Vale announces production plans at Canadian operations

Rio de Janeiro, March 12, 2010 Vale S.A. (Vale) announces that it is proceeding with plans to increase nickel production at its strike-bound operations in the Canadian provinces of Ontario and Newfoundland and Labrador, where unionized production and maintenance workers have been on strike for close to eight months.

Vale resumed partial production in its Sudbury mining site in Ontario in September 2009 with a focus on copper operating two high-copper mining zones and the company's Clarabelle Mill to produce copper concentrates. In January 2010, the focus shifted to nickel, with resumption of a one-furnace operation at the company's Copper Cliff smelter. The furnace has been operating at full capacity since, drawing down nickel inventories to produce a nickel oxide matte for the Company's refinery in Clydach, Wales and producing at a nominal rate of 11 million pounds of nickel per month.

We are currently ramping up mine production in Sudbury to secure an uninterrupted supply of feed for the furnace and expect to be in position to maintain full, uninterrupted production by the end of the second quarter. The Clydach Refinery, meanwhile, is currently operating at a rate of 2.5 million pounds of nickel per month and is expected to be back at full capacity by April, producing 7.9 million pounds of nickel per month.

In Newfoundland and Labrador, Vale has resumed production at the Voisey's Bay Ovoid mine and the mill which supplies nickel concentrates to Vale's operations in Thompson, Manitoba and Sudbury, Ontario and copper concentrates to clients in Europe. The Voisey's Bay site is currently operating on a two-week on, two-week off campaign basis, producing 3.5 million pounds of nickel per month and 2.8 million pounds of copper per month.

This press release may include declarations about Vale's expectations regarding future events or results. All declarations based upon future expectations, rather than historical facts, are subject to various risks and uncertainties. Vale cannot guarantee that such declarations will prove to be correct. These risks and uncertainties include factors related to the following: (a) the countries where Vale operates, mainly Brazil and Canada; (b) the global economy; (c) capital markets; (d) the mining and metals businesses and their dependence upon global industrial production, which is cyclical by nature; and (e) the high degree of global competition in the markets in which Vale operates. To obtain further information on factors that may give rise to results different from those forecast by Vale, please consult the reports filed with the Brazilian Comissão de Valores Mobiliários (CVM), the French Autorité des Marchés Financiers (AMF), and with the U.S. Securities and Exchange Commission (SEC), including Vale's most recent Annual Report on Form 20F and its reports on Form 6K.
