Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

John Slavitt, Esq.  
General Counsel  
Check Point Software Technologies, Inc.  
800 Bridge Parkway  
Redwood City, CA 94065 U.S.A.  
Tel: (650) 628-2110  
Fax: (650) 649-1975

---

(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of each class	Name of exchange on which registered
Ordinary shares, NIS 0.01 nominal value	NASDAQ Global Select Market

Securities registered or to be registered pursuant to Section 12(g) of the Act. None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act. None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report. 210,042,282 ordinary shares, NIS 0.01 nominal value

---

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act:

Yes ☒ No ☐

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934:

Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definitions of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act.

Large Accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐

Indicate by check mark the basis of accounting the registrant has used to prepare the financial statements included in this filing:

☒ U.S. GAAP

☐ International Financial Reporting Standards as issued by the International Accounting Standards Board

☐ Other

OR

# Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

If ☐ Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 ☐ Item 18 ☐

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act):

Yes ☐ No ☒

### **Currency of Presentation and Certain Defined Terms**

In this Annual Report on Form 20-F, references to "U.S." or "United States" are to the United States of America, its territories and possessions. References to "\$", "dollar" or "U.S. dollar" are to the legal currency of the United States of America; references to "NIS" or "Israeli Shekel" are to the legal currency of Israel; references to "Euro" are to the legal currency of the European Union; and references to "SEK" or "Swedish Krona" are to the legal currency of Sweden.

All references to "we", "us", "our" or "Check Point" shall mean Check Point Software Technologies Ltd., and, unless specifically indicated otherwise or the context indicates otherwise, our consolidated subsidiaries.

### **Forward-Looking Statements**

Some of the statements contained in this Annual Report on Form 20-F are forward-looking statements that involve risks and uncertainties. The statements contained in this Annual Report on Form 20-F that are not purely historical are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including, without limitation, statements regarding trends related to our business and our expectations, beliefs, intentions or strategies regarding the future. These statements are subject to known and unknown risks, uncertainties and other factors, which may cause our actual results to differ materially from those implied by the forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as "may", "will", "could", "should", "expects", "plans", "anticipates", "believes", "intends", "estimates", "predicts", "potential", or "continue" or the negative comparable terminology. Forward-looking statements also include, but are not limited to, statements in (i) Item 4 "Information on Check Point" regarding our belief as to increased acceptance of Internet technologies, expansion of connectivity services, acceleration of the use of networks, the need and demand for network, gateway and virtual security, the need and demand for flexible and extensible security, the demand for our new blade architecture and adoption of new licensing offerings, increasing demands on enterprise security systems, the impact of our relationship with our technology partners on our sales goals, the contribution of our products to our future revenue, our development of future products, and our ability to integrate, market and sell acquired products and technologies; and (ii) Item 5 "Operating and Financial Review and Prospects" regarding, among other things, our expectations regarding our business and the markets in which we operate and into which we sell products, future amounts and sources of our revenue, our ongoing relationships with our current and future customers and channel partners, our future costs and expenses, the adequacy of our capital resources, and our expectations regarding the acquisition of Nokia's security appliance business.

Forward-looking statements involve risks, uncertainties and assumptions, and our actual results may differ materially from those predicted. Many of these risks, uncertainties and assumptions are described in the risk factors set forth in Item 3 "Key Information" "Risk Factors" and elsewhere in this Annual Report on Form 20-F. All forward-looking statements included in this Annual Report on Form 20-F are based on information available to us on the date of the filing and reasonable assumptions. We undertake no obligation to update any of the forward-looking statements after the date of the filing, except as required by applicable law.

## **PART I**

### **ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS**

Not applicable.

**ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE**

Not applicable.

**ITEM 3. KEY INFORMATION****Selected Financial Data**

We prepare our historical consolidated financial statements in accordance with accounting principles generally accepted in the United States (U.S. GAAP). The selected financial data, set forth in the table below, have been derived from our audited historical financial statements for each of the years from 2004 to 2008. The selected consolidated statement of income data for the years 2006, 2007, and 2008, and the selected consolidated balance sheet data at December 31, 2007 and 2008, have been derived from our audited consolidated financial statements set forth in Item 18 Financial Statements. The selected consolidated statement of income data for the years 2004 and 2005, and the selected consolidated balance sheet data at December 31, 2004, 2005 and 2006, has been derived from our previously published audited consolidated financial statements, which are not included in this Annual Report on Form 20-F. This selected financial data should be read in conjunction with our consolidated financial statements, and are qualified entirely by reference to such consolidated financial statements.

5

	Year Ended December 31,				
	2004	2005	2006	2007	2008
	(in thousands, except per share data)

### Risk Factors

*If any of the following risks actually occurs, our business, financial condition, results of operations, and future prospects could be materially and adversely affected. In that event, the market price of our ordinary shares could decline and you could lose part or all of your investment.*

#### Risks Related to Our Business and Our Market

*If the market for information and network security solutions does not continue to grow, our business will be adversely affected*

The market for our products has continued to expand but the market for information and network security solutions may not continue to grow. Continued growth of this market will depend, in large part, upon:

- <sup>n</sup> The continued expansion of Internet usage and the number of organizations adopting or expanding intranets.
- <sup>n</sup> The ability of their respective infrastructures to support an increasing number of users and services.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

- <sup>n</sup> The continued development of new and improved services for implementation across the Internet and between the Internet and intranets.
- <sup>n</sup> The adoption of data security measures as it pertains to data encryption technologies.
- <sup>n</sup> Government regulation of the Internet and governmental and non-governmental requirements and standards with respect to data security and privacy.
- <sup>n</sup> General economic conditions in the markets in which we, our customers and our suppliers operate.

During the current global economic slowdown, many companies have reduced expenditures, and adverse economic conditions may cause our customers to reduce or postpone their technology spending significantly, which could result in reductions in sales of our products, longer sales cycles, slower adoption of new technologies and increased price competition.

If the necessary infrastructure or complementary products and services are not developed in a timely manner and, consequently, the enterprise security, data security, Internet, or intranet markets fail to grow or grow more slowly than we currently anticipate, our business, operating results, and financial condition may be materially adversely affected. Additional details are provided in Item 4 Information on Check Point.

7

---

### *We may not be able to successfully compete*

The market for information and network security solutions is intensely competitive and we expect that competition will continue to increase in the future. Our principal competitors include Cisco Systems, Inc., Fortinet Inc. and Juniper Networks, Inc. We also compete with several other companies, including McAfee, Inc., Microsoft Corporation, SonicWall Inc. and Symantec Corporation with respect to specific products that we offer, including data security products.

Some of our current and potential competitors have various advantages over us, including longer operating histories; access to larger customer bases; significantly greater financial, technical and marketing resources; a broader portfolio of products, applications and services; and larger patent and intellectual property portfolios. As a result, they may be able to adapt better than we can to new or emerging technologies and changes in customer requirements, or to devote greater resources to the promotion and sale of their products. Furthermore, some of our competitors with more diversified product portfolios may be better able to withstand a reduction in spending on information and network security solutions. In addition, some of our competitors have greater financial resources than we do, and they have offered, and in the future may offer, their products at lower prices than we do, which may cause us to lose sales or to reduce our prices in response to competition.

In addition, consolidation in the markets in which we compete may affect our competitive position. We may not be able to continue competing successfully against our current and future competitors. Increased competition may result in price reductions, reduced gross margins, and loss of market share, any of which will materially adversely affect our business, operating results, and financial condition.

The markets in which we compete also include many niche competitors, generally smaller companies at a relatively early stage of operations, which are focused on specific Internet and data security needs. These companies' specialized focus may enable them to adapt better than we can to new or emerging technologies and changes in customer requirements in their specific areas of focus. In addition, some of these companies can invest relatively large resources on very specific technologies or customer segments. The effect of these companies' activities in the market may result in price reductions, reduced gross margins and loss of market share, any of which will materially adversely affect our business, operating results, and financial condition.

Further, vendors of operating system software or networking hardware may enhance their products to include functionality that is currently provided by our products. The widespread inclusion of similar functionality to that which is offered by our solutions, as standard features of operating system software or networking hardware, could significantly reduce the marketability of our products, particularly if the quality of such functionality were comparable to that of our products. Furthermore, even if the network or application security functionality, provided as standard features by operating systems software or networking hardware, is more limited than that of our solutions, a significant number of customers may elect to accept more limited functionality in lieu of purchasing additional products.

If any of the events described above occur, our business, operating results and financial condition could be materially adversely affected. Additional details are provided in Item 4 Information on Check Point.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

*If we fail to enhance our existing products, develop or acquire new and more technologically advanced products, or fail to successfully commercialize these products, our business and results of operations will suffer*

The information and network security industry is characterized by rapid technological advances, changes in customer requirements, frequent new product introductions and enhancements, and evolving industry standards in computer hardware and software technology. In particular, the markets for data security, Internet, and intranet applications are rapidly evolving. As a result, we must continually change and improve our products in response to changes in operating systems, application software, computer and communications hardware, networking software, programming tools, and computer language technology. Further, we must continuously improve our products to protect our customers data and networks from evolving security threats.

8

---

Our future operating results will depend upon our ability to enhance our current products and to develop and introduce new products on a timely basis; to address the increasingly sophisticated needs of our customers; and to keep pace with technological developments, new competitive product offerings, and emerging industry standards. Our competitors' introduction of products embodying new technologies and the emergence of new industry standards may render our existing products obsolete or unmarketable. While we have been successful in developing, acquiring, and marketing new products and product enhancements that respond to technological change and evolving industry standards, we may not be able to continue to do so. In addition, we may experience difficulties that could delay or prevent the successful development, introduction, and marketing of these products, as well as the integration of acquired products. Furthermore, our new products or product enhancements may not adequately meet the requirements of the marketplace or achieve market acceptance. In some cases, a new product or product enhancements may negatively affect sales of our existing products. If we do not respond adequately to the need to develop and introduce new products or enhancements of existing products in a timely manner in response to changing market conditions or customer requirements, our business, operating results and financial condition may be materially adversely affected. Additional details are provided in Item 4 Information on Check Point and under the caption We may not be able to successfully compete in this Item 3 Key Information Risk Factors.

*Product defects may increase our costs and impair the market acceptance of our products and technology*

Our products are complex and must meet stringent quality requirements. They may contain undetected hardware or software errors or defects, especially when new or acquired products are introduced or when new versions are released. In particular, the personal computer hardware environment is characterized by a wide variety of non-standard configurations that make pre-release testing for programming or compatibility errors very difficult and time-consuming. We may need to divert the attention of our engineering personnel from our research and development efforts to address instances of errors or defects. In addition, we may in the future incur costs associated with warranty claims.

Our products are used to deploy and manage Internet security and protect information, which may be critical to organizations. As a result, the sale and support of our products entails the risk of product liability and related claims. We do not know whether, in the future, we will be subject to liability claims or litigation for damages related to product errors, or will experience delays as a result of these errors. Our sales agreements and product licenses typically contain provisions designed to limit our exposure to potential product liability or related claims. In selling our products, we rely primarily on shrink wrap licenses that are not signed by the end user, and for this and other reasons, these licenses may be unenforceable under the laws of some jurisdictions. As a result, the limitation of liability provisions contained in these licenses may not be effective. Although we maintain product liability insurance for most of our products, the coverage limits of these policies may not provide sufficient protection against an asserted claim. If litigation were to arise, it could, regardless of its outcome, result in substantial expense to us, significantly divert the efforts of our technical and management personnel, and disrupt or otherwise severely impact our relationships with current and potential customers. In addition, if any of our products fail to meet specifications or have reliability, quality or compatibility problems, our reputation could be damaged significantly and customers might be reluctant to buy our products, which could result in a decline in revenues, a loss of existing customers, and difficulty attracting new customers.

9

---

*We are subject to risks relating to acquisitions*

We have made acquisitions in the past and we may make additional acquisitions in the future. The pursuit of acquisitions may divert the attention of management and cause us to incur various expenses in identifying, investigating, and pursuing suitable acquisitions, whether or not they are consummated.

Competition within our industry for acquisitions of businesses, technologies, assets and product lines has been, and may in the future continue to be, intense. As such, even if we are able to identify an acquisition that we would like to consummate, we may not be able to complete the acquisition on commercially reasonable terms or because the target is acquired by another company. Furthermore, in the event that

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

we are able to identify and consummate any future acquisitions, we could:

- " Issue equity securities which would dilute current shareholders' percentage ownership;
- " Incur substantial debt;
- " Assume contingent liabilities; or
- " Expend significant cash.

These financing activities or expenditures could harm our business, operating results and financial condition or the price of our ordinary shares. Alternatively, due to difficulties in the capital and credit markets, we may be unable to secure capital on acceptable terms, or at all, to complete acquisitions.

In addition, if we acquire additional businesses, we may not be able to integrate the acquired personnel, operations, and technologies successfully or effectively manage the combined business following the completion of the acquisition. We may also not achieve the anticipated benefits from the acquired business due to a number of factors, including:

- " Unanticipated costs or liabilities associated with the acquisition.
- " Incurrence of acquisition-related costs.
- " Diversion of management's attention from other business concerns.
- " Harm to our existing business relationships with manufacturers, distributors and customers as a result of the acquisition.
- " The potential loss of key employees.
- " Use of resources that are needed in other parts of our business.
- " Use of substantial portions of our available cash to consummate the acquisition.
- " Unrealistic goals or projections for the acquisition.

Moreover, even if we do obtain benefits from acquisitions in the form of increased sales and earnings, there may be a delay between the time when the expenses associated with an acquisition are incurred and the time when we recognize such benefits.

In December 2006, we completed the acquisition of NFR Security, Inc., a U.S. privately held company. In January 2007, we completed the acquisition of Protect Data AB ( "Protect Data"), which was a public company listed on the Stockholm Stock Exchange, and completed the integration of Protect Data into Check Point's business. Protect Data is the owner of 100% of Pointsec Mobile Technologies AB ( "Pointsec"), a leading provider of data security products, and other subsidiaries, as listed below in Item 4 Information on Check Point under the caption Organizational structure. Pointsec provides products that are different in nature than our core technologies, including encryption software that helps companies secure data that may be stored on employee laptops, personal computers, smartphones, and personal digital assistants (PDAs).

---

On December 22, 2008, we entered into an Asset Purchase Agreement with Nokia, Inc. ( "Nokia") to acquire Nokia's security appliance business. The pending acquisition is expected to close in the first or second quarter of 2009 and is subject to regulatory approvals and customary closing conditions. If and when we close this pending acquisition, we expect to expand our security appliance line of business. However, we cannot assure you that we will complete the acquisition or successfully integrate the acquired personnel, operations and technologies or that we will be able to effectively manage the combined business following the completion of the acquisition.

If we are unable to successfully address any of the risks related to acquisitions, our business, financial condition or operating results could be harmed.

*Our operating margins may decline*

We may experience future fluctuations or declines in operating margins from historical levels due to many factors, including:

- <sup>n</sup> Increased competition that results in pressure on us to reduce prices.
- <sup>n</sup> Additional investments in the continuing development and expansion of our sales and marketing organization, including the expansion and further reinforcement of our worldwide field organization.
- <sup>n</sup> Integration of an acquired business that at the time of acquisition has operating margins lower than ours.
- <sup>n</sup> Additional expansion of our research and development organization.
- <sup>n</sup> Expected growth in the percentage of revenues that we derive from products incorporating hardware, which have lower operating margins than software products.
- <sup>n</sup> Global economic conditions that results in changes in customer capital spending budget.

Our operating margins are likely to fluctuate based on the amount and timing of these and other developments. In addition, if our revenue levels are below expectations, this will likely have an adverse effect on our operating margins, since most of our expenses are not variable in the short term.

*Our quarterly operating results are likely to fluctuate which could cause us to miss expectations about these results and cause the trading price of our ordinary shares to decline*

Our revenues from our sales are not consistent from quarter to quarter and we experience some degree of seasonality in our sales. In addition, a majority of our sales typically occur in the last month of each quarter. Factors that could cause our revenues and operating results to fluctuate from period to period include:

- <sup>n</sup> Changes in customer capital spending budgets and allocations throughout the year.
- <sup>n</sup> General economic conditions in the markets in which our customers operate.
- <sup>n</sup> Seasonal trends in customer purchasing.
- <sup>n</sup> Competitive market conditions, including the pricing actions of our competitors.
- <sup>n</sup> The occurrence of an infrastructure failure resulting in delay of quarter-end purchases of products.

- 
- <sup>n</sup> The occurrence of Internet security breaches or threats.
  - <sup>n</sup> The timing and success of new products and new technologies introduced by us or our competitors.
  - <sup>n</sup> Regional or global economic and political conditions.
  - <sup>n</sup> Changes in our operating expenses and extraordinary expenses.
  - <sup>n</sup> Impairment of goodwill and intangibles.
  - <sup>n</sup> Our relationships with, and sales through, our channel partners.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

- <sup>n</sup> Our ability to integrate the technology and operations of acquired businesses with our own business.
- <sup>n</sup> Fluctuations in foreign currency exchange rates.

Unfavorable changes in the factors listed above, many of which are outside of our control, could materially adversely affect our business, operating results, and financial condition.

Historically, our revenues have reflected seasonal fluctuations. Typically, we experience a slowdown in sales of our products in the third quarter and an increase in sales in the fourth quarter. We believe that we will continue to encounter quarter-to-quarter fluctuations.

We operate with minimal backlog of products. Therefore, the timing and volume of orders within a given period and our ability to fulfill these orders, determine the amount of our product revenues within the period.

We derive our sales primarily through indirect channels, making it difficult for us to predict revenues because we depend partially on estimates of future sales provided by third parties. In addition, changes in our arrangements with our network of channel partners or in the products they offer, such as our recent introduction of new support programs and products for our customers, which combine support from our channel partners with back-end support from us, could affect the timing and volume of orders. Furthermore, our expense levels are based, in part, on our expectations as to future revenues. If our revenue levels are below expectations, our operating results are likely to be adversely affected, since most of our expenses are not variable in the short term.

As a result, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as indications of future performance. Due to the factors described above, it is possible that in some future quarter, our operating results may be below the expectations of public market analysts and investors. In this event, the price of our ordinary shares would likely decline.

*Continuing unfavorable national and global economic conditions could have a material adverse effect on our business, operating results and financial condition*

The recent crisis in the financial and credit markets in the United States, Europe and Asia has led to a global economic slowdown, with the economies of the United States and Europe showing significant signs of weakness. If the economies in any part of the world continue to be weak or weaken further, our customers may reduce or postpone their spending significantly. This could result in reductions in sales of our products or services and longer sales cycles, slower adoption of new technologies and increased price competition. In addition, weakness in the end-user market could negatively affect the cash flow of our distributors and resellers who could, in turn, delay paying their obligations to us. This would increase our credit risk exposure and cause delays in our recognition of revenues on future sales to these customers. Specific economic trends, such as declines in the demand for PCs, servers, and other computing devices, or weakness in corporate information technology spending, could have a more direct impact on our business. Any of these events would likely harm our business, operating results and financial condition. If global economic and market conditions, or economic conditions in the United States or other key markets do not improve, or continue to deteriorate, it may have a material adverse effect on our business, operating results and financial condition.

---

*We may fail to maintain effective internal controls in accordance with Section 404 of the Sarbanes-Oxley Act of 2002*

The Sarbanes-Oxley Act of 2002 imposes certain duties on us and our executives and directors. Our efforts to comply with the requirements of Section 404, which started in connection with our 2006 Annual Report on Form 20-F, have resulted in increased general and administrative expense and a diversion of management time and attention, and we expect these efforts to require the continued commitment of resources. Section 404 of the Sarbanes-Oxley Act requires (i) management's annual review and evaluation of our internal control over financial reporting and (ii) an attestation report by our independent registered public accounting firm on the effectiveness of our internal control over financial reporting, in connection with the filing of the Annual Report on Form 20-F for each fiscal year. We have documented and tested our internal control systems and procedures and have made improvements in order for us to comply with the requirements of Section 404. While our assessment of our internal control over financial reporting resulted in our conclusion that as of December 31, 2008, our internal control over financial reporting was effective, and our independent registered public accounting firm has issued an unqualified attestation report on the effectiveness of our internal control over financial reporting, we cannot predict the outcome of our testing in future periods. If we fail to maintain the adequacy of our internal controls, we may not be able to ensure that we can conclude on an ongoing basis that we have effective internal control over financial reporting. Failure to maintain effective internal controls over financial reporting could result in investigation or sanctions by regulatory authorities, and could have a material adverse effect on our operating results, investor confidence in our reported financial information, and the market price of our ordinary shares.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

*We depend on our key personnel, including our executive officers, and the failure to attract and retain key personnel could adversely affect our business*

Our future performance depends in large part on the continued service of our key technical, sales and management personnel. None of our key personnel is bound by an employment agreement requiring service for any defined period of time. If we are unable to retain members of our management and key employees, we must successfully manage transition and replacement issues that may result from such departures.

Our future performance also depends on our ability to attract skilled personnel in the future. Competition for personnel is intense. In order to retain our employees, we provide many of them with cash and stock-based awards that can be realized over time to increase longer-term commitments. However, we cannot be assured that we can retain our key personnel in the future.

The loss of services of any of our key personnel, the inability to retain and attract qualified personnel in the future, or delays in hiring required personnel, could make it difficult for us to meet key objectives, such as product deliveries, sales and customer results and meeting managerial and financial milestones, and could adversely affect our business, financial condition and results of operations.

*Under current U.S., Swedish, and Israeli law, we may not be able to enforce covenants not to compete and, therefore, we may be unable to prevent our competitors from benefiting from the expertise of some of our former employees*

Under current U.S., Swedish, and Israeli law, we may not be able to enforce, in whole or in part, agreements that prohibit some of our employees from competing with us or working for our competitors after they cease working for us. It may be difficult for us to restrict our competitors from gaining the expertise our former employees gained while working for us. Competitors and others have in the past and may in the future attempt to recruit our employees. While our employees are required to sign standard agreements concerning confidentiality and ownership of inventions, we may not be able to prevent them from working with our competitors and providing their expertise to such companies, which could potentially harm our business.

13

---

*We are dependent on a small number of distributors*

We derive our sales primarily through indirect channels. During 2008, we derived approximately 50% of our sales from our 10 largest distributors, with the largest distributor accounting for approximately 16% of our sales, and the second largest distributor accounting for approximately 14% of our sales. During 2007, these two distributors accounted for approximately 30% of our sales.

We expect that a small number of distributors will continue to generate a significant portion of our sales. Furthermore, there has been an industry trend toward consolidation among our distributors, and we expect this trend to continue in the near future which could further increase our reliance on a small number of distributors for a significant portion of our sales. If these distributors reduce the amount of their purchases from us, our business, operating results and financial condition could be materially adversely affected.

Our future success is highly dependent upon our ability to establish and maintain successful relationships with our distributors. In addition, we rely on these entities to provide many of the training and support services for our products and equipment. Accordingly, our success depends in large part on the effective performance of these distributors. Recruiting and retaining qualified distributors and training them in our technology and products requires significant time and resources. Further, we have no long-term contracts or minimum purchase commitments with any of our distributors, and our contracts with these distributors do not prohibit them from offering products or services that compete with ours. Our competitors may be effective in providing incentives to existing and potential distributors to favor their products or to prevent or reduce sales of our products. Our distributors may choose not to offer our products exclusively or at all. Our failure to establish and maintain successful relationships with distributors would likely materially adversely affect our business, operating results and financial condition.

*We purchase several key components and finished products from sole or limited sources, and we are increasingly dependent on contract manufacturers*

Many components, subassemblies and modules necessary for the manufacture or integration of our products are obtained from a sole supplier or a limited group of suppliers. Our reliance on sole or limited suppliers, particularly foreign suppliers, and our reliance on subcontractors involves several risks, including a potential inability to obtain an adequate supply of required components, subassemblies or modules and reduced control over pricing, quality and timely delivery of components, subassemblies or modules. While we expend resources to qualify additional component sources, consolidation of suppliers in the industry and the small number of viable alternatives, have limited the results of these efforts.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

Managing our supplier and contractor relationships is particularly difficult during time periods in which we introduce new products and during time periods in which demand for our products is increasing, especially if demand increases more quickly than we expect.

Difficulties in managing relationships with current contract manufacturers could impede our ability to meet the demand for our products and adversely affect our operating results.

14

---

### *We are dependent on a limited number of product families*

Currently, we derive most of our revenues from sales of Internet security products primarily under our VPN-1, UTM-1, Power-1 and related brands, as well as related revenues from software updates, maintenance and other services. We expect this to continue to be the case in the foreseeable future. Following the acquisition of Protect Data, we also began to generate revenue from data security products and associated software updates, maintenance and support services. Our future growth depends heavily on our ability to effectively develop and sell new and acquired products as well as add new features to existing products. For more details, see Item 4 Information on Check Point and Item 5 Operating and Financial Review and Prospects.

### *We incorporate third party technology in our products, which may make us dependent on the providers of these technologies and expose us to potential intellectual property claims.*

Our products contain certain technology that others license to us. Third party developers or owners of technologies may not be willing to enter into, or renew, license agreements with us regarding technologies that we may wish to incorporate in our products, either on acceptable terms or at all. If we cannot obtain licenses to these technologies, we may be at a disadvantage compared with our competitors who are able to license these technologies. In addition, when we do obtain licenses to third party technologies that we did not develop, we may have little or no ability to determine in advance whether the technology infringes the intellectual property rights of others. Our suppliers and licensors may not be required or may not be able to indemnify us in the event that a claim of infringement is asserted against us, or they may be required to indemnify us only up to a maximum amount, above which we would be responsible for any further costs or damages.

### *We incorporate open source technology in our products which may expose us to liability and have a material impact on our product development and sales*

Some of our products utilize open source technologies. These technologies are licensed to us on varying license structures, including the General Public License. This license and others like it pose a potential risk to products in the event they are inappropriately integrated. In the event that we have not, or do not in the future, properly integrate software that is subject to such licenses into our products, we may be required to disclose our own source code to the public, which could enable our competitors to eliminate any technological advantage that our products may have over theirs. Any such requirement to disclose our source code or other confidential information related to our products could materially adversely affect our competitive position and impact our business results of operations and financial condition.

### *We are the defendants in various lawsuits and are also subject to certain tax disputes and governmental proceedings, which could adversely affect our business, results of operations and financial condition*

We operate our business in various countries, and accordingly attempt to utilize an efficient operating model to optimize our tax payments based on the laws in the countries in which we operate. This can cause disputes between us and various tax authorities in different parts of the world.

15

---

In particular, following audits of our 2002 and 2003 corporate tax returns, the Israeli Tax Authority (the ITA) issued orders challenging our positions on several issues, including matters such as the usage of funds earned by our approved enterprise for investments outside of Israel, deductibility of employee stock options expenses, percentage of foreign ownership of our shares, taxation of interest earned outside of Israel and deductibility of research and development expenses. The largest amount in dispute relates to the treatment of investment income on cash that is held and managed by our wholly-owned Singapore subsidiary, which the ITA is seeking to tax in Israel. In an additional challenge to this amount, the ITA reclassified the transfer of funds from Check Point to our subsidiary in Singapore as a dividend for purposes of the Law for the Encouragement of Capital Investments, which would result in tax on the funds transferred. The ITA orders also contest our positions on various other issues. The ITA, therefore, demanded the payment of additional taxes in the aggregate amount of NIS 963 million with respect to 2002 (assessment received on December 27, 2007) and NIS 151 million with respect to 2003 (assessment received on May 29, 2008), in each

case including interest as of the assessment date. We have appealed the orders relating to both years with the Tel-Aviv District Court, and these appeals are pending. See also Item 8 Financial Information under the caption Legal Proceedings. There can be no assurance that the ITA will accept our positions on these matters or others and, in such an event, we may record additional tax expenses if these matters are settled for amounts in excess of our current provisions.

We have also been named as a defendant in a lawsuit filed by Information Protection and Authentication of Texas, LLC in the Eastern District of Texas on December 30, 2008. The plaintiff's original complaint in the lawsuit alleges infringement by us of U.S. patents nos. 5,311,591 and 5,412,717 and seeks an injunction and an unspecified amount of damages. We currently intend to vigorously defend against plaintiff's claims, but cannot assure you of the outcome of this litigation.

We are currently engaged in various legal disputes with two minority shareholders of our subsidiary SofaWare Technologies Ltd. One of these shareholders is alleging we are oppressing him as a minority shareholder, and he is seeking to compel us to purchase his shares. He is currently valuing his shares at NIS 16 million, subject to change. The other minority shareholder claims that he and other minority shareholders are entitled to exercise veto rights with respect to certain actions of SofaWare. The same shareholder also filed a derivative claim against us on behalf of SofaWare. On February 14, 2008, the court partially accepted the derivative claim and ordered that we pay SofaWare NIS 13 million plus interest. Both parties have appealed this ruling. We are also engaged in additional litigation with these two minority shareholders. We believe that the claims filed by these two minority shareholders are without merit and intend to contest these claims vigorously.

Further, we are the defendants in various lawsuits, including employment-related litigation claims, lease termination claims, patent infringement and other legal proceedings in the normal course of our business. Litigation and governmental proceedings can be expensive, lengthy and disruptive to normal business operations, and can require extensive management attention and resources, regardless of their merit. While we intend to defend the aforementioned matters vigorously, we cannot predict the results of complex legal proceedings, and an unfavorable resolution of a lawsuit or proceeding could materially adversely affect our business, results of operations and financial condition.

*Class action litigation due to stock price volatility or other factors could cause us to incur substantial costs and divert our management's attention and resources*

In the past, following periods of volatility in the market price of a public company's securities, securities class action litigation has often been instituted against that company. Companies such as ours in the software industry, and other technology industries, are particularly vulnerable to this kind of litigation as a result of the volatility of their stock prices. We have been named in the past as a defendant in this type of litigation in the past. Any litigation of this sort could result in substantial costs and a diversion of management's attention and resources.

---

---

*We may not be able to successfully protect our intellectual property rights*

We seek to protect our proprietary technology by relying on a combination of statutory as well as common law copyright and trademark laws, trade secrets, confidentiality procedures, and contractual provisions as indicated below in the section entitled Proprietary Rights in Item 4 Information on Check Point. We have certain patents in the United States and in some other countries, as well as pending patent applications. We cannot guarantee that pending patent applications will be issued, either at all or within the scope of the patent claims that we have submitted. In addition, someone else may challenge our patents and these patents may be found invalid. Furthermore, others may develop technologies that are similar to or better than ours, or may work around any patents issued to us. Despite our efforts to protect our proprietary rights, others may copy aspects of our products or obtain and use information that we consider proprietary. Although we do not know the extent to which there is piracy of our software products, software piracy is a persistent problem. We try to police this type of activity, but it is difficult to do so effectively. In addition, the laws of some foreign countries do not protect our proprietary rights to the same extent as the laws of the United States, Israel or Sweden. Our efforts to protect our proprietary rights may not be adequate and our competitors may independently develop technology that is similar to our technology. If we are unable to secure, protect, and enforce our intellectual property rights, such failure could harm our brand and adversely impact our business, financial condition, and results of operations.

*If a third-party asserts that we are infringing its intellectual property, whether successful or not, it could subject us to costly and time-consuming litigation or expensive licenses, which could harm our business*

There is considerable patent and other intellectual property development activity in our industry. Our success depends, in part, upon our ability not to infringe upon the intellectual property rights of others. Our competitors, as well as a number of other entities and individuals, own or claim to own intellectual property relating to our industry. From time to time, third parties may claim that we are infringing upon their intellectual property rights, and we may be found to be infringing upon such rights. As noted above, we have been named as a defendant in a lawsuit filed by Information Protection and Authentication of Texas, LLC in the Eastern District of Texas on December 30, 2008. The plaintiff's original complaint in the lawsuit alleges infringement by us of U.S. patents nos. 5,311,591 and 5,412,717 and seeks an injunction and

an unspecified amount of damages. In addition, third-parties have in the past sent us correspondence regarding their intellectual property and in the future we may receive claims that our products infringe or violate their intellectual property rights. Furthermore, we may be unaware of the intellectual property rights of others that may cover some or all of our technology or products. Any claims or litigation could cause us to incur significant expenses and, if successfully asserted against us, could require that we pay substantial damages or royalty payments, prevent us from selling our products, or require that we comply with other unfavorable terms. In addition, we may decide to pay substantial settlement costs and/or licensing fees in connection with any claim or litigation, whether or not successfully asserted against us. Even if we were to prevail, any litigation regarding our intellectual property could be costly and time-consuming and divert the attention of our management and key personnel from our business operations. As such, third-party claims with respect to intellectual property may increase our cost of goods sold or reduce the sales of our products, and may have a material and adverse effect on our business.

*We are exposed to various legal, business, political and economic risks associated with international operations; these risks could increase our costs, reduce future growth opportunities and affect our results of operations*

We sell our products worldwide, and we book a significant portion of our revenue outside the United States. We intend to continue to expand our international operations, which will require significant management attention and financial resources. In order to continue to expand worldwide, we will need to establish additional operations, hire additional personnel and recruit additional channel partners, internationally. To the extent that we are unable to do so effectively, our growth is likely to be limited and our business, operating results and financial condition may be materially adversely affected.

17

---

Our international revenues and operations subject us to many potential risks inherent in international business activities, including, but not limited to:

- ⁂ Technology import and export license requirements.
- ⁂ Costs of localizing our products for foreign countries, and the lack of acceptance of localized products in foreign countries.
- ⁂ Trade restrictions.
- ⁂ Imposition of or increases in tariffs or other payments on our revenues in these markets.
- ⁂ Changes in regulatory requirements.
- ⁂ Greater difficulty in protecting intellectual property.
- ⁂ Difficulties in managing our overseas subsidiaries and our international operations.
- ⁂ Declines in general economic conditions.
- ⁂ Political instability and civil unrest which could discourage investment and complicate our dealings with governments.
- ⁂ Variety of foreign laws and legal standards.
- ⁂ Expropriation and confiscation of assets and facilities.
- ⁂ Difficulties in collecting receivables from foreign entities or delayed revenue recognition.
- ⁂ Differing labor standards.
- ⁂ Potentially adverse tax consequences, including taxation of a portion of our revenues at higher rates than the tax rate that applies to us in Israel.
- ⁂ Fluctuations in currency exchange rates and the impact of such fluctuations on our results of operations and financial position.
- ⁂ The introduction of exchange controls and other restrictions by foreign governments.

These difficulties could cause our revenues to decline, increase our costs or both. This is also specifically tied to currency exchange rates which has an impact on our financial statements based on currency rate fluctuations.

*We are controlled by a small number of shareholders who may make decisions with which you or others may disagree*

As of December 31, 2008, our directors and executive officers owned approximately 20.7% of the voting power of our outstanding ordinary shares, or 25.4% of our outstanding ordinary shares if the percentage includes options currently exercisable or exercisable within 60 days of December 31, 2008 (the exercise price of some of these options is greater than our current share market price). The interests of these shareholders may differ from your interests and present a conflict. If these shareholders act together, they could exercise significant influence over our operations and business strategy. For example, although these shareholders hold considerably less than a majority of our outstanding ordinary shares, they may have sufficient voting power to influence matters requiring approval by our shareholders, including the election and removal of directors and the approval or rejection of mergers or other business combination transactions. In addition, this concentration of ownership may delay, prevent or deter a change in control, or deprive a shareholder of a possible premium for its ordinary shares as part of a sale of our company.

18

---

*We may be required to indemnify our directors and officers in certain circumstances*

We have entered into agreements with each of our directors and senior officers to insure, indemnify and exculpate them against some types of claims, subject to dollar limits and other limitations. Subject to Israeli law, these agreements provide that we will indemnify each of these directors and senior officers for any of the following liabilities or expenses that they may incur due to an act performed or failure to act in their capacity as our director or senior officer:

- <sup>n</sup> Monetary liability imposed on the director or senior officer in favor of a third party in a judgment, including a settlement or an arbitral award confirmed by a court.
- <sup>n</sup> Reasonable legal costs, including attorneys' fees, expended by a director or senior officer as a result of an investigation or proceeding instituted against the director or senior officer by a competent authority; provided, however, that such investigation or proceeding concludes without the filing of an indictment against the director or senior officer and either:

No financial liability was imposed on the director or senior officer in lieu of criminal proceedings, or

Financial liability was imposed on the director or senior officer in lieu of criminal proceedings, but the alleged criminal offense does not require proof of criminal intent.

- <sup>n</sup> Reasonable legal costs, including attorneys' fees, expended by the director or senior officer or for which the director or senior officer is charged by a court:

In an action brought against the director or senior officer by us, on our behalf or on behalf of a third party,

In a criminal action in which the director or senior officer is found innocent, or

In a criminal action in which the director or senior officer is convicted, but in which proof of criminal intent is not required.

*We Face the Risk of a Decrease in Our Cash Balances and Losses in Our Investment Portfolio*

Investment income is an important component of our net income. The ability to achieve our investment objectives is affected by many factors, some of which are beyond our control. We rely on third-party money managers to manage the majority of our investment portfolio in a risk-controlled framework. Our cash throughout the world is invested in fixed-income securities and is affected by changes in interest rates. Interest rates are highly sensitive to many factors, including governmental monetary policies and domestic and international economic and political conditions.

The outlook for our investment income is dependent on the future direction of interest rates, the amount of any share repurchases or acquisitions that we effect and the amount of cash flows from operations that are available for investment. Any significant decline in our investment income or the value of our investments as a result of falling interest rates, deterioration in the credit of the securities in which we have invested, or general market conditions, could have an adverse effect on our results of operations and financial condition.

---

*The current global credit crisis may significantly decrease the value of our investment assets*

The performance of the capital markets affects the values of funds that are held in marketable securities. These assets are subject to market fluctuations and will yield uncertain returns, which may fall below our projected return rates. Due to recent market developments, including a series of rating agency downgrades, the fair value of these investments may decline. During 2008, we recorded an other-than-temporary impairment of marketable securities in the amount of \$11.2 million in accordance with SFAS 115. Check Point expects that market conditions will continue to fluctuate and that the fair value of our investments may be impacted accordingly.

Our cash, cash equivalents, short-term deposit and marketable securities totaled \$1,443.8 million as of December 31, 2008. Our investment portfolio policy is buy and hold, while minimizing credit risk by setting maximum concentration limit per issuer and credit rating. Our investments consist primarily of government and corporate debentures. Although we believe that we generally adhere to conservative investment guidelines, the continuing turmoil in the financial markets may result in impairments of the carrying value of our investment assets. We classify our investments as available-for-sale. Changes in the fair value of investments classified as available-for-sale are not recognized to income during the period, but rather are recognized as a separate component of equity until realized. Realized losses in our investments portfolio may adversely affect our financial position and results. Had we reported all the changes in the fair values of our investments into income, our reported net income for the year ended December 31, 2008, would have decreased by \$5.9 million.

One of our primary market risk exposures is changes in interest rates, which relates primarily to our investments in marketable securities. A decline in market interest rates, such as the significant global decline in recent months, has had an adverse effect on our investment income. In a declining interest rate environment, borrowers may seek to refinance their borrowings at lower rates and, accordingly, prepay or redeem securities we hold more quickly than we initially expected. This action may cause us to reinvest the redeemed proceeds in lower yielding investments. An increase in market interest rates could also have an adverse effect on the value of our investment portfolio, for example, by decreasing the fair values of the fixed income securities that comprise a substantial majority of our investment portfolio.

*Our business and operations are subject to the risks of earthquakes and other natural catastrophic events*

Our headquarters in the United States, as well as certain of our research and development operations, are located in the Silicon Valley area of Northern California, a region known for seismic activity. A significant natural disaster, such as an earthquake, could damage our operations and properties, and adversely affect our business, operating results, and financial condition.

### **Risks Related to Our Operations in Israel**

*Potential political, economic and military instability in Israel, where our principal executive offices and our principal research and development facilities are located, may adversely affect our results of operations*

We are incorporated under the laws of the State of Israel, and our principal executive offices and principal research and development facilities are located in Israel. Accordingly, political, economic and military conditions in and surrounding Israel may directly affect our business. Since the State of Israel was established in 1948, a number of armed conflicts have occurred between Israel and its Arab neighbors. Any hostilities involving Israel or the interruption or curtailment of trade between Israel and its present trading partners, or a significant downturn in the economic or financial condition of Israel, could materially adversely affect our operations. Since October 2000, terrorist violence in Israel has increased significantly. In recent years, there has been an escalation in violence among Israel, Hamas, Hezbollah, the Palestinian Authority and other groups, including the recent extensive hostilities along Israel's border with Gaza in December 2008 and January 2009. Ongoing and revived hostilities or other Israeli political or economic factors could materially adversely affect our business, operating results and financial condition.

---

*The tax benefits available to us require us to meet several conditions, and may be terminated or reduced in the future, which would increase our taxes.*

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

For the year ended December 31, 2008, our effective tax rate was 16%. There can be no assurance that our effective tax rate will not change over time as a result of changes in corporate income tax rates, changes in the tax laws of the various countries in which we operate and fluctuations in the growth rate of our business. We have benefited or currently benefit from a variety of government programs and tax benefits that generally carry conditions that we must meet in order to be eligible to obtain any benefit.

If we fail to meet the conditions upon which certain favorable tax treatment is based, we would not be able to claim future tax benefits and could be required to refund tax benefits already received. Additionally, some of these programs and the related tax benefits are available to us for a limited number of years, and these benefits expire from time to time.

Any of the following could have a material effect on our overall effective tax rate:

- <sup>n</sup> Some programs may be discontinued,
- <sup>n</sup> We may be unable to meet the requirements for continuing to qualify for some programs,
- <sup>n</sup> These programs and tax benefits may be unavailable at their current levels,
- <sup>n</sup> Upon expiration of a particular benefit, we may not be eligible to participate in a new program or qualify for a new tax benefit that would offset the loss of the expiring tax benefit, or
- <sup>n</sup> We may be required to refund previously recognized tax benefits if we are found to be in violation of the stipulated conditions.

Additional details are provided in Item 5 Operating and Financial Review and Products under the caption Taxes on income, in Item 10 Additional Information under the caption Israeli taxation, foreign exchange regulation and investment programs, and in notes 10b and 11 to our consolidated financial statements.

*Our operations may be disrupted by the obligations of our personnel to perform military service*

Many of our officers and employees in Israel are obligated to perform military reserve duty until they reach age 45 and, in the event of a military conflict, could be called to active duty. Our operations could be disrupted by the absence of a significant number of our employees related to military service or the absence for extended periods of military service of one or more of our key employees. Military service requirements for our employees could materially adversely affect our business, operating results and financial condition.

*Provisions of Israeli law and our articles of association may delay, prevent or make difficult an acquisition of us, prevent a change of control, and negatively impact our share price*

Israeli corporate law regulates acquisitions of shares through tender offers and mergers, requires special approvals for transactions involving directors, officers or significant shareholders, and regulates other matters that may be relevant to these types of transactions. Furthermore, Israeli tax considerations may make potential acquisition transactions unappealing to us or to some of our shareholders. For example, Israeli tax law may subject a shareholder who exchanges his or her ordinary shares for shares in a foreign corporation, to taxation before disposition of the investment in the foreign corporation. These provisions of Israeli law may delay, prevent or make difficult an acquisition of our company, which could prevent a change of control and, therefore, depress the price of our shares.

---

In addition, our articles of association contain certain provisions that may make it more difficult to acquire us, such as the provision which provides that our board of directors may issue preferred shares. These provisions may have the effect of delaying or deterring a change in control of us, thereby limiting the opportunity for shareholders to receive a premium for their shares and possibly affecting the price that some investors are willing to pay for our securities.

Additional details are provided in Item 10 Additional Information under the caption Articles of association and Israeli Companies Law Anti-takeover measures.

*Our operations expose us to risks associated with fluctuations in foreign currency exchange rates that could adversely affect our business*

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

Although we have operations throughout the world, the majority of our revenue and approximately 56% of our operating costs in 2008 were denominated in, or linked to, the U.S. dollar. Accordingly, we consider the U.S. dollar to be our functional currency. However, approximately 44% of our operating costs in 2008 were incurred in other currencies, particularly in Israeli Shekels, Euros, Swedish Krona and British Pounds. During 2007 and 2008, the Israel shekel appreciated against the U.S. dollar, which resulted in a significant increase in the U.S. dollar cost of our operations in Israel. As a result of this differential, from time to time we may experience increases in the costs of our operations outside the United States, as expressed in dollars, which could have a material adverse effect on our results of operations and financial condition.

The imposition of exchange or price controls or other restrictions on the conversion of foreign currencies could also have a material adverse effect on our business, results of operations and financial condition.

### ITEM 4. INFORMATION ON CHECK POINT

We develop, market and support a wide range of software and combined hardware and software products and services for information technology (IT) security and offer our customers an extensive portfolio of network and gateway security solutions, data and endpoint security solutions and management solutions. Our solutions operate under a unified security architecture that enables end-to-end security with a single line of unified security gateways and allow a single agent for all endpoint security that can be managed by a single unified management console. This unified management allows for ease of deployment and centralized control and is supported and enforced with real-time security updates. Our products and services are sold to enterprises, service providers, small and medium sized businesses and consumers. Our Open Platform for Security (OPSEC) framework allows customers to extend the capabilities of our products and services with third-party hardware and security software applications. Our products are sold, integrated and serviced by a network of partners worldwide.

In January 2007, we completed the acquisition of Protect Data AB (Protect Data), which was a public company listed on the Stockholm Stock Exchange, and completed the integration of Protect Data into Check Point's business. Protect Data operates its business through its wholly owned subsidiary, Pointsec Mobile Technologies AB, a worldwide provider of mobile data protection. Pointsec delivers solutions for automatic data encryption that keeps sensitive information stored on mobile computing devices, such as laptops, PDAs, smartphones and removable media (e.g., USB devices), confidential and secure. With the acquisition of Protect Data, Check Point entered into the data security market.

22

---

On December 22, 2008, we entered into an Asset Purchase Agreement with Nokia to acquire its security appliance business. The pending acquisition is expected to close in the first or second quarter of 2009 and is subject to regulatory approvals and customary closing conditions. Check Point has collaborated with Nokia's security appliance business over the past decade to deliver industry-leading enterprise security solutions. Upon completion of the acquisition, Check Point intends to build on this collaboration to provide an extended security appliance portfolio developed, manufactured and supported by Check Point. Additional details regarding the important events in the development of our business since the beginning of 2008 are provided in Item 5 Operating and Financial Review and Prospects under the caption Overview.

We were incorporated as a company under the laws of the State of Israel in 1993 under the name of Check Point Software Technologies Ltd. Our registered office and principal place of business is located at 5 Ha Solelim Street, Tel Aviv 67897 Israel. The telephone number of our registered office is 972-3-753-4555. Our company's Web site is [www.checkpoint.com](http://www.checkpoint.com). The contents of our Web site are not incorporated by reference into this Annual Report on Form 20-F.

This Annual Report on Form 20-F is available on our Web site. If you would like to receive a printed copy via mail, please contact our Investor Relations department at 800 Bridge Parkway, Redwood City, CA 94065, U.S.A., tel: 650-628-2050, email: [ir@us.checkpoint.com](mailto:ir@us.checkpoint.com).

Our agent for service of process in the United States is CT Corporation System, 818 West Seventh Street, Los Angeles, CA 90017 U.S.A., tel: 213-627-8252.

### Industry Background

The ability to access and distribute information is a key strategic asset in today's competitive business environment. The resulting need to effectively use and communicate information as well as work more collaboratively has led to the extensive deployment of network-based communication systems delivering connectivity. Increased connectivity has in turn expanded the need for technology to safeguard and manage the access to information available over these networks and to secure information contained on these connected systems.

*Increase in connectivity*

Over the past decade, global connectivity has continued to increase rapidly. The emergence of increased reliance on the Internet for business communications and transactions increases the need for secured access to information and applications and raises challenges associated with providing it. Companies of all sizes in most industries are embracing and supporting increased connectivity for mobile and remote employees. This includes connectivity to corporate data and application resources, as well as general Internet access. Remote users are increasingly able to access private corporate networks and information from a growing spectrum of mobile devices, including laptops, PDAs, smartphones, portable media players, and removable media storage devices. The expansion of network access to mobile workers and the increase in information contained on mobile devices is driving demand to secure all devices with access to corporate information.

These developments and the need for secure and managed communications have led to nearly universal adoption of Virtual Private Networks (VPNs). VPNs enable a secured exchange of private information over networks, including the Internet. Sharing information and utilizing services are now widely available, both within the enterprise, and with business partners and customers. As a result, businesses are able to share internal information and to run enterprise applications across geographically dispersed facilities, as well as enable customers, suppliers and other business partners to link into their enterprise information systems. These connectivity services include access to Web information, messaging applications, such as email, database access, transaction-processing services, voice-over-IP services and video teleconferencing services.

*The need for network and gateway security*

The use of networks within organizations and the use of the Internet by organizations of all sizes have increased the risk that information technology resources can be attacked. Organizations have recognized this risk and are deploying security solutions in an effort to protect their information and infrastructure from damage and unauthorized access.

The primary means of controlling access to organizational networks and protecting against attacks is the deployment of Internet firewalls. Firewalls are typically deployed at the demarcation of an organization's Local Area Network (LAN) and the Internet or within an organization between different segments and are used to strictly control traffic into and out of the organizational network or between segments. Firewall technology is constantly evolving to detect and defeat highly sophisticated network and application-level attacks that are increasingly prevalent on the Internet today. Organizations are also deploying an additional layer of security by applying security software to networked endpoint devices, such as personal computers. Endpoint security includes personal firewall, security and policy enforcement features that have been specifically designed for internal and remote personal computing devices. In addition to protecting their IT assets from attack, organizations have taken steps to guard their sensitive information traversing untrusted networks, such as the Internet. Securing organizational information on the Internet is critical as organizations utilize the Internet as their corporate network backbone to link company offices and employees. Transmitting information over the Internet without adequate security exposes this information to unauthorized interception, manipulation or replication. To mitigate this risk, organizations have deployed VPNs to encrypt and authenticate their Internet traffic.

Firewalls and VPNs are usually integrated as a single product. Unified Threat Management (UTM) solutions integrate firewalls and VPNs with additional security features, such as network intrusion prevention and virus scanning in a single, centrally managed security solution. Integrating multiple security functionalities delivers greater security for all network traffic and facilitates efficient management and enforcement of an organization's security policies.

IT security administrators within organizations have primarily focused on securing the network perimeter. However, organizations are realizing the importance of also securing their internal networks and Web-based business applications. Many of today's security threats and attacks emerge within organizations. Internal security breaches can be in the form of worm outbreaks and other attacks that are introduced through mobile and wireless devices, internal hacking and misuse of business applications by users within an organization. In addition, due to the rapid development of Web-based technologies and the increased reliance on the Web to connect remote users, Web-based applications and protocols are highly vulnerable to attacks. This presents many security challenges for businesses because internal networks and Web-based communications contain unique complexities, such as programming code embedded in the network traffic and communications protocols that are used in these environments. Security solutions, for both internal and Web security, need to incorporate an understanding of the applications and protocols that are common in these environments.

The need for data and endpoint security increases as workers continue to move away from centralized corporate environments. While network security offers effective solutions for data in motion, sensitive data can still be lost or accessed improperly. Organizations are deploying an additional layer of security by applying security software to endpoint devices, such as personal computers. Endpoint security includes personal-firewall, Network Access Control (NAC), program control, antivirus, anti-spyware, data security, URL filtering, anti-spam and remote

access features that have been specifically designed for remote personal computing devices.

Lost or stolen computers can end up in the wrong hands, intentionally or unintentionally. Companies of all sizes and government agencies face the consequences of losing sensitive data from lost laptop computers, removable media or plug-and-play storage devices. This drives the need for a complete data protection solution that secures data on all common platforms, deploys easily, scales to any size organization and meets strict compliance requirements related to privacy laws and regulations. For example, a number of publicized cases involving large corporations losing unencrypted laptops and exposing millions of customers and employees to potential identity theft have prompted a surge in data protection legislation and regulatory compliance laws worldwide. The relative ease with which data may be lost makes data security a major concern for organizations. To mitigate this risk, organizations are looking to extend security beyond the network infrastructure, to the data itself.

The primary means of protecting data that resides on endpoints are as follows: full-disk encryption of the hard drive with access control (rendering the data useless to unauthorized parties); media encryption and port protection (to prevent unauthorized copying of sensitive data to USB flash drives, writable CDs and DVDs, etc.); and mobile device and memory card data encryption (to prevent sensitive data from being accessed on lost or stolen PDAs and smartphones).

## Products and Services

Our products, services and technologies provide the following protection:

### *1. Network security gateway*

Our wide range of network security gateways allows our customers to implement their security policies on network traffic between internal networks and the Internet as well as between internal networks and private networks used with partners. These gateways are available as either appliances or software solutions providing customers with a broad range of deployment options, including the ability to customize the configuration to best meet their security needs. Our security gateways include the following technologies to secure traffic and optimize performance:

- <sup>n</sup> Firewall Inspects traffic as it passes through security gateways, classifying it based on various criteria such as source and destination of connection, protocol, services and application used. This provides a means to allow, block and log each connection based on the organization's security policy. Our firewall technology is based on several key differentiated technologies, including:

Patented Stateful Inspection technology that allows flexible and programmable classification of network traffic.

Application Intelligence technology that contains various means to detect the correct use of application protocols and can block attacks that attempt to utilize such exploits in specific applications.

---

Network Address Translation Allows hiding of internal addresses so internal users are not exposed to external threats, as well as connecting private networks that use generic addresses using publicly defined external addresses.

Specific technologies to prevent denial-of-service (DoS) attacks on networks. These attacks include various ways of overloading applications and networks in multiple requests that try to slow and stop their response.

- <sup>n</sup> Intrusion Prevention Technologies Monitors the network for malicious or unwanted traffic and has the ability to detect and block known attacks on the network or system based on usage patterns as well as unknown attacks based on out of bounds usage of certain services and protocols. Intrusion prevention technology is supported by online security update services that provide the latest defense mechanisms including signatures for the most recent attacks. Intrusion prevention is available as technology integrated into the firewall or as a dedicated IPS system.
- <sup>n</sup> Virtual Private Networks (VPNs) Provide the means to enable private communication over a network by encrypting traffic between various sub-networks (site-to-site) or individual computers (such as mobile computers) and the corporate network. This prevents exposing sensitive traffic and attempts to modify such communication and replicate certain transactions.
- <sup>n</sup> Content Screening Enables screening of specific application protocols such as Web traffic to allow/block access to specific Web addresses based on their content. There is also screening for viruses (antivirus) to detect downloads of malicious applications.

- <sup>n</sup> **Messaging Security** Prevents the use of the messaging infrastructure (such as email) to attack the organization. Six dimensions of messaging security technologies are available in our products, including prevention of emailed spam and the use of messaging protocols for various attacks, as well as enabling the scanning of email traffic for malware and viruses embedded in email.
- <sup>n</sup> **Web-Based Communications** Allow remote and mobile employees to securely connect to their organizations' networks via a Web browser (via Secure Sockets Layer VPN technology) and defend against attacks that target our customers' Web-based business applications.
- <sup>n</sup> **Security Acceleration** Patented security acceleration technologies speed up security inspection to ensure a high service level for business applications. These technologies improve overall throughput and reduce latency through several different techniques, such as load balancing and load sharing between physical gateways, balancing security traffic loads between multiple cores on multi-core processors, and offloading repetitive decisions from the general-purpose processor to specialized hardware and software.
- <sup>n</sup> **Virtualization** Certain Check Point gateways are available on a virtual security operations platform that enables organizations to consolidate multiple security gateways in a single hardware system and to secure virtual server environments.

## *2. Data and endpoint security*

Our data and endpoint security technologies provide multiple technologies that run on individual computers (endpoints) connecting to the network, such as desktop computers, mobile computers and communications devices. These technologies include:

- <sup>n</sup> **Personal Firewall** Prevents network attacks on individual computers by blocking internal attacks and the proliferation of network worms within the corporate network, as well as attacks on home and mobile computers that are connected to public networks. Our personal firewall technologies include proprietary technologies such as:
  - Inbound and Outbound Firewalls** Prevent malware and Trojan horses not only from attacking individual computers but also from sending data out through unauthorized applications.
  - Program Advisor and Operating System Firewall** Using a real-time network service, we can detect malicious and/or unauthorized applications running on individual computers and block their activities.
  - Network Access Control** Provides the network with information on the compliance of individual computers to the organization's security policy and allows selective connectivity of devices to the network based on their compliance.
- <sup>n</sup> **Data Protection** Data stored on individual endpoint devices can be exposed to unauthorized parties by copying it to external devices, or even more commonly, if devices fall into the wrong hands. Lost and stolen computers provide unauthorized parties the chance to access all the information stored on these computer hard drives. We protect against these risks to data through:
  - Full-Disk Encryption** All the data stored on an individual PC can be fully encrypted, so that unauthorized parties cannot read this data even if they get physical access to the disk drive.
  - Port Control** Allows an organization to prevent or control the transfer of information from individual computers to external devices such as USB memory devices and external hard drives.
  - Media Encryption** Enables encryption of data stored on mobile devices, such as CDs and DVDs and other external removable media.
- <sup>n</sup> **Remote Access VPNs** Enable mobile devices to securely access an organization's network by encrypting all traffic between mobile devices and the corporate network and ensure mobile devices and users are properly authenticated.
- <sup>n</sup> **Anti-Malware** Antivirus, anti-spyware and other technologies detect viruses and other malware that try to run on any device and/or circumvent its operation. Our anti-malware technology uses some of the industry's best engines and operates on-demand when a new application is stored or retrieved from the device or the network and by scanning computers against this type of attack.

The four technologies above are consolidated into a single endpoint security agent managed by a single administrative console. This is the industry's first and only such solution. It provides total security at the endpoint and eliminates the need to deploy and manage multiple agents, reducing complexity, conflicts between various security components, procurement and management costs and the total cost of ownership.

### 3. Security management

A key element in implementing the above security technologies is the ability to effectively manage the deployment while ensuring consistent operations in accordance with organization policy. Our strategy is to provide a single console for security management. This single console reduces the need for multiple, sometimes conflicting, management systems that require a high degree of specialization and training. The key aspects include:

- " Centralized Policy Management Tools that allow the definition of various aspects of the security policy, such as network access rights, application controls, etc.
- " Provisioning Tools Allow the daily deployment and removal of individual entities, such as new gateways, users and devices.
- " Monitoring Tools Show the status of each controlled device and allow the immediate detection and remediation of various situations.
- " Auditing Tools Consistent tools to log and monitor every change made to the security infrastructure and to ensure that all changes are accounted for and can be traced and tracked by company policies.
- " Security Information and Event Management Today's complex, multi-layered security architecture consists of many devices to ensure servers, hosts and network applications are protected from harmful activity. These devices all generate voluminous logs that are difficult and time consuming to interpret. Our solutions automatically prioritize security events for decisive, intelligent action. Clear, graphical reports help inform decisions related to resource allocation, security optimization and regulatory compliance.

We package and market our products and services under different names and at a variety of prices. Each package addresses security tasks for different network environments and has corresponding support offerings.

Our management and gateway software products run in a variety of deployment environments and on platforms that include standard workstations, servers and dedicated appliances. Check Point has both software and dedicated appliance solutions for both gateway and management products. Additional appliance solutions are also available from our partners such as Nokia Corporation, Crossbeam Systems Inc. and International Business Machines Corporation (IBM). Different client products run on different client Operating Systems (OS), such as Microsoft Windows, Mac OS, Microsoft Windows Mobile, Symbian, Linux and PalmOS.

### Moving Forward

In February 2009, Check Point introduced a new architecture aimed at changing the way customers deploy their IT security infrastructure: the Software Blade architecture. Security environments of large, medium and small companies are becoming more complex as they attempt to address continually evolving threats with new protections. Each new protection requires a new product, hardware platform, management console and set of daily events to monitor. Corporations' security has become increasingly complex and incurs increased operational expenses in order to implement and support these incremental additions to the existing security infrastructure.

As described above in our product and service offerings, in response to rising IT operational expenses, organizations began to seek consolidated security devices that incorporated several functions into a single device, such as unified threat management (UTM) appliance. UTM devices consolidate firewall, VPN, intrusion prevention, antivirus and other functions in a single, turnkey solution and have

been successful in helping companies reduce capital and operational expenditures. Although clearly a good solution to date, it cannot keep up with the rapidly evolving threat environment which requires that UTM functionality be extended.

In an effort to simultaneously address the need for scalable security solutions and the retention of initial investments, Check Point introduced the Software Blade architecture, which provides customers with the ability to tailor their security gateways based on their specific needs at any time. Check Point Software Blade architecture offers businesses a common platform to deploy independent, modular and interoperable security applications or software blades, such as firewall, virtual private network (VPN), intrusion prevention system (IPS), anti-virus, policy management or security reporting blades. The new architecture allows customers to select the exact security software blades they need and to combine them into a single, centrally managed solution. With the new Software Blade architecture customers will be able to move functionality from one system to another, consolidate or split functionalities between systems and assure performance for each software blade by setting usage thresholds. All of these capabilities are intended to enable customers to scale their security needs while simultaneously optimizing their security costs.

#### *Check Point's Software Blade architecture*

Check Point's Software Blade architecture delivers extensible, flexible and manageable security solutions to companies of all sizes. The Software Blade architecture provides customers with the flexibility to custom configure Check Point security gateways and security management systems to meet their specific needs. Customers can deploy any combination of security functions by either purchasing pre-defined systems or building a fully customized solution by choosing a Software Blade container and selecting from a library of over 20 software blades. Each blade runs a separate security function. Therefore, customers can easily extend their security solutions by adding new blades without the necessity of purchasing separate systems. Check Point's Software Blade architecture enables organizations to deploy security dynamically, as needed, with lower total cost of ownership, full integration of the various security functions and with central management of the security system.

### **Technologies**

We have developed and acquired a variety of technologies that secure networks and information. Our products and services implement these technologies to protect our customers' networks and private information, enabling their IT administrators to define and enforce their security policies across the network. These technologies also collect and bring together related information, monitor security and traffic flow, and analyze and update configurations to reflect changes in the security policy.

29

---

#### *Stateful Inspection technology*

Our patented Stateful Inspection technology is a de facto standard in network security technology. In order to provide accurate and highly efficient traffic inspection, Stateful Inspection extracts and maintains extensive state information, i.e., data that provides context for future screening decisions, from all relevant communication layers.

Stateful Inspection runs on a network gateway or an endpoint, such as a personal computer, and enables the screening of all data attempting to pass from one network to another. By tracking each connection, the system ensures that data passing through the gateway complies with a defined security and traffic policy, traffic is managed according to priority, and security decisions are made in an intelligent and timely manner.

Stateful Inspection enables our products to inspect network traffic at high speed. This means that as network traffic increases, our products respond efficiently to the larger volumes of data. Our Stateful Inspection technology can be adapted to new protocols, software applications, and security threats. It can be upgraded and can be run on a wide range of operating systems.

#### *Application Intelligence*

Our Application Intelligence technology provides a set of advanced capabilities that prevents the exploitation of vulnerabilities in business applications, including vulnerabilities in the application code, communication protocols, and the underlying operating system. Application Intelligence provides security for these applications by running multiple security checks, including validation of compliance to standards, validation of expected use of protocols, inspection for known malicious content and control of application layer operations. The result is the ability to proactively shield applications from attack without relying on specific attack signatures. We have integrated our Application Intelligence technology into our Power-1, UTM-1, UTM-1 Edge, VPN-1 Power, UTM, Safe@Office, IPS-1, Connectra, and VPN-1 Power VSX products.

#### *Security Management Architecture (SMART)*

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

Security Management Architecture (SMART), a core component of our unified security architecture, enables our customers to configure and manage security policies from a central administrative point. SMART enables the definition and ongoing management of security policies for businesses of all sizes. This object-oriented architecture maps real-world entities, such as networks and users, to graphical representations that can be manipulated in a database. Integrated monitoring and reporting tools improve the manageability of the system by providing administrators with real-time information on the state of network and security systems. These tools also provide longer term trending information that is useful for periodic security management tasks, such as security audits.

### *Security and network traffic enforcement technologies (based on Stateful Inspection)*

Based on our Stateful Inspection technology, the INSPECT engine scans all incoming and outgoing traffic at security enforcement points. These are typically located at the network perimeter as security gateways, on critical servers or inside the network dividing the network into separate segments.

The INSPECT engine can perform a variety of functions on inspected network traffic as listed below:

- " Drop it when the security policy has been violated.

30

---

- " Encrypt it to create a secured VPN that enables the transfer of private data over public networks, such as the Internet.
- " Prioritize it for Quality of Service (QoS), which is the ability of a network to provide better service for selected traffic.
- " Send it for further processing, such as authentication, content inspection or the filtering of malicious or unwanted traffic.

We have developed a broad range of technologies that can be implemented by our INSPECT engine. In addition, third party technologies can be implemented through our Open Platform for Security (OPSEC) framework, which is described below.

### *SecurePlatform*

SecurePlatform bundles the Check Point security solutions together with a prehardened operating system (OS), in a single package that is easy to deploy. It optimizes the performance of security and OSes and includes a set of tools that ease setup and network configuration, thus reducing the total cost of ownership for security gateways and security management servers. SecurePlatform runs on a variety of open systems, i.e., systems whose key interfaces are based on widely supported standards.

### *ClusterXL*

Our ClusterXL technology provides high availability and load sharing to keep businesses running. It distributes traffic between clusters of redundant gateways so that the computing capacity of multiple machines may be combined to increase total throughput. If an individual gateway becomes unreachable, all connections are redirected to a designated backup without interruption. Integration with our management and enforcement points enables simple deployment.

### *CoreXL*

CoreXL is a technology for intelligently balancing security traffic loads between multiple cores on multi-core processors. It results in a higher level of performance for integrated intrusion prevention. CoreXL, a Check Point security gateway running on a multi-core platform, can be configured to have a large number of active intrusion prevention settings, such as those that would be found protecting sensitive information or networks, while maintaining high performance levels.

### *SecureXL*

SecureXL is a framework of software and hardware technologies, including third-party technologies, designed to increase performance. By using SecureXL, hardware vendors can accelerate the performance of appliances on which our software is installed. With SecureXL, our products can be integrated into high-performance networks typically found in large enterprises and service providers.

*TrueVector technology*

Our TrueVector technology is a patented, flexible and efficient software technology for enabling high-performance, scalable and robust Internet security for personal computers.

31

---

TrueVector stops attempts to send confidential data to unauthorized parties by malicious software, such as keystroke loggers and Trojan horses. It monitors all applications running on protected computers, allowing trusted applications to engage in network communications, while blocking network connections by untrusted applications. TrueVector enforces security policies that are centrally created and managed, stand alone or any combination of these. In addition, TrueVector may be configured to make protected computers invisible to external attackers. The technology is used in the Check Point Endpoint Security and ZoneAlarm lines of endpoint security products, as described above under Products.

*Pointsec Secure Pre-Boot Environment*

Pointsec Secure Pre-Boot Environment (PPBE) is a secure, proprietary operating program. PPBE, along with Pointsec's access control and authentication architecture, the Multi-Factor Authentication Engine (MFAE), encrypts all information stored on a PC's hard disk, i.e., full-disk encryption. It provides a user-friendly graphical user interface for the Pre-Boot Authentication process and allows for the use of all common second factor authentication methods, such as smartcards or tokens. The full-disk encryption technology protects every sector of the computer's hard drive, including the operating system files. This prevents successful attacks on the OS and attacks to gain access to sensitive data on the drive. The graphical user interface is designed like a common login screen to ensure straightforward operation by the end user.

*Hybrid Detection Engine (HDE)*

At the heart of the IPS-1 Sensor (described above under Products), the HDE utilizes multiple detection and analysis techniques to detect hostile or suspicious traffic. These techniques include the following: signature-based methods to detect known patterns of attacks targeted at the network and at vulnerabilities within the network; protocol analysis to validate that the traffic construct meets the expected standards; anomaly detection to identify instances where network traffic exhibits abnormal characteristics; OS fingerprinting to determine the OS type of the traffic destination, which ensures proper receipt and processing; multi-element correlation to detect widespread illicit activity launched from the same source address; dynamic worm mitigation whereby rapidly proliferating worms are detected and automatically blocked from spreading within the network; as well as other techniques to deliver comprehensive network protection.

*Intrusion Prevention with Confidence Indexing*

Based on several analysis data points for every network traffic flow, the IPS-1 Sensor determines a level of confidence that a certain traffic flow is an attack. An exact match to an exploit signature would derive a confidence level at or near 100 percent, whereas purely anomalous traffic would derive a confidence level possibly in the range of 70 percent. This function reduces the occurrence of false positives by enabling a more granular prevention policy, such as block everything with a confidence greater than 90 percent, which allows exploits to be blocked, without the concern of blocking critical business traffic.

*Open Platform for Security (OPSEC)*

Our OPSEC framework provides a single platform that enables the integration and interoperability of multi-vendor information security products and technologies. The OPSEC framework allows certified third-party security applications to plug into our solutions through our published application programming interfaces. Products that carry the OPSEC Certified seal have been tested and certified for integration and interoperability within the OPSEC framework.

32

---

*Precision Virtualization technology*

Virtualizing or emulating a limited set of processes creates a secure sandbox without the overhead of a full OS virtual machine. This allows powerful but lightweight security just for a targeted area that might otherwise be vulnerable to attacks. ZoneAlarm ForceField utilizes this to provide powerful security for Web-browsing activities.

**Revenues by category of activity**

The following table presents our revenues for the last three fiscal years by category of activity:

	Year Ended December 31,		
	2006	2007	2008
	(in thousands)		
<b>Category of Activity:</b>			
Products and licenses	\$ 241,961	\$ 309,785	\$ 338,317
Software updates, maintenance and services	333,180	421,092	470,173
Total revenues	\$ 575,141	\$ 730,877	\$ 808,490

Our revenues for the last three fiscal years by geographic area are set out in Item 5 Operating and Financial Review and Prospects under the caption Overview .

**Sales and Marketing**

We sell through a wide net work of channel partners, including distributors, resellers, value-added resellers, system integrators and managed services providers. Our agreements with these channel partners are non-exclusive. Almost all of our enterprise sales are to our channel partners and not directly to our end users. Most of our sales to the consumer market are either direct, via our Web sites, or through retail stores.

We use various marketing tools to increase awareness and knowledge of our products and to promote sales. These include our corporate Web sites, seminars and tradeshow that we organize and participate in, print media and online advertising, online search optimization and telemarketing campaigns. In addition, in order to try our products, we provide current and prospective customers with limited in time software evaluation licenses. We have strategic relationships with various hardware partners, including vendors providing server, workstation, appliance and networking products. These include Crossbeam Systems Inc., Dell Inc., Hewlett-Packard Co., IBM, Nokia Corporation, Microsoft Corporation, Nortel Networks Corp., Siemens AG and Sun Microsystems Inc.

As of December 31, 2008, we had 701 employees dedicated to sales and marketing.

**Customer Service and Support**

We operate a worldwide technical services organization which provides a wide range of services including the following: (i) technical customer support programs and plans, such as Enterprise Based Support ( EBS ) and Collaborative Enterprise Support ( CES ), which provides support for a customer's entire Check Point product install base; (ii) certification and educational training on Check Point products; and (iii) professional services in implementing, upgrading, and optimizing Check Point products, such as design planning, security implementation, and project management.

Our technical assistance centers in the United States, Israel, and Japan offer worldwide 24-hour service, seven days per week. There are employees in additional locations supporting our call centers, as well as call centers operated by third parties (for consumers support only). As of December 31, 2008, we had 222 employees dedicated to customer service and support.

Our channel partners generally provide their customers with installation, training, maintenance and support, while we provide our high-level technical support to our channel partners. Alternatively, our customers may elect to receive support directly from us. As part of our pre-sale support to our channel partners, we employ technical consultants and systems engineers who work closely with our channel partners to assist them with pre-sale configuration, use and application support.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

We offer comprehensive programs that cover all of our products in a customer's installed base. In 2006, we introduced a new support program for our customers, combining first-line support from our partners, with full back-end support from Check Point. This program provides added value to customers and partners by improving the support our customers receive. The majority of our software updates, maintenance and support contracts are based on these new programs.

### Research and Product Development

We believe that our future success will depend upon our ability to enhance our existing products, develop, acquire and introduce new products to address the increasingly sophisticated needs of our customers. We work closely with existing and potential customers, distribution channels, and major resellers, who provide significant feedback for product development and innovation. Our product development efforts are focused on providing a unified security architecture that functions throughout all layers of the network and devices that carry data. This includes enhancements to our current family of products and the continued development of new products to address network and data security covering perimeter, internal, Web and endpoint security needs, as well as the integrated management of these solutions. We expect to develop most of our new products internally and also expect to leverage the products and technologies recently acquired in our acquisitions of Protect Data AB and NFR Security, Inc., as well as the products and solutions that we expect to acquire upon the closing of the proposed acquisition of Nokia's security appliance business. We may decide, based upon timing and cost considerations that it would be more efficient to acquire or license certain technologies or products from third parties, or to make acquisitions of other businesses. Research and development expenses were \$62.2 million in 2006, \$81.0 million in 2007 and \$91.6 million in 2008. These amounts include stock-based compensation in the amount of \$9.4 million in 2006, \$4.3 million in 2007 and \$5.0 million in 2008. As of December 31, 2008, we had 678 employees dedicated to research and development activities and quality assurance.

### Competition

Information concerning competition is provided in Item 3 Key Information under the caption Risk Factors Risks Relating to Our Business and Our Market. We may not be able to successfully compete.

34

### Proprietary Rights

We use a combination of copyright and trademark laws, trade secrets, confidentiality procedures, and contractual provisions to protect our proprietary rights. We rely on trade secret and copyright laws to protect our software, documentation, and other written materials. These laws provide only limited protection. Further, we generally enter into confidentiality agreements with employees, consultants, customers and potential customers, and limit access and distribution of materials and information that we consider proprietary.

We have six U.S. patents, over 25 U.S. patents pending, and additional patents issued and patent applications pending worldwide. Our efforts to protect our proprietary rights may not be adequate and/or our competitors may independently develop technology that is similar but is based on our technology. Additional details are provided in Item 3 Key Information under the caption Risk Factors Risks Relating to Our Business and Our Market. We may not be able to successfully protect our intellectual property rights.

### Effect of Government Regulation on our Business

Information concerning regulation is provided in Item 5 Operating and Financial Review and Products under the caption Taxes on income and in Item 10 Additional Information under the caption Israeli taxation, foreign exchange regulation and investment programs.

### Organizational Structure

We are organized under the laws of the State of Israel. We wholly own the subsidiaries listed below, directly or through other subsidiaries, unless otherwise specified in the footnotes below:

NAME OF SUBSIDIARY	COUNTRY OF INCORPORATION
Check Point Software Technologies, Inc.	United States of America (Delaware)

## Property, Plants and Equipment

Our international headquarters are located in Tel Aviv, Israel. We own the headquarters pursuant to a lease with the City of Tel Aviv Jaffa, which expires in August 2059. We are not required to make any additional payments under the lease.

Our international headquarters building contains approximately 170,000 square feet of office space. Our international headquarters building is used for administration of our business including sales and research and development.

We also acquired the rights to construct an additional building with approximately 130,000 square feet.

In addition, we lease offices in various locations around the world. Our principal offices locations are as follows:

Location	Primary Usage	Space (square feet)
----------	---------------	---------------------

Redwood City, California	U.S. Headquarters	48,384
Irving, Texas	Technical support, education and professional services	26,725
Stockholm, Sweden	Research and development	15,123

In addition to the above, we lease the following office spaces:

Location	Primary Usage	Space (square feet)
EMEA	Sales, research and development	61,170
Americas	Sales	27,484
Asia Pacific and Japan	Sales	13,514

### Principal Capital Expenditures and Divestitures

For more information regarding our principal capital expenditures currently in progress, see Item 5 Operating and Financial Review and Prospects under the caption Liquidity and Capital Resources.

### ITEM 4A. UNRESOLVED STAFF COMMENTS

None.

### ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following discussion and analysis is based on our consolidated financial statements including the related notes, and should be read in conjunction with them. Our consolidated financial statements are provided in Item 18 Financial Statements .

### Overview

We develop, market and support a wide range of software and combined hardware and software products and services for IT security and offer our customers an extensive portfolio of network and gateway security solutions, data and endpoint security solutions and management solutions. Our solutions operate under a unified security architecture that enables end-to-end security with a single line of unified security gateways and allow a single agent for all endpoint security. We also provide unified management which allows for ease of deployment and centralized control and is supported and enforced with real-time security updates. Our products and services are sold to enterprises, service providers, small and medium sized businesses and consumers. Our Open Platform for Security (OPSEC) framework allows customers to extend the capabilities of our products and services with third-party hardware and security software applications. Our products are sold, integrated and serviced by a network of partners worldwide.

In January 2007, we completed the acquisition of Protect Data AB ( Protect Data ), which at the time was a public company listed on the Stockholm Stock Exchange. Protect Data operates its business through its wholly owned subsidiary, Pointsec Mobile Technologies AB, a worldwide provider of mobile data protection. Pointsec delivers solutions for automatic data encryption that keeps the sensitive information stored on mobile computing devices, such as laptops, PDAs, smartphones, and removable media (e.g., USB devices), confidential and secure. With the acquisition of Protect Data, Check Point entered the data security market.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

On December 22, 2008, we entered into an Asset Purchase Agreement with Nokia to acquire its security appliance business. The pending acquisition is expected to close in the first or second quarter of 2009 and is subject to regulatory approvals and customary closing conditions. Check Point has collaborated with Nokia's security appliance business over the past decade to deliver industry-leading enterprise security solutions. Upon completion of the acquisition, Check Point intends to build on this collaboration to provide an extended security appliance portfolio developed, manufactured and supported by Check Point. We anticipate that as a result of this acquisition, our expenses in several categories will increase commensurate with the operational costs of operating and integrating the acquired business. This will be primarily attributable to increases in personnel and payroll and related costs correlating to increases in cost of revenues, research and development, selling and marketing and general and administrative expenses.

Our business is subject to the effects of general global economic conditions and, in particular, market conditions in the IT, Internet security, and data security industries. If general economic and industry conditions fail to improve, or if they deteriorate, demand for our products could be adversely affected.

We derive most of our revenues from sales of Internet security products primarily under our VPN-1 and related brands, as well as related revenues from software updates, maintenance and other services. We expect this to continue to be the case in the foreseeable future.

We derive our sales primarily through indirect channels. During 2008, we derived approximately 50% of our sales from our ten largest distributors, compared to 49% in 2007. In both 2007 and 2008, the largest distributor accounted for approximately 16% of our sales, and the second largest distributor accounted for approximately 14% of our sales.

39

The following table presents the percentage of total consolidated revenues that we derive from sales in each of the regions shown:

Region:	Year Ended December 31,		
	2006	2007	2008
Americas, principally U.S.	46%	45%	43%
Europe, Middle East and Africa	42%	44%	45%
Asia Pacific and Japan	12%	11%	12%

For information on the impact of foreign currency fluctuations, please refer to Item 11 Quantitative and Qualitative Disclosures about Market Risk Foreign Currency Risk.

### Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP). These accounting principles require us to make certain estimates, judgments and assumptions. We believe that the estimates, judgments and assumptions upon which we rely, are reasonable based upon information available to us at the time that these estimates, judgments and assumptions are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements as well as the reported amounts of revenues and expenses during the periods presented. To the extent there are material differences between these estimates, judgments or assumptions and actual results, our financial statements will be affected. The accounting policies that reflect our more significant estimates, judgments and assumptions and which we believe are the most critical to aid in fully understanding and evaluating our reported financial results, include the following:

- " Revenue recognition
- " Business combinations
- " Goodwill
- " Realizability of long-lived assets
- " Accounting for income taxes

- <sup>n</sup> Equity-based compensation expense
- <sup>n</sup> Allowances for doubtful accounts
- <sup>n</sup> Valuation of financial instruments
- <sup>n</sup> Valuation of investments

In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application. There are also areas in which management's judgment in selecting among available alternatives would not produce a materially different result. Our senior management has reviewed these critical accounting policies and related disclosures with the Audit Committee of our Board of Directors. You can see a summary of all of our significant accounting policies in Note 2 to our consolidated financial statements.

### *Revenue recognition*

We generally derive our revenues from two primary sources:

- <sup>n</sup> Software products and combined hardware and software products; and
- <sup>n</sup> Software updates, maintenance and services.

We recognize product and licenses revenue in accordance with Statement of Position (SOP) No. 97-2, *Software Revenue Recognition*, as amended by SOP No. 98-9, *Modification of SOP No. 97-2, Software Revenue Recognition, With Respect to Certain Transactions* (collectively, SOP 97-2). We recognize product and license revenue when persuasive evidence of an arrangement exists, the product has been delivered, there are no uncertainties surrounding product acceptance, there are no significant future performance obligations, the license fees are fixed or determinable, and collection of the license fee is considered probable. Amounts received in advance of meeting these criteria are deferred. Fees for arrangements with payment terms extending beyond customary payment terms are considered not to be fixed or determinable, in which case revenue is deferred and recognized when payments become due from the customer or are actually collected, providing that all other revenue recognition criteria have been met. As required by SOP 97-2, we determine the value of the product component of our multiple-element arrangements using the residual method when vendor specific objective evidence (VSOE) of fair value exists for the undelivered elements of the support and maintenance agreements. VSOE is based on the price charged when an element is sold separately or renewed. Under the residual method, the fair value of the undelivered elements is deferred and the remaining portion of the arrangement fee is allocated to the delivered elements and is recognized as revenue.

Our software updates and maintenance provides customers with rights to unspecified software product upgrades released during the term of the agreement. Our support services grant our customers telephone access to technical support personnel during the term of the service. We recognize revenues from software updates, maintenance and services ratably over the term of the agreement.

We follow very specific and detailed guidelines in measuring revenue, the most significant of which are discussed above. We determine the fair value of each type of undelivered element as follows:

For enterprise products, we determine the fair value based on the renewal prices charged for our software updates, maintenance and support services. We offer several levels of services, classified by services offered, response time and availability. We have defined classes of customers, based on the total gross value of licensed software products the customer purchased from us. We price renewals for each service level and each class of customer as a fixed percentage of the total gross value of software products the customer licensed from us.

For our consumer products, we determine the fair value based on the renewal prices of our software updates, maintenance and support services for the different products offered. The renewal prices are based on our price list.

---

*Business combinations*

In accordance with business combination accounting, we allocate the purchase price of acquired companies to the tangible and intangible assets acquired and liabilities assumed, as well as to in-process research and development based on their estimated fair values. We engage third-party appraisal firms to assist management in determining the fair values of certain assets acquired and liabilities assumed. Such valuations require management to make significant estimates and assumptions, especially with respect to intangible assets.

Management makes estimates of fair value based upon assumptions it believes to be reasonable. These estimates are based on historical experience and information obtained from the management of the acquired companies and are, inherently, uncertain. Critical estimates made in valuing certain of the intangible assets include, but are not limited to, the following: (i) future expected cash flows from license sales, maintenance agreements, customer contracts and acquired developed technologies and patents; (ii) expected costs to develop the in-process research and development into commercially viable products and estimated cash flows from the projects when completed; (iii) the acquired company's brand and market position as well as assumptions about the period of time the acquired brand will continue to be used in the combined company's product portfolio; and (iv) discount rates. Unanticipated events and circumstances may occur which may affect the accuracy or validity of such assumptions, estimates or actual results. Changes to these estimates, relating to circumstances that existed at the acquisition date, are recorded as an adjustment to goodwill during the purchase price allocation period (generally within one year of the acquisition date) and as operating expenses, if otherwise.

In connection with purchase price allocations, we estimate the fair value of the support obligations assumed in connection with acquisitions. The estimated fair value of the support obligations is determined utilizing a cost build-up approach. The cost build-up approach determines fair value by estimating the costs related to fulfilling the obligations plus a normal profit margin. The sum of the costs and operating profit approximates, in theory, the amount that we would be required to pay a third party to assume the support obligation. See Note 3 to our consolidated financial statements for additional information on accounting for our recent acquisitions.

*Goodwill*

We review goodwill for impairment annually during the fourth quarter of each fiscal year, and whenever events or changes in circumstances indicate its carrying value may not be recoverable in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*. Goodwill impairment is deemed to exist if the carrying value of a reporting unit exceeds its fair value. If the carrying value of a reporting unit's goodwill exceeds its implied fair value, then we would record an impairment loss equal to the difference.

We operate in one operating segment, and this segment comprises our only reporting unit. In calculating the implied fair value of the reporting unit, we use a discounted cash flow methodology, market multiples and market capitalization. Significant estimates that we use in these fair value methodologies include estimates of future cash flows, future short-term and long-term growth rates, weighted average cost of capital and estimates of market multiples of the reporting unit. Other factors we consider are the brand awareness and the market position of the reporting unit and assumptions about the period of time we will continue to use the brand in our product portfolio. If these estimates or their related assumptions change in the future, we may be required to record impairment charges for our goodwill. Our most recent annual goodwill impairment analysis, which was performed during the fourth quarter of 2008, did not result in an impairment charge.

42

---

*Realizability of long-lived assets*

We are required to assess the impairment of tangible and intangible long-lived assets, other than goodwill, under SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, on a periodic basis, when events or changes in circumstances indicate that the carrying value may not be recoverable. Impairment indicators include any significant changes in the manner of our use of the assets or the strategy of our overall business, significant negative industry or economic trends and significant decline in our share price for a sustained period.

Upon determination that the carrying value of a long-lived asset may not be recoverable based upon a comparison of aggregate undiscounted projected future cash flows from the use of the asset or asset group to the carrying amount of the asset, an impairment charge is recorded for the excess of carrying amount over the fair value. We measure fair value using discounted projected future cash flows. We base our fair value estimates on assumptions we believe to be reasonable but that are unpredictable and inherently uncertain. If these estimates or their related assumptions change in the future, we may be required to record impairment charges for our tangible and intangible long-lived assets. No impairment charges were recognized during 2006, 2007 and 2008.

*Accounting for income tax*

We are subject to income taxes in Israel, the U.S. and numerous foreign jurisdictions. Significant judgment is required in evaluating our uncertain tax positions and determining our provision for income taxes in accordance with FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, an Interpretation of FASB Statement No. 109 (FIN 48). FIN 48 contains a two-step approach to recognizing and measuring uncertain tax positions accounted for in accordance with (SFAS) No. 109, *Accounting for Income Taxes* (SFAS 109). The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon settlement.

Although we believe we have adequately reserved for our uncertain tax positions, no assurance can be given that the final tax outcome of these matters will not be different. We adjust these reserves in light of changing facts and circumstances, such as the closing of a tax audit, the refinement of an estimate or changes in tax laws. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact the provision for income taxes in the period in which such determination is made. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate, as well as the related interest and penalty.

43

Accounting for tax positions requires judgments, including estimating reserves for potential uncertainties. We also assess our ability to utilize tax attributes, including those in the form of carry forwards for which the benefits have already been reflected in the financial statements. We do not record valuation allowances for deferred tax assets that we believe are more likely than not to be realized in future periods. While we believe the resulting tax balances as of December 31, 2008 and 2007 are appropriately accounted for in accordance with FIN 48 and SFAS No. 109 as applicable, the ultimate outcome of such matters could result in favorable or unfavorable adjustments to our consolidated financial statements and such adjustments could be material. See Note 11 to our Consolidated Financial Statements for further information regarding income taxes. We have filed or are in the process of filing local and foreign tax returns that are subject to audit by the respective tax authorities. The amount of income tax we pay is subject to ongoing audits by the tax authorities, which often result in proposed assessments. We believe that we adequately provided for any reasonably foreseeable outcomes related to tax audits and settlement. However, our future results may include favorable or unfavorable adjustments to our estimated tax liabilities in the period the assessments are made or resolved, audits are closed or when statutes of limitation on potential assessments expire.

*Equity-based compensation expense*

We account for equity-based compensation in accordance with SFAS No. 123(R), *Share-Based Payment*. Under the fair value recognition provisions of this statement, stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as an expense over the requisite service periods. Determining the fair value of stock-based awards at the grant date requires the exercise of judgment, including the amount of stock-based awards that are expected to be forfeited. If actual forfeitures differ from our estimates, equity-based compensation expense and our results of operations would be impacted.

We estimate the fair value of employee stock options using a Black-Scholes-Merton valuation model. The fair value of an award is affected by our stock price on the date of grant as well as other assumptions, including the estimated volatility of our stock price over the expected term of the awards, and the estimated period of time that we expect employees to hold their stock options. The risk-free interest rate assumption is based upon United States treasury interest rates appropriate for the expected life of the awards. We use the historical volatility of our publicly traded stock options in order to estimate future stock price trends. In order to determine the estimated period of time that we expect employees to hold their stock options, we use historical behavioral patterns rates of employee groups by job classification. Our expected dividend rate is zero since we do not currently pay cash dividends on our common stock and do not anticipate doing so in the foreseeable future.

*Allowance for doubtful accounts*

We maintain an allowance for doubtful accounts for losses that may result from the failure of our channel partners to make required payments. We estimate this allowance based on our judgment as to our ability to collect outstanding receivables. We form this judgment based on an analysis of significant outstanding invoices, the age of the receivables, our historical collection experience and current economic trends. If the financial condition of our channel partners were to deteriorate, resulting in their inability to make payments, we would need to increase the allowance for doubtful accounts.

*Valuation of financial instruments*

Effective January 1, 2008, we adopted SFAS 157, *Fair Value Measurements*, and effective October 10, 2008, adopted FSP No. SFAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*, except as it applies to the nonfinancial

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

assets and nonfinancial liabilities subject to FSP 157-2. SFAS 157 clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability. As a basis for considering such assumptions, SFAS 157 establishes a three-tier value hierarchy, as set forth below, which prioritizes the inputs used in the valuation methodologies in measuring fair value:

44

---

Level 1 Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 Include other inputs that are directly or indirectly observable in the marketplace.

Level 3 Unobservable inputs which are supported by little or no market activity.

The fair value hierarchy also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The actual value at which such securities could actually be sold or settled with a willing buyer or seller may differ from such estimated fair values depending on a number of factors, including, but not limited to, current and future economic conditions, the quantity sold or settled, the presence of an active market and the availability of a willing buyer or seller.

### *Valuation of investments*

Based on our intention with respect to a particular investment at the time of investment, we are generally required to classify our investments into one of three investment categories under GAAP: trading, held-to-maturity, or available-for-sale. The classification of the investment may affect our reported results. For investments classified as trading, we are required to recognize changes in the fair values into income for the period reported. For investments classified as held-to-maturity, we are required to carry the investment at amortized cost, with only the amortization occurring during the period recognized into income. Changes in the fair value of investments classified as available-for-sale are not recognized to income during the period, but rather are recognized as a separate component of equity until realized. We classify our investments as available-for-sale.

We periodically review our marketable securities for impairment. If we conclude that any of these investments are impaired, we determine whether such impairment is other-than-temporary as defined under FSP 115-1. Factors we consider to make such a determination include our intent and ability to hold the investment for a period of time sufficient for any anticipated recovery in market value, the length of time and extent to which the fair value has been less than its cost basis, the credit ratings of the securities, the nature of underlying collateral as applicable and the financial condition and near-term prospects of the issuer. If any impairment is considered other-than-temporary, we will write down the asset to its fair value and take a corresponding charge to our Consolidated Statement of Income.

During 2008, we recorded other-than-temporary impairment on our marketable securities in the amount of \$11.2 million pre-tax.

45

---

### Results of operations

The following table presents information concerning our results of operations in 2006, 2007 and 2008:

	Year Ended December 31,		
	2006	2007	2008
(in thousands)			
Revenues:			
Products and licenses	\$ 241,961	\$ 309,785	\$ 338,317

Net income	48%	38%	40%

### Revenues

We derive our revenues mainly from the sale of products and licenses, and related software updates, maintenance and other services. Our revenues were \$575.1 million in 2006, \$730.9 million in 2007 and \$808.5 million in 2008.

Total revenues in 2008 grew by 11% compared to 2007. Product and license revenues increased by \$28.5 million, or 9%, from \$309.8 million in 2007 to \$338.3 million in 2008, which is attributed mostly to growth in sales of integrated appliances. Over the last three years, product and license revenues as a percentage of revenues remained flat at 42% of revenues. Software updates, maintenance and services revenues increased by \$49.1 million, or 12%, from \$421.1 million in 2007 to \$470.2 million in 2008, primarily as a result of renewals and new

sales of maintenance contracts and increasing sales of SmartDefense security services.

Total revenues in 2007 grew by 27% compared to 2006. Of that increase, 13% was attributed to Check Point's traditional business and the remainder was due to the inclusion of Protect Data in our results for 2007. Protect Data contributed \$82.8 million to our revenues in 2007. The increase of 28% in product and licenses revenues is mainly attributed to the inclusion of Protect Data in our results of operations for 2007. Software updates, maintenance and other services revenues grew by 26% compared to 2006, again, primarily as a result of renewals and new sales of maintenance contracts and increasing sales of SmartDefense security services.

#### *Cost of Revenues*

Total cost of revenues was \$36.4 million in 2006, \$82.3 million in 2007, and \$92.6 million in 2008. Cost of revenues includes cost of product and licenses, cost of software updates, maintenance and services and amortization of technology. Our cost of products and licenses is comprised of the cost of software and hardware production, manuals, packaging and license fees paid to third parties. Cost of products and licenses was \$13.4 million in 2006, \$30.3 million in 2007 and \$40.8 million in 2008, and represented 2% of revenues in 2006, 4% in 2007 and 5% in 2008. In 2007, the increase was mainly due to increased volume of hardware-based products and an increase in licensing expenses which accounted for approximately \$13.3 million, and the inclusion of Protect Data in our financial results which accounted for approximately \$2.8 million. In 2008, the increase was mainly due to increased sales of hardware-based products and an increase in licensing expenses which accounted for approximately \$9.8 million.

Our cost of software updates, maintenance and services includes the cost of post-sale customer support, training and consulting. The cost of software updates, maintenance and services was \$17.6 million in 2006, \$24.3 million in 2007, and \$27.2 million in 2008, and represented 3% of revenues in each of 2006, 2007 and 2008. In 2007, we experienced an increase in cost of software updates, maintenance and services, primarily related to an increase in headcount in our technical services organization, both from organic growth and the inclusion of Protect Data. At the end of 2007, we had 225 employees, of which 18 were added as a result of the Protect Data acquisition, compared to 163 at the beginning of 2007. The increase in the number of employees resulted in an additional compensation expense of approximately \$4.8 million in 2007. In 2008, we experienced an increase in the cost of software updates, maintenance and service primarily related to an increase in compensation and payroll related expenses, as the average headcount throughout 2008 was higher, in comparison to 2007, and as a result of the effect of exchange rate fluctuations on compensation expenses.

Amortization of technology related to the acquisition of Zone Labs was \$5.4 million in 2006. In 2007, amortization of technology increased to \$27.7 million, with the inclusion of Protect Data and NFR. The intangible assets added in connection with the acquisitions are amortized over their useful lives on a straight-line basis, which represents the expected pattern of usage. In 2008, amortization of technology decreased to \$24.6 million. The decrease resulted primarily from Zone Labs' intangible assets being fully amortized at the beginning of 2008.

#### *Research and Development*

Research and development expenses consist primarily of salaries and other related expenses for personnel, as well as the cost of facilities and depreciation of capital equipment. Research and development expenses were \$62.2 million in 2006, \$81.0 million in 2007 and \$91.6 million in 2008, and represented 11% of revenues in each of 2006, 2007 and 2008. In 2007, the increase in research and development expenses was mainly due to growth in headcount, from 573 at the end of 2006 to 673 at the end of 2007, including 68 employees that were added in connection with the Protect Data acquisition. The cumulative additional compensation expense was approximately \$15.5 million. In 2008, approximately \$4.2 million of the increase in research and development expenses was primarily related to an increase in the average number of research and development employees, and approximately \$4.5 million of the increase resulted from the appreciation of the Israeli Shekel, the Euro, and the Swedish Krona compared to the U.S. dollar (compared to \$1.8 million for 2007 in currency fluctuations). The majority of our developers are located in Israel, where compensation related expenses are paid in Israeli Shekels, and in Sweden, where compensation related expenses are paid in Swedish Krona, while our research and development expenses are reported in U.S. dollars. Therefore, changes to the exchange rate between the Israeli Shekel, the Swedish Krona and the U.S. dollar, have affected and may in the future affect our expense level.

#### *Selling and Marketing*

Selling and marketing expenses consist primarily of salaries, commissions, advertising, trade shows, seminars, public relations, travel and other related expenses. Selling and marketing expenses were \$157.1 million in 2006, \$217.5 million in 2007 and \$214.4 million in 2008, and represented 27% of revenues in 2006, 30% of revenues in 2007 and 27% of revenues in 2008. In 2007, the increase in selling and marketing expenses was primarily due to an increase in our sales and marketing headcount, from 580 at the end of 2006 to 717 at the end of 2007, and the associated increase in travel, entertainment and facilities expenses. Of the increase in employees, 134 employees arrived from Protect Data, resulting in an increase in expenses of approximately \$27.9 million. In 2008, the decrease in selling and marketing expenses was primarily due

to a decrease in our sales and marketing headcount, from 717 at the end of 2007 to 701 at the end of 2008.

In addition, the strengthening of the Euro compared to the U.S. dollar contributed approximately \$2.2 million to the 2007 compensation expenses and \$0.3 million to the 2008 compensation expenses. Our expenses in Europe, which primarily relate to compensation, travel, facilities and marketing, are paid in local currencies, while being reported in U.S. dollars. Therefore, changes to the exchange rates between the Euro and the U.S. dollar have affected, and may in the future affect, our expense level.

### *General and Administrative*

General and administrative expenses consist primarily of salaries and headcount related expenses, professional fees, insurance costs and other expenses. General and administrative expenses were \$43.5 million in 2006, \$53.5 million in 2007 and \$53.3 million in 2008, and represented 8% of revenues in each of 2006 and 2007, and 7% of revenues in 2008. The increase in general and administrative expenses in 2007, as compared to 2006, is mainly due to Protect Data acquisition, resulting in an increase in expenses of approximately \$5 million. In 2008, the expense level remained flat relative to 2007.

### *In-Process Research and Development*

Upon the acquisition of Protect Data in January 2007, we recorded a \$17 million charge for acquired in-process research and development (IPR&D). This expense was attributable to projects which have as not yet reached technological feasibility and with no alternative future use. The value of IPR&D was determined using discounted cash flow approach.

Upon the acquisition of NFR in December 2006, we recorded a \$1.1 million charge for acquired IPR&D. This expense was attributable to projects which qualified as not yet having reached technological feasibility and with no alternative future use. The value of IPR&D was determined using the discounted cash flow approach.

### *Operating Margin*

We had operating margins of 48% in 2006, 38% in 2007 and 44% in 2008. The decrease of 10% in operating margin between 2006 and 2007 is attributable primarily to the acquisition of Protect Data and the inclusion of its operations in our financial results. Of that decrease, 5% of the decline in margin was attributable to acquisition-related expenses and the amortization of technology, and 5% of the decline in margins was attributable to the increased level of operating expenses as a result of the acquisition.

The increase of 6% in operating margin between 2007 and 2008 (or the increase of 3% with the exclusion of Acquired in-process research and development in 2007) is attributable primarily to the revenue growth and the full integration of Protect Data's operations into our business. We may experience future fluctuations or declines in operating margins from historical levels due to several factors, as described above in Item 3 Key Information under the caption Risk Factors Risks Relating to Our Business and Our Market Our operating margins may decline.

### *Financial Income, Net*

Net financial income consists primarily of interest earned on cash equivalents and marketable securities. Net financial income was \$63.6 million in 2006, \$49.7 million in 2007 and \$40.9 million in 2008. As we customarily hold debentures until maturity, our current portfolio's yield is derived primarily from market interest rates and the yield of securities on the date of the investment. As most of our investments are in U.S. dollars, our financial income is heavily dependent on prevailing U.S. interest rates. The decrease in net financial income in 2007 was primarily due to the decrease in our portfolio size resulting from the approximately \$614 million in cash we used to acquire Protect Data, as well as declining interest rates. The decrease in net financial income in 2008 was primarily due to the decrease in U.S. interest rates.

We review various factors in determining whether we should recognize an impairment charge for our marketable securities, including our intent and ability to hold the investment for a period of time sufficient for any anticipated recovery in market value, the length of time and extent to which the fair value has been less than its cost basis, the credit ratings of the securities, the nature of underlying collateral as applicable and the financial condition and near-term prospects of the issuer. Based on our consideration of these factors, we recognized in 2008 an other-than-temporary impairment on marketable securities in a total amount of \$11.2 million, pretax, out of which \$6.3 million, pretax, is related to Auction Rate Securities. The remaining impairment of \$4.9 million related to corporate obligations of U.S. Companies with the original

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

principal amounting to \$8.0 million. In evaluating when declines in fair value are other-than-temporary, we considered all available evidence, including market declines subsequent to the end of the period. We may recognize additional losses in the future should the market prospects of the issuers of these securities continue to deteriorate.

As interest rates in the U.S have continued to decrease in the beginning of 2009 and are expected to remain low during 2009, we believe that this trend will result in a lower portfolio yield. See also Item 3, Risk Factors Risks Related to Our Business and Our Market We Face the Risk of a Decrease in Our Cash Balances and Losses in Our Investment Portfolio and The current global credit crisis may significantly decrease the value of our investment assets .

### *Taxes on Income*

Our effective tax rate was 18% in 2006, 15% in 2007 and 16% in 2008. These relatively low tax rates were mainly achieved as a result of the Approved Enterprise and Privileged Enterprise status granted to our production facilities in Israel (as described in Item 10, Additional Information under the caption Israeli taxation, foreign exchange regulation and investment programs ). Our effective tax rate decreased in 2007, as a result of the acquisition of Protect Data and an increase in the tax-exempt income deriving from our Privileged Enterprise status. Our effective tax rate increased in 2008, despite the decrease in the statutory tax rate in Israel from 29% to 27%, as a result of an increase in taxable income at our foreign subsidiary, the changes in the SEK/dollar exchange rate and a decrease in tax-exempt income deriving from our Privileged Enterprise status. See Note 11 to our consolidated financial statements for further information regarding income taxes.

Additional details are provided in Item 10 Additional Information under the caption Israeli taxation, foreign exchange regulation and investment programs and Item 3 Key Information under the caption The tax benefits available to us under Israeli law require us to meet several conditions, and may be terminated or reduced in the future, which would increase our taxes.

51

### Quarterly Results of Operations

The following tables set forth certain unaudited quarterly consolidated statements of income data from the reports on Form 6-K that we furnished to the Securities and Exchange Commission, as well as the percentage of our revenues represented by each item. We prepare our unaudited quarterly consolidated financial statements on the same basis as our audited annual consolidated financial statements and include all adjustments (consisting only of normal recurring adjustments) that we consider necessary for a fair presentation of such information. You should read this information in conjunction with our consolidated financial statements, including the related notes, appearing in Item 18 Financial Statements.

Our future revenues and operating results are uncertain and may fluctuate from quarter to quarter and from year to year due to several factors, as described above in Item 3 Key Information under the caption Risk Factors Risks Relating to Our Business and Our Market. Our quarterly operating results are likely to fluctuate, which could cause us to miss expectations about these results and cause the trading price of our ordinary shares to decline.

Historically, our revenues have reflected seasonal fluctuations related to the slowdown in spending activities for the third quarter, and the increased activity related to the year-end purchasing cycles of many users of our products. We believe that we will continue to encounter quarter-to-quarter seasonality.

Our expense levels are based, in part, on expectations as to future revenues. If our revenue levels are below expectations, our operating results are likely to be adversely affected, since most of our expenses are not variable. As a result, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as indications of future performance. Due to the above, it is likely that in some future quarters, our operating results may be below the expectations of public market analysts and investors. In this event, the price of our ordinary shares would likely decline significantly.

## New Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141R). SFAS 141R establishes principles and requirements for how an acquirer recognizes and measures in its financial statements, the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired. SFAS 141R also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. SFAS 141R is effective for fiscal years beginning after December 15, 2008. Earlier adoption is prohibited. The impact of SFAS 141R on our consolidated results of operations and financial condition will depend on the nature and size of acquisitions, if any, subsequent to the effective date.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51*. SFAS No. 160 establishes accounting and reporting standards that require that (i) the ownership interests in subsidiaries held by parties other than the parent be clearly identified, labeled, and presented in the consolidated statement of financial position within equity, but separate from the parent's equity; (ii) the amount of consolidated net income attributable to the parent and to the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of income; and (iii) changes in a parent's ownership interest, while the parent retains its controlling financial interest in its subsidiary, be accounted for consistently. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. We are currently evaluating the potential impact, if any, of the adoption of SFAS No. 160 on our consolidated financial statement.

In November 2008, the FASB ratified Emerging Issues Task Force Issue No. 08-7, *Accounting for Defensive Intangible Assets*. EITF 08-7 clarifies the accounting for certain separately identifiable intangible assets which an acquirer does not intend to actively use but intends to hold to prevent its competitors from obtaining access to them. EITF 08-7 requires an acquirer in a business combination to account for a defensive intangible asset as a separate unit of accounting which should be amortized to expense over the period the asset diminishes in value. EITF 08-7 is effective for fiscal years beginning after December 15, 2008, with early adoption prohibited. We are currently evaluating the potential impact, if any, of the adoption of EITF 08-7 on our consolidated financial statements.

In April 2008, the FASB issued FASB Staff Position (FSP) FAS 142-3, *Determination of the Useful Life of Intangible Assets*. FSP FAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under FASB Statement No. 142, *Goodwill and Other Intangible Assets*. FSP FAS 142-3 is effective for fiscal years beginning after December 15, 2008 and early adoption is prohibited. We are currently evaluating the potential impact, if any, of the adoption of FAS 142-3 on our consolidated financial statement.

In February 2008, the FASB issued FSP No. FAS 157-1, *Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13* and FASB Staff Position No. FAS 157-2, *Effective Date of FASB Statement No. 157*. Collectively, the Staff Positions defer the effective date of Statement 157 to fiscal years beginning after November 15, 2008 for nonfinancial assets and nonfinancial liabilities except for items that are recognized or disclosed at fair value on a recurring basis at least annually, and amend the scope of Statement 157. We adopted Statement 157 and the related FASB staff positions except for those items specifically deferred under FSP No. FAS 157-2, effective January 1, 2008.

## Liquidity and Capital Resources

2007 and 2008, we have financed our operations through cash generated from operations. Our total cash and cash equivalents, short-term deposits short-term investments, and long-term interest bearing investments, were \$1,241.5 million as of December 31, 2007, and \$1,443.8 million as of December 31, 2008. Our cash and cash equivalents and short-term investments were \$842 million as of December 31, 2007, and \$914.4 million as of December 31, 2008. Our long-term interest bearing investments were \$399.5 million as of December 31, 2007, and \$529.4 million as of December 31, 2008. At the end of 2002, we established a wholly owned subsidiary in Singapore that serves as a vehicle for our international investments and manages our financial assets.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

We generated net cash from operations of \$367.5 million in 2006, \$375.0 million in 2007 and \$434.0 million in 2008. Net cash from operations for 2006 consisted primarily of net income adjusted for non-cash activity, including stock-based compensation expenses, plus an increase in deferred revenue, offset by an increase in trade receivables, net. Net cash from operations for 2007 consisted primarily of net income adjusted for non-cash activity, including in-process research and development, stock-based compensation expenses, amortization of intangible assets, and an increase in deferred income taxes, net plus an increase in deferred revenue, offset by a decrease in accrued expenses and other liabilities and trade payables and an increase in trade receivables, net. Net cash from operations for 2008 consisted primarily of net income adjusted for non-cash activity, including other-than-temporary impairment on marketable securities, stock-based compensation expenses, depreciation, amortization of intangible assets and deferred income taxes benefit plus an increase in deferred revenue and accrued expenses and other liabilities, partially offset by an increase in trade receivables, net.

Net cash provided by (used in) investing activities was \$236.5 million in 2006, \$(206.5) million in 2007 and \$(209.0) million in 2008. In 2006, net cash provided by investing activities consisted primarily of proceeds from marketable securities, partially offset by investments in marketable securities, the purchase of an office building in Israel, and net cash paid in conjunction with the acquisition of NFR. In 2007, net cash used in investing activities consisted primarily of net cash paid in conjunction with the acquisition of Protect Data, investments in marketable securities and renovations to our office building in Israel offset by proceeds from sales and maturity of marketable securities. In 2008, net cash used in investing activities consisted primarily of investments in marketable securities and short term deposits offset by proceeds from sale and maturities of marketable securities. Our capital expenditures amounted to \$44.9 million in 2006, \$16.7 million in 2007 and \$8.3 million in 2008. Our capital expenditures in 2006 consisted primarily of computer equipment and software for our research and development and technical services organization's efforts, as well as increasing infrastructure to enable operation expansion. In addition, in 2006, we purchased an office building in Israel that was occupied in May 2007 for a total amount of \$35.25 million. Additional payments in 2006 for taxes related to the purchase and for the building renovation totaled \$3.58 million. In 2007, our capital expenditures consisted primarily of renovation of our office building in Israel for total of \$7.04 million, computer equipment and software for our research and development and technical services organization's efforts, as well as an increasing infrastructure to enable operation expansions. In 2008, our capital expenditures consisted primarily of renovation of our office building in Israel for total of \$2.6 million, computer equipment and software for our research and development and technical services organization's efforts, as well as an increased infrastructure to enable operation expansions.

56

---

We funded the acquisition of NFR in December 2006 from our operating cash flow.

We funded the acquisition of Protect Data in 2007 for approximately \$614 million from our cash and cash equivalents balances, as well as our marketable securities portfolio. We funded roughly 62% of the acquisition price with our money market funds balances, and the remainder was funded by selling a small portion of our marketable securities portfolio. We plan to fund the acquisition of Nokia from our cash and cash equivalents balances.

Net cash used in financing activities was approximately \$383.1 million in 2006, \$178.3 million in 2007 and \$191.5 million in 2008. In 2006, 2007 and 2008, net cash used in financing activities was attributed primarily to the purchase of treasury shares. Our board of directors approved \$1.6 billion in the form of five programs to repurchase ordinary shares. Each of the first three programs authorized the repurchase of up to \$200 million, the fourth program authorized the repurchase of up to \$600 million, and the fifth program authorized the repurchased of up to \$400 million. The first program was announced on October 28, 2003, and ended on August 24, 2004. The second program was announced on October 28, 2004, and ended on May 31, 2005. The third program was announced on July 25, 2005, and ended on May 18, 2006. The fourth program was announced on May 22, 2006, and ended on March 5, 2008. The fifth program was announced on March 26, 2008, and is still in effect. Under the repurchase programs we may purchase our ordinary shares from time to time, depending on market conditions, share price, trading volume, and other factors. We fund the share purchases from available working capital. The current repurchase program has no time limit and may be suspended from time to time or discontinued. In 2006, we purchased a total of 23.2 million shares at a total cost of \$435.5 million, at an average price of \$18.7 per share. In 2007, we purchased a total of 9.0 million shares at a total cost of \$209.8 million, at an average price of \$23.3 per share. In 2008, we purchased a total of 10.9 million shares at a total cost of \$239.5 million, at an average price of \$21.9 per share. Since the first repurchase program was implemented, through the end of 2008, we purchased a total of 65.8 million shares for a total cost of \$1,366.3 million, at an average price of \$20.8 per share. From time to time we re-issue the repurchased shares to settle exercises of options and awards of restricted share units to our employees and directors. Proceeds from such activities were \$51.9 million, \$24.6 million and \$35 million in 2006, 2007 and 2008, respectively.

Our securities are classified as available-for-sale. Available-for-sale securities are carried at fair value, with the unrealized gains and losses, net of tax, reported in other comprehensive income. Amortization of premium, discount and interest is recorded in our statements of income.

Our liquidity could be negatively affected by a decrease in demand for our products and services, including the impact of changes in customer buying that may result from the current general economic downturn. Also, if the financial system or the credit markets continue to deteriorate or remain volatile, our investment portfolio may be impacted and the values and liquidity of our investments could be adversely affected.

Our principal sources of liquidity consist of our cash and cash equivalents, short-term deposits and marketable securities (which aggregated \$1.443.8 million as of December 31, 2008), our cash flow from operations, and our net financial income. We believe that these sources of liquidity will be sufficient to satisfy our capital requirements for the foreseeable future.

#### Research and Development, Patents and Licenses, etc.

Additional details are provided in this Item 5, under the caption Results of operations .

#### Trend Information

Additional details are provided in this Item 5, under the caption Results of operations .

#### Off-Balance Sheet Arrangements

We are not a party to any off-balance sheet arrangements. In addition, we have no unconsolidated special purpose financing or partnership entities that are likely to create contingent obligations.

#### Tabular Disclosure of Contractual Obligations

The following table summarizes our contractual obligations as of December 31, 2008:

	Payments due by period				
	Total	Less than 1 year	1-3 years	4-5 years	More than 5 years
	(in thousands)				
Operating lease obligations	\$ 11,655	\$ 4,640	\$ 5,610	\$ 1,319	\$ 86
Uncertain income tax position*	\$ 101,230				
Severance pay**	\$ 10,943	-	-	-	-
Total	\$ 123,828	\$ 4,640	\$ 5,610	\$ 1,319	\$ 86

\* Uncertain income tax position under FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, ( FIN 48 ) are due upon settlement and we are unable to reasonably estimate the ultimate amount or timing of settlement. See Note 11a of our Consolidated Financial Statements for further information regarding the Company's liability under FIN 48.

\*\* Severance pay obligations to our Israeli employees, as required under Israeli labor law, are payable only upon termination, retirement or death of the respective employee and there is no obligation for benefits accrued prior to 2007, if the employee voluntarily resigns. Of this amount, \$5.1 million is unfunded.

#### ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

# Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

## Directors and Senior Management

Our directors and executive officers as of December 31, 2008, were as follows:

Name	Position	Independent Director (1)	Outside Director (2)	Member of Audit Committee	Member of Compensation Committee	Member of Nominating Committee
Gil Shwed	Chief Executive Officer and Chairman of the Board					
Marius Nacht	Vice Chairman of the Board					
Jerry Ungerman	Vice Chairman of the Board					
Tal Payne	Chief Financial Officer					
Yoav Chelouche (3)	Director	P	P	P		
Irwin Federman (3)	Director	P	P	P	P	P
Guy Gecht	Director	P	P	P	P	
Dan Propper	Director	P				
Ray Rothrock	Director	P	P	P	P	P
David Rubner	Director	P		P		P
Tal Shavit	Director	P				P

- (1) Independent Director under the applicable rules of the Securities and Exchange Commission and the NASDAQ Global Select Market regulations (see explanation below).
- (2) Outside Director as required by the Israeli Companies Law (see explanation below).
- (3) Financial expert as required by the Israeli Companies Law and NASDAQ requirements with respect to membership on the Audit Committee (see Item 16A Audit Committee Financial Expert ).

Gil Shwed, one of our founders, is the Chairman of our board of directors, a position he has held since 1998. He is also our Chief Executive Officer and one of our directors, both positions he has held since we were incorporated in 1993. Mr. Shwed also served as our President from our incorporation until 2001. Mr. Shwed has received numerous prestigious accolades for his individual achievements and industry contributions, including an honorary Doctor of Science from the Technion Israel Institute of Technology, the World Economic Forum's Global Leader for Tomorrow for his commitment to public affairs and leadership in areas beyond immediate professional interests, and the Academy of Achievement's Golden Plate Award for his innovative contribution to business and technology. Mr. Shwed is a member of the Board of Trustees of Tel Aviv University and the Chairman of the Board of Trustees of the Youth University of Tel Aviv University.

Marius Nacht, one of our founders, has served as Vice Chairman of our board of directors since 2001. Mr. Nacht has served as one of our directors since we were incorporated in 1993. From 1999 through 2005, Mr. Nacht served as our Senior Vice President. Mr. Nacht earned a B.S. cum laude in Physics and Mathematics from the Hebrew University of Jerusalem in 1983, and an M.S. in Electrical Engineering and Communication Systems from Tel Aviv University in 1987.

Jerry Ungerman was appointed Vice Chairman of our board of directors in 2005, and he is responsible for leading our partner and customer relations. From 2001 until 2005, Mr. Ungerman served as our President and before that, from 1998 until 2000, he served as our Executive Vice President. Prior to joining us, Mr. Ungerman accumulated more than 30 years of high-tech sales, marketing and management experience at Hitachi Data Systems (HDS). He began his career with IBM after earning a B.A. in Business Administration from the University of Minnesota.

Tal Payne has served as our Chief Financial Officer since June 2008. Prior to joining us in 2008, Ms. Payne was chief financial officer at Gilat Satellite Networks, Ltd., a leading provider of products and services for satellite-based communications networks. During her tenure at Gilat, Ms. Payne was fully responsible for the strategic planning, developments and leadership of the entire corporate finance organization, and

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

held the role of vice president of finance for over five years. Ms. Payne led the company's public offerings, capital restructurings and other transactions. Before joining Gilat, she was previously employed at PricewaterhouseCoopers. Ms. Payne holds a B.A. in Economics and Accounting and an Executive M.B.A., both from Tel-Aviv University. She is also a Certified Public Accountant.

Yoav Chelouche has served on our board of directors since 2006. Mr. Chelouche has also served as one of our outside directors under the Israeli Companies Law since 2006. Mr. Chelouche has been Managing Partner of Aviv Venture Capital since August 2000. Prior to joining Aviv Venture Capital, Mr. Chelouche served as President and Chief Executive Officer of Scitex Corp., a world leader in digital imaging and printing systems (NASDAQ: SCIX), from December 1994 until July 2000. From August 1979 until December 1994, Mr. Chelouche held various managerial positions with Scitex, including VP Strategy and Business Development, VP Marketing and VP Finance for Europe. Mr. Chelouche is the Chairman of the Board of Dmatek Ltd., Chairman of the Board of Rosetta Genomics Ltd., and a member of the board of directors of a number of private companies. He is also Chairman of Taasiyeda, an Israeli nonprofit organization that promotes the development of leadership and technology skills in children. Mr. Chelouche earned a B.A. in Economics and Statistics from Tel Aviv University, and an M.B.A. from INSEAD University in Fontainebleau, France.

Irwin Federman has served on our board of directors since 1995. Mr. Federman has also served as one of our outside directors under the Israeli Companies Law since 2000. Mr. Federman has been a General Partner of U.S. Venture Partners, a venture capital firm, since 1990. Mr. Federman serves as director of SanDisk Corp., Mellanox Technologies Ltd. and a number of private companies. Mr. Federman received a B.S. in Economics from Brooklyn College.

Guy Gecht has served on our board of directors since 2006. Mr. Gecht has also served as one of our outside directors under the Israeli Companies Law since 2006. Mr. Gecht is the Chief Executive Officer and Chairman of the Board of Electronics For Imaging, Inc. (EFI), a leader in digital imaging and print management solutions for commercial and enterprise printing. Mr. Gecht has served in this position since January 2000. From October 1995 until January 2000, Mr. Gecht held various positions with EFI, including President of the company. Prior to joining EFI, Mr. Gecht held various software engineering positions with technology companies. Mr. Gecht holds a B.S. in Computer Science and Mathematics from Ben-Gurion University in Israel.

Dan Propper has served as one of our directors since 2006. Mr. Propper is the Chairman of the Board of the Osem group, a leading Israeli manufacturer of food products. Mr. Propper served as the CEO of Osem for 25 years until April 2006. In addition to his role at Osem, from 1993 until 1999, Mr. Propper served as President of the Manufacturers' Association of Israel, an independent umbrella organization representing industrial enterprises in Israel, and as Chairman of the Federation of Economic Organizations in Israel, which unites economic and business organizations that represents all business sectors in Israel. Mr. Propper has received prestigious accolades for his contributions to the Israeli industry and economy, including an honorary Doctorate from the Technion - Israel Institute of Technology in 1999. Mr. Propper serves as a member of the boards of the First International Bank of Israel, Delta Galil Industries Ltd., Osem Investments Ltd., and a number of private companies, including Tivall Ltd. and Sabra Salads Ltd., subsidiaries of Osem. Mr. Propper is also a member of the board of the Technion, the Weizmann Institute of Science and Ben-Gurion University in Israel, and of the executive committee of Tel Aviv University. Mr. Propper earned a B.Sc. *summa cum laude* in Chemical Engineering and Food Technology from the Technion.

60

---

Ray Rothrock has served on our board of directors since 1995. Mr. Rothrock has also served as one of our outside directors under the Israeli Companies Law since 2000. Mr. Rothrock is Managing General Partner of Venrock Associates, a venture capital firm, where he has been a member since 1988 and a general partner since 1995. Mr. Rothrock is also a director of a number of private companies. Mr. Rothrock received a B.S. in Engineering from Texas A&M University, an M.S. from the Massachusetts Institute of Technology, and an M.B.A. from the Harvard Business School.

David Rubner has served on our board of directors since 1999. Mr. Rubner is Chairman and Chief Executive Officer of Rubner Technology Ventures Ltd., a venture capital firm, and is a general partner in Hyperion Israel Advisors Ltd., a venture capital fund. Prior to starting Rubner Technology Ventures, Mr. Rubner served as President and Chief Executive Officer of ECI Telecommunications Ltd. Prior to this appointment, he held various management positions in ECI Telecom. Mr. Rubner serves on the boards of directors of Elbit Imaging Ltd., Messaging International Ltd., and a number of private companies. Mr. Rubner is also a member of the Board of Trustees of Bar-Ilan University and Shaare Zedek Hospital, and chairman of the Petach-Tikva Foundation. Mr. Rubner holds a B.S. in engineering from Queen Mary College, University of London and an M.S. in Electrical Engineering from Carnegie Mellon University, and he was a recipient of the Industry Prize in 1995.

Dr. Tal Shavit has served on our board of directors since 2000. Dr. Shavit is an organizational consultant specializing in international collaboration between Israeli and American companies, consulting in the management of cultural differences in order to forge effective collaboration. Her work with leading management teams includes a defining of organizational culture as the engine of the company's activities. She consults to companies undergoing structural change with emphasis on organizational growth through effective mergers and acquisitions and a redefining of management roles in order to meet market changes.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

Of the individuals mentioned above, only Gil Shwed and Marius Nacht owned more than one percent of our outstanding shares as of December 31, 2008. Additional details are provided in this Item 6, under the caption *Share ownership* and in Item 7 *Major Shareholders and Related Party Transactions*.

Some of our directors are board members of multiple companies, some of which may be technology companies. The board of directors has determined that there are no current conflicts of interest with respect to any of our directors.

The term of each director, other than our outside directors (as described below), will expire at our 2009 annual meeting of shareholders. The terms of our outside directors will expire in 2009 and 2011, as described below.

### *Compensation of directors and officers*

The total direct cash compensation that we accrued for our directors and executive officers as a group was approximately \$2.1 million for the year ended December 31, 2006, approximately \$2.0 million for the year ended December 31, 2007, and approximately \$1.4 million for the year ended December 31, 2008. This does not include amounts accrued for expenses related to business travel, professional and business association dues, and other business expenses reimbursed to officers. We do not have any agreements with our directors who are also officers that provide for benefits upon termination of employment, except for severance payments mandated by Israeli law for all employees employed in Israel. In addition, only directors who are not officers receive compensation for serving as directors.

61

---

From time to time we grant options and awards under our stock option and equity incentive plans (described below) to our executive officers and directors. Option grants to directors who are not officers are made pursuant to the automatic option grant program under these plans, while option and award grants to directors who are officers are made only with audit committee, board of directors and shareholder approval.

Our non-employee directors receive an automatic option grant under the 2005 U.S. Plan or the 2005 Israel Plan (but not both), and are also eligible for discretionary awards under the plans. Currently, automatic grants under the 2005 U.S. Plan is made primarily to non-employee directors who are citizens or residents of the United States or other countries other than Israel, and automatic grants under the 2005 Israel Plan is made primarily to non-employee directors who are citizens or residents of Israel.

Each non-employee director who is first elected or appointed to the board of directors is granted an option to purchase 50,000 ordinary shares on the date of the initial election or appointment, vesting in equal annual installments over a four-year period. On the date of each annual general meeting of shareholders, each non-employee director who is to continue to serve as a non-employee director after the annual meeting is granted an option to purchase an additional 25,000 ordinary shares, of which 50% vest six months after the grant date, 25% vest nine months after the grant date, and another 25% vest a year after the grant date, provided that the director has served as a non-employee director for at least six months prior to the date of the annual meeting. The directors in office immediately prior to the date of initial appointment or election, or of the annual meeting, as applicable, may determine to reduce the initial or annual grant to all non-employee directors or specific non-employee directors.

All options to directors are granted at an exercise price equal to 100% of the closing price of the ordinary shares on the NASDAQ Global Select Market on the date of grant.

As of December 31, 2008, our executive officers and directors held options to purchase an aggregate of approximately 19.0 million shares and held 34,261 restricted stock units under our stock option and equity incentive plans. The exercise prices of these options range between \$13.00 and \$79.79, and their expiration dates range between June 2009 and September 2015. During 2008, we granted our executive officers and directors options to purchase an aggregate of approximately 1.3 million shares and 34,261 restricted stock units under our stock option and equity incentive plans. The exercise prices of these options range between \$23.35 and \$24.01, and their expiration dates range between July 22, 2015, and September 3, 2015. Other than as specified in the share ownership table under the caption *Share ownership* below, none of our directors and officers holds more than 1% of our outstanding shares.

### **Board Practices**

Our board of directors currently consists of ten members. Under our articles of association, the board is to consist of between six and twelve members. Each director (other than an outside director as described below) is elected to serve until the next annual general meeting of shareholders and until his or her successor has been elected. Each officer is elected by the board of directors and serves at the discretion of the board. All of our officers and directors, other than non-employee directors, devote substantially all of their working time to our business. There are no family relationships among any of our directors, officers, or key employees.

Our articles of association provide that any director may, by written notice to us, appoint another person to serve as an alternate director or may cancel the appointment of an alternate director. Any person eligible to serve as a director, other than a person who is already a director or an alternate director, may act as an alternate director. The term of appointment of an alternate director may be for one meeting of the board, for a specified period of time, a specified meeting or action of the board or until notice is given of the cancellation of the appointment. No director has appointed, and, to our knowledge, no director intends to appoint, any other person as an alternate director.

#### *Outside and independent directors*

*Outside directors.* In accordance with the Israeli Companies Law and the relevant regulations, we must have at least two outside directors who meet the Israeli statutory requirements of independence. At least one of the outside directors is required to have financial and accounting expertise and the other outside director or directors are required to have professional expertise, all as defined under the Companies Law. Our board of directors has determined that Yoav Chelouche and Irwin Federman have financial and accounting expertise, and Guy Gecht and Ray Rothrock have professional expertise.

An outside director serves for a term of three years, which may be extended for additional three-year terms. An outside director can be removed from office only under very limited circumstances. All of the outside directors must serve on the company's audit committee, and at least one outside director must serve on each committee of the board of directors. As of December 31, 2008, Yoav Chelouche, Irwin Federman, Guy Gecht and Ray Rothrock are our outside directors under the Israeli Companies Law. Yoav Chelouche's and Guy Gecht's term of office will expire in 2009. Irwin Federman's and Ray Rothrock's term of office will expire in 2011.

*Independent directors.* The Sarbanes-Oxley Act of 2002, as well as related rules subsequently implemented by the Securities and Exchange Commission and the NASDAQ Global Select Market, requires issuers to comply with various corporate governance practices. Under the rules applicable to us as a foreign private issuer, we are required to have a majority of independent directors within the meaning of the applicable NASDAQ regulations. Our board of directors complies with these requirements by including a majority of members who are independent directors within the meaning of the applicable NASDAQ regulations. As of December 31, 2008, Yoav Chelouche, Irwin Federman, Guy Gecht, Dan Propper, Ray Rothrock, David Rubner and Tal Shavit are our independent directors under the applicable NASDAQ regulations. Our independent directors have regularly held meetings at which only independent directors are present.

Pursuant to a recent amendment to the Israeli Companies Law, an Israeli company, whose shares are publicly traded, may elect to adopt a provision in its articles of association pursuant to which a majority of its board of directors will constitute individuals complying with certain independence criteria prescribed by the Companies Law. We have not included such a provision in our articles of association because our board of directors already complies with the independence requirements under the rules of the NASDAQ Global Select Market, as described above.

#### *Committees of the board of directors*

Our articles of association provide that the board of directors may delegate all of its powers to committees of the board as it deems appropriate, subject to the provisions of Israeli law. Our board of directors has established an audit committee, compensation committee and nominating committee.

*Audit committee.* Under the Israeli Companies Law, the board of directors of any public company must establish an audit committee. The audit committee must consist of at least three directors and must include all of the outside directors. The audit committee may not include the chairman of the board, any director whom we employ or who provides services to us on a regular basis, a controlling shareholder, or certain relatives of a controlling shareholder. In addition, the NASDAQ regulations also require us to maintain an audit committee consisting of at least three directors, all of whom must be independent under the NASDAQ regulations. Irwin Federman is the chairman of the audit committee. Yoav Chelouche, Guy Gecht, Ray Rothrock and David Rubner serve as the other members of our audit committee. The audit committee has adopted an audit committee charter as required by the NASDAQ regulations.

The audit committee's duties include providing assistance to the board of directors in fulfilling its legal and fiduciary obligations in matters involving our accounting, auditing, financial reporting, internal control and legal compliance functions. In this respect the audit committee approves the services performed by our independent accountants and reviews their reports regarding our accounting practices and systems of internal accounting controls. The audit committee also oversees the audits conducted by our independent accountants and takes those actions, as it deems necessary to satisfy itself that the accountants are independent of management. Under the Israeli Companies Law, the audit committee

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

also is required to monitor whether there are any deficiencies in the administration of our company, including by consulting with the internal auditor, and to review and approve related party transactions.

*Compensation committee.* Our compensation committee consists of Irwin Federman, Guy Gecht, and Ray Rothrock. The compensation committee's duties include making recommendations to the board of directors regarding the issuance of employee equity incentives under our equity incentive plans, and determining salaries and bonuses for some of our executive officers and incentives for our other employees. The compensation committee has adopted a compensation committee charter.

*Nominating committee.* The nominating committee identifies prospective board candidates, recommends nominees for election to our board of directors, develops and recommends board member selection criteria, considers committee member qualification, supervises the selection and composition of committees of our board of directors, and provides oversight in the evaluation of our board of directors and each committee. Our nominating committee consists of Irwin Federman, Ray Rothrock, David Rubner, and Tal Shavit. The nominating committee has adopted a nominating committee charter.

64

### Employees

As of December 31, 2008, we had 1,884 employees.

Over the past three years, the number of our employees by function was as follows:

	As of December 31,		
	2006	2007	2008
<b>Function:</b>			
Research, development and quality assurance	573	673	678
Marketing, sales and business development	580	717	701
Customer support	163	225	222
Information systems, administration, finance and operations	252	286	283
Total	1,568	1,901	1,884

From time to time, we also engage a limited number of consultants, subcontractors, and temporary help. As of December 31, 2008, we had 82 people of this nature, as shown below:

- " 37 Consultants
- " 22 Contractors
- " 23 Temporary

Over the past three years, the number of our employees by geographic area was as follows:

	As of December 31		
	2006	2007	2008
<b>Region:</b>			
Israel	708	797	812

	As of December 31		
United States	585	615	617
Rest of the World	275	489	455
Total	1,568	1,901	1,884

We are subject to Israeli labor laws and regulations with respect to our Israeli employees. The Israeli labor laws differ materially from U.S. labor laws and, in some cases, impose material obligations on us (such as severance pay and mandatory cost of living increases). We are also subject to the labor laws and regulations of other jurisdictions in the world where we have employees.

65

## Share Ownership

The following table shows information regarding beneficial ownership by our directors and executive officers as of December 31, 2008. Beneficial ownership is determined in accordance with rules of the Securities and Exchange Commission.

All information with respect to the beneficial ownership of any principal shareholder has been furnished by such shareholder and, unless otherwise indicated below, we believe that persons named in the table have sole voting and sole investment power with respect to all of the shares shown as beneficially owned, subject to community property laws, where applicable. The shares beneficially owned by the directors include the shares owned by their family members to which such directors disclaim beneficial ownership.

The share numbers and percentages listed below are based on 210,042,282 shares outstanding as of December 31, 2008.

Name	Number of shares beneficially owned (1)	% of class of shares (2)	Title of securities covered by the options	Number of options (3)	Exercise price	Date of expiration
Gil Shwed	34,314,442	15.6%	Ordinary shares	9,352,150	\$13.00 - \$26.99	06/25/2009-09/03/2014
Marius Nacht (4)	20,253,945	9.6%	Ordinary shares	1,752,149	\$13.00 - \$26.99	06/25/2009-09/26/2012
All directors and officers as a group (11 persons including Messrs. Shwed and Nacht) (5)	56,652,791	25.4%	Ordinary shares	13,092,049	\$13.00 - \$79.79	06/25/2009-09/03/2014

- (1) The number of ordinary shares shown includes shares that each shareholder has the right to acquire pursuant to stock options that are exercisable within 60 days after December 31, 2008 (as determined in accordance with footnote (3)).
- (2) If a shareholder has the right to acquire shares by exercising stock options (as determined in accordance with footnote (3)), these shares are deemed outstanding for the purpose of computing the percentage owned by the specific shareholder (that is, they are included in both the numerator and the denominator), but they are disregarded for the purpose of computing the percentage owned by any other shareholder.
- (3) Number of options immediately exercisable or exercisable within 60 days from December 31, 2008. The exercise price of some of these options is greater than our current share market price.
- (4) In addition to the amount above for which Mr. Nacht claims beneficial ownership, Mr. Nacht is the beneficiary of a trust that holds 2,000,000 shares. The trust, which was initially established in May 2005, is irrevocable and is currently scheduled to expire in May 2009. Mr. Nacht does not control the trust and has limited access to information concerning activities and holdings of the trust. Mr. Nacht disclaims beneficial ownership of the shares held in the trust.

- (5) Each of Messrs. Ungerman, Payne, Chelouche, Federman, Gecht, Propper, Rothrock, Rubner and Dr. Shavit beneficially owns less than one percent of our outstanding ordinary shares.

66

## Equity Incentive Plans

The following table summarizes our equity incentive plans as of December 31, 2008:

Plan	Share reserved	Option and RSUs grants net *	Outstanding options and RSUs	Options outstanding exercise price	Date of expiration	Options and RSUs exercisable
2005 United States Equity Incentive Plan	26,000,000	1,615,920	1,405,063	\$ 16.80-\$24.01	09/26/2012-09/03/2015	596,206
2005 Israel Equity Incentive Plan	39,000,000	7,523,216	7,162,988	\$ 16.80-\$24.01	09/26/2012-09/03/2015	2,259,207
1996 United States Stock Option Plan	41,131,261	41,131,261	1,834,321	\$ 13.02-\$79.79	01/14/2009-07/24/2012	1,791,303
1996 Israel Stock Option Plan	37,067,781	37,067,781	12,301,329	\$ 13.00-\$44.42	01/13/2009-09/26/2012	9,735,240
Zone Labs 1998 Stock Option Plan	2,461,943	2,461,943	72,408	\$ 1.66-\$6.08	08/29/2009-02/16/2014	72,408
Employee Stock Purchase Plan	6,000,000	2,982,857				
Pointsec Stock Option Plan	496,265	496,265	203,622	\$ 5.91-\$19.45	05/13/2011-02/28/2012	174,152

\* Grants net is calculated by subtracting options expired or forfeited.

In 2005, we adopted the following two new equity incentive plans: our 2005 United States Equity Incentive Plan, which we refer to as the 2005 U.S. Plan; and our 2005 Israel Equity Incentive Plan, which we refer to as the 2005 Israel Plan. Both of these plans are in effect until 2015. Following ratification of the new plans by our shareholders in September 2005, we stopped issuing options under our 1996 United States Stock Option Plan and 1996 Israel Stock Option Plan.

### *Number of ordinary shares reserved for future grants under 2005 plans*

We initially reserved a total of 50,000,000 ordinary shares for future grants under the 2005 U.S. plan and the 2005 Israel plan (specifically, 20,000,000 ordinary shares under the 2005 U.S. Plan, and 30,000,000 ordinary shares under the 2005 Israel Plan). These are in addition to the shares issuable upon the exercise of options outstanding under our 1996 United States Stock Option Plan, our 1996 Israel Stock Option Plan, the Zone Labs 1998 Stock Option Plan, our Employee Stock Purchase Plan, and Pointsec Mobile Technologies 2003, 2005 and 2006 Stock Option Plans, which are described in greater detail below. Since January 2006, this number increases automatically by an aggregate of 5,000,000 shares a year for both plans combined, of which 2,000,000 ordinary shares are added each January 1<sup>st</sup> to the number of shares reserved under the 2005 U.S. Plan, and 3,000,000 ordinary shares are added each January 1<sup>st</sup> to the number of shares reserved under the 2005 Israel Plan.

Any ordinary shares subject to awards under our 2005 U.S. Plan or 2005 Israel Plan are deducted from the number of ordinary shares reserved for issuance under that plan. If any ordinary shares are issued as Restricted Stock, Restricted Stock Units (RSUs), or Performance Shares under our 2005 U.S. Plan or 2005 Israel Plan, and they have a per share or unit purchase price lower than 100% of the fair market value on the date of grant, twice this number of ordinary shares is deducted from the number of ordinary shares reserved for issuance under that plan. Shares that are issued pursuant to any award under our 2005 U.S. Plan or 2005 Israel Plan are not returned to the plan. However, if an award under our 2005 U.S. Plan or 2005 Israel Plan expires or becomes unexercisable without having been exercised in full, or is forfeited, or repurchased by us at its original price due to the failure to vest, the shares which were subject to the award, become available for future grant or sale under that plan.

As of December 31, 2008, we had granted options to purchase an aggregate of 8,568,690 ordinary shares under the 2005 U.S. Plan and the 2005 Israel Plan combined, of which options to purchase 7,169,999 ordinary shares were outstanding on that date. The option exercise prices range between \$16.80 and \$24.01 per share. As of December 31, 2008, we had granted an aggregate of 2,306,227 RSUs under the 2005 U.S. Plan and the 2005 Israel Plan combined, of which 1,398,052 RSUs were outstanding on that date.

#### *Administration*

Both the 2005 U.S. Plan and the 2005 Israel Plan are administered by our board of directors or a committee of our board. The compensation committee of our board of directors currently operates as the administrator of the plans. The administrator has full power to determine the persons to whom awards shall be granted and the other terms of the awards granted, including (a) the number of shares subject to each award, (b) the duration of the related award agreement, (c) the time, manner and form of payment upon the exercise of an award, and (d) other terms and provisions governing the awards. The administrator also establishes the vesting schedule of awards that are granted.

#### *2005 United States Equity Incentive Plan*

*Awards.* The 2005 U.S. Plan provides for the following kinds of awards, which we refer to generically as awards: (i) Incentive Stock Options (ISOs), (ii) Non-statutory Stock Options (NSOs), (iii) Restricted Stock, (iv) Restricted Stock Units (RSUs), (v) Performance Shares, (vi) Performance Units, and (vii) Deferred Stock Units. All of these awards can vest based on time or performance milestones.

*Granting of options, price and duration.* Our 2005 U.S. Plan provides that each option will expire on the date stated in the notice of grant, which will not be more than seven years from its date of grant (or five years, in the case of an ISO granted to a person who on the date of grant owns 10% or more of our voting power). The exercise price of an option cannot be less than 100% of the fair market value per share on the date of grant (or 110% of the fair market value, in the case of an ISO granted to a person who on the date of grant owns 10% or more of our voting power). The administrator will fix the period within which the award can be exercised and the exercise price. No award can vest until at least six months after the grant date.

*Granting of awards other than options and price.* The administrator can determine the conditions that must be satisfied, which typically will be based principally or solely on the recipient's continuing to provide services to us, but conditions may also include a performance-based component. We can issue ordinary shares under grants of Restricted Stock, RSUs, Performance Shares and Performance Units upon payment of their nominal value. No award can vest until at least one year after the grant date. Deferred Stock Units consist of Restricted Stock, RSUs, Performance Shares or Performance Units that the administrator permits to be paid out in installments or on a deferred basis.

#### *2005 Israel Equity Incentive Plan*

*Awards.* The 2005 Israel Plan provides for the following kinds of awards, which we refer to generically as awards: (i) Approved 102 Options/Shares, which are grants to employees and officers that are eligible for favorable tax treatment in Israel and which must be held by a trustee for a minimum period; (ii) Non-approved 102 Options/Shares, which are grants of options or shares that are not eligible for favorable tax treatment in Israel and which may be held, directly by the participants; (iii) Restricted Stock; (iv) RSUs; (v) Performance Shares; (vi) Performance Units; and (vii) Deferred Stock Units. All of these awards can vest based on time or performance milestones, or through other subsidiaries.

*Trustee.* A trustee designated by our board of directors and approved by the Israel Tax Authority must hold any shares allocated or issued upon exercise of Approved 102 Options or other shares subsequently received following any realization of rights, including bonus shares (stock dividends), for at least the period of time specified by Section 102 of Israel's Income Tax Ordinance.

*Granting of options, price and duration.* Our 2005 Israel Plan provides that each option will expire on the date stated in the option agreement, which will not be more than seven years from its date of grant. The exercise price of an option cannot be less than 100% of the fair market value per share on the date of grant. The administrator will fix the period within which the award can be exercised and the exercise price. No option can vest until at least six months after the grant date.

*Granting of awards, other than options, and price.* The administrator can determine the conditions that must be satisfied, which typically will be based principally or solely on the recipient's continuing to provide services to us, but conditions may also include a performance-based

component. We can issue ordinary shares under grants of Restricted Stock, RSUs, Performance Shares and Performance Units upon payment of their nominal value. No award can vest until at least one year after the grant date. Deferred Stock Units consist of Restricted Stock, RSUs, Performance Shares, or Performance Units that the administrator permits to be paid out in installments or on a deferred basis.

*Change of control arrangements.* Upon a change of control of us, if the successor entity refuses to assume or provide substitute awards, then the administrator of the plans, which is currently the compensation committee of our board of directors, can either terminate all unvested awards or accelerate the vesting period of any award under our 2005 U.S. Plan and our 2005 Israel Plan. The administrator also has the authority to accelerate the vesting of the ordinary shares subject to outstanding awards held by our directors, officers, and employees in connection with the subsequent termination of some officers' employment following a change of control event.

#### *1996 United States Stock Option Plan and 1996 Israel Stock Option Plan*

As of December 31, 2008, we had outstanding options to acquire an aggregate of 14,135,650 ordinary shares under our 1996 United States Stock Option Plan and 1996 Israel Stock Option Plan combined. The option exercise prices range between \$13.00 and \$79.79 per share. We do not issue any more stock options under our 1996 United States Stock Option Plan and 1996 Israel Stock Option Plan.

69

#### *Zone Labs 1998 Stock Option Plan*

In connection with our acquisition of Zone Labs in March 2004, we assumed all of the outstanding Zone Labs stock options under the Zone Labs 1998 Stock Option Plan, which were converted into options to purchase approximately 2.8 million of our ordinary shares. As of December 31, 2008, 2,389,535 ordinary shares had been issued under the Zone Labs 1998 Stock Option Plan, and options to purchase 72,408 ordinary shares were outstanding on that date. The stock options generally have terms of between five and ten years and generally vest over a four-year period. The option exercise prices range between \$1.66 and \$6.08 per share. No further stock options can be granted under the Zone Labs 1998 Stock Option Plan.

#### *Protect Data Stock Option Plans*

In connection with our acquisition of Protect Data in 2007, we assumed all of the outstanding options to purchase shares of Protect Data issued under the Pointsec Mobile Technologies 2003, 2005 and 2006 Stock Option Plans, which were converted into options to purchase 751,769 of our ordinary shares. As of December 31, 2008, we had outstanding options to acquire an aggregate of 203,622 ordinary shares under these plans combined.

The options generally have terms of between five and six years and they generally vest over a three-year period. The option exercise prices range between \$5.91 and \$19.45 per share. No further stock options can be granted under these plans.

#### *Employee Stock Purchase Plan*

In 1996, we adopted an Employee Stock Purchase Plan, which we refer to as the ESPP. The ESPP permits our full-time employees (and full-time employees of some of our subsidiaries) to purchase ordinary shares through payroll deductions. Under the ESPP, 6,000,000 ordinary shares were authorized for issuance. As of January 30, 2009, 3,218,322 ordinary shares had been issued under the ESPP. The ESPP has six-month offering periods, with purchases occurring in January and July. The compensation committee of our board of directors administers the ESPP. According to our shareholders' resolution at our annual meeting of shareholders, held in September 2005, the ESPP will terminate on the earliest of (i) the last business day in January 2016, (ii) when no more shares are available for issuance under the ESPP, or (iii) when all purchase rights under the ESPP are granted or exercised in connection with a Corporate Transaction as defined in the ESPP.

An eligible employee can purchase ordinary shares at a price of 85% of the fair market value of the ordinary shares at the beginning of the six-month offering period (or 85% of the fair market value of the ordinary shares on the semi-annual purchase date, if that is lower). Each eligible employee can elect to purchase ordinary shares under the ESPP in an amount of up to 15% of the employee's compensation, but not more than 1,250 shares per participant on any purchase date. Employees may terminate their participation in the ESPP at any time during the offering period, and participation ends automatically on termination of employment with us. Each outstanding purchase right will be exercised immediately prior to our merger or consolidation with another company. Our board of directors may amend or terminate the ESPP immediately after the close of any purchase date. The board may not, unless shareholders approve, materially increase the number of ordinary shares available for issuance, reduce the purchase price payable for ordinary shares, or materially modify the eligibility requirements for participation or the benefits available to participants.

70

**ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**

The following table shows information as of December 31, 2006, 2007 and 2008, for each person who, to the best of our knowledge, beneficially owned more than 5% of our outstanding ordinary shares as of December 31, 2008:

Name of Five Percent Shareholders	No. of shares beneficially held (1)	% of class of shares (2)	No. of shares beneficially held (1)	% of class of shares (2)	No. of shares beneficially held (1)	% of class of shares (2)
	December 31, 2006		December 31, 2007		December 31, 2008	
Gil Shwed	31,707,476	13.6%	33,309,822	14.7%	34,314,442	15.6%
Franklin Resources, Inc. (3)	34,688,010	15.4%	34,573,925	15.8%	23,253,624	11.1%
Marius Nacht (4)	20,851,795	9.1%	20,851,795	9.4%	20,253,945	9.6%
Ameriprise Financial, Inc. (5)					14,049,274	6.7%
Friess Associates LLC (6)					10,965,600	5.2%

- (1) The amount includes ordinary shares owned by each of the individuals, directly or indirectly, and options immediately exercisable or that are exercisable within 60 days from December 31<sup>st</sup>, of each of the years shown in this table. The exercise price of some of these options is greater than our current share market price.
- (2) If a shareholder has the right to acquire shares by exercising stock options exercisable within 60 days from December 31<sup>st</sup>, of each of the years shown in this table, these shares are deemed outstanding for the purpose of computing the percentage owned by the specific shareholder (that is, they are included in both the numerator and the denominator), but they are disregarded for the purpose of computing the percentage owned by any other shareholder.
- (3) As of December 31, 2006, 2007 and 2008, based on information contained in a Schedule 13G/A filed with the Securities and Exchange Commission. In the Schedule 13G/A filed on February 5, 2007, Franklin Resources, Inc., Charles B. Johnson, Rupert H. Johnson, Jr., Templeton Global Advisors Limited, Templeton Investment Counsel, LLC, Franklin Templeton Investments Corp., Franklin Templeton Investment Management Limited, Franklin Templeton Portfolio Advisors, Inc., Templeton Asset Management, Ltd., Franklin Templeton Investments (Asia) Limited, Franklin Templeton Investments Australia Limited, Franklin Templeton Investments Japan Limited and Franklin Templeton Alternative Strategies, Inc. disclaim any pecuniary interest in any of the securities. In the Schedule 13G/A filed on February 7, 2008, Franklin Resources, Inc., Charles B. Johnson, Rupert H. Johnson, Jr., Templeton Global Advisors Limited, Templeton Investment Counsel, LLC, Franklin Templeton Investments Corp., Franklin Templeton Portfolio Advisors, Inc., Franklin Templeton Investments (Asia) Limited, Franklin Templeton Investment Management Limited, Franklin Advisors, Inc., Franklin Templeton Investments Australia Limited, Templeton Asset Management, Ltd. and Franklin Templeton Investments Japan Limited disclaim any pecuniary interest in any of the securities. In the Schedule 13G/A filed on February 6, 2009, Franklin Resources, Inc., Charles B. Johnson, Rupert H. Johnson, Jr., Templeton Investment Counsel, LLC, Templeton Global Advisors Limited, Franklin Templeton Investments Corp., Franklin Templeton Portfolio Advisors, Inc., Franklin Templeton Investments (Asia) Limited, Franklin Templeton Investment Management Limited, Franklin Templeton Investments Australia Limited, Franklin Advisors, Inc., Templeton Asset Management, Ltd. and Fiduciary Trust Company International disclaim any pecuniary interest in any of the securities. The address for Franklin Resources, Inc. is One Franklin Parkway, San Mateo, California 94403.
- (4) In addition to the amount above for which Mr. Nacht claims beneficial ownership, Mr. Nacht is the beneficiary of a trust that holds 2,000,000 shares. The trust, which was initially established in May 2005, is irrevocable and is currently scheduled to expire in May 2009. Mr. Nacht does not control the trust and has limited access to information concerning activities and holdings of the trust. Mr. Nacht disclaims beneficial ownership of the shares held in the trust.
- (5) As of December 31, 2008, based on information contained in a Schedule 13G filed jointly by Ameriprise Financial, Inc. and RiverSource Investments, LLC with the Securities and Exchange Commission on February 12, 2009. Based on information available to us, as of December 31, 2006 and 2007, Ameriprise Financial, Inc. did not beneficially own more than 5% of our outstanding ordinary shares. The address for the parties is c/o Ameriprise Financial, Inc., 145 Ameriprise Financial Center, Minneapolis, Minnesota 55474.

(6)

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

As of December 31, 2008, based on information contained in a Schedule 13G filed with the Securities and Exchange Commission on February 17, 2009. Based on information available to us, as of December 31, 2006 and 2007, Friess Associates LLC did not beneficially own more than 5% of our outstanding ordinary shares. The address for Friess Associates LLC is 115 E. Snow King, Jackson, Wyoming 83001.

71

---

Our major shareholders do not have different voting rights from other shareholders with respect to our ordinary shares.

According to our transfer agent, as of December 31, 2008, there were 219 holders of record of our ordinary shares in the United States, representing approximately 64% of our outstanding shares. The number of record holders in the United States is not representative of the number of beneficial holders nor is it representative of where such beneficial holders are resident since many of these ordinary shares were held by brokers or other nominees.

We are not controlled by another corporation or by any foreign government, directly or through any other entity. Each of our outstanding ordinary shares has identical rights in all respects.

As of December 31, 2006, we had employee and payroll accrual for related parties, for the years 1999 through 2006, in a total amount of \$8.9 million. As of December 31, 2007, this accrual decreased to a total of \$7.9 million, for the years 1999 through 2007. As of December 31, 2008, this accrual decreased to a total of \$5.6 million, for the years 2001 through 2007.

### ITEM 8. FINANCIAL INFORMATION

#### Consolidated Financial Statements

You can find our financial statements in Item 18 Financial Statements.

*Dividend policy.* Out of our retained earnings of \$2,622 million as of December 31, 2008, approximately \$1,054 million are from tax-exempt income because they are attributable to our facilities' status as Approved Enterprises and Privileged Enterprises under the Investment Law. Our board of directors has currently resolved not to distribute any dividend from our undistributed tax-exempt income. The undistributed tax-exempt income is currently expected to be essentially permanent by reinvesting.

#### Legal Proceedings

We operate our business in various countries, and accordingly attempt to utilize an efficient operating model to optimize our tax payments based on the laws in the countries in which we operate. This can cause disputes between us and various tax authorities in different parts of the world.

72

---

In particular, following audits of our 2002 and 2003 corporate tax returns, the Israeli Tax Authority (the "ITA") issued orders challenging our positions on several issues, including matters such as the usage of funds earned by our approved enterprise for investments outside of Israel, deductibility of employee stock options expenses, percentage of foreign ownership of our shares, taxation of interest earned outside of Israel and deductibility of research and development expenses. The largest amount in dispute relates to the treatment of investment income on cash that is held and managed by our wholly-owned Singapore subsidiary, which the ITA is seeking to tax in Israel. In an additional challenge to this amount, the ITA reclassified the transfer of funds from Check Point to our subsidiary in Singapore as a dividend for purposes of the Law for the Encouragement of Capital Investments, which would result in tax on the funds transferred. The ITA orders also contest our positions on various other issues. The ITA, therefore, demanded the payment of additional taxes in the aggregate amount of NIS 963 million with respect to 2002 (assessment received on December 27, 2007) and NIS 151 million with respect to 2003 (assessment received on May 29, 2008), in each case including interest as of the assessment date. We have appealed the orders relating to both years with the Tel-Aviv District Court, and these appeals are pending. There can be no assurance that the ITA will accept our positions on these matters or others and, in such an event, we may record additional tax expenses if these matters are settled for amounts in excess of our current provisions.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

Further, we have also been named as a defendant in a lawsuit filed by Information Protection and Authentication of Texas, LLC in the Eastern District of Texas on December 30, 2008. The plaintiff's original complaint in the lawsuit alleges infringement by us of U.S. patents nos. 5,311,591 and 5,412,717 and seeks an injunction and an unspecified amount of damages. We currently intend to vigorously defend against plaintiff's claims, but cannot assure you of the outcome of this litigation.

In addition, we are currently engaged in various legal disputes with two minority shareholders of our subsidiary SofaWare Technologies Ltd. One of these shareholders is alleging we are oppressing him as a minority shareholder, and he is seeking to compel us to purchase his shares. He is valuing his shares at NIS 16 million, subject to change. The other minority shareholder claims that he and other minority shareholders are entitled to exercise veto rights with respect to certain actions of SofaWare. The same shareholder also filed a derivative claim against us on behalf of SofaWare. On February 14, 2008, the court partially accepted the derivative claim and ordered that we pay SofaWare NIS 13 million plus interest. Both parties have appealed this ruling. We are also engaged in additional litigation with these two minority shareholders. We believe that the claims filed by these two minority shareholders are without merit and intend to contest these claims vigorously.

73

### ITEM 9. THE OFFER AND LISTING

Our ordinary shares are traded publicly on the NASDAQ Global Select Market under the symbol CHKP.

The following table lists the high and low prices of the ordinary shares on the NASDAQ Global Select Market for the periods indicated:

	<u>High</u>	<u>Low</u>
Year		
2004	\$ 27.16	\$ 16.46
2005	25.42	19.57
2006	23.21	16.27
2007	26.79	20.47
2008	25.81	16.80
<b><u>2007</u></b>		
First quarter	25.03	21.17
Second quarter	24.90	21.34
Third quarter	25.99	21.78
Fourth quarter	26.79	20.47
<b><u>2008</u></b>		
First quarter	24.25	20.00
Second quarter	25.81	20.84
Third quarter	25.74	21.32
Fourth quarter	23.00	16.80
<b><u>Most recent six months</u></b>		
September 2008	25.29	21.32
October 2008	23.00	16.80
November 2008	20.90	18.03
December 2008	20.20	17.74
January 2009	23.35	18.94
February 2009	23.55	21.36
March 2009 (through March 2, 2009)	22.14	21.20

On March 2, 2009, the last reported sale price of our ordinary shares on the NASDAQ Global Select Market was \$21.36 per share.

**ITEM 10. ADDITIONAL INFORMATION**

We were incorporated in Israel in July 1993, and we are registered with the Israeli Registrar of Companies as public company number 52-004282-1.

The objectives and purposes stated in our memorandum of association are to engage in any lawful activity. We develop market and support a wide range of software and combined hardware and software products and services for IT security, and offer our customers an extensive portfolio of network security, endpoint security, data security and management, Firewall and VPN solutions. A broad range of our network security solutions operate under a unified security architecture, with central management and enforcement of security policy, and with centralized real-time security updates. Our products and services are sold to enterprises, service providers, small and medium-sized businesses and consumers.

74

---

**Articles of Association and Israeli Companies Law**

The following is a summary of the material provisions of our articles of association and related provisions of Israeli corporate law. For the complete text of our articles of association, see Item 19 Exhibits.

*Description of shares*

Our authorized share capital consists of the following: (i) 500,000,000 ordinary shares, NIS 0.01 nominal value; (ii) 5,000,000 preferred shares, NIS 0.01 nominal value; and (iii) 10 deferred shares, NIS 1 nominal value. On December 31, 2008, we had 210,042,282 ordinary shares outstanding, and on January 1, 2008, we had 218,553,498 ordinary shares outstanding. During 2008, we issued 2,402,792 ordinary shares from our treasury account, all pursuant to equity incentive plans. On December 31, 2008, we held 51,181,688 ordinary shares in our treasury. No preferred shares are outstanding. We have 1 deferred share issued and outstanding, which is not entitled to any rights other than the right to receive its nominal value upon our liquidation.

*Description of ordinary shares*

All of the issued and outstanding ordinary shares are validly issued, fully paid, and non-assessable. The ordinary shares do not have pre-emptive rights. Our memorandum of association, our articles of association, and Israeli law do not restrict in any way the ownership or voting of our ordinary shares by non-residents of Israel, except with respect to citizens of countries that are in a state of war with Israel.

*Dividend and liquidation rights.* The holders of our ordinary shares will be entitled to their proportionate share of any cash dividend, share dividend, or dividend in kind distributed with respect to our ordinary shares. This right may be changed if shares with special dividend rights are authorized in the future. Under the Israeli Companies Law, we may declare dividends out of the higher of retained earnings and earnings generated over the two most recent years (the profits test), in either case, provided that our board of directors reasonably believes that the dividend will not render us unable to meet our current or foreseeable obligations when due (the solvency test). Even if we do not comply with the profits test, a court may allow us to distribute a dividend as long as the court is convinced that the solvency test is fulfilled.

Our articles of association provide that the board of directors may declare and distribute interim dividends without the approval of the shareholders. Shareholder approval is required for the payment of a final dividend proposed by the board of directors, but shareholders cannot approve a final dividend that is greater than the board's proposal. In addition, once an interim dividend has been declared and paid, it cannot be affected by any subsequent resolution of the shareholders or the shareholders' failure to approve a final dividend.

In the event of our liquidation, holders of our ordinary shares have the equal right to participate in the distribution of assets remaining after payment of liabilities. This right may be changed if shares with special liquidation or dividend rights are issued in the future.

*Voting, shareholder meetings and resolutions.* Holders of ordinary shares have one vote for each ordinary share held on all matters submitted to a vote of shareholders. This right may be changed if shares with special voting rights are issued in the future.

75

---

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

Under the Israeli Companies Law, we must hold an annual meeting of our shareholders once every calendar year and not more than 15 months from the date of the previous annual shareholders' meeting. The board of directors determines the location of the meeting, which can be in Israel or elsewhere. In addition, our board of directors may, in its discretion, convene additional meetings as special shareholders' meetings. The board of directors is also required to convene a special shareholders' meeting upon the demand of any of the following: (i) two directors; (ii) one quarter of the directors in office; (iii) the holder or holders of 5% of our outstanding share capital and 1% of our voting power; or (iv) the holder or holders of 5% of our voting power. Our articles of association provide that each shareholder of record is entitled to receive prior notice of any shareholders' meeting in accordance with the requirements of the Israeli Companies Law. The law currently provides for at least 21 days notice, with certain specified matters requiring at least 35 days' notice. For purposes of determining the shareholders entitled to notice and to vote at such meeting, the board of directors may fix a record date, which shall be between 4 and 40 days prior to the date of the meeting.

The quorum required for a meeting of shareholders consists of at least two shareholders present in person or by proxy and holding more than 50% of the voting power. The chairman of the board of directors presides at each of our shareholders' meetings. The chairman of the meeting does not have an additional or casting vote. A meeting adjourned for lack of a quorum will be adjourned to the same day in the following week, at the same time and place, or to the day, time and place that the chairman determines, with the consent of the holders of a majority of the shares present in person or by proxy and voting on the question of adjournment. At the reconvened meeting, the required quorum consists of any two shareholders, regardless of the number of shares they hold or represent.

The Israeli Companies Law requires that shareholders approve certain transactions, actions and arrangements, as described below under the caption "Approval of certain transactions; obligations of directors, officers and shareholders."

Shareholders' resolutions will be deemed adopted if approved by the holders of a majority of the voting power voting at a shareholders' meeting, except for the following decisions which require a different majority:

- (1) A special or extraordinary resolution (such as a resolution amending our memorandum of association or articles of association). A majority of at least 75% of the shares voting on the matter is needed.
- (2) A voluntary liquidation process or a merger. A majority of at least 75% of the shares voting on the matter is needed.
- (3) A compromise or arrangement between us and our creditors or shareholders, reorganization, stock split or reverse split. This has to be approved by a majority in the number of the persons participating in the vote (except for those abstaining) who together hold at least 75% of the value represented at the vote. In addition, court approval is needed.
- (4) The nomination and dismissal of outside directors. Outside directors may be elected or removed by a majority vote at a shareholders' meeting, as long as either:
  - (i) The majority of shares includes at least one-third of the shares of non-controlling shareholders voted at the meeting, or
  - (ii) The total number of shares of non-controlling shareholders voted against the proposal does not exceed 1% of our aggregate voting rights.

76

- 
- (5) Extraordinary transactions with a controlling shareholder (i.e., any shareholder that has the ability to direct our actions, including any shareholder who holds 25% or more of our voting rights if no other shareholder owns more than 50% of our voting rights), with another person in which the controlling shareholder has a personal interest; or a transaction with a controlling shareholder (or a relative of such controlling shareholder) concerning terms of compensation for service as an office holder. Following audit committee and board of directors approval, these transactions must be approved by a majority vote at a shareholders' meeting, as long as either:
    - (i) The majority of shares includes at least one-third of the shares of the voting shareholders who have no personal interest in the transaction, or
    - (ii) The total shareholdings of those who have no personal interest in the transaction and who vote against the transaction does not exceed 1% of our aggregate voting rights.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

*Transfer of shares.* Fully paid ordinary shares are issued in registered form and, subject to applicable securities laws, may be transferred freely.

*Election of directors.* Our ordinary shares do not have cumulative voting rights in the election of directors. Therefore, the holders of shares representing more than 50% of the voting rights at the shareholders' meeting, voting in person or by proxy, have the power to elect any or all of the directors whose positions are being filled at that meeting, subject to the special approval requirements for outside directors described above.

*Transfer agent and registrar.* The transfer agent and registrar for our ordinary shares is American Stock Transfer & Trust Company, 59 Maiden Lane, Plaza Level, New York, NY 10038 U.S.A., tel: 718-921-8124.

### *Description of preferred shares*

We have 5,000,000 preferred shares authorized. Our articles of association provide that the board of directors has the authority to issue the preferred shares in one or more series and to fix the rights, preferences, privileges and restrictions of the preferred shares, including dividend rights, dividend rates, conversion rights, voting rights, terms of redemption, redemption prices, liquidation preferences and the number of shares constituting any series, without further vote or action by the shareholders. If this provision withstands judicial scrutiny under the Israeli Companies Law, the issuance of preferred shares may have the effect of delaying, deferring or preventing a change in control of us without further action by the shareholders. For example, the board of directors could issue preferred shares with voting and conversion rights that may adversely affect the voting power of the holders of ordinary shares, including the loss of voting control to others. We currently have no plans to issue any preferred shares.

### *Anti-takeover measures*

Some of the provisions of our articles of association and Israeli law could, together or separately:

- <sup>n</sup> Discourage potential acquisition proposals,
- <sup>n</sup> Delay or prevent a change in control,
- <sup>n</sup> Limit the price that investors might be willing to pay in the future for our ordinary shares.

77

---

Israeli corporate law regulates acquisitions of shares through tender offers and mergers; requires special approvals for transactions involving directors, officers or significant shareholders; and regulates other matters that may be relevant to these types of transactions.

Under the Israeli Companies Law, in the case of a merger, the shareholders and board of directors of each of the merging companies generally need to approve the merger. Shares held in one of the merging companies by the other merging company (or certain of its affiliates) are not counted toward the required approval. If a merging company has different classes of shares, the approval of each class may be required. Under the Israeli Companies Law, a merger of our company requires the approval of a supermajority of at least 75% of our shares that are voted on the merger. A merger cannot be completed until 30 days have passed after shareholder approval of each of the merging companies, all approvals have been submitted to the Israeli Registrar of Companies and 50 days have passed from the time that a proposal for approval of the merger is filed with the Registrar of Companies. In addition, a creditor can seek to block a merger on the ground that the surviving company will not be able to meet its obligations.

The Israeli Companies Law also provides that an acquisition of shares in a public company, such as our company, must be made by means of a tender offer, if as a result of the acquisition, the purchaser would become a 25% shareholder of the company (unless there is another 25% shareholder of the company, or the shares are acquired from another 25% shareholder). Similarly, the Israeli Companies Law provides that an acquisition of shares in a public company, such as our company, must be made by means of a tender offer, if as a result of the acquisition the purchaser would hold more than 45% of the shares of the company (unless there is another holder of more than 45% of the shares of the company, or the shares are acquired from another holder of more than 45% of the shares of the company). These rules do not apply if the acquisition takes the form of a merger.

Regulations promulgated under the Israeli Companies Law provide that these tender offer requirements do not apply to companies whose shares are listed for trading outside of Israel if, according to the law in the country in which the shares are traded or the rules and regulations of the stock exchange on which the shares are traded:

- <sup>n</sup> There is a limitation on acquisition of any level of control of the company, or
- <sup>n</sup> The acquisition of any level of control requires the purchaser to make a tender offer to the public.

The Israeli Companies Law provides specific rules and procedures for the acquisition of shares held by minority shareholders if the majority shareholder holds more than 90% of the outstanding shares. Israeli tax law treats specified acquisitions, including a stock-for-stock swap between an Israeli company and a foreign company, less favorably than does U.S. tax law.

In addition, our articles of association contain certain provisions that may make it more difficult to acquire us, such as the ability of our board of directors to issue preferred shares, as described above under the caption *Description of preferred shares*.

Our articles of association provide that we may not engage in any business combination with an interested shareholder for a period of three years after the date that the shareholder became an interested shareholder, unless:

- <sup>n</sup> Prior to that date, the board of directors approved either the business combination or the transaction that resulted in the shareholder becoming an interested shareholder; or

78

---

- <sup>n</sup> Upon consummation of the transaction that resulted in the shareholder becoming an interested shareholder, the interested shareholder owned at least 75% of our voting shares outstanding at the time the transaction commenced.

A business combination includes:

- <sup>n</sup> Any merger or consolidation between the interested shareholder and us;
- <sup>n</sup> Any sale, transfer, pledge or other disposition of 10% or more of our assets in a transaction involving the interested shareholder;
- <sup>n</sup> Subject to certain exceptions, any transaction that results in our issuance or transfer of any of our shares to the interested shareholder;
- <sup>n</sup> Any transaction in which we are involved that has an effect of increasing the proportionate share of our shares, of any class or series, beneficially owned by the interested shareholder; or
- <sup>n</sup> The receipt by the interested shareholder of the benefit of any loans, advances, guarantees, pledges, or other financial benefits provided by or through us.

In general, the articles of association define an interested shareholder as any entity or person that beneficially owns 15% or more of our outstanding voting shares and any entity or person affiliated with, controlling or controlled by such entity or person.

In addition, our shareholders are not able to cumulate votes at a meeting, which may require the acquirer to hold more shares to gain representation on the board of directors than if cumulative voting were permitted.

*Approval of certain transactions; obligations of directors, officers and shareholders*

*Officers and directors.* The Israeli Companies Law codifies the fiduciary duties that office holders, which under the law, includes our directors and executive officers, owe to a company.

*Fiduciary duties.* An office holder's fiduciary duties consist of a duty of loyalty and a duty of care. The duty of loyalty requires an office holder to act in good faith and for the benefit of the company, including to avoid any conflict of interest between the office holder's position in the company and personal affairs, and proscribes any competition with the company or the exploitation of any business opportunity of the company in order to receive personal advantage for himself or herself or for others. This duty also requires an office holder to reveal to the

company any information or documents relating to the company's affairs that the office holder has received due to his or her position as an office holder. A company may approve any of the acts mentioned above; provided, however, that all the following conditions apply: the office holder acted in good faith; neither the act nor the approval of the act prejudices the good of the company; and the office holder disclosed the essence of his or her personal interest in the act, including any substantial fact or document, in a reasonable time before the date for discussion of the approval. The duty of care requires an office holder to act with a level of care that a reasonable office holder in the same position would employ under the same circumstances. This includes the duty to use reasonable means to obtain information regarding the advisability of a given action submitted for his or her approval or performed by virtue of his or her position and all other relevant information material to these actions.

*Compensation.* Under the Israeli Companies Law, the compensation arrangements for officers who are not directors require the approval of the board of directors, unless the articles of association provide otherwise. Arrangements regarding the compensation of directors require the approval of the audit committee, the board, and the shareholders, in that order.

*Disclosure of personal interest.* The Israeli Companies Law requires that an office holder promptly disclose to the company any personal interest that he or she may have and all related material information or documents known to him or her, in connection with any existing or proposed transaction by the company. Personal interest, as defined by the Israeli Companies Law, includes a personal interest of any person in an act or transaction of the company, including a personal interest of his relative or of a corporation (i) in which that person or a relative of that person is a 5% or greater shareholder, a holder of 5% or more of the voting rights, or a director or general manager, or (ii) in which he or she has the right to appoint at least one director or the general manager. Personal interest does not apply to a personal interest stemming merely from holding shares in the company.

The office holder must immediately make the disclosure of his or her personal interest and no later than the first meeting of the company's board of directors that discusses the particular transaction. This duty does not apply to the personal interest of a relative of the office holder in a transaction unless it is an extraordinary transaction. The Israeli Companies Law defines an extraordinary transaction as a transaction that is not in the ordinary course of business of a company, or that is not on market terms, or which is likely to have a material impact on the company's profitability, assets or liabilities. The Israeli Companies Law defines a relative as a spouse, sibling, parent, grandparent, descendant, spouse's descendant, and the spouse of any of the foregoing.

*Approvals.* The Israeli Companies Law provides that a transaction with an office holder or a transaction in which an office holder has a personal interest requires board approval, unless the transaction is an extraordinary transaction or the articles of association provide otherwise. The transaction may not be approved if it is adverse to the company's interest. If the transaction is an extraordinary transaction, or if it concerns exculpation, indemnification or insurance of an office holder, then the approval of the company's audit committee and the board of directors is required. Exculpation, indemnification, insurance or compensation of a director also requires shareholder approval. A director who has a personal interest in a matter that is considered at a meeting of the board of directors or the audit committee generally may not attend that meeting or vote on that matter, unless a majority of the board of directors or the audit committee also has a personal interest in the matter. If a majority of the board of directors has a personal interest in the transaction, all directors may attend that meeting and vote, and a shareholder approval also would be required.

*Shareholders.* The Israeli Companies Law imposes the same disclosure requirements described above on a controlling shareholder of a public company that it imposes on an office holder. For this purpose, a controlling shareholder is any shareholder who has the ability to direct the company's actions, including any shareholder holding 25% or more of the voting rights, if no other shareholder owns more than 50% of the voting rights in the company. Two or more shareholders with a personal interest in the approval of the same transaction are deemed to be one shareholder.

Under the Israeli Companies Law, a shareholder has a duty to act in good faith toward the company and other shareholders and refrain from abusing his or her power in the company, including, among other things, voting in the general meeting of shareholders on the following matters:

- " Any amendment to the articles of association,
- " An increase of the company's authorized share capital,
- " A merger, or
- " Approval of interested party transactions that require shareholder approval.

In addition, any controlling shareholder, any shareholder who can determine the outcome of a shareholder vote, and any shareholder who under the company's articles of association can appoint or prevent the appointment of an office holder, is under a duty to act with fairness towards the company. The Israeli Companies Law provides that a breach of the duty of fairness will be governed by the laws governing breach of contract. The Israeli Companies Law does not describe the substance of this duty.

*Indemnification and insurance of directors and officers; limitations on liability*

Our articles of association allow us to indemnify, exculpate and insure our office holders to the fullest extent permitted under the Israeli Companies Law, provided that procuring this insurance or providing this indemnification or exculpation is approved by the audit committee and the board of directors, as well as by the shareholders if the office holder is a director.

Under the Israeli Companies Law, we may indemnify an office holder for any of the following liabilities or expenses that they may incur due to an act performed or failure to act in his or her capacity as our office holder:

- <sup>n</sup> Monetary liability imposed on the office holder in favor of a third party in a judgment, including a settlement or an arbitral award confirmed by a court.
- <sup>n</sup> Reasonable legal costs, including attorneys' fees, expended by an office holder as a result of an investigation or proceeding instituted against the office holder by a competent authority, provided that such investigation or proceeding concludes without the filing of an indictment against the office holder, and either:

No financial liability was imposed on the office holder in lieu of criminal proceedings, or

Financial liability was imposed on the office holder in lieu of criminal proceedings, but the alleged criminal offense does not require proof of criminal intent.

- <sup>n</sup> Reasonable legal costs, including attorneys' fees, expended by the office holder or for which the office holder is charged by a court:

In an action brought against the office holder by us, on our behalf or on behalf of a third party,

In a criminal action in which the office holder is found innocent, or

In a criminal action in which the office holder is convicted, but in which proof of criminal intent is not required.

A company may indemnify an office holder in respect of these liabilities either in advance of an event or following an event. If a company undertakes to indemnify an office holder in advance of an event, the indemnification, other than litigation expenses, must be limited to foreseeable events in light of the company's actual activities when the company undertook such indemnification, and reasonable amounts or standards, as determined by the board of directors.

A company may obtain insurance for an office holder against liabilities incurred in his or her capacity as an office holder. These liabilities include a breach of duty of care to the company or a third party including a breach arising out of negligent conduct of the office holder, a breach of duty of loyalty and any monetary liability imposed on the office holder in favor of a third party. A company may also exculpate an office holder from a breach of duty of care in advance of that breach. Our articles of association provide for exculpation both in advance or retroactively, to the extent permitted under Israeli law. A company may not exculpate an office holder from a breach of duty of loyalty towards the company or from a breach of duty of care concerning dividend distribution or a purchase of the company's shares by the company or other entities controlled by the company.

Under the Israeli Companies Law, a company may indemnify or insure an office holder against a breach of duty of loyalty only to the extent that the office holder acted in good faith and had reasonable grounds to assume that the action would not prejudice the company. In addition, a company may not indemnify, insure or exculpate an office holder against a breach of duty of care if committed intentionally or

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

recklessly (excluding mere negligence), or committed with the intent to derive an unlawful personal gain, or for a fine or forfeit levied against the office holder in connection with a criminal offense.

Our audit committee, board of directors and shareholders have resolved to indemnify our directors and officers, to the extent permitted by law and by our articles of association, for liabilities not covered by insurance, that are of certain enumerated types of events, and subject to limitations as to amount.

We have also entered into indemnification, insurance, and exculpation agreements with our directors and officers undertaking to indemnify, insure, and exculpate them to the full extent permitted by the Israeli Companies Law. The entry into such agreements received the prior approval of our audit committee, board of directors and shareholders.

### *Borrowing power: amendment of rights of ordinary shares*

Our articles of association grant broad powers to the board of directors to have us borrow, repay borrowings, make guarantees, and grant security interests in borrowings. The rights and provisions of the ordinary shares may be cancelled, added to, restricted, amended, or otherwise altered with a vote of the holders of at least 75% of the outstanding ordinary shares voting at a duly convened shareholders' meeting.

### *Availability of Annual Report on Form 20-F*

In accordance with our articles of association, we post our Annual Report on Form 20-F on our Web site ([www.checkpoint.com](http://www.checkpoint.com)), rather than mail it to shareholders as required by the NASDAQ rules.

## **NASDAQ Global Select Market corporate governance rules**

NASDAQ Rule 4350(f) requires that an issuer listed on the NASDAQ Global Select Market should have a quorum requirement that in no case be less than 33 1/3% of the outstanding shares of the company's common voting stock. However, our articles of association, consistent with the Israeli Companies Law, provide that the quorum requirements for an adjourned meeting are the presence of a minimum of two shareholders present in person. Our quorum requirements for an adjourned meeting do not comply with the requirements of Rule 4350(f) and we instead follow our home country practice.

## **Material Contracts**

In March 2006, we purchased a building in Tel Aviv, Israel, for a total amount of \$35.25 million. Additional payments in 2006, 2007 and 2008 for taxes related to the purchase and for the building renovation totaled \$3.58 million, \$7.04 million and \$2.61 million, respectively. In May 2007, we relocated to our new international headquarters to the building. For more information, please see Item 3 Information on Check Point Property, plants and equipment. A translation of the agreement was filed as Exhibit 4.11 to our 2006 Annual Report on Form 20-F.

82

---

## **Israeli Taxation, Foreign Exchange Regulation and Investment Programs**

The following is a summary of the principal Israeli tax laws applicable to us, the Israeli Government programs from which we benefit, and Israeli foreign exchange regulations. This section also contains a discussion of material Israeli tax consequences to our shareholders who are not residents or citizens of Israel. This summary does not discuss all aspects of Israeli tax law that may be relevant to a particular investor in light of his or her personal investment circumstances, or to some types of investors subject to special treatment under Israeli law. Examples of investors subject to special treatment under Israeli law include residents of Israel, traders in securities, or persons who own, directly or indirectly, 10% or more of our outstanding voting capital, all of whom are subject to special tax regimes not covered in this discussion. Some parts of this discussion are based on new tax legislation that has not been subject to judicial or administrative interpretation. The discussion should not be construed as legal or professional tax advice and does not cover all possible tax consequences.

**You are urged to consult your own tax advisor as to the Israeli and other tax consequences of the purchase, ownership and disposition of our ordinary shares, including, in particular, the effect of any non-Israeli, state or local taxes.**

### *General corporate tax structure in Israel*

Israeli companies were subject to corporate tax at the rate of 27% in 2008. Pursuant to tax reform legislation that came into effect in 2005, the corporate tax rate is to undergo further staged reductions to 25% by the year 2010. In order to implement these reductions, the corporate tax

rate is scheduled to decline to 26% in 2009 and 25% in 2010.

However, as discussed below, the rate is effectively reduced for income derived from our Approved Enterprise and Privileged Enterprise plans.

*Law for the Encouragement of Capital Investments, 1959*

Our facilities in Israel have been granted Approved Enterprise status under the Law for the Encouragement of Capital Investments, 1959, commonly referred to as the Investment Law. The Investment Law provides that capital investments in a production facility (or other eligible assets) may be designated as an Approved Enterprise. Until 2005, the designation required advance approval from the Investment Center of the Israel Ministry of Industry, Trade and Labor. Each certificate of approval for an Approved Enterprise relates to a specific investment program, delineated both by the financial scope of the investment and by the physical characteristics of the facility or the asset.

Under the Approved Enterprise programs, a company is eligible for governmental grants, but may elect to receive an alternative package comprised of tax benefits (Alternative Track). Under the alternative package, a company's undistributed income derived from an Approved Enterprise is exempt from corporate tax for an initial period (two to ten years, depending on the geographic location of the Approved Enterprise within Israel). The exemption begins in the first year that the company realizes taxable income from the Approved Enterprise.

After expiration of the initial tax exemption period, the company is eligible for a reduced corporate tax rate of 10% to 25% for the following five to eight years, depending on the extent of foreign investment in the company (as shown in the table below). The benefits period under Approved Enterprise status is limited to 12 years from completion of the investment or commencement of production, or 14 years from the date of the approval, whichever is earlier.

83

On April 1, 2005, an amendment to the Investment Law came into effect. The amendment revised the criteria for investments qualified to receive tax benefits. An eligible investment program under the amendment will qualify for benefits as a Privileged Enterprise (rather than the previous terminology of Approved Enterprise). Among other things, the amendment provides tax benefits to both local and foreign investors and simplifies the approval process. The period of tax benefits for a new Privileged Enterprise commences in the Year of Commencement. This year is the later of (1) the year in which taxable income is first generated by a company, or (2) a year selected by the company for commencement, on the condition that the company meets certain provisions provided by the Investment Law (Year of Election). The amendment does not apply to investment programs approved prior to December 31, 2004. The new tax regime applies to new investment programs only. Therefore, our four active Approved Enterprises will not be subject to the provisions of the amendment.

The tax benefits available under Approved Enterprise or Privileged Enterprise relate only to taxable income attributable to the specific Approved Enterprise or Privileged Enterprise, and our effective tax rate will be the result of a weighted combination of the applicable rates.

Percent of Foreign Ownership	Rate of Reduced Tax	Reduced Tax Period	Tax Exemption Period
0-25%	25%	5 years	2 years
25-49%	25%	8 years	2 years
49-74%	20%	8 years	2 years
74-90%	15%	8 years	2 years
90-100%	10%	8 years	2 years

As mentioned above, currently, we have four active Approved Enterprise programs under the Alternative Track of the Investment Law which entitle us to tax benefits. Our first and second investment programs benefits period have ended and, therefore, are not entitled to tax benefits. Currently, we have one Privileged Enterprise program. We have derived, and expect to continue to derive, a substantial portion of our operating income from our Approved Enterprise and Privileged Enterprise facilities. We are, therefore, eligible for a tax exemption for a limited period on undistributed Approved Enterprise and Privileged Enterprise income, and an additional subsequent period of reduced corporate tax rates ranging between 10% and 25%, depending on the level of foreign ownership of our shares. The tax benefits attributable to our current Approved Enterprises and Privileged Enterprise are scheduled to expire in phases by 2017.

The benefits available to an Approved Enterprise and a Privileged Enterprise are conditioned upon terms stipulated in the Investment Law and the related regulations and the criteria set forth in the applicable certificate of approval (for an Approved Enterprise). If we do not fulfill

these conditions, in whole or in part, the benefits can be cancelled and we may be required to refund the amount of the benefits, linked to the Israeli consumer price index plus interest. We believe that our Approved Enterprise and Privileged Enterprise programs currently operate in compliance with all applicable conditions and criteria, but we cannot assure you that they will continue to do so. However, we currently have disputes with the Israeli Tax Authority ( ITA ) on matters such as the usage of funds earned by our approved enterprise for investments outside of Israel, deductibility of employees stock options expenses, percentage of foreign ownership of our shares, taxation of interest earned outside of Israel and deductibility of research and development expenses See Item 8 Financial Information under the caption Legal Proceedings .

If a company requested the alternative package of benefits for an Approved Enterprise under the old law before the 2005 amendment, it was precluded from filing a Year of Election notice for a Privileged Enterprise for three years after the year in which the Approved Enterprise was activated (the Cooling Period ). In November 2008, the law was amended to shorten the Cooling Period to two years. Following the amendment, the Year of Election for our first Privileged Enterprise is 2006.

If a company distributes dividends from tax-exempt income, the company will be taxed on the otherwise exempt income at the same reduced corporate tax rate that would have applied to that income. Distribution of dividends derived from income that was taxed at reduced rates, but not tax-exempt, does not result in additional tax consequences to the company. Shareholders who receive dividends derived from Approved Enterprise or Privileged Enterprise income are generally taxed at a rate of 15%, which is withheld and paid by the company paying the dividend, if the dividend is distributed during the benefits period or within the following 12 years (the limitation does not apply to a Foreign Investors Company, which is a company that more than 25% of its shares owned by non-Israeli residents).

The amendment to the Investment Law treats the repurchase of shares out of Privileged Enterprise tax exempt income as deem-dividend. Through December 31, 2008, we repurchased 65,775,732 ordinary shares in a total amount of \$1,366,305. Our retained earnings attributed to taxable income are higher than the total shares repurchased and, therefore, should not trigger a deem-dividend event. See Annual Report ( Purchases of Equity Securities by the Issuer and Affiliated Purchasers ) and Note 12e to Consolidated Financial Statements for further information regarding our repurchase program.

As a result of the 2005 amendment, tax-exempt income attributed to Privileged Enterprise will subject us to taxes also upon complete liquidation. As of December 31, 2008, we generated tax-exempt income in the amount of \$297.7 million from our Privileged Enterprise.

Our board of directors has determined that we will not distribute any amounts of our tax-exempt income as dividend. We intend to reinvest our tax-exempt income. Accordingly, no deferred income taxes have been provided on income attributable to our Approved Enterprise and Privileged Enterprise programs as the undistributed tax-exempt income is essentially permanent in duration.

#### *Law for the Encouragement of Industry (Taxes), 1969*

We believe that we currently qualify as an Industrial Company within the meaning of the Law for the Encouragement of Industry (Taxes), 1969 (the Industrial Encouragement Law ). The Industrial Encouragement Law defines an Industrial Company as a company that is resident in Israel and that derives at least 90% of its income in any tax year, other than income from defense loans, capital gains, interest and dividends, from an enterprise whose major activity in a given tax year is industrial production.

The following are the principal corporate tax benefits that are available to an Industrial Company:

- " Amortization of the cost of purchased know-how and patents over an eight-year period for tax purposes.
- " Accelerated depreciation rates on equipment and buildings.
- " Under specified conditions, an election to file consolidated tax returns with related Israeli Industrial Companies.
- " Expenses related to a public offering are deductible in equal amounts over three years.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

Eligibility for the benefits under the Industry Encouragement Law is not subject to receipt of prior approval from any governmental authority. We cannot assure you that we qualify or will continue to qualify as an Industrial Company or that the benefits described above will be available in the future.

### *Foreign Exchange Regulations*

Under the Foreign Exchange Regulations, an Israeli company calculates its tax liability in US dollars according to certain orders. The tax liability, as calculated in US dollars is translated into NIS according to the exchange rate as of December 31<sup>st</sup> of each year.

Dividends, if any, paid to the holders of our ordinary shares, and any amounts payable upon our dissolution, liquidation or winding up, as well as the proceeds of any sale in Israel of our ordinary shares to an Israeli resident, may be paid in non-Israeli currency. If these amounts are paid in Israeli currency, they may be converted into freely repatriable U.S. dollars at the rate of exchange prevailing at the time of conversion. In addition, the statutory framework for the potential imposition of exchange controls has not been eliminated, and may be restored at any time by administrative action.

### *Taxation of Non-Israeli Shareholders on Receipt of Dividends*

Under Israeli tax law, a distribution of dividends from income attributable to an Approved Enterprise or Privileged Enterprise will be subject to tax in Israel at the rate of 15%, which is withheld and paid by the company paying the dividend, if the dividend is distributed during the benefits period or within the following 12 years (this limitation does not apply to a Foreign Investors Company). Any distribution of dividends from income that is not attributable to an Approved Enterprise or Privileged Enterprise will be subject to tax in Israel at the rate of 25%, except that dividends distributed to an individual who is deemed a non-substantial shareholder will be subject to tax at the rate of 20%.

Under the United States-Israel tax treaty, the maximum tax on dividends paid to a holder of ordinary shares who is a United States resident is 25%. Dividends received by a United States company that holds at least 10% of our voting rights, will be subject to withholding tax at the rate of 12.5%, provided that certain other conditions in the tax treaty are met (or at the tax rate of 15% in respect of dividends paid from income attributable to our Approved Enterprises or Privileged Enterprise). Dividends distributed to other foreign shareholders may be subject to different withholding tax rates based on the applicable tax treaty.

### *Capital Gains Taxes Applicable to Non-Israeli Shareholders*

Capital gains from the sale of our ordinary shares by non-Israeli shareholders are exempt from Israeli taxation under the Israeli domestic tax law, provided that the capital gain is not derived from a permanent establishment in Israel. In addition, the United States-Israel tax treaty exempts United States residents who hold less than 10% of our voting rights, and who held less than 10% of our voting rights during the 12 months prior to a sale of their shares, from Israeli capital gains tax in connection with such sale.

86

---

## United States Federal Income Tax Considerations

The following discussion describes the material U.S. federal income tax considerations relating to the ownership or disposition of our ordinary shares to a holder who is:

- <sup>n</sup> A citizen or resident (as defined for U.S. federal income tax purposes) of the United States;
- <sup>n</sup> A corporation, or other entity taxable as a corporation, created or organized in or under the laws of the United States or any of its states;
- <sup>n</sup> An estate, if the estate's income is subject to U.S. federal income taxation regardless of its source; or
- <sup>n</sup> A trust, if a U.S. court is able to exercise primary supervision over its administration and one or more U.S. persons (e.g., a U.S. citizen, resident, or corporation) have the authority to control all of its substantial decisions.

We refer to any of the above as a U.S. Shareholder .

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

This discussion is based on the provisions of the Internal Revenue Code of 1986, as amended, referred to as the Code, U.S. Treasury Regulations promulgated under the Code and administrative and judicial interpretations of the Code, all as in effect as of the date of this Annual Report on Form 20-F. This discussion generally considers only U.S. Shareholders who will hold the ordinary shares as capital assets. The discussion does not consider:

- <sup>n</sup> Aspects of U.S. federal income taxation relevant to U.S. Shareholders by reason of their particular circumstances (including potential application of the alternative minimum tax).
- <sup>n</sup> U.S. Shareholders subject to special treatment under the U.S. federal income tax laws, such as financial institutions, insurance companies, broker-dealers, tax-exempt organizations, and foreign individuals or entities.
- <sup>n</sup> U.S. Shareholders who own 10% or more of our outstanding voting shares, either directly or by attribution.
- <sup>n</sup> U.S. Shareholders who hold our ordinary shares as part of a hedging, straddle, or conversion transaction.
- <sup>n</sup> U.S. Shareholders who acquire their ordinary shares in a compensatory transaction.
- <sup>n</sup> U.S. Shareholders whose functional currency is not the U.S. dollar.
- <sup>n</sup> Any aspect of state, local, or non-U.S. tax law.

**The following summary does not address all of the tax consequences of owning or disposing of our ordinary shares to you based on your individual tax circumstances. Accordingly, you should consult your own tax advisor as to the particular tax consequences to you of owning or disposing of our ordinary shares, including the effects of applicable state, local, or non-U.S. tax laws and possible changes in the tax laws.**

87

---

### *Dividends Paid on the Ordinary Shares*

A U.S. Shareholder, as defined above, will generally be required to include in gross income the amount of any distributions paid in respect of the ordinary shares to the extent that the distributions are paid out of our current or accumulated earnings and profits, as determined for U.S. federal income tax purposes. The amount of the distribution would include any Israeli taxes withheld as part of the distributions. A maximum U.S. federal income tax rate of 15% will apply for individual shareholders and 35% for corporate shareholders if certain holding period requirements are met. The individual shareholder rate is applicable in tax years beginning after December 31, 2002, and before January 1, 2011, for qualified dividend income received by an individual as well as certain trusts and estates. Qualified dividend income generally includes dividends paid by a U.S. corporation or a qualified foreign corporation. A non-U.S. corporation, such as ours, generally will be considered to be a qualified foreign corporation if (i) our shares are readily tradable on an established securities market in the United States, or (ii) we are eligible for the benefits of a comprehensive U.S. income tax treaty determined to be satisfactory to the U.S. Department of the Treasury. The U.S. Department of the Treasury and the Internal Revenue Service have determined that the United States-Israel tax treaty is satisfactory for this purpose. In addition, the U.S. Department of the Treasury and the Internal Revenue Service have determined that ordinary shares are considered readily tradable on an established securities market if they are listed on an established securities market in the United States, such as the NASDAQ Global Select Market. The information returns, reporting the dividends paid to U.S. Shareholders, will identify the amount of dividends eligible for the reduced rates.

Any distributions in excess of earnings and profits will be treated first as non-taxable return of capital, reducing a U.S. Shareholder's tax basis in the ordinary shares to the extent of the distributions, and then as capital gain from a sale or exchange of the ordinary shares. Our dividends will generally not qualify for the dividends received deduction available to corporations. Any cash distribution paid in Israeli Shekels will equal the U.S. dollar value of the distribution, calculated based on the spot exchange rate in effect on the date of the distribution.

### *Credit for Israeli Taxes Withheld*

Subject to certain conditions and limitations, a U.S. Shareholder will generally be eligible for a credit against United States federal income tax liability for any Israeli tax withheld or paid with respect to dividends on the ordinary shares. The Code provides limitations on the amount of foreign tax credits. These limitations include extensive separate computation rules under which foreign tax credits allowable with respect to specific categories of income cannot exceed the U.S. federal income taxes otherwise payable with respect to each such category of income. A

shareholder who does not elect to claim a foreign tax credit may instead claim a deduction for Israeli income tax withheld or paid, but only if the shareholder elects to do so for all foreign income taxes in that year. Special rules for determining a U.S. Shareholder's foreign tax credit limitation apply in the case of qualified dividend income. Rules similar to those concerning adjustments to the foreign tax credit limitation to reflect any capital gain rate differential also apply to any qualified dividend income. The rules relating to foreign tax credits are complex and each shareholder should consult his, her, or its own tax advisor to determine whether and if the specific shareholder would be entitled to this credit.

### *Disposition of the Ordinary Shares*

The sale or exchange of ordinary shares will generally result in the recognition of capital gain or loss. The amount of gain or loss is the difference between the amounts realized on the sale or exchange and the tax basis in the ordinary shares. If a U.S. Shareholder's holding period for the ordinary shares exceeds one year at the time of the disposition, the amount of the shareholder's gain or loss generally will be long-term capital gain or loss. Long-term capital gains realized upon a sale or exchange of ordinary shares generally will be subject to a maximum U.S. federal income tax rate of 15% for taxable years which begin before January 1, 2011. Gain or loss recognized by a U.S. Shareholder on a sale or exchange of ordinary shares generally will be treated as U.S. source income or loss for U.S. foreign tax credit purposes. Under the United States-Israel tax treaty, gain derived from the sale, exchange, or other disposition of ordinary shares by a holder, who is a resident of the United States for purposes of the treaty and who sells the ordinary shares within Israel, may be treated as foreign source income for U.S. foreign tax credit purposes.

### *Passive Foreign Investment Company Status*

Based upon our income, assets and activities, we believe that we are not currently, and have not been in prior years, a passive foreign investment company (PFIC) for U.S. federal income tax purposes. We do not currently anticipate that we will be a PFIC for any subsequent year. We would be classified as a PFIC if, for any taxable year, either:

- <sup>n</sup> 75% or more of our gross income in the taxable year is passive income, or
- <sup>n</sup> 50% or more of the average percentage of our assets held during the taxable year, produce or are held for the production of passive income.

For this purpose, passive income includes dividends, interest, royalties, rents, annuities, and the excess of gain over losses from the disposition of assets that produce passive income.

If we were a PFIC for any taxable year during which you held shares as a U.S. Shareholder and you did not timely elect to treat us as a qualified electing fund under Section 1295 of the Code or elect to mark the ordinary shares to market, you would be subject to special tax rules on the receipt of an excess distribution on the ordinary shares. Generally, a distribution is considered an excess distribution to the extent it exceeds 125% of the average annual distributions in the prior three years. You would also be subject to special tax rules on the gain from the disposition of the ordinary shares.

A U.S. Shareholder may be able to mitigate certain adverse tax consequences of holding shares in a PFIC by making a qualified electing fund, deemed sale, or mark-to-market election. However, as a U.S. Shareholder you may make a qualified electing fund election only if we agree to furnish certain tax information annually. We do not presently prepare or provide this information, and this information may not be available to you if we are subsequently determined to be a PFIC. A number of specific rules and requirements apply to a U.S. Shareholder under either of the elections available to owners of a PFIC. You are urged to consult your tax advisor concerning these elections.

### *Information Reporting and Back up Withholding*

Dividend payments and proceeds from the sale or disposal of ordinary shares may be subject to information reporting to the Internal Revenue Service and possible U.S. federal backup withholding at the current rate of 28% (increases to 31% for taxable years beginning in 2011 or later). However, backup withholding will not apply to a holder who furnishes a correct taxpayer identification number or certificate of foreign status and makes any other required certification, or who is otherwise exempt from backup withholding (for example, a corporation). Any U.S.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

Shareholder who is required to establish exempt status generally must file IRS Form W-9 (Request for Taxpayer Identification Number and Certification). Amounts withheld as backup withholding may be credited against a U.S. Shareholder's federal income tax liability. A U.S. Shareholder may obtain a refund of any excess amounts withheld under the backup withholding rules by filing the appropriate claim for refund with the Internal Revenue Service and furnishing any required information.

### Documents on Display

This report and other information filed or to be filed by us can be inspected and copied at the public reference facilities maintained by the Securities and Exchange Commission at:

Securities and Exchange Commission  
100 F Street, NE  
Public Reference Room  
Washington, D.C. 20549

Copies of these materials can also be obtained from the Public Reference Section of the Securities and Exchange Commission, 100 F Street, NE, Washington, D.C. 20549, at prescribed rates.

The Securities and Exchange Commission maintains a Web site at [www.sec.gov](http://www.sec.gov) that contains reports, proxy and information statements, and other information regarding registrants that make electronic filings with the Securities and Exchange Commission using its EDGAR system. We intend to post our Annual Report on Form 20-F on our website ([www.checkpoint.com](http://www.checkpoint.com)) promptly following the filing of our Annual Report with the Securities and Exchange Commission.

Additionally, documents referred to in this Annual Report on Form 20-F may be inspected at our principal executive offices located at 5 Ha Solelim Street, Tel Aviv 67897 Israel.

### ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risks that result primarily from weak economic conditions in the markets in which we sell our products, and from changes in exchange rates or in interest rates.

Securities representing 35.2% of the portfolio are rated as AAA, securities representing 29.2% of the portfolio are rated as AA, securities representing 33.2% of the portfolio are rated as A, and securities representing 2.4% of the portfolio are rated as BBB.

90

The table below provides information regarding our investments in cash, cash equivalents and marketable securities, as of December 31, 2008.

	Amortized cost					Total Amortized cost	Fair Value at Dec. 31, 2008
	Maturity						
	2009	2010	2011	2012	2013 onwards		
	(in thousands)						
Government and corporate debentures - fixed interest rates.	\$ 204,873	\$ 162,814	\$ 108,908	\$ 103,263	\$ 48,656	\$ 628,514	\$ 621,444
U.S Agencies	\$ 108,016	\$ 43,528	\$ 33,836	\$ 4,943	-	\$ 190,323	\$ 194,254
Structured notes*	\$ 31.813	-	-	-	-	\$ 31.813	\$ 29.506

# Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

	Amortized cost					Total Amortized cost	Fair Value at Dec 31, 2008
Asset backed securities**	\$ 24	-	\$ 1,991	-	-	2,015	2,023
Auction rate securities***	-	-	-	-	\$ 11,910	\$ 11,910	\$ 11,910
Government and corporate debentures - floating interest rates	\$ 4,771	\$ 6,980	\$ 3,942	-	-	\$ 15,693	\$ 15,203
Money market instruments, cash and short term deposit	\$ 569,492	-	-	-	-	\$ 569,492	\$ 569,492
Total	\$ 918,989	\$ 213,322	\$ 148,677	\$ 108,206	\$ 60,566	\$ 1,449,760	\$ 1,443,832

\* The structured notes include inverse floating interest rate bonds. Inverse floating rate bonds are bonds where the coupon varies inversely with changes in specified interest rates or indices (for example, LIBOR). The effective maturity dates may differ from the contractual maturities because debtors have the right to call the obligations without penalties.

Debtors are likely exercise call options when forward markets rates are below the interest rate range of the structured note. During 2008, interest rates continued to decrease. This led some of the debtors to exercise their call option. As a result, in 2008, the structured notes balance was classified according to their next call date. A total amount of \$103 million in structured notes were called and settled during 2008. An additional amount of \$20 million in structured notes were called and settled after December 31, 2008.

\*\* The effective maturity may differ from the contractual maturities, because debtors may have the right to call or prepay obligations without penalties. Therefore, the asset backed securities balance was classified according to their next anticipated prepayment date.

\*\*\* The balance is comprised of four auction rate securities, which have suffered from failed auctions since September 2007. As a result of the auction failures, these auction rate securities do not have a readily determinable market value. In 2008, we obtained a third party valuation to determine the fair values of these securities.

## Foreign Currency Risk

Most of our sales are denominated in U.S. dollars, and we incur most of our expenses in U.S. dollars, Euros and Israeli Shekels. According to the salient economic factors indicated in SFAS No. 52, Foreign Currency Translation, our cash flow, sale price, sales market, expense, financing and inter-company transactions, and arrangement indicators, are predominantly denominated in U.S. dollars. In addition, the U.S. dollar is the primary currency of the economic environment in which we operate, and thus, the U.S. dollar is our functional and reporting currency.

In our balance sheet, we remeasure into U.S. dollars all monetary accounts (principally cash and cash equivalents and liabilities) that are maintained in other currencies. For this remeasurement, we use the relevant foreign exchange rate at the balance sheet date. Any gain or loss that results from this remeasurement is reflected in the statement of income as financial income or financial expense, as appropriate.

We measure and record non-monetary accounts in our balance sheet (principally fixed assets, prepaid expenses, and share capital) in U.S. dollars. For this measurement, we use the U.S. dollar value in effect at the date that the asset or liability was initially recorded in our balance sheet (the date of the transaction).

We attempt to limit our exposure resulting from assets and liabilities that are denominated in Japanese Yen, Israeli Shekels, Euros, Swedish Krona and British Pounds through forward contracts. We monitor foreign exchange rates and trends periodically to measure the effectiveness of our foreign currency hedging. If our forward contracts meet the definition of a hedge, and are so designated, changes in the fair value of the contracts will be offset against changes in the fair value of the hedged assets or liabilities through earnings.

The ineffective portion of our foreign currency hedging is recognized in earnings.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

As of December 31, 2008, we had outstanding forward contracts in the amount of \$71.4 million. In addition, we had an outstanding option contract of \$25 million. These transactions were for a period of up to twelve months. The fair value of the above mentioned foreign currency derivative contracts were \$0.9 million as of December 31, 2008.

### Interest Rate Risk

Our exposure to market risk for changes in interest rates relates primarily to our investment in marketable securities. Our marketable securities portfolio includes government and government agencies debt instruments (U.S., European and other) and corporate debt instruments. By policy, we limit the amount of credit exposure to any one issuer.

Investments in both fixed rate and floating rate interest bearing securities carry a degree of interest rate risk. Fixed rate securities may have their fair market value adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than predicted if interest rates fall. Due in part to these factors, our income from investments may decrease in the future in the event that interest rates fluctuate.

### ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not applicable.

92

---

## PART II

### ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

There are no defaults, dividend arrearages, or delinquencies that are required to be disclosed.

### ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

There are no material modifications to, or qualifications of, the rights of security holders that are required to be disclosed.

### ITEM 15. CONTROLS AND PROCEDURES

#### Disclosure Controls and Procedures

As of December 31, 2008, we performed an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and our management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective as of December 31, 2008, to provide reasonable assurance that the information required to be disclosed in filings and submissions under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission's rules and forms, and that such information related to us and our consolidated subsidiaries is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions about required disclosure.

**Management's Annual Report on Internal Control over Financial Reporting and Attestation Report of Registered Public Accounting Firm**

Our management report on our internal control over financial reporting (as such defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act), and the related attestation report of our independent public accounting firm, are included in pages F-2 and F-4 to F-5 of our audited consolidated financial statements set forth in Item 18 Financial Statements, and are incorporated herein by reference.

**Changes in Internal Control over Financial Reporting**

During the period covered by this Annual Report on Form 20-F, no changes in our internal control over financial reporting have occurred that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

93

**ITEM 16. Reserved.****ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT**

Our board of directors has determined that Messrs. Yoav Chelouche and Irwin Federman are audit committee financial experts and that they are independent under the applicable Securities and Exchange Commission and NASDAQ Global Select Market rules.

**ITEM 16B. CODE OF ETHICS**

In March 2004, our board of directors adopted a Code of Ethics that applies to all of our employees, directors and officers, including the Chief Executive Officer, Chief Financial Officer, principal accounting officer or controller and other individuals who perform similar functions. The Code of Ethics is updated from time to time. You can obtain a copy of our Code of Ethics without charge, by sending a written request to our investor relations department at Check Point Software Technologies Inc., Attn: Investor Relations, 800 Bridge Parkway, Redwood City, California 94065 U.S.A; Tel: 650-628-2000; Email: [ir@us.checkpoint.com](mailto:ir@us.checkpoint.com).

**ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES****Fees and Services**

The following table sets forth the aggregate fees billed to us for the audit and other services provided by Kost, Forer, Gabbay & Kasierer, a member of Ernst & Young Global, during the years ended December 31, 2007, and 2008:

	Year Ended December 31, 2007		Year Ended December 31, 2008	
	Amount	Percentage	Amount	Percentage
(in thousands, except percentages)				
Audit fees (1)	\$ 896	63%	\$ 965	75%
Audit-related fees (2)	23	2%	-	-
Tax fees (3)	508	35%	323	25%
Total	\$ 1,427	100%	\$ 1,288	100%

- (1) Audit fees are fees for audit services for each of the years shown in this table, including fees associated with the annual audit (including audit of our internal control over financial reporting) and reviews of our quarterly financial results submitted on Form 6-K, consultations on various accounting issues and audit services provided in connection with other statutory or regulatory filings.
- (2) Audit-related fees are fees related to due diligence investigations.
- (3) Tax fees are fees for professional services rendered by our auditors for tax compliance, tax planning and tax advice on actual or contemplated transactions, tax consulting associated with international transfer prices and employee benefits.

94

*Audit committee's pre-approval policies and procedures*

Our audit committee chooses and engages our independent auditors to audit our financial statements, with the approval of our shareholders as required by Israeli law. In March 2004, our audit committee adopted a policy requiring our management to obtain the audit committee's approval before engaging our independent auditors to provide any audit or permitted non-audit services to us or our subsidiaries. The policy was last amended in October 2004. This policy, which is designed to assure that such engagements do not impair the independence of our auditors, requires pre-approval from the audit committee on an annual basis for the various audit and non-audit services that may be performed by our auditors. In addition, the audit committee limited the aggregate amount of fees our auditors may have received during 2007 and 2008, and may receive during 2009 for non-audit services in certain categories.

Our controller reviews all management requests to engage our auditors to provide services and approves a request if the requested services are of those that have received pre-approval from our audit committee. We inform our audit committee of these approvals at least quarterly and prior to the commencement of the related services. If the services are not included in those categories that were pre-approved by our audit committee, then specific approval is needed from our audit committee before these services are commenced. Our audit committee is not permitted to approve the engagement of our auditors for any services that would be inconsistent with maintaining the auditor's independence or that are not permitted by applicable law.

**ITEM 16D. EXEMPTION FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES**

None.

95

**ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS**

Our board of directors approved five programs to repurchase ordinary shares. The first program was announced on October 28, 2003, and ended on August 24, 2004, and authorized the repurchase of up to \$200 million of our ordinary shares. The second program was announced on October 28, 2004, and ended on May 31, 2005, and authorized the repurchase of up to \$200 million of our ordinary shares. The third program was announced on July 25, 2005, and ended on May 18, 2006, and authorized the repurchase of up to \$200 million of our ordinary shares. The fourth program was announced on May 22, 2006, and ended on March 5, 2008, and authorized the repurchase of up to \$600 million of our ordinary shares. The fifth program was announced on March 26, 2008, and authorized the repurchase of up to \$400 million of our ordinary shares. As of the date of this filing, this program is still in effect.

During 2008, we spent \$239.5 million to repurchase approximately 10.9 million ordinary shares, out of which \$73 million were repurchased under the fourth program and the remainder of \$166.5 million was repurchased under the fifth program, as described above. The table below provides detailed information.

Period	(a) Total	(b) Average	(c) Total	(d) Approximate

<b>Total</b>	<b>10,914,008</b>	<b>22.3</b>	<b>10,914,008</b>	<b>N/A</b>

**ITEM 16G. CORPORATE GOVERNANCE**

As a foreign private issuer whose shares are listed on the NASDAQ Global Select Market, we are permitted to follow certain home country corporate governance practices instead of certain requirements of the NASDAQ Marketplace Rules.

As described in Item 10 Additional Information NASDAQ Global Select Market corporate governance rules, we do not comply with the NASDAQ requirement that an issuer listed on the NASDAQ Global Select Market have a quorum requirement that in no case be less than 33 1/3% of the outstanding shares of the company's common voting stock. However, our articles of association, consistent with the Israeli Companies Law, provide that the quorum requirements for an adjourned meeting are the presence of a minimum of two shareholders present in person. Our quorum requirements for an adjourned meeting do not comply with the NASDAQ requirements and we instead follow our home country practice.

As a foreign private issuer listed on the NASDAQ Global Select Market, we may also follow home country practice with regard to, among other things, composition of the board of directors, director nomination process and regularly scheduled meetings at which only independent directors are present. In addition, we may follow our home country practice, instead of the NASDAQ Marketplace Rules, which require that we obtain shareholder approval for certain dilutive events, such as for the establishment or amendment of certain equity based compensation plans, an issuance that will result in a change of control of the company, certain transactions other than a public offering involving issuances of a 20% or more interest in the company and certain acquisitions of the stock or assets of another company. A foreign private issuer that elects to follow a home country practice instead of NASDAQ requirements, must submit to NASDAQ in advance a written statement from an independent counsel in such issuer's home country certifying that the issuer's practices are not prohibited by the home country's laws. In addition, a foreign private issuer must disclose in its annual reports filed with the Securities and Exchange Commission or on its website each such requirement that it does not follow and describe the home country practice followed by the issuer instead of any such requirement. Accordingly, our shareholders may not be afforded the same protection as provided under NASDAQ's corporate governance rules.

See Item 6 Directors, Senior Management and Employees Board Practices and Item 10 Additional Information Articles of Association and Israeli Companies Law for a detailed description of the significant ways in which the registrant's corporate governance practices differ from those followed by U.S. companies under the listing standards of the NASDAQ Global Select Market.

**MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that:

pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets,

provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors, and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Our management recognizes that there are inherent limitations in the effectiveness of any system of internal control over financial reporting, including the possibility of human error and the circumvention or override of internal control. Accordingly, even effective internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation, and may not prevent or detect all misstatements. Further, because of changes in conditions, the effectiveness of internal control over financial reporting may vary over time.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2008. In conducting its assessment of internal control over financial reporting, management based its evaluation on the framework in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Our management has concluded based on its assessment, that our internal control over financial reporting was effective as of December 31, 2008 based on these criteria.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

Our financial statements and internal control over financial reporting have been audited by Kost, Forer, Gabbay & Kasierer (A Member of Ernst & Young Global), an independent registered public accounting firm.

### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

**To the Shareholders and Board of Directors of**

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.**

We have audited the accompanying consolidated balance sheets of Check Point Software Technologies Ltd. (the Company) and its subsidiaries as of December 31, 2008 and 2007, and the related consolidated statements of income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2008. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company and its subsidiaries at December 31, 2008 and 2007, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2008, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 3, 2009 expressed an unqualified opinion thereon.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON INTERNAL  
CONTROL OVER FINANCIAL REPORTING**

**To the Shareholders and Board of Directors of  
CHECK POINT SOFTWARE TECHNOLOGIES LTD.**

We have audited Check Point Software Technologies Ltd.'s (Check Point or the Company) internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Check Point's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Tel-Aviv 67067, Israel

Tel: 972 (3)6232525  
Fax: 972 (3)5622555  
www.ey.com/il

In our opinion, Check Point maintained in all material respects, effective internal control over financial reporting as of December 31, 2008, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Check Point and subsidiaries as of December 31, 2008 and 2007, and the related consolidated statements of income, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2008 and our report dated March 3, 2009 expressed an unqualified opinion thereon.

F - 11

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**U.S. dollars in thousands (except share and per share amounts)**

**NOTE 1: - GENERAL**

- a. Check Point Software Technologies Ltd. ( Check Point Ltd. ), an Israeli corporation, and its subsidiaries (collectively the Company or Check Point ), are engaged in developing, marketing and supporting software and combined hardware and software products and services, by offering network security, data security and management solutions for enterprise networks and service providers.

The Company operates in one reportable segment and its revenues are mainly derived from the sales of its network and data security products including licenses, related software updates, maintenance, support and other services. The Company sells its products worldwide primarily through multiple distribution channels ( channel partners ) including distributors, resellers, system integrators, Original Equipment Manufacturers ( OEMs ), system integrators and Managed Security service Providers ( MSPs ).

- b. During 2006 approximately 26% of the Company's revenues were derived from two channel partners, 15% from one channel partner and 11% from the other. During 2007 and 2008, approximately 30% of the Company's revenues were derived from the same two channel partners, 16% from one channel partner and 14% from the other. Trade receivable balance from the two largest channel partners was \$ 53,047 as of December 31, 2007 and \$ 81,931 as of December 31, 2008.

- c. On December 22, 2008, the Company entered into an Asset Purchase Agreement with Nokia, Inc. ( Nokia ) to acquire Nokia's security appliance business. The pending acquisition is expected to close in the first or second quarter of 2009 and is subject to regulatory approvals and customary closing conditions.

**NOTE 2: - SIGNIFICANT ACCOUNTING POLICIES**

The consolidated financial statements are prepared according to United States generally accepted accounting principles ("U.S. GAAP").

- a. Use of estimates:

The preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates, judgments and assumptions. The Company's management believes that the estimates, judgments and assumptions used are reasonable based upon information available at the time they are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

- b. Financial statements in United States dollars:

Most of the Company's revenues and costs are denominated in United States dollars ( dollars ). The Company's management believes that the dollar is the primary currency of the economic environment in which Check Point Ltd. and each of its subsidiaries operate.

F - 12

---

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**U.S. dollars in thousands (except share and per share amounts)**

**NOTE 2: - SIGNIFICANT ACCOUNTING POLICIES (Cont.)**

Thus, the dollar is the Company's functional and reporting currency. Accordingly, monetary accounts maintained in currencies other than the dollar are remeasured into dollars in accordance with Statement of Financial Accounting Standard ( SFAS ) No. 52 Foreign Currency Translation . Changes in currency exchange rates between the Company's functional currency and the currency in which a transaction is denominated are included in the Company's results of operations as financial income (expense) in the period in which the currency exchange rates change.

- c. Principles of consolidation:

The consolidated financial statements include the accounts of Check Point Ltd. and its subsidiaries. Intercompany transactions and balances have been eliminated upon consolidation.

- d. Reclassifications:

Certain amounts in prior years' financial statements have been reclassified to conform to the current year's presentation.

- e. Cash equivalents:

Cash equivalents are short-term highly liquid investments that are readily convertible to cash with original maturities of three months or less at acquisition.

## f. Short-term deposit:

Bank deposits with maturities of more than three months but less than one year are included in short-term deposits. Such short-term deposits are stated at cost which approximates market values.

## g. Investments in marketable securities:

The Company accounts for investments in marketable securities in accordance with SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities .

Management determines the appropriate classification of its investments at the time of purchase and reevaluates such determinations at each balance sheet date.

The Company classifies all of its marketable securities as available for sale. Available for sale securities are carried at fair value, with the unrealized gains and losses, net of tax, reported in accumulated other comprehensive income (loss) in shareholders equity. Realized gains and losses on sale of investments are included in earnings and are derived using the specific identification method for determining the cost of securities.

The amortized cost of debt securities is adjusted for amortization of premiums and accretion of discounts to maturity. Such amortization together with interest and dividends on securities are included in financial income, net.

F - 13

---

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**U.S. dollars in thousands (except share and per share amounts)**
**NOTE 2: - SIGNIFICANT ACCOUNTING POLICIES (Cont.)**

In accordance with the Company's policy and FASB Staff Position (FSP) Nos. SFAS 115-1 (FSP 115-1) and SFAS 124-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments , the Company recognizes an impairment charge when a decline in the fair value of its investments below the cost basis is judged to be other-than-temporary. The Company considers various factors in determining whether to recognize an impairment charge, including the Company's intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value, the length of time and extent to which the fair value has been less than the cost basis, the credit ratings of the securities and the financial condition and near-term prospects of the issuers. During 2008, an other than temporary impairment on marketable securities of \$ 11,221, pretax was recorded. See further details in Note 4.

## h. Property and equipment:

Property and equipment are stated at cost, net of accumulated depreciation. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets at the following annual rates:

	%
Computers and peripheral equipment	33-50
Office furniture and equipment	10-20
Building	4
Leasehold improvements	The shorter of term of the lease or the useful life of the asset

Property and equipment are reviewed for impairment in accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

the future undiscounted cash flows expected to be generated by the assets. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. During 2006, 2007 and 2008, no impairment losses have been recorded.

i. Goodwill and other intangible assets:

Goodwill and certain other purchased intangible assets have been recorded as a result of acquisitions. Goodwill represents the excess of the purchase price in a business combination over the fair value of net tangible and intangible assets acquired. Goodwill is not amortized, but rather is subject to an annual impairment test. The Company performs an annual impairment test during the fourth quarter of each fiscal year, or more frequently if impairment indicators are present. The Company operates in one operating segment, and this segment comprises its only reporting unit. Intangible assets that are not considered to have an indefinite useful life are amortized using the straight-line basis over their estimated useful lives, which range from one to 20 years. The carrying amount of these assets to be held and used is reviewed whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. Recoverability of these assets is measured by comparison of the carrying amount of the asset to the future undiscounted cash flows the asset is expected to generate. If the asset is considered to be impaired, the amount of any impairment is measured as the difference between the carrying value and the fair value of the impaired asset. During 2006, 2007 and 2008, no impairment loss was recorded.

F - 14

---

---

### CHECK POINT SOFTWARE TECHNOLOGIES LTD. AND ITS SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

---

##### U.S. dollars in thousands (except share and per share amounts)

##### NOTE 2: - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

j. Research and development costs:

Research and development costs are charged to the statement of income as incurred. SFAS No. 86, Accounting for the Costs of Computer Software to be Sold, Leased or Otherwise Marketed, requires capitalization of certain software development costs subsequent to the establishment of technological feasibility.

Based on the Company's product development process, technological feasibility is established upon completion of a working model. Costs incurred by the Company between completion of the working models and the point at which the products are ready for general release has been insignificant. Therefore, all research and development costs have been expensed.

k. Revenue recognition:

The Company derives its revenues mainly from products, licenses, combined hardware and software products, software updates, maintenance and support services. The Company sells its products primarily through channel partners including distributors, resellers, OEMs, system integrators and MSPs, all of whom are considered end-users. The Company also sells its products directly to end users primarily through its web site.

The Company accounts for product sales in accordance with Statement of Position (SOP) No. 97-2, Software Revenue Recognition, as amended by SOP No. 98-9, Modification of SOP No. 97-2, Software Revenue Recognition, With Respect to Certain Transactions (collectively SOP 97-2). Product and software license revenue is recognized when persuasive evidence of an arrangement exists, the software license has been delivered, there are no uncertainties surrounding product acceptance, there are no significant future performance obligations, the license fees are fixed or determinable and collection of the license fee is considered probable. Amounts received in advance of meeting these criteria are deferred. Fees for arrangements with payment terms extending beyond customary payment terms are considered not to be fixed or determinable, in which case revenue is deferred and recognized when payments become due from the customer or are actually collected, providing that all other revenue recognition criteria have been met.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

As required by SOP 97-2, the Company determines the value of the software component of its multiple-element arrangements using the residual method when vendor specific objective evidence (VSOE) of fair value exists for the undelivered elements of the support and maintenance agreements. VSOE is based on the price charged when an element is sold separately or renewed. Under the residual method, the fair value of the undelivered elements is deferred and the remaining portion of the arrangement fee is allocated to the delivered elements and is recognized as revenue.

Software updates and maintenance provide customers with rights to unspecified software product upgrades released during the term of the agreement. Support services grant the Company's customers telephone access to technical support personnel during the term of the service. The Company recognizes revenues from software updates, maintenance and support services ratably over the term of the agreement.

F - 15

---

### CHECK POINT SOFTWARE TECHNOLOGIES LTD. AND ITS SUBSIDIARIES

---

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

---

U.S. dollars in thousands (except share and per share amounts)

#### NOTE 2: - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

Deferred revenues represent mainly the unrecognized fees billed for updates, maintenance and support services.

The Company follows very specific and detailed guidelines in measuring revenue, several of which are discussed above. The Company determines the fair value of each type of undelivered element as follows:

For enterprise products, the Company determines the fair value based on the renewal prices charged for software updates, maintenance and support services. The Company offers several levels of services, classified by services offered, response time, and availability. The Company has defined classes of customers, based on the total gross value of licensed software products the customer purchased from the Company. The Company prices renewals for each service level and each class of customer as a fixed percentage of the total gross value of licensed software products the customer purchased.

For its consumer products, the Company determines the fair value based on the renewal prices of software updates, maintenance and support services for the different products offered. The renewal prices are based on its price list.

The Company records a provision for estimated sales returns and allowances on product and service related sales in the same period the related revenues are recorded in accordance with FASB Statement No. 48, Revenue Recognition When Right of Return Exists. These estimates are based on historical sales returns, analysis of credit memo data and other known factors. Such provisions amounted to \$ 912 and \$ 2,330 as of December 31, 2007 and 2008, respectively.

l. Cost of revenues:

Cost of products and licenses is comprised of cost of software and hardware production, manuals, packaging and license fees paid to third parties.

Cost of software updates, maintenance and services is comprised of cost of post sale customer support.

Amortization of technology is comprised of amortization of core technology assets which are used in the Company's operations, and is included separately in cost of revenues.

m. Severance pay:

The Company's liability for severance pay for periods prior to December 31, 2006 is calculated pursuant to Israeli severance pay law based on the most recent salary of the employees multiplied by the number of years of employment as of the balance sheet date. The Company records as expenses the increase in the severance liability, net of earnings (losses) from the related investment

fund. Employees are entitled to one month's salary for each year of employment, or a portion thereof. Until December 31, 2006, the Company's liability is partially provided by monthly payments deposited with insurers; any unfunded amounts would be paid from operating funds and are covered by a provision established by the Company.

F - 16

---

---

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**U.S. dollars in thousands (except share and per share amounts)**

**NOTE 2: - SIGNIFICANT ACCOUNTING POLICIES (Cont.)**

Effective January 1, 2007, the Company's agreements with employees in Israel, are under section 14 of the Severance Pay Law -1963. The Company's contributions for severance pay shall be instead of its severance liability. Upon contribution of the full amount of the employee's monthly salary, no additional calculations shall be conducted between the parties regarding the matter of severance pay and no additional payments shall be made by the Company to the employee. Further, the related obligation and amounts deposits on behalf of such obligation are not stated on the balance sheet, as they are legally released from obligation to employees once the deposit amounts have been paid. Effective from January 1, 2007, the Company increased its contribution to the deposited funds to cover the full amount of the employees' monthly salary.

The carrying value of deposited funds includes profits (losses) accumulated up to the balance sheet date. The deposited funds may be withdrawn only upon the fulfillment of the obligation pursuant to Israeli severance pay law or labor agreements.

Severance expenses for the years ended December 31, 2006, 2007 and 2008, were \$ 3,169, \$ 3,982 and \$ 5,134, respectively.

n. Employee benefit plan:

The Company has a 401(K) defined contribution plan covering certain employees in the U.S. All eligible employees may elect to contribute up to 50%, but generally not greater than \$ 15 per year, of their annual compensation to the plan through salary deferrals, subject to IRS limits. Effective from January 1, 2006 the Company matches 50% of employee contributions to the plan up to a limit of 3% of their eligible compensation. In 2006, 2007 and 2008, the Company matched contributions in the amount of \$571, \$ 623 and \$ 684, respectively.

o. Income taxes:

The Company accounts for income taxes in accordance with SFAS No. 109, Accounting for Income Taxes (SFAS No. 109). SFAS No. 109 prescribes the use of the liability method whereby deferred tax asset and liability account balances are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The Company provides a valuation allowance, if necessary, to reduce deferred tax assets to amounts more likely than not to be realized.

Deferred tax liabilities and assets are classified as current or non current based on the classification of the related asset or liability for financial reporting, or according to the expected reversal dates of the specific temporary differences if not related to an asset or liability for financial reporting.

F - 17

---

---

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

U.S. dollars in thousands (except share and per share amounts)

**NOTE 2: - SIGNIFICANT ACCOUNTING POLICIES (Cont.)**

On January 1, 2007, the Company adopted FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109 (FIN 48). FIN 48 contains a two-step approach to recognizing and measuring uncertain tax positions accounted for in accordance with SFAS No. 109. The first step is to evaluate the tax position taken or expected to be taken in a tax return by determining if the weight of available evidence indicates that it is more likely than not that, on an evaluation of the technical merits, the tax position will be sustained on audit, including resolution of any related appeals or litigation processes. The second step is to measure the tax benefit as the largest amount that is more than 50% likely to be realized upon ultimate settlement. The Company accrues interest and penalties related to unrecognized tax benefits in its provision for income tax.

p. Advertising expenses:

Advertising costs are expensed as incurred. Advertising expenses for the years ended December 31, 2006, 2007 and 2008, were \$ 3,145, \$ 3,736 and \$ 2,796, respectively.

q. Concentrations of credit risk:

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents, short-term deposit, marketable securities and trade receivables.

The majority of the Company's cash and cash equivalents, short-term deposit and marketable securities is held by the Company's Singaporean subsidiary, invested in dollar and dollar-linked investments, and is deposited in major banks in the U.S. and Europe. Deposits in the U.S. may be in excess of insured limits and are not insured in other jurisdictions. Generally, these deposits may be redeemed upon demand and, therefore, bear minimal risk.

The Company's marketable securities consist of investment-grade corporate bonds, asset-backed securities, structured notes, U.S. government agency securities and sovereign bonds. The Company's investment policy, approved by the Investment Committee, limits the amount the Company may invest in any one type of investment or issuer, thereby reducing credit risk concentrations.

As a result of the recent turmoil in capital markets, the Company has tightened its control and monitoring over its marketable securities portfolio in order to minimize potential risks stemming from current capital markets environment. Such measures included among others: reducing credit exposure to financial sector securities and increasing the overall credit quality of the portfolio.

F - 18

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

U.S. dollars in thousands (except share and per share amounts)

**NOTE 2: - SIGNIFICANT ACCOUNTING POLICIES (Cont.)**

The Company's trade receivables are geographically diversified and derived from sales to channel partners mainly in the United States, Europe and Asia. Concentration of credit risk with respect to trade receivables is limited by credit limits, ongoing credit evaluation and account monitoring procedures. The Company performs ongoing credit evaluations of its channel partners and establishes an allowance for doubtful accounts based upon a specific review of all significant outstanding invoices. For those invoices not specifically reviewed, provisions are recorded at a specific rate, based upon the age of the receivable, the collection history and current economic trends. Allowance for doubtful accounts amounted to \$ 5,623 and \$ 6,795 as of December 31, 2007 and 2008, respectively. The Company charges off receivables when they are deemed uncollectible. Actual collection experience may not meet expectations and may result in increased bad debt expense. Bad debt expense amounted to \$ 490, \$ 2,316 and \$ 1,898 in 2006, 2007 and 2008, respectively. Total write offs during 2006, 2007 and 2008 amounted to \$ 1,208, \$ 571 and \$ 726,

respectively.

r. Derivatives and hedging:

The Company accounts for derivatives and hedging based on SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities. SFAS No. 133 requires the Company to recognize all derivatives on the balance sheet at fair value. If the derivatives meet the definition of a hedge and are so designated, depending on the nature of the hedge, changes in the fair value of derivatives will either be offset against the change in fair value of the hedged assets, liabilities, or firm commitments through earnings, or recognized in other comprehensive income until the hedged item is recognized in earnings. The ineffective portion of a derivative's change in fair value is recognized in earnings.

The Company entered into forward and option contracts to hedge the fair value of assets and liabilities denominated in Japanese Yen, Israeli Shekels, Euros, Swedish Kronas and British Pounds. As of December 31, 2008, the Company had outstanding forward contracts, that did not meet the definition of hedge accounting, in the amount of \$71,400 and outstanding option contract in the amount of \$25,000. These contracts were for a period of up to twelve months. The Company measured the fair value of the contracts in accordance with SFAS No. 157 at level 2. The net losses recognized in earnings during 2008 were \$ 3,075. The net gains and (losses) recognized in earnings during 2006 and 2007 were immaterial.

s. Basic and diluted earnings per share:

Basic earnings per share is computed based on the weighted average number of Ordinary shares outstanding during each year. Diluted earnings per share is computed based on the weighted average number of Ordinary shares outstanding during each year, plus dilutive potential Ordinary shares outstanding during the year, in accordance with SFAS No. 128, Earnings Per Share.

The total weighted average number of shares related to the outstanding options excluded from the calculations of diluted earnings per share, since they would have an anti-dilutive effect, were 15,474,949, 14,284,200 and 14,461,565 for 2006, 2007 and 2008, respectively.

F - 19

---

---

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**U.S. dollars in thousands (except share and per share amounts)**

**NOTE 2: - SIGNIFICANT ACCOUNTING POLICIES (Cont.)**

t. Accounting for stock-based compensation:

The Company accounts for stock-based compensation in accordance with SFAS No. 123 (revised 2004), Share-Based Payment (SFAS No. 123(R)). SFAS No. 123(R) requires companies to estimate the fair value of equity-based payment awards on the date of grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as an expense over the requisite service periods in the Company's consolidated income statements.

The Company recognizes compensation expenses for the value of its awards granted based on the straight line method over the requisite service period of each of the awards, net of estimated forfeitures. SFAS No. 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Estimated forfeitures are based on actual historical pre-vesting forfeitures.

SFAS No. 123(R) requires the cash flows resulting from the tax deductions in excess of the compensation costs recognized for those stock options to be classified as financing cash flows.

The Company selected the Black-Scholes-Merton option pricing model as the most appropriate fair value method for its stock-options awards and values restricted stock based on the market value of the underlying shares at the date of grant. The option-pricing model requires a number of assumptions, of which the most significant are the expected stock price volatility and

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

the expected option term. Expected volatility was calculated based upon actual historical stock price movements. The expected term of options granted is based upon historical experience and represents the period of time that options granted are expected to be outstanding. The risk-free interest rate is based on the yield from U.S. treasury bonds with an equivalent term. The Company has historically not paid dividends and has no foreseeable plans to pay dividends.

The fair value for options granted in 2006, 2007 and 2008 is estimated at the date of grant using a Black-Scholes-Merton options pricing model with the following weighted average assumptions:

	Year ended December 31,		
	2006	2007	2008
<b>Employee Stock Options</b>			
Expected volatility	58.87%	42.81%	38.57%
Risk-free interest rate	4.6%	4.6%	3.05%
Dividend yield	0.0%	0.0%	0.0%
Expected term from vesting date (years)	3.31	3.24	3.55
<b>Employee Stock Purchase Plan</b>			
Expected volatility	21.65%	22.78%	31.15%
Risk-free interest rate	2.35%	2%	1.92%
Dividend yield	0.0%	0.0%	0.0%
Expected term (years)	0.5	0.5	0.5

F - 20

### CHECK POINT SOFTWARE TECHNOLOGIES LTD. AND ITS SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share amounts)

#### NOTE 2: - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

##### u. Fair value of financial instruments:

The carrying amounts of our financial instruments, including cash and cash equivalents, short-term deposits, marketable securities, accounts receivable, accounts payable and accrued liabilities, approximate fair value because of their generally short maturities.

Effective January 1, 2008, the Company adopted SFAS 157, Fair Value Measurements and, effective October 10, 2008, adopted FSP No. SFAS 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active, except as it applies to the nonfinancial assets and nonfinancial liabilities subject to FSP 157-2. SFAS 157 clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability. As a basis for considering such assumptions, SFAS 157 establishes a three-tier value hierarchy, which prioritizes the inputs used in the valuation methodologies in measuring fair value:

Level 1 Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 Include other inputs that are directly or indirectly observable in the marketplace.

Level 3 Unobservable inputs which are supported by little or no market activity.

3

The fair value hierarchy also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

v. Comprehensive income

The Company accounts for comprehensive income in accordance with SFAS No. 130, *Reporting Comprehensive Income*. This statement establishes standards for the reporting and display of comprehensive income and its components in a full set of general purpose financial statements. Comprehensive income generally represents all changes in shareholders' equity during the period except those resulting from investments by, or distributions to, shareholders. The Company determined that its items of other comprehensive income relates to gain and loss on hedging derivative instruments and unrealized gains and losses on available for sale securities.

w. Treasury stock

The Company repurchases its Ordinary shares from time to time on the open market or in other transactions and holds such shares as treasury stock. The Company presents the cost to repurchase treasury stock as a reduction of shareholders' equity.

From time to time the Company reissues treasury shares under the stock purchase plan, upon exercise of option and upon vesting of restricted stock units. When treasury stock is reissued, the Company accounts for the re-issuance in accordance with Accounting Principles Board No. 6, *Status of Accounting Research Bulletins* and charges the excess of the purchase cost, including related stock-based compensation expenses, over the re-issuance price (loss) to retained earnings. The purchase cost is calculated based on the specific identification method.

In case the purchase cost is lower than the re-issuance price, the Company credits the difference to additional paid-in capital.

**NOTE 2: - SIGNIFICANT ACCOUNTING POLICIES (Cont.)**

x. Impact of recently issued accounting standards:

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141R). SFAS 141R establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any non controlling interest in the acquiree and the goodwill acquired. SFAS 141R also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. SFAS 141R is effective for fiscal years beginning after December 15, 2008. Earlier adoption is prohibited. The impact of SFAS 141R on the Company's consolidated results of operations and financial condition will depend on the nature and size of acquisitions, if any, subsequent to the effective date.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51*. SFAS No. 160 establishes accounting and reporting standards that require that the ownership interests in subsidiaries held by parties other than the parent be clearly identified, labeled, and presented in the consolidated statement of financial position within equity, but separate from the parent's equity; the amount of consolidated net income attributable to the parent and to the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of income; and changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary be accounted for consistently. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The Company is currently evaluating the potential impact, if any, of the adoption of

# Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

SFAS No. 160 on its consolidated financial statement.

In November 2008, the FASB ratified Emerging Issues Task Force Issue No. 08-7, Accounting for Defensive Intangible Assets. EITF 08-7 clarifies the accounting for certain separately identifiable intangible assets which an acquirer does not intend to actively use but intends to hold to prevent its competitors from obtaining access to them. EITF 08-7 requires an acquirer in a business combination to account for a defensive intangible asset as a separate unit of accounting which should be amortized to expense over the period the asset diminishes in value. EITF 08-7 is effective for fiscal years beginning after December 15, 2008, with early adoption prohibited. The Company is currently evaluating the potential impact, if any, of the adoption of EITF 08-7 on its consolidated financial statement.

In April 2008, the FASB issued FASB Staff Position (FSP) FAS 142-3, Determination of the Useful Life of Intangible Assets. FSP FAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under FASB Statement No. 142, Goodwill and Other Intangible Assets. FSP FAS 142-3 is effective for fiscal years beginning after December 15, 2008 and early adoption is prohibited. The Company is currently evaluating the potential impact, if any, of the adoption of FAS 142-3 on its consolidated financial statement.

#### NOTE 2: - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

In February 2008, the FASB issued FSP No. FAS 157-1, Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13", and FSP No. FAS 157-2, Effective Date of FASB Statement No. 157". Collectively, the Staff Positions defer the effective date of Statement 157 to fiscal years beginning after November 15, 2008 for nonfinancial assets and nonfinancial liabilities except for items that are recognized or disclosed at fair value on a recurring basis at least annually, and amend the scope of Statement 157. As described in Note 4, the Company adopted Statement 157 and the related FASB staff positions except for those items specifically deferred under FSP No. FAS 157-2.

#### NOTE 3: - ACQUISITIONS

- a. On January 17, 2007 the Company completed the acquisition of 98.5% of shares of Protect Data AB (Protect Data) that at the time of the acquisition was a public company listed on the Stockholm Stock Exchange. During January 2007, the Company initiated a delisting of the shares in Protect Data from the Stockholm Stock Exchange. On February 13, 2007, Protect Data has, in consultation with the Stockholm Stock Exchange, resolved to delist the shares in Protect Data from the Stockholm Stock Exchange. Protect Data's last day of trading was February 12, 2007. As of December 31, 2007, the Company obtained legal ownership of all of the shares of Protect Data on a fully diluted basis and recorded a liability to Protect Data's former shareholders in the amount of \$ 8,579, which was fully paid in June 2008.

Protect Data operates its business through its wholly-owned subsidiary, Pointsec Mobile Technologies AB, a worldwide provider of mobile data protection. Pointsec delivers solutions for automatic data encryption that keeps sensitive information, stored on mobile computing devices such as laptops, PDAs, smartphones and removable media (e.g., USB devices) confidential and secure. With the acquisition of Protect Data, the Company entered into the data security market. The acquisition was accounted for using the purchase method of accounting and, accordingly the operating results of Protect Data are included in the Company's accompanying consolidated financial statements from the date of acquisition, January 17, 2007.

The total purchase price of Protect Data was composed of the following:

Cash paid	\$	613,361
Amount paid to remaining shareholders in June 2008		8,579
Fair value of vested protect data options assumed		1,069

# Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

Acquisition related transaction costs	2,039
Total purchase price	\$ 625,048

F - 23

## CHECK POINT SOFTWARE TECHNOLOGIES LTD. AND ITS SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share amounts)

#### NOTE 3: - ACQUISITIONS (Cont.)

The fair value of the vested option assumed was determined using a Black-Scholes-Merton valuation model with the following assumptions: expected life of 3 years, risk-free interest rate of 4.69%, expected volatility of 31% and no dividend yield. The fair value of unvested Protect Data options related to future service is being amortized on a straight-line basis over the remaining service period, while the value of vested options is included in total purchase price.

Acquisition related transaction costs include investment banking fees, legal and accounting fees and other external costs directly related to the acquisition.

#### Purchase Price Allocation

Under business combination accounting, the total purchase price was allocated to Protect Data's net tangible and identifiable intangible assets based on their estimated fair values as set forth below. The excess of the purchase price over the net tangible and identifiable intangible assets was recorded as goodwill.

Cash and cash equivalents	\$ 20,436
Accounts receivable	31,179
Other assets	7,287
Accounts payable and other liabilities	(32,651)
Deferred revenues	(13,315)
Intangible assets	177,000
In process research and development	17,000
Goodwill (Not tax deductible)	481,243
Other accrued liabilities (including payable to remaining shareholders)	(13,571)
Deferred tax liabilities	(49,560)
Total purchase price	\$ 625,048

#### Intangible Assets

In performing the purchase price allocation, the Company considered, among other factors, the intention for future use of acquired assets, analyses of historical financial performance and estimates of future performance of Protect Data's products. The fair value of intangible assets was based on a valuation completed by a third party valuation firm using an income approach and estimates and assumptions provided by management. The following table sets forth the components of intangible assets associated with the Protect Data acquisition:

Fair value	Useful life
------------	-------------

Customer relationships	\$ 52,000	5 years
Core technology	107,000	5 years
Trade names	18,000	15 years
<hr/>		
Total intangible assets	\$ 177,000	(*)

(\*) Weighted average amortization period of 6 years.

Customer relationships represent the underlying relationships and agreements with Protect Data's installed customer base.

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**U.S. dollars in thousands (except share and per share amounts)**

**NOTE 3: - ACQUISITIONS (Cont.)**

Core technology represents a combination of Protect Data processes, patents and trade secrets related to the design and development of its software products. This proprietary know-how can be leveraged to develop new technology and improve the Company's software products.

Trade names value represents the recognition value of Protect Data's brand name as a result of advertising expenditures for customer relations and the technological development to provide consistent, leading edge products and a strong research and development commitment by the Company.

The Company expensed in-process research and development (IPR&D) in the amount of \$ 17,000 upon acquisition as it represents incomplete Protect Data research and development projects that had not reached technological feasibility and had no alternative future use as of the date of the acquisition. The value assigned to IPR&D was determined by considering the importance of the project to the Company's overall development plan, estimating costs to develop the purchased IPR&D into commercially viable products, estimating the resulting net cash flow from the project when completed and discounting the net cash flow to its present value based on the percentage of completion of the IPR&D projects.

The Company recorded a deferred tax liability on the purchase date for the difference between the assigned values and the tax bases of the net assets acquired in the acquisition.

During the first quarter of fiscal year 2007, the Company approved a plan to restructure certain operations of Protect Data to eliminate redundant costs resulting from the acquisition and improve efficiencies in operations. The restructuring charges recorded are based on restructuring plan that have been committed to by management.

The total estimated restructuring costs associated with exiting activities of Protect Data are \$ 2,742, consisting of employee severance costs as well as excess facilities obligations through fiscal 2008. These costs were recognized as a liability assumed in the purchase business combination and included in the allocation of the cost to acquire Protect Data and, accordingly, have resulted in an increase to goodwill.

Summary of the plan	Estimated costs	Cash payments	Accrued as of December 31, 2007	Cash payments	Balance as of December 31, 2008

Summary of the plan	Estimated costs	Cash payments	Accrued as of December 31, 2007	Cash payments	Balance as of December 31, 2008
Severance	\$ 2,153	\$ (1,258)	\$ 895	\$ (895)	\$ -
Facilities	589	(104)	485	(485)	-
Total restructuring	\$ 2,742	\$ (1,362)	\$ 1,380	\$ (1,380)	\$ -

The following unaudited condensed combined pro forma information for the year ended December 31, 2006, gives effect to the acquisition of Protect Data as if the acquisition had occurred on January 1, 2006. For the purposes of the pro forma information, the Company has assumed that, net income for the period presented excludes the write-off of acquired IPR&D of \$ 17,000 and includes amortization of intangible assets related to the acquisition of \$ 33,000 per year, stock-based compensation charges for unvested options assumed of \$ 835 in 2006 and related tax effects.

F - 25

# CHECK POINT SOFTWARE TECHNOLOGIES LTD. AND ITS SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share amounts)

### NOTE 3: - ACQUISITIONS (Cont.)

	Year ended December 31, 2006
	Unaudited
Revenues	\$ 653,484
Net income	\$ 269,264
Basic earnings per share	\$ 1.14
Diluted earnings per share	\$ 1.13

The acquisition did not have a material effect on pro forma financial data for the period from January 1, 2007 to January 16, 2007.

- b. In December 2006, the Company acquired NFR Security, Inc. (the Minor acquisition ) a leader in real-time threat prevention for \$ 14,558 in cash and \$ 334 in related acquisition costs. The purchase price was allocated to tangible and intangible assets acquired and liabilities assumed based on their respective fair values. As part of the allocation, \$ 7,820 was allocated to goodwill and \$ 8,920 was allocated to amortizable intangible assets (technology, customer relationships and trademarks) that are being amortized over their estimated useful lives of one to four years. During 2007, the Company recorded additional goodwill of \$ 1,552 as a result of a change in assumptions related to deferred taxes. At the acquisition date, the Company recorded a \$ 1,060 charge for acquired in-process research and development ( IPR&D ) in conjunction with projects which have not yet reached technological feasibility and which have no alternative future use. The results of the aforementioned acquisition are included with

# Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

that of the Company for the period subsequent to the acquisition date. Significant liabilities assumed included loans from banks and bridge loans from investors in a total amount of approximately \$ 1,833 that were settled by December 31, 2006 and accounts payable and other accrued expenses in a total amount of approximately \$ 3,043.

The acquisition did not have a material effect on pro forma financial data.

- (\*) The structured notes include inverse floating interest rate bonds. Inverse floating interest rate bonds are bonds where the coupon varies inversely with changes in specified interest rates or indices (for example, LIBOR). The effective maturity dates may differ from the contractual maturities because debtors have the right to call the obligations without penalties.

Debtors will likely exercise call options when forward markets rates are below the interest rate range of the structured note. In 2007, structured notes balance was classified according to its contractual maturity dates. Interest rates decreased during 2007, mainly towards the end of the year. This trend led some of the debtors to exercise their call option. A total amount of \$47,000 in structured notes were called and settled during December 31, 2007. During 2008, interest rates continue to decrease. This led some of the debtors to exercise their call option. As a result, in 2008, structured notes balance was classified according to their next call date. A total amount of \$ 103,000 in structured notes were called and settled during 2008. An additional amount of \$ 20,000 in structured notes were called and settled after December 31, 2008.

F - 28

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

U.S. dollars in thousands (except share and per share amounts)

**NOTE 4: - MARKETABLE SECURITIES (Cont.)**

- (\*\*) The effective maturity may differ from the contractual maturities, because debtors may have the right to call or prepay obligations without penalties. Therefore the mortgage and asset backed securities balance was classified according to its next forecasted prepayment date.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

(\*\*\*) The balance is comprised of four auction rate securities, which suffer from failed auctions since September 2007. As a result of the auction failures these auction rate securities do not have a readily determinable market value. In 2008, for determining the fair values of these securities, the Company obtained a third party valuation (see Note 5).

(\*\*\*\*) Less than \$ 1.

The Company reviews various factors in determining whether it should recognize an impairment charge for its marketable securities, including its intent and ability to hold the investment for a period of time sufficient for any anticipated recovery in market value, the length of time and extent to which the fair value has been less than its cost basis, the credit ratings of the securities, the nature of underlying collateral, as applicable and the financial condition and near-term prospects of the issuer. Based on the Company's consideration of these factors, the Company recognized in 2008 an other-than-temporary impairment in a total amount of \$ 11,221 pretax, out of which \$ 6,290 pretax is related to auction rate securities. The remaining impairment of \$ 4,931 relates to corporate obligations of U.S Companies with the original principal amounting to \$ 7,998. The Company may recognize additional losses in the future should the market prospects of the issuers of these securities continue to deteriorate.

As of December 31, 2007 and 2008, interest receivable amounted to \$ 9,372 and \$ 11,371, respectively, and is included within other current assets in the balance sheets.

### NOTE 5: - FAIR VALUE MEASUREMENTS

In accordance with SFAS 157, the Company measures its cash equivalents, short-term deposits, marketable securities, auction rate securities, severance pay fund and foreign currency derivative contracts at fair value. Cash equivalents, short-term deposits, marketable securities, except investments in auction rate securities and severance pay fund are classified within Level 1 or Level 2. This is because these assets are valued using quoted market prices or alternative pricing sources and models utilizing market observable inputs. Foreign currency derivative contracts are classified within Level 2 as the valuation inputs are based on quoted prices and market observable data of similar instruments. Investments in auction rate securities are classified within Level 3 because they are valued using valuation techniques. Some of the inputs to these models are unobservable in the market and are significant.

The Company values the Level 3 investments based on an externally developed valuation using discounted cash flow model, whose inputs include interest rate curves, credit spreads, bond prices, volatilities and illiquidity considerations. Unobservable inputs used in these models are significant to the fair value of the investments.

## NOTE 10: COMMITMENTS AND CONTINGENT LIABILITIES

## a. Lease commitments

The facilities of the Company are rented under operating lease agreements that expire between 2009 and 2014. Certain of these agreements have free rent payment provisions. We recognize rent expense under such arrangements on a straight-line basis. The Company leases vehicles under standard commercial operating leases.

Aggregate minimum lease commitments under non-cancelable operating leases as of December 31, 2008, were as follows:

2009	\$ 4,640
2010	3,392
2011	2,218
2012	1,088
2013	231
2014 and thereafter	86
	<u>\$ 11,655</u>

Rent expenses for the years ended December 31, 2006, 2007 and 2008, were \$ 7,752, \$ 8,295 and \$ 7,307, respectively.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share amounts)

**NOTE 10: COMMITMENTS AND CONTINGENT LIABILITIES (Cont.)****b. Litigation:**

Following audits of the Company's 2002 and 2003 corporate tax returns, the Israeli Tax Authority (the "ITA") issued orders challenging the Company's positions on several issues including matters such as the usage of funds earned by its approved enterprise for investments outside of Israel, deductibility of employee's stock options expenses, percentage of foreign ownership of its shares, taxation of interest earned outside of Israel and deductibility of research and development expenses. The largest amount in dispute relates to the treatment of investment income on cash that is held and managed by the Company's wholly-owned Singapore subsidiary, which the ITA is seeking to tax in Israel. In an additional challenge to this amount, the ITA reclassified the transfer of funds from the Company to its subsidiary in Singapore as a dividend for purposes of the Law for the Encouragement of Capital Investments, which would result in tax on the funds transferred. The ITA orders also contest the Company's positions on various other issues. The ITA therefore demanded the payment of additional taxes in the aggregate amount of NIS 963 million with respect to 2002 (assessment received on Dec 27, 2007) and NIS 151 million with respect to 2003 (assessment received on May 29, 2008), in each case including interest as of the assessment date. The Company has appealed the orders relating to both years with the Tel-Aviv District Court, and these appeals are pending. There can be no assurance that the ITA will accept the Company's positions on these matters or others and, in such an event, the Company may record additional tax expenses if these matters are settled for amounts in excess of our current provisions.

The Company has also been named as a defendant in a lawsuit filed by Information Protection and Authentication of Texas, LLC in the Eastern District of Texas on December 30, 2008. The plaintiff's original complaint in the lawsuit alleges infringement by the Company of U.S. patents nos. 5,311,591 and 5,412,717 and seeks an injunction and an unspecified amount of damages. The Company currently intends to vigorously defend against plaintiff's claims, but there can be no assurance of the outcome of this litigation.

The Company is currently engaged in various legal disputes with two minority shareholders of the Company's subsidiary SofaWare Technologies Ltd., One shareholder alleges the Company is oppressing him as minority shareholder and is seeking to compel the Company to purchase his shares which he estimates at NIS 16 million which is subject to change. The other minority shareholder claims that minority shareholders, himself included, are entitled to exercise veto rights with respect to certain actions of SofaWare. The same shareholder also filed a derivative claim against the Company on behalf of SofaWare. On February 14, 2008, the court partially accepted these claims and ordered that the Company pay SofaWare NIS 13 million plus interest. The Company has appealed this ruling. The Company's management believes that the claims filed by these two minority shareholders are without merit and intends to contest these claims vigorously.

Further, the Company is the defendant in various lawsuits, including employment-related litigation claims, lease termination claims, patent infringement and other legal proceedings in the normal course of its business. The resolution of these matters is not expected to have a significant effect on the Company's financial position, results of operations or cash flows.

---

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**U.S. dollars in thousands (except share and per share amounts)**
**NOTE 11: TAXES ON INCOME**

- a. The Company adopted the provisions of FIN 48 on January 1, 2007. The adoption of FIN 48 did not result in a change to the Company retained earning. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	2007	2008
	<hr/>	<hr/>
Beginning balance	\$ 70,501	\$ 78,545
Additions for prior year tax positions	21,366	18,736

# Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

	2007	2008
Additions for current year tax position	-	3,949
Reductions for prior year tax positions	(13,322)	-
Ending balance	\$ 78,545	\$ 101,230

As of December 31, 2008, the entire amount of the unrecognized tax benefits could affect our income tax provision and the effective tax rate.

In accordance with the Company's accounting policy, both before and after adoption of FIN 48, interest expense and penalties related to income taxes are included in the tax expense line of its consolidated statements of operations.

During the years ended December 31, 2007 and 2008, the Company recorded \$ 3,400 and \$ 5,904, respectively for interest expense related to uncertain tax positions. As of December 31, 2007 and 2008, the Company had accrued interest liability related to uncertain tax positions in the amounts of \$ 9,600 and \$ 15,504, respectively which is included within income tax accrual on the balance sheet.

Domestically, the Israeli Tax Authorities ( ITA ) are currently examining income tax returns of the Company for years 2002 and 2003. The ITA disagreed with several of the Company's positions as it pertains to the treatment of taxes (see Note 10b). The Company's Israeli income tax returns have been examined for all years prior to fiscal 2002, and the Company is no longer subject to audit for those periods.

The Company's U.S. subsidiaries file income tax return in the U.S. federal jurisdiction, and various states. All the Company's tax years are subject to examination by the U.S. federal and most U.S. state tax authorities due to the Company's Net Operating Loss and overall credit carry-forward position.

The Company believes that it has adequately provided for any reasonably foreseeable outcomes related to tax audits and settlement. The final tax outcome of its tax audits could be different from that which is reflected in the Company's income tax provisions and accruals. Such differences could have a material effect on the Company's income tax provision and net income in the period in which such determination is made.

F - 35

## CHECK POINT SOFTWARE TECHNOLOGIES LTD. AND ITS SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share amounts)

#### NOTE 11: TAXES ON INCOME (Cont.)

##### b. Israeli taxation:

##### 1. Corporate tax structure:

Taxable income of Israeli companies is subject to tax at the rate of 31% in 2006, 29% in 2007, 27% in 2008, 26% in 2009 and 25% in 2010 and thereafter.

##### 2. Tax benefits under the Law for the Encouragement of Capital Investments, 1959 (the Law):

Check Point Ltd. is entitled to tax benefits under the Law. Certain production and development facilities of Check Point Ltd. have been granted Approved Enterprise status pursuant to the Law, which provides certain tax benefits to its

investment programs.

A company that obtained an Approved Enterprise approval may elect to forego the entitlement to grants and apply for an alternative package of tax benefits (the Alternative Package). Under the Alternative Package, undistributed income from the Approved Enterprise operations is fully tax exempt (the tax holiday) for a defined period.

On April 1, 2005, an amendment to the Law came into effect (the Amendment) and has significantly changed the provisions of the Law (the Old Law). Generally, investment programs of Check Point Ltd. that have already obtained approval for an Approved Enterprise by the Israeli Investment Center will continue to be subject to the Old Law's provisions. On the Alternative Package the Amendment enacted major changes in the manner in which tax benefits are awarded under the Law so that companies are no longer required to obtain Investment Center approval in order to qualify for tax benefits. Such an enterprise is a Privileged Enterprise, rather than the previous terminology of Approved Enterprise. The period of tax benefits for a new Privileged Enterprise commences in the Year of Commencement. This year is the later of: (1) the year in which taxable income is first generated by the company, or (2) the Year of Election. If a company requested the Alternative Package of benefits for an Approved Enterprise under the Law, it was precluded from filing a Privileged Enterprise status for three years after the year in which the Approved Enterprise was activated (Cooling Period). In November 2008 the law was amended to shorten the Cooling Period to two years. Following the amendment, the Year of Election for the Company's first Privileged Enterprise is 2006.

Check Point Ltd. has been granted the status of Approved Enterprises, under the Law, in six investment programs (the Programs). Out of the Programs, the Company's benefit period related to its first and second investment programs ended, therefore the Company's income attributed to these investment programs is not entitled to tax benefits. For all of such Approved Enterprises, the Company has elected the Alternative Package.

As of December 31, 2008 Check Point Ltd. has elected the status of Privileged Enterprise, under the Amendment, for its seventh and eighth plans.

The tax benefits attributable to the Company's current Approved and Privileged Enterprises are scheduled to expire in phases by 2017.

F - 36

---

---

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**U.S. dollars in thousands (except share and per share amounts)**

**NOTE 11: TAXES ON INCOME (Cont.)**

The benefits available to an Approved Enterprise and a Privileged Enterprise relate only to taxable income attributable to the specific investment program and are conditioned upon terms stipulated in the Investment Law and the related regulations and the criteria set forth in the applicable certificate of approval (for an Approved Enterprise). If the Company does not fulfill these conditions, in whole or in part, the benefits can be cancelled and the Company may be required to refund the amount of the benefits, linked to the Israeli consumer price index plus interest.

The Company's income attributed to the Approved Enterprise and Privileged Enterprise under the alternative package is tax exempt for a period of two years and is subject to a reduced corporate tax rate of 10% - 25% for an additional period of five to eight years, based on the percentage of foreign investment.

In the event of distribution of dividends from the above mentioned tax-exempt income, the amount distributed will be subject to the same reduced corporate tax rate that would have been applied to the Approved Enterprise's and Privileged Enterprise's income.

The amendment to the Investment Law treats repurchase of shares out of Privileged Enterprise tax exempt income as deem-dividend. Through December 31, 2008, the Company repurchased 65,775,732 of its Ordinary shares in a total

amount of \$ 1,366,305. The Company's retained earnings attributed to taxable income are higher than the total shares repurchased and therefore should not trigger a deemed-dividend event. For further information about the Company's repurchase program refer to Note 12e.

Out of the Company's retained earnings as of December 31, 2008, \$ 756,263 are tax-exempt attributable to its Approved Enterprise programs. If such tax-exempt income is distributed in a manner other than upon complete liquidation of the Company, it would be taxed at the reduced corporate tax rate applicable to such profits (between 20%-25%), and an income tax liability of up to \$ 172,745 would be incurred as of December 31, 2008.

In addition, as a result of the amendment, tax-exempt income attributed to Privileged Enterprise, will subject the Company to taxes upon distribution in any manner including complete liquidation. As of December 31, 2008, the Company has \$ 297,676 tax-exempt income attributed to its Privileged Enterprise plan. In case of distribution or complete liquidation of the Company, it would be taxed at the reduced corporate tax rate of 20% and an income tax liability of up to \$ 59,535 would be incurred as of December 31, 2008.

The Company's board of directors has determined that it will not distribute any amounts of its undistributed tax-exempt income as dividend. The Company intends to reinvest its tax-exempt income and not to distribute such income as a dividend. Accordingly, no deferred income taxes have been provided on income attributable to the Company's Approved Enterprise and Privileged Enterprise programs as the undistributed tax exempt income is essentially permanent by reinvestment.

Income from sources other than the Approved and Privileged Enterprise programs is subject to tax at regular Israeli corporate tax rate.

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**U.S. dollars in thousands (except share and per share amounts)**

**NOTE 11: TAXES ON INCOME (Cont.)**

3. Foreign Exchange Regulations:

Under the Foreign Exchange Regulations the Israeli company is calculating its tax liability in US Dollars according to certain orders. The tax liability, as calculated in US Dollars is translated into NIS according to the exchange rate as of December 31st of each year.

4. Tax benefits under the Law for the Encouragement of Industry (Taxes), 1969:

The Company qualifies as an Industrial Company within the meaning of the Law for the Encouragement of Industry (Taxes), 1969 (the Industrial Encouragement Law). The Industrial Encouragement Law defines an Industrial Company as a company that is resident in Israel and that derives at least 90% of its income in any tax year, other than income from defense loans, capital gains, interest and dividends, from an enterprise whose major activity in a given tax year is industrial production. Under the Industrial Encouragement Law the Company is entitled to amortization of the cost of purchased know-how and patents over an eight-year period for tax purposes as well as accelerated depreciation rates on equipment and buildings.

Eligibility for the benefits under the Industry Encouragement Law is not subject to receipt of prior approval from any governmental authority.

c. Income taxes on non-Israeli subsidiaries:

Non-Israeli subsidiaries are taxed according to the tax laws in their respective country of residence.

Israeli income taxes and foreign withholding taxes were not provided for undistributed earnings of the Company's foreign subsidiaries. The Company's board of directors has determined that the Company will not distribute any amounts of its undistributed earnings as dividend. The Company intends to reinvest these earnings indefinitely in their foreign subsidiaries. Accordingly, no deferred income taxes have been provided. If these earnings were distributed to Israel in the form of dividends or otherwise, the Company would be subject to additional Israeli income taxes (subject to an adjustment for foreign tax credits) and foreign withholding taxes.

F - 39

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**U.S. dollars in thousands (except share and per share amounts)**

**NOTE 11: TAXES ON INCOME (Cont.)**

The subsidiaries in the U.S. have provided valuation allowance in respect of deferred tax assets resulting from carry forwards of net operating loss and research and development tax credit. SFAS No. 123(R) prohibits recognition of a deferred income tax asset for excess tax benefits due to stock option exercises that have not yet been realized through a reduction in income tax payable. All net operating loss carry-forwards relate to excess tax deductions from stock options which have not yet been realized. Such unrecognized deferred tax benefits will be accounted for as a credit to additional paid-in-capital, if and when realized. The Company has recorded a valuation allowance for the research and development credit carry-forwards due to uncertainties about whether it will be able to utilize these assets before they expire. The net change in the valuation allowance was \$ 10,019, which primarily relates to stock option benefits and were accounted for as a credit to additional paid-in-capital.

Through December 31, 2008, the U.S. subsidiaries had a U.S. federal loss carryforward of approximately \$ 683,000 resulting from tax benefits related to employees stock option exercises that can be carried forward and offset against taxable income up to 20 years, expiring before 2025. Excess tax benefits related to employee stock option exercises for which no compensation expense was recognized will be credited to additional paid-in capital when realized. Through December 31, 2008, the U.S. subsidiaries had a U.S. state net loss carryforward of approximately \$687,000, which expire between fiscal 2009 and fiscal 2024, and are subject to limitations on their utilization. Through December 31, 2008, the U.S. subsidiaries had research and development tax credits of approximately \$ 7,574, which expire between fiscal 2010 and fiscal 2027 and are subject to limitations on their utilization.

- e. Income before taxes on income is comprised of the following:

(\*\*) less than 1%

#### h. Measurement of income tax in foreign subsidiaries:

Results of the Company's subsidiary for tax purposes are measured and reflected in terms of earnings in SEK. As explained in Note 2b, the financial statements are measured in U.S. dollars. The difference between the annual changes in the SEK/dollar exchange rate causes a further difference between taxable income and the income before taxes shown in the financial statements. In accordance with paragraph 9(f) of SFAS No. 109, the Company's subsidiary has not provided deferred income taxes on the difference between the reporting currency and the tax bases of assets and liabilities.

F - 42

### CHECK POINT SOFTWARE TECHNOLOGIES LTD. AND ITS SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share amounts)

#### NOTE 12: SHAREHOLDERS' EQUITY

##### a. General:

Ordinary shares confer upon their holders the right to receive notice to participate and vote in general meetings of the Company, and the right to receive dividends if declared.

Dividends declared on Ordinary shares will be paid in NIS. Dividends paid to shareholders outside Israel will be converted into U.S. dollars, on the basis of the exchange rate prevailing at the date of payment. The Company's board of directors has determined that it will not distribute any amounts of its undistributed tax exempt income as dividend.

b. Deferred share:

The Deferred share is not entitled to any rights other than the right to receive its nominal value upon liquidation of the Company.

c. Employee Stock Purchase Plan ( ESPP ):

The Company reserved a total of 6,000,000 Ordinary shares for issuance under the ESPP. Eligible employees use up to 15% of their salaries to purchase Ordinary shares but no more than 1,250 shares per participant on any purchase date. The ESPP is implemented through an offering every six months. The price of an Ordinary share purchased under the ESPP is equal to 85% of the lower of the fair market value of the Ordinary share on the subscription date of each offering period or on the purchase date.

During 2006, 2007 and 2008 employees purchased 360,289, 389,367 and 474,550 Ordinary shares at average prices of \$ 16.08, \$ 16.73 and \$ 18.29 per share, respectively.

As of December 31, 2008, 3,017,143 Ordinary shares were available for future issuance under the ESPP.

In accordance with SFAS No. 123(R), the ESPP is compensatory and as such results in recognition of compensation cost. For the years ended December 31, 2006, 2007 and 2008, the Company recognized \$1,481, \$ 1,666 and \$ 2,770, respectively of compensation expense in connection with the ESPP.

d. Stock options:

In 2005, the Company adopted two new equity incentive plans: the 2005 United States Equity Incentive Plan, which is referred to as the 2005 U.S. Plan, and the 2005 Israel Equity Incentive Plan, which is referred to as the 2005 Israel Plan. Both of these plans will be in effect until 2015. Following ratification of the new plans by its shareholders in September 2005, the Company stopped issuing stock options under the plans approved in 1996.

F - 43

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**U.S. dollars in thousands (except share and per share amounts)**

**NOTE 12: SHAREHOLDERS EQUITY (Cont.)**

Under the Company's 2005 equity incentive plans (the 2005 Plans), options are granted to employees, officers and directors at an exercise price equal to at least the fair market value at the date of grant and are granted for periods not to exceed seven years. Options granted under the 2005 Plans generally vest over a period of four to five years of employment. Any options that are cancelled or forfeited before expiration become available for future grants. The Company can also issue a variety of other equity incentives under the 2005 Plans. In addition to granting stock options, since 2006, the Company started to routinely grant Restricted Stock Units ( RSUs ) under the 2005 Plans. RSUs vest over a four year period of employment and may be subject to performance criteria. RSUs that are cancelled or forfeited become available for future grants.

Under the 2005 Plans, the Company's non-employee directors receive an automatic annual option grant.

## Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

In connection with its acquisition of Protect Data in January 2007, the Company assumed all of the outstanding stock options under the Pointsec mobile technologies inc. 2003, 2005 and 2006 Stock Option Plans (the "Pointsec Plan"), which were converted into options to purchase 751,769 shares of the Company's Ordinary shares. These stock options generally have terms of between five and six years and generally vest over a three-year period. Options that are cancelled or forfeited before expiration do not become available for future grant.

Under the terms of the 2005 Plans, options to purchase 50,000,000 Ordinary shares were reserved for issuance (increasing by 5,000,000 Ordinary shares on January 1 of each year beginning January 1, 2006), out of which as of December 31, 2008, 54,044,511 Ordinary shares were available for future grant under the 2005 Plans. As of December 31, 2008, 8,568,051 options and RSUs were outstanding under the 2005 Plans, 14,135,650 options were outstanding under the plans approved in 1996 72,408 were outstanding under the Zone Labs plan and 203,622 were outstanding under the Pointsec Plan.

A summary of the Company's stock option activity and related information, including options under the Zone Labs 1998 Stock Option Plan assumed by the Company (in connection with the Zona Labs acquisition in 2004) and Pointsec plans, is as follows:

	Options (in thousands)			Weighted average exercise price		
	2006	2007	2008	2006	2007	2008
Outstanding at beginning of year	30,251	24,606	24,156	\$ 22.03	\$ 23.17	\$ 22.02
Granted	2,861	2,927	1,900	\$ 17.19	\$ 21.29	\$ 23.21
Exercised	(4,270)	(1,339)	(1,713)	\$ 10.74	\$ 13.82	\$ 16.41
Expired	(466)	(1,043)	(1,761)	\$ 17.56	\$ 53.17	\$ 41.89
Forfeited	(3,770)	(995)	(1,000)	\$ 24.28	\$ 26.76	\$ 21.45
Outstanding as of December 31,	24,606	24,156	21,582(*)	\$ 23.17	\$ 22.02	\$ 20.97
Exercisable as of December 31,	13,954	15,074	14,629	\$ 25.15	\$ 22.32	\$ 20.47

\*) As of December 31, 2008, approximately 20.5 million options were outstanding and expected to vest. Options expected to vest reflect an estimated forfeiture rate for purposes of determining related compensation expense.

Forfeited	(2,761)	N/A
Outstanding as of December 31,	21,582	\$ ***) 25,790
Exercisable as of December 31,	14,629	\$ ***) 22,150

\*\*) Represents intrinsic value of 8,909 thousand outstanding options that are in-the-money as of December 31, 2008. The remaining 12,673 thousand outstanding options are out of the money as of December 31, 2008 and their intrinsic value was considered as zero.

\*\*\*) Represents intrinsic value of 7,306 thousand exercisable options that are in-the-money as of December 31, 2008. The remaining 7,323 thousand exercisable options are out of the money as of December 31, 2008 and their intrinsic value was considered as zero.

The following table summarizes information relating to RSUs, as well as changes to such awards during 2006, 2007 and 2008:

	Year ended December 31,		
	2006	2007	2008
	Number (in thousands)		
Outstanding at beginning of year	-	980	1,232
Granted	*) 1,037	593	676
Vested	-	(174)	(245)
Forfeited	(57)	(167)	(265)
Outstanding as of December 31,	980	1,232	1,398

\*) Includes 441 thousand RSUs granted in exchange for options as described in section f below.

The weighted average fair values at grant date of RSUs granted for the years ended December 31, 2006, 2007 and 2008 were \$18.83 \$ 23.79 and \$ 22.25, respectively.

# Edgar Filing: CHECK POINT SOFTWARE TECHNOLOGIES LTD - Form 20-F

The options outstanding as of December 31, 2008, have been separated into ranges of exercise price, as follows:

Exercise price	Outstanding			Exercisable		
	Number outstanding (in thousands)	Weighted average remaining contractual life (years)	Weighted average exercise price	Number exercisable (in thousands)	Weighted average remaining contractual life (years)	Weighted average exercise price
\$			\$			\$
1.66-9.99	105	2.64	6.09	102	2.65	6.01
10.00-13.99	1,982	0.49	13.01	1,855	0.50	13.01
14.00-15.99	9	1.25	15.43	9	1.25	15.43
16.00-17.99	6,771	2.55	17.14	5,324	2.29	17.17
18.00-19.99	211	3.40	19.28	160	3.28	19.36
20.00-23.99	7,770	4.35	22.88	4,220	3.94	22.83
24.00-26.99	4,275	3.64	26.17	2,500	2.49	26.99
27.00-40.99	382	0.14	27.61	382	0.14	27.61
41.00-44.99	9	0.04	44.42	9	0.04	44.42
45-79.79	68	1.57	79.79	68	1.57	79.79
1.66-79.79	21,582	3.19	20.97	14,629	2.52	20.47

The weighted average fair values at grant date of options granted for the years ended December 31, 2006, 2007 and 2008, with an exercise price equal to the market value at the date of grant were \$ 9.71, \$ 11.92 and \$ 9.61, respectively. The weighted average fair values at grant date of options assumed in Protect Data's acquisition with an exercise price lower than the market value at the date of grant was \$ 12.64.

As of December 31, 2008, the Company had approximately \$ 62,447 of unrecognized compensation expense related to non-vested stock options and non-vested restricted stock awards, expected to be recognized over four years.

- e. The Company's board of directors approved five programs to repurchase Ordinary shares for a total of \$ 1,600,000. The first program was announced on October 28, 2003, and ended on August 24, 2004, and authorized the repurchase of up to \$ 200,000 of its Ordinary shares. The second program was announced on October 28, 2004, and ended on May 31, 2005, and authorized the repurchase of up to \$ 200,000 of its Ordinary shares. The third program was announced on July 25, 2005, and ended on May 18, 2006, and authorized the repurchase of up to \$ 200,000 of its Ordinary shares. The fourth program was announced on May 22, 2006, and ended on March 5, 2008, and authorized the repurchase of up to \$ 600,000 of its Ordinary shares. The fifth program was announced on March 26, 2008, and as of December 31, 2008 is still in effect, and authorizes the repurchase of up to \$ 400,000 of its Ordinary shares. Under the repurchase programs, share purchases may be made from time to time depending on market conditions, share price, trading volume and other factors and will be funded from available working capital.

**CHECK POINT SOFTWARE TECHNOLOGIES LTD.  
AND ITS SUBSIDIARIES**

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share amounts)

**NOTE 12: SHAREHOLDERS EQUITY (Cont.)**

The repurchase programs have no time limit and may be suspended from time to time or discontinued. Under the above programs, the Company repurchased during 2006, 2007 and 2008 approximately 23.2, 9.02 and 10.9 million shares, respectively, at a total cost of \$ 435,491, \$ 209,757 and \$ 239,542, respectively. The average purchase price per share during 2006, 2007 and 2008 was \$ 18.71, \$ 23.26 and \$ 21.95, respectively. Such purchases of Ordinary shares are accounted for as treasury stock and result in a reduction of shareholders' equity. As of December 31, 2008, there is approximately \$ 233,700 remaining out of the \$400,000 authorized under the share repurchase program in 2008.

Through December 31 2008, the Company reissued 14,639,642 of its repurchased Ordinary shares in consideration for the exercise of stock options and restricted shares by employees and for shares issued under the ESPP.

- f. In September 2006, the Company offered holders of certain outstanding options granted on or after January 1, 2004, under the equity incentive plans, whether vested or not, the opportunity to exchange their options for RSUs under the 2005 Plans. The number of RSUs granted was determined by dividing the option value, which was determined on September 12, 2006, by the market value of Check Point's ordinary share on this date.

The option value on September 12, 2006 was determined using Black-Scholes-Merton option pricing model, based on a number of factors, including: the market value of the Ordinary shares underlying the option on September 12, 2006, option exercise price, current market volatility, expected life of the option, and short-term (risk free) interest rate.

Upon completion of the exchange offer in October 2006, the Company issued 441,114 RSUs in exchange for outstanding options to purchase 1,759,160 of its Ordinary shares. The RSUs vest over a four year period starting on October 23, 2006, as follows: 20% vest in years one and two, and 30% vest in years three and four.

The Company accounted for the offer as a modification in accordance with SFAS No. 123 (R) and as such calculated the fair value before and after the modification, which resulted in no incremental compensation cost on the modification date. The unrecognized compensation cost remaining from the original options, is recognized over the service period of the modified award (RSUs) using the straight line method.
