Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of

Arch Capital Group Ltd.:

We have reviewed the accompanying consolidated balance sheet of Arch Capital Group Ltd. and its subsidiaries (the Company) as of March 31, 2010, and the related consolidated statements of income, changes in shareholders' equity and comprehensive income for each of the three-month periods ended March 31, 2010 and March 31, 2009 and the consolidated statements of cash flows for the three month periods ended March 31, 2010 and March 31, 2009. These interim financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of December 31, 2009, and the related consolidated statements of income, changes in shareholders' equity, comprehensive income, and of cash flows for the year then ended (not presented herein), and in our report dated February 26, 2010, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet information as of March 31, 2010, is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. General

Arch Capital Group Ltd. (ACGL) is a Bermuda public limited liability company which provides insurance and reinsurance on a worldwide basis through its wholly owned subsidiaries.

The interim consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) and include the accounts of ACGL and its wholly owned subsidiaries (together with ACGL, the Company). All significant intercompany transactions and balances have been eliminated in consolidation. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and assumptions. In the opinion of management, the accompanying unaudited interim consolidated financial statements reflect all adjustments (consisting of normally recurring accruals) necessary for a fair statement of results on an interim basis. The results of any interim period are not necessarily indicative of the results for a full year or any future periods.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted; however, management believes that the disclosures are adequate to make the information presented not misleading. This report should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2009, including the Company's audited consolidated financial statements and related notes and the section entitled Risk Factors.

The Company has reclassified the presentation of certain prior year information to conform to the current presentation. Such reclassifications had no effect on the Company's net income, shareholders' equity or cash flows. Tabular amounts are in U.S. Dollars in thousands, except share amounts, unless otherwise noted.

2. Recent Accounting Pronouncements

In March 2010, the Financial Accounting Standards Board (FASB) issued an Accounting Standards Update (ASU) that clarifies the type of embedded credit derivative that is exempt from embedded derivative bifurcation requirements. Only one form of embedded credit derivative qualifies for the exemption one that is related only to the subordination of one financial instrument to another. As a result, entities that have contracts containing an embedded credit derivative feature in a form other than such subordination may need to separately account for the embedded credit derivative feature. This ASU is effective at the beginning of the first fiscal quarter beginning after June 15, 2010. The Company does not expect the adoption of this ASU to have a material effect on the Company's consolidated financial position or results of operations.

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

In February 2010, the FASB issued an ASU, which defers the effective date of certain amendments to recent consolidation requirements concerning variable interest entities (VIEs) relating to a reporting entity 's interest in certain types of entities (primarily investment funds) and clarifies other aspects of the amendments. As a result of the deferral, a reporting entity will not be required to apply the consolidation requirements to its interest in an entity that meets the criteria to qualify for the deferral. This ASU also clarifies how a related party 's interests in an entity should be considered when evaluating the criteria for determining whether a decision maker or service provider fee represents a variable interest. In addition, the ASU also clarifies that a quantitative calculation should not be the sole basis for evaluating whether a decision maker 's or service provider 's fee is a variable interest. The Company adopted the amended guidance on January 1, 2010, and its adoption did not have a material impact on the Company 's consolidated financial position or results of operations.

Table of Contents

ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

In January 2010, the FASB issued an ASU to improve disclosure requirements related to fair value measurements. The ASU requires more robust disclosures about (i) different classes of assets and liabilities measured at fair value, (ii) the valuation techniques and inputs to fair value measurements for both Levels 2 and 3, (iii) the activity within Level 3 fair value measurements (*i.e.*, in the reconciliation for fair value measurements using significant unobservable inputs activity should be presented on a gross basis), and (iv) the transfers between Levels 1, 2 and 3, (*i.e.*, include the reasons for significant transfers in and out of Levels 1 and 2).The ASU is effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward activity in Level 3 fair value measurements, which will become effective for fiscal years beginning after December 15, 2010. Accordingly, the Company adopted the appropriate disclosure provisions of the ASU on January 1, 2010.

In June 2009, the FASB issued amendments to the guidance regarding the consolidation of VIEs, which affect all entities currently within the scope of the December 2003 revised version of the guidance, as well as qualifying special-purpose entities that are currently excluded from the scope of the guidance. The amendments require an analysis to determine whether a variable interest gives a company a controlling financial interest in a VIE. In addition, they require an ongoing reassessment of all VIEs and eliminate the quantitative approach previously required for determining whether a company is the primary beneficiary. The Company adopted the amended guidance on January 1, 2010, and its adoption did not have a material impact on the Company's consolidated financial position or results of operations.

In June 2009, the FASB issued an amendment to the guidance regarding accounting for transfers of financial assets. This amendment removes the concept of a qualifying special-purpose entity from the guidance regarding the accounting for transfers and servicing of financial assets and extinguishment of liabilities, and removes the exception from applying to the consolidation of VIEs. This amendment also clarifies the requirements for isolation and limitations on portions of financial assets that are eligible for sale accounting and enhances disclosures about transfers of financial assets and a transferor's continuing involvement with transferred financial assets. This amendment is effective prospectively to transfers of financial assets occurring in fiscal years beginning after November 15, 2009. The Company adopted this amendment on January 1, 2010 and its adoption did not have a material impact on the Company's consolidated financial position or results of operations.

ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

3. Share Transactions

Share Repurchases

The board of directors of ACGL has authorized the investment of up to \$2.5 billion in ACGL's common shares through a share repurchase program, consisting of a \$1.0 billion authorization in February 2007, a \$500 million authorization in May 2008, and a \$1.0 billion authorization in November 2009. Repurchases under the program may be effected from time to time in open market or privately negotiated transactions through December 2011. Since the inception of the share repurchase program, ACGL has repurchased approximately 24.5 million common shares for an aggregate purchase price of \$1.69 billion. During the 2010 first quarter, ACGL repurchased 2.5 million common shares for an aggregate purchase price of \$181.3 million, compared to a de minimis number of shares and aggregate purchase price of \$1.6 million during the 2009 period.

At March 31, 2010, approximately \$810.1 million of share repurchases were available under the program. The timing and amount of the repurchase transactions under this program will depend on a variety of factors, including market conditions and corporate and regulatory considerations. In connection with the share repurchase program, the Warburg Pincus funds waived their rights relating to share repurchases under its shareholders agreement with ACGL for all repurchases of common shares by ACGL under the share repurchase program in open market transactions and certain privately negotiated transactions.

Non-Cumulative Preferred Shares

ACGL's outstanding non-cumulative preferred shares consist of \$200.0 million principal amount of 8.0% series A non-cumulative preferred shares (Series A Preferred Shares) and \$125.0 million principal amount of 7.875% series B non-cumulative preferred shares (Series B Preferred Shares) and together with the Series A Preferred Shares, the Preferred Shares). ACGL has the right to redeem all or a portion of each series of Preferred Shares at a redemption price of \$25.00 per share on or after (1) February 1, 2011 for the Series A Preferred Shares and (2) May 15, 2011 for the Series B Preferred Shares. Dividends on the Preferred Shares are non-cumulative. Consequently, in the event dividends are not declared on the Preferred Shares for any dividend period, holders of Preferred Shares will not be entitled to receive a dividend for such period, and such undeclared dividend will not accrue and will not be payable. Holders of Preferred Shares will be entitled to receive dividend payments only when, as and if declared by ACGL's board of directors or a duly authorized committee of the board of directors. Any such dividends will be payable from the date of original issue on a non-cumulative basis, quarterly in arrears. To the extent declared, these dividends will accumulate, with respect to each dividend period, in an amount per share equal to 8.0% of the \$25.00 liquidation preference per annum for the Series A Preferred Shares and 7.875% of the \$25.00 liquidation preference per annum for the Series B Preferred Shares. During the 2010 and 2009 first quarters, the Company paid \$6.5 million to holders of the Preferred Shares. At March 31, 2010, the Company had declared an aggregate of \$3.3 million of dividends to be paid to holders of the Preferred Shares.

4. Debt and Financing Arrangements

Senior Notes

On May 4, 2004, ACGL completed a public offering of \$300 million principal amount of 7.35% senior notes (Senior Notes) due May 1, 2034 and received net proceeds of \$296.4 million. ACGL used \$200 million of the net proceeds to repay all amounts outstanding under a revolving credit agreement. The Senior Notes are ACGL's senior unsecured obligations and rank equally with all of its existing and future senior unsecured indebtedness. Interest payments on the Senior Notes are due on May 1st and November 1st of each year. ACGL may redeem the Senior Notes at any time and from time to time, in whole or in part, at a make-whole redemption price. For the 2010 and 2009 first quarters, interest expense on the Senior Notes was \$5.5 million. The market value of the Senior Notes at March 31, 2010 and December 31, 2009 was \$300.8 million and \$298.6 million, respectively.

Letter of Credit and Revolving Credit Facilities

As of March 31, 2010, the Company had a \$300 million unsecured revolving loan and letter of credit facility and a \$1.0 billion secured letter of credit facility (the Credit Agreement). Under the terms of the agreement, Arch Reinsurance Company (Arch Re U.S.) is limited to issuing \$100 million of unsecured letters of credit as part of the \$300 million unsecured revolving loan. Borrowings of revolving loans may be made by ACGL and Arch Re U.S. at a variable rate based on LIBOR or an alternative base rate at the option of the Company. Secured letters of credit are available for issuance on behalf of the Company's insurance and reinsurance subsidiaries. The Credit Agreement and related documents are structured such that each party that requests a letter of credit or borrowing does so only for itself and for only its own obligations. Issuance of letters of credit and borrowings under the Credit Agreement are subject to the Company's compliance with certain covenants and conditions, including absence of a material adverse change. These covenants require, among other things, that the Company maintain a debt to total capital ratio of not greater than 0.35 to 1 and shareholders' equity in excess of \$1.95 billion plus 25% of future aggregate net income for each quarterly period (not including any future net losses) beginning after June 30, 2006 and 25% of future aggregate proceeds from the issuance of common or preferred equity and that the Company's principal insurance and reinsurance subsidiaries maintain at least a B++ rating from A.M. Best. In addition, certain of the Company's subsidiaries which are party to the Credit Agreement are required to maintain minimum shareholders' equity levels. The Company was in compliance with all covenants contained in the Credit Agreement at March 31, 2010. The Credit Agreement expires on August 30, 2011.

Including the secured letter of credit portion of the Credit Agreement, the Company has access to letter of credit facilities for up to a total of \$1.45 billion. Arch Reinsurance Ltd. (Arch Re Bermuda) also has access to other letter of credit facilities, some of which are available on a limited basis and for limited purposes (together with the secured portion of the Credit Agreement and these letter of credit facilities, the LOC Facilities). The principal purpose of the LOC Facilities is to issue, as required, evergreen standby letters of credit in favor of primary insurance or reinsurance counterparties with which the Company has entered into reinsurance arrangements to ensure that such counterparties are permitted to take credit for reinsurance obtained from the Company's reinsurance subsidiaries in United States jurisdictions where such subsidiaries are not licensed or otherwise admitted as an insurer, as required under insurance regulations in the United States, and to comply with requirements of Lloyd's of London in connection with qualifying quota share and other arrangements. The amount of letters of credit issued is driven by, among other things, the timing and payment of catastrophe losses, loss development of existing reserves, the payment pattern of such

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

reserves, the further expansion of the Company's business and the loss experience of such business. When issued, certain letters of credit are secured by a portion of the Company's investment portfolio. In addition, the LOC Facilities also require the maintenance of certain covenants, which the Company was in compliance with at March 31, 2010. At such date, the

ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Company had \$777.8 million in outstanding letters of credit under the LOC Facilities, which were secured by investments with a market value of \$909.8 million. In May 2008, the Company borrowed \$100.0 million under the Credit Agreement at a Company-selected variable interest rate that is based on 1 month, 3 month or 6 month reset option terms and their corresponding term LIBOR rates plus 27.5 basis points.

TALF Program

The Company participates in the Federal Reserve Bank of New York's (FRBNY) Term Asset-Backed Securities Loan Facility (TALF). TALF provides secured financing for asset-backed securities backed by certain types of consumer and small business loans and for legacy commercial mortgage-backed securities. TALF financing is non-recourse to the Company, except in certain limited instances, and is collateralized by the purchased securities and provides financing for the purchase price of the securities, less a haircut that varies based on the type of collateral. The Company can deliver the collateralized securities to a special purpose vehicle created by the FRBNY in full defeasance of the borrowings.

The Company elected to carry the securities and related borrowings at fair value under the fair value option afforded by accounting guidance regarding the fair value option for financial assets and financial liabilities. As of March 31, 2010, the Company had \$407.0 million of securities under TALF which are reflected as TALF investments, at market value and \$346.7 million of secured financing from the FRBNY which is reflected as TALF borrowings, at market value. As of December 31, 2009, the Company had \$250.3 million of securities under TALF which are reflected as TALF investments, at market value and \$217.6 million of secured financing from the FRBNY which is reflected as TALF borrowings, at market value. The original maturity dates for the TALF borrowings vary between 2 to 5 years with floating or fixed coupons depending on the related TALF investments.

Interest Paid

During the 2010 first quarter, the Company made interest payments of \$1.8 million related to its debt and financing arrangements, compared to \$0.2 million for the 2009 first quarter.

5. Segment Information

The Company classifies its businesses into two underwriting segments – insurance and reinsurance – and corporate and other (non-underwriting). The Company's insurance and reinsurance operating segments each have segment managers who are responsible for the overall profitability of their respective segments and who are directly accountable to the Company's chief operating decision makers, the Chairman, President and Chief Executive Officer of ACGL and the Chief Financial Officer of ACGL. The chief operating decision makers do not assess performance, measure return on equity or make resource allocation decisions on a line of business basis. The Company determined its reportable operating segments using the management approach described in accounting guidance regarding disclosures about segments of an enterprise and related information.

Management measures segment performance based on underwriting income or loss. The Company does not manage its assets by segment and, accordingly, investment income is not allocated to each underwriting segment. In addition, other revenue and expense items are not evaluated by segment. The accounting policies of the segments are the same as those used for the preparation of the Company's consolidated financial statements. Intersegment business is allocated to the segment accountable for the underwriting results.

The insurance segment consists of the Company's insurance underwriting subsidiaries which primarily write on both an admitted and non-admitted basis. Specialty product lines include: casualty; construction; executive assurance; healthcare; national accounts casualty; professional liability; programs; property, energy, marine and aviation; surety; travel and accident; and other (consisting of excess workers compensation, employers' liability and collateral protection business).

The reinsurance segment consists of the Company's reinsurance underwriting subsidiaries. The reinsurance segment generally seeks to write significant lines on specialty property and casualty reinsurance contracts. Classes of business include: casualty; marine and aviation; other specialty; property catastrophe; property excluding property catastrophe (losses on a single risk, both excess of loss and pro rata); and other (consisting of non-traditional and casualty clash business).

Corporate and other (non-underwriting) includes net investment income, other income (loss), other expenses incurred by the Company, interest expense, net realized gains or losses, net impairment losses recognized in earnings, equity in net income (loss) of investment funds accounted for using the equity method, net foreign exchange gains or losses, income taxes and dividends on the Company's non-cumulative preferred shares.

Table of Contents**ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

The following tables set forth an analysis of the Company's underwriting income by segment, together with a reconciliation of underwriting income to net income available to common shareholders, summary information regarding net premiums written and earned by major line of business and net premiums written by location:

quarter. Reinsurance segment results exclude premiums written and earned ceded through intersegment transactions of nil and \$0.3 million, respectively, for the 2010 first quarter and premiums written and earned of \$0.1 million and \$0.5 million, respectively, for the 2009 first quarter.

- (2) Includes facultative business.
- (3) Includes professional liability, executive assurance and healthcare business.

Table of Contents**ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****6. Reinsurance**

In the normal course of business, the Company's insurance subsidiaries cede a portion of their premium through pro rata and excess of loss reinsurance agreements on a treaty or facultative basis. The Company's reinsurance subsidiaries participate in common account retrocessional arrangements for certain pro rata treaties. Such arrangements reduce the effect of individual or aggregate losses to all companies participating on such treaties, including the reinsurers, such as the Company's reinsurance subsidiaries, and the ceding company. In addition, the Company's reinsurance subsidiaries may purchase retrocessional coverage as part of their risk management program. Reinsurance recoverables are recorded as assets, predicated on the reinsurers' ability to meet their obligations under the reinsurance agreements. If the reinsurers are unable to satisfy their obligations under the agreements, the Company's insurance or reinsurance subsidiaries would be liable for such defaulted amounts.

The effects of reinsurance on the Company's written and earned premiums and losses and loss adjustment expenses with unaffiliated reinsurers were as follows:

	Three Months Ended March 31,	
	2010	2009
Premiums Written		
Direct	\$ 617,935	\$ 620,446
Assumed	335,752	404,525
Ceded	(185,933)	(202,108)
Net	\$ 767,754	\$ 822,863
Premiums Earned		
Direct	\$ 600,645	\$ 587,760
Assumed	262,535	332,567
Ceded	(193,263)	(219,763)
Net	\$ 669,917	\$ 700,564
Losses and Loss Adjustment Expenses		
Direct	\$ 398,951	\$ 351,493
Assumed	107,167	147,145
Ceded	(78,067)	(98,096)
Net	\$ 428,051	\$ 400,542

The Company monitors the financial condition of its reinsurers and attempts to place coverages only with substantial, financially sound carriers. At March 31, 2010, approximately 90.2% of the Company's reinsurance recoverables on paid and unpaid losses (not including prepaid reinsurance premiums) of \$1.71 billion were due from carriers which had an A.M. Best rating of A- or better and the largest reinsurance recoverables from any one carrier was less than 5.5% of the Company's total shareholders' equity. At December 31, 2009, approximately 90.0% of the Company's reinsurance recoverables on paid and unpaid losses (not including prepaid reinsurance premiums) of \$1.72 billion were due from carriers which had an A.M. Best rating of A- or better and the largest reinsurance recoverables from any one carrier was less than 5.8% of the Company's total shareholders' equity.

Table of Contents**ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****7. Investment Information**

The following table summarizes the Company's invested assets:

	March 31, 2010	December 31, 2009
Fixed maturities available for sale, at market value	\$ 9,295,680	\$ 9,391,926
Fixed maturities pledged under securities lending agreements, at market value (1)	181,871	208,826
Total fixed maturities	9,477,551	9,600,752

(1) Represents the total other-than-temporary impairments (OTTI) recognized in accumulated other comprehensive income (AOCI). It does not include the change in market value subsequent to the impairment measurement date. At March 31, 2010, the net unrealized loss related to securities for which a non-credit OTTI was recognized in AOCI was \$24.8 million, compared to \$37.9 million at December 31, 2009.

[Table of Contents](#)**ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

The contractual maturities of the Company's fixed maturities and fixed maturities pledged under securities lending agreements are shown in the following table. Expected maturities, which are management's best estimates, will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Maturity	March 31, 2010		December 31, 2009	
	Estimated Market Value	Amortized Cost	Estimated Market Value	Amortized Cost
Due in one year or less	\$ 226,299	\$ 229,882	\$ 227,668	\$ 220,095
Due after one year through five years	3,603,876	3,505,794	3,988,306	3,885,111
Due after five years through 10 years	1,873,249	1,835,942	1,844,377	1,800,371
Due after 10 years	255,014	249,069	337,376	334,065
	5,958,438	5,820,687	6,397,727	6,239,642
Mortgage backed securities	1,850,700	1,866,032	1,449,382	1,481,760
Commercial mortgage backed securities	1,073,487	1,045,337	1,185,799	1,162,362
Asset backed securities	594,926	578,636	567,844	554,351
Total	\$ 9,477,551	\$ 9,310,692	\$ 9,600,752	\$ 9,438,115

At March 31, 2010, on a lot level basis, approximately 1,120 security lots out of a total of approximately 4,810 security lots were in an unrealized loss position and the largest single unrealized loss from a single lot in the Company's fixed maturity portfolio was \$2.1 million. At December 31, 2009, on a lot level basis, approximately 1,430 security lots out of a total of approximately 4,520 security lots were in an unrealized loss position and the largest single unrealized loss from a single lot in the Company's fixed maturity portfolio was \$2.2 million.

Other-Than-Temporary Impairments

The Company performs quarterly reviews of its investments in order to determine whether declines in market value below the amortized cost basis were considered other-than-temporary in accordance with applicable guidance. For the 2010 first quarter and 2009 first quarter, the Company recorded \$1.6 million and \$36.1 million of net impairment losses recognized in earnings, respectively. A description of the methodology and significant inputs used to measure the amount of OTTI related to credit losses of \$1.6 million in the 2010 first quarter is as follows:

- Asset backed securities – the Company recorded \$1.2 million of OTTI related to credit losses in the 2010 first quarter. The Company utilized underlying data, where available, for each security provided by asset managers, cash flow projections and additional information from credit agencies in order to determine an expected recovery value for each security. The analysis on home equity asset backed securities includes expected cash flow projections under base case and stress case scenarios which modify expected default expectations and loss severities and slow down prepayment assumptions. The significant inputs in the models include the expected default rates, delinquency rates and foreclosure costs. In the 2010 first quarter, the expected recovery values were reduced on a number of asset backed securities backed by sub-prime or Alt-A collateral due to reductions in the expected recovery values on such securities. These reductions followed the quarterly review of information received which indicated increases in expected default rates, foreclosure costs and other factors. On an ongoing basis, the Company reviews the

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

process used by each asset manager in developing their analysis and, following such reviews, the Company determines what the expected recovery values are for each security, which incorporates both base case and stress case scenarios. For non-home equity asset backed securities, the Company used reports and analysis from asset managers and rating agencies in order to determine an

Table of Contents**ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

expected recovery value for such securities. The amortized cost basis of the asset backed securities were adjusted down, if required, to the expected recovery value calculated in the OTTI review process;

- **Mortgage backed securities** the Company recorded \$0.4 million of OTTI related to credit losses in the 2010 first quarter. The Company utilized underlying data, where available, for each security provided by asset managers, cash flow projections and additional information from credit agencies in order to determine an expected recovery value for each security. The analysis provided by the asset managers includes expected cash flow projections under base case and stress case scenarios which modify expected default expectations and loss severities and slow down prepayment assumptions. The significant inputs in the models include the expected default rates, delinquency rates and foreclosure costs. In the 2010 first quarter, the expected recovery values were reduced on a number of mortgage backed securities due to reductions in the expected recovery values on such securities in each period. These reductions followed the quarterly review of information received which indicated increases in expected default expectations and foreclosure costs. On an ongoing basis, the Company reviews the process used by each asset manager in developing their analysis and, following such reviews, the Company determines what the expected recovery values are for each security, which incorporates both base case and stress case scenarios. The amortized cost basis of the mortgage backed securities were adjusted down, if required, to the expected recovery value calculated in the OTTI review process;

The Company believes that the \$0.7 million of OTTI included in accumulated other comprehensive income at March 31, 2010 on the securities which were considered by the Company to be impaired was due to market and sector-related factors, including limited liquidity and wide credit spreads (*i.e.*, not credit losses). At March 31, 2010, the Company did not have the intent to sell such securities, and determined that it is more likely than not that the Company will not be required to sell the securities before recovery of their cost basis.

The following table provides a roll forward of the amount related to credit losses recognized in earnings for which a portion of an OTTI was recognized in accumulated other comprehensive income:

	Three Months Ended March 31,	
	2010	2009
Balance at start of year	\$ 84,147	\$ 35,474
Credit loss impairments recognized on securities not previously impaired	204	12,647
Credit loss impairments recognized on securities previously impaired	1,402	9,135
Reductions for increases in cash flows expected to be collected that are recognized over the remaining life of the security		
Reductions for securities sold during the period	(265)	
Balance at end of period	\$ 85,488	\$ 57,256

Table of Contents

ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Securities Lending Agreements

At March 31, 2010, the market value and amortized cost of fixed maturities and short-term investments pledged under securities lending agreements were \$184.2 million and \$184.0 million, respectively. At December 31, 2009, the market value and amortized cost of fixed maturities and short-term investments pledged under securities lending agreements were \$212.8 million and \$214.7 million, respectively.

At March 31, 2010, the market value and amortized cost of the reinvested collateral, shown as Investment of funds received under securities lending agreements, totaled \$178.0 million and \$182.3 million, respectively. At December 31, 2009, the market value and amortized cost of the reinvested collateral shown as Investment of funds received under securities lending agreements totaled \$91.2 million and \$96.6 million, respectively, while Securities purchased under agreements to resell using funds received under securities lending agreements totaled \$115.8 million.

TALF Program

As of March 31, 2010, the Company had \$407.0 million of securities under TALF which are reflected as TALF investments, at market value and \$346.7 million of secured financing from the FRBNY which is reflected as TALF borrowings, at market value. As of December 31, 2009, the Company had \$250.3 million of TALF investments, at market value, and \$217.6 million of TALF borrowings, at market value. Changes in market value for both the securities and borrowings are included in Net realized gains (losses) while interest income on the TALF investments is reflected in net investment income and interest expense on the TALF borrowings is reflected in interest expense. The Company recorded net realized gains for the 2010 first quarter of \$2.6 million on the TALF program, consisting of realized gains of \$3.6 million and realized losses of \$1.0 of million on the TALF investments and TALF borrowings, respectively. See Note 4, Debt and Financing Arrangements TALF Program, for further details.

Other Investments

Other investments include: (i) mutual funds which invest in fixed maturity securities and (ii) privately held securities, equities and other which include the Company's investment in Aeolus LP (see Note 12), an equity portfolio which includes allocations to global natural resource markets and a mutual fund which invests in equities, fixed income, commodities and property as part of a total return objective. The Company elected to carry the equity portfolio at fair value under the fair value option afforded by accounting guidance regarding the fair value option for financial assets and financial liabilities.

The following table details the Company's other investments:

	March 31, 2010		December 31, 2009	
	Estimated Market Value	Cost	Estimated Market Value	Cost
Fixed income mutual funds	\$ 70,204	\$ 65,264	\$ 63,146	\$ 60,571
Privately held securities, equities and other	193,404	186,653	109,026	101,934
Total	\$ 263,608	\$ 251,917	\$ 172,172	\$ 162,505

Table of Contents**ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)*****Investment Funds Accounted for Using the Equity Method***

The Company recorded \$29.1 million of equity in net income related to investment funds accounted for using the equity method for the 2010 first quarter, compared to \$9.6 million of equity in net losses for the 2009 first quarter. Due to the ownership structure of these investment funds, which invest in fixed maturity securities, the Company uses the equity method. In applying the equity method, these investments are initially recorded at cost and are subsequently adjusted based on the Company's proportionate share of the net income or loss of the funds (which include changes in the market value of the underlying securities in the funds). Such investments are generally recorded on a one month lag with some investments reported for on a three month lag based on the availability of reports from the investment funds. Changes in the carrying value of such investments are recorded in net income as Equity in net income (loss) of investment funds accounted for using the equity method while changes in the carrying value of the Company's other fixed income investments are recorded as an unrealized gain or loss component of accumulated other comprehensive income in shareholders' equity. As such, fluctuations in the carrying value of the investment funds accounted for using the equity method may increase the volatility of the Company's reported results of operations. Investment funds accounted for using the equity method totaled \$405.6 million at March 31, 2010, compared to \$391.9 million at December 31, 2009. The Company's investment commitments relating to investment funds accounted for using the equity method totaled approximately \$95.0 million at March 31, 2010.

Restricted Assets

The Company is required to maintain assets on deposit, which primarily consist of fixed maturities, with various regulatory authorities to support its insurance and reinsurance operations. The Company has investments in segregated portfolios which are primarily used to provide collateral or guarantees for letters of credit to third parties. See Note 4, Debt and Financing Arrangements Letter of Credit and Revolving Credit Facilities, for further details. In addition, the Company maintains assets on deposit which are available to settle insurance and reinsurance liabilities to third parties. In addition, certain of the Company's operating subsidiaries maintain assets in trust accounts as collateral for insurance and reinsurance transactions with affiliated companies. At March 31, 2010 and December 31, 2009, such amounts approximated \$4.30 billion and \$4.28 billion, respectively. The following table details the value of restricted assets:

	March 31, 2010	December 31, 2009
Assets used for collateral or guarantees	\$ 1,021,470	\$ 1,017,482
Deposits with U.S. regulatory authorities	285,883	279,136
Trust funds	113,961	115,585
Deposits with non-U.S. regulatory authorities	87,205	76,094
Total restricted assets	\$ 1,508,519	\$ 1,488,297

[Table of Contents](#)**ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)*****Net Investment Income***

The components of net investment income were derived from the following sources:

	Three Months Ended March 31,	
	2010	2009
Fixed maturities	\$ 97,661	\$ 96,958
Short-term investments	230	1,240
Other (1)	485	1,565
Gross investment income	98,376	99,763
Investment expenses	(5,404)	(3,881)
Net investment income	\$ 92,972	\$ 95,882

(1) Primarily consists of interest income on operating cash accounts, other investments and securities lending transactions.

Net Realized Gains (Losses)

Net realized gains (losses) were as follows, excluding the other-than-temporary impairment provisions discussed above:

	Three Months Ended March 31,	
	2010	2009
Fixed maturities	\$ 40,215	\$ 6,170
Other investments	(700)	(18,586)
Other (1)	8,267	7,252
Net realized gains (losses)	\$ 47,782	\$ (5,164)

(1) Primarily consists of net realized gains or losses related to investment-related derivatives, foreign currency forward contracts and changes in the market value of TALF investments and TALF borrowings.

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

Proceeds from the sales of fixed maturities during the 2010 first quarter were \$4.44 billion, compared to \$2.78 billion for the 2009 first quarter. Gross gains of \$60.8 million and \$71.6 million were realized on those transactions during the 2010 first quarter and 2009 first quarter, respectively, while gross losses were \$20.6 million and \$65.4 million, respectively. Realized gains or losses on fixed maturities include changes in the market value of certain hybrid securities pursuant to applicable guidance. The fair market values of such securities at March 31, 2010 were approximately \$93.3 million, compared to \$84.8 million at December 31, 2009. The Company recorded realized losses of \$1.3 million on such securities for the 2010 first quarter, compared to realized gains of \$4.0 million for the 2009 first quarter.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

8. Fair Value

Accounting guidance regarding fair value measurements addresses how companies should measure fair value when they are required to use a fair value measure for recognition or disclosure purposes under GAAP and provides a common definition of fair value to be used throughout GAAP. It defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly fashion between market participants at the measurement date. In addition, it establishes a three-level valuation hierarchy for the disclosure of fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The level in the hierarchy within which a given fair value measurement falls is determined based on the lowest level input that is significant to the measurement (Level 1 being the highest priority and Level 3 being the lowest priority).

The three levels are defined as follows:

- Level 1: Inputs to the valuation methodology are observable inputs that reflect quoted prices (unadjusted) for *identical* assets or liabilities in *active markets*
- Level 2: Inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument
- Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement

Following is a description of the valuation methodologies used for securities measured at fair value, as well as the general classification of such securities pursuant to the valuation hierarchy.

The Company determines the existence of an active market based on its judgment as to whether transactions for the financial instrument occur in such market with sufficient frequency and volume to provide reliable pricing information. The independent pricing sources obtain market quotations and actual transaction prices for securities that have quoted prices in active markets. The Company uses quoted values and other data provided by nationally recognized independent pricing sources as inputs into its process for determining fair values of its fixed maturity investments. To validate the techniques or models used by pricing sources, the Company's review process includes, but is not limited to: (i) quantitative analysis (*e.g.*, comparing the quarterly return for each managed portfolio to its target benchmark, with significant differences identified and investigated); (ii) a review of the average number of prices obtained in the pricing process and the range of resulting market values; (iii) initial and ongoing evaluation of methodologies used by outside parties to calculate fair value including a review of deep dive reports on selected securities which indicated the use of observable inputs in the pricing process; (iv) comparing the fair value estimates to its knowledge of the current market; (v) a comparison of the pricing services' fair values to other pricing services' fair values for the same investments; and (vi) back-testing, which includes randomly selecting purchased or sold securities and comparing the executed prices to the fair value estimates from the pricing service. At March 31, 2010, the Company obtained an average of 3.0 quotes per investment, compared to 2.6 quotes at December 31, 2009. Where multiple quotes or prices were obtained, a price source hierarchy was maintained in order to determine which price source provided the fair value (*i.e.*, a price obtained from a pricing service with more seniority in the hierarchy will be used from a less senior one in all cases). The hierarchy prioritizes pricing services based on availability and reliability and assigns the highest priority to index providers. Based on the above review, the Company will challenge any prices for a security or portfolio which are considered not to be

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

representative of fair value. The Company did not adjust the prices or quotes provided by the pricing services at March 31, 2010 or December 31, 2009.

Table of Contents

ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

The independent pricing sources obtain market quotations and actual transaction prices for securities that have quoted prices in active markets. Each source has its own proprietary method for determining the fair value of securities that are not actively traded. In general, these methods involve the use of matrix pricing in which the independent pricing source uses observable market inputs including, but not limited to, investment yields, credit risks and spreads, benchmarking of like securities, broker-dealer quotes, reported trades and sector groupings to determine a reasonable fair market value. In addition, pricing vendors use model processes, such as an Option Adjusted Spread model, to develop prepayment and interest rate scenarios. The Option Adjusted Spread model is commonly used to estimate fair value for securities such as mortgage backed and asset backed securities. In certain circumstances, when fair market values are unavailable from these independent pricing sources, quotes are obtained directly from broker-dealers who are active in the corresponding markets. Such quotes are subject to the validation procedures noted above. Of the \$11.1 billion of financial assets and liabilities measured at fair value at March 31, 2010, approximately \$1.62 billion, or 14.6%, were priced using non-binding broker-dealer quotes. Of the \$10.74 billion of financial assets and liabilities measured at fair value at December 31, 2009, approximately \$1.17 billion, or 10.8%, were priced using non-binding broker-dealer quotes.

The Company reviews its securities measured at fair value and discusses the proper classification of such investments with investment advisors and others. Upon adoption of the accounting guidance regarding fair value measurement, the Company determined that Level 1 securities included highly liquid, recent issue U.S. Treasuries and certain of its short-term investments held in highly liquid money market-type funds where it believes that quoted prices are available in an active market. On January 1, 2010, the Company determined that all U.S. Treasuries would be classified as Level 1 securities due to observed levels of trading activity, the high number of strongly correlated pricing quotes received on U.S. Treasuries and other factors.

Where the Company believes that quoted market prices are not available or that the market is not active, fair values are estimated by using quoted prices of securities with similar characteristics, pricing models or matrix pricing and are generally classified as Level 2 securities. The Company determined that Level 2 securities included corporate bonds, mortgage backed securities, municipal bonds, asset backed securities, non-U.S. government securities, TALF investments and TALF borrowings, certain short-term securities and certain other investments.

The Company determined that three Euro-denominated corporate bonds which invest in underlying portfolios of fixed income securities for which there is a low level of transparency around inputs to the valuation process should be classified within Level 3 of the valuation hierarchy. In addition, the Company determined that two mutual funds, included in other investments, which invest in underlying portfolios of fixed income securities for which there is a low level of transparency around inputs to the valuation process should be classified within Level 3 of the valuation hierarchy. In addition, Level 3 securities include a small number of premium-tax bonds. The Company reviews the classification of its investments each quarter.

TALF borrowings, at market value	\$ 217,565	\$	\$ 217,565	\$

(1) In securities lending transactions, the Company receives collateral in excess of the fair value of the fixed maturities and short-term investments pledged under securities lending agreements. For purposes of this table, the Company has excluded the collateral received and reinvested of \$178.0 million and \$207.0 million at March 31, 2010 and December 31, 2009, respectively, and included the \$184.2 million and \$212.8 million, respectively, of fixed maturities and short-term investments pledged under securities lending agreements, at market value.

Table of Contents**ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

As discussed earlier, the Company determined that all U.S. Treasuries would be classified as Level 1 securities on January 1, 2010 due to observed levels of trading activity, the high number of strongly correlated pricing quotes received on U.S. Treasuries and other factors. Such determination resulted in \$1.09 billion of U.S. Treasuries which were previously classified as Level 2 being moved into Level 1. No securities were reclassified between Level 2 and Level 3 during the 2010 first quarter.

The following table presents a reconciliation of the beginning and ending balances for all investments measured at fair value on a recurring basis using Level 3 inputs:

	Fair Value Measurements Using: Significant Unobservable Inputs (Level 3)			
	Corporate Bonds	Other Investments	Total	
Three Months Ended March 31, 2010:				
Balance at beginning of period	\$ 178,385	\$ 49,668	\$ 228,053	
Total gains or (losses) (realized/unrealized)				
Included in earnings (1)	5,797	18	5,815	
Included in other comprehensive income	(6,508)	1,819	(4,689)	
Purchases, issuances and settlements		(18)	(18)	
Transfers in and/or out of Level 3				
Balance at end of period	\$ 177,674	\$ 51,487	\$ 229,161	
Three Months Ended March 31, 2009:				
Balance at beginning of period	\$ 142,571	\$ 40,339	\$ 182,910	
Total gains or (losses) (realized/unrealized)				
Included in earnings (1)	(519)	(14,307)	(14,826)	
Included in other comprehensive income	(11,491)	6,722	(4,769)	
Purchases, issuances and settlements		5	5	
Transfers in and/or out of Level 3				
Balance at end of period	\$ 130,561	\$ 32,759	\$ 163,320	

(1) Gains or losses on fixed maturities were recorded as a component of net investment income while gains or losses on other investments were recorded in net realized gains (losses).

The amount of total gains for the 2010 first quarter included in earnings attributable to the change in unrealized gains or losses relating to assets still held at March 31, 2010 was \$5.8 million. The amount of total losses for the 2009 first quarter included in earnings attributable to the change in unrealized gains or losses relating to assets still held at March 31, 2009 was \$0.5 million.

ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

9. Derivative Instruments

The Company's investment strategy allows for the use of derivative securities. The Company's derivative instruments are recorded on its consolidated balance sheets at market value. The market values of those derivatives are based on quoted market prices. All realized and unrealized contract gains and losses are reflected in the Company's results of operations. The Company utilizes exchange traded U.S. Treasury note, Eurodollar and other futures contracts and commodity futures to manage portfolio duration or replicate investment positions in its portfolios. In addition, certain of the Company's corporate bonds are managed in a global bond portfolio which incorporates the use of foreign currency forward contracts which are intended to provide an economic hedge against foreign currency movements on the portfolio's non-U.S. Dollar denominated holdings.

In addition, the Company purchases to-be-announced mortgage backed securities (TBAs) as part of its investment strategy. TBAs represent commitments to purchase a future issuance of agency mortgage backed securities. For the period between purchase of a TBA and issuance of the underlying security, the Company's position is accounted for as a derivative. The Company purchases TBAs in both long and short positions to enhance investment performance and as part of its overall investment strategy. The Company did not hold any derivatives which were designated as hedging instruments at March 31, 2010 or December 31, 2009. The following table summarizes information on the balance sheet locations, market values and notional values of the Company's derivative instruments:

	Balance Sheet Location	Asset Derivatives		Liability Derivatives	
		Estimated Market Value	Notional Value	Estimated Market Value	Notional Value
March 31, 2010:					
Futures contracts	Other investments	\$ 1,087	\$ 1,496,332	\$ (560)	\$ 306,534
Foreign currency forward contracts	Other investments	901	72,189	(5,071)	324,211
TBAs	Fixed maturities	955,049	913,305	(918,890)	880,700
Other	Other investments	2,295	42,595	(1,445)	771,637
Total		\$ 959,332		\$ (925,966)	
December 31, 2009:					
Futures contracts	Other investments	\$ 577	\$ 472,904	\$ (208)	\$ 513,034
Foreign currency forward contracts	Other investments	757	73,340	(12,408)	310,030
TBAs	Fixed maturities	11,070	11,000	(616)	600
Other	Other investments	26	1,975	(1,010)	143,870
Total		\$ 12,430		\$ (14,242)	

The following table summarizes derivative instrument activity in the consolidated statements of operations:

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

Derivatives not designated as hedging instruments	Location of Gain or (Loss) Recognized in Income on Derivative	Three Months Ended March 31,	
		2010	2009
Futures contracts	Net realized gains (losses)	\$ 161	\$ (427)
Foreign currency forward contracts	Net realized gains (losses)	5,108	7,225
TBAs	Net realized gains (losses)	1,321	
Other	Net realized gains (losses)	827	454
Total		\$ 7,417	\$ 7,252

Table of Contents**ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****10. Earnings Per Common Share**

The following table sets forth the computation of basic and diluted earnings per common share:

	Three Months Ended March 31,	
	2010	2009
Net income	\$ 216,994	\$ 146,330
Preferred dividends	(6,461)	(6,461)
Net income available to common shareholders (numerator)	\$ 210,533	\$ 139,869
Weighted average common shares and effect of dilutive common share equivalents used in the computation of earnings per common share:		
Weighted average common shares outstanding basic (denominator)	53,039,026	60,313,550
Effect of dilutive common share equivalents:		
Nonvested restricted shares	390,909	274,167
Stock options (1)	2,083,892	1,972,252
Weighted average common shares and common share equivalents outstanding diluted (denominator)	55,513,827	62,559,969
Earnings per common share:		
Basic	\$ 3.97	\$ 2.32
Diluted	\$ 3.79	\$ 2.24

(1) Certain stock options were not included in the computation of diluted earnings per share where the exercise price of the stock options exceeded the average market price and would have been anti-dilutive or where, when applying the treasury stock method to in-the-money options, the sum of the proceeds, including unrecognized compensation, exceeded the average market price and would have been anti-dilutive. For the 2010 first quarter and 2009 first quarter, the number of stock options excluded were 108,184 and 697,273, respectively.

11. Legal Proceedings

The Company, in common with the insurance industry in general, is subject to litigation and arbitration in the normal course of its business. As of March 31, 2010, the Company was not a party to any litigation or arbitration which is expected by management to have a material adverse effect on the Company's results of operations and financial condition and liquidity.

ARCH CAPITAL GROUP LTD. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

12. Income Taxes

ACGL is incorporated under the laws of Bermuda and, under current Bermuda law, is not obligated to pay any taxes in Bermuda based upon income or capital gains. The Company has received a written undertaking from the Minister of Finance in Bermuda under the Exempted Undertakings Tax Protection Act 1966 that, in the event that any legislation is enacted in Bermuda imposing any tax computed on profits, income, gain or appreciation on any capital asset, or any tax in the nature of estate duty or inheritance tax, such tax will not be applicable to ACGL or any of its operations until March 28, 2016. This undertaking does not, however, prevent the imposition of taxes on any person ordinarily resident in Bermuda or any company in respect of its ownership of real property or leasehold interests in Bermuda.

ACGL and its non-U.S. subsidiaries will be subject to U.S. federal income tax only to the extent that they derive U.S. source income that is subject to U.S. withholding tax or income that is effectively connected with the conduct of a trade or business within the U.S. and is not exempt from U.S. tax under an applicable income tax treaty with the U.S. ACGL and its non-U.S. subsidiaries will be subject to a withholding tax on dividends from U.S. investments and interest from certain U.S. payors (subject to reduction by any applicable income tax treaty). ACGL and its non-U.S. subsidiaries intend to conduct their operations in a manner that will not cause them to be treated as engaged in a trade or business in the United States and, therefore, will not be required to pay U.S. federal income taxes (other than U.S. excise taxes on insurance and reinsurance premium and withholding taxes on dividends and certain other U.S. source investment income). However, because there is uncertainty as to the activities which constitute being engaged in a trade or business within the United States, there can be no assurances that the U.S. Internal Revenue Service will not contend successfully that ACGL or its non-U.S. subsidiaries are engaged in a trade or business in the United States. If ACGL or any of its non-U.S. subsidiaries were subject to U.S. income tax, ACGL's shareholders' equity and earnings could be materially adversely affected. ACGL has subsidiaries and branches that operate in various jurisdictions around the world that are subject to tax in the jurisdictions in which they operate. The significant jurisdictions in which ACGL's subsidiaries and branches are subject to tax are the United States, United Kingdom, Ireland, Canada, Switzerland and Denmark.

The Company's income tax provision resulted in an effective tax rate on income before income taxes of 3.0% for the 2010 first quarter, compared to 6.1% for the 2009 first quarter. The Company's effective tax rate, which is based upon the expected annual effective tax rate, may fluctuate from period to period based on the relative mix of income reported by jurisdiction due primarily to the varying tax rates in each jurisdiction. The Company had a net deferred tax asset of \$53.0 million at March 31, 2010, compared to \$56.3 million at December 31, 2009. In addition, the Company paid \$0.7 million for income taxes, net of recoveries, during the 2010 first quarter, compared to \$2.2 million for the 2009 first quarter.

The United States also imposes an excise tax on insurance and reinsurance premiums paid to non-U.S. insurers or reinsurers with respect to risks located in the United States. The rates of tax, unless reduced by an applicable U.S. tax treaty, are four percent for non-life insurance premiums and one percent for life insurance and all reinsurance premiums. The Company incurs federal excise taxes on certain of its reinsurance transactions, including amounts ceded through intercompany transactions. The Company incurred \$3.0 million of federal excise taxes in the 2010 first quarter, compared to \$3.3 million in the 2009 first quarter. Such amounts are reflected as acquisition expenses in the Company's consolidated statements of income.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a discussion and analysis of our financial condition and results of operations. This should be read in conjunction with our consolidated financial statements included in Item 1 of this report and also our Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2009 (2009 Form 10-K). In addition, readers should review Risk Factors set forth in Item 1A of Part I of our 2009 Form 10-K. Tabular amounts are in U.S. Dollars in thousands, except share amounts, unless otherwise noted.

Arch Capital Group Ltd. (ACGL and, together with its subsidiaries, we or us) is a Bermuda public limited liability company with approximately \$4.78 billion in capital at March 31, 2010 and, through operations in Bermuda, the United States, Europe and Canada, writes insurance and reinsurance on a worldwide basis. While we are positioned to provide a full range of property and casualty insurance and reinsurance lines, we focus on writing specialty lines of insurance and reinsurance. It is our belief that our underwriting platform, our experienced management team and our strong capital base that is unencumbered by significant pre-2002 risks have enabled us to establish a strong presence in the insurance and reinsurance markets.

Current Outlook

During the second half of 2008, the financial markets experienced significant adverse credit events and a loss of liquidity, which reduced the amount and availability of capital in the insurance industry. In addition, certain of our competitors experienced significant financial difficulties. During the first six months of 2009, we experienced rate stabilization and some improvements in rates. However, with no significant catastrophic activity in the 2009 third quarter and substantial improvements in market values across most investment sectors, the degree of rate improvement we saw in the first six months of 2009 was moderated and the pricing environment was basically unchanged at the end of 2009.

During the 2010 first quarter, in general, rates for all lines of business were slightly down from previous periods, with increased competition experienced in executive assurance and certain property lines of business. In the 2010 first quarter, catastrophe losses were above long term averages in parts of the world, such as the recent Chilean earthquake. While these events affected the 2010 first quarter industry underwriting results, it is not anticipated at this time that these events will cause significant increases in global property rates.

The current economic conditions could continue to have a material impact on the frequency and severity of claims and therefore could negatively impact our underwriting returns. In addition, volatility in the financial markets could continue to significantly affect our investment returns, reported results and shareholders' equity. We consider the potential impact of economic trends in the estimation process for establishing unpaid losses and loss adjustment expenses and in determining our investment strategies. We continue to believe that the most attractive area from a pricing point of view remains U.S. catastrophe-exposed business. We expect that our writings in this business will continue to represent a significant proportion of our overall book, which could increase the volatility of our operating results.

Table of Contents

Natural Catastrophe Risk

We monitor our natural catastrophe risk globally for all perils and regions, in each case, where we believe there is significant exposure. Our models employ both proprietary and vendor-based systems and include cross-line correlations for property, marine, offshore energy, aviation, workers compensation and personal accident. Currently, we seek to limit our 1-in-250 year return period net probable maximum pre-tax loss from a severe catastrophic event in any geographic zone to approximately 25% of total shareholders' equity. We reserve the right to change this threshold at any time. Based on in-force exposure estimated as of April 1, 2010, our modeled peak zone catastrophe exposure is a Northeast windstorm, with a net probable maximum pre-tax loss of \$719 million. Based on in-force exposure estimated as of January 1, 2010, our modeled peak zone exposure was a hurricane affecting the Florida Tri-County area, with a net probable maximum pre-tax loss of \$750 million. Our exposures to other perils, such as U.S. earthquake and international events, are less than the exposures arising from U.S. windstorms and hurricanes. As of April 1, 2010, our modeled peak zone earthquake exposure (Los Angeles area earthquake) represented less than 75% of our peak zone catastrophe exposure, and our modeled peak zone international exposure (United Kingdom windstorm) is substantially less than both our peak zone windstorm and earthquake exposures. Net probable maximum pre-tax loss estimates are net of expected reinsurance recoveries, before income tax and before excess reinsurance reinstatement premiums. Loss estimates are reflective of the zone indicated and not the entire portfolio. Since hurricanes and windstorms can affect more than one zone and make multiple landfalls, our loss estimates include clash estimates from other zones.

The loss estimates shown above do not represent our maximum exposures and it is highly likely that our actual incurred losses would vary materially from the modeled estimates. There can be no assurances that we will not suffer a net loss greater than 25% of our total shareholders' equity from one or more catastrophic events due to several factors, including the inherent uncertainties in estimating the frequency and severity of such events and the margin of error in making such determinations resulting from potential inaccuracies and inadequacies in the data provided by clients and brokers, the modeling techniques and the application of such techniques or as a result of a decision to change the percentage of shareholders' equity exposed to a single catastrophic event. In addition, actual losses may increase if our reinsurers fail to meet their obligations to us or the reinsurance protections purchased by us are exhausted or are otherwise unavailable. See *Risk Factors* *Risk Relating to Our Industry* and *Management's Discussion and Analysis of Financial Condition and Results of Operations* *Natural and Man-Made Catastrophic Events* in our 2009 Form 10-K.

Financial Measures

Management uses the following three key financial indicators in evaluating our performance and measuring the overall growth in value generated for ACGL's common shareholders:

Book Value per Common Share

Book value per common share represents total common shareholders' equity divided by the number of common shares outstanding. Management uses growth in book value per common share as a key measure of the value generated for our common shareholders each period and believes that book value per common share is the key driver of ACGL's share price over time. Book value per common share is impacted by, among other factors, our underwriting results, investment returns and share repurchase activity, which has an accretive or dilutive impact on book value per common share depending on the purchase price.

Table of Contents

Book value per common share was \$76.91 at March 31, 2010, compared to \$73.01 at December 31, 2009. The 5.3% growth in the 2010 first quarter was generated through underwriting results and investment returns and also reflects the accretive impact of share repurchases made during the period.

Operating Return on Average Common Equity

Operating return on average common equity (Operating ROAE) represents after-tax operating income available to common shareholders divided by the average of beginning and ending common shareholders equity during the period. After-tax operating income available to common shareholders, a non-GAAP measure as defined in the SEC rules, represents net income available to common shareholders, excluding net realized gains or losses, net impairment losses recognized in earnings, equity in net income or loss of investment funds accounted for using the equity method and net foreign exchange gains or losses, net of income taxes. Management uses Operating ROAE as a key measure of the return generated to common shareholders and has set an objective to achieve an average Operating ROAE of 15% or greater over the insurance cycle, which it believes to be an attractive return to common shareholders given the risks we assume. See Comment on Non-GAAP Financial Measures.

Our Operating ROAE was 9.8% for the 2010 first quarter, compared to 21.1% for the 2009 first quarter. The lower Operating ROAE for the 2010 first quarter resulted from a higher level of catastrophic events than in the 2009 first quarter along with the impacts of current insurance and reinsurance market conditions and lower interest yields.

Total Return on Investments

Total return on investments includes net investment income, equity in net income or loss of investment funds accounted for using the equity method, net realized gains and losses and the change in unrealized gains and losses generated by our investment portfolio. Total return is calculated on a pre-tax basis and before investment expenses and includes the effect of financial market conditions along with foreign currency fluctuations. Management uses total return on investments as a key measure of the return generated to common shareholders on the capital held in the business, and compares the return generated by our investment portfolio against benchmark returns which we measured our portfolio against during the periods. The benchmark return is a weighted average of the benchmarks assigned to each of our investment managers and vary based on the nature of the portfolios under management.

The following table summarizes the pre-tax total return (before investment expenses) of our investment portfolio compared to the benchmark return against which we measured our portfolio during the periods:

	Arch Portfolio (1)	Benchmark Return
Pre-tax total return (before investment expenses):		
2010 first quarter	1.58%	1.95%
2009 first quarter	1.09%	(0.45)%

(1) Our investment expenses were approximately 0.20% of average invested assets in the 2010 first quarter, compared to 0.15% in the 2009 first quarter.

Table of Contents

Comment on Non-GAAP Financial Measures

Throughout this filing, we present our operations in the way we believe will be the most meaningful and useful to investors, analysts, rating agencies and others who use our financial information in evaluating the performance of our company. This presentation includes the use of after-tax operating income available to common shareholders, which is defined as net income available to common shareholders, excluding net realized gains or losses, net impairment losses recognized in earnings, equity in net income or loss of investment funds accounted for using the equity method and net foreign exchange gains or losses, net of income taxes. The presentation of after-tax operating income available to common shareholders is a non-GAAP financial measure as defined in Regulation G. The reconciliation of such measure to net income available to common shareholders (the most directly comparable GAAP financial measure) in accordance with Regulation G is included under Results of Operations below.

We believe that net realized gains or losses, net impairment losses recognized in earnings, equity in net income or loss of investment funds accounted for using the equity method and net foreign exchange gains or losses in any particular period are not indicative of the performance of, or trends in, our business. Although net realized gains or losses, net impairment losses recognized in earnings, equity in net income or loss of investment funds accounted for using the equity method and net foreign exchange gains or losses are an integral part of our operations, the decision to realize investment gains or losses, the recognition of net impairment losses, the recognition of equity in net income or loss of investment funds accounted for using the equity method and the recognition of foreign exchange gains or losses are independent of the insurance underwriting process and result, in large part, from general economic and financial market conditions. Furthermore, certain users of our financial information believe that, for many companies, the timing of the realization of investment gains or losses is largely opportunistic. In addition, net impairment losses recognized in earnings on our investments represent other-than-temporary declines in expected recovery values on securities without actual realization. The use of the equity method on certain of our investments in certain funds that invest in fixed maturity securities is driven by the ownership structure of such funds (either limited partnerships or limited liability companies). In applying the equity method, these investments are initially recorded at cost and are subsequently adjusted based on our proportionate share of the net income or loss of the funds (which include changes in the market value of the underlying securities in the funds). This method of accounting is different from the way we account for our other fixed maturity securities and the timing of the recognition of equity in net income or loss of investment funds accounted for using the equity method may differ from gains or losses in the future upon sale or maturity of such investments. Due to these reasons, we exclude net realized gains or losses, net impairment losses recognized in earnings, equity in net income or loss of investment funds accounted for using the equity method and net foreign exchange gains or losses from the calculation of after-tax operating income available to common shareholders.

We believe that showing net income available to common shareholders exclusive of the items referred to above reflects the underlying fundamentals of our business since we evaluate the performance of and manage our business to produce an underwriting profit. In addition to presenting net income available to common shareholders, we believe that this presentation enables investors and other users of our financial information to analyze our performance in a manner similar to how management analyzes performance. We also believe that this measure follows industry practice and, therefore, allows the users of financial information to compare our performance with our industry peer group. We believe that the equity analysts and certain rating agencies which follow us and the insurance industry as a whole generally exclude these items from their analyses for the same reasons.

Table of Contents**RESULTS OF OPERATIONS**

The following table summarizes, on an after-tax basis, our consolidated financial data, including a reconciliation of after-tax operating income available to common shareholders to net income available to common shareholders:

		Three Months Ended March 31,	
	2010		2009
After-tax operating income available to common shareholders	\$	98,731	\$ 169,001
Net realized gains (losses), net of tax		45,503	(9,111)
Net impairment losses recognized in earnings, net of tax		(1,606)	(36,134)
Equity in net income (loss) of investment funds accounted for using the equity method, net of tax		29,050	(9,581)
Net foreign exchange gains, net of tax		38,855	25,694
Net income available to common shareholders	\$	210,533	\$ 139,869

The lower level of after-tax operating income in the 2010 first quarter compared to the 2009 first quarter resulted from a higher level of catastrophic events than in the 2009 first quarter along with the impacts of current insurance and reinsurance market conditions and lower interest yields.

Segment Information

We classify our businesses into two underwriting segments — insurance and reinsurance — and corporate and other (non-underwriting). Accounting guidance regarding disclosures about segments of an enterprise and related information requires certain disclosures about operating segments in a manner that is consistent with how management evaluates the performance of the segment. For a description of our underwriting segments, refer to Note 5, *Segment Information*, of the notes accompanying our consolidated financial statements. Management measures segment performance based on underwriting income or loss.

Table of Contents

Insurance Segment

The following table sets forth our insurance segment's underwriting results:

	Three Months Ended March 31,	
	2010	2009
Gross premiums written	\$ 633,576	\$ 638,409
Net premiums written	452,924	441,586
Net premiums earned	\$ 429,477	\$ 401,097
Fee income	753	870
Losses and loss adjustment expenses	(312,011)	(270,015)
Acquisition expenses, net	(67,431)	(57,623)
Other operating expenses	(80,720)	(62,908)
Underwriting income (loss)	\$ (29,932)	\$ 11,421
Underwriting Ratios		
Loss ratio	72.6%	67.3%
Acquisition expense ratio (1)	15.5%	14.1%
Other operating expense ratio	18.8%	15.7%
Combined ratio	106.9%	97.1%

(1) The acquisition expense ratio is adjusted to include certain fee income.

The components of the insurance segment's underwriting results for the 2010 first quarter and 2009 first quarter are discussed below.

Premiums Written. Gross premiums written by the insurance segment in the 2010 first quarter were 0.8% lower than in the 2009 first quarter as reductions in commercial aviation and casualty lines of business were partially offset by increases in executive assurance and professional liability business. The reduction in commercial aviation business primarily resulted from a strategic decision to reduce exposure while the lower level of casualty business was due to underwriting actions relating to the current market environment. Growth in executive assurance and professional liability business primarily resulted from contributions from business written by the insurance segment's European operations. Net premiums written increased by 2.6%, reflecting changes in the mix of business, reinstatement premiums and the impact of changes in reinsurance structure. For information regarding net premiums written produced by major line of business and geographic location, refer to note 5, Segment Information, of the notes accompanying our consolidated financial statements.

Net Premiums Earned. Net premiums earned by the insurance segment in the 2010 first quarter were 7.1% higher than in the 2009 first quarter, and reflect changes in net premiums written over the previous five quarters.

Table of Contents

Losses and Loss Adjustment Expenses. The table below shows the components of the insurance segment's loss ratio:

	Three Months Ended March 31,	
	2010	2009
Current year	71.7%	69.6%
Prior period reserve development	0.9%	(2.3)%
Loss ratio	72.6%	67.3%

Current Year Loss Ratio.

The insurance segment's current year loss ratio was 2.1 points higher in the 2010 first quarter compared to the 2009 period, primarily due to the lack of any significant catastrophic event activity in 2009, while the 2010 current year loss ratio included 5.6 points of catastrophic activity, primarily from the Chilean earthquake in February 2010. In addition, the 2010 current year loss ratio benefited from a higher contribution of property net premiums earned in the mix of business than in the 2009 first quarter.

Prior Period Reserve Development.

2010 first quarter: The insurance segment's net adverse development of \$3.8 million, or 0.9 points, reflected adverse development in a small number of high severity casualty claims from the 2003 and 2004 accident years (*i.e.*, the year in which a loss occurred) of \$10.0 million and \$6.0 million, respectively, which was partially offset by favorable development in short-tailed lines primarily consisting of reductions in property (including special risk other than marine) reserves from the 2006 to 2008 accident years of \$1.6 million, \$3.0 million and \$7.5 million, respectively. This favorable development was due to better-than-expected non-catastrophe claims activity.

2009 first quarter: The insurance segment's net favorable development of \$9.1 million, or 2.3 points, reflected reductions in reserves for professional liability of \$13.0 million driven by accident years 2005 to 2007 and healthcare of \$5.0 million driven by favorable development across all prior accident years. These were partially offset by adverse development on executive assurance reserves of \$6.1 million, driven by unfavorable development from the 2006 to 2008 accident years combined with favorable development from the 2005 and prior accident years, and property (including special risk) losses of \$4.6 million, driven by aviation losses from the 2005 to 2007 accident years.

Underwriting Expenses. The insurance segment's underwriting expense ratio was 34.3% in the 2010 first quarter, compared to 29.8% in the 2009 first quarter. The acquisition expense ratio was 15.5% for the 2010 first quarter, compared to 14.1% for the 2009 first quarter. The acquisition expense ratio reflects changes in the form of reinsurance ceded and mix of business compared to the 2009 first quarter. The other operating expense ratio for the 2010 first quarter included 1.4 points of costs incurred which are not currently expected to impact the insurance segment's operating expense ratio for the balance of 2010 while the 2009 first quarter ratio benefitted from 1.6 points of reductions in compensation costs which are non-recurring.

Table of Contents*Reinsurance Segment*

The following table sets forth our reinsurance segment's underwriting results:

	Three Months Ended March 31,	
	2010	2009
Gross premiums written	\$ 323,477	\$ 390,129
Net premiums written	314,830	381,277
Net premiums earned	\$ 240,440	\$ 299,467
Fee income	41	55
Losses and loss adjustment expenses	(116,040)	(130,527)
Acquisition expenses, net	(50,193)	(68,835)
Other operating expenses	(20,398)	(18,192)
Underwriting income	\$ 53,850	\$ 81,968
Underwriting Ratios		
Loss ratio	48.3%	43.6%
Acquisition expense ratio	20.9%	23.0%
Other operating expense ratio	8.5%	6.1%
Combined ratio	77.7%	72.7%

The components of the reinsurance segment's underwriting results for the 2010 first quarter and 2009 first quarter are discussed below.

Premiums Written. Gross premiums written by the reinsurance segment in the 2010 first quarter were 17.1% lower than in the 2009 first quarter, primarily due to share decreases and non-renewals in property other than property catastrophe business and casualty business, partially offset by growth in the reinsurance segment's other specialty lines. Net premiums written by the reinsurance segment in the 2010 first quarter were 17.4% lower than in the 2009 first quarter, primarily due to the items noted above. For information regarding net premiums written produced by major line of business and geographic location, refer to note 5, Segment Information, of the notes accompanying our consolidated financial statements.

Net Premiums Earned. Net premiums earned in the 2010 first quarter were 19.7% lower than in the 2009 first quarter, and reflect changes in net premiums written over the previous five quarters, including the mix and type of business written.

Table of Contents

Losses and Loss Adjustment Expenses. The table below shows the components of the reinsurance segment's loss ratio:

	Three Months Ended March 31,	
	2010	2009
Current year	63.5%	57.6%
Prior period reserve development	(15.2)%	(14.0)%
Loss ratio	48.3%	43.6%

Current Year Loss Ratio.

The reinsurance segment's current year loss ratio was 5.9 points higher in the 2010 first quarter compared to the 2009 period, primarily due to the higher level of current year catastrophic event activity in the 2010 first quarter. The 2010 first quarter current year loss ratio included 14.2 points related to current year catastrophic activity, compared to 2.7 points in the 2009 first quarter. Specific 2010 first quarter catastrophic events included the Chilean earthquake, European Windstorm Xynthia and the Australian hailstorms and floods. The reinsurance segment's 2010 first quarter loss ratio also reflected an increase in the underwriting profit in its property facultative operations, while the 2009 first quarter loss ratio included 1.2 points of losses related to trade credit business.

Prior Period Reserve Development.

2010 first quarter: The reinsurance segment's net favorable development of \$36.5 million, or 15.2 points, was primarily due to reductions in reserves in short-tailed lines of business. Such amount included favorable development in property catastrophe and property other than property catastrophe reserves of \$19.8 million, including \$5.3 million and \$8.9 million from the 2008 and 2009 underwriting years, respectively, and \$5.6 million from prior underwriting years. In addition, \$12.4 million of favorable development developed on other specialty reserves, including \$3.4 million, \$1.9 million and \$4.6 million from the 2004, 2008 and 2009 underwriting years, respectively. The 2010 first quarter loss ratio also benefitted from \$6.8 million of favorable development on marine and aviation business, primarily from the 2007 underwriting year. Such amounts were partially offset by adverse development in casualty business of \$3.2 million, including adverse development from the 2008 underwriting year of \$9.5 million and favorable development in other underwriting years.

2009 first quarter: The reinsurance segment's net favorable development of \$42.0 million, or 14.0 points, reflected reductions in short-tailed and long-tailed lines of business. Reductions in short-tailed lines included \$11.0 million of favorable development in other specialty reserves, including \$6.0 million from the 2004 underwriting year and \$3.8 million from the 2008 underwriting year, and \$11.0 million from property catastrophe and property other than property catastrophe reserves, including \$3.9 million, \$2.6 million and \$4.1 million from the 2005, 2007 and 2008 underwriting years, respectively. Favorable development included \$19.1 million from casualty business, including \$3.3 million, \$7.3 million and \$6.7 million from the 2002, 2003 and 2004 underwriting years.

Underwriting Expenses. The underwriting expense ratio for the reinsurance segment was 29.4% in the 2010 first quarter, compared to 29.1% in the 2009 first quarter. The acquisition expense ratio for the 2010 first quarter was 20.9%, compared to 23.0% for the 2009 first quarter. The comparison of the 2010 first quarter and 2009 first quarter acquisition expense ratios is influenced by, among other things, the mix and type of business written and earned and the level of ceding commission income. The increase in the other operating expense ratio primarily resulted

from the lower level of net premiums earned in the 2010 first quarter.

Table of Contents

Net Investment Income

The components of net investment income were derived from the following sources:

	Three Months Ended March 31,	
	2010	2009
Fixed maturities	\$ 97,661	\$ 96,958
Short-term investments	230	1,240
Other (1)	485	1,565
Gross investment income	98,376	99,763
Investment expenses	(5,404)	(3,881)
Net investment income	\$ 92,972	\$ 95,882

(1) Primarily consists of interest income on operating cash accounts, other investments and securities lending transactions.

The pre-tax investment income yield was 3.41% for the 2010 first quarter, compared to 3.45% for the 2009 fourth quarter and 3.82% for the 2009 first quarter, reflecting the lower prevailing interest rates available in the market. The pre-tax investment income yields were calculated based on amortized cost. Yields on future investment income may vary based on financial market conditions, investment allocation decisions and other factors.

Equity in Net Income (Loss) of Investment Funds Accounted for Using the Equity Method

We recorded \$29.1 million of equity in net income related to investment funds accounted for using the equity method in the 2010 first quarter, compared to \$9.6 million of equity in net losses for the 2009 first quarter. Due to the ownership structure of these investment funds, which invest in fixed maturity securities, we use the equity method. In applying the equity method, these investments are initially recorded at cost and are subsequently adjusted based on our proportionate share of the net income or loss of the funds (which include changes in the market value of the underlying securities in the funds). Fluctuations in the carrying value of the investment funds accounted for using the equity method may increase the volatility of our reported results of operations. The equity in net income recorded in the 2010 first quarter primarily resulted from recoveries in market values in U.S. and Euro-denominated bank loan funds which were significantly impacted by the extreme volatility in the capital and credit markets during the latter portion of 2008 and early 2009. Investment funds accounted for using the equity method totaled \$405.6 million at March 31, 2010, compared to \$391.9 million at December 31, 2009. At March 31, 2010, our portfolio included \$439.6 million of investments in bank loan funds, of which \$272.3 million are reflected in the investment funds accounted for using the equity method.

Table of Contents***Net Realized Gains or Losses***

Net realized gains (losses) were as follows, excluding net impairment losses recognized in earnings:

	Three Months Ended March 31,	
	2010	2009
Fixed maturities	\$ 40,215	\$ 6,170
Other investments	(700)	(18,586)
Other (1)	8,267	7,252
Net realized gains (losses)	\$ 47,782	\$ (5,164)

(1) Primarily consists of realized gains or losses related to investment-related derivatives and foreign currency forward contracts.

Net realized gains or losses from the sale of fixed maturities primarily resulted from our decisions to reduce credit exposure, changes in duration targets, relative value determinations and sales related to rebalancing investment portfolios. In addition, net realized gains or losses include changes in the market value of certain hybrid securities pursuant to applicable guidance. The fair market values of such securities at March 31, 2010 were approximately \$93.3 million, compared to \$84.8 million at December 31, 2009. We recorded realized losses of \$1.3 million for the 2010 first quarter, compared to realized gains of \$4.0 million for the 2009 first quarter.

Net Impairment Losses Recognized in Earnings

We review our investment portfolio each quarter to determine if declines in market value are other-than-temporary. The process for identifying declines in the market value of investments that are other-than-temporary involves consideration of several factors. These factors include (i) an analysis of the liquidity, business prospects and overall financial condition of the issuer, (ii) the time period in which there was a significant decline in value, and (iii) the significance of the decline. For the 2010 first quarter, we recorded \$1.6 million of credit related impairments in earnings, compared to \$36.1 million for the 2009 first quarter. The OTTI recorded in the 2010 first quarter primarily resulted from reductions in estimated recovery values on certain mortgage-backed and asset-backed securities following the review of such securities. See note 7,

Investment Information Other-Than-Temporary Impairments, of the notes accompanying our consolidated financial statements for additional information.

Other Expenses

Other expenses, which are included in our other operating expenses and part of corporate and other (non-underwriting), were \$5.7 million for the 2010 first quarter, compared to \$6.0 million for the 2009 first quarter. Such amounts primarily represent certain holding company costs necessary to support our worldwide insurance and reinsurance operations, share based compensation expense and costs associated with operating as a publicly traded company.

Net Foreign Exchange Gains or Losses

Net foreign exchange gains for the 2010 first quarter of \$38.6 million consisted of net unrealized gains of \$37.9 million and net realized gains of \$0.7 million, compared to net foreign exchange gains for the 2009 first quarter of \$25.2 million consisted of net unrealized gains of \$25.9 million and net realized losses of \$0.7 million. The 2010 first quarter net foreign exchange gains primarily resulted from the strengthening of the U.S. Dollar against the Euro and British Pound during the period. Net unrealized foreign exchange gains or losses result from the effects of revaluing our net insurance liabilities required to be settled in foreign currencies at

Table of Contents

each balance sheet date. Historically, we have held investments in foreign currencies which are intended to mitigate our exposure to foreign currency fluctuations in our net insurance liabilities. However, changes in the value of such investments due to foreign currency rate movements are reflected as a direct increase or decrease to shareholders' equity and are not included in the consolidated statements of income. As a result of the current financial and economic environment as well as the potential for additional investment returns, we may not match a portion of our projected liabilities in foreign currencies with investments in the same currencies, which could increase our exposure to foreign currency fluctuations and increase the volatility in our shareholders' equity.

CRITICAL ACCOUNTING POLICIES, ESTIMATES AND RECENT ACCOUNTING PRONOUNCEMENTS

Critical accounting policies, estimates and recent accounting pronouncements are discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our 2009 Form 10-K, updated where applicable in the notes accompanying our consolidated financial statements.

FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

Financial Condition

Investable Assets

The finance and investment committee of our board of directors establishes our investment policies and sets the parameters for creating guidelines for our investment managers. The finance and investment committee reviews the implementation of the investment strategy on a regular basis. Our current approach stresses preservation of capital, market liquidity and diversification of risk. While maintaining our emphasis on preservation of capital and liquidity, we expect our portfolio to become more diversified and, as a result, we may expand into areas which are not currently part of our investment strategy. Our Chief Investment Officer administers the investment portfolio, oversees our investment managers, formulates investment strategy in conjunction with our finance and investment committee and directly manages certain portions of our fixed income portfolio.

Table of Contents

The following table summarizes our invested assets:

	March 31, 2010	December 31, 2009
Fixed maturities available for sale, at market value	\$ 9,295,680	\$ 9,391,926
Fixed maturities pledged under securities lending agreements, at market value (1)	181,871	208,826
Total fixed maturities	9,477,551	9,600,752
Short-term investments available for sale, at market value	669,798	571,489
Short-term investments pledged under securities lending agreements, at market value (1)	2,350	3,994
Cash	338,708	334,571
TALF investments, at market value	406,997	250,265
Other investments		
Fixed income mutual funds	70,204	63,146
Privately held securities and other	193,404	109,026
Investment funds accounted for using the equity method	405,584	391,869
Total cash and investments (1)	11,564,596	11,325,112
Securities transactions entered into but not settled at the balance sheet date	(2,444)	50,790
Total investable assets	\$ 11,562,152	\$ 11,375,902

(1) In our securities lending transactions, we receive collateral in excess of the market value of the fixed maturities and short-term investments pledged under securities lending agreements. For purposes of this table, we have excluded the investment of collateral received and reinvested at March 31, 2010 and December 31, 2009 of \$178.0 million and \$207.0 million, respectively, and included the \$184.2 million and \$212.8 million, respectively, of fixed maturities and short-term investments pledged under securities lending agreements, at market value.

At March 31, 2010, our fixed income portfolio, which includes fixed maturity securities and short-term investments, had a AA+ average Standard & Poor's quality rating, an average effective duration of 2.77 years, and an average yield to maturity (imbedded book yield), before investment expenses, of 3.57%. At December 31, 2009, our fixed income portfolio had a AA+ average Standard & Poor's quality rating, an average effective duration of 2.87 years, and an average yield to maturity (imbedded book yield), before investment expenses, of 3.64%. At March 31, 2010, approximately \$6.55 billion, or 58%, of our total investments and cash was internally managed, compared to \$6.6 billion, or 58%, at December 31, 2009.

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

At March 31, 2010 and December 31, 2009, below-investment grade securities comprised approximately 5% of our fixed maturities and fixed maturities pledged under securities lending agreements. In accordance with our investment strategy, we invest in high yield fixed income securities which are included in Corporate bonds. Upon issuance, these securities are typically rated below investment grade (i.e., rating assigned by the major rating agencies of BB or less). At March 31, 2010, corporate bonds represented 27% of the total below investment grade securities at market value, mortgage backed securities represented 70% of the total and 3% were in other classes. At December 31, 2009, corporate bonds represented 27% of the total below investment

Table of Contents

grade securities at market value, mortgage backed securities represented 69% of the total and 4% were in other classes.

We determine estimated recovery values for our fixed maturities and fixed maturities pledged under securities lending agreements following a review of the business prospects, credit ratings, estimated loss given default factors and information received from asset managers and rating agencies for each security. For structured securities, we utilize underlying data, where available, for each security provided by asset managers and additional information from credit agencies in order to determine an expected recovery value for each security. The analysis provided by the asset managers includes expected cash flow projections under base case and stress case scenarios which modify expected default expectations and loss severities and slow down prepayment assumptions. In the tables above, securities at March 31, 2010 which were in an unrealized loss position of greater than 40% of amortized cost were primarily in asset backed and mortgage backed securities where the estimated market value for the securities was lower than our expected recovery value.

The following table summarizes our top ten exposures to fixed income corporate issuers by market value at March 31, 2010, excluding guaranteed amounts:

	Estimated Market Value
Banco Santander SA	\$ 90,032
JPMorgan Chase & Co.	76,935
General Electric Co.	59,284
Sovrisc BV	47,395
Total SA	45,236
Bank of America Corp.	44,799
Citigroup Inc.	44,793
The Goldman Sachs Group Inc.	41,547
Barclays PLC	39,856
Wells Fargo & Company	38,918
Total	\$ 528,795

At March 31, 2010, we held insurance enhanced municipal bonds, net of prerefunded bonds that are escrowed in U.S. government obligations, the estimated market value of which was approximately \$274.9 million, or approximately 2.5% of our total investable assets. These securities had an average rating of Aa3 by Moody's and AA by Standard & Poor's. Giving no effect to the insurance enhancement, the overall credit quality of our insured municipal bond portfolio had an average underlying rating of Aa3 by Moody's and AA by Standard & Poor's. The ratings were obtained from the individual rating agencies and were assigned a numerical amount with 1 being the highest rating. The average ratings were calculated using the weighted average market values of the individual bonds. The average ratings with and without the insurance enhancement are substantially the same at March 31, 2010. This is due to the fact that, in cases where the claims paying ratings of the guarantors are below investment grade, those ratings have been withdrawn from the bonds by the relevant rating agencies, and the insured ratings have been equated to the underlying ratings. Guarantors of our insurance enhanced municipal bonds, net of prerefunded bonds that are escrowed in U.S. government obligations, included National Public Finance Guarantee (f.k.a. MBIA Insurance Corporation) (\$116.1 million), Assured Guaranty Ltd. (\$78.8 million), Ambac Financial Group, Inc. (\$45.8 million), Financial Guaranty Insurance Company (\$21.5 million) and the Texas Permanent School Fund (\$12.7 million). We do not have a significant exposure to insurance enhanced asset-backed or mortgage-backed securities. We do not have any significant investments in companies which guarantee securities at March 31, 2010.

Our portfolio includes investments, such as mortgage-backed securities, which are subject to prepayment risk. At March 31, 2010, our investments in mortgage-backed securities (MBS), excluding commercial

Table of Contents

mortgage-backed securities, amounted to approximately \$1.85 billion, or 16.0% of total investable assets, compared to \$1.45 billion, or 12.7%, at December 31, 2009. As with other fixed income investments, the market value of these securities fluctuates depending on market and other general economic conditions and the interest rate environment. Changes in interest rates can expose us to changes in the prepayment rate on these investments. In periods of declining interest rates, mortgage prepayments generally increase and MBS are prepaid more quickly, requiring us to reinvest the proceeds at the then current market rates. Conversely, in periods of rising rates, mortgage prepayments generally fall, preventing us from taking full advantage of the higher level of rates. However, current economic conditions may curtail prepayment activity as refinancing becomes more difficult, thus limiting prepayments on MBS.

Since 2007, the residential mortgage market in the U.S. has experienced a variety of difficulties. During this time, delinquencies and losses with respect to residential mortgage loans generally have increased and may continue to increase, particularly in the subprime sector. In addition, during this period, residential property values in many states have declined or remained stable, after extended periods during which those values appreciated. A continued decline or an extended flattening in those values may result in additional increases in delinquencies and losses on residential mortgage loans generally, especially with respect to second homes and investment properties, and with respect to any residential mortgage loans where the aggregate loan amounts (including any subordinate loans) are close to or greater than the related property values. These developments may have a significant adverse effect on the prices of loans and securities, including those in our investment portfolio. The situation continues to have wide ranging consequences, including downward pressure on economic growth and the potential for increased insurance and reinsurance exposures, which could have an adverse impact on our results of operations, financial condition, business and operations. Our portfolio includes commercial mortgage backed securities (CMBS). At March 31, 2010, CMBS constituted approximately \$1.07 billion, or 9.3% of total investable assets, compared to \$1.19 billion, or 10.4%, at December 31, 2009. The commercial real estate market has experienced price deterioration, which could lead to increased delinquencies and defaults on commercial real estate mortgages.

Table of Contents

The following table provides information on our mortgage backed securities (MBS) and CMBS at March 31, 2010, excluding amounts guaranteed by the U.S. government and TALF investments:

	Issuance Year	Amortized Cost	Average Credit Quality	Total	Estimated Market Value % of Amortized Cost	% of Investable Assets
Non-agency MBS:	2003	\$ 3,212	AAA	\$ 3,100	96.5%	0.0%
	2004	21,869	A-	19,483	89.1%	0.2%
	2005	71,272	BBB-	59,706	83.8%	0.5%
	2006	54,118	B-	46,806	86.5%	0.4%
	2007	68,120	CCC+	58,596	86.0%	0.5%
	2008	11,797	CCC	9,663	81.9%	0.1%
	2009(6)	166,478	AAA	173,752	104.4%	1.5%
	2010(6)	1,934	AAA	1,982	102.5%	0.0%
Total non-agency MBS		\$ 398,800	A-	\$ 373,088	93.6%	3.2%
Non-agency CMBS:	1998	3,688	AAA	3,844	104.2%	0.0%
	1999	163	AAA	163	100.0%	0.0%
	2000	4,151	AAA	4,159	100.2%	0.0%
	2001	239,312	AAA	243,407	101.7%	2.1%
	2002	66,587	AAA	68,137	102.3%	0.6%
	2003	71,551	AAA	75,271	105.2%	0.7%
	2004	99,487	AAA	99,861	100.4%	0.9%
	2005	51,154	AAA	50,782	99.3%	0.4%
	2006	64,665	AAA	67,614	104.6%	0.6%
	2007	50,128	AAA	54,654	109.0%	0.5%
Total non-agency CMBS		\$ 650,886	AAA	\$ 667,892	102.6%	5.8%

Additional Statistics:

	Non-Agency MBS		Non-Agency CMBS (1)
	Re-REMICs	All Other	
Weighted average loan age (months)	39	50	92
Weighted average life (months) (2)	30	60	29
Weighted average loan-to-value % (3)	72.7%	69.9%	71.4%
Total delinquencies (4)	22.5%	20.2%	5.1%
Current credit support % (5)	40.7%	13.4%	25.1%

(1) Loans defeased with government/agency obligations represented approximately 27% of the collateral underlying our CMBS holdings. Non-agency CMBS statistics exclude securities backed by cell tower assets for which current data was not available (par value of \$106 million, amortized cost of \$103 million and an estimated market value of \$110 million).

(2) The weighted average life for MBS is based on the interest rates in effect at March 31, 2010. The weighted average life for CMBS reflects the average life of the collateral underlying our CMBS holdings.

(3) The range of loan-to-values is 37.9% to 85.6% on MBS and 56.5% to 113.7% on CMBS.

(4) Total delinquencies includes 60 days and over.

(5) Current credit support % represents the % for a collateralized mortgage obligation (CMO) or CMBS class/tranche from other subordinate classes in the same CMO or CMBS deal.

(6) Primarily represents Re-REMICs issued in 2009 and 2010 with an average credit quality of AAA from Fitch Ratings.

Table of Contents

The following table provides information on our asset backed securities (ABS), excluding TALF investments, at March 31, 2010:

	Amortized Cost	Average Credit Quality	Total	Estimated Market Value % of Amortized Cost	% of Investable Assets
Sector:					
Autos (1)	\$ 228,717	AAA	\$ 235,400	102.9%	2.0%
Credit cards (2)	240,212	AAA	250,983	104.5%	2.2%
Rate reduction bonds (3)	34,451	AAA	35,411	102.8%	0.3%
Equipment (4)	25,923	AAA	26,944	103.9%	0.2%
Student loans (5)	20,500	AAA	21,674	105.7%	0.2%
Other	9,399	AA+	8,806	93.7%	0.1%
	559,202	AAA	579,218	103.6%	5.0%
Home equity (6)	\$ 6,579	AAA	\$ 5,788	88.0%	0.1%
	293	A	294	100.3%	0.0%
	646	BBB	632	97.8%	0.0%
	9,651	BB to B	6,931	71.8%	0.1%
	2,019	CCC to C	1,991	98.6%	0.0%
	246	D	72	29.3%	0.0%
	19,434	BBB	15,708	80.8%	0.1%
Total ABS	\$ 578,636	AAA	\$ 594,926	102.8%	5.1%

The effective duration of the total ABS was 1.2 years at March 31, 2010.

-
- (1) The weighted average credit support % on autos is 32.5%.
 - (2) The weighted average credit support % on credit cards is 22.8%.
 - (3) The weighted average credit support % on rate reduction bonds is 20.1%.
 - (4) The weighted average credit support % on equipment is 12.6%.
 - (5) The weighted average credit support % on student loans is 6.8%.
 - (6) The weighted average credit support % on home equity is 23.7%.

At March 31, 2010, our fixed income portfolio included \$50.3 million par value in sub-prime securities with an estimated market value of \$19.2 million and an average credit quality of BBB from Standard & Poor's and Baa3 from Moody's. At December 31, 2009, our fixed income portfolio included \$52.1 million par value in sub-prime securities with an estimated market value of \$18.5 million and an average credit quality of BBB+ from Standard & Poor's and Baa3 from Moody's. Such amounts were primarily in the home equity sector of our asset backed securities, with the balance in other ABS, MBS and CMBS sectors. We define sub-prime mortgage-backed securities as investments in which the underlying loans primarily exhibit one or more of the following characteristics: low FICO scores, above-prime interest rates, high loan-to-value ratios or high debt-to-income ratios. In addition, the portfolio of collateral backing our securities lending program contains approximately \$16.6 million estimated market value of sub-prime securities with an average credit quality of B from Standard & Poor's and B2 from Moody's at March 31,

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

2010, compared to approximately \$18.9 million estimated market value with an average credit quality of BB from Standard & Poor's and B2 from Moody's at December 31, 2009.

Certain of our investments, primarily those included in other investments and investment funds accounted for using the equity method on our balance sheet, may use leverage to achieve a higher rate of return. While leverage presents opportunities for increasing the total return of such investments, it may increase losses as well. Accordingly, any event that adversely affects the value of the underlying securities held by such

Table of Contents

investments would be magnified to the extent leverage is used and our potential losses from such investments would be magnified. In addition, the structures used to generate leverage may lead to such investment funds being required to meet covenants based on market valuations and asset coverage. Market valuation declines in the funds could force the sale of investments into a depressed market, which may result in significant additional losses. Alternatively, the funds may attempt to deleverage by raising additional equity or potentially changing the terms of the established financing arrangements. We may choose to participate in the additional funding of such investments. Our investment commitments related to investment funds accounted for using the equity method and other investments totaled approximately \$95.0 million at March 31, 2010.

Our investment strategy allows for the use of derivative instruments. We utilize various derivative instruments such as futures contracts to enhance investment performance, replicate investment positions or manage market exposures and duration risk that would be allowed under our investment guidelines if implemented in other ways. See note 9, *Derivative Instruments*, of the notes accompanying our consolidated financial statements for additional disclosures concerning derivatives.

Other investments totaled \$263.6 million at March 31, 2010, compared to \$172.2 million at December 31, 2009. Investment funds accounted for using the equity method totaled \$405.6 million at March 31, 2010, compared to \$391.9 million at December 31, 2009. See note 7, *Investment Information Other Investments* and *Investment Information Investment Funds Accounted for Using the Equity Method* of the notes accompanying our consolidated financial statements for further details.

Accounting guidance regarding fair value measurements addresses how companies should measure fair value when they are required to use a fair value measure for recognition or disclosure purposes under GAAP and provides a common definition of fair value to be used throughout GAAP. See note 8, *Fair Value* of the notes accompanying our consolidated financial statements for a summary of our financial assets and liabilities measured at fair value at March 31, 2010 and December 31, 2009 by level.

Reinsurance Recoverables

We monitor the financial condition of our reinsurers and attempt to place coverages only with substantial, financially sound carriers. At March 31, 2010, approximately 90.2% of reinsurance recoverables on paid and unpaid losses (not including prepaid reinsurance premiums) of \$1.71 billion were due from carriers which had an A.M. Best rating of *A-* or better and the largest reinsurance recoverables from any one carrier was less than 5.5% of our total shareholders' equity. At December 31, 2009, approximately 90.0% of reinsurance recoverables on paid and unpaid losses (not including prepaid reinsurance premiums) of \$1.72 billion were due from carriers which had an A.M. Best rating of *A-* or better and the largest reinsurance recoverables from any one carrier was less than 5.8% of our total shareholders' equity.

Reinsurance recoverables from Flatiron Re Ltd. (*Flatiron*), which is not rated by A.M. Best, were \$92.3 million at March 31, 2010, compared to \$97.6 million at December 31, 2009. Flatiron is required to contribute funds into a trust for the benefit of Arch Re Bermuda. The recoverable from Flatiron was fully collateralized through such trust at March 31, 2010 and December 31, 2009.

Reserves for Losses and Loss Adjustment Expenses

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

We establish reserves for losses and loss adjustment expenses (Loss Reserves) which represent estimates involving actuarial and statistical projections, at a given point in time, of our expectations of the ultimate settlement and administration costs of losses incurred. Estimating Loss Reserves is inherently difficult, which is exacerbated by the fact that we are a relatively new company with relatively limited historical experience upon which to base such estimates. We utilize actuarial models as well as available historical insurance industry loss ratio experience and loss development patterns to assist in the establishment of Loss Reserves. Actual losses and

Table of Contents

loss adjustment expenses paid will deviate, perhaps substantially, from the reserve estimates reflected in our financial statements.

At March 31, 2010 and December 31, 2009, our Loss Reserves, net of unpaid losses and loss adjustment expenses recoverable, by type and by operating segment were as follows:

	March 31, 2010	December 31, 2009
Insurance:		
Case reserves	\$ 1,158,171	\$ 1,166,441
IBNR reserves	2,504,361	2,431,193
Total net reserves	\$ 3,662,532	\$ 3,597,634
Reinsurance:		
Case reserves	\$ 783,439	\$ 812,455
Additional case reserves	80,146	61,226
IBNR reserves	1,728,472	1,742,597
Total net reserves	\$ 2,592,057	\$ 2,616,278
Total:		
Case reserves	\$ 1,941,610	\$ 1,978,896
Additional case reserves	80,146	61,226
IBNR reserves	4,232,833	4,173,790
Total net reserves	\$ 6,254,589	\$ 6,213,912

At March 31, 2010 and December 31, 2009, the insurance segment's Loss Reserves by major line of business, net of unpaid losses and loss adjustment expenses recoverable, were as follows:

	March 31, 2010	December 31, 2009
Casualty	\$ 660,579	\$ 641,793
Executive assurance	550,739	536,151
Property, energy, marine and aviation	528,237	533,859
Professional liability	508,084	504,454
Programs	459,099	452,143
Construction	431,124	421,729
Healthcare	142,770	139,414
National accounts casualty	106,519	96,251
Surety	86,371	89,501
Travel and accident	28,673	29,033
Other	160,337	153,306
Total net reserves	\$ 3,662,532	\$ 3,597,634

Table of Contents

At March 31, 2010 and December 31, 2009, the reinsurance segment's Loss Reserves by major line of business, net of unpaid losses and loss adjustment expenses recoverable, were as follows:

	March 31, 2010	December 31, 2009
Casualty	\$ 1,788,426	\$ 1,792,750
Property excluding property catastrophe	311,757	322,476
Marine and aviation	212,707	228,708
Property catastrophe	128,852	111,784
Other specialty	106,558	116,799
Other	43,757	43,761
Total net reserves	\$ 2,592,057	\$ 2,616,278

Shareholders' Equity

Our shareholders' equity was \$4.38 billion at March 31, 2010, compared to \$4.32 billion at December 31, 2009. The increase in the three months ended March 31, 2010 of \$55.4 million was attributable to net income, partially offset by share repurchase activity.

Book Value per Common Share

The following table presents the calculation of book value per common share at March 31, 2010 and December 31, 2009:

(U.S. dollars in thousands, except share data)	March 31, 2010	December 31, 2009
Calculation of book value per common share:		
Total shareholders' equity	\$ 4,378,757	\$ 4,323,349
Less preferred shareholders' equity	(325,000)	(325,000)
Common shareholders' equity	\$ 4,053,757	\$ 3,998,349
Common shares outstanding (1)	52,709,934	54,761,678
Book value per common share	\$ 76.91	\$ 73.01

(1) Excludes the effects of 4,595,975 and 5,016,104 stock options and 258,213 and 261,012 restricted stock units outstanding at March 31, 2010 and December 31, 2009, respectively.

Liquidity and Capital Resources

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

ACGL is a holding company whose assets primarily consist of the shares in its subsidiaries. Generally, ACGL depends on its available cash resources, liquid investments and dividends or other distributions from its subsidiaries to make payments, including the payment of debt service obligations and operating expenses it may incur and any dividends or liquidation amounts with respect to the series A non-cumulative and series B non-cumulative preferred shares and common shares. ACGL's readily available cash, short-term investments and marketable securities, excluding amounts held by our regulated insurance and reinsurance subsidiaries, totaled \$22.4 million at March 31, 2010, compared to \$25.7 million at December 31, 2009. During the 2010 first quarter, ACGL received dividends of \$180.0 million from Arch Re Bermuda which were primarily used to fund the share repurchase program described below.

Table of Contents

The ability of our regulated insurance and reinsurance subsidiaries to pay dividends or make distributions or other payments to us is dependent on their ability to meet applicable regulatory standards. Under Bermuda law, Arch Re Bermuda is required to maintain an enhanced capital requirement which must equal or exceed its minimum solvency margin (*i.e.*, the amount by which the value of its general business assets must exceed its general business liabilities) equal to the greatest of (1) \$100.0 million, (2) 50% of net premiums written (being gross premiums written less any premiums ceded by Arch Re Bermuda, but Arch Re Bermuda may not deduct more than 25% of gross premiums when computing net premiums written) and (3) 15% of net discounted aggregated losses and loss expense provisions and other insurance reserves. Arch Re Bermuda is prohibited from declaring or paying any dividends during any financial year if it is not in compliance with its enhanced capital requirement, minimum solvency margin or minimum liquidity ratio. In addition, Arch Re Bermuda is prohibited from declaring or paying in any financial year dividends of more than 25% of its total statutory capital and surplus (as shown on its previous financial year's statutory balance sheet) unless it files, at least seven days before payment of such dividends, with the Bermuda Monetary Authority (BMA) an affidavit stating that it will continue to meet the required margins. In addition, Arch Re Bermuda is prohibited, without prior approval of the BMA, from reducing by 15% or more its total statutory capital, as set out in its previous year's statutory financial statements. Arch Re Bermuda is required to meet enhanced capital requirements and a target capital level (defined as 120% of the enhanced capital requirements) as calculated using a new risk based capital model called the Bermuda Solvency Capital Requirement (BSCR) model. At December 31, 2009, as determined under Bermuda law, Arch Re Bermuda had statutory capital of \$2.23 billion and statutory capital and surplus of \$4.26 billion, which amounts were in compliance with Arch Re Bermuda's enhanced capital requirement at such date. Such amounts include ownership interests in U.S. insurance and reinsurance subsidiaries. Accordingly, Arch Re Bermuda can pay approximately \$1.07 billion to ACGL during 2010 without providing an affidavit to the BMA, as discussed above. In addition to meeting applicable regulatory standards, the ability of our insurance and reinsurance subsidiaries to pay dividends to intermediate parent companies owned by Arch Re Bermuda is also constrained by our dependence on the financial strength ratings of our insurance and reinsurance subsidiaries from independent rating agencies. The ratings from these agencies depend to a large extent on the capitalization levels of our insurance and reinsurance subsidiaries. We believe that ACGL has sufficient cash resources and available dividend capacity to service its indebtedness and other current outstanding obligations.

Our insurance and reinsurance subsidiaries are required to maintain assets on deposit, which primarily consist of fixed maturities, with various regulatory authorities to support their operations. The assets on deposit are available to settle insurance and reinsurance liabilities to third parties. Our insurance and reinsurance subsidiaries also have investments in segregated portfolios primarily to provide collateral or guarantees for letters of credit to third parties. At March 31, 2010 and December 31, 2009, such amounts approximated \$1.51 billion and \$1.49 billion, respectively. In addition, certain of our operating subsidiaries maintain assets in trust accounts as collateral for insurance and reinsurance transactions with affiliated companies. At March 31, 2010 and December 31, 2009, such amounts approximated \$4.30 billion and \$4.28 billion, respectively.

ACGL, through its subsidiaries, provides financial support to certain of its insurance subsidiaries and affiliates, through certain reinsurance arrangements essential to the ratings of such subsidiaries. Except as described in the preceding sentence, or where express reinsurance, guarantee or other financial support contractual arrangements are in place, each of ACGL's subsidiaries or affiliates is solely responsible for its own liabilities and commitments (and no other ACGL subsidiary or affiliate is so responsible). Any reinsurance arrangements, guarantees or other financial support contractual arrangements that are in place are solely for the benefit of the ACGL subsidiary or affiliate involved and third parties (creditors or insureds of such entity) are not express beneficiaries of such arrangements.

Our insurance and reinsurance operations provide liquidity in that premiums are received in advance, sometimes substantially in advance, of the time losses are paid. The period of time from the occurrence of a claim through the settlement of the liability may extend many years into the future. Sources of liquidity include cash flows from operations, financing arrangements or routine sales of investments.

Table of Contents

As part of our investment strategy, we seek to establish a level of cash and highly liquid short-term and intermediate-term securities which, combined with expected cash flow, is believed by us to be adequate to meet our foreseeable payment obligations. However, due to the nature of our operations, cash flows are affected by claim payments that may comprise large payments on a limited number of claims and which can fluctuate from year to year. We believe that our liquid investments and cash flow will provide us with sufficient liquidity in order to meet our claim payment obligations. However, the timing and amounts of actual claim payments related to recorded Loss Reserves vary based on many factors, including large individual losses, changes in the legal environment, as well as general market conditions. The ultimate amount of the claim payments could differ materially from our estimated amounts. Certain lines of business written by us, such as excess casualty, have loss experience characterized as low frequency and high severity. The foregoing may result in significant variability in loss payment patterns. The impact of this variability can be exacerbated by the fact that the timing of the receipt of reinsurance recoverables owed to us may be slower than anticipated by us. Therefore, the irregular timing of claim payments can create significant variations in cash flows from operations between periods and may require us to utilize other sources of liquidity to make these payments, which may include the sale of investments or utilization of existing or new credit facilities or capital market transactions. If the source of liquidity is the sale of investments, we may be forced to sell such investments at a loss, which may be material.

Our investments in certain securities, including certain fixed income and structured securities, investments in funds accounted for using the equity method, other investments and our investment in Gulf Re (joint venture) may be illiquid due to contractual provisions or investment market conditions. If we require significant amounts of cash on short notice in excess of anticipated cash requirements, then we may have difficulty selling these investments in a timely manner or may be forced to sell or terminate them at unfavorable values.

Consolidated net cash provided by operating activities was \$184.6 million for the 2010 first quarter, compared to \$294.8 million for the 2009 first quarter. Comparability between the two periods was affected by an unearned premium portfolio transfer which lowered the 2010 first quarter cash flow by \$15.0 million, but increased the 2009 first quarter cash flow by \$25.0 million. The remaining decline in cash flow from operations reflected a lower level of premium collections and an increase in paid losses as the Company's insurance and reinsurance loss reserves continue to mature. Cash flow from operating activities are provided by premiums collected, fee income, investment income and collected reinsurance recoverables, offset by losses and loss adjustment expense payments, reinsurance premiums paid, operating costs and current taxes paid.

On a consolidated basis, our aggregate cash and investments totaled \$11.6 billion at March 31, 2010, compared to \$11.3 billion at December 31, 2009. The primary goals of our asset liability management process are to satisfy the insurance liabilities, manage the interest rate risk embedded in those insurance liabilities and maintain sufficient liquidity to cover fluctuations in projected liability cash flows, including debt service obligations. Generally, the expected principal and interest payments produced by our fixed income portfolio adequately fund the estimated runoff of our insurance reserves. Although this is not an exact cash flow match in each period, the substantial degree by which the market value of the fixed income portfolio exceeds the expected present value of the net insurance liabilities, as well as the positive cash flow from newly sold policies and the large amount of high quality liquid bonds, provide assurance of our ability to fund the payment of claims and to service our outstanding debt without having to sell securities at distressed prices in an illiquid market or access credit facilities.

We expect that our operational needs, including our anticipated insurance obligations and operating and capital expenditure needs, for the next twelve months, at a minimum, will be met by our balance of cash, short-term investments and our credit facilities, as well as by funds generated from underwriting activities and investment income and proceeds on the sale or maturity of our investments.

Table of Contents

We monitor our capital adequacy on a regular basis and will seek to adjust our capital base (up or down) according to the needs of our business. The future capital requirements of our business will depend on many factors, including our ability to write new business successfully and to establish premium rates and reserves at levels sufficient to cover losses. Our ability to underwrite is largely dependent upon the quality of our claims paying and financial strength ratings as evaluated by independent rating agencies. In particular, we require (1) sufficient capital to maintain our financial strength ratings, as issued by several ratings agencies, at a level considered necessary by management to enable our key operating subsidiaries to compete; (2) sufficient capital to enable our underwriting subsidiaries to meet the capital adequacy tests performed by statutory agencies in the U.S. and other key markets; and (3) letters of credit and other forms of collateral that are necessary for our non-U.S. operating companies because they are non-admitted under U.S. state insurance regulations.

As part of our capital management program, we may seek to raise additional capital or may seek to return capital to our shareholders through share repurchases, cash dividends or other methods (or a combination of such methods). Any such determination will be at the discretion of our board of directors and will be dependent upon our profits, financial requirements and other factors, including legal restrictions, rating agency requirements and such other factors as our board of directors deems relevant.

The board of directors of ACG has authorized the investment of up to \$2.5 billion in ACG's common shares through a share repurchase program. Such amount consisted of a \$1.0 billion authorization in February 2007, a \$500 million authorization in May 2008, and a \$1.0 billion authorization in November 2009. Repurchases under the program may be effected from time to time in open market or privately negotiated transactions through December 2011. Since the inception of the share repurchase program, ACG has repurchased approximately 24.5 million common shares for an aggregate purchase price of \$1.69 billion. During the 2010 first quarter, ACG repurchased 2.5 million common shares for an aggregate purchase price of \$181.3 million, compared to a de minimis number of shares and aggregate purchase price of \$1.6 million during the 2009 period. Weighted average shares outstanding for the 2010 first quarter were reduced by 23.5 million shares, compared to 15.3 million shares for the 2009 period. At March 31, 2010, approximately \$810.1 million of share repurchases were available under the program.

The timing and amount of the repurchase transactions under this program will depend on a variety of factors, including market conditions and corporate and regulatory considerations. We will continue to monitor our share price and, depending upon results of operations, market conditions and the development of the economy, as well as other factors, we will consider share repurchases on an opportunistic basis.

To the extent that our existing capital is insufficient to fund our future operating requirements or maintain such ratings, we may need to raise additional funds through financings or limit our growth. Given the recent severe disruptions in the public debt and equity markets, including among other things, widening of credit spreads, lack of liquidity and bankruptcies, we can provide no assurance that, if needed, we would be able to obtain additional funds through financing on satisfactory terms or at all. Continued adverse developments in the financial markets, such as disruptions, uncertainty or volatility in the capital and credit markets, may result in realized and unrealized capital losses that could have a material adverse effect on our results of operations, financial position and our businesses, and may also limit our access to capital required to operate our business.

If we are not able to obtain adequate capital, our business, results of operations and financial condition could be adversely affected, which could include, among other things, the following possible outcomes: (1) potential downgrades in the financial strength ratings assigned by ratings agencies to our operating subsidiaries, which could place those operating subsidiaries at a competitive disadvantage compared to higher-rated competitors; (2) reductions in the amount of business that our operating subsidiaries are able to write in order to meet capital adequacy-based tests enforced by statutory agencies; and (3) any resultant ratings downgrades could, among other things, affect our ability to write business and increase the cost of bank credit and letters of credit. In addition, under certain of the reinsurance agreements assumed by our reinsurance operations, upon the occurrence of a ratings downgrade or other specified triggering event with respect to our reinsurance operations,

Table of Contents

such as a reduction in surplus by specified amounts during specified periods, our ceding company clients may be provided with certain rights, including, among other things, the right to terminate the subject reinsurance agreement and/or to require that our reinsurance operations post additional collateral.

In addition to common share capital, we depend on external sources of finance to support our underwriting activities, which can be in the form (or any combination) of debt securities, preference shares, common equity and bank credit facilities providing loans and/or letters of credit. As noted above, equity or debt financing, if available at all, may be on terms that are unfavorable to us. In the case of equity financings, dilution to our shareholders could result, and, in any case, such securities may have rights, preferences and privileges that are senior to those of our outstanding securities.

In 2006, we entered into a five-year agreement for a \$300.0 million unsecured revolving loan and letter of credit facility and a \$1.0 billion secured letter of credit facility. Under the terms of the agreement, Arch Reinsurance Company (Arch Re U.S.) is limited to issuing \$100.0 million of unsecured letters of credit as part of the \$300.0 million unsecured revolving loan. Arch Re Bermuda also has access to other letter of credit facilities, some of which are available on a limited basis for limited purposes. Refer to note 4, Debt and Financing Arrangements Letter of Credit and Revolving Credit Facilities, of the notes accompanying our consolidated financial statements for a discussion of our available facilities, applicable covenants on such facilities and available capacity. It is anticipated that the available facilities will be renewed (or replaced) on expiry, but such renewal (or replacement) will be subject to the availability of credit from banks which we utilize. Given the recent disruptions in the capital markets, we can provide no assurance that we will be able to renew the facilities in August 2011 on satisfactory terms and, if renewed, the costs of the facilities may be significantly higher than the costs of our existing facilities.

During 2006, ACGL completed two public offerings of non-cumulative preferred shares. On February 1, 2006, \$200.0 million principal amount of 8.0% series A non-cumulative preferred shares (series A preferred shares) were issued with net proceeds of \$193.5 million and, on May 24, 2006, \$125.0 million principal amount of 7.875% series B non-cumulative preferred shares (series B preferred shares) and together with the series A preferred shares, the preferred shares) were issued with net proceeds of \$120.9 million. The net proceeds of the offerings were used to support the underwriting activities of ACGL's insurance and reinsurance subsidiaries. ACGL has the right to redeem all or a portion of each series of preferred shares at a redemption price of \$25.00 per share on or after (1) February 1, 2011 for the series A preferred shares and (2) May 15, 2011 for the series B preferred shares. Dividends on the preferred shares are non-cumulative. Consequently, in the event dividends are not declared on the preferred shares for any dividend period, holders of preferred shares will not be entitled to receive a dividend for such period, and such undeclared dividend will not accrue and will not be payable. Holders of preferred shares will be entitled to receive dividend payments only when, as and if declared by ACGL's board of directors or a duly authorized committee of ACGL's board of directors. Any such dividends will be payable from the date of original issue on a non-cumulative basis, quarterly in arrears. To the extent declared, these dividends will accumulate, with respect to each dividend period, in an amount per share equal to 8.0% of the \$25.00 liquidation preference per annum for the series A preferred shares and 7.875% of the \$25.00 liquidation preference per annum for the series B preferred shares. During the three month periods ended March 31, 2010 and 2009, we paid \$6.5 million to holders of the preferred shares and, at March 31, 2010, had declared an aggregate of \$3.3 million of dividends to be paid to holders of the preferred shares.

In March 2009, ACGL and Arch Capital Group (U.S.) Inc. filed a universal shelf registration statement with the SEC. This registration statement allows for the possible future offer and sale by us of various types of securities, including unsecured debt securities, preference shares, common shares, warrants, share purchase contracts and units and depositary shares. The shelf registration statement enables us to efficiently access the public debt and/or equity capital markets in order to meet our future capital needs. The shelf registration statement also allows selling shareholders to resell common shares that they own in one or more offerings from time to time. We will not receive any proceeds from any shares offered by the selling shareholders. This report is not an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any

Table of Contents

state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

We purchase asset-backed and commercial mortgage-backed securities under the FRBNY's TALF program. As of March 31, 2010, we had \$407.0 of securities under TALF which are reflected as TALF investments, at market value and \$346.7 million of secured financing from the FRBNY which is reflected as TALF borrowings, at market value. As of December 31, 2009, we had \$250.3 million TALF investments, at market value and \$217.6 million of TALF borrowings, at market value. Refer to note 4, Debt and Financing Arrangements TALF Program, of the notes accompanying our consolidated financial statements for further details on the TALF Program.

At March 31, 2010, ACGL's capital of \$4.78 billion consisted of \$300.0 million of senior notes, representing 6.3% of the total, \$100.0 million of revolving credit agreement borrowings due in August 2011, representing 2.1% of the total, \$325.0 million of preferred shares, representing 6.8% of the total, and common shareholders' equity of \$4.05 billion, representing the balance. At December 31, 2009, ACGL's capital of \$4.72 billion consisted of \$300.0 million of senior notes, representing 6.4% of the total, \$100.0 million of revolving credit agreement borrowings due in August 2011, representing 2.1% of the total, \$325.0 million of preferred shares, representing 6.9% of the total, and common shareholders' equity of \$4.0 billion, representing the balance. TALF borrowings are not included in the calculation of total capital. The increase in capital during the three month period ending March 31, 2010 was primarily attributable to net income, partially offset by share repurchase activity.

Off-Balance Sheet Arrangements

Off-balance sheet arrangements are discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2009.

Table of Contents**Market Sensitive Instruments and Risk Management**

In accordance with the SEC's Financial Reporting Release No. 48, we performed a sensitivity analysis to determine the effects that market risk exposures could have on the future earnings, fair values or cash flows of our financial instruments as of March 31, 2010. (See section captioned Management's Discussion and Analysis of Financial Condition and Results of Operations Market Sensitive Instruments and Risk Management included in our 2009 Annual Report on Form 10-K.) Market risk represents the risk of changes in the fair value of a financial instrument and is comprised of several components, including liquidity, basis and price risks. An analysis of material changes in market risk exposures at March 31, 2010 that affect the quantitative and qualitative disclosures presented as of December 31, 2009 were as follows:

Investment Market Risk

Fixed Income Securities. We invest in interest rate sensitive securities, primarily debt securities. We consider the effect of interest rate movements on the market value of our fixed maturities, fixed maturities pledged under securities lending agreements, short-term investments and certain of our other investments which invest in fixed income securities and the corresponding change in unrealized appreciation. As interest rates rise, the market value of our interest rate sensitive securities falls, and the converse is also true. Based on historical observations, there is a low probability that all interest rate yield curves would shift in the same direction at the same time. Furthermore, in recent months interest rate movements in many credit sectors have exhibited a much lower correlation to changes in U.S. Treasury yields. Accordingly, the actual effect of interest rate movements may differ materially from the amounts set forth below.

The following table summarizes the effect that an immediate, parallel shift in the interest rate yield curve would have had on the portfolio at March 31, 2010 and December 31, 2009:

(U.S. dollars in millions)	Interest Rate Shift in Basis Points					
	-100	-50	-	50	100	
March 31, 2010:						
Total market value	\$ 10,901.6	\$ 10,769.2	\$ 10,618.9	\$ 10,471.8	\$ 10,318.8	
Market value change from base	2.66%	1.42%		(1.39)%	(2.83)%	
Change in unrealized value	\$ 282.7	\$ 150.3	\$	\$ (147.1)	\$ (300.1)	
December 31, 2009:						
Total market value	\$ 11,227.5	\$ 11,078.3	\$ 10,920.7	\$ 10,757.7	\$ 10,593.9	
Market value change from base	2.81%	1.44%		(1.49)%	(2.99)%	
Change in unrealized value	\$ 306.8	\$ 157.6	\$	\$ (163.0)	\$ (326.8)	

In addition, we consider the effect of credit spread movements on the market value of our fixed maturities, fixed maturities pledged under securities lending agreements, short-term investments and certain of our other investments and investment funds accounted for using the equity method which invest in fixed income securities and the corresponding change in unrealized appreciation. As credit spreads widen, the market value of our fixed income securities falls, and the converse is also true.

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

Table of Contents

The following table summarizes the effect that an immediate, parallel shift in credit spreads in a static interest rate environment would have had on the portfolio at March 31, 2010 and December 31, 2009:

(U.S. dollars in millions)	Credit Spread Shift in Basis Points				
	-100	-50	-	50	100
March 31, 2010:					
Total market value	\$ 10,869.6	\$ 10,746.2	\$ 10,618.9	\$ 10,485.7	\$ 10,348.6
Market value change from base	2.36%	1.20%		(1.25)%	(2.55)%
Change in unrealized value	\$ 250.7	\$ 127.3	\$	\$ (133.2)	\$ (270.3)
December 31, 2009:					
Total market value	\$ 11,198.4	\$ 11,061.6	\$ 10,920.7	\$ 10,775.8	\$ 10,627.8
Market value change from base	2.54%	1.29%		(1.33)%	(2.68)%
Change in unrealized value	\$ 277.7	\$ 140.9	\$	\$ (144.9)	\$ (292.9)

Another method that attempts to measure portfolio risk is Value-at-Risk (VaR). VaR attempts to take into account a broad cross-section of risks facing a portfolio by utilizing relevant securities volatility data skewed towards the most recent months and quarters. VaR measures the amount of a portfolio at risk for outcomes 1.65 standard deviations from the mean based on normal market conditions over a one year time horizon and is expressed as a percentage of the portfolio's initial value. In other words, 95% of the time, should the risks taken into account in the VaR model perform per their historical tendencies, the portfolio's loss in any one year period is expected to be less than or equal to the calculated VaR, stated as a percentage of the measured portfolio's initial value. As of March 31, 2010, our portfolio's VaR was estimated to be 4.01%, compared to an estimated 4.79% at December 31, 2009.

Privately Held Securities and Equity Securities. Our investment portfolio includes an allocation to privately held securities and equity securities. At March 31, 2010 and December 31, 2009, the market value of our investments in privately held securities and equity securities (excluding our investment in Aeolus LP which is accounted for using the equity method) totaled \$134.0 million and \$44.5 million, respectively. These securities are exposed to price risk, which is the potential loss arising from decreases in market value. An immediate hypothetical 10% depreciation in the value of each position would reduce the market value of such investments by approximately \$13.4 million and \$4.5 million at March 31, 2010 and December 31, 2009, respectively, and would have decreased book value per common share by approximately \$0.25 and \$0.08, respectively.

Investment-Related Derivatives. Derivative instruments may be used to enhance investment performance, replicate investment positions or manage market exposures and duration risk that would be allowed under our investment guidelines if implemented in other ways. The market values of those derivatives are based on quoted market prices. See note 9, Derivative Instruments, of the notes accompanying our consolidated financial Statements for additional disclosures concerning derivatives. At March 31, 2010, the notional value of the net long position of derivative instruments (excluding to-be-announced mortgage backed securities which are included in the fixed income securities analysis above and foreign currency forward contracts which are included in the foreign currency exchange risk analysis below) was \$2.62 billion, compared to \$1.13 billion at December 31, 2009. A 100 basis point depreciation of the underlying exposure to these derivative instruments at March 31, 2010 and December 31, 2009 would have resulted in a reduction in net income of approximately \$26.2 million and \$11.3 million, respectively, and would have decreased book value per common share by \$0.50 and \$0.21, respectively.

For further discussion on investment activity, please refer to Financial Condition, Liquidity and Capital Resources Financial Condition Investable Assets.

Table of Contents

Foreign Currency Exchange Risk

Foreign currency rate risk is the potential change in value, income and cash flow arising from adverse changes in foreign currency exchange rates. Through our subsidiaries and branches located in various foreign countries, we conduct our insurance and reinsurance operations in a variety of local currencies other than the U.S. Dollar. We generally hold investments in foreign currencies which are intended to mitigate our exposure to foreign currency fluctuations in our net insurance liabilities. We may also utilize foreign currency forward contracts and currency options as part of our investment strategy. In addition, as a result of the current financial and economic environment as well as the potential for additional investment returns, we may not match a portion of our projected liabilities in foreign currencies with investments in the same currencies, which would increase our exposure to foreign currency fluctuations and increase the volatility in our results of operations. A 10% appreciation of the U.S. Dollar against the major foreign currencies for our outstanding contracts at March 31, 2010 and December 31, 2009, net of unrealized depreciation on our securities denominated in currencies other than the U.S. Dollar, would have resulted in unrealized losses of approximately \$38.6 million and \$40.1 million, respectively, and would have decreased book value per common share by approximately \$0.73 and \$0.73, respectively. Historical observations indicate a low probability that all foreign currency exchange rates would shift against the U.S. Dollar in the same direction and at the same time and, accordingly, the actual effect of foreign currency rate movements may differ materially from the amounts set forth above. For further discussion on foreign exchange activity, please refer to Results of Operations.

Cautionary Note Regarding Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 (PLSRA) provides a safe harbor for forward-looking statements. This release or any other written or oral statements made by or on behalf of us may include forward-looking statements, which reflect our current views with respect to future events and financial performance. All statements other than statements of historical fact included in or incorporated by reference in this release are forward-looking statements. Forward-looking statements, for purposes of the PLSRA or otherwise, can generally be identified by the use of forward-looking terminology such as may, will, expect, intend, estimate, anticipate, believe or continue and similar statements or forward-looking nature or their negative or variations or similar terminology.

Forward-looking statements involve our current assessment of risks and uncertainties. Actual events and results may differ materially from those expressed or implied in these statements. Important factors that could cause actual events or results to differ materially from those indicated in such statements are discussed below and elsewhere in this release and in our periodic reports filed with the Securities and Exchange Commission (the SEC), and include:

- our ability to successfully implement its business strategy during soft as well as hard markets;
- acceptance of our business strategy, security and financial condition by rating agencies and regulators, as well as by brokers and our insureds and reinsureds;
- our ability to maintain or improve our ratings, which may be affected by our ability to raise additional equity or debt financings, by ratings agencies existing or new policies and practices, as well as other factors described herein;

- general economic and market conditions (including inflation, interest rates, foreign currency exchange rates and prevailing credit terms) and conditions specific to the reinsurance and insurance markets in which we operate;
- competition, including increased competition, on the basis of pricing, capacity, coverage terms or other factors;
- developments in the world's financial and capital markets and our access to such markets;

Table of Contents

- our ability to successfully integrate, establish and maintain operating procedures (including the implementation of improved computerized systems and programs to replace and support manual systems) to effectively support its underwriting initiatives and to develop accurate actuarial data;
- the loss of key personnel;
- the integration of businesses we have acquired or may acquire into our existing operations;
- accuracy of those estimates and judgments utilized in the preparation of our financial statements, including those related to revenue recognition, insurance and other reserves, reinsurance recoverables, investment valuations, intangible assets, bad debts, income taxes, contingencies and litigation, and any determination to use the deposit method of accounting, which for a relatively new insurance and reinsurance company, like our company, are even more difficult to make than those made in a mature company since relatively limited historical information has been reported to us through March 31, 2010;
- greater than expected loss ratios on business written by us and adverse development on claim and/or claim expense liabilities related to business written by our insurance and reinsurance subsidiaries;
- severity and/or frequency of losses;
- claims for natural or man-made catastrophic events in our insurance or reinsurance business could cause large losses and substantial volatility in our results of operations;
- acts of terrorism, political unrest and other hostilities or other unforecasted and unpredictable events;
- losses relating to aviation business and business produced by a certain managing underwriting agency for which we may be liable to the purchaser of its prior reinsurance business or to others in connection with the May 5, 2000 asset sale described in our periodic reports filed with the SEC;
- availability to us of reinsurance to manage our gross and net exposures and the cost of such reinsurance;

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

- the failure of reinsurers, managing general agents, third party administrators or others to meet their obligations to us;
- the timing of loss payments being faster or the receipt of reinsurance recoverables being slower than anticipated by us;
- our investment performance, including legislative or regulatory developments that may adversely affect the market value of our investments;
- material differences between actual and expected assessments for guaranty funds and mandatory pooling arrangements;
- changes in accounting principles or policies or in our application of such accounting principles or policies;
- changes in the political environment of certain countries in which we operate or underwrite business;
- statutory or regulatory developments, including as to tax policy matters and insurance and other regulatory matters such as the adoption of proposed legislation that would affect Bermuda-headquartered companies and/or Bermuda-based insurers or reinsurers and/or changes in regulations or tax laws applicable to us, our subsidiaries, brokers or customers; and
- the other matters set forth under Item 1A Risk Factors, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of our Annual Report on Form 10-K, as well as the other factors set forth in our other documents on file with the SEC, and management's response to any of the aforementioned factors.

All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by these cautionary statements. The foregoing review of important factors should not be construed as exhaustive and should be read in conjunction with other cautionary statements

Table of Contents

that are included herein or elsewhere. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

Other Financial Information

The consolidated financial statements as of March 31, 2010 and for the three month periods ended March 31, 2010 and 2009 have been reviewed by PricewaterhouseCoopers LLP, an independent registered public accounting firm. Their report (dated May 7, 2010) is included on page 2. The report of PricewaterhouseCoopers LLP states that they did not audit and they do not express an opinion on that unaudited financial information. Accordingly, the degree of reliance on their report on such information should be restricted in light of the limited nature of the review procedures applied. PricewaterhouseCoopers LLP is not subject to the liability provisions of Section 11 of the Securities Act of 1933 for their report on the unaudited financial information because that report is not a report or a part of the registration statement prepared or certified by PricewaterhouseCoopers LLP within the meaning of Sections 7 and 11 of the Securities Act of 1933.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Reference is made to the information appearing above under the subheading **Market Sensitive Instruments and Risk Management** under the caption **Management's Discussion and Analysis of Financial Condition and Results of Operations**, which information is hereby incorporated by reference.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

In connection with the filing of this Form 10-Q, our management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of disclosure controls and procedures pursuant to applicable Exchange Act Rules as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective as of the end of and during the period covered by this report with respect to information being recorded, processed, summarized and reported within time periods specified in the SEC's rules and forms and with respect to timely communication to them and other members of management responsible for preparing periodic reports of all material information required to be disclosed in this report as it relates to ACGL and its consolidated subsidiaries.

We continue to enhance our operating procedures and internal controls to effectively support our business and our regulatory and reporting requirements. Our management does not expect that our disclosure controls or our internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. As a result of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons or by collusion of two or more people. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. As a result of the inherent limitations in a cost-effective control system, misstatement due to error or fraud may occur and not be detected. Accordingly, our disclosure controls and procedures are designed to provide reasonable, not absolute, assurance that the disclosure controls and procedures are met.

Table of Contents**Changes in Internal Controls Over Financial Reporting**

There have been no changes in internal control over financial reporting that occurred during the fiscal quarter ended March 31, 2010 that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting.

PART II. OTHER INFORMATION***Item 1. Legal Proceedings***

We, in common with the insurance industry in general, are subject to litigation and arbitration in the normal course of our business. As of March 31, 2010, we were not a party to any litigation or arbitration which is expected by management to have a material adverse effect on our results of operations and financial condition and liquidity.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table summarizes our purchases of our common shares for the 2010 first quarter:

(U.S. dollars in thousands, except share data)

Period	Issuer Purchases of Equity Securities		Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2)	Approximate Dollar Value of Shares that May Yet be Purchased Under the Plan or Programs (2)
	Total Number of Shares Purchased (1)	Average Price Paid per Share		
1/1/2010-1/31/2010	861,921	\$ 71.49	861,894	\$ 929,785
2/1/2010-2/28/2010	1,397,094	71.13	1,395,957	\$ 830,496
3/1/2010-3/31/2010	272,335	74.86	272,062	\$ 810,131
Total	2,531,350	\$ 71.65	2,529,913	\$ 810,131

(1) Includes repurchases by ACGL of shares, from time to time, from employees in order to facilitate the payment of withholding taxes on restricted shares granted and the exercise of stock appreciation rights. We purchased these shares at their fair market value, as determined by reference to the closing price of our common shares on the day the restricted shares vested or the stock appreciation rights were exercised.

(2) The Board of Directors of ACGL has authorized the investment of up to \$2.5 billion in ACGL's common shares through a share repurchase program. Such amount consisted of a \$1.0 billion authorization in February 2007, a \$500 million authorization in May 2008, and a \$1.0 billion

Edgar Filing: ARCH CAPITAL GROUP LTD. - Form 10-Q

authorization in November 2009. Repurchases under this authorization may be effected from time to time in open market or privately negotiated transactions through December 31, 2011. Since the inception of the share repurchase program, ACGL has repurchased approximately 24.5 million common shares for an aggregate purchase price of \$1.69 billion. The timing and amount of the repurchase transactions under this program will depend on a variety of factors, including market conditions and corporate and regulatory considerations.

Table of Contents

Item 5. Other Information

In accordance with Section 10a(i)(2) of the Securities Exchange Act of 1934, as amended, we are responsible for disclosing non-audit services to be provided by our independent auditor, PricewaterhouseCoopers LLP, which are approved by the Audit Committee of our board of directors. During the 2010 first quarter, the Audit Committee approved engagements of PricewaterhouseCoopers LLP for permitted non-audit services, substantially all of which consisted of tax services, tax consulting and tax compliance.
