Note Regarding Forward-Looking Statements

This report includes “forward-looking statements” within the meaning and protections of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. All statements other than statements of historical fact are statements that could be forward-looking statements. You can identify these forward-looking statements through our use of words such as “may,” “will,” “anticipate,” “assume,” “should,” “indicate,” “would,” “believe,” “contemplate,” “expect,” “estimate,” “continu “could,” “intend,” “target” and other similar words and expressions of the future. These forward-looking statements include, but are not limited to:

- statements of our goals, intentions and expectations;
- statements regarding our business plans, prospects, growth and operating strategies;
- statements regarding the asset quality of our loan and investment portfolios; and
- estimates of our risks and future costs and benefits.

These forward-looking statements are based on current beliefs and expectations of our management and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change.

The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in the forward-looking statements:

- changes in laws or government regulations or policies affecting financial institutions, including changes in regulatory fees and capital requirements;
- general economic conditions, either nationally or in our market areas, that are worse than expected;
- competition among depository and other financial institutions;
- changes in the prices, values and sales volume of residential and commercial real estate in Montana;
- inflation and changes in the interest rate environment that reduce our margins or reduce the fair value of financial instruments;
- changes in the securities markets;
- our ability to enter new markets successfully and capitalize on growth opportunities;
- our ability to successfully integrate acquired entities, if any;
- changes in consumer spending, borrowing and savings habits;
- our ability to continue to increase and manage our commercial and residential real estate, multi-family, and commercial business loans;
- possible impairments of securities held by us, including those issued by government entities and government sponsored enterprises;
- the level of future deposit premium assessments;
- the impact of the current economic conditions on our loan portfolio (including cash flow and collateral values), investment portfolio, customers and capital market activities;
- the impact of recently enacted legislation to restructure the U.S. financial and regulatory system, including proposals to reform the housing markets and government-sponsored enterprises serving such markets;
- the failure of assumptions underlying the establishment of allowance for possible loan losses and other estimates;
- changes in the financial performance and/or condition of our borrowers and their ability to repay their loans when due; and

the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Securities and Exchange Commission, the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters.

Because of these and other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements. For a further list and description of various risks, relevant factors and uncertainties that could cause future results or events to differ materially from those expressed or implied in our forward-looking statements, see the Item 1A, "Risk Factors" and Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections contained elsewhere in this report, as well as our Annual Report on Form 10-K for the fiscal year ended June 30, 2012, any subsequent Reports on Form 10-Q and Form 8-K, and other filings with the SEC. We do not undertake any obligation to publicly update or correct any forward-looking statements to reflect events or circumstances that subsequently occur, or of which we hereafter become aware.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. However, such information reflects all adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of results for the unaudited interim periods.

The results of operations for the six month period ended December 31, 2012 are not necessarily indicative of the results to be expected for the fiscal year ending June 30, 2013 or any other period. The unaudited consolidated financial statements and notes presented herein should be read in conjunction with the audited consolidated financial statements and related notes thereto included in Eagle's Form 10-K for the fiscal year ended June 30, 2012.

The Company evaluated subsequent events for potential recognition and/or disclosure through February 14, 2013 the date the consolidated financial statements were issued.

On April 5, 2010, the Company completed its second-step conversion from the partially-public mutual holding company structure to the fully publicly-owned stock holding company structure. As part of that transaction it also completed a related offering of its common stock. As a result of the conversion and offering, the Company became the stock holding company for American Federal Savings Bank, and Eagle Financial MHC and Eagle Bancorp ceased to exist. The Company sold a total of 2,464,274 shares of common stock at a purchase price of $10.00 per share in the offering for gross proceeds of $24.6 million. Concurrent with the completion of the offering, shares of Eagle Bancorp common stock owned by the public were exchanged. Stockholders of Eagle Bancorp received 3.800 shares of the Company's common stock for each share of Eagle Bancorp common stock that they owned immediately prior to completion of the transaction. Accordingly, as of April 5, 2010, the Company had 8,000,000 shares of common stock authorized and 4,083,127 issued and outstanding.

In evaluating debt securities for other-than-temporary impairment losses, management assesses whether the Company intends to sell or if it is more likely than not that it will be required to sell impaired debt securities. In so doing, management considers contractual constraints, liquidity, capital, asset/liability management and securities portfolio objectives. With respect to its impaired debt securities at December 31, 2012 and June 30, 2012, management determined that it does not intend to sell and that there is no expected requirement to sell any of its impaired debt securities.

As of December 31, 2012 and June 30, 2012, there were, respectively, 58 and 25 securities in an unrealized loss position and were considered to be temporarily impaired and therefore an impairment charge has not been

recorded. All of such temporarily impaired investments are debt securities.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 2. INVESTMENT SECURITIES - continued

At December 31, 2012, 7 U.S. government and agency obligations had unrealized losses with aggregate depreciation of less than 1.87% from the Company's amortized cost basis of these securities. We believe these unrealized losses are principally due to interest rate movements. As such, the Company determined that none of such securities had other-than-temporary impairment.

At December 31, 2012, 35 municipal obligations had unrealized losses with aggregate depreciation of less than 2.39% from the Company's amortized cost basis of these securities. We believe these unrealized losses are principally due to interest rate movements and recent credit concerns in the overall municipal bond market. As such, the Company determined that none of such securities had other-than-temporary impairment.

At December 31, 2012, no corporate obligation had an unrealized loss.

At December 31, 2012, 16 mortgage backed and CMO securities had unrealized losses with aggregate depreciation of less than 0.99% from the Company's cost basis of these securities. We believe these unrealized losses are principally due to the credit market's concerns regarding the stability of the mortgage market. Management considers available evidence to assess whether it is more likely than not that all amounts due would not be collected. In such assessment, management considers the severity and duration of the impairment, the credit ratings of the security, the overall deal and payment structure, including the Company's position within the structure, underlying obligor, financial condition and near term prospects of the issuer, delinquencies, defaults, loss severities, recoveries, prepayments, cumulative loss projections, discounted cash flows and fair value estimates. There has been no disruption of the scheduled cash flows on any of the securities. Management's analysis as of December 31, 2012 revealed no expected credit losses on these securities.

2011

The Company utilizes a 5 point internal loan rating system, largely based on regulatory classifications, for 1-4 family real estate, commercial real estate, construction, home equity and commercial loans as follows:

Loans rated Pass: these are loans that are considered to be protected by the current net worth and paying capacity of the obligor, or by the value of the asset or the underlying collateral.

Loans rated Special Mention: these loans have potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset at some future date.

Loans rated Substandard: these loans are inadequately protected by the current net worth and paying capacity of the obligor of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

Loans rated Doubtful: these loans have all the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loans rated Loss: these loans are considered uncollectible and of such little value that their continuance as assets without establishment of a specific reserve is not warranted. This classification does not mean that an asset has absolutely no recovery or salvage value, but, rather, that it is not practical or desirable to defer writing off a basically worthless asset even though practical recovery may be effected in the future.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 3. LOANS RECEIVABLE - continued

On an annual basis, or more often if needed, the Company formally reviews the ratings of all commercial real estate, construction, and commercial business loans that have a principal balance of $500,000 or more. Quarterly, the Company reviews the rating of any consumer loan, broadly defined, that is delinquent 90 days or more. Likewise, quarterly, the Company reviews the rating of any commercial loan, broadly defined, that is delinquent 60 days or more. Annually, the Company engages an independent third-party to review a significant portion of loans within these segments. Management uses the results of these reviews as part of its annual review process.

The following tables set forth information regarding the internal classification of the loan portfolio as of the dates indicated (dollars in thousands):

	December 31, 2012						
	1-4 Family Real Estate	Commercial Real Estate	Construction	Home Equity	Consumer	Commercial	Total

NOTE 4. TROUBLED DEBT RESTRUCTURINGS

The Company adopted the amendments in Accounting Standards Update No. 2011-02 during the quarter ended December 31, 2011. As required, the Company reassessed all restructurings that occurred on or after the beginning of the current fiscal year (July 1, 2011) for identification as troubled debt restructurings. The Company identified as troubled debt restructurings certain receivables for which the allowance for credit losses had previously been measured under a general allowance for credit losses methodology (ASC 450-20). Upon identifying the reassessed receivables as troubled debt restructurings, the Company also identified them as impaired under the guidance in ASC 310-10-35. The amendments in Accounting Standards Update No. 2011-02 require prospective application of the impairment measurement guidance in Section 310-10-35 for those receivables newly identified as impaired. As of December 31, 2012, the recorded investment in receivables for which the allowance for credit losses was previously measured under a general allowance for credit losses methodology and are now impaired under Section 310-10-35 was $337,000 (310-40-65-1(b)), and the allowance for credit losses associated with those receivables, on the basis of a current evaluation of loss, was $33,000 (310-40-65-1(b)).

Modification Categories

The Company offers a variety of modifications to borrowers. The modification categories offered can generally be described in the following categories:

Rate Modification – A modification in which the interest rate is changed.

Term Modification – A modification in which the maturity date, timing of payments, or frequency of payments is changed.

Interest Only Modification – A modification in which the loan is converted to interest only payments for a period of time.

Payment Modification – A modification in which the dollar amount of the payment is changed, other than an interest only modification described above.

Combination Modification – Any other type of modification, including the use of multiple categories above.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 4. TROUBLED DEBT RESTRUCTURINGS - continued

The following tables present troubled debt restructurings as of December 31, 2012 and June 30, 2012:

	December 31, 2012		
	Accrual Status	Non-Accrual Status	Total Modification
Residential Mortgage (1-4 family)	-	-	-
Commercial Real Estate	304	-	304
Real estate construction	-	-	-
Home equity	-	-	-
Consumer	-	-	-
Commercial	-	-	-
Total	$304	$-	$304

	June 30, 2012		
	Accrual Status	Non-Accrual Status	Total Modification
Residential Mortgage (1-4 family)	-	-	-
Commercial Real Estate	90	-	90
Real estate construction	-	-	-
Home equity	-	-	-
Consumer	-	-	-
Commercial	-	1,314	1,314
Total	$90	$1,314	$1,404

The Bank's policy is that loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospect for future payment in accordance with the loan agreement appears relatively certain. The Bank's policy generally refers to six months of payment performance as sufficient to warrant a return to accrual status.

There were no loans modified as a troubled debt restructured loan within the previous 6 months and for which there was a payment default during the six months ended December 31, 2012. A default for purposes of this disclosure is a troubled debt restructured loan in which the borrower is 90 days past due or results in the foreclosure and repossession of the applicable collateral. As of December 31, 2012 and June 30, 2012, the Company had no commitments to lend additional funds to loan customers whose terms had been modified in trouble debt restructures.

NOTE 5. DEPOSITS

Deposits are summarized as follows (dollars in thousands):

	December 31, 2012 (Unaudited)	June 30, 2012 (Audited)
Noninterest checking	$53,465	$23,425
Interest-bearing checking	63,607	46,125
Savings	50,360	40,591
Money market	88,369	28,489
Time certificates of deposit	158,924	81,359
Total	$414,725	$219,989

NOTE 6. EARNINGS PER SHARE

Basic earnings per share for the six months ended December 31, 2012 was computed using 3,733,302 weighted average shares outstanding. Basic earnings per share for the six months ended December 31, 2011 was computed using 3,731,439 weighted average shares outstanding. Diluted earnings per share was computed using the treasury stock method by adjusting the number of shares outstanding by the shares purchased. The weighted average shares outstanding for the diluted earnings per share calculations was 3,931,030 for the six months ended December 31, 2012 and 3,914,411 for the six months ended December 31, 2011.

NOTE 7. DIVIDENDS AND STOCK REPURCHASE PROGRAM

For the fiscal year July 1, 2012 through June 30, 2013, Eagle has paid dividends of $0.07125 per share each quarter. A dividend of $0.07125 per share was declared on January 24, 2013, payable March 1, 2013 to stockholders of record on February 8, 2013.

On April 26, 2011, the Company announced that its Board of Directors authorized a common stock repurchase program for 204,156 shares of common stock, effective April 27, 2011. The program was intended to be implemented through purchases made from time to time in the open market or through private transactions. The program terminated on December 27, 2011 with its final purchase of shares within the program.

On April 21, 2011, the Company entered into a pre-arranged Rule 10b5-1 written trading plan ("the Trading Plan") with a broker to facilitate the repurchase of its shares of common stock, in conformity with the provisions of Rule 10b5-1 under the Securities Exchange Act of 1934, as amended. A broker selected by the Company had the authority under the terms and limitations specified in the Trading Plan to repurchase shares on the Company's behalf in accordance with the terms of the Trading Plan. The Trading Plan facilitated the Company's share repurchase program, went into effect on April 27, 2011 and was completed on December 27, 2011. The Trading Plan enabled the Company to continue to repurchase shares without suspension for self-imposed trading blackout periods. The shares repurchased under the Trading Plan were in accordance with and subject to the limitations of the stock repurchase program.

After the expiration of the current Trading Plan, the Company may from time to time enter into subsequent trading plans under Rule 10b5-1 to facilitate the repurchase of its common stock pursuant to its share repurchase program. Information regarding share repurchases will be available in the Company's periodic reports on Form 10-Q and 10-K filed with the Securities and Exchange Commission as required by the applicable rules of the Exchange Act.

NOTE 8. DERIVATIVES AND HEDGING ACTIVITIES

The Company is exposed to certain risks relating to its ongoing business operations. The primary risk managed by using derivative instruments is interest rate risk. The Company entered into an interest rate swap agreement on August 27, 2010 with a third party to manage interest rate risk associated with a fixed-rate loan. The interest rate swap agreement effectively converted the loan's fixed rate into a variable rate. The derivatives and hedging accounting guidance (FASB ASC 815-10) requires that the Company recognize all derivative instruments as either assets or liabilities at fair value in the statement of financial position. In accordance with this guidance, the Company designates the interest rate swap on this fixed-rate loan as a fair value hedge.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 8. DERIVATIVES AND HEDGING ACTIVITIES - continued

The Company is exposed to credit-related losses in the event of nonperformance by the counterparties to this agreement. The Company controls the credit risk of its financial contracts through credit approvals, limits and monitoring procedures, and does not expect any counterparties to fail their obligations. The Company deals only with primary dealers.

If certain hedging criteria specified in derivatives and hedging accounting guidance are met, including testing for hedge effectiveness, hedge accounting may be applied. The hedge effectiveness assessment methodologies for similar hedges are performed in a similar manner and are used consistently throughout the hedging relationships.

The hedge documentation specifies the terms of the hedged item and the interest rate swap. The documentation also indicates that the derivative is hedging a fixed-rate item, that the hedge exposure is to the changes in the fair value of the hedged item, and that the strategy is to eliminate fair value variability by converting fixed-rate interest payments to variable-rate interest payments.

For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current earnings. The Company includes the gain or loss on the hedged items in the same line item—noninterest income—as the offsetting loss or gain on the related interest rate swap.

The hedged fixed rate loan has an original maturity of 20 years and is not callable. This loan is hedged with a "pay fixed rate, receive variable rate" swap with a similar notional amount, maturity, and fixed rate coupons. The swap is not callable. At December 31, 2012, and June 30, 2012, the loan had an outstanding principal balance of $11,372,000, and $11,536,000 and the interest rate swap had a notional value of $11,372,000, and $11,536,000, respectively.

NOTE 9. FAIR VALUE DISCLOSURES

FASB ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and, (iv) willing to transact.

FASB ASC 820 requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement costs). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity’s own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, FASB ASC 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs.

The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date, or convert to cash in the short term.

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs - Significant unobservable inputs that reflect an entity’s own assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Available for Sale Securities – Securities classified as available for sale are reported at fair value utilizing Level 1 and Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U. S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayments speeds, credit information and the bond's terms and conditions, among other things.

Impaired Loans – Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on internally customized discounting criteria.

Loans Held for Sale – These loans are reported at the lower of cost or fair value. Fair value is determined based on expected proceeds based on sales contracts and commitments and are considered Level 2 inputs.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 9. FAIR VALUE DISCLOSURES - continued

Repossessed Assets – Fair values are valued at the time the loan is foreclosed upon and the asset is transferred from loans. The value is based upon primary third party appraisals, less costs to sell. The appraisals are generally discounted based on management's historical knowledge, changes in market conditions from the time of valuation, and/or management's expertise and knowledge of the client and client's business. Such discounts are typically significant and result in Level 3 classification of the inputs for determining fair value. Repossessed assets are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly, based on same or similar factors above.

Loan Subject to Fair Value Hedge – The Company has one loan that is carried at fair value subject to a fair value hedge. Fair value is determined utilizing valuation models that consider the scheduled cash flows through anticipated maturity and is considered a Level 3 input.

Derivative financial instruments – Fair values for interest rate swap agreements are based upon the amounts required to settle the contracts. These instruments are valued using Level 3 inputs utilizing valuation models that consider: (a) time value, (b) volatility factors and (c) current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Although the Company utilizes counterparties' valuations to assess the reasonableness of its prices and valuation techniques, there is not sufficient corroborating market evidence to support classifying these assets and liabilities as Level 2.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of December 31, 2012 and June 30, 2012, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (dollars in thousands):

Loan subject to fair value hedge	$11,405	$1,079	$(156)	$12,328
Derivative financial instruments	650	(1,453)	-	(803)

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

The following table summarizes financial assets and financial liabilities measured at fair value on a nonrecurring basis as of December 31, 2012 and June 30, 2012, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (dollars in thousands):

	December 31, 2012			
	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
Impaired loans	$-	$-	$-	$-
Repossessed assets	-	1,174	-	1,174

	June 30, 2012			
	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
Impaired loans	$-	$-	$-	$-
Repossessed assets	-	2,361	-	2,361

During the quarter ended December 31, 2012, certain impaired loans were remeasured and reported at fair value through a specific valuation allowance allocation of the allowance for possible loan losses based upon the fair value of the underlying collateral. Impaired loans with a carrying value of $43,000 were reduced by specific valuation allowance allocations totaling $43,000 to a total reported fair value of $0 based on collateral valuations utilizing Level 3 valuation inputs.

Those financial instruments subject to FASB ASC Topic 825 are required to disclose the fair value of financial instruments, both assets and liabilities recognized and not recognized in the statement of financial position, for which

it is practicable to estimate fair value. Below is a table that summarizes the fair market values of all financial instruments of the Company at December 31, 2012 and

June 30, 2012, followed by methods and assumptions that were used by the Company in estimating the fair value of the classes of financial instruments.

The estimated fair value amounts of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 9. FAIR VALUE DISCLOSURES - continued

The following methods and assumptions were used by the Company in estimating the fair value of the following classes of financial instruments. However, the 2012 Form 10-K provides additional description of valuation methodologies used in estimating fair value of these financial instruments.

Cash, interest-bearing accounts, accrued interest and dividend receivable, and accrued expenses and other liabilities – The carrying amounts approximate fair value due to the relatively short period of time between the origination of these instruments and their expected realization.

Stock in the FHLB – The fair value of stock in the FHLB approximates redemption value.

Loans receivable – Fair values are estimated by stratifying the loan portfolio into groups of loans with similar financial characteristics. Loans are segregated by type such as real estate, commercial, and consumer, with each category further segmented into fixed and adjustable rate interest terms. For mortgage loans, the Company uses the secondary market rates in effect for loans that have similar characteristics. The fair value of other fixed rate loans is calculated by discounting scheduled cash flows through the anticipated maturities adjusted for prepayment estimates. Adjustable interest rate loans are assumed to approximate fair value because they generally reprice within the short term.

Fair values are adjusted for credit risk based on assessment of risk identified with specific loans, and risk adjustments on the remaining portfolio based on credit loss experience.

Assumptions regarding credit risk are judgmentally determined using specific borrower information, internal credit quality analysis, and historical information on segmented loan categories for non-specific borrowers.

Cash surrender value of life insurance – The carrying amount for cash surrender value of life insurance approximates fair value as policies are recorded at redemption value.

Mortgage servicing rights – The fair value of servicing rights was determined using discount rates ranging from 9.0% to 20.0%, prepayment speeds ranging from 140% to 324% PSA, depending on stratification of the specific right. The fair value was also adjusted for the effect of potential past dues and foreclosures.

Deposits and time certificates of deposit – The fair value of deposits with no stated maturity, such as checking, passbook, and money market, is equal to the amount payable on demand. The fair value of time certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar maturities.

Advances from the FHLB & Subordinated Debentures – The fair value of the Company's advances and debentures are estimated using discounted cash flow analysis based on the interest rate that would be effective December 31, 2012 and June 30, 2012, respectively if the borrowings repriced according to their stated terms.

Off-balance-sheet instruments - Fair values for off-balance-sheet, credit-related financial instruments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. The fair values of these financial instruments are considered insignificant. Additionally, those financial instruments have no carrying value.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 10. BUSINESS COMBINATION

On June 29, 2012, the Company and Sterling Savings Bank, a Washington state-chartered bank ("Sterling") entered into a Purchase and Assumption Agreement (the "Agreement") pursuant to which Eagle agreed to purchase Sterling's banking operations in the state of Montana, including seven branch locations, certain deposit liabilities, loans and other assets and liabilities associated with such branch locations. The actual amount of deposits, loans and value of other assets and liabilities transferred to Eagle and the actual price paid was determined at the time of the closing of the transaction, in accordance with the terms and conditions of the Agreement. The closing of the transaction was subject to the terms and conditions set forth in the Agreement. The transaction was completed on November 30, 2012. The purchase price was $7.92 million and exceeded the estimated fair value of tangible net assets acquired by approximately $7.92 million, which was recorded as goodwill and intangible assets.

Cash flow information relative to the asset purchase agreement is as follows (in thousands):

Fair value of net assets acquired	$182,463	
Cash paid for deposit premium	(7,921	)
Liabilities assumed	(182,463	)
Goodwill and intangible assets recorded	$(7,921	)

The primary purpose of the acquisition is to expand the Company's market share in southern Montana provide existing customers with added convenience and service and to provide our new customers with the opportunity to enjoy the outstanding personalized service and commitment of a Montana-based community bank. Factors that contributed to a purchase price resulting in goodwill include the strategically important locations of Sterling's branches, a historical record of earnings, capable employees and the Company's ability to expand in the southern Montana market, which will complement with the Company's existing growth strategy. Fair value adjustments and related goodwill are recorded in the statement of financial condition of the Company.

Fair value adjustments and related goodwill were recorded in the statement of financial condition of the Company. The following is a condensed balance sheet disclosing the estimated fair value amounts of the acquired branches of Sterling assigned to the major consolidated asset and liability captions at the acquisition date (in thousands):

ASSETS		
Cash and cash equivalents	$	130,094
Loans receivable		41,320
Premises and equipment		2,980
Goodwill and intangible assets		7,921
Other assets		148
Total assets	$	182,463
LIABILITIES AND EQUITY		

Deposits and accrued interst	$	182,463
Equity		-
Total liabilities and equity	$	182,463

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 10. BUSINESS COMBINATION - continued

We estimated the fair value for most loans to be acquired from Sterling by utilizing a methodology wherein loans with comparable characteristics were aggregated by type of collateral, remaining maturity, and repricing terms. Cash flows for each pool were determined by estimating future credit losses and the rate of prepayments. Projected monthly cash flows were then discounted to present value using a risk-adjusted market rate for similar loans. To estimate the fair value of the remaining loans, we analyzed the value of the underlying collateral of the loans, assuming the fair values of the loans were derived from the eventual sale of the collateral. The value of the collateral was based on recently completed appraisals adjusted to the valuation date based on recognized industry indices. We discounted those values using market derived rates of return, with consideration given to the period of time and costs associated with the foreclosure and disposition of the collateral. There will be no carryover of Sterling's allowance for loan losses associated with the loans we acquired as the loans will be initially recorded at fair value.

Information about the Sterling loan portfolio that was acquired is as follows (in thousands):

Contractually required principal and interest at acquisition	$41,223	
Contractual cash flows not expected to be collected (nonaccretable discount)	(769	)
Expected cash flows at acquisition	40,454	
Interest component of expected cash flows (accretable discount)	866	
Fair value of acquired loans	$41,320	

The core deposit intangible asset that was recognized as part of the business combination was $1.1 million and will be amortized over its estimated useful life of approximately ten years utilizing an accelerated method. The goodwill, which will not be amortized for financial statement purposes, will be deductible for tax purposes.

The fair value of savings and transaction deposit accounts acquired from Sterling was assumed to approximate the carrying value as these accounts have no stated maturity and are payable on demand. Certificates of deposit were valued by comparing the contractual cost of the portfolio to an identical portfolio bearing current market rates. The projected cash flows from maturing certificates were calculated based on contractual rates. The fair value of the certificates of deposit was calculated by discounting their contractual cash flows at a market rate for a certificate of deposit with a corresponding maturity.

Direct costs related to the Sterling acquisition will be expensed as incurred in the year ended June 30, 2013. These acquisition and integration expenses will include salaries and benefits, technology and communications, occupancy and equipment, professional services and other noninterest expenses. For the three and six months ended December 31, 2012, $731,000 and $1.21 million of acquisition costs were incurred and expensed, respectively.

The following table presents an unaudited pro forma balance sheet of the Company as if the acquisition of the Sterling branches had occurred on June 30, 2012 (in thousands). The pro forma balance sheet does not necessarily reflect the combined balance sheet that will result as of the closing of the branch acquisition of the Sterling branches.

Operations of the branches acquired have been included in the consolidated financial statements since December 1, 2012. The Company does not consider these branches a separate reporting unit and does not track the amount of revenues and net income attributable to these branches since the acquisition. As such, it is impracticable to determine such amounts for the three and six months ended December 31, 2012.

The following table presents unaudited pro forma results of operations for the three and six months ended December 31, 2012 and 2011 as if the acquisition of the Sterling branches had occurred on July 1, 2011 (in thousands). This pro forma information gives effect to certain adjustments, including purchase accounting fair value adjustments and amortization of the core deposit intangible asset. The pro forma information does not necessarily reflect the results of operations that would have occurred had the Company purchased and assumed the assets and liabilities of the Sterling branches at July 1, 2011. Cost savings are also not reflected in the unaudited pro forma amounts for the three and six months ended December 31, 2012 and 2011.

1) Significant assumptions utilized include the acquisition cost noted above, amortization/accretion of interest rate fair value adjustments, amortization of the core deposit intangible asset and a 25% effective tax rate.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 11. RECENTLY ISSUED PRONOUNCEMENTS

In September 2011, the FASB issued Accounting Standards Update No. 2011-08, Intangibles - Goodwill and Other (Topic 350) - Testing Goodwill for Impairment (ASU 2011-08), to allow entities to use a qualitative approach to test goodwill for impairment. ASU 2011-08 permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. ASU 2011-08 is effective for us in fiscal 2013 and earlier adoption is permitted. Upon completion of the acquisition of Sterling Bank's Montana branches the Company has recorded goodwill and has adopted the provisions of this pronouncement.

In February 2013, the FASB issued ASU No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. The amendments in this update require entities to report significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. generally accepted accounting principles to be reclassified in its entirety to net income. For all other amounts an entity is required to cross-reference other disclosures that provide additional detail about these amounts. The amendments are effective during the interim and annual periods beginning after December 15, 2012. The Company does not anticipate that the adoption of this guidance will have a significant impact on the consolidated financial statements.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

The Company's primary activity is its ownership of its wholly owned subsidiary, American Federal Savings Bank (the "Bank"). The Bank is a federally chartered savings bank, engaging in typical banking activities: acquiring deposits from local markets and originating loans and investing in securities. Recent federal legislation mandated that the consolidated regulatory functions of The Office of Thrift Supervision ("OTS") over the Bank and the Company be transferred to two federal agencies and that the OTS be merged into the Office of the Comptroller of the Currency (the "OCC"). Thus, as a result of the enactment in July of 2010 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), the Federal Reserve Board (the "FRB") became, as of July 21, 2011, the principal federal bank regulatory agency for the Company and the OCC the principal federal regulator for the Bank. The Bank's charter was not affected and the Bank continues to operate as a federal stock savings bank. Its deposits remain insured by the Federal Deposit Insurance Corporation. Because the Dodd-Frank Act did not eliminate the thrift charter under which the Bank has historically operated, the Bank's traditional lending and investment activities should not be affected. Further, to ensure regulatory continuity, the Dodd-Frank Act requires that the OCC designate a new Deputy Comptroller who will be responsible for the supervision and examination of federal savings associations.

The Bank's primary component of earnings is its net interest margin (also called spread or margin), the difference between interest income and interest expense. The net interest margin is managed by management (through the pricing of its products and by the types of products offered and kept in portfolio), and is affected by changes in market interest rates. The Bank also generates noninterest income in the form of fee income and gain on sale of loans.

The Bank has a strong mortgage lending focus, with the majority of its loans represented by single-family residential mortgages. The Bank has also successfully marketed home equity loans to its customers, as well as a wide range of shorter term consumer loans for various personal needs (automobiles, recreational vehicles, etc.). In recent years the Bank has focused on adding commercial loans to its portfolio, both real estate and non-real estate. The purpose of this diversification is to mitigate the Bank's dependence on the residential mortgage market, as well as to improve its ability to manage its spread. The Bank's management recognizes the need for sources of fee income to complement its margin, and the Bank now maintains a significant loan servicing portfolio which generates income. The gain on sale of loans also provides significant fee income in periods of high mortgage loan origination volumes. Fee income is also supplemented with fees generated from the Bank's deposit accounts. The Bank has a high percentage of non-maturity deposits, such as checking accounts and savings accounts, which allows management flexibility in managing its spread. Non-maturity deposits do not automatically reprice as interest rates rise, as do certificates of deposit.

For the past several years, management's focus has been on improving the Bank's core earnings. Core earnings can be described as income before taxes, with the exclusion of gain on sale of loans and adjustments to the market value of the Bank's loan servicing portfolio. Management believes that the Bank will need to continue to focus on increasing net interest margin, other areas of fee income, and control of operating expenses to achieve earnings growth going forward. Management's strategy of growing the bank's loan portfolio and deposit base is expected to help achieve these goals as follows: loans typically earn higher rates of return than investments; a larger deposit base should yield higher fee income; increasing the asset base will reduce the relative impact of fixed operating costs. The biggest challenge to the strategy is funding the growth of the Bank's balance sheet in an efficient manner. Deposit growth will

be difficult to maintain due to significant competition for deposits and it is likely that wholesale funding (which is usually more expensive than retail deposits) will be needed to supplement it.

The level and movement of interest rates impacts the Bank's earnings as well. The Federal Reserve's Federal Open Market Committee ("FOMC") did not change the federal funds target rate which remained at 0.25% during the six months ended December 31, 2012.

Acquisition of Sterling Savings Bank Branches

From time to time the Bank has considered growth through mergers or acquisition as an alternative to its strategy of organic growth. In this connection, on June 29, 2012, the Bank entered into a definitive agreement with Sterling Savings Bank, a Washington state-chartered bank, to acquire Sterling's banking operations in the state of Montana, including seven branch locations, certain deposit liabilities, loans and other assets and liabilities associated with such branch locations. As a result of this acquisition, which closed on November 30, 2012, the Bank acquired approximately $182.5 million in additional assets, including approximately $41.3 million of pass-rated performing loans and assumed $181.6 million in new deposits. The Bank expects that the increase in its branch network as a result of the Sterling branch acquisition will substantially increase its loan origination volume and, due to the substantial increase in deposits, fee income. In addition, the acquisition of the branches is expected to increase certain of the Bank's expenses, including

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview - continued

Acquisition of Sterling Savings Bank Branches - continued

salaries and employee benefits and occupancy and equipment expense. The Bank received approximately $130.1 million in cash in the transaction, which may not be able to be immediately used to fund loans. While a substantial amount of the cash has been invested in securities, it may require additional time to deploy all of the proceeds to fund loans. The Company anticipates that the Sterling acquisition will be accretive to earnings per share in the first year after the acquisition. However, the size of the acquisition may cause integration challenges that could delay or reduce the expected benefits of the acquisition.

The branch acquisition complements the Bank's existing growth strategy by expanding into the southern Montana market and more than doubling the Bank's retail branch network from six to 13 locations. Of the seven acquired branches six are in new markets for the Bank, including two in Missoula, one in Billings, and one each in Hamilton, Livingston and Big Timber. The seventh is in Bozeman where the Bank already has a presence. After the acquisition, the Bank became the sixth largest Montana-based banking institution.

In addition, the transaction also strengthens the Bank's mortgage origination franchise and adds a wealth management business headquartered in Bozeman, Montana. The addition of Sterling's Montana mortgage banking unit will double the Bank's mortgage banking business. This increase in the mortgage banking business and the addition of a wealth management business is expected to increase the Bank's noninterest income and further the Bank's strategy to increase fee income to complement its margin.

Financial Condition

Comparisons of financial condition in this section are between December 31, 2012 and June 30, 2012.

Total assets at December 31, 2012 were $508.12 million, an increase of $180.82 million, or 55.25%, from $327.30 million at June 30, 2012. This increase in assets was primarily attributable to the acquisition of the Sterling branches. The increase in total assets was mostly due to an increase in securities available for sale.

Loans receivable increased by $40.16 million, or 23.10%, to $214.0 million at December 31, 2012, from $173.84 million at June 30, 2012. Of the increase, $41.20 million was the result of the Sterling branch acquisition which increased the balances across all the different loan types. Excluding the Sterling branch acquisition, loans receivable decreased by approximately $1.04 million. Commercial real estate loans increased by $17.81 million, or 27.54%. This was the most increase among the various loan types. Residential mortgages, home equity, consumer loans, and construction loans increased more moderately. All were affected by the Sterling branch acquisition. Total loan originations were $114.18 million for the six months ended December 31, 2012, with single family mortgages accounting for $89.48 million of the total. Home equity and construction loan originations totaled $5.11 million and $3.53 million, respectively, for the same period. Commercial real estate and land loan originations totaled $9.60 million. Consumer and commercial loans originated totaled $3.64 million and $2.82 million, respectively. Loans held-for-sale increased to $15.09 million at December 31, 2012 from $10.61 million at June 30, 2012.

Total cash and cash equivalents increased by $6.35 million, and securities available-for-sale increased $116.28 million.

Deposits increased $194.74 million, or 88.52%, to $414.73 million at December 31, 2012 from $219.99 million at June 30, 2012. Growth occurred across all deposit products. Of the increase $181.6 million was attributable to the Sterling branch acquisition. Excluding the Sterling branch acquisition, deposits increased by $13.14 million, or 5.97%. Management attributes this organic increase in deposits to increased marketing of checking accounts as well as customers' preference for placing funds in secure, federally insured accounts.

The ability of the Bank to continue to grow its retail deposit base during the period enabled wholesale funding to decrease during the period. Advances from the Federal Home Loan Bank and other borrowings decreased $13.24 million, or 31.0%, to $29.46 million from $42.70 million at June 30, 2012.

Total shareholders' equity decreased $207,000 or 0.39%, to $53.44 million at December 31, 2012 from $53.65 million at June 30, 2012. This was a result of a decrease in accumulated other comprehensive income of $326,000 (mainly due to an decrease in net unrealized gains on securities available-for-sale) and dividends paid of $554,000, partially offset by net income of $382,000.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations for the Three Months Ended December 31, 2012 and 2011

Net Income. The quarter's results were characterized by a significant increase in gain on sale of loans driven by robust refinancing activity largely offset by acquisition costs associated with the purchase of the seven Sterling Savings Bank branches located in Montana. Eagle's net loss for the quarter was $40,000 versus $487,000 of net income for the three months ended December 31, 2011. The decrease of $527,000, or 108.21%, was due principally to an increase in noninterest expense of $1.91 million partially offset by an increase in noninterest income of $842,000. The increase in noninterest income resulted from an increase in home mortgage refinancing activity, resulting in increased gain on sale of loans. The provision for loan losses decreased $138,000 from the prior period. Eagle's tax provision was $318,000 lower in the current quarter. This reduction, in addition to the lower earnings, is primarily attributable to a new market tax credit project that was initiated during the quarter. This project resulted in the Company receiving $2.9 million in federal new markets tax credits that can be used over the next seven years. Basic earnings per share were a loss of $.01 for the current period, and income of $.13 per share for the prior comparable period.

Net Interest Income. Net interest income increased to $2.91 million for the quarter ended December 31, 2012, from $2.83 million for the previous year's quarter. This increase of $81,000 was the result of a decrease in interest and dividend income of $161,000 offset by a decrease in interest expense of $242,000.

Interest and Dividend Income. Total interest and dividend income was $3.50 million for the quarter ended December 31, 2012, compared to $3.66 million for the quarter ended December 31, 2011, a decrease of $161,000, or 4.40%. Interest and fees on loans decreased to $2.75 million for the three months ended December 31, 2012 from $2.83 million for the same period ended December 31, 2011. This decrease of $77,000, or 2.72%, was due to both the decrease in the average yield on loans and average balances of loans for the quarter ended December 31, 2012. The average interest rate earned on loans receivable decreased by 16 basis points, from 5.90% to 5.74%. Average balances for loans receivable, net, including loans held for sale, for the quarter ended December 31, 2012 were $191.70 million, compared to $191.73 million for the prior year period. This represents a decrease of $26,000, or 0.01%. Interest and dividends on investment securities available-for-sale (AFS) decreased by $92,000 for the quarter ended December 31, 2012 from $827,000 for the same quarter last year. Average balances on investments increased to $126.85 million for the quarter ended December 31, 2012, from $100.59 million for the quarter ended December 31, 2011. The average interest rate earned on investments decreased to 2.32% from 3.29%. Interest on deposits with banks increased to $11,000 from $3,000, due to an increase in average balances partially offset by a decrease in the average rates. Average balances on deposits with banks increased to $25.94 million for the quarter ended December 31, 2012, compared to $3.42 million for the quarter ended December 31, 2011and the average rates on such deposits with banks decreased from 0.35% at December 31, 2011 to 0.17% at December 31, 2012.

Interest Expense. Total interest expense declined significantly in the quarter to $586,000 from $828,000 for the quarter ended December 31, 2011, a decrease of $242,000, or 29.22%. The decrease was attributable to decreases in interest on borrowings while interest on deposits increased. The average rates on deposits, including non-interest bearing deposits, did decrease from 51 basis points to 46 basis points, but this was offset by the growth in average deposit balances. This increase in average balances is the result of both the Sterling branch acquisition and organic growth. The organic growth was likely the result of the Bank's customers continuing to opt for the safety of federally insured deposits, notwithstanding historically low rates on such deposits, over the risks and uncertainty of the capital markets. The average balances increased from $212.34 million to $287.33 million, an increase of $74.99 million. Some account types did experience some increase in average rates, due to balances in higher rate

tiers. Money market accounts, increased 1 basis point. Interest bearing checking account rates increased from 0.05% to 0.06%, savings account rates declined to .09% from 0.10%, and certificates of deposit rates decreased from 1.20% to 1.13%. Because of the increase in retail funding due to deposit growth average balances in borrowings decreased significantly to $36.86 million for the quarter ended December 31, 2012, compared to $62.32 million for the same quarter in the previous year. The average rate paid, along with the decrease in average borrowing balances resulted in a decrease in interest paid on borrowings to $230,000 for the quarter ended December 31, 2012 versus $532,000 paid in the previous year's quarter. The average rate paid on borrowings decreased from 3.56% last year to 2.75% for the quarter ended December 31, 2012. The average rate paid on all interest-bearing liabilities decreased 49 basis points from the quarter ended December 31, 2011 to the quarter ended December 31, 2012.

Provision for Loan Losses. Provisions for loan losses are charged to earnings to maintain the total allowance for loan losses at a level considered adequate by management of the Bank, to provide for probable loan losses based on prior loss experience, volume and type of lending conducted by the Bank, national and local economic conditions, and past due loans in portfolio. The Bank's policies require a review of assets on a quarterly basis. The Bank classifies loans as well as other assets if warranted. While the Bank believes it uses the best information available to make a determination with respect to the allowance for loan losses, it recognizes that future adjustments may be necessary. The Bank recorded $187,000 in provision for loan losses for the quarter ended December 31, 2012 and $325,000 in the quarter ended December 31, 2011. This decrease from 2011 was based on an analysis of a variety of factors including delinquencies within the loan portfolio. Total nonperforming loans, including restructured loans, net decreased from $3.58 million at

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations for the Three Months Ended December 31, 2012 and 2011 - continued

December 31, 2011 to $1.50 million at December 31, 2012. The Bank currently has $1.17 million in foreclosed real estate property and other repossessed property with a net book value of $1.17 million.

Noninterest Income. Due to declines in long term interest rates, the Bank again experienced significant refinancing activity in residential real estate. As long-term rates continued to push to historically low levels, refinance activity in the current quarter grew and exceeded the level reached in the prior year's period. This increased activity had a significant effect on the amount of non-interest income with total noninterest income increasing to $1.92 million for the quarter ended December 31, 2012, from $1.08 million for the quarter ended December 31, 2011, an increase of $842,000 or 78.33%. Of this amount, net gain on sale of loans increased to $962,000 for the quarter ended December 31, 2012 from $403,000 for the quarter ended December 31, 2011. During this period, $48.96 million 1-4 family mortgage loans were originated compared to $31.38 million in the quarter ended December 31, 2011. In addition, $41.94 million of mortgage loans were sold during the period compared to $24.61 million sold in the quarter ended December 31, 2011, an increase of $17.33 million. The gain on fair value hedge-FASB ASC 815 also contributed to the increase in noninterest income. Gain on fair value hedge-FASB ASC 815 increased to $28,000 from the prior period's loss amount of $44,000.

Noninterest Expense. Noninterest expense was $4.79 million for the quarter ended December 31, 2012, and $2.88 million for the quarter ended December 31, 2011. The primary cause of this increase is the $731,000 in acquisition costs that incurred this period, while the prior period had none. We anticipate most, if not all of the acquisition costs related to the Sterling branch acquisition to be completed in the third quarter of this fiscal year 2013. The provision for valuation loss on OREO increased to $30,000 from $0 for the comparable period last year. This increase was due to decline in values in some of the Company's foreclosed properties. Amortization of mortgage servicing rights increased from $174,000 to $221,000, an increase of $47,000. Salaries and employee benefits increased $928,000 which is due to increased staff in both preparation for the acquisition of the Sterling branches and those Sterling employees joining the Company on December 1, 2012. Also, this quarter's amount includes $222,000 in nonrecurring compensation costs associated with the acquisition. A portion of these costs will be in the third quarter, but not continuing thereafter. Consulting fees decreased from $308,000 down to $35,000 as the prior year period included consulting services related to a possible acquisition which did not come to fruition. Amortization expense increased to $48,000 for $0 in the prior year period. The amortization expense relates to the equity investment in the new markets tax credit project, which will be amortized over the life of these federal tax credits, and the amortization of the core deposit intangible. Other expense categories showed relatively minor changes.

Income Tax Expense. Our income tax benefit was $103,000 for the quarter ended December 31, 2012, compared to $215,000 of an income tax expense for the quarter ended December 31, 2011. The effective tax rate for the quarter ended December 31, 2012 was -72.03% and was 30.63% for the quarter ended December 31, 2011.

Results of Operations for the Six Months Ended December 31, 2012 and 2011

Net Income. Eagle's net income was $382,000 and $915,000 for the six months ended December 31, 2012 and 2011, respectively. The decrease of $533,000, or 58.25%, was due to a decrease in net interest income of $19,000 and increase in noninterest expense of $2.89 million partially offset by an increase in noninterest income of $1.85 million and a decrease in the provision for loan losses of $161,000. The tax provision was $363,000 lower in the current

period. Basic earnings per share declined to $0.10 for the current period, compared to $0.25 for the previous year's period.

Net Interest Income. Net interest income decreased to $5.57 million for the six months ended December 31, 2012, from $5.59 million for the previous year's period. This decrease of $19,000 was the result of a decrease in interest and dividend income of $589,000, partially offset by a decrease in interest expense of $570,000.

Interest and Dividend Income. Total interest and dividend income was $6.72 million for the six months ended December 31, 2012, compared to $7.31 million for the six months ended December 31, 2011, representing a decrease of $589,000, or 8.05%. Interest and fees on loans decreased to $5.30 million for the six months ended December 31, 2012 from $5.61 million for the same period ended December 31, 2011. Average balances for loans receivable, net, for the six months ended December 31, 2012 were $186.24 million, compared to $189.69 million for the previous year an decrease of $3.44 million, or 1.82%. The average interest rate earned on loans receivable decreased by 21 basis points, from 5.91% to 5.70%. Interest and dividends on investment securities available-for-sale (AFS) decreased slightly to $1.40 million for the six months ended December 31, 2012 from $1.70 million for the same period last year. Average balances on investments increased to $108.74 million for the six months ended December 31, 2012, compared to $101.73 million for the six months ended December 31, 2011. The average interest rate earned on investments decreased to 2.58% from 3.34%. Interest on deposits with banks increased to $16,000 for the six months ended December 31, 2012, compared to $9,000

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations for the Six Months Ended December 31, 2012 and 2011 - continued

for the six months ended December 31, 2011. The average balance on deposits with banks increased from $6.19 million up to $18.94 million while the average rate earned dropped from 0.26% to 0.17%.

Interest Expense. Total interest expense decreased to $1.15 million for the six months ended December 31, 2012, from $1.72 million for the six months ended December 31, 2011, a decrease of $570,000, or 33.10%, primarily due to decreases in interest paid on FHLB Advances and other borrowings. Interest on deposits increased to $581,000 for the six months ended December 31, 2012, from $562,000 for the six months ended December 31, 2011. This increase of $19,000, or 3.38%, was the result of a 7 basis point decrease in average rates paid on deposit accounts offset by increases in average balances. Interest bearing checking accounts also decreased to an average rate paid of 0.05% from 0.06%, while money market accounts increased to 0.14% from 0.13%. Certificates of deposits and savings accounts average rates both decreased for the six month period ended December 31, 2012-- one basis point for savings accounts and 69 basis points for certificates of deposits. Average balances in interest-bearing deposit accounts increased to $222.65 million for the six months ended December 31, 2012, compared to $191.11 million for the same period in the previous year. A decrease in the average balance of borrowings, in addition to a decrease in the average rate paid, resulted in a decrease in interest paid on borrowings to $524,000 versus $1.12 million paid in the same period ended December 31, 2011. The average rate paid on borrowings decreased from 3.63% last year to 2.94% this year. The average rate paid on liabilities decreased 0.47% from the six months ended December 31, 2011 to the six months ended December 31, 2012.

Provision for Loan Losses. Provisions for loan losses are charged to earnings to maintain the total allowance for loan losses at a level considered adequate by management of the Bank, to provide for probable loan losses based on prior loss experience, volume and type of lending conducted by the Bank, national and local economic conditions, and past due loans in its portfolio. The Bank's policies require a review of assets on a quarterly basis. The Bank classifies loans as well as other assets if warranted. While the Bank believes it uses the best information available to make a determination with respect to the allowance for loan losses, it recognizes that future adjustments may be necessary. The Bank took $422,000 in provision for loan losses for the six months ended December 31, 2012 versus $583,000 in the six months ended December 31, 2011. This decrease from 2011 was based on an analysis of a variety of factors including delinquencies within the loan portfolio. Total real estate and other assets acquired in settlement of loans, net of allowance for losses decreased from $2.36 million at June 30, 2012 to $1.17 million at December 31, 2012.

Noninterest Income. Total noninterest income increased to $3.49 million for the six months ended December 31, 2012, from $1.64 million for the six months ended December 31, 2011, an increase of $1.85 million or 112.41%. This increase stemmed from an increase in refinancing activity and resulted in an increase of $1.14 million in net gain on sale of loans to $1.77 million for the six months ended December 31, 2012 from $639,000 for the six months ended December 31, 2011. Also, a net loss on the fair value hedge was $374,000 for the six months ended December 31, 2011, while it was a net gain of $65,000 for the six month period ended December 31, 2011, a swing of $439,000. Though the hedge is considered to be effective, a portion does run through noninterest income.

Noninterest Expense. Noninterest expense increased by $2.89 million or 54.10% to $8.22 million for the six months ended December 31, 2012, from $5.34 million for the six months ended December 31, 2011. This increase was primarily due to $1.21 million in acquisition costs incurred related to the acquisition of the Montana Sterling branches

discussed above. The provision for valuation loss on OREO increased to $98,000 from $0 for the comparable period last year. This increase was due to decline in values in some of the Company's foreclosed properties. The increase in the amortization of mortgage servicing rights resulted from an increase in refinance activity that occurred during the period compared to the previous period. Consulting fees decreased to $61,000 from $337,000 for the prior period. A significant portion of the amount in the prior period related the exploration of potential acquisition opportunity which did not come to fruition. Other expense categories which showed changes were the result of operating the larger Company with its 13 branch network compared to its previous network of only 6 branches.

Income Tax Expense. Eagle's income tax expense was $39,000 for the six months ended December 31, 2012, compared to $402,000 for the six months ended December 31, 2011. The effective tax rate for the six months ended December 31, 2012 was 9.26% and was 30.52% for the six months ended December 31, 2011.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Liquidity, Interest Rate Sensitivity and Capital Resources

The Bank is required to maintain minimum levels of liquid assets as defined by the Office of the Comptroller of the Currency ("OCC") regulations. The OCC has eliminated the statutory requirement based upon a percentage of deposits and short-term borrowings. The OCC states that the liquidity requirement is retained for safety and soundness purposes, and that appropriate levels of liquidity will depend upon the types of activities in which the company engages. For internal reporting purposes, the Bank uses policy minimums of 1.0%, and 8.0% for "basic surplus" and "basic surplus with FHLB" as internally defined. In general, the "basic surplus" is a calculation of the ratio of unencumbered short-term assets reduced by estimated percentages of CD maturities and other deposits that may leave the Bank in the next 90 days divided by total assets. "Basic surplus with FHLB" adds to "basic surplus" the additional borrowing capacity the Bank has with the FHLB of Seattle. The Bank exceeded those minimum ratios as of both December 31, 2012 and December 31, 2011.

The Bank's primary sources of funds are deposits, repayment of loans and mortgage-backed and collateralized mortgage obligation securities, maturities of investments, funds provided from operations, and advances from the Federal Home Loan Bank of Seattle and other borrowings. Scheduled repayments of loans and mortgage-backed and collateralized mortgage obligation securities and maturities of investment securities are generally predictable. However, other sources of funds, such as deposit flows and loan prepayments, can be greatly influenced by the general level of interest rates, economic conditions and competition. The Bank uses liquidity resources principally to fund existing and future loan commitments. It also uses them to fund maturing certificates of deposit, demand deposit withdrawals and to invest in other loans and investments, maintain liquidity, and meet operating expenses.

Liquidity may be adversely affected by unexpected deposit outflows, higher interest rates paid by competitors, and similar matters. Management monitors projected liquidity needs and determines the level desirable, based in part on commitments to make loans and management's assessment of the Bank's ability to generate funds.

At December 31, 2012, the Bank's measure, as internally determined, of sensitivity to interest rate movements, as measured by a 200 basis point rise in interest rates scenario, decreased the economic value of equity ("EVE") by 8.7%. The Bank is well within the guidelines set forth by the Board of Directors for interest rate risk sensitivity. The Bank's tier I core capital ratio, as measured under OCC rules, decreased from 13.19% as of December 31, 2011 to 8.46% as of December 31, 2012. The Bank's strong capital position helps to mitigate its interest rate risk exposure.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Liquidity, Interest Rate Sensitivity and Capital Resources - continued

As of December 31, 2012, the Bank's regulatory capital was in excess of all applicable regulatory requirements. At December 31, 2012, the Bank's tangible, core, and risk-based capital ratios amounted to 8.46%, 8.46%, and 15.90%, respectively, compared to regulatory requirements of 1.50%, 3.00%, and 8.00%, respectively. See the following table (amounts in thousands):

	At December 31, 2012 (Unaudited)	
	Dollar Amount	% of Assets
Tangible capital:		
Capital level	$41,592	8.46
Requirement	7,374	1.50
Excess	34,218	6.96
Core capital:		
Capital level	41,592	8.46
Requirement	14,748	3.00
Excess	26,844	5.46
Risk-based capital:		
Capital level	43,417	15.90
Requirement	21,840	8.00
Excess	21,577	7.90

Impact of Inflation and Changing Prices

Our financial statements and the accompanying notes have been prepared in accordance with generally accepted accounting principles, which require the measurement of financial position and operating results in terms of historical dollars without considering the change in the relative purchasing power of money over time and due to inflation. The impact of inflation is reflected in the increased cost of our operations. Interest rates have a greater impact on our performance than do the general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services.

CONTROLS AND PROCEDURES

Item 4. Controls and Procedures

As of the end of the period covered by this report, we conducted an evaluation under the supervision and with the participation of our management including our Chief Executive Officer ("CEO") and our Chief Financial Officer ("CFO") of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, to ensure that information required to be disclosed by us in the reports filed or submitted by us under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, including to ensure that information required to be disclosed by us in the reports filed or submitted by us under the Exchange Act is accumulated and communicated to management to allow timely decisions regarding required disclosure. Based on that evaluation, our CEO and CFO concluded that as of December 31, 2012, our disclosure controls and procedures were effective. During the last fiscal quarter, there were no changes in the Company's internal control over financial reporting that have materially affected, or were reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II - OTHER INFORMATION

Item 1. Legal Proceedings.

Neither the Company nor the Bank is involved in any pending legal proceeding other than non-material legal proceedings occurring in the ordinary course of business.

Item 1A. Risk Factors.

There have not been any material changes in the risk factors previously disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended June 30, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

On April 26, 2011, the Company announced that its Board of Directors authorized a common stock repurchase program for 204,156 shares of common stock, effective April 27, 2011. The program was intended to be implemented through purchases made from time to time in the open market or through private transactions. The program was scheduled to terminate on April 19, 2012. All of the 204,156 shares were purchased by December 27, 2011.
