METHODE ELECTRONICS, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
(Dollar amounts in thousands, except share data)

January 28, 2012

1. BASIS OF PRESENTATION

Methode Electronics, Inc. was incorporated in 1946 as an Illinois corporation and reincorporated in Delaware in 1966. As used herein, "we," "us," "our," the "Company" or "Methode" means Methode Electronics, Inc. and its subsidiaries. Our business is managed and our financial results are reported on a segment basis, with those segments being Automotive, Interconnect, Power Products and Other. The condensed consolidated financial statements and related disclosures as of January 28, 2012 and results of operations for the three months and nine months ended January 28, 2012 and January 29, 2011 are unaudited, pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). The April 30, 2011 condensed consolidated balance sheet was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America ("U.S. GAAP"). Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to such rules and regulations. In our opinion, these financial statements include all adjustments (consisting only of normal recurring adjustments) necessary for the fair statement of the results for the interim periods. These financial statements should be read in conjunction with the financial statements included in our Form 10-K for the year ended April 30, 2011 filed with the SEC on June 30, 2011. Results may vary from quarter to quarter for reasons other than seasonality. Certain amounts from the fiscal 2011 condensed consolidated balance sheet have been reclassified for comparability to the fiscal 2012 condensed consolidated balance sheet.

2. RECENTLY ADOPTED AND ISSUED ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Pronouncements

In October 2009, the Financial Accounting Standards Board ("FASB"), issued Accounting Standards Update ("ASU"), 2009-13, "Revenue Recognition - Multiple-Deliverable Revenue Arrangements - a consensus of the FASB Emerging Issues Task Force," which amends FASB Accounting Standards Codification ("ASC") 605, "Revenue Recognition", by modifying the criteria used to separate elements in a multiple-element arrangement, introducing the concept of "best estimate of selling price" for determining the selling price of a deliverable, requiring use of the relative selling price method and prohibiting use of the residual method to allocate arrangement consideration among units of accounting, and expanding the disclosure requirements for all multiple-element arrangements within the scope of FASB ASC 605-25. The amended guidance is effective for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, which is our current fiscal year that began May 1, 2011. The adoption of this guidance did not have a material impact on our financial statements.

In December 2010, the FASB issued authoritative guidance regarding ASC No. 805, "Business Combinations," on the disclosure of supplementary pro forma information for business combinations. ASC No. 805 requires a public entity to disclose pro forma information for business combinations that occurred in the current reporting period. The disclosures include pro forma revenue and earnings of the combined entity for the current reporting period as though the acquisition date for all business combinations that occurred during the year had been as of the beginning of the annual reporting period.

If comparable financial statements are presented, the pro forma revenue and earnings of the combined entity for the comparable prior reporting period should be reported as though the acquisition date for all business combinations that occurred

during the current year had been as of the beginning of the comparable prior annual reporting period. This guidance specifies that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combinations that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. This guidance is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after May 1, 2011, the beginning of our 2012 fiscal year. The adoption of this guidance did not have a material impact on our financial statements.

Recently Issued Accounting Pronouncements

In May 2011, the FASB issued ASU 2011-04, "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards, ("IFRS")," which results in common fair value measurement and disclosure requirements in U.S. GAAP and IFRS. Consequently, the amendments change the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. ASU 2011-04 is effective for interim and annual periods beginning after December 15, 2011,

METHODE ELECTRONICS, INC. AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 (Dollar amounts in thousands, except share data)

which is our fiscal 2012 fourth quarter which began January 29, 2012. The adoption of this standard is not expected to have a material impact on our financial statements.

In June 2011, the FASB issued ASU No. 2011-05, "Comprehensive Income", which requires companies to present the components of net income and other comprehensive income either as one continuous statement or as two consecutive statements. It eliminates the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. We will adopt this pronouncement for our fiscal year 2013, beginning on April 29, 2012. The adoption of ASU No. 2011-05 is not expected to have a material impact on our financial statements.

In September 2011, the FASB issued ASU 2011-08, "Intangibles - Goodwill and Other." The objective of this standard is to simplify how entities test goodwill for impairment. This standard permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. The standard is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011, which will be our fiscal year 2013, beginning on April 29, 2012. The adoption of ASU 2011-08 is not expected to have a material impact on our financial statements.

3. COMPREHENSIVE INCOME/(LOSS)

The components of our comprehensive income/(loss) for the three months and nine months ended January 28, 2012 and January 29, 2011 include net income/(loss) and adjustments to stockholders' equity for foreign currency translations. The foreign currency translation adjustment was due to exchange rate fluctuations in our foreign affiliates' local currency versus the U.S. dollar.

The following table presents details of our comprehensive income/(loss):

	Three Months Ended January 28, 2012			Nine Months Ended January 28, 2012

4. GOODWILL AND INTANGIBLE ASSETS

We review our goodwill and other intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable, and we also review our goodwill and indefinite-lived assets annually in accordance with ASC No. 350, "Intangibles — Goodwill and Other". The values assigned to goodwill and intangible assets are normally based on estimates and judgments regarding expectations for the success and life cycle of products and technologies acquired. A severe decline in expectations could result in significant impairment charges, which could have a material adverse effect on our financial condition and results of operations.

The following tables present details of the Company's intangible assets:

	As of January 28, 2012			Wtd. Avg. Remaining Amortization Periods (Years)
	Gross	Accumulated Amortization	Net	
Customer relationships and agreements	\$14,995	\$13,653	\$1,342	11.9
Trade names, patents and technology licenses	25,774	10,064	15,710	12.0
Covenants not to compete	480	469	11	0.1
Total	\$41,249	\$24,186	\$17,063	

	As of April 30, 2011			Wtd. Avg. Remaining Amortization Periods (Years)
	Gross	Accumulated Amortization	Net	
Customer relationships and agreements	\$14,995	\$13,417	\$1,578	12.7
Trade names, patents and technology licenses	25,774	8,978	16,796	12.4
Covenants not to compete	480	431	49	0.8
Total	\$41,249	\$22,826	\$18,423	

The estimated aggregate amortization expense for the current fiscal year and each of the four succeeding fiscal years is as follows:

2012	\$1,804
2013	1,525
2014	1,481
2015	1,469
2016	1,317

As of January 28, 2012 and April 30, 2011, the trade names, patents and technology licenses include \$1,800 of trade names that are not subject to amortization.

5. INCOME TAXES

At January 28, 2012 and April 30, 2011, we had valuation allowances against our deferred tax assets of \$62,947 and \$54,015, respectively. In accordance with ASC No. 740, "Income Taxes," a valuation allowance is required to be recorded when it is more likely than not that deferred tax assets will not be realized. Future realization depends on the existence of sufficient taxable income within the carry-forward period available under the tax laws. Sources of future taxable income include future reversals of taxable temporary differences, future taxable income exclusive of reversing taxable differences, taxable income in carry-back years and tax planning strategies. These sources of positive evidence of realizability must be weighed against negative evidence, such as cumulative losses in recent years.

METHODE ELECTRONICS, INC. AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 (Dollar amounts in thousands, except share data)

In forming a judgment about the future realization of our deferred tax assets, we considered both the positive and negative evidence of realizability and gave significant weight to the negative evidence from our recent cumulative loss in the U.S. We will continue to assess this situation and make appropriate adjustments to the valuation allowance based on our evaluation of the positive and negative evidence existing at the time. We are currently unable to forecast when there will be sufficient positive evidence for us to reverse the valuation allowances that we have recorded.

The valuation allowance is associated with the deferred tax assets for the differences between book and tax that result from net operating losses (NOLs), foreign investment tax credits with unlimited carryovers generated in the current and prior years and temporary differences which become deductible when the related asset is recovered or related liability is settled.

A reconciliation of the consolidated provisions for income taxes to amounts determined by applying the prevailing statutory federal income tax rate to pre-tax earnings is as follows:

	Three Months Ended		Nine Months Ended	
	January 28, 2012	January 29, 2011	January 28, 2012	January 29, 2011
Income tax provision at statutory rate	\$696	\$1,504	\$2,114	\$3,241
Effect of:				
State income taxes, net of federal benefit	23	55	31	102
Foreign operations with lower statutory rates	(1,847)	(2,801)	(7,538)	(8,500)
Valuation allowance	2,787	2,305	8,094	8,286
Uncertain tax positions	3	(2,582)	(17)	(2,582)
Other, net	(482)	20	739	(636)
Income tax (benefit)/provision	\$1,180	\$(1,499)	\$3,423	\$(89)

We recognize interest and penalties accrued related to the unrecognized tax benefits in the provision for income taxes. During the nine months ended January 28, 2012, we recognized an expense of \$12 in interest and zero in penalties. We had approximately \$335 accrued at January 28, 2012 for the payment of interest and penalties. The total unrecognized tax benefit as of January 28, 2012 was \$338.

The following table presents a reconciliation of the beginning and ending amounts of unrecognized tax benefits:

Balance at April 30, 2011	\$375
Increases for positions related to the current year	—
Decreases for positions related to the prior years	—
Settlements	(37)
Lapsing of statutes of limitations	—
Balance at January 28, 2012	\$338

We believe that it is reasonably possible that the total amount of unrecognized tax benefits will change within the next twelve months. We have certain tax return years subject to statutes of limitation, which will close within twelve months of the end of the quarter. Unless challenged by tax authorities, the closure of those statutes of limitation is expected to result in the recognition of uncertain tax positions of approximately \$37.

The Company and all of its domestic subsidiaries file income tax returns in the U.S. federal jurisdiction and various states. Our foreign subsidiaries file income tax returns in certain foreign jurisdictions since they have operations

outside the U.S. The Company and its subsidiaries are generally no longer subject to U.S. federal, state and local examinations by tax authorities for all years except fiscal years 2011, 2010 and 2009.

6. COMMON STOCK AND STOCK-BASED COMPENSATION

The following table sets forth the changes in the number of issued shares of common stock during the nine-month periods presented:

	Nine Months Ended	
	January 28, 2012	January 29, 2011
Balance at the beginning of the period	38,312,243	38,149,946

Treasury stock adjustment	—	(30,000)
Balance at the end of the period	38,363,078	38,279,846

On July 29, 2011, October 28, 2011 and January 27, 2012, we paid a quarterly dividend of \$2,589, \$2,591 and \$2,592, respectively.

Stock Options Granted Under the 2010 Stock Plan

In July 2011, the Compensation Committee approved the grant of options to purchase 128,000 shares of our common stock to our executive officers. The stock options have a ten-year term and will vest 33.3% each year over a three-year period. The exercise price is the closing price on the date granted.

The following tables summarize the stock option activity and related information for the stock options granted under the 2010 Stock Plan for the nine months ended January 28, 2012:

	Summary of Option Activity	
	Shares	Wtd. Avg. Exercise Price
Outstanding at April 30, 2011	128,000	\$ 9.24
Granted	128,000	10.70
Exercised	—	—
Cancelled	—	—
Outstanding at January 28, 2012	256,000	\$ 9.97

Options Outstanding at January 28, 2012

Exercise Price	Shares	Avg. Remaining Life (Years)
\$9.24	128,000	8.7
\$10.70	128,000	9.5

Options Exercisable at January 28, 2012

Exercise Price	Shares	Avg. Remaining Life (Years)
\$9.24	42,667	8.7

The options outstanding had an intrinsic value of \$104 at January 28, 2012. The intrinsic value represents the total pre-tax intrinsic value (the difference between the Company's closing stock price on the last trading day of the third quarter of fiscal 2012 and the exercise price, multiplied by the number of in-the-money options) that would have been

received by the option holders had all option holders exercised their options on January 28, 2012.

METHODE ELECTRONICS, INC. AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
 (Dollar amounts in thousands, except share data)

We estimated the fair value of our employee stock options on the date of grant using the Black-Scholes option-pricing model with the following assumptions:

	Fiscal 2012	Fiscal 2011	
	Awards	Awards	
Average expected volatility	52.76	% 85.83	%
Average risk-free interest rate	0.63	% 0.60	%
Dividend yield	2.66	% 3.49	%
Expected life of options	7.03 years	7.03 years	
Weighted-average grant-date fair value	\$4.27	\$5.19	

We recognized pre-tax compensation expense for stock options granted under the 2010 Stock Plan of \$179 for the three months ended January 28, 2012 and \$86 for the three months ended January 29, 2011. We recognized pre-tax compensation expense for these options of \$429 for the nine months ended January 28, 2012 and \$114 for the nine months ended January 29, 2011. We record the compensation expense related to the stock options in the selling and administrative section of our condensed consolidated statements of operations.

Restricted Stock Awards and Restricted Stock Units Granted Under the 2010 Stock Plan

Our Compensation Committee awarded 100,000 shares of common stock subject to performance-based restricted stock awards ("RSAs") to certain non-executive members of management during the second quarter of fiscal 2012. The performance measure is the Company's internal enterprise value at the end of fiscal 2015. The internal enterprise value shall equal the product of (i) fiscal 2015 EBITDA and (ii) 7.5 (the historic multiple of EBITDA), subject to an adjustment for cash, short-term investments, debt, preferred stock, certain equity issuances, certain acquisitions and the changes in the dividend rate. The restricted stock awards will vest, i.e., the restrictions will lapse, one-third as of the end of fiscal 2015, one-third as of the end of fiscal 2016 and the final one-third as of the end of fiscal 2017, based on the enterprise value as of the end of fiscal 2015, to the extent the performance goals have been achieved and provided the employee remains employed. The remaining shares will be forfeited.

Our Compensation Committee awarded 640,000 shares of common stock subject to performance-based restricted stock awards to certain executive members of management during the third quarter of fiscal 2011. The performance measure will be the Company's internal enterprise value at the end of fiscal 2015. The internal enterprise value shall equal the product of (i) fiscal 2015 EBITDA and (ii) 7.5 (the historic multiple of EBITDA), subject to an adjustment for cash, short-term investments, debt, preferred stock, certain equity issuances, certain acquisitions and the changes in the dividend rate. The restricted stock awards will vest, i.e., the restrictions will lapse, at the end of the performance period to the extent the performance goals have been achieved. The remaining shares will be forfeited.

Our Compensation Committee awarded 320,000 shares of common stock subject to time-based restricted stock units, ("RSUs") to certain executive members of management during the third quarter of fiscal 2011. The restricted stock units will vest 20% each year on the last day of our fiscal year and be 100% vested on the last day of fiscal 2015 provided the executive remains employed.

The following table summarizes the RSA and RSU activity for the nine months ended January 28, 2012 for the RSA's and RSU's granted under the 2010 Stock Plan:

Weighted-average grant-date fair value	\$3.75	\$5.88	\$4.02	\$1.46

We recognized pre-tax compensation expense for stock options granted under the 2007 Stock Plan of \$355 and \$396 for the three months ended January 28, 2012 and January 29, 2011, respectively. In addition, we recognized pre-tax compensation expense for these options of \$630 and \$632 for the nine months ended January 28, 2012 and January 29, 2011, respectively. We record the compensation expense related to the stock options in the selling and administrative section of our condensed consolidated statement of operations.

Restricted Stock Awards Granted Under the 2007 Stock Plan

In April 2007, 225,000 shares of common stock subject to performance-based Restricted Stock Awards ("RSAs") granted to our CEO in fiscal 2006 and 2007 were converted to Restricted Stock Units (RSUs). The RSUs were subject to the same vesting schedule and other major provisions of the RSAs they replaced, except the shares for stock underlying the RSUs will not be issued and delivered until the earlier of: (1) thirty days after the CEO's date of termination of employment with the Company and all of its subsidiaries and affiliates; or (2) the last day of our fiscal year in which the payment of common stock in satisfaction of the RSUs becomes deductible to the Company under Section 162(m) of the Internal Revenue Code. The RSUs are not entitled to voting rights or the payment of dividends. The RSU's are fully vested as of January 28, 2012. As of January 28, 2012, no shares have been delivered pursuant to the RSUs.

At the beginning of fiscal 2012, there were no RSAs outstanding under the 2007 Stock Plan. During the first quarter of fiscal 2012, we awarded 28,860 restricted shares to our independent directors, all of which vested immediately upon grant.

There was no pre-tax compensation expense for RSAs issued under the 2007 Stock Plan for both the three months ended January 28, 2012 and January 29, 2011. We recognized pre-tax compensation expense for these RSAs of \$309 and \$298 for the nine months ended January 28, 2012 and January 29, 2011, respectively. We record the expense in the selling and administrative section of our condensed consolidated statement of operations.

Stock Options Granted Under the 2000 and 2004 Stock Plans

Options to purchase 259,537 shares of our common stock were granted in previous years under the 2000 and 2004 Stock Plans and are outstanding and exercisable as of January 28, 2012. There was no remaining compensation expense related to these options in the first nine months of fiscal 2012 and the first nine months of fiscal 2011.

7. NET INCOME PER SHARE

Basic net income per share is calculated by dividing net income by the weighted average number of common shares outstanding for the applicable period. Diluted net income per share is calculated after adjusting the denominator of the basic net income per share calculation for the effect of all potentially dilutive common shares outstanding during the period.

The following table sets forth the computation of basic and diluted net income per share:

	Three Months Ended		Nine Months Ended	
	January 28, 2012	January 29, 2011	January 28, 2012	January 29, 2011
Numerator - net income attributable to Methode Electronics, Inc.	\$809	5,883	2,615	9,435
Denominator:	—	—		
Denominator for basic net income per share-weighted average shares	37,309,890	37,144,021	37,299,029	37,087,538
Dilutive potential common shares	230,332	497,114	223,446	319,399
Denominator for diluted net income per share adjusted weighted average shares and assumed conversions	37,540,222	37,641,135	37,522,475	37,406,937
Net income per share:				
Basic and diluted	\$0.02	\$0.16	\$0.07	\$0.25

For the three months ended January 28, 2012, the nine months ended January 28, 2012 and the nine months ended January 29, 2011, options to purchase 962,662 shares, 834,412 shares and 394,842 shares, respectively, have been excluded in the computation of net income per share because the exercise price was greater than the average market price for that period, and therefore, would have been anti-dilutive.

8. SEGMENT INFORMATION

We are a global manufacturer of component and subsystem devices. We design, manufacture and market devices employing electrical, electronic, wireless, sensing and optical technologies. Our components are found in the primary end markets of the automotive, appliance, communications (including information processing and storage, networking equipment, wireless and terrestrial voice/data systems), aerospace, rail and other transportation industries; and the consumer and industrial equipment markets.

ASC No. 280, "Segment Reporting" ("ASC No. 280"), establishes annual and interim reporting standards for an enterprise's operating segments and related disclosures about its products, services, geographic areas and major customers. An operating segment is defined as a component of an enterprise that engages in business activities from which it may earn revenues and incur expenses, and about which separate financial information is regularly evaluated by the Chief Operating Decision Maker ("CODM") in deciding how to allocate resources. The CODM, as defined by ASC No. 280, is the Company's President and Chief Executive Officer.

The Automotive segment supplies electronic and electromechanical devices and related products to automobile OEMs, either directly or through their tiered suppliers, including control switches for electrical power and signals, connectors for electrical devices, integrated control components, switches and sensors that monitor the operation or status of a component or system, and packaging of electrical components.

The Interconnect segment provides a variety of copper and fiber-optic interconnect and interface solutions for the appliance, computer, networking, telecommunications, storage, medical, military, aerospace, commercial and consumer markets. Solutions include solid-state field effect interface panels, PC and express card packaging, optical and copper transceivers, terminators, custom cable assemblies and conductive polymer and thick film inks. Services include the design and installation of fiber optic and copper infrastructure systems, and the manufacture of active and passive optical components.

The Power Products segment manufactures current-carrying laminated bus devices, custom power-product assemblies, powder coated bus bars, braided flexible cables and high-current low voltage flexible power cabling systems that are used in various markets and applications, including telecommunications, computers, transportation, industrial and power conversion, insulated gate bipolar transistor solutions, aerospace and military.

The Other segment includes a designer and manufacturer of magnetic torque sensing products, and independent laboratories that provide services for qualification testing and certification, and analysis of electronic and optical components.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies in our Form 10-K for the fiscal year ended April 30, 2011. We allocate resources to segments based on operating income. Transfers between segments are recorded using internal transfer prices set by us. The following tables present information regarding our segments:

9. CONTINGENCIES

Certain litigation arising in the normal course of business is pending against us. We are from time to time subject to various legal actions and claims incidental to our business, including those arising out of alleged defects, breach of contracts, employment-related matters and environmental matters. We consider insurance coverage and third-party indemnification when determining required accruals for pending litigation and claims. Although the outcome of potential legal actions and claims cannot be determined, it is our opinion, based on the information available, that we have adequate reserves for these liabilities.

Delphi Related Litigation

On September 4, 2008, Methode and Delphi Automotive Systems LLC (“Delphi”) entered into a supply agreement pursuant to which Methode was to supply all of Delphi’s requirements for the seat bladders used in Delphi’s occupant restraint system from October 1, 2008 through September 30, 2011. On August 26, 2009, Delphi notified us that effective September 10, 2009, our supply arrangement was terminated. We are contesting Delphi’s right to terminate this long-term supply arrangement and the parties are engaged in litigation regarding this supply agreement and our related intellectual property.

In March 2010, DPH Holdings Corp., as successor to Delphi Corporation, served the Company with a complaint seeking to recover approximately \$19,726 in alleged preference payments that Delphi made to the Company within the 90-day preference period preceding Delphi's bankruptcy filing. The Company is seeking to dismiss the Delphi preference complaint based on violations of due process and the Company possesses several other substantive defenses.

10. PRE-PRODUCTION COSTS RELATED TO LONG-TERM SUPPLY ARRANGEMENTS

We incur pre-production tooling costs related to certain products produced for our customers under long-term supply agreements. We had \$18,357 and \$14,645 as of January 28, 2012 and April 30, 2011, respectively, of pre-production tooling costs related to customer-owned tools for which reimbursement is contractually guaranteed by the customer or for which the customer has provided a non-cancelable right to use the tooling. The unreimbursed costs incurred related to customer-owned tooling, for which we have the right to use, that are not subject to reimbursement are capitalized and depreciated over the expected life of the tooling or the life of the related vehicle program, whichever is shorter. Engineering, testing and other costs incurred in the design and development of production parts are expensed as incurred, unless the costs are reimbursable, as specified in a customer contract.

11. FAIR VALUE MEASUREMENTS

ASC No. 820, "Fair Value Measurements and Disclosures" defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants.

ASC No. 820 also specifies a fair value hierarchy based upon the observation of inputs in valuation techniques. Observable inputs (highest level) reflect market data obtained from independent sources, while unobservable inputs (lowest level) reflect internally developed market assumptions. In accordance with ASC No. 820, fair value measurements are classified under the following hierarchy:

- Level 1 — Quoted prices in active markets for identical assets and liabilities.
- Level 2 — Quoted prices in active markets for similar assets and liabilities, or other inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 — Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets and liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

Assets and liabilities recorded at fair value are valued using quoted market prices or under a market approach using other relevant information generated by market transactions involving identical or comparable instruments and included in a table below which summarizes the fair value of assets and liabilities as of January 28, 2012:

Recorded Value	Fair Value Measurement Used

Fair Value of Other Financial Instruments. The carrying values of our short-term financial instruments, including cash and cash equivalents, accounts receivable, accounts payable and short-term debt, approximate their fair values because of the short maturity of these instruments.

12. DEBT AND CREDIT AGREEMENT

On February 25, 2011, we entered into an Amended and Restated Credit Agreement with Bank of America, N.A., as administrative agent, and certain other financial institutions, which amends and restates our previous credit facility and extends the maturity to February 25, 2016. The new credit facility is in the aggregate principal amount of \$75,000, with an option to increase the principal amount by an additional \$25,000 subject to customary conditions and approval of the lender(s) providing new commitment(s). The new credit facility provides for variable rates of interest based on the type of borrowing and the Company's debt to EBITDA financial ratio. The Amended and Restated Credit Agreement is guaranteed by certain of our U.S. subsidiaries. At January 28, 2012, we were in compliance with the covenants of the agreement. During the first nine months of fiscal 2012, we had borrowings of \$39,500 and interest payments of \$205 for the three months ended January 28, 2012 and \$485 for the nine months ended January 28, 2012. As of January 28, 2012, there were outstanding balances due against the credit facility of \$39,500.

13. ACQUISITIONS

At the beginning of fiscal 2012, we had an investment in Eetrex of \$2,720, representing ownership of 70% of their stock. Eetrex is located in Boulder, Colorado and is a developer and manufacturer of chargers, inverters and battery systems for the transportation, telecommunications and computing industries. In July 2011 and October 2011, we paid an additional \$600 and \$480, respectively, and acquired an additional 20% of their stock, for a total 90% ownership. Each of the other stockholders of Eetrex will have the right to exercise put options, requiring us to purchase their remaining shares after the end of fiscal 2014 or 2016, and we will have an option to purchase any remaining shares after the end of fiscal 2016. The purchase price will be based on a percentage of net sales recorded in either fiscal 2014 or fiscal 2016 of between 2.0% and 2.5%. In accordance with ASC 480, "Distinguishing Liabilities from Equity," our non-controlling interest previously reported in equity has been reclassified to "mezzanine equity" as the ability to exercise the remaining 10% put option is now outside of our control. The calculated redemption amount is presently below the recorded carrying value and has therefore not been adjusted. Additionally, future adjustments to our non-controlling interest may affect earnings per share.

On September 9, 2011, we acquired certain assets and liabilities from Nypro Monterrey, S. de R.L. (Nypro Monterrey) from Nypro Inc. for \$6,353. We operate this injection molding and painting business under the name of Advanced Molding and Decoration, S.A. de C.V. (AMD), and it has become a part of our existing Monterrey manufacturing campus. AMD operates a state-of-the-art facility, which provides us with high-quality injection molding, painting and decorating capabilities. The AMD assets include 52 injection mold machines, three paint lines and several pad print machines. AMD continues production of injection-molded components for its current third party customers, whose contracts transferred to us along with the assets. In addition, 228 employees from Nypro Monterrey were transferred to us as part of the acquisition.

Based on a third-party valuation report, management determined that the business had a fair value of \$6,608, consisting primarily of fixed assets and inventory. We recorded a gain of \$255 in the second quarter of fiscal 2012 related to the transaction, in other income, which represents the amount paid for the assets, compared to the fair market value at the time of acquisition due to the distressed nature of the business. The accounts and transactions of AMD have been included in the Automotive segment in the consolidated financial statements from the effective date of the acquisition. The proforma impact of this acquisition as if it were made at the beginning of the earliest period

presented would not have had a material impact on the historical reported results of the Company.

Cautionary Statement

Certain statements in this report are forward-looking statements that are subject to certain risks and uncertainties. We undertake no duty to update any such forward-looking statements to conform to actual results or changes in our expectations. Our business is highly dependent upon two large automotive customers and specific makes and models of automobiles. Our results will be subject to many of the same risks that apply to the automotive, appliance, computer and telecommunications industries, such as general economic conditions, interest rates, consumer spending patterns and technological changes. Other factors which may have a material impact on results for future periods include the following risk factors. These risk factors should be considered in connection with evaluating the forward-looking statements contained in this report because these factors could cause our actual results and condition to differ materially from those projected in forward-looking statements. The forward-looking statements in this report are subject to the safe harbor protection provided under the securities laws and are made as of the date of this report.

- We depend on a small number of large customers, specifically two large automotive customers. If we were to lose either of these customers or experienced a significant decline in the volume of products purchased by these customers, or if either of these customers declare bankruptcy, our future results could be adversely affected.

• Because we derive a substantial portion of our revenues from customers in the automotive, appliance, computer and communications industries, we are susceptible to trends and factors affecting those industries.

• Downturns in the automotive industry or the bankruptcy of certain automotive customers could reduce the sales and profitability of our business.

• Our technology-based business and the markets in which we operate are highly competitive. If we are unable to compete effectively, our sales will decline.

• We face risks relating to our international operations, including political and economic instability, expropriation, or the imposition of government controls.

• We are dependent on the availability and price of materials.

• Disruption of our supply chain could have an adverse effect on our business, financial condition and results of operations.

• We may be unable to keep pace with rapid technological changes, which would adversely affect our business.

We have not, and may not experience comparable increases in our gross margins as our sales increase due to a variety of factors, including, without limitation of the following: 1.) changes in product mix; 2.) new program and product launch costs; 3.) increases in operating expenses; 4.) competitive pricing pressures; and 5.) decreases in volume.

• Products we manufacture may contain design or manufacturing defects that could result in reduced demand for our products or services and liability claims against us.

• If we are unable to protect our intellectual property or we infringe, or are alleged to infringe, on another person's intellectual property, our business, financial condition and operating results could be materially adversely affected.

• We are subject to continuing pressure to lower our prices.

We were awarded new North American automotive business in fiscal 2011 for programs that will not begin production until fiscal 2013. We anticipate that it will take a significant amount of our cash and resources to launch these programs.

We currently have a significant amount of our cash located outside the U.S. and we may suffer adverse tax consequences if we repatriate this cash.

A significant fluctuation between the U.S. dollar and other currencies could adversely impact our operating results.

Table of Contents

• We may acquire businesses or divest business operations. These transactions may pose significant risks and may materially adversely affect our business, financial condition and operating results.

• We could suffer significant business interruptions, which could adversely affect our sales and operating results.

The following factors may impact our income tax rate or impose additional liabilities: 1.) changes in the mix of earnings among countries with different tax rates; 2.) changes in our assessment of tax exposures; 3.) changes in the valuation of deferred tax assets and liabilities; 4.) changes in tax laws and 5.) expiration of uncertain tax positions.

• We cannot ensure that the newly acquired Eetrex and Advanced Molding and Decoration businesses will be successful or that we can implement and profit from any new applications of the acquired technology.

• The future trading price of our common stock could be subject to wide fluctuations in response to a variety of factors.

Any such forward-looking statements are not guarantees of future performance and actual results, developments and business decisions may differ materially from those foreseen in such forward-looking statements. These forward-looking statements speak only as of the date of the report, press release, statement, document, webcast or oral discussion in which they are made. We do not intend to update any forward-looking statements, all of which are expressly qualified by the foregoing. See Part I — Item 1A, Risk Factors of our Form 10-K for the fiscal year ended April 30, 2011, for a further discussion regarding some of the reasons that actual results may be materially different from those we anticipate.

Overview

We are a global manufacturer of component and subsystem devices with manufacturing, design and testing facilities in China, Germany, India, Lebanon, Malta, Mexico, the Philippines, Singapore, Switzerland, the United Kingdom and the United States. We are a global designer and manufacturer of electronic and electro-mechanical devices. We design, manufacture and market devices employing electrical, radio remote control, electronic, wireless, sensing and optical technologies. Our business is managed on a segment basis, with those segments being Automotive, Interconnect, Power Products and Other. For more information regarding the business and products of these segments, see "Item 1. Business." of our Form 10-K for the fiscal year ended April 30, 2011.

Our components are found in the primary end markets of the aerospace, appliance, automotive, construction, consumer and industrial equipment markets, communications (including information processing and storage, networking equipment, wireless and terrestrial voice/data systems), rail and other transportation industries.

Recent Transactions

In July 2011 and October 2011, we paid \$0.6 million and \$0.5 million, respectively for an additional 20% investment in Eetrex Incorporated to facilitate our expansion into the power electronics and battery system markets. We now have a 90% ownership in Eetrex. Eetrex is located in Boulder, Colorado and is a developer and manufacturer of chargers, inverters and battery systems for the transportation, telecommunications and computing industries.

In September 2011, we acquired certain assets and liabilities from Nypro Monterrey, S. de R.L. ("Nypro Monterrey") from Nypro Inc. for \$6.4 million. We operate this injection molding and painting business under the name of Advanced Molding and Decoration, S.A. de C.V. ("AMD"), and it has become a part of our existing Monterrey manufacturing campus. AMD operates a state-of-the-art facility, which provides us with high-quality injection molding, painting and decorating capabilities. The AMD assets include 52 injection mold machines, three paint lines and several pad print machines. AMD continues production of injection-molded components for its current third party

customers, whose contracts transferred to us along with the assets. In addition, 228 employees from Nypro Monterrey were transferred to us as part of the acquisition.

Net Sales. Consolidated net sales increased \$9.9 million, or 9.7%, to \$112.0 million for the three months ended January 28, 2012, from \$102.1 million for the three months ended January 29, 2011. The Automotive segment net sales increased \$12.7 million, or 23.9%, to \$65.9 million for the third quarter of fiscal 2012, from \$53.2 million for the third quarter of fiscal 2011. The Interconnect segment net sales decreased \$3.3 million, or 10.1%, to \$29.3 million for the third quarter of fiscal 2012, compared to \$32.6 million for the third quarter of fiscal 2011. The Power Products segment net sales were flat at \$13.0 million for both the third quarter of fiscal 2012 and fiscal 2011. The Other segment net sales increased \$0.6 million, or 18.2%, to \$3.9 million for the third quarter of fiscal 2012, as compared to \$3.3 million for the third quarter of fiscal 2011. Translation of foreign operations net sales for the three months ended January 28, 2012 decreased reported net sales by \$0.1 million or 0.1% due to average currency rates in the third quarter of fiscal 2012, compared to the average currency rates in the third quarter of fiscal 2011.

Cost of Products Sold. Consolidated cost of products sold increased \$10.0 million, or 12.1%, to \$92.7 million for the three months ended January 28, 2012, compared to \$82.7 million for the three months ended January 29, 2011. Consolidated cost of products sold as a percentage of sales were 82.8% for the third quarter of fiscal 2012, compared

to 81.0% for the third quarter of fiscal 2011. The Automotive segment experienced costs for design, development, engineering and launch costs of \$1.3 million related to new programs that will not begin production until the later part of fiscal 2013 and costs of \$1.8 million related to a vendor's production and delivery issues, compared to \$1.3 million in the third quarter of fiscal 2011. The Interconnect segment experienced slightly higher costs in the third quarter of fiscal 2012, compared to the third quarter of fiscal

Table of Contents

2011, due to lower sales volumes in white goods and optical product lines. The Power Products segment experienced increased cost of products sold as a percentage of sales primarily due to unfavorable product mix in our North American cabling business.

Gross Margins. Consolidated gross margins decreased \$0.1 million, or 0.5%, to \$19.3 million for the three months ended January 28, 2012, as compared to \$19.4 million for the three months ended January 29, 2011. Gross margins as a percentage of net sales were 17.2% for the three months ended January 28, 2012, compared to 19.0% for the three months ended January 29, 2011. Gross margins as a percentage of sales decreased primarily due to new program and product launch costs in the Automotive segment. Gross margins were also negatively impacted by increased sales of automotive product that has higher material cost due to the current high percentage of purchased content. Gross margins as a percentage of sales also decreased due to lower sales volumes in the Interconnect segment and unfavorable product mix in the Power Products segment.

Selling and Administrative Expenses. Selling and administrative expenses increased by \$1.3 million, or 8.4%, to \$16.8 million for the three months ended January 28, 2012, compared to \$15.5 million for the three months ended January 29, 2011. The third quarter of fiscal 2011 includes a reversal of expense of \$1.7 million for litigation relating to unsecured claims sold to Blue Angel LLC, related to the Delphi bankruptcy. Legal expenses decreased \$0.8 million, to \$0.9 million for the third quarter of fiscal 2012, compared to \$1.7 million for the third quarter of fiscal 2011, primarily due to lower Delphi litigation expenses. Selling and administrative expenses increased in the third quarter of fiscal 2012 due to the AMD and Eetrex acquisitions. Selling and administrative expenses as a percentage of net sales decreased to 15.0% for the three months ended January 28, 2012 from 15.2% for the three months ended January 29, 2011.

Interest (Income)/Expense, Net. Interest (income)/expense, net was income of \$0.1 million for the three months ended January 28, 2012, compared to an expense of \$0.1 million for the three months ended January 29, 2011.

Other (Income)/Expense, Net. Other (income)/expense, net decreased \$1.1 million to an expense of \$0.6 million for the three months ended January 28, 2012, as compared to income of \$0.5 million for the three months ended January 29, 2011. All amounts for both periods relate to expenses for currency rate fluctuations. The functional currencies of these operations are the British pound, Chinese yuan, Euro, Indian Rupee, Mexican peso, Singapore dollar and Swiss Franc. Some foreign operations have transactions denominated in currencies other than their functional currencies, primarily sales in U.S. dollars and Euros, creating exchange rate sensitivities.

Income Tax (Benefit)/Expense. Income tax (benefit)/expense decreased by \$2.7 million, to an expense of \$1.2 million for the three months ended January 28, 2012, compared to a benefit of \$1.5 million for the three months ended January 29, 2011. The income tax expense for the third quarter of fiscal 2012 relates to income taxes on foreign profits. The amounts for the third quarter of fiscal 2011 includes a benefit of \$2.8 million related to the expiration of uncertain tax positions and interest from prior periods, as well as income tax expense of \$1.5 million for taxes on foreign taxes.

Net Income Attributable to Methode Electronics, Inc. Net income attributable to Methode Electronics, Inc. decreased \$5.1 million, to \$0.8 million for the three months ended January 28, 2012, compared to \$5.9 million for the three months ended January 29, 2011. The decrease is primarily due to higher costs related to new product development, the absence of expense reversal for the Blue Angel matter, higher currency translation expense, higher net income taxes and higher selling and administrative expenses due to new acquisitions, partially offset with higher sales volumes and lower legal expenses.

Net Sales. Automotive segment net sales increased \$12.7 million, or 23.9%, to \$65.9 million for the three months ended January 28, 2012, from \$53.2 million for the three months ended January 29, 2011. Net sales increased in North America, Europe and Asia by 118.2%, 2.9% and 9.7%, respectively. The increase in North America is primarily due to increased sales for our Ford Center Console Program and our transmission lead-frame assembly, which represented 57.6% of the increase and the remaining increase relates to the newly acquired AMD business acquired in September 2011. The increase in Asia is due to increases in our steering angle sensor products and the increase in Europe is primarily due to currency rate fluctuations. Translation of foreign operations net sales for the three months ended January 28, 2012 decreased reported net sales by \$0.2 million, or 0.3%, due to average currency rates in the third quarter of fiscal 2012, compared to the average currency rates in the third quarter of fiscal 2011.

Cost of Products Sold. Automotive segment cost of products sold increased \$13.5 million, or 30.5%, to \$57.7 million for the three months ended January 28, 2012, from \$44.2 million for the three months ended January 29, 2011. The Automotive segment cost of products sold as a percentage of sales were 87.6% in the third quarter of fiscal 2012, compared to 83.1% in the third quarter of fiscal 2011. During the third quarter of fiscal 2012, our North American operations experienced additional costs for design, development, engineering and product launches of \$1.3 million related to new programs that will not begin production until the later part of fiscal 2013, as well as costs of \$1.8 million related to a vendor's production and delivery issues, compared to \$1.3 million in the third quarter of fiscal 2011. The increase in costs of products sold as a percentage of sales was also affected by increased sales of product that has a higher material cost due to the current high percentage of purchased content during the third quarter of fiscal 2012.

Gross Margins. Automotive segment gross margins decreased \$0.8 million, or 8.9%, to \$8.2 million for the three months ended January 28, 2012, as compared to \$9.0 million for the three months ended January 29, 2011. The

Automotive segment gross margins as a percentage of net sales were 12.4% for the three months ended January 28, 2012, as compared to 16.9% for the three months ended January 29, 2011. Gross margins as a percentage of sales decreased due to design, development, engineering and launch costs related to new programs and new product launches, as well as increased costs related to a vendor's production and delivery issues. In addition, gross margins were negatively impacted in the third quarter of fiscal 2012 due to increased sales of product that has higher material cost due to the current high percentage of purchased content.

Selling and Administrative Expenses. Selling and administrative expenses increased \$2.8 million, or 66.7%, to \$7.0 million for the three months ended January 28, 2012, compared to \$4.2 million for the three months ended January 29, 2011. The third quarter of fiscal 2011 includes a reversal of expense of \$1.7 million for litigation relating to unsecured claims sold to Blue Angel LLC, related to the Delphi bankruptcy. Legal expenses related to the Delphi litigation decreased \$0.7 million, to \$0.5 million for the third quarter of fiscal 2012, compared to \$1.2 million for the third quarter of fiscal 2011. The third quarter of fiscal 2012 includes \$0.4 million of selling and administrative expenses related to the AMD acquisition. In addition, selling and marketing expenses increased in our North American operations primarily due to new product development efforts and increased costs in our Asian automotive business due to higher expatriate salaries in the third quarter of fiscal 2012, compared to the third quarter of fiscal 2011. Selling and administrative expenses as a percentage of net sales were 10.6% for the three months ended January 28, 2012 and 7.9% for the three months ended January 29, 2011.

Income from Operations. Automotive segment income from operations decreased \$3.6 million, to \$1.2 million for the three months ended January 28, 2012, compared to \$4.8 million for the three months ended January 29, 2011 due to increased expenses related to new programs and new product launches, costs related to a vendor's production and delivery issues, absence of expense reversal for the Blue Angel matter, higher expatriate salary costs and selling and administrative expenses related to a new acquisition, partially offset by higher sales volumes and lower Delphi legal expenses.

Interconnect Segment Results

Below is a table summarizing results for the three months ended:
(in millions)

	January 28, 2012	January 29, 2011	Net Change	Net Change
Net sales	\$29.3	\$32.6	\$(3.3)	(10.1)%

Income from operations	14.0	% 12.6	%	

Net Sales. Interconnect segment net sales decreased \$3.3 million, or 10.1%, to \$29.3 million for the three months ended January 28, 2012, from \$32.6 million for the three months ended January 29, 2011. Net sales decreased 3.0% in North America primarily due to weaker sales for white goods and radio remote control products, partially offset by stronger sales for our data solutions products. Net sales in Europe decreased 36.0% primarily due to no optical sales in the third quarter of fiscal 2012, due to the sale of the optical business in the fourth quarter of fiscal 2011, partially

offset by higher sales for remote control devices. Net sales in Asia were flat in the third quarter of fiscal 2012, compared to the third quarter of fiscal 2011.

Cost of Products Sold. Interconnect segment cost of products sold decreased \$2.2 million, or 9.4%, to \$21.1 million for the three months ended January 28, 2012, compared to \$23.3 million for the three months ended January 29, 2011. Interconnect segment cost of products sold as a percentage of net sales increased to 72.0% for the three months ended January 28, 2012, compared to 71.5% for the three months ended January 29, 2011. The slight increase in cost of products sold as a percentage of sales is primarily due to lower sales volumes for both white goods and optical products.

Table of Contents

Gross Margins. Interconnect segment gross margins decreased \$1.1 million, or 11.8%, to \$8.2 million for the three months ended January 28, 2012, compared to \$9.3 million for the three months ended January 29, 2011. Gross margins as a percentage of net sales decreased to 28.0% for the three months ended January 28, 2012, from 28.5% for the three months ended January 29, 2011. The slight decrease in gross margins is primarily due to lower sales volumes for both white goods and optical products.

Selling and Administrative Expenses. Selling and administrative expenses decreased \$1.1 million, or 21.2%, to \$4.1 million for the three months ended January 28, 2012, compared to \$5.2 million for the three months ended January 29, 2011. The decrease is primarily due to businesses that were divested in fiscal 2011, as well as lower salary and bonus expenses in our sensor business. Selling and administrative expenses as a percentage of net sales decreased to 14.0% for the three months ended January 28, 2012, from 16.0% for the three months ended January 29, 2011.

Income from Operations. Interconnect segment income from operations was flat at \$4.1 million for both the three months ended January 28, 2012 and January 29, 2011, primarily due to lower sales volumes of white goods and interface solutions products, offset with lower selling and administrative expenses.

Power Products Segment Results

Net Sales. Power Products segment net sales were flat at \$13.0 million for both the three months ended January 28, 2012 and the three months ended January 29, 2011. Net sales decreased by 2.4% in North America, which was driven by lower demand for our flexible cabling products, partially offset by higher demand for our busbar and heat sink products. Sales in Europe increased by 58.1% due to higher demand for busbar products.

Cost of Products Sold. Power Products segment cost of products sold increased \$0.6 million, or 5.9%, to \$10.8 million for the three months ended January 28, 2012, compared to \$10.2 million for the three months ended

January 29, 2011. The Power Products segment cost of products sold as a percentage of sales increased to 83.1% for the three months ended January 28, 2012, from 78.5% for the three months ended January 29, 2011. The increase in cost of products sold as a percentage of sales is primarily due to unfavorable product mix for our North American cabling business.

Table of Contents

Gross Margins. Power Products segment gross margins decreased \$0.6 million, or 21.4%, to \$2.2 million for the three months ended January 28, 2012, compared to \$2.8 million for the three months ended January 29, 2011. Gross margins as a percentage of net sales decreased to 16.9% for the three months ended January 28, 2012 from 21.5% for the three months ended January 29, 2011. The decrease in gross margins as a percentage of sales is primarily due to unfavorable product mix from our North American cabling business.

Selling and Administrative Expenses. Selling and administrative expenses decreased \$0.3 million, or 16.7%, to \$1.5 million for the three months ended January 28, 2012, compared to \$1.8 million for the three months ended January 29, 2011. Selling and administrative expenses decreased due to lower legal and professional fees as well as bonus expenses. Selling and administrative expenses as a percentage of net sales decreased to 11.5% for the three months ended January 28, 2012 from 13.8% for the three months ended January 29, 2011.

Income From Operations. Power Products segment income from operations decreased \$0.3 million, or 30.0%, to \$0.7 million for the three months ended January 28, 2012, compared to \$1.0 million for the three months ended January 29, 2011, due to unfavorable product mix, partially offset with lower selling and administrative expenses.

Other Segment Results

Net Sales. The Other segment net sales increased \$0.6 million, or 18.2%, to \$3.9 million for the three months ended January 28, 2012, compared to \$3.3 million for the three months ended January 29, 2011. Net sales from our torque-sensing business increased 14.8% in the third quarter of fiscal 2012, compared to the third quarter of fiscal 2011. Net sales from our testing facilities increased 13.4% in the third quarter of fiscal 2012, compared to the third quarter of fiscal 2011.

Cost of Products Sold. Other segment cost of products sold decreased \$0.5 million to \$2.7 million for the three months ended January 28, 2012, compared to \$3.2 million for the three months ended January 29, 2011. Cost of

products sold as a percentage of sales decreased to 69.2% in the third quarter of fiscal 2012, compared to 97.0% in the third quarter of fiscal 2011. The decrease in cost of products sold as a percentage of sales is primarily due to favorable product mix from our torque-sensing business as well as higher sales from our testing facilities.

Gross Margins. The Other segment gross margins increased \$1.1 million, to \$1.2 million for the three months ended January 28, 2012, compared to \$0.1 million for the three months ended January 29, 2011. The increase in gross margins as a

percentage of sales is primarily due to higher sales from our torque-sensing business and testing facilities as well as favorable product mix from our torque-sensing business.

Selling and Administrative Expenses. Selling and administrative expenses were flat at \$0.7 million both for the three months ended January 28, 2012 and January 29, 2011. Selling and administrative expenses as a percentage of net sales decreased to 17.9% for the three months ended January 28, 2012, from 21.2% for the three months ended January 29, 2011.

Income/(Loss) From Operations The Other segment income/(loss) from operations improved \$1.1 million to income of \$0.5 million for the three months ended January 28, 2012, compared to a loss of \$0.6 million for the three months ended January 29, 2011. The increase was primarily due to increased sales from our testing facilities and favorable product mix from our torque-sensing business.

nine months of fiscal 2012, compared to \$9.4 million for the first nine months of fiscal 2011. Translation of foreign operations net sales for the nine months ended January 28, 2012 increased reported net sales by \$3.5 million or 1.0% due to average currency rates in the first nine months of fiscal 2012, compared to the average currency rates in the first nine months of fiscal 2011.

Cost of Products Sold. Consolidated cost of products sold increased \$33.1 million, or 13.5%, to \$278.6 million for the nine months ended January 28, 2012, compared to \$245.5 million for the nine months ended January 29, 2011. Consolidated cost of products sold as a percentage of sales were 82.3% for the first nine months of fiscal 2012, compared to 79.5% for the first nine months of fiscal 2011. The Automotive segment experienced costs for design, development, engineering and launch costs of \$2.9 million related to new programs that will not begin production until the later part of fiscal 2013 and costs of \$3.1 million related to a vendor's production and delivery issues, compared to \$2.0 million in the nine months ended January 29, 2011. The Power Products segment experienced costs of \$1.8 million for new product development for the nine months ended January 28, 2012, compared to \$1.5 million for the nine months ended January 29, 2011, specifically for an on board charger for an electric truck. The nine months ended January 29, 2011 includes a charge of \$1.3 million for negotiated program termination costs for certain products manufactured in our Malta automotive facility, as well as an inventory and equipment charge of \$0.4 million, relating to the customer cancellation of certain products manufactured in the U.S. in our Power Products segment.

Gross Margins. Consolidated gross margins decreased \$3.2 million, or 5.1%, to \$60.1 million for the nine months ended January 28, 2012, as compared to \$63.3 million for the nine months ended January 29, 2011. Gross margins as a percentage of net sales were 17.7% for the nine months ended January 28, 2012, compared to 20.5% for the nine months ended January 29, 2011. Gross margins as a percentage of sales decreased due to new program and product launch costs and costs related to a vendor's production and delivery issues. In addition, gross margins were negatively impacted by increased sales of automotive product that has higher material cost due to the current high percentage of purchased content. Gross margins were negatively impacted in the nine months ended January 29, 2011 for negotiated program termination costs for certain products as well as costs associated with the customer cancellation of certain products.

Selling and Administrative Expenses. Selling and administrative expenses increased by \$0.5 million, or 0.9%, to \$53.7 million for the nine months ended January 28, 2012, compared to \$53.2 million for the nine months ended January 29, 2011. During the nine months ended January 29, 2011, we recorded an expense of \$2.1 million for litigation regarding unsecured claims sold to Blue Angel LLC, related to the Delphi bankruptcy. Stock award amortization expense increased by \$1.2 million, to \$3.1 million for the nine months ended January 28, 2012, compared with \$1.9 million for the nine months ended January 29, 2011. Selling and administrative expenses increased \$0.8 million in the nine months ended January 28, 2012 due to the acquisitions of Eetrex and AMD. In addition, selling and administrative expenses increased by \$0.9 million for the nine months ended January 28, 2012 due to additional support staff needed for the development of products not expected to begin production until the later part of fiscal 2013. Legal expenses decreased \$0.6 million, to \$4.5 million for the first nine months of fiscal 2012, compared to \$5.1 million for the first nine months of fiscal 2011, primarily due to lower Delphi litigation expenses, partially offset with legal expenses related to the AMD acquisition. The first nine months of fiscal 2011 includes income of \$0.5 million received for grants at one of our Malta facility. Selling and administrative expenses as a percentage of net sales decreased to 15.9% for the nine months ended January 28, 2012 from 17.2% for the nine months ended January 29, 2011.

Interest (Income)/Expense, Net. Interest (income)/expense, net was income of \$0.2 million for the first nine months of fiscal 2012, compared to an expense of \$0.2 million for the first nine months of fiscal 2011.

Other Expense, Net. Other expense, net increased \$0.1 million, or 14.3%, to \$0.8 million for the nine months ended January 28, 2012, as compared to \$0.7 million for the nine months ended January 29, 2011. Other income included

income of \$0.1 million and \$1.2 million for the nine months ended January 28, 2012 and January 29, 2011, respectively, related to life insurance policies in connection with an employee deferred compensation plan. The nine months ended January 28, 2012 includes a gain of \$0.3 million related to the acquisition of AMD. All other amounts for both periods relate to expenses for currency rate fluctuations. The functional currencies of these operations are the British pound, Chinese yuan, Euro, Indian Rupee, Mexican peso, Singapore dollar and Swiss Franc. Some foreign operations have transactions denominated in currencies other than their functional currencies, primarily sales in U.S. dollars and Euros, creating exchange rate sensitivities.

Income Tax (Benefit)/Expense. Income tax (benefit)/expense increased by \$3.5 million to an expense of \$3.4 million for the nine months ended January 28, 2012, compared to a benefit of \$0.1 million for the nine months ended January 29, 2011. The income tax expense for the first nine months of fiscal 2012 relates to income taxes on foreign profits of \$3.3 million and \$0.9 million for foreign taxes on a foreign dividend. In addition, the first nine months of fiscal 2012 includes a benefit of \$1.1 million related to tax credits from our Malta facility. The first nine months of fiscal 2011 includes a benefit of \$2.8 million related to the expiration of uncertain tax positions and interest from prior periods, partially offset by income taxes on foreign profits of \$2.5 million.

Net Income Attributable to Methode Electronics, Inc. Net income attributable to Methode Electronics, Inc. decreased \$6.8 million, to \$2.6 million for the nine months ended January 28, 2012, compared to \$9.4 million for the nine months ended January 29, 2011. The decrease is primarily due to higher expenses for new product development and product launches, stock award amortization expense, costs related to a vendor's production and delivery issues, higher tax expense, higher selling and administrative expenses due to acquisitions, the absence of a grant from our Malta facility and lower life insurance proceeds, partially offset by higher sales, lower legal expenses and the absence of expense for Blue Angel claims and the absence of negotiated cancellation costs and inventory charge.

Net Sales. Automotive segment net sales increased \$37.1 million, or 23.3%, to \$196.1 million for the nine months ended January 28, 2012, from \$159.0 million for the nine months ended January 29, 2011. Net sales increased in North America, Europe and Asia by 111.3%, 9.3% and 10.9%, respectively. The increase in North America is primarily due to increased sales for our Ford Center Console Program and transmission lead-frame assembly as well as the AMD business acquired in September 2011. The increase in Asia is due to increases in our transmission lead-frame and steering angle sensor products and the increase in Europe is primarily due to currency fluctuations. Translation of foreign operations net sales for the nine months ended January 28, 2012 increased reported net sales by

\$3.4 million, or 1.7%, due to average currency rates in the first nine months of fiscal 2012, compared to the average currency rates in the first nine months of fiscal 2011.

Cost of Products Sold. Automotive segment cost of products sold increased \$38.6 million, or 29.8%, to \$168.3 million for the nine months ended January 28, 2012, from \$129.7 million for the nine months ended January 29, 2011. The Automotive segment cost of products sold as a percentage of sales were 85.8% in the first nine months of fiscal 2012, compared to 81.6% in the first nine months of fiscal 2011. During the first nine months of fiscal 2012, our North American operations experienced additional costs for design, development, engineering and product launches of \$2.9 million related to new programs that will

not begin production until the later part of fiscal 2013, as well as costs of \$3.1 million related to a vendor's production and delivery issues, compared to \$2.0 million in the first nine months of fiscal 2011. The increase in costs of products sold as a percentage of sales was also affected by increased sales of product that has a higher material cost due to the current high percentage of purchased content. The first nine months of fiscal 2011 includes a charge of \$1.3 million for negotiated program termination costs for certain products manufactured in our Malta facility.

Gross Margins. Automotive segment gross margins decreased \$1.5 million, or 5.1%, to \$27.8 million for the nine months ended January 28, 2012, as compared to \$29.3 million for the nine months ended January 29, 2011. The Automotive segment gross margins as a percentage of net sales were 14.2% for the nine months ended January 28, 2012, as compared to 18.4% for the nine months ended January 29, 2011. Gross margins as a percentage of sales decreased in the first nine months of fiscal 2012, compared to the first nine months of fiscal 2011, due to design, development, engineering and launch costs related to new programs and new product launches, as well as increased costs related to a vendor's production and delivery issues. In addition, gross margins were negatively impacted in the first nine months of fiscal 2012 by increased sales of product that has higher material cost due to the current high percentage of purchased content. The gross margins for the first nine months of fiscal 2011 were negatively impacted by the negotiated program termination costs.

Selling and Administrative Expenses. Selling and administrative expenses increased \$1.1 million, or 5.5%, to \$21.1 million for the nine months ended January 28, 2012, compared to \$20.0 million for the nine months ended January 29, 2011. During the nine months ended January 29, 2011, we recorded an expense of \$2.1 million for litigation regarding unsecured claims sold to Blue Angel LLC, related to the Delphi bankruptcy. Selling and administrative expenses increased \$0.6 million in the nine months ended January 28, 2012 due to the acquisition of AMD. In addition, selling and administrative expenses increased by \$0.9 million for the nine months ended January 28, 2012 due to additional support staff needed for the development of products not expected to begin production until the later part of fiscal 2013. Legal expenses decreased \$0.6 million, to \$4.5 million for the first nine months of fiscal 2012, compared to \$5.1 million for the first nine months of fiscal 2011, primarily due to lower Delphi litigation expenses, partially offset with legal expenses related to the AMD acquisition. Net Sales. Interconnect segment net sales decreased \$10.7 million, or 10.3%, to \$93.2 million for the nine months ended January 28, 2012, from \$103.9 million for the nine months ended January 29, 2011. Net sales decreased 11.1% in North America primarily due to weak sales for white goods and interface solutions products, partially offset by stronger sales for data and remote control devices. Net sales in Europe decreased 16.0% primarily due to no optical sales in the first six months of fiscal 2012, due to the sale of the optical business in the fourth quarter of fiscal 2011, partially offset by higher sales for data and remote control devices. Net sales in Asia increased 5.2% primarily due to higher sales of remote control devices.

Cost of Products Sold. Interconnect segment cost of products sold decreased \$6.1 million, or 8.3%, to \$67.7 million for the nine months ended January 28, 2012, compared to \$73.8 million for the nine months ended January 29, 2011. Interconnect segment cost of products sold as a percentage of net sales increased to 72.6% for the nine months ended January 28, 2012, compared to 71.0% for the nine months ended January 29, 2011. The increase in cost of products sold as a percentage of sales is primarily due to lower sales volumes for white goods and interface solutions products.

Gross Margins. Interconnect segment gross margins decreased \$4.6 million, or 15.3%, to \$25.5 million for the nine months ended January 28, 2012, compared to \$30.1 million for the nine months ended January 29, 2011. Gross margins as a percentage of net sales decreased to 27.4% for the nine months ended January 28, 2012, from 29.0% for the nine months ended January 29, 2011. The decrease in gross margins as a percentage of net sales primarily relates to lower sales volumes for white goods and interface solutions products.

Selling and Administrative Expenses. Selling and administrative expenses decreased \$2.7 million, or 16.8%, to \$13.4 million for the nine months ended January 28, 2012, compared to \$16.1 million for the nine months ended January 29, 2011. Selling and administrative expenses decreased due to no selling and administrative expenses for our optical business, as well as lower salary and bonus expenses for our sensor business. Selling and administrative expenses as a

percentage of net sales decreased to 14.4% for the nine months ended January 28, 2012, from 15.5% for the nine months ended January 29, 2011.

Income from Operations. Interconnect segment income from operations decreased \$1.9 million, or 13.6%, to \$12.1 million for the nine months ended January 28, 2012, compared to \$14.0 million for the nine months ended January 29, 2011 primarily due to lower sales of white goods products, partially offset with lower other selling and administrative expenses.

Net Sales. Power Products segment net sales increased \$3.1 million, or 8.5%, to \$39.6 million for the nine months ended January 28, 2012, compared to \$36.5 million for the nine months ended January 29, 2011. Net sales increased by 8.7% in North America, by 7.8% in Asia and by 2.6% in Europe. The increase in North America was driven by higher demand for our busbar and heat sink products, partially offset by lower demand for our flexible cabling products. The increase in Asia and Europe was due to higher demand for our busbar products.

Cost of Products Sold. Power Products segment cost of products sold increased \$3.6 million, or 12.4%, to \$32.6 million for the nine months ended January 28, 2012, compared to \$29.0 million for the nine months ended January 29, 2011. The Power Products segment cost of products sold as a percentage of sales increased to 82.3% for the nine months ended January 28, 2012, from 79.5% for the nine months ended January 29, 2011. The increase in cost of products sold as a percentage of sales is primarily due to unfavorable product mix for our North American cabling business, as well as increased costs for product development for an electric truck in North America. The product development costs were \$1.8 million for the nine months ended January 28, 2012, compared to \$1.5 million for the nine months ended January 29, 2011. The first nine months of fiscal 2011 includes an inventory and equipment write-down charge of \$0.4 million relating to a customer cancellation of certain products manufactured in our U.S. facility.

Gross Margins. Power Products segment gross margins decreased \$0.5 million, or 6.7%, to \$7.0 million for the nine months ended January 28, 2012, compared to \$7.5 million for the nine months ended January 29, 2011. Gross margins as a percentage of net sales decreased to 17.7% for the nine months ended January 28, 2012 from 20.5% for the nine months ended January 29, 2011. The decrease in gross margins as a percentage of sales is primarily due to unfavorable product mix from our North American cabling business, as well as increased costs for product development in North America.

Selling and Administrative Expenses. Selling and administrative expenses increased \$0.4 million, or 8.3%, to \$5.2 million for the nine months ended January 28, 2012, compared to \$4.8 million for the nine months ended January 29, 2011. Selling and administrative expenses increased due to new product development in North America as well as selling and administrative expenses related to the newly acquired Eetrex business. Selling and administrative expenses as a percentage of net sales decreased slightly to 13.1% for the nine months ended January 28, 2012 from 13.2% for the nine months ended January 29, 2011.

Income From Operations. Power Products segment income from operations decreased \$0.9 million, or 33.3%, to \$1.8 million for the nine months ended January 28, 2012, compared to \$2.7 million for the nine months ended January 29, 2011, due to unfavorable product mix from our North American cabling business, increased expenses for new product development,

Net Sales. The Other segment net sales increased \$0.6 million, or 6.4%, to \$10.0 million for the first nine months of fiscal 2012, compared to \$9.4 million for the first nine months of fiscal 2011. Net sales from our torque-sensing business increased 4.7% in the first nine months of fiscal 2012, compared to the first nine months of fiscal 2011. Net sales from our testing facilities increased 6.3% in the first nine months of fiscal 2012, compared to the first nine months of fiscal 2011.

Cost of Products Sold. Other segment cost of products sold decreased \$1.1 million to \$7.8 million for the nine months ended January 28, 2012, compared to \$8.9 million for the nine months ended January 29, 2011. Cost of products sold as a percentage of sales decreased to 78.0% in the first nine months of fiscal 2012, compared to 94.7% in the first nine months of fiscal 2011. The decrease in cost of products sold as a percentage of sales is primarily due to higher sales as well as favorable product mix from our torque-sensing business.

Gross Margins. The Other segment gross margins increased \$1.7 million, to \$2.2 million for the nine months ended January 28, 2012, compared to \$0.5 million for the nine months ended January 29, 2011. The increase in gross margins as a percentage of sales is primarily due to higher sales as well as favorable product mix from our torque-sensing business.

Selling and Administrative Expenses. Selling and administrative expenses increased \$0.8 million, or 38.1%, to \$2.9 million for the nine months ended January 28, 2012, compared to \$2.1 million for the nine months ended January 29, 2011. The increase is primarily due to expenses related to higher stock award amortization expense and severance. Selling and administrative expenses as a percentage of net sales increased to 29.0% for the nine months ended January 28, 2012, from 22.3% for the nine months ended January 29, 2011.

Loss From Operations The Other segment loss from operations decreased \$0.9 million, or 56.3%, to \$0.7 million for the nine months ended January 28, 2012, compared to \$1.6 million for the nine months ended January 29, 2011. The loss decreased primarily due to increased sales and favorable product mix from our torque-sensing business, partially offset with higher stock award amortization expense and severance in the first nine months of fiscal 2012, as compared to the first nine months of fiscal 2011.

Liquidity and Capital Resources

The Company has signed a non-binding memorandum of understanding to purchase the business assets of one of its strategic distributors who is distressed. We anticipate the transaction to be completed during our fourth quarter of fiscal 2012 and would be included in the Interconnect segment. Consideration will be cash and our trade receivables for the distributor outstanding as of the January 28, 2012 balance sheet date. If the transaction is completed, \$1.2 million of trade receivables will be reclassified to reflect the business assets acquired. If the transaction is not completed, the \$1.2 million of trade receivables will likely be impaired and be subject to write-off in a future period.

We believe our current world-wide cash balances together with expected future cash flows to be generated from operations will be sufficient to support current operations. However, due to the shifting of operations from the U.S. to foreign locations, a significant amount of cash and expected future cash flows are located outside of the U.S. Of the total cash and cash equivalents, as of January 28, 2012, \$67.8 million was held in subsidiaries outside the U.S. which is deemed to be permanently reinvested and therefore not available to fund our domestic operations. We currently have \$62.9 million of net operating loss carry-forwards in the U.S. which would reduce the cash tax obligation upon any future repatriation of funds.

During fiscal 2011, we were awarded a next generation center stack program for multiple GM vehicle platforms as well as transmission lead-frame assemblies for GM transmissions. Both programs are expected to be manufactured in our plants in Monterrey, Mexico. These programs require a significant amount of cash for the purchase of equipment, tooling and initial inventory as well as additional staffing for the development and launching of the programs. We expect to begin production and generate sales on these programs in fiscal 2013. Therefore, we anticipate our cash balances may decline further due to the launch of these programs without a corresponding increase in sales.

Our Amended and Restated Credit Agreement with Bank of America, N.A., as administrative agent, and certain other financial institutions, is in the aggregate principal amount of \$75.0 million, with an option to increase the principal amount by an additional \$25.0 million subject to customary conditions and approval of the lender(s) providing new commitment(s). The credit facility provides for variable rates of interest based on the type of borrowing and the Company's debt to EBITDA financial ratio. The Amended and Restated Credit Agreement is guaranteed by certain of our U.S. subsidiaries and matures in February 2016. At January 28, 2012, we were in compliance with the covenants of the agreement. During the first nine months of fiscal 2012, we had borrowings of \$39.5 million and interest payments of \$0.5 million, under this credit facility. As of January 28, 2012, there were outstanding balances due against the credit facility of \$39.5 million.

Cash Flow Operating Activities

Net cash provided by operating activities decreased \$7.7 million to \$11.9 million for the nine months ended January 28, 2012, compared to \$19.6 million for the nine months ended January 29, 2011. The operating activities decrease is primarily driven by lower net income as well as an increase in accounts receivable balances due to timing of sales in the first nine months of fiscal 2012, compared to the first nine months of fiscal 2011.

Cash Flow Investing Activities

Net cash used in investing activities increased \$14.0 million to \$23.0 million for the nine months ended January 28, 2012, compared to \$9.0 million for the nine months ended January 29, 2011. Purchases of property, plant and equipment was \$16.6 million for the first nine months of fiscal 2012, compared to \$9.8 million for the first nine months of fiscal 2011. In the first nine months of fiscal 2012, we acquired the AMD business for \$6.4 million. In the first nine months of fiscal 2011, we invested \$0.8 million in Eetrex. In addition, the first nine months of fiscal 2011 includes proceeds from life insurance policies of \$1.5 million.

Cash Flow Financing Activities

Net cash provided by financing activities increased \$38.5 million to cash provided of \$31.9 million in the first nine months of fiscal 2012, compared to a cash use of \$6.6 million for the first nine months of fiscal 2011. During the first nine months of fiscal 2012, the Company had net borrowings against the credit facility of \$39.5 million, compared to no net borrowings in the first nine months of fiscal 2011. We paid dividends of \$7.8 million and \$7.7 million in the first nine months of fiscal 2012 and 2011, respectively. In addition, the first nine months of fiscal 2012 included \$0.2 million of proceeds for the exercise of stock options.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements, other than operating leases and purchase obligations entered into in the normal course of business.

Item 3. Quantitative And Qualitative Disclosures About Market Risk

Certain of our foreign operations enter into transactions in currencies other than their functional currency, primarily the U.S. dollar and the Euro. A 10% change in foreign currency exchange rates from balance sheet date levels could impact our income before income taxes by \$4.2 million as of January 28, 2012 and \$3.8 million as of April 30, 2011. We also have foreign currency exposure arising from the translation of our net equity investment in our foreign operations to U.S. dollars. We generally view our investments in foreign operations with functional currencies other than the U.S. dollar as long-term. The currencies to which we are exposed are the British pound, Chinese yuan, Euro, Indian Rupee, Mexican peso, Singapore dollar and Swiss franc. A 10% change in foreign currency exchange rates from balance sheet date levels could impact our net foreign investments by \$20.0 million at January 28, 2012 and \$17.9 million at April 30, 2011.

Item 4. Controls And Procedures

As of the end of the period covered by this quarterly report on Form 10-Q, we performed an evaluation under the supervision and with the participation of the Company's management, including our Chief Executive Officer and our Chief Financial Officer, of our "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934). The Company's disclosure controls and procedures are designed to ensure that the information required to be disclosed by the Company in the reports that we file or submit under the Securities

Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's applicable rules and forms. As a result of this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective.

There have been no changes in our internal control over financial reporting during the quarter ended January 28, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
