Section 1 - Registrant's Business and Operations  
-----

Item 1.01 Entry into a Material Definitive Agreement

On November 7, 2005, ThermoGenesis Corp. ("TGC") entered into an OEM Supply Agreement (the "Agreement") with Medtronic, Inc. ("MDT"). Under the terms of the Agreement, TGC will supply its Thrombin Processing Device to MDT for use in and sale with the MDT Magellan Product throughout the world. The Agreement has a

Edgar Filing: THERMOGENESIS CORP - Form 8-K

term of five (5) years. TGC's proprietary Thrombin Processing Device is a stand-alone disposable which produces autologous thrombin from plasma which is used for topical hemostasis and releasing growth factors from platelets (platelet gel). MDT's Magellan Product is used for the production of platelet gel by combining the concentrated platelets produced with a separate thrombin source to create a platelet gel used to accelerate wound healing in surgical applications.

The agreement furthers TGC's strategy to develop strategic relationships with established companies that have the ability to expand the distribution channels for its products and for product line extensions.

For more information, see the Agreement attached as Exhibit 10 and the Press Release attached as Exhibit 99.1.

Section 9 - Financial Statements and Exhibits

Item 9.01 Financial Statements and Exhibits.
