Investment Strategy Change

Effective June 18, 2009, the Adviser revised the investment strategy that it uses to manage the Fund's portfolio by allowing the Fund to invest in common stocks of all companies that are ranked 1, 2 or 3 by the Value Line Timeliness™ Ranking System as compared to investing in the 100 stocks ranked 1 and the top 100 stocks ranked 2.

The paragraph under the caption "What are the Fund's main investment strategies?" in the prospectus is deleted in its entirety and replaced with the following:

To achieve the Fund's investment objectives, the Adviser invests substantially all of the Fund's net assets in common stocks. In selecting securities for purchase or sale, the Adviser relies on the Value Line Timeliness™ Ranking System (the "Ranking System"), which compares an estimate of the probable market performance of each stock during the next six to twelve months to that of all of the approximately 1,700 stocks under review and ranks stocks on a scale of 1 (highest) to 5 (lowest). All the stocks followed by the Ranking System are listed on U.S. stock exchanges or traded in the U.S. over-the-counter markets. The Fund's investments principally are selected from common stocks ranked 1, 2 or 3 by the Ranking System at the time of purchase. Subject to the diversification requirements of the Investment Company Act of 1940 (which generally means that it will not invest more than 5% of its total assets in the stocks of any one company), the Fund is not subject to any limit on the percentage of its assets that may be invested in any particular stock. The Adviser will determine the percentage of the Fund's assets invested in each stock based on the stock's relative attractiveness. Because the Adviser relies on the Ranking System in managing the Fund's portfolio, the Fund is not limited to investments according to a company's size.

The fourth paragraph under the caption "Principal investment strategies" in the prospectus is deleted in its entirety and replaced with the following:

The Ranking System does not eliminate market risk, but the Adviser believes that it provides objective standards for determining expected relative performance over the next six to twelve months. All the stocks followed by the Ranking System are listed on U.S. stock exchanges or traded in the U.S. over-the-counter markets. The Fund's investments principally are selected from common stocks ranked 1, 2 or 3 by the Ranking System at the time of purchase. Subject to the diversification requirements of the Investment Company Act of 1940 (which generally means that it will not invest more than 5% of its total assets in the stocks of any one company), the Fund is not subject to any limit on the percentage of its assets that may be invested in any particular stock. The Adviser will determine the percentage of the Fund's assets invested in each stock based on the stock's relative attractiveness. Because the Adviser relies on the Ranking System in managing the Fund's portfolio, the Fund is not limited to investments according to a company's size.
