by $1 million for the first

quarters of 2006 and 2005 if loans on nonaccrual status at March 31, 2006 and 2005 had been performing for the entire period.

Impaired Loans

The table below sets forth information about the Company's impaired loans. The Company uses the discounted cash flow, collateral value, or market price methods for valuing its impaired loans:

(In millions)	March 31, 2006	December 31, 2005	March 31, 2005
Impaired Loans with an Allowance	$ 45	$ 42	$ 68
Impaired Loans without an Allowance(1)	-	-	103
Total Impaired Loans	$ 45	$ 42	$ 171
Allowance for Impaired Loans(2)	$ 15	$ 16	$ 34
Average Balance of Impaired Loans during the Quarter	43	100	182
Interest Income Recognized on Impaired Loans during the Quarter	0.4	0.3	2.2

(1) When the discounted cash flows, collateral value or market price equals or exceeds the carrying value of the loan, then the loan does not require an allowance under the accounting standard related to impaired loans.
(2) The allowance for impaired loans is included in the Company's allowance for credit losses.

Allowance

(Dollars in millions)	March 31, 2006	December 31, 2005	March 31, 2005
Margin Loans	$ 5,312	$ 6,089	$ 6,038
Non-Margin Loans	34,742	34,637	32,726
Total Loans	$ 40,054	$ 40,726	$ 38,764
Allowance for Loan Losses	$ 419	$ 411	$ 583
Allowance for Lending-Related Commitments	147	154	133
Total Allowance for Credit Losses	$ 566	$ 565	$ 716
Allowance for Loan Losses As a Percent of Total Loans	1.05%	1.01%	1.50%
Allowance for Loan Losses As a Percent of Non-Margin Loans	1.21	1.19	1.78
Total Allowance for Credit Losses As a Percent of Total Loans	1.41	1.39	1.85
Total Allowance for Credit Losses As a Percent of Non-Margin Loans	1.63	1.63	2.19

33

The total allowance for credit losses was $566 million, or 1.41% of total

loans at March 31, 2006, compared with $716 million, or 1.85% of total loans at March 31, 2005 and $565 million, or 1.39% of total loans at December 31, 2005.

The Company has $5.3 billion of secured margin loans on its balance sheet at March 31, 2006. The Company has rarely suffered a loss on these types of loans and does not allocate any of its allowance for credit losses to these loans. As a result, the Company believes the ratio of total allowance for credit losses to non-margin loans is a more appropriate metric to measure the adequacy of the reserve.

The ratio of the total allowance for credit losses to non-margin loans was 1.63% at March 31, 2006, compared with 2.19% at March 31, 2005 and 1.63% at December 31, 2005, reflecting improvement in the credit quality since the first quarter of 2005.

The ratio of the allowance for loan losses to nonperforming assets was 635.2% at March 31, 2006, compared with 304.0% at March 31, 2005 and 524.0% at December 31, 2005.

The allowance for loan losses and the allowance for lending-related commitments consists of four elements: (1) an allowance for impaired credits (nonaccrual commercial credits over $1 million), (2) an allowance for higher risk rated credits, (3) an allowance for pass rated credits, and (4) an unallocated allowance based on general economic conditions and risk factors in the Company's individual markets.

The first element, impaired credits, is based on individual analysis of all nonperforming commercial credits over $1 million. The allowance is measured by the difference between the recorded value of impaired loans and their fair value. Fair value is either the present value of the expected future cash flows from borrower, the market value of the loan, or the fair value of the collateral.

The second element, higher risk rated credits, is based on the assignment of loss factors for each specific risk category of higher risk credits. The Company rates each credit in its portfolio that exceeds $1 million and assigns the credits to specific risk pools. A potential loss factor is assigned to each pool, and an amount is included in the allowance equal to the product of the amount of the loan in the pool and the risk factor. Reviews of higher risk rated loans are conducted quarterly and the loan's rating is updated as necessary. The Company prepares a loss migration analysis and compares its actual loss experience to the loss factors on an annual basis to attempt to ensure the accuracy of the loss factors assigned to each pool. Pools of past due consumer loans are included in specific risk categories based on their length of time past due.

The third element, pass rated credits, is based on the Company's expected loss model. Borrowers are assigned to pools based on their credit ratings. The expected loss for each loan in a pool incorporates the borrower's credit rating, loss given default rating and maturity. The credit rating is dependent upon the borrower's probability of default. The loss given default incorporates a recovery expectation. Borrower and loss given default ratings are reviewed semi-annually at a minimum and are periodically mapped to third party, including rating agency, default and recovery data bases to ensure ongoing consistency and validity. Commercial loans over $1 million are individually analyzed before being assigned a credit rating. The Company also applies this technique to its leasing and consumer portfolios. All current consumer loans are included in the pass rated consumer pools.

The fourth element, the unallocated allowance, is based on management's judgment regarding the following factors:

* Economic conditions including duration of the current cycle;

* Past experience including recent loss experience;

* Credit quality trends;

* Collateral values;

* Volume, composition, and growth of the loan portfolio;

* Specific credits and industry conditions;

* Results of bank regulatory and internal credit exams;

* Actions by the Federal Reserve Board;

* Delay in receipt of information to evaluate loans or confirm existing credit deterioration; and

* Geopolitical issues and their impact on the economy.

Based on an evaluation of these four elements, including individual credits, historical credit losses, and global economic factors, the Company has allocated its allowance for credit losses as follows:

	March 31, 2006	December 31, 2005
Domestic		
Real Estate	2%	2%
Commercial	67	69
Consumer	11	10
Foreign	2	2
Unallocated	18	17
	100%	100%

Such an allocation is inherently judgmental, and the entire allowance for credit losses is available to absorb credit losses regardless of the nature of the loss.

Deposits

Total deposits were $65.2 billion at March 31, 2006, compared with $59.0 billion at March 31, 2005 and $64.4 billion at December 31, 2005. The increase from March 31, 2005 was primarily due to increased market activity levels, which resulted in higher levels of customer deposits at quarter end. Noninterest-bearing deposits were $16.9 billion at March 31, 2006, compared with $18.2 billion at December 31, 2005. Interest-bearing deposits were $48.3 billion at March 31, 2006, compared with $46.2 billion at December 31, 2005.

LIQUIDITY

The Company maintains its liquidity through the management of its assets and liabilities, utilizing worldwide financial markets. The diversification of liabilities reflects the Company's efforts to maintain flexibility of funding sources under changing market conditions. Stable core deposits, including demand, retail time, and trust deposits from processing businesses, are

generated through the Company's diversified network and managed with the use of trend studies and deposit pricing. The use of derivative products such as interest rate swaps and financial futures enhances liquidity by enabling the Company to issue long-term liabilities with limited exposure to interest rate risk. Liquidity also results from the maintenance of a portfolio of assets which can be easily sold and the monitoring of unfunded loan commitments, thereby reducing unanticipated funding requirements. Liquidity is managed on both a consolidated basis and at The Bank of New York Company, Inc. parent company ("Parent").

On a consolidated basis, non-core sources of funds such as money market rate accounts, certificates of deposits greater than $100,000, federal funds purchased, and other borrowings were $14.2 billion and $13.0 billion on an average basis for the first three months of 2006 and 2005. Average foreign

deposits, primarily from the Company's European based securities servicing business, were $30.2 billion and $25.5 billion in the first quarters of 2006 and 2005. The increase in foreign deposits reflects greater liquidity from the Company's securities servicing customers. Domestic savings and other time deposits were $9.7 billion on an average basis in the first quarter of 2006 compared to $9.8 billion in 2005. Average payables to customers and broker-dealers decreased to $5.2 billion from $6.4 billion in the first quarter of 2005. The decline in payables to customers and broker-dealers reflects the loss of a significant customer at Pershing. Long-term debt averaged $8.0 billion and $6.6 billion in the first quarters of 2006 and 2005. The increase in long-term debt reflects the movement of Pershing from a subsidiary of the Bank to a subsidiary of the Parent. A significant reduction in the Company's securities servicing businesses would reduce its access to foreign deposits.

The Company's pending transaction with JPMorgan Chase will slightly alter the composition of the balance sheet. Approximately $15 billion of U.S dollar retail deposits will be replaced with approximately $13 billion of institutional corporate trust deposits. On the asset side of the balance sheet, approximately $8 billion of retail and middle market loans sold to JPMorgan Chase will be replaced with liquid assets and securities. Goodwill and intangibles are expected to increase approximately $2.1 billion. As a result of the transaction, the Company expects its balance sheet footings to decline slightly. See "Other Developments."

The Parent has four major sources of liquidity: dividends from its subsidiaries, the commercial paper market, a revolving credit agreement with third party financial institutions, and access to the capital markets.

At March 31, 2006, the Bank can pay dividends of approximately $510 million to the Parent without the need for regulatory waiver. This dividend capacity would increase in the remainder of 2006 to the extent of the Bank's net income less dividends. Nonbank subsidiaries of the Parent have liquid assets of approximately $254 million. These assets could be liquidated and the proceeds delivered by dividend or loan to the Parent.

For the quarter ended March 31, 2006, the Parent's quarterly average commercial paper borrowings were $447 million compared with $234 million in 2005. At March 31, 2006, the Parent had cash of $685 million compared with $739 million at March 31, 2005 and $791 million at December 31, 2005. Net of commercial paper outstanding, the Parent's cash position at March 31, 2006 was down $50 million compared with March 31, 2005.

The Parent has a back-up line of credit of $275 million with 14 financial institutions. This line of credit matures in October 2006. There were no borrowings under the line of credit at March 31, 2006 and March 31, 2005.

The Parent also has the ability to access the capital markets. At March 31, 2006, the Parent has two shelf registrations with a capacity of $1.2 billion of debt, preferred stock, trust preferred securities, or common stock. Access to the capital markets is partially dependent on the Company's credit ratings, which as of March 31, 2006 were as follows:

	Parent Commercial Paper	Parent Subordinated Long-Term Debt	Parent Senior Long-Term Debt	The Bank of New York Long-Term Deposits	Outlook
Standard & Poor's	A-1	A	A+	AA-	Stable
Moody's	P-1	A1	Aa3	Aa2	Stable
Fitch	F1+	A+	AA-	AA	Stable
Dominion Bond Rating Service	R-1(middle)	A(high)	AA(low)	AA	Stable

The Parent's major uses of funds are payment of dividends, principal and interest on its borrowings, acquisitions, and additional investment in its subsidiaries.

36

The Parent has $225 million of long-term debt that becomes due in 2006 subsequent to March 31, 2006 and $700 million of long-term debt that is due in 2007. In addition, the Parent periodically has the option to call $228 million of subordinated debt in 2006, which it will call and refinance if market conditions are favorable. The Parent expects to refinance any debt it repays by issuing a combination of senior and subordinated debt.

The Company has $800 million of trust preferred securities that are callable in 2006. These securities qualify as Tier 1 Capital. The Company has not yet decided if it will call these securities. The decision to call will be based on interest rates, the availability of cash and capital, and regulatory conditions. If the Company calls the trust preferred securities, it expects to replace them with new trust preferred securities or senior or subordinated debt.

Double leverage is the ratio of investment in subsidiaries divided by the Company's consolidated equity plus trust preferred securities. The Company's double leverage ratio at March 31, 2006 and 2005 was 109.85% and 101.15%, respectively. The Company's target double leverage ratio is a maximum of 120%. The double leverage ratio is monitored by regulators and rating agencies and is an important constraint on the Company's ability to invest in its subsidiaries to expand its businesses.

Pershing LLC, an indirect subsidiary of the Company, has committed and uncommitted lines of credit in place for liquidity purposes. The committed line of credit of $500 million with five financial institutions matures in March 2007. There were no borrowings against this line of credit during the first quarter of 2006. Pershing LLC has three separate uncommitted lines of credit amounting to $1 billion in aggregate. Average daily borrowing under these lines was $1 million, in aggregate, during the first quarter of 2006.

Pershing Limited, an indirect subsidiary of the Company, has committed and uncommitted lines in place for liquidity purposes. The committed lines of

credit of $275 million with four financial institutions mature in March 2007. Average daily borrowings under these lines were $75 million, in aggregate, during the first quarter of 2006. Pershing Limited has three separate uncommitted lines of credit amounting to $300 million in aggregate. Average daily borrowing under these lines was $155 million, in aggregate, during the first quarter of 2006.

The following comments relate to the information disclosed in the Consolidated Statements of Cash Flows.

Cash provided by other operating activities was $0.5 billion for the three months of 2006, compared with $0.4 billion used by operating activities through March 31, 2005. The source of funds in 2006 was principally due to the changes in accruals and other and net income. The use of funds from operations in 2005 was principally the result of changes in accruals and other as well as changes in trading activities.

In the first three months of 2006, cash used for investing activities was $1.0 billion as compared to cash used for investing activities in the first three months of 2005 of $2.5 billion. In the first three months of 2006, purchases of securities available-for-sale and changes in federal funds sold and securities repurchased under resale agreements were a significant use of funds. Purchases of securities available-for-sale and principal disbursed on loans to customers were a significant use of funds in 2005.

Through March 31, 2006, cash provided by financing activities was $0.4 billion, compared to $1.7 billion in the first three months of 2005. Sources of funds in 2006 and 2005 include deposits and proceeds from the issuance of long-term debt.

CAPITAL RESOURCES

Shareholders' equity was $10,101 million at March 31, 2006, compared with $9,335 million at March 31, 2005 and $9,876 million at December 31, 2005. During the first quarter of 2006, the Company retained $258 million of earnings. In April 2006, the Company declared a quarterly common stock dividend of 21 cents per share. Accumulated other comprehensive income declined $55 million from December 31, 2005 primarily reflecting higher unrealized mark-to-market losses in the securities available-for-sale portfolio.

In the first quarter of 2006, the Company issued $67 million of callable medium-term subordinated notes bearing interest at rates from 5.55% to 6.00%. The notes are due in 2021 and 2031 and are callable by the Company after three to five years. The notes qualify as Tier 2 capital.

On February 27, 2006, the Company entered into a lease transaction recorded as long-term debt of $527 million bearing interest at a fixed Euro rate of 3.1% per annum and amortizing on a quarterly basis through 2031, unless terminated earlier.

Regulators establish certain levels of capital for bank holding companies and banks, including the Company and the Bank, in accordance with established quantitative measurements. For the Parent to maintain its status as a financial holding company, the Bank must qualify as well capitalized. In addition, major bank holding companies such as the Parent are expected by the regulators to be well capitalized. As of March 31, 2006 and 2005, the Company and the Bank were considered well capitalized on the basis of the ratios (defined by regulation) of Total and Tier 1 capital to risk-weighted assets and leverage (Tier 1

capital to average assets), which are shown as follows:

	March 31, 2006		March 31, 2005			Well	Adequately
	Company	Bank	Company	Bank	Company Targets	Capitalized Guidelines	Capitalized Guidelines
Tier 1*	8.28%	9.14%	8.13%	8.46%	7.75%	6%	4%
Total Capital**	12.44	12.07	12.54	11.76	11.75	10	8
Leverage	6.51	7.26	6.56	6.98		5	3-5
Tangible Common Equity ("TCE")	5.42	6.67	5.48	6.47	5.00-5.25	N.A.	N.A.

The Company's regulatory Tier 1 capital and Total Capital ratios were 8.28% and 12.44% at March 31, 2006, compared with 8.13% and 12.54% at March 31, 2005 and 8.38% and 12.48% at December 31, 2005. The regulatory leverage ratio was 6.51% at March 31, 2006, compared with 6.56% at March 31, 2005 and 6.60% at December 31, 2005. The Company's tangible common equity as a percentage of total assets was 5.42% at March 31, 2006, compared with 5.48% at March 31, 2005 and 5.58% at December 31, 2005. The Company's pending transaction with JPMorgan Chase is expected to reduce its TCE ratio to approximately 4.67% primarily due to the intangibles associated with the transaction. The tangible common equity ratio varies depending on the size of the balance sheet at quarter-end and the impact of interest rates on unrealized gains and losses among other things. The balance sheet size fluctuates from quarter to quarter based on levels of market activity. In general, when servicing clients are more actively trading securities, deposit balances and the balance sheet as a whole, are higher to finance these activities.

A billion dollar change in assets changes the TCE ratio by 5 basis points while a $100 million change in common equity changes the TCE ratio by 10 basis points.

38

On April 4, 2006, pursuant to a 10b5-1 plan, the Company repurchased 10 million shares of its common stock at an initial price of $35.85 from a broker-dealer counterparty who borrowed the shares, as part of an accelerated share repurchase program. The repurchase was triggered by the non-issuance of a specified FSP for lease accounting for calendar year 2006 or prior periods. See "Accounting Changes and New Accounting Pronouncements" in the Notes to the Consolidated Financial Statements. The initial price is subject to a purchase price adjustment based on the price the counterparty pays for the Company's shares it purchases over time in the open market to cover the borrowed shares.

On March 1, 2005, the Board of Governors of the Federal Reserve System (the "FRB") adopted a final rule that allows the continued limited inclusion of trust preferred securities in the Tier 1 capital of bank holding companies (BHCs). Under the final rule, the Company will be subject to a 15 percent limit in the amount of trust preferred securities that can be included in Tier 1 capital, net of goodwill, less any related deferred tax liability. Amounts in excess of these limits will continue to be included in Tier 2 capital. The final rule provides a five-year transition period, ending March 31, 2009, for application of quantitative limits. Under the transition rules, the Company expects all its trust preferred securities to continue to qualify as Tier 1 capital. Both the Company and the Bank are expected to remain "well capitalized" under the final rule. At the end of the transition period, the Company expects all its current trust preferred securities will continue to

qualify as Tier 1 capital.

The following table presents the components of the Company's risk-based capital at March 31, 2006 and 2005:

(In millions)	2006	2005
Shareholders' Equity	$10,101	$ 9,335
Preferred Stock	-	-
Trust Preferred Securities	1,150	1,150
Adjustments: Intangibles	(4,741)	(4,275)
Securities Valuation Allowance	106	21
Merchant Banking Investments	(18)	(5)
Tier 1 Capital	6,598	6,226
Qualifying Unrealized Equity Security Gains	7	-
Qualifying Subordinated Debt	2,745	2,659
Qualifying Allowance for Loan Losses	566	716
Tier 2 Capital	3,318	3,375
Total Risk-Based Capital	$ 9,916	$ 9,601
Risk-Adjusted Assets	$79,697	$76,567

TRADING ACTIVITIES

Equities	2,409	97	85	161	95
Total Trading Account		$5,123	$ 2,902	$4,759	$ 2,597

The Company's trading activities are focused on acting as a market maker for the Company's customers. The risk from these market making activities and from the Company's own positions is managed by the Company's traders and limited in total exposure as described below.

The Company manages trading risk through a system of position limits, a value at risk (VAR) methodology-based on a Monte Carlo simulation, stop loss advisory triggers, and other market sensitivity measures. Risk is monitored and reported to senior management by a separate unit on a daily basis. Based on certain assumptions, the VAR methodology is designed to capture the potential overnight pre-tax dollar loss from adverse changes in fair values of all trading positions. The calculation assumes a one-day holding period for most instruments, utilizes a 99% confidence level, and incorporates the non-linear characteristics of options. The VAR model is used to calculate economic capital, which is allocated to the business units for computing risk-adjusted performance.

As VAR methodology does not evaluate risk attributable to extraordinary financial, economic or other occurrences, the risk assessment process includes a number of stress scenarios based upon the risk factors in the portfolio and management's assessment of market conditions. Additional stress scenarios based upon historic market events are also tested. Stress tests by their design incorporate the impact of reduced liquidity and the breakdown of observed correlations. The results of these stress tests are reviewed weekly with senior management.

The following table indicates the calculated VAR amounts for the trading portfolio for the periods indicated.

(In millions)	1st Quarter 2006			
	Average	Minimum	Maximum	3/31/06
Interest Rate	$ 2.8	$ 2.0	$ 4.4	$ 2.9
Foreign Exchange	1.0	0.6	1.7	0.8
Equity	0.8	0.5	1.2	0.9

Credit Derivatives	0.9	0.6	1.2	0.9
Diversification	(1.4)	NM	NM	(1.4)
Overall Portfolio	4.1	3.3	5.4	4.1

	1st Quarter 2005			
	Average	Minimum	Maximum	3/31/05
Interest Rate	$ 2.8	$ 2.0	$ 4.3	$ 4.3
Foreign Exchange	1.0	0.4	3.3	2.2
Equity	0.8	0.5	1.1	0.9
Credit Derivatives	1.7	1.5	2.1	2.1
Diversification	(1.4)	NM	NM	(3.0)
Overall Portfolio	4.9	3.7	7.5	6.5

NM - Because the minimum and maximum may occur on different days for different risk components, it is not meaningful to compute a portfolio diversification effect.

During the first quarter of 2006, interest rate risk generated approximately 47% of average VAR, credit derivatives generated 22% of average VAR, foreign exchange accounted for 17% of average VAR, and equity generated 14% of average VAR. During the first quarter of 2006, the Company's daily trading loss did not exceed the Company's calculated VAR amounts on any given day.

The following table of total daily revenue or loss captures trading volatility and shows the number of days on which the Company's trading revenues fell within particular ranges during the past year.

Distribution of Revenues*

	For the Quarter Ended				
Revenue Range	3/31/06	12/31/05	9/30/05	6/30/05	3/31/05
(Dollars in millions)	Number of Occurrences				
Less than $(2.5)	0	0	0	0	0
$(2.5)~ $ 0	4	3	3	6	1
$ 0 ~ $ 2.5	40	44	51	40	50
$ 2.5 ~ $ 5.0	18	14	8	16	11
More than $5.0	0	0	2	2	0

ASSET/LIABILITY MANAGEMENT

The Company's asset/liability management activities include lending, investing in securities, accepting deposits, raising money as needed to fund assets, and processing securities and other transactions. The market risks that arise from these activities are interest rate risk, and to a lesser degree, foreign exchange risk. The Company's primary market risk is exposure to movements in U.S. dollar interest rates. Exposure to movements in foreign currency interest rates also exists, but to a significantly lower degree. The Company actively manages interest rate sensitivity. In addition to gap analysis, the Company uses earnings simulation and discounted cash flow models to identify interest rate exposures.

An earnings simulation model is the primary tool used to assess changes in pre-tax net interest income. The model incorporates management's assumptions regarding interest rates, balance changes on core deposits, and changes in the prepayment behavior of loans and securities, and the impact of derivative financial instruments used for interest rate risk management purposes. These assumptions have been developed through a combination of historical analysis and future expected pricing behavior. These assumptions are inherently uncertain, and, as a result, the earnings simulation model cannot precisely estimate net interest income or the impact of higher or lower interest rates on net interest income. Actual results may differ from projected results due to timing, magnitude and frequency of interest rate changes and changes in market conditions and management's strategies, among other factors.

The Company evaluates the effect on earnings by running various interest rate ramp scenarios up and down from a baseline scenario, which assumes no changes in interest rates. These scenarios are reviewed to examine the impact of large interest rate movements. Interest rate sensitivity is quantified by calculating the change in pre-tax net interest income between the scenarios over a 12-month measurement period. The measurement of interest rate sensitivity is the percentage change in net interest income as shown in the following table:

(Dollars in millions)	Estimated Changes in Net Interest Income			
	March 31, 2006		December 31, 2005	
	$	%	$	%
+200 Basis Point Ramp vs. Stable Rate	$ (64)	(3.1)%	$ (65)	(3.2)%
+100 Basis Point Ramp vs. Stable Rate	(28)	(1.3)	(29)	(1.4)
-100 Basis Point Ramp vs. Stable Rate	(1)	-	(8)	(0.4)
-200 Basis Point Ramp vs. Stable Rate	(15)	(0.7)	(32)	(1.6)

The base case scenario Fed Funds rate in the March 31, 2006 analysis was 4.75% versus 4.25% for the December 31, 2005 analysis. The +100 basis point ramp scenario assumes short-term rates rise 25 basis points in each of the next four quarters, while the +200 ramp scenario assumes a 50 basis point per quarter increase. The +100 basis point March 31, 2006 scenario assumes a steepening of the yield curve with 10-year rates rising 115 basis points. The +200 basis point March 31, 2006 scenario assumes a slight steepening of the yield curve with 10-year rates rising 214 basis points. These scenarios do not reflect strategies that management could employ to limit the impact as interest rate expectations change.

The above table relies on certain critical assumptions including depositors' behavior related to interest rate fluctuations and the prepayment and extension risk in certain of the Company's assets. To the extent that actual behavior is different from that assumed in the models, there could be a change in interest rate sensitivity. The Company's pending transaction with JPMorgan Chase will initially result in a more liability-sensitive balance

because corporate trust liabilities reprice more quickly than retail deposits. The Company expects to use portfolio management to restore its interest rate sensitivity to a position similar to pre-transaction levels.

OTHER DEVELOPMENTS

On January 3, 2006, the Company acquired Alcentra, an international asset management group focused on managing funds that invest in non-investment grade debt. Alcentra's management team will retain a 20 percent interest. Alcentra has operations in London and Los Angeles and currently manages 15 different investment funds with over $6.2 billion of assets.

On March 2, 2006, the Company acquired Urdang, a real estate investment management firm that manages approximately $3.0 billion in direct investments and portfolios of REIT securities.

On April 8, 2006, the Company announced a definitive agreement to sell its retail and regional middle market businesses to JPMorgan Chase for $3.1 billion with a premium of $2.3 billion. JPMorgan Chase will sell its corporate trust business to the Company for $2.8 billion with a premium of $2.15 billion. The difference in premiums results in a net cash payment of $150 million to the Company. There is also a contingent payment of up to $50 million to the Company tied to customer retention.

The transaction further increases the Company's focus on the securities services and wealth management businesses that have fueled the Company's growth in recent years and that are at the core of its long-term business strategy.

The transaction has been approved by each company's board of directors and is expected to be completed late in the third quarter or during the fourth quarter of 2006, subject to regulatory approvals. The Company expects to record an after-tax gain of $1.3 billion on the businesses to be sold. The Company also expects to incur after-tax merger and integration charges of $90-120 million, which will be recorded over several quarters. The transaction is expected to be dilutive to GAAP earnings per share through 2009 (4.5 percent in 2007 to 1.5 percent in 2009), but to be accretive to cash earnings per share in 2009 when cost savings are fully phased in.

JPMorgan Chase's corporate trust business comprises issues representing $5

trillion in total debt outstanding. It has 2,400 employees in more than 40 locations globally. The Company's corporate trust business comprises issues representing $3 trillion in total debt outstanding. It has 1,300 employees in 25 locations globally.

The Company's retail bank consists of 342 branches in the tri-state region, serving approximately 700,000 consumer households and small businesses with $14.5 billion in deposits and $15.4 billion in assets. The Company's regional middle market businesses provide financing, banking and treasury services for middle market clients, serving more than 2,000 clients in the tri-state region. Together, the units have 4,000 employees located in New York, New Jersey, Connecticut and Delaware.

During the first quarter of 2006, the Company repurchased 0.9 million shares of its common stock in the open market and through the employee benefit plans. The Company also repurchased 1.5 million shares of its common stock in February at an initial price of $34.31 through an accelerated share repurchase program.

Operating leverage is measured by comparing the rate of increase in revenue to the rate of increase in expenses. The chart below shows the computation of operating leverage.

Operating Leverage

(Dollars in millions)

	1Q 2006	1Q 2005	% Change
Noninterest Income	$1,332	$1,178	13.1%
Net Interest Income	488	455	7.3
Total Revenue	1,820	1,633	11.5
Total Expense	1,178	1,077	9.4
Operating Leverage			2.1%

	1Q 2006	4Q 2005	% Change
Noninterest Income	$1,332	$1,273	4.6%
Net Interest Income	488	492	(0.8)
Total Revenue	1,820	1,765	3.1
Total Expense	1,178	1,148	2.6
Operating Leverage			0.5%

FORWARD-LOOKING STATEMENTS AND RISK FACTORS THAT COULD AFFECT FUTURE RESULTS

Much of the information in this document is forward-looking. This includes all statements about the Company's earnings and revenue outlook, projected business growth, the expected outcome of legal, regulatory and investigatory proceedings, predicted loan losses, and the Company's plans, objectives and strategies. Forward-looking statements represent the Company's current estimates or expectations of future events or results.

The Company, or its executive officers and directors on its behalf, may make additional forward-looking statements from time to time. When used in this report, any press release or any such oral statement, words such as "estimate, ""forecast," "project," "anticipate," "confident," "target," "expect," "intend," "think," "continue," "seek," "believe," "plan," "goal," "could," "should," "may," "will," "strategy," and words of similar meaning, signify forward-looking statements.

Forward-looking statements are based on management's current expectations and assumptions and are subject to risks and uncertainties, some of which are discussed herein, that could cause actual results to differ materially from projected results. Forward-looking statements could be affected by a number of factors, some of which by their nature are dynamic and subject to rapid and possibly abrupt changes that the Company is necessarily unable to predict accurately, including the Risk Factors set forth in the Company's Annual Report on Form 10-K for the year ended December 31, 2005 and the additional risk factors set forth below.

This is not an exhaustive list of the risks the Company faces. For a further discussion of other factors affecting the Company's businesses, see "Forward-Looking Statements and Risk Factors That Could Affect Future Results" in Part I, Item 1A of the Company's 2005 Annual Report on Form 10-K.

Forward-looking statements speak only as of the date they are made. The Company will not update forward-looking statements to reflect new facts, changes in assumptions or circumstances, or subsequent events.

In addition to the Risk Factors set forth in the Company's Annual Report on Form 10-K for the year ended December 31, 2005, the following risk factors should be considered before making an investment in the Company's securities:

The Company may not be able to complete its acquisition of the JPMorgan Chase Corporate Trust Business and its divestiture of its retail banking and middle market businesses in a timely manner or at all.

As discussed above, the Company recently announced its planned acquisition of the JPMorgan Chase Corporate Trust Business (the "JPMorgan Business") and divestiture of its retail and middle market banking businesses to JPMorgan Chase. If obtaining the required regulatory approvals or satisfying the other closing conditions for these transactions takes longer than expected, the closing of the transactions may not occur in a timely manner or at all. A delayed closing could adversely affect its efforts to integrate the JPMorgan Business successfully. If the Company is unable to close the transactions, the Company will have diverted resources away from pursuits that could ultimately have proved to be more beneficial to its business.

The Company may not realize the expected financial benefits from the acquisition of the JPMorgan Business if the Company fails to integrate the JPMorgan Chase Business successfully or if the JPMorgan Business does not perform as well as the Company expects.

Achieving the expected benefits of this acquisition will require the

Company to retain a substantial portion of the JPMorgan Business's current client base, to increase the revenue growth rate of the JPMorgan Business and to retain key employees of the JPMorgan Business. The scale, scope and nature

of the integration and client retention efforts required as a result of the acquisition present a significant challenge to the Company. The Company may not be able to integrate the JPMorgan Business on the expected schedule, realize the anticipated cost savings and economies of scale, or retain a significant number of clients of the JPMorgan Business, any of which could cause the Company not to realize expected benefits from the acquisition. The Company will also seek to move the records of some existing corporate trust clients to the JPMorgan Chase technology platform, which the Company is also acquiring. The integration of the JPMorgan Business, including moving client records, could take longer than planned and be subject to unanticipated difficulties and expenses. It is possible that the transition of the JPMorgan Business could adversely affect the Company's ability to maintain relationships with clients and that some JPMorgan Business clients will elect other service providers. The Company could experience client attrition or revenue loss in the JPMorgan Business in excess of its expectations. The integration process could also result in the loss of key JPMorgan Business employees.

If the Company is unable to integrate the JPMorgan Business successfully, then the Company may fail to realize the anticipated synergies and growth opportunities or achieve the cost savings and revenue growth the Company expects from the acquisition. Furthermore, the integration of the JPMorgan Business will require a significant commitment of time and resources by the Company's management and other personnel, which could adversely affect its ability to service and retain its existing corporate trust clients and could divert the attention of management from its other businesses.

Government Monetary Policies

The Federal Reserve Board has the primary responsibility for United States monetary policy. Its actions have an important influence on the demand for credit and investments and the level of interest rates, and thus on the earnings of the Company.

Competition

The businesses in which the Company operates are very competitive. Competition is provided by both unregulated and regulated financial services organizations, whose products and services span the local, national, and global markets in which the Company conducts operations.

A wide variety of domestic and foreign companies compete for processing services. For securities servicing and global payment services, international, national, and regional commercial banks, trust banks, investment banks, specialized processing companies, outsourcing companies, data processing companies, stock exchanges, and other business firms offer active competition. In the private banking and asset management markets, international, national, and regional commercial banks, standalone asset management companies, mutual funds, securities brokerage firms, insurance companies, investment counseling firms, and other business firms and individuals actively compete for business. Commercial banks, savings banks, savings and loan associations, and credit

unions actively compete for deposits, and money market funds and brokerage houses offer deposit-like services. These institutions, as well as consumer and commercial finance companies, national retail chains, factors, insurance companies and pension trusts, are important competitors for various types of loans. Issuers of commercial paper compete actively for funds and reduce demand for bank loans.

WEBSITE INFORMATION

The Company makes available on its website, www.bankofny.com:

* All of its SEC filings, including annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to these reports, SEC Forms 3, 4 and 5 and its proxy statement as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC;
* Its earnings releases and management conference calls and presentations; and
* Its corporate governance guidelines and the charters of the Audit and Examining, Compensation and Organization, and Nominating and Governance Committees of its Board of Directors.

The corporate governance guidelines and committee charters are available in print to any shareholder who requests them. Requests should be sent to The Bank of New York Company, Inc., Corporate Communications, One Wall Street, NY, NY 10286.

THE BANK OF NEW YORK COMPANY, INC.
Notes to Consolidated Financial Statements

1. General

The accounting and reporting policies of The Bank of New York Company, Inc., a financial holding company, and its consolidated subsidiaries (the "Company") conform with generally accepted accounting principles and general practice within the banking industry. Such policies are consistent with those applied in the preparation of the Company's annual financial statements.

The accompanying consolidated financial statements are unaudited. In the opinion of management, all adjustments necessary for a fair presentation of financial position, results of operations and cash flows for the interim periods have been made.

2. Accounting Changes and New Accounting Pronouncements

The Company adopted SFAS No. 123 ("SFAS 123"), "Accounting for Stock-Based Compensation," in 1995. At that time, as permitted by the standard, the Company elected to continue to apply the provisions of Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees," and accounted for the options granted to employees using the intrinsic value method, under which no expense is recognized for stock options because they were granted at the stock price on the grant date and therefore have no intrinsic value.

On January 1, 2003, the Company adopted the fair value method of

accounting for its options under SFAS 123 as amended by SFAS No. 148 ("SFAS 148"), "Accounting for Stock-Based Compensation-Transition and Disclosure." SFAS 148 permits three different methods of adopting fair value: (1) the prospective method, (2) the modified prospective method, and (3) the retroactive restatement method. Under the prospective method, options issued after January 1, 2003 are expensed while all options granted prior to January 1, 2003 are accounted for under APB 25 using the intrinsic value method. Consistent with industry practice, the Company elected the prospective method of adopting fair value accounting.

During the three months ended March 31, 2006, approximately 6 million options were granted. In the first quarter of 2006, the Company recorded $10 million of stock option expense.

The retroactive restatement method requires the Company's financial statements to be restated as if fair value accounting had been adopted in 1995. The following table discloses the pro forma effects on the Company's net income and earnings per share as if the retroactive restatement method had been adopted.

(Dollars in millions, except per share amounts)	1st Quarter 2006	1st Quarter 2005
Reported net income	$ 422	$ 379
Stock based employee compensation costs, using prospective method, net of tax	6	6
Stock based employee compensation costs, using retroactive restatement method, net of tax	(6)	(13)
Pro forma net income	$ 422	$ 372
Reported diluted earnings per share	$ 0.55	$ 0.49
Impact on diluted earnings per share	-	(0.01)
Pro forma diluted earnings per share	$ 0.55	$ 0.48

The fair value of options granted in 2006 and 2005 were estimated at the grant date using the following weighted average assumptions:

	1st Quarter 2006	1st Quarter 2005
Dividend Yield	2.44%	2.77%
Expected Volatility	21.94	25.05
Risk Free Interest Rates	4.66	4.15
Expected Options Lives	5	5

In December 2004, the FASB issued FASB Statement No. 123 (revised 2004) ("SFAS 123(R)"), "Share-Based Payment," which is a revision of FASB Statement No. 123, "Accounting for Stock-Based Compensation." FASB 123(R) eliminates the ability to account for share-based compensation transactions using Accounting Principles Board Opinion No. 25 and requires that such transactions be accounted for using a fair value-based method. Statement 123(R) covers a wide range of share-based compensation arrangements including share options, restricted share plans, performance-based awards, share appreciation rights, and employee share purchase plans. The Company adopted SFAS 123(R) on January

1, 2006 using the "modified prospective" method. Under this method, compensation cost is recognized beginning with the effective date (a) based on the requirements of Statement 123(R) for all share-based payments granted after the effective date and (b) based on the requirements of Statement 123 for all awards granted to employees prior to the effective date of SFAS 123(R) that remain unvested on the effective date.

The Company adopted the fair value method of accounting for stock-based compensation prospectively as of January 1, 2003. As of January 1, 2006, the Company was amortizing all of its unvested stock option grants.

Certain of the Company's stock compensation grants vest when the employee retires. SFAS 123(R) will require the completion of expensing of new grants with this feature by the first date the employee is eligible to retire. For grants prior to January 1, 2006, the Company will continue to expense them over their stated vesting period. The Company expects the adoption of FAS 123(R) to increase pre-tax expense in 2006 by $3 million due to the vesting on retirement feature.

In June 2005, the FASB ratified the consensus in EITF Issue No. 04-5("EITF 04-5"), "Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights", which provides guidance in determining whether a general partner controls a limited partnership. The adoption of EITF 04-5 did not have a significant impact on the Company's financial condition or results of operation.

In July 2005, the FASB issued an Exposure Draft of a proposed Interpretation, "Accounting for Uncertain Tax Positions." The proposed Interpretation clarifies the accounting for uncertain tax positions in accordance with FASB Statement No. 109, "Accounting for Income Taxes." The proposed Interpretation requires that a tax position meet a "probable recognition threshold" for the benefit of the uncertain tax position to be recognized in the financial statements. A tax position that fails to meet the probable recognition threshold will result in either reduction of current or deferred tax asset or receivable, or recording a current or deferred tax liability. The proposed Interpretation also provides guidance on measurement, derecognition of tax benefits, classification, interim period accounting disclosure, and transition requirements in accounting for uncertain tax positions. A final standard is expected to be issued in 2006. The Company is assessing the impact of adopting the new pronouncement and is currently unable to estimate its impact on the Company's consolidated financial statements.

In July 2005, the FASB issued an exposure draft, FSP FAS 13-a, "Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Generated by a Leverage Lease Transaction," revising the accounting guidance under SFAS No. 13 ("SFAS 13"), "Accounting for Leases," for leveraged leases.

The exposure draft modifies existing interpretations of SFAS 13 and associated industry practice. As a result, when the revised FSP becomes effective, the Company expects to recognize a material one-time after-tax charge to earnings or capital of $340 to $385 million related to a change in the timing of its lease cash flows due to the LILO settlement. See Note "Commitments and Contingencies". However, an amount approximating this one-time charge would be taken into income over the remaining term of the affected leases.

In February 2006, the FASB issued FASB Statement No. 155 ("SFAS 155"), "Accounting for Certain Hybrid Financial Instruments", an amendment of SFAS 140 and SFAS 133. SFAS 155 permits the Company to elect to measure any hybrid

financial instrument at fair value if the hybrid instrument contains an embedded derivative that otherwise would require bifurcation and be accounted for separately under SFAS 133. This statement clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS 133 and that concentrations of credit risk in the form of subordination are not embedded derivatives. SFAS 155 is effective for all financial instruments acquired, issued, or subject to a remeasurement event after December 31, 2006. The Company does not expect the adoption of the standard will have a significant impact on its financial conditions or results of operations.

Certain other prior year information has been reclassified to conform its presentation with the 2006 financial statements.

3. Acquisitions and Dispositions

The Company continues to be an active acquirer of securities servicing and asset management businesses.

In the first quarter of 2006, two businesses were acquired for a total cost of $323 million, primarily paid in cash. The Company frequently structures its acquisitions with both an initial payment and a later contingent payment tied to post-closing revenue or income growth. The Company records the fair value of contingent payments as an additional cost of the entity acquired in the period that the payment becomes probable.

Goodwill related to acquisitions in the first quarter of 2006 was $212 million. The tax-deductible portion of goodwill related to acquisitions in the first quarter of 2006 was $73 million. At March 31, 2006, the Company was liable for potential contingent payments related to acquisitions in the amount of $323 million. During the first quarter of 2006, the Company paid or accrued $17 million for contingent payments related to acquisitions made in prior years.

2006

On January 3, 2006, the Company acquired Alcentra, an international asset management group focused on managing funds that invest in non-investment grade debt. Alcentra's management team will retain a 20 percent interest. Alcentra has operations in London and Los Angeles and currently manages 15 different investment funds with over $6.2 billion of assets.

On March 2, 2006, the Company acquired Urdang, a real estate investment management firm that manages approximately $3.0 billion in direct investments and portfolios of REIT securities.

On April 8, 2006, the Company announced a definitive agreement to sell its retail and regional middle market businesses to JPMorgan Chase for $3.1 billion with a premium of $2.3 billion. JPMorgan Chase will sell its corporate trust business to the Company for $2.8 billion with a premium of $2.15 billion. The difference in premiums results in a net cash payment of $150 million to the Company. There is also a contingent payment of up to $50 million to the Company tied to customer retention. For further details, see "Other Developments."

55

4. Goodwill and Intangibles

Goodwill by reportable segment is as follows:

(In millions)	March 31, 2006	December 31, 2005
Institutional Services	$ 3,138	$ 3,121
Private Bank & BNY Asset Management	601	389
Retail & Middle Market Banking	109	109
Corporate & Other	-	-
Consolidated Total	$ 3,848	$ 3,619

The Company's reporting units are tested annually for goodwill impairment.

Intangible Assets

(Dollars in millions)	March 31, 2006 Gross Carrying Amount	March 31, 2006 Accumulated Amortization	March 31, 2006 Net Carrying Amount	March 31, 2006 Weighted Average Amortization Period in Years	December 31, 2005 Gross Carrying Amount	December 31, 2005 Accumulated Amortization	December 31, 2005 Net Carry[ing] Amou[nt]
Trade Names	$ 378	$ -	$ 378	Indefinite Life	$ 370	$ -	$
Customer Relationships	624	(111)	513	15	531	(99)	
Other Intangible Assets	25	(20)	5	6	28	(19)	

The aggregate amortization expense of intangibles was $13 million and $8 million for the quarters ended March 31, 2006 and 2005, respectively. Estimated amortization expense for the next five years is as follows:

(In millions)	For the Year Ended December 31,	Amortization Expense
	2006	$56
	2007	53
	2008	52
	2009	50
	2010	48

5. Allowance for Credit Losses

The allowance for credit losses is maintained at a level that, in management's judgment, is adequate to absorb probable losses associated with specifically identified loans, as well as estimated probable credit losses inherent in the remainder of the loan portfolio at the balance sheet date. Management's judgment includes the following factors, among others: risks of individual credits; past experience; the volume, composition, and growth of the loan portfolio; and economic conditions.

The Company conducts a quarterly portfolio review to determine the adequacy of its allowance for credit losses. All commercial loans over $1 million are assigned to specific risk categories. Smaller commercial and consumer loans are evaluated on a pooled basis and assigned to specific risk categories. Following this review, senior management of the Company analyzes

the results and determines the allowance for credit losses. The Risk Committee of the Company's Board of Directors reviews the allowance at the end of each quarter.

The portion of the allowance for credit losses allocated to impaired loans (nonaccrual commercial loans over $1 million) is measured by the difference

between their recorded value and fair value. Fair value is the present value of the expected future cash flows from borrowers, the market value of the loan, or the fair value of the collateral.

Commercial loans are placed on nonaccrual status when collateral is insufficient and principal or interest is past due 90 days or more, or when there is reasonable doubt that interest or principal will be collected. Accrued interest is usually reversed when a loan is placed on nonaccrual status. Interest payments received on nonaccrual loans may be recognized as income or applied to principal depending upon management's judgment. Nonaccrual loans are restored to accrual status when principal and interest are current or they become fully collateralized. Consumer loans are not classified as nonperforming assets, but are charged off and interest accrued is suspended based upon an established delinquency schedule determined by product. Real estate acquired in satisfaction of loans is carried in other assets at the lower of the recorded investment in the property or fair value minus estimated costs to sell.

Transactions in the allowance for credit losses are summarized as follows:

(In millions)	Three Months Ended March 31, 2006		
	Allowance for Loan Losses	Allowance for Lending-Related Commitments	Allowance for Credit Losses
Balance, Beginning of Period	$ 411	$ 154	$ 565
Charge-Offs	(14)	-	(14)
Recoveries	10	-	10
Net Charge-Offs	(4)	-	(4)
Provision	12	(7)	5
Balance, End of Period	$ 419	$ 147	$ 566

	Three Months Ended March 31, 2005		
	Allowance for Loan Losses	Allowance for Lending-Related Commitments	Allowance for Credit Losses
Balance, Beginning of Period	$ 591	$ 145	$ 736
Charge-Offs	(11)	-	(11)
Recoveries	1	-	1
Net Charge-Offs	(10)	-	(10)
Provision	2	(12)	(10)
Balance, End of Period	$ 583	$ 133	$ 716

6. Capital Transactions

The Company has 5 million authorized shares of Class A preferred stock having a par value of $2.00 per share. At March 31, 2006 and December 31, 2005, 3,000 shares were outstanding.

In addition to the Class A preferred stock, the Company has 5 million authorized shares of preferred stock having no par value, with no shares outstanding at March 31, 2006 and December 31, 2005, respectively.

57

7. Earnings Per Share

The following table illustrates the computations of basic and diluted earnings per share:

(Dollars in millions, except per share amounts)	Three Months Ended March 31,	
	2006	2005
Net Income (1)	$ 422	$ 379
Basic Weighted Average Shares Outstanding	764	771
Shares Issuable upon Conversion of Employee Stock Options	10	8
Diluted Weighted Average Shares Outstanding	774	779
Basic Earnings Per Share:	$ 0.55	$ 0.49
Diluted Earnings Per Share:	0.55	0.49

(1) Net Income, net income available to common shareholders and diluted net income are the same for all periods presented.

8. Employee Benefit Plans

The components of net periodic benefit cost are as follows:

	Pension Benefits				Healthcare Benefits	
	Three Months Ended March 31,				Three Months Ended March 31,	
	Domestic		Foreign		Domestic	
(In millions)	2006	2005	2006	2005	2006	2005
Net Periodic Cost (Income)						
Service Cost	$ 12	$ 16	$ 2	$ 2	$ -	$ -
Interest Cost	13	14	3	2	2	2
Expected Return on Assets	(25)	(30)	(3)	(3)	(1)	(1)
Other	9	4	1	1	3	2
Net Periodic Cost (Income)	$ 9	$ 4	$ 3	$ 2	$ 4	$ 3

9. Income Taxes

The statutory federal income tax rate is reconciled to the Company's effective income tax rate below:

	Three Months Ended March 31, 2006	2005
Federal Rate	35.0%	35.0%
State and Local Income Taxes, Net of Federal Income Tax Benefit	2.8	3.7
Nondeductible Expenses	0.1	0.2
Credit for Synthetic Fuel Investments	(0.9)	(2.3)
Credit for Low-Income Housing Investments	(1.6)	(2.0)
Tax-Exempt Income From Municipal Securities	(0.1)	(0.2)
Other Tax-Exempt Income	(1.0)	(1.1)
Foreign Operations	(0.8)	(0.2)
Other - Net	0.2	-
Effective Rate	33.7%	33.1%

10. Commitments and Contingent Liabilities

In the normal course of business, various commitments and contingent liabilities are outstanding which are not reflected in the accompanying consolidated balance sheets. Management does not expect any material losses to result from these matters.

The Company's significant trading and off-balance-sheet risks are securities, foreign currency and interest rate risk management products, commercial lending commitments, letters of credit, and securities lending indemnifications. The Company assumes these risks to reduce interest rate and foreign currency risks, to provide customers with the ability to meet credit and liquidity needs, to hedge foreign currency and interest rate risks, and to trade for its own account. These items involve, to varying degrees, credit, foreign exchange, and interest rate risk not recognized in the balance sheet. The Company's off-balance-sheet risks are managed and monitored in manners similar to those used for on-balance-sheet risks. There are no significant industry concentrations of such risks.

A summary of the notional amount of the Company's off-balance-sheet credit transactions, net of participations, at March 31, 2006 and December 31, 2005 follows:

Off-Balance-Sheet Credit Risks

(In millions)	March 31, 2006	December 31, 2005
Lending Commitments	$ 38,612	$ 36,954
Standby Letters of Credit	10,622	10,383
Commercial Letters of Credit	1,108	1,189
Securities Lending Indemnifications	352,380	310,970

The total potential loss on undrawn commitments, standby and commercial letters of credit, and securities lending indemnifications is equal to the total notional amount if drawn upon, which does not consider the value of any collateral. Since many of the commitments are expected to expire without being drawn upon, the total amount does not necessarily represent future cash requirements. The allowance for lending-related commitments at March 31, 2006 and December 31, 2005 was $147 million and $154 million.

A securities lending transaction is a fully collateralized transaction in which the owner of a security agrees to lend the security through an agent (the

59

Company) to a borrower, usually a broker/dealer or bank, on an open, overnight or term basis, under the terms of a prearranged contract, which generally matures in less than 90 days. The Company generally lends securities with indemnification against broker default. The Company generally requires the borrower to provide 102% cash collateral which is monitored on a daily basis, thus reducing credit risk. Security lending transactions are generally entered into only with highly-rated counterparties. At March 31, 2006 and December 31, 2005, securities lending indemnifications were secured by collateral of $360.4 billion and $317.4 billion, respectively.

Standby letters of credit principally support corporate obligations and include $0.9 billion that were collateralized with cash and securities on March 31, 2006 and December 31, 2005. At March 31, 2006, approximately $7.0 billion of the standbys will expire within one year, and the balance between one to five years.

The notional amounts for other off-balance-sheet risks (See "Trading Activities" in the MD&A section) express the dollar volume of the transactions; however, credit risk is much smaller. The Company performs credit reviews and enters into netting agreements to minimize the credit risk of foreign currency and interest rate risk management products. The Company enters into offsetting positions to reduce exposure to foreign exchange and interest rate risk.

Other

The Company has provided standard representations for underwriting agreements, acquisition and divestiture agreements, sales of loans and commitments, and other similar types of arrangements and customary indemnification for claims and legal proceedings related to its provision of financial services. Insurance has been purchased to mitigate certain of these risks. The Company is a minority equity investor in, and member of, several industry clearing or settlement exchanges through which foreign exchange, securities or other transactions settle. Certain of these industry clearing or settlement exchanges require their members to guarantee their obligations and liabilities or to provide financial support in the event other partners do not honor their obligations. It is not possible to estimate a maximum potential amount of payments that could be required with such agreements.

In the ordinary course of business, the Company makes certain investments that have tax consequences. From time to time, the IRS may question or challenge the tax position taken by the Company. The Company engaged in certain types of structured cross-border leveraged leasing investments, referred to as "LILOs", prior to mid-1999 that the IRS has challenged. In 2004, the IRS proposed adjustments to the Company's tax treatment of these transactions. As previously disclosed, beginning in the fourth quarter of 2004, the Company had several appellate conferences with the IRS in an attempt

to settle the proposed adjustments related to these LILO transactions.

On February 28, 2006, the Company settled this matter with the IRS relating to LILO transactions closed in 1996 and 1997. The settlement will not affect first quarter 2006 net income, as the impact of the settlement was fully reserved.

The Company's 1998 leveraged lease transactions are in a subsequent audit cycle and were not part of the settlement. The Company believes that a comparable settlement for 1998 will ultimately be possible, given the similarity between these leases and the settled leases. However, negotiations are not complete and the treatment of the 1998 leases may still be litigated. Under current generally accepted accounting principles, if the 1998 leases are settled on a basis comparable to the 1996 and 1997 leases, the Company would not expect the settlement of the 1998 leases to have an impact on net income, based on existing reserves.

In the fourth quarter of 2005 the Company deposited funds with the IRS in anticipation of reaching a settlement on all of its LILO investments.

60

On February 11, 2005, the IRS released Notice 2005-13, which identified certain lease investments known as "SILOs" as potentially subject to IRS challenge. The Company believes that certain of its lease investments entered into prior to 2004 may be consistent with transactions described in the notice. In response, the Company is reviewing its lease portfolio and evaluating the technical merits of the IRS' position. Although it is likely the IRS will challenge the tax benefits associated with these leases, the Company remains confident that its tax treatment of the leases complied with statutory, administrative and judicial authority existing at the time they were entered into.

The Company currently believes it has adequate tax reserves to cover its LILO exposure and any other potential tax exposures, based on a probability assessment of various potential outcomes. Probabilities and outcomes are reviewed as events unfold, and adjustments to the reserves are made when appropriate.

In the ordinary course of business, the Company and its subsidiaries are routinely defendants in or parties to a number of pending and potential legal actions, including actions brought on behalf of various classes of claimants, and regulatory matters. Claims for significant monetary damages are asserted in certain of these actions and proceedings. Due to the inherent difficulty of predicting the outcome of such matters, the Company cannot ascertain what the eventual outcome of these matters will be; however, based on current knowledge and after consultation with legal counsel, the Company does not believe that judgments or settlements, if any, arising from pending or potential legal actions or regulatory matters, either individually or in the aggregate, after giving effect to applicable reserves, will have a material adverse effect on the consolidated financial position or liquidity of the Company although they could have a material effect on net income for a given period. The Company intends to defend itself vigorously against all of the claims asserted in these legal actions.

See discussion of contingent legal matters in the "Legal and Regulatory Proceedings" section.

QUARTERLY REPORT ON FORM 10-Q
THE BANK OF NEW YORK COMPANY, INC.

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

Quarterly Report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the quarterly period ended March 31, 2006

Commission file number 001-06152

THE BANK OF NEW YORK COMPANY, INC.
Incorporated in the State of New York
I.R.S. Employer Identification No. 13-2614959
Address: One Wall Street
New York, New York 10286
Telephone: (212) 495-1784

As of April 28, 2006, The Bank of New York Company, Inc. had 761,953,149 shares of common stock ($7.50 par value) outstanding.

The Bank of New York Company, Inc. (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months(or such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

The registrant is a large accelerated filer (as defined in Rule 12b-2 of the Exchange Act).

The registrant is not a shell company (as defined in Rule 12b-2 of the Exchange Act).

The following sections of the Financial Review set forth in the cross-reference index are incorporated in the Quarterly Report on Form 10-Q.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company's Disclosure Committee, whose members include the Chief Executive Officer and Chief Financial Officer, has responsibility for ensuring that there is an adequate and effective process for establishing, maintaining, and evaluating disclosure controls and procedures that are designed to ensure that information required to be disclosed by the Company in its SEC reports is timely recorded, processed, summarized and reported. In addition, the Company has established a Code of Conduct designed to provide a statement of the values and ethical standards to which the Company requires its employees and directors to adhere. The Code of Conduct provides the framework for maintaining the highest possible standards of professional conduct. The Company also maintains an ethics hotline for employees.

As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e) and 15d-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

In the ordinary course of business, the Company may routinely modify, upgrade and enhance its internal controls and procedures for financial reporting. However, there have not been any changes in the Company's internal controls over financial reporting as defined in Exchange Act Rule 13a-15(f) and 15d-15(f) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal and Regulatory Proceedings

In the ordinary course of business, the Company and its subsidiaries are routinely defendants in or parties to a number of pending and potential legal actions, including actions brought on behalf of various classes of claimants, and regulatory matters. Claims for significant monetary damages are asserted in certain of these actions and proceedings. In regulatory enforcement matters, claims for disgorgement and the imposition of penalties and/or other remedial sanctions are possible. Due to the inherent difficulty of predicting the outcome of such matters, the Company cannot ascertain what the eventual outcome of these matters will be; however, on the basis of current knowledge and after consultation with legal counsel, the Company does not believe that judgments or settlements, if any, arising from pending or potential legal actions or regulatory matters, either individually or in the aggregate, after giving effect to applicable reserves, will have a material adverse effect on the consolidated financial position or liquidity of the Company, although they could have a material effect on net income for a given period.
The Company intends to defend itself vigorously against all of the claims asserted in these legal actions.

As previously disclosed in the Company's 2005 Annual Report on Form 10-K, the U.S. Securities and Exchange Commission ("SEC") is investigating 1) the appropriateness of certain expenditures made in connection with marketing and distribution of the Hamilton Funds; 2) possible market-timing transactions cleared by Pershing LLC ("Pershing"); and 3) the trading activities of Pershing Trading Company LP, a floor specialist, on two regional exchanges from 1999 to 2004.

Pershing, which the Company acquired from Credit Suisse First Boston (USA), Inc. ("CSFB") in May 2003, is defending a putative class action lawsuit

63

filed against CSFB seeking unspecified damages relating to mutual fund market-timing transactions that were cleared through Pershing's facilities.

Because the conduct at issue in the putative class action and the Pershing market timing and floor specialist investigations is alleged to have occurred largely during the period when Pershing was owned by CSFB, the Company has made claims for indemnification against CSFB relating to these matters under the agreement relating to the acquisition of Pershing. CSFB is disputing these claims for indemnification.

As previously disclosed, the SEC has been investigating two of the Company's issuer services businesses. The Company continues to cooperate with these investigations. One of the investigations has focused primarily on the Company's role as transfer agent on behalf of equity issuers in the United States and the process that the Company's stock transfer division used to search for lost security holders of its issuer clients. On April 24, 2006, a settlement with the SEC was announced resolving this matter. The settlement includes, among other things: (i) a cease and desist order against the Bank for violations of certain securities laws; (ii) the Bank's agreement to offer payment to certain security holders for property escheated erroneously (while reserving the right to pursue their claim for repayment with the state to which the property was escheated) and a penalty of $250,000; and (iii) the Bank's retention of an independent consultant to review and evaluate certain of the Bank's policies and procedures. The Company believes the settlement will have no adverse effect on its transfer agent business. The other SEC investigation has focused on the Company's role as auction agent in connection with certain auction rate securities. The Company has entered into settlement negotiations with the SEC staff concerning the auction agent investigation. There can be no assurance that a settlement will be reached.

As disclosed in a report filed on Form 8-K, the Company entered into a written agreement with the Federal Reserve Bank of New York and the New York State Banking Department on April 21, 2006. The agreement outlines a series of steps to strengthen and enhance the Bank's compliance practices, systems, controls, and procedures.

Item 1A. Risk Factors

See "Forward-Looking Statements and Risk Factors That Could Affect Future Results" in "Management's Discussion and Analysis of Financial Condition and Results of Operations."

64

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

----

Shares of the Company's common stock were issued in the following transactions exempt from registration under the Securities Act of 1933 pursuant to Section 4(2) thereof:

(a) Shares of common stock were issued to former directors who had deferred receipt of such common stock pursuant to the Deferred Compensation Plan for Non-Employee Directors of The Bank of New York Company, Inc. These issuances amounted to 4,963 shares on February 6, 2006 and 2,521 shares on February 23, 2006.

Under its stock repurchase program, the Company buys back shares from time to time. The following table discloses the Company's repurchases of the Company's common stock made during the first quarter of 2006.

Issuer Purchases of Equity Securities

Period		Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May be Repurchased Under the Plans or Programs
January	1-31	565,997	$ 31.61(1)	565,997	18,435,283
February	1-28	1,606,456	34.22	1,606,456	16,828,827
March	1-31	254,709	34.27	254,709	16,574,118
Total		2,427,162		2,427,162	

(1) Based on initial price.

All shares were repurchased through the Company's stock repurchase programs announced on July 12, 2005, which permits the repurchase of 20 million shares. The shares repurchased in January primarily resulted from open market purchases, while 1.5 million shares were repurchased in February at an initial price of $34.31 from a broker-dealer counterparty who borrowed the shares, as part of an accelerated share repurchase program. The initial price is subject to a purchase price adjustment based on the price the counterparty actually pays for the shares. The remaining shares repurchased were from employee benefit plans.

Item 6. Exhibits

3.1 - The By-Laws of The Bank of New York Company, Inc. as amended through April 12, 2005, incorporated by reference to Exhibit 3(ii) to the Company's Quarterly Report on Form 10-Q for the quarter ended March 31, 2005.

3.2 - Restated Certificate of Incorporation of The Bank of New York Company, Inc. dated May 8, 2001, incorporated by reference to Exhibit 4 to the Company's Registration Statement on Form S-3 filed June 7, 2001 (File No. 333-62516, 333-62516-01, 333-62516-02, 333-62516-03 and 333-62516-04).

4 - None of the outstanding instruments defining the rights of holders of

long-term debt of the Company represent long-term debt in excess of 10% of the total assets of the Company. The Company hereby agrees to furnish to the Commission, upon request, a copy of any such instrument.

10- Purchase and Assumption Agreement, dated as of April 7, 2006, by and between The Bank of New York Company, Inc. and JPMorgan Chase & Co., incorporated by reference to Exhibit 99.1 to the Company's Current Report on Form 8-K as filed with the Commission on April 13, 2006.

12- Ratio of Earnings to Fixed Charges for the Three Months Ended March 31, 2006 and 2005.

31- Certification of Chairman and Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.1- Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32- Certification of Chairman and Chief Executive Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

32.1- Certification of Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
