**FIRST INDUSTRIAL REALTY TRUST, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**(Dollars in thousands except share and per share data)**  
**(Unaudited)**

**1. Organization and Formation of Company**

First Industrial Realty Trust, Inc. (the Company) was organized in the state of Maryland on August 10, 1993. The Company is a real estate investment trust (REIT) as defined in the Internal Revenue Code of 1986 (the Code). Unless the context otherwise requires, the terms the Company, we, us, and our refer to First Industrial Realty Trust, Inc., First Industrial, L.P. and their other controlled subsidiaries. We refer to our operating partnership, First Industrial, L.P., as the Operating Partnership, and our taxable REIT subsidiary, First Industrial Investment, Inc., as the TRS.

We began operations on July 1, 1994. Our operations are conducted primarily through the Operating Partnership, of which we are the sole general partner with an approximate 87.6% and 87.5% ownership interest at June 30, 2008 and June 30, 2007, respectively, and through the TRS, of which the Operating Partnership is the sole stockholder. We also conduct operations through other partnerships, corporations, and limited liability companies, the operating data of which, together with that of the Operating Partnership and the TRS, is consolidated with that of the Company as presented herein. Minority interest at June 30, 2008 and June 30, 2007 of approximately 12.4% and 12.5%, respectively, represents the aggregate partnership interest in the Operating Partnership held by the limited partners thereof.

We also own minority equity interests in, and provide various services to, seven joint ventures which invest in industrial properties (the 2003 Net Lease Joint Venture, the 2005 Development/Repositioning Joint Venture, the 2005 Core Joint Venture, the 2006 Net Lease Co-Investment Program, the 2006 Land/Development Joint Venture, the 2007 Canada Joint Venture, and the 2007 Europe Joint Venture; together the Joint Ventures). The Joint Ventures are accounted for under the equity method of accounting. The operating data of the Joint Ventures is not consolidated with that of the Company as presented herein.

As of June 30, 2008, we owned 813 industrial properties (inclusive of developments in process) located in 28 states in the United States and one province in Canada, containing an aggregate of approximately 71.4 million square feet of gross leaseable area (GLA).

**2. Summary of Significant Accounting Policies**

The accompanying unaudited interim financial statements have been prepared in accordance with the accounting policies described in the financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2007, as amended (2007 Form 10-K) and should be read in conjunction with such financial statements and related notes. The following notes to these interim financial statements highlight significant changes to the notes included in the December 31, 2007 audited financial statements included in our 2007 Form 10-K and present interim disclosures as required by the Securities and Exchange Commission.

In order to conform with generally accepted accounting principles, we, in preparation of our financial statements, are required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of June 30, 2008 and December 31, 2007, and the reported amounts of revenues and expenses for each of the three and six months ended June 30, 2008 and June 30, 2007. Actual results could differ from

those estimates.

In our opinion, the accompanying unaudited interim financial statements reflect all adjustments necessary for a fair statement of our financial position as of June 30, 2008 and December 31, 2007 and the results of our operations and comprehensive income for each of the three and six months ended June 30, 2008 and June 30, 2007, and our cash flows for each of the six months ended June 30, 2008 and June 30, 2007, and all adjustments are of a normal recurring nature.

**FIRST INDUSTRIAL REALTY TRUST, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Construction Revenues and Expenses***

Construction revenues and expenses include revenues and expenses associated with us acting in the capacity of general contractor and development manager for certain third party development projects. For such projects we recognize the gross costs and revenues on a percentage of completion basis. Additionally, for the six months ended June 30, 2008, construction revenues and expenses include amounts relating to the sale of industrial units that we developed to sell.

***Deferred Leasing Intangibles***

Deferred Leasing Intangibles, exclusive of Deferred Leasing Intangibles held for sale, included in our total assets consist of the following:

	<b>June 30, 2008</b>	<b>December 31, 2007</b>

Less: Accumulated Amortization	(11,705)	(9,627)

\$ 21,066 \$ 22,041

The fair value of in-place leases, above market leases, tenant relationships and below market leases recorded due to real estate properties acquired during the six months ended June 30, 2008 and June 30, 2007 is as follows:

	<b>June 30, 2008</b>	<b>June 30, 2007</b>
In-Place Leases	\$ 8,906	\$ 16,541
Above Market Leases	\$ 61	\$ 855
Tenant Relationships	\$ 5,242	\$ 8,473
Below Market Leases	\$ (2,052)	\$ (6,832)

**FIRST INDUSTRIAL REALTY TRUST, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The weighted average life in months of in-place leases, above market leases, tenant relationships and below market leases recorded as a result of the real estate properties acquired for the six months ended June 30, 2008 and June 30, 2007 is as follows:

	<b>June 30, 2008</b>	<b>June 30, 2007</b>
In-Place Leases	41	79
Above Market Leases	43	107
Tenant Relationships	92	116
Below Market Leases	31	148

Amortization expense related to in-place leases and tenant relationships was \$10,472 and \$5,512 for the three months ended June 30, 2008 and June 30, 2007, respectively, and \$16,888 and \$11,268 for the six months ended June 30, 2008 and June 30, 2007, respectively. Rental revenues related to amortization of above/(below) market leases increased by \$3,546 and \$978 for the three months ended June 30, 2008 and June 30, 2007, respectively, and \$4,823 and \$2,033 for the six months ended June 30, 2008 and June 30, 2007, respectively.

***Income Taxes***

We file tax returns in the U.S. and various states and foreign jurisdictions. At December 31, 2007 the TRS was under examination by the Internal Revenue Service for tax years 2004 and 2005. During the three months ended June 30, 2008 we received notification from the Internal Revenue Service that they have completed their examinations of the TRS for the 2004 and 2005 tax years. There were no changes to taxable income of the TRS as a result of the examination.

***Recent Accounting Pronouncements***

In September 2006, the Financial Accounting Standards Board (the FASB) issued Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements* (SFAS 157), which establishes a framework for reporting fair value and expands disclosures about fair value measurements. We adopted the required provisions of SFAS 157 that became effective in our first quarter of 2008 (See Note 11). In February 2008, the FASB issued FASB Staff Position No. FAS 157-2, *Effective Date of FASB Statement No. 157* (FSP 157-2). FSP 157-2 delays the effective date of SFAS 157 for nonfinancial assets and nonfinancial liabilities, except for certain items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). We are currently evaluating the potential impact of SFAS 157 on our consolidated financial statements for items within the scope of FSP 157-2, which will become effective beginning with our first quarter of 2009.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141R). SFAS 141R establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired. SFAS 141R also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. We are currently evaluating the potential impact of adoption of

SFAS 141R on our consolidated financial statements, which will become effective beginning with our first quarter 2009.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements-an amendment of ARB No. 51* ( SFAS 160 ). SFAS 160 establishes accounting and reporting standards pertaining to ownership interests in subsidiaries held by parties other than the parent, the amount of net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest, and the valuation of any retained noncontrolling equity investment when a subsidiary is deconsolidated. This statement also establishes disclosure requirements that clearly identify and distinguish between the interests of the parent and the

interests of the noncontrolling owners. We are currently evaluating the potential impact of adoption of SFAS 160 on our consolidated financial statements, which will become effective beginning with our first quarter 2009.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133 ( SFAS 161 ). SFAS 161 requires entities that utilize derivative instruments to provide qualitative disclosures about their objectives and strategies for using such instruments, as well as any details of credit-risk-related contingent features contained within derivatives. SFAS 161 also requires entities to disclose additional information about the amounts and location of derivatives located within the financial statements, how the provisions of SFAS 133 *Accounting for Derivative Instruments and Hedging Activities*, have been applied, and the impact that hedges have on an entity's financial position, financial performance, and cash flows. SFAS 161 is effective for fiscal years and interim periods beginning after November 15, 2008. We will comply with the expanded disclosure requirements, as applicable.

In May 2008, the FASB issued Staff Position No. APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)* ( FSP APB 14-1 ), that requires the liability and equity components of convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) to be separately accounted for in a manner that reflects the issuer's nonconvertible debt borrowing rate. FSP APB 14-1 dictates the debt component to be recorded be based upon the estimated fair value of a similar nonconvertible debt. The resulting debt discount would be amortized over the period during which the debt is expected to be outstanding (i.e. through the first optional redemption date) as additional non-cash interest expense. FSP APB 14-1 will become effective beginning in our first quarter of 2009 and is required to be applied retrospectively to all presented periods, as applicable. The adoption of FSP APB 14-1 is expected to result in us recognizing additional non-cash interest expense of approximately \$1.5 million per annum.

**3. Investments in Joint Ventures and Property Management Services**

At June 30, 2008, the 2003 Net Lease Joint Venture owned 11 industrial properties comprising approximately 5.1 million square feet of GLA, the 2005 Development/Repositioning Joint Venture owned 29 industrial properties comprising approximately 5.2 million square feet of GLA and several land parcels, the 2005 Core Joint Venture owned 60 industrial properties comprising approximately 4.4 million square feet of GLA and several land parcels, the 2006 Net Lease Co-Investment Program owned 12 industrial properties comprising approximately 5.0 million square feet of GLA, the 2006 Land/Development Joint Venture owned several land parcels, and the 2007 Canada Joint Venture owned three industrial properties comprising approximately 0.2 million square feet of GLA and several land parcels. As of June 30, 2008, the 2007 Europe Joint Venture does not own any properties.

During July 2007, we entered into a management arrangement with an institutional investor to provide property management, leasing, acquisition, disposition and portfolio management services for industrial properties (the July 2007 Fund ). We do not own an equity interest in the July 2007 Fund, however we are entitled to receive incentive payments if certain economic thresholds related to the industrial properties are achieved.

At June 30, 2008 and December 31, 2007, we have a receivable from the Joint Ventures and the July 2007 Fund of \$5,627 and \$6,068, respectively, which mainly relate to development, leasing, property management and asset management fees due to us from the Joint Ventures and the July 2007 Fund and reimbursement for development expenditures made by the TRS, who is acting in the capacity of the general contractor for development projects for the

2005 Development/Repositioning Joint Venture. These receivable amounts are included in prepaid expenses and other assets, net.

During the six months ended June 30, 2008 and June 30, 2007, we invested the following amounts in, as well as received distributions from, our Joint Ventures and recognized fees from acquisition, disposition, leasing,

On June 6, 2008, we assumed a mortgage loan payable of \$4,097 bearing interest at a rate of 6.83%. In conjunction with the assumption of the mortgage loan, we recorded a premium in the amount \$256 which will be amortized as an adjustment to interest expense through maturity on June 1, 2018.

On January 10, 2006, we issued \$200,000 of senior unsecured debt which matures on January 15, 2016 and bears interest at a rate of 5.75% (the 2016 Notes ). The issue price of the 2016 Notes was 99.653%. In December 2005, we also entered into interest rate protection agreements which were used to fix the interest rate on the 2016

Notes prior to issuance. We settled the interest rate protection agreements on January 9, 2006 for a payment of approximately \$1,729, which is included in other comprehensive income. On June 6, 2008, we repurchased and retired \$5,000 of the 2016 Notes at a redemption price of 89.75% of par. In connection with the partial retirement, we recognized \$430 as gain on early retirement of debt, which is the difference between the repurchase amount of \$4,488 and the principal amount retired of \$5,000, net of the pro rata write off of the unamortized debt issue discount, the unamortized loan fees and the unamortized settlement amount of the interest rate protection agreements related to the 2016 Notes of \$13, \$36, and \$33, respectively.

On May 7, 2007, we issued \$150,000 of senior unsecured debt which matures on May 15, 2017 and bears interest at a rate of 5.95% (the 2017 II Notes ). The issue price of the 2017 II Notes was 99.730%. In April 2006, we also entered into interest rate protection agreements to fix the interest rate on the 2017 II Notes prior to issuance. We settled the effective portion of the interest rate protection agreements on May 1, 2007 for \$4,261 which is included in other comprehensive income. On June 6, 2008, we repurchased and retired \$16,570 of the 2017 II Notes at a redemption price of 89.75% of par. In connection with the partial retirement, we recognized \$1,059 as gain on early retirement of debt, which is the difference between the repurchase amount of \$14,872 and the principal amount retired of \$16,570, net of the pro rata write off of the unamortized debt issue discount, the unamortized loan fees and the unamortized settlement amount of the interest rate protection agreements related to the 2017 II Notes of \$40, \$177, and \$422, respectively.

**5. Stockholders Equity***Shares of Common Stock*

During the six months ended June 30, 2008, 152,544 limited partnership interests in the Operating Partnership ( Units ) were converted into an equivalent number of shares of common stock, resulting in a reclassification of \$3,733 of minority interest to equity.

***Non-Qualified Employee Stock Options:***

During the six months ended June 30, 2008, certain of our employees exercised 6,300 non-qualified employee stock options. Net proceeds to us were approximately \$174.

***Restricted Stock:***

During the six months ended June 30, 2008, we awarded 588,628 of restricted common stock shares and restricted stock units to certain employees and 4,598 shares of restricted common stock to certain directors. These restricted common stock shares and restricted stock units had a fair value of approximately \$19,003 on the dates of approval by the Compensation Committee of the Board of Directors. The restricted common stock and restricted

stock units awarded to employees generally vest over a three year period and the restricted common stock awarded to directors generally vest over a three to ten year period. Compensation expense will be charged to earnings over the respective vesting period for the shares/units expected to vest.

***Dividend/Distributions:***

The following table summarizes dividends/distributions accrued during the six months ended June 30, 2008.

**6. Acquisition of Real Estate**

During the six months ended June 30, 2008, we acquired 18 industrial properties comprising approximately 2.2 million square feet of GLA and several land parcels. The purchase price of these acquisitions totaled approximately \$179,597, excluding costs incurred in conjunction with the acquisition of the industrial properties and land parcels.

**7. Sale of Real Estate, Real Estate Held for Sale and Discontinued Operations**

During the six months ended June 30, 2008, we sold 90 industrial properties comprising approximately 7.6 million square feet of GLA and several land parcels. Gross proceeds from the sales of the 90 industrial properties and several land parcels were approximately \$494,993. The gain on sale of real estate was approximately \$155,853. We deferred \$2,506 on the gain on sale of real estate on the sale of one of the 90 properties. Since we leased back a portion of the property for one of our regional offices and we provided seller financing, SFAS No. 98 *Accounting for Leases* required us to defer the gain. The gain on sale of real estate will be recognized when the mortgage note receivable is paid off and retired. The mortgage note receivable matures in August 2008. All but one of the 90 sold industrial properties meet the criteria established by SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* ( SFAS 144 ) to be included in discontinued operations. Therefore, in accordance with SFAS 144, the results of operations and gain on sale of real estate for 89 of the 90 sold industrial properties are included in discontinued operations. The results of operations and gain on sale of real estate for the one industrial property and several land parcels that do not meet the criteria established by SFAS 144 are included in continuing operations.

At June 30, 2008, we had five industrial properties comprising approximately 0.6 million square feet of GLA held for sale. In accordance with SFAS 144, the results of operations of the five industrial properties held for sale at June 30, 2008 are included in discontinued operations. There can be no assurance that such industrial properties held for sale will be sold.

Income from discontinued operations for the three and six months ended June 30, 2007 reflects the results of operations of the 89 industrial properties that were sold during the six months ended June 30, 2008, the results of operations of 161 industrial properties that were sold during the year ended December 31, 2007, the results of operations of the five industrial properties identified as held for sale at June 30, 2008 and the gain on sale of real estate relating to 84 industrial properties that were sold during the six months ended June 30, 2007.

Net Income Available to Common Stockholders	\$ 0.96	\$ 0.67	\$ 2.09	\$ 1.33

The number of weighted average shares diluted is the same as the number of weighted average shares basic for the three and six months ended June 30, 2008 and June 30, 2007 as the dilutive effect of stock options and restricted stock was excluded as its inclusion would have been antidilutive to the loss from continuing operations available to common stockholders, net of minority interest and income taxes. The dilutive effect of stock options and restricted stock excluded from the computation are 11,577 and 192,600 for the three months ended June 30, 2008 and 2007, respectively, and 17,033 and 219,349 for the six months ended June 30, 2008 and 2007, respectively.

Unvested restricted stock shares aggregating 989,671 and 432,129 for the three months ended June 30, 2008 and 2007, respectively, and 986,183 and 430,693 for the six months ended June 30, 2008 and 2007, respectively, were antidilutive as the issue price of these shares was higher than the Company's average stock price during the respective periods and accordingly were excluded from dilution computations.

Options to purchase common stock of 183,000 for the three months ended June 30, 2008 and 163,000 for the six months ended June 30, 2008 were antidilutive as the strike price of these stock options was higher than the

Company's average stock price during the respective periods and accordingly were excluded in dilution computations. In 2007, all of the stock options were dilutive.

The \$200,000 of senior unsecured debt (the 2011 Exchangeable Notes ) issued during 2006, which are convertible into common shares of the Company at the price of \$50.93, were not included in the computation of diluted EPS as our average stock price did not exceed the strike price of the conversion feature.

**10. Stock Based Compensation**

We recognized \$4,724 and \$3,648 for the three months ended June 30, 2008 and 2007, respectively, and \$8,184 and \$7,254 for the six months ended June 30, 2008 and 2007, respectively, in compensation expense related to restricted stock awards, of which \$396 and \$318 was capitalized for the three months ended June 30, 2008 and 2007, respectively, and \$771 and \$720 was capitalized for the six months ended June 30, 2008 and 2007, respectively, in connection with development activities. At June 30, 2008, we have \$33,971 in unrecognized compensation related to unvested restricted stock awards. The weighted average period that the unrecognized compensation is expected to be recognized is 1.27 years. We have not awarded stock options to our employees or our directors during the six months ended June 30, 2008 and June 30, 2007 and all outstanding options are fully vested, therefore no stock-based employee compensation expense related to stock options is included in net income available to common stockholders.

**11. Other Comprehensive Income and Fair Value Measurements**

In July 2007 and January 2008, the 2006 Land/Development Joint Venture entered into an aggregate of four interest rate protection agreements to effectively convert floating rate debt to fixed rate debt on a portion of its variable rate debt. The hedge relationship is considered highly effective and for the three and six months ended June 30, 2008, \$7,512 and \$1,974, respectively of mark to market gain due to a change in values of the interest rate protection agreements was recognized in other comprehensive income by the 2006 Land/Development Joint Venture. For the three and six months ended June 30, 2008, we recorded \$752 and \$198 in mark to market gain, respectively, representing our 10% share, net of \$296 and \$81, respectively, of income tax provision, which is included in mark to market of interest rate protection agreements in other comprehensive income.

In January 2008, the 2005 Core Joint Venture entered into two interest rate protection agreements to effectively convert floating rate debt to fixed rate debt on a portion of its variable rate debt. The hedge relationship is considered highly effective and for the three and six months ended June 30 2008, \$1,206 and \$89, respectively, of mark to market gain due to a change in values of the interest rate protection agreements was recognized in other comprehensive income by the 2005 Core Joint Venture. For the three and six months ended June 30, 2008, we recorded \$121 and \$9 in mark to market gain, respectively, representing our 10% share, net of \$47 and \$3 of income tax provision, respectively, which is included in mark to market of interest rate protection agreements in other comprehensive income.

In January 2008, we entered into two interest rate protection agreements which fixed the interest rate on forecasted offerings of unsecured debt which we designated as cash flow hedges (the January 2008 Agreements ). The January 2008 Agreements each have a notional value of \$59,750 and are effective from May 15, 2009 through May 15, 2014. The January 2008 Agreements fix the LIBOR rate at 4.0725% and 4.0770%, respectively. We anticipate that the January 2008 Agreements will be highly effective, and, as a result, the change in value is shown in other

comprehensive income. We recorded \$4,053 and \$2,706 in mark to market gain, which is included in mark to market of interest rate protection agreements in other comprehensive income for the three and six months ended June 30, 2008, respectively.

In March 2008, we entered into an interest rate swap agreement (the March 2008 Agreement ) which fixed the interest rate on a portion of our outstanding borrowings on our unsecured line of credit. We designated this transaction as a cash flow hedge. The March 2008 Agreement has a notional value of \$50,000 and is effective from

**FIRST INDUSTRIAL REALTY TRUST, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

March 6, 2008 through April 1, 2010. The March 2008 Agreement fixes the LIBOR rate at 2.4150%. Any payments or receipts from the March 2008 Agreement will be treated as a component of interest expense. We anticipate that the March 2008 Agreement will be highly effective, and, as a result, the change in value is shown in other comprehensive income. We recorded \$792 and \$704 in mark to market gain, which is included in mark to market of interest rate protection agreements in other comprehensive income for the three and six months ended June 30, 2008, respectively.

In conjunction with certain issuances of senior unsecured debt, we entered into interest rate protection agreements to fix the interest rate on anticipated offerings of senior unsecured debt. In the next 12 months, we will amortize approximately \$729 into net income by decreasing interest expense.

During 2008, we owned one industrial property and one land parcel located in Toronto, Canada for which the functional currency was determined to be the Canadian dollar. The assets and liabilities of this industrial property and one land parcel are translated to U.S. dollars from the Canadian dollar based on the current exchange rate prevailing at each balance sheet date. The income statement accounts of the industrial property and one land parcel are translated using the average exchange rate for the period. The resulting translation adjustments are included in accumulated other comprehensive income. For the three and six months ended June 30, 2008, we recorded \$264 and \$(778) in foreign currency translation gain (loss), respectively, offset by \$9 and \$390 of income tax benefit, respectively.

We adopted the provisions of SFAS 157 as of January 1, 2008, for financial instruments recorded at fair value. Although the adoption of SFAS 157 did not materially impact our financial condition, results of operations, or cash flow, we are now required to provide additional disclosures as part of our financial statements.

SFAS 157 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

The following table sets forth our financial assets and liabilities that are accounted for, at fair value on a recurring basis as of June 30, 2008:

Description	June 30, 2008	Fair Value Measurements at Reporting Date Using:		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
<b>Assets:</b>				
Interest Rate Protection Agreements(1)	\$ 3,410		\$ 3,410	

- (1) Mark to market gains on the interest rate protection agreements are recorded in accumulated other comprehensive income and the value of the interest rate protection agreements is included in prepaid expenses and other assets, net.

The valuation of the above interest rate protection agreements are determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each instrument. This analysis reflects the contractual terms of the interest rate protection agreements, including the period to maturity, and uses observable market-based inputs, including interest rate curves and implied volatilities. To comply with the provisions of SFAS 157, we incorporated credit valuation adjustments to appropriately reflect both our own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of the interest rate protection agreements for the effect of nonperformance risk, we have considered the impact of netting and any applicable credit enhancements.

**FIRST INDUSTRIAL REALTY TRUST, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Although we have determined that the majority of the inputs used to value the instruments fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with our instruments utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by ourselves and our counterparties. However, as of June 30, 2008, we have assessed the significance of the impact of the credit valuation adjustments on the overall valuation of the positions of the interest rate protection agreements and have determined that the credit valuation adjustments are not significant to the overall valuation of our interest rate protection agreements. As a result, we have determined that the valuations in their entirety are classified in Level 2 of the fair value hierarchy.

**12. Commitments and Contingencies**

In the normal course of business, we are involved in legal actions arising from the ownership of our properties. In our opinion, the liabilities, if any, that may ultimately result from such legal actions are not expected to have a materially adverse effect on our consolidated financial position, operations or liquidity.

We have committed to the construction of several industrial properties totaling approximately 2.5 million square feet of GLA. The estimated total construction costs are approximately \$128,611. Of this amount, approximately \$51,602 remains to be funded. There can be no assurance that the actual completion cost will not exceed the estimated completion cost stated above.

At June 30, 2008, we had 20 letters of credit outstanding in the aggregate amount of \$7,791. These letters of credit expire between July 2008 and January 2010.

**13. Subsequent Events**

From July 1, 2008 to July 25, 2008, we acquired three industrial properties and one land parcel for a purchase price of approximately \$19,800, excluding costs incurred in conjunction with the acquisition of these industrial properties and one land parcel. In conjunction with the acquisition of two of these industrial properties, we assumed \$3,499 in mortgage loans payable. There were no industrial properties sold during this period.

On July 1, 2008, we repurchased and retired \$5,000 of the 2017 II Notes at a redemption price of 88.915% of par. In connection with the partial retirement, we recognized \$361 as gain on early retirement of debt, which is the difference between the repurchase amount of \$4,446 and the principal amount retired of \$5,000, net of the pro rata write off of the unamortized debt issue discount, the unamortized loan fees, and the unamortized settlement amount of the interest rate protection agreements related to the 2017 II Notes of \$12, \$54, and \$127, respectively.

On July 3, 2008, the mortgage note receivable that we originated related to a property sale in the first quarter 2008 in which we deferred \$2,506 in gain (see Note 7) was paid off and retired.

On July 21, 2008, we paid a second quarter 2008 dividend/distribution of \$0.72 per common share/Unit, totaling approximately \$36,420.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the financial statements and notes thereto appearing elsewhere in this Form 10-Q.

This report contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, and Section 21E of the Securities Exchange Act of 1934. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and are including this statement for purposes of complying with those safe harbor provisions. Forward-looking statements, which are based on certain assumptions and describe future plans, strategies and expectations of the Company, are generally identifiable by use of the words believe, expect, intend, anticipate, estimate, project or similar expressions. Our ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have an adverse effect on our operations and future prospects include, but are not limited to, changes in: national, international (including trade volume growth), regional and local economic conditions generally and real estate markets specifically, legislation/regulation (including changes to laws governing the taxation of real estate investment trusts), our ability to qualify and maintain our status as a real estate investment trust, availability and attractiveness of financing (including both public and private capital) to us and to our potential counterparties, interest rate levels, our ability to maintain our current credit agency ratings, competition, supply and demand for industrial properties (including land, the supply and demand for which is inherently more volatile than other types of industrial property) in the Company's current and proposed market areas, difficulties in consummating acquisitions and dispositions, risks related to our investments in properties through joint ventures, potential environmental liabilities, slippage in development or lease-up schedules, tenant credit risks, higher-than-expected costs, changes in general accounting principles, policies and guidelines applicable to real estate investment trusts risks related to doing business internationally (including foreign currency exchange risks and risks related to integrating international properties and operations) and those additional factors described under the heading Risk Factors and elsewhere in the Company's annual report on Form 10-K for the year ended December 31, 2007, in the Company's subsequent quarterly reports on Form 10-Q, and in Item 1A, Risk Factors, in this quarterly report. We caution you not to place undue reliance on forward looking statements, which reflect our analysis only and speak only as of the date of this report or the dates indicated in the statements. Unless the context otherwise requires, the terms Company, we, us, and our refer to First Industrial Realty Trust, Inc., First Industrial, L.P. and their controlled subsidiaries. We refer to our operating partnership, First industrial, L.P., as the Operating Partnership, and our taxable REIT subsidiary, First Industrial Investment, Inc., as the TRS.

**GENERAL**

The Company was organized in the state of Maryland on August 10, 1993. We are a real estate investment trust ( REIT ) as defined in the Internal Revenue Code of 1986 (the Code ).

We began operations on July 1, 1994. Our operations are conducted primarily through the Operating Partnership, of which we are the sole general partner with an approximate 87.6% and 87.5% ownership interest at June 30, 2008 and 2007, respectively, and through the TRS, of which the Operating Partnership is the sole stockholder. We also conduct operations through other partnerships, corporations, and limited liability companies, the operating data of which, together with that of the Operating Partnership and the TRS, is consolidated with that of the Company, as presented herein. Minority interest at June 30, 2008 and 2007 of approximately 12.4% and 12.5%, respectively, represents the aggregate partnership interest in the Operating Partnership held by the limited partners thereof.

We also own minority equity interests in, and provide various services to, seven joint ventures which invest in industrial properties (the 2003 Net Lease Joint Venture, the 2005 Development/Repositioning Joint Venture, the 2005 Core Joint Venture, the 2006 Net Lease Co-Investment Program the 2006 Land/Development Joint Venture. , the 2007

Canada Joint Venture , and the 2007 Europe Joint Venture ; together the Joint Ventures ). The Joint Ventures are accounted for under the equity method of accounting. The operating data of the Joint Ventures is not consolidated with that of the Company as presented herein.

As of June 30, 2008, we owned 813 industrial properties (inclusive of developments in process) located in 28 states in the United States and one province in Canada, containing an aggregate of approximately 71.4 million square feet of gross leaseable area ( GLA ).

## MANAGEMENT'S OVERVIEW

We believe our financial condition and results of operations are, primarily, a function of our performance and our Joint Ventures' performance in four key areas: leasing of industrial properties, acquisition and development of additional industrial properties, redeployment of internal capital and access to external capital.

We generate revenue primarily from rental income and tenant recoveries from long-term (generally three to six years) operating leases of our industrial properties and our Joint Ventures' industrial properties. Such revenue is offset by certain property specific operating expenses, such as real estate taxes, repairs and maintenance, property management, utilities and insurance expenses, along with certain other costs and expenses, such as depreciation and amortization costs and general and administrative and interest expenses. Our revenue growth is dependent, in part, on our ability to (i) increase rental income, through increasing either or both occupancy rates and rental rates at our properties and our Joint Ventures' properties, (ii) maximize tenant recoveries and (iii) minimize operating and certain other expenses. Revenues generated from rental income and tenant recoveries are a significant source of funds, in addition to income generated from gains/losses on the sale of our properties and our Joint Ventures' properties (as discussed below), for our distributions. The leasing of property, in general, and occupancy rates, rental rates, operating expenses and certain non-operating expenses, in particular, are impacted, variously, by property specific, market specific, general economic and other conditions, many of which are beyond our control. The leasing of property also entails various risks, including the risk of tenant default. If we were unable to maintain or increase occupancy rates and rental rates at our properties and our Joint Ventures' properties or to maintain tenant recoveries and operating and certain other expenses consistent with historical levels and proportions, our revenue growth would be limited. Further, if a significant number of our tenants and our Joint Ventures' tenants were unable to pay rent (including tenant recoveries) or if we or our Joint Ventures were unable to rent our properties on favorable terms, our financial condition, results of operations, cash flow and ability to pay dividends on, and the market price of, our common stock would be adversely affected.

Our revenue growth is also dependent, in part, on our and our Joint Ventures' ability to acquire, develop and redevelop additional industrial properties on favorable terms. These properties, to the extent leased, generate revenue from rental income, tenant recoveries and fees, income from which, as discussed above, is a source of funds for our distributions. These properties also replenish our and our Joint Ventures' portfolio of properties as we systematically redeploy capital, as discussed below. In this regard, we seek to maintain an investment pipeline (comprised of acquisitions under contract or letter of intent and developments in, or in the process of being placed into, their construction phase) from which to source the acquisition, development and redevelopment transactions on which our revenue growth is, in part, dependent. Our investment pipeline, however, is subject to change and is not necessarily a reliable indicator of our or our Joint Ventures' ability to acquire, develop or redevelop additional industrial properties on favorable terms. The acquisition, development and redevelopment of properties is impacted, variously, by property specific, market specific, general economic and other conditions, including significant competition for opportunities from other well-capitalized real estate investors, including both publicly-traded REITs and private investors, many of which conditions are beyond our control. The acquisition, development and redevelopment of properties also entails various other risks, including the risk that our investments and our Joint Ventures' investments may not perform as expected. For example, acquired, developed or redeveloped properties may not sustain and/or achieve anticipated occupancy and rental rate levels. With respect to developed and redeveloped properties, we may not be able to complete construction on schedule or within budget, resulting in increased debt service expense and construction costs and delays in leasing the properties. Further, as discussed below, we and our Joint Ventures may not be able to finance the acquisition, development and redevelopment opportunities we identify. If we and our Joint Ventures were unable to acquire, develop and redevelop sufficient additional properties on favorable terms, or if such investments did not perform as expected, our revenue growth would be limited and our financial condition, results of operations, cash flow and ability to pay dividends on, and the market price of, our common stock would be adversely affected.

We also generate income from the sale of our and our Joint Ventures properties (including existing buildings, buildings which we or our Joint Ventures have developed or re-developed on a merchant basis, and land). The Company itself and through our various Joint Ventures is continually engaged in, and our income growth is dependent in part on, systematically redeploying capital from properties and other assets with lower yield potential into properties and other assets with higher yield potential. As part of that process, we and our Joint Ventures sell, on

an ongoing basis, select stabilized properties or land or properties offering lower potential returns relative to their market value. The gain/loss on, and fees from, the sale of such properties are included in our income and are a significant source of funds, in addition to revenues generated from rental income and tenant recoveries, for our distributions. Also, a significant portion of our proceeds from such sales is used to fund the acquisition, development and redevelopment of additional industrial properties. The sale of properties is impacted, variously, by property specific, market specific, general economic and other conditions, many of which are beyond our control. The sale of properties also entails various risks, including competition from other sellers and the availability of attractive financing for potential buyers of our properties and our Joint Ventures' properties. Further, our ability to sell properties is limited by safe harbor rules applying to REITs under the Code which relate to the number of properties that may be disposed of in a year, their tax bases and the cost of improvements made to the properties, along with other tests which enable a REIT to avoid punitive taxation on the sale of assets. If we and our Joint Ventures were unable to sell properties on favorable terms, our income growth would be limited and our financial condition, results of operations, cash flow and ability to pay dividends on, and the market price of, our common stock would be adversely affected.

Currently, we utilize a portion of the net sales proceeds from property sales, borrowings under our unsecured line of credit (the Unsecured Line of Credit) and proceeds from the issuance when and as warranted, of additional debt and equity securities to finance future acquisitions, developments and redevelopments and to fund our equity commitments to our Joint Ventures. Access to external capital on favorable terms plays a key role in our financial condition and results of operations, as it impacts our cost of capital and our ability and cost to refinance existing indebtedness as it matures and to fund acquisitions, developments, redevelopments and contributions to our Joint Ventures or through the issuance, when and as warranted, of additional equity securities. Our ability to access external capital on favorable terms is dependent on various factors, including general market conditions, interest rates, credit ratings on our capital stock and debt, the market's perception of our growth potential, our current and potential future earnings and cash distributions and the market price of our capital stock. If we were unable to access external capital on favorable terms, our financial condition, results of operations, cash flow and ability to pay dividends on, and the market price of, our common stock would be adversely affected.

## **RESULTS OF OPERATIONS**

### **Comparison of Six Months Ended June 30, 2008 to Six Months Ended June 30, 2007**

Our net income available to common stockholders was \$90.1 million and \$59.0 million for the six months ended June 30, 2008 and 2007, respectively. Basic and diluted net income available to common stockholders were \$2.09 per share and \$1.33 per share for the six months ended June 30, 2008 and June 30, 2007, respectively.

The tables below summarize our revenues, property expenses and depreciation and other amortization by various categories for the six months ended June 30, 2008 and June 30, 2007. Same store properties are properties owned prior to January 1, 2007 and held as operating properties through June 30, 2008 and developments and redevelopments that were placed in service prior to January 1, 2007 or were substantially completed for 12 months prior to January 1, 2007. Properties are placed in service as they reach stabilized occupancy (generally defined as 90% occupied). Acquired properties are properties that were acquired subsequent to December 31, 2006 and held as operating properties through June 30, 2008. Sold properties are properties that were sold subsequent to December 31, 2006. (Re)Developments and land are land parcels and developments and redevelopments that were not a) substantially complete 12 months prior to January 1, 2007 or b) placed in service prior to January 1, 2007. Other revenues are derived from the operations of our maintenance company, fees earned from our Joint Ventures, and other miscellaneous revenues. Construction revenues and expenses represent revenues earned and expenses incurred in connection with the TRS acting as general contractor or development manager to construct industrial properties, including industrial properties for the 2005 Development/Repositioning Joint Venture, and also include revenues and expenses related to the development and sale of properties built for third parties. Other expenses are derived from the

operations of our maintenance company and other miscellaneous regional expenses.

Our future financial condition and results of operations, including rental revenues, may be impacted by the future acquisition and sale of properties. Our future revenues and expenses may vary materially from historical rates.

For the six months ended June 30, 2008 and 2007, the occupancy rates of our same store properties were 90.7% and 91.4%, respectively.

Revenues from same store properties increased by \$4.8 million due primarily to an increase in tenant recoveries and an increase in lease termination fees of \$0.5 million partially offset by a decrease in occupancy. Revenues from acquired properties increased \$13.3 million due to the 123 industrial properties acquired subsequent to December 31, 2006 totaling approximately 10.8 million square feet of GLA. Revenues from sold properties decreased \$31.2 million due to the 254 industrial properties sold subsequent to December 31, 2006 totaling approximately 21.3 million square feet of GLA. Revenues from (re)developments and land increased \$2.6 million primarily due to an increase in occupancy. Other revenues decreased by approximately \$6.3 million due primarily to a decrease in fees earned from our Joint Ventures and a decrease in fees earned related to us assigning our interest in certain purchase contracts to third parties for consideration. Construction revenues increased \$40.6 million primarily due to two development projects that commenced in September 2007 and April 2008 for which we are acting in the capacity of development manager.

Property expenses include real estate taxes, repairs and maintenance, property management, utilities, insurance, and other property related expenses. Property expenses from same store properties increased \$5.0 million due primarily to an increase in real estate tax expense an increase in repairs and maintenance expense attributable to increases in snow removal expense and an increase in bad debt expense. Property expenses from acquired properties increased \$4.7 million due to properties acquired subsequent to December 31, 2006. Property expenses from sold properties decreased \$8.7 million due to properties sold subsequent to December 31, 2006. Property expenses from (re)developments and land remained relatively unchanged. The \$0.9 million decrease in other expense is primarily attributable to a decrease in the bad debt reserve and a loss recorded in connection with roof damage at a property that occurred during the six months ended June 30, 2007. The damage was accounted for as an involuntary conversion which requires the recognition of a loss in the period in which the damage occurred. Insurance reimbursements were deferred until realizable. Construction expenses increased \$39.7 million primarily due to two development projects that commenced in September 2007 and April 2008 for which we are acting in the capacity of development manager.

General and administrative expense remained relatively unchanged.

Total Depreciation and Other Amortization	\$ 82,985	\$ 67,842	\$ 15,143	22.3%

Depreciation and other amortization for same store properties remained relatively unchanged. Depreciation and other amortization from acquired properties increased by \$14.2 million due to properties acquired subsequent to December 31, 2006 as well as \$7.0 million of accelerated depreciation and amortization taken during the six months ended June 30, 2008 attributable to a tenant in two buildings that we acquired in May 2007 who terminated their lease early. Depreciation and other amortization from sold properties decreased \$11.2 million due to properties sold subsequent to December 31, 2006. Depreciation and other amortization for (re)developments and land and other increased \$1.9 million due primarily to an increase in the substantial completion of developments.

Interest income increased approximately \$1.3 million, or 263.3%, due primarily to an increase in the average mortgage loans receivable outstanding during the six months ended June 30, 2008, as compared to the six months ended June 30, 2007.

Interest expense decreased approximately \$3.1 million, or 5.2%, primarily due to a decrease in the weighted average interest rate for the six months ended June 30, 2008 (5.97%), as compared to the six months ended June 30, 2007 (6.55%), and due to an increase in capitalized interest for the six months ended June 30, 2008 due to an increase in development activities, partially offset by an increase in the weighted average debt balance outstanding for the six months ended June 30, 2008 (\$2,045.4 million), as compared to the six months ended June 30, 2007 (\$1,936.9 million).

Amortization of deferred financing costs remained relatively unchanged.

For the six months ended June 30, 2008, we recognized a \$1.5 million gain from early retirement of debt due to the partial repurchase of two series of our senior unsecured notes. For the six months ended June 30, 2007, we incurred a \$0.3 million loss from early retirement of debt due to early payoffs of mortgage loans.

Equity in income of joint ventures decreased by approximately \$10.7 million, or 61.9%, due primarily to a decrease in our prorata share of gain on sale of real estate and earn outs on property sales from the 2005 Core Joint Venture and a decrease in our earn outs on property sales from the 2005 Development/Repositioning Joint Venture during the six months ended June 30, 2008 as compared to the six months ended June 30, 2007.

The income tax benefit (provision) (included in continuing operations, discontinued operations and gain on sale) decreased by \$21.1 million, or 95.4%, due primarily to a decrease in equity in income of joint ventures and gain on the sale of real estate within the TRS.

The following table summarizes certain information regarding the industrial properties included in our discontinued operations for the six months ended June 30, 2008 and June 30, 2007.

<b>Income from Discontinued Operations</b>	<b>\$ 130,235</b>	<b>\$ 97,262</b>

Income from discontinued operations, net of income taxes and minority interest, for the six months ended June 30, 2008 reflects the results of operations and gain on sale of real estate relating to 89 industrial properties that were sold during the six months ended June 30, 2008 and the results of operations of five properties that were identified as held for sale at June 30, 2008.

Income from discontinued operations, net of income taxes and minority interest, for the six months ended June 30, 2007 reflects the gain on sale of real estate relating to 84 industrial properties that were sold during the six months ended June 30, 2007 and reflects the results of operations of the 161 industrial properties that were sold during the year ended December 31, 2007, 89 industrial properties that were sold during the six months ended June 30, 2008, and five industrial properties identified as held for sale at June 30, 2008.

The \$12.0 million gain on sale of real estate for the six months ended June 30, 2008, resulted from the sale of one industrial property and several land parcels that do not meet the criteria established by SFAS 144 for inclusion in discontinued operations. The \$4.4 million gain on sale of real estate for the six months ended June 30, 2007, resulted from the sale of one industrial property and several land parcels that do not meet the criteria established by SFAS 144 for inclusion in discontinued operations.

#### **Comparison of Three Months Ended June 30, 2008 to Three Months Ended June 30, 2007**

Our net income available to common stockholders was \$41.3 million and \$29.7 million for the three months ended June 30, 2008 and 2007, respectively. Basic and diluted net income available to common stockholders were \$0.96 per share and \$0.67 per share for the three months ended June 30, 2008 and June 30, 2007, respectively.

The tables below summarize our revenues, property expenses and depreciation and other amortization by various categories for the three months ended June 30, 2008 and June 30, 2007. Same store properties are properties owned prior to January 1, 2007 and held as operating properties through June 30, 2008 and developments and redevelopments that were placed in service prior to January 1, 2007 or were substantially completed for 12 months prior to January 1, 2007. Properties are placed in service as they reach stabilized occupancy (generally defined as 90% occupied). Acquired properties are properties that were acquired subsequent to December 31, 2006 and held as operating properties through June 30, 2008. Sold properties are properties that were sold subsequent to December 31, 2006. (Re)Developments and land are land parcels and developments and redevelopments that were not a) substantially complete 12 months prior to January 1, 2007 or b) placed in service prior to January 1, 2007. Other expenses are derived from the operations of our maintenance company and other miscellaneous regional expenses.

Our future financial condition and results of operations, including rental revenues, may be impacted by the future acquisition and sale of properties. Our future revenues and expenses may vary materially from historical rates.

For the three months ended June 30, 2008 and 2007, the occupancy rates of our same store properties were 90.6% and 91.6%, respectively.

Revenues from same store properties remained relatively unchanged. Revenues from acquired properties increased \$8.5 million due to the 123 industrial properties acquired subsequent to December 31, 2006 totaling approximately 10.8 million square feet of GLA. Revenues from sold properties decreased \$17.0 million due to the 254 industrial properties sold subsequent to December 31, 2006 totaling approximately 21.3 million square feet of GLA. Revenues from (re)developments and land remained relatively unchanged. Other revenues decreased by approximately \$1.1 million due primarily to a decrease in fees earned from our Joint Ventures partially offset by an increase in fees earned related to us assigning our interest in certain purchase contracts to third parties for consideration. Construction revenues increased \$25.8 million primarily due to two development projects that commenced in September 2007 and April 2008 for which we are acting in the capacity of development manager.

Property expenses include real estate taxes, repairs and maintenance, property management, utilities, insurance, and other property related expenses. Property expenses from same store properties increased \$2.9 million due primarily to an increase in real estate tax expense, an increase in repairs and maintenance expense, and an increase in bad debt expense. Property expenses from acquired properties increased \$2.1 million due to properties acquired subsequent to December 31, 2006. Property expenses from sold properties decreased \$5.2 million due to properties sold subsequent to December 31, 2006. Property expenses from (re)developments and land remained relatively unchanged. The \$1.5 million decrease in other expense is primarily attributable to a decrease in the bad debt reserve and a loss recorded in connection with roof damage at a property that occurred during the three months ended June 30, 2007. The damage was accounted for as an involuntary conversion which requires the recognition of a loss in the period in which the damage occurred. Insurance reimbursements were deferred until realizable. Construction expenses increased \$25.4 million primarily due to two development projects that commenced in September 2007 and April 2008 for which we are acting in the capacity of development manager.

General and administrative expense remained relatively unchanged.

Total Depreciation and Other Amortization	\$ 45,385	\$ 34,635	\$ 10,750	31.0%

Depreciation and other amortization for same store properties remained relatively unchanged. Depreciation and other amortization from acquired properties increased \$10.6 million due to properties acquired subsequent to December 31, 2006 as well as \$7.0 million in accelerated depreciation and amortization taken during the six months ended June 30, 2008 attributable to one tenant in two buildings that we acquired in May 2007 who terminated their lease early. Depreciation and other amortization from sold properties decreased \$6.1 million due to properties sold subsequent to December 31, 2006. Depreciation and other amortization for (re)developments and land and other remained relatively unchanged.

Interest income increased approximately \$0.9 million, or 396.9%, due primarily to an increase in the average mortgage loans receivable outstanding during the three months ended June 30, 2008, as compared to the three months ended June 30, 2007.

Interest expense decreased approximately \$2.1 million, or 6.9%, primarily due to a decrease in the weighted average interest rate for the three months ended June 30, 2008 (5.85%), as compared to the three months ended June 30, 2007 (6.49%), and due to an increase in capitalized interest for the three months ended June 30, 2008 due to an increase in development activities partially offset by an increase in the weighted average debt balance outstanding for the three months ended June 30, 2008 (\$2,038.1 million), as compared to the three months ended June 30, 2007 (\$1,958.5 million).

Amortization of deferred financing costs remained relatively unchanged.

For the three months ended June 30, 2008, we recognized a \$1.5 million gain from early retirement of debt due to the partial repurchase of two series of our senior unsecured notes. For the three months ended June 30, 2007, we incurred a \$0.1 million loss from early retirement of debt due to early payoffs of mortgage loans.

Equity in income of joint ventures decreased by approximately \$8.4 million, or 71.9%, due primarily to a decrease in our prorata share of gain on sale of real estate and earn outs on property sales from the 2005 Core Joint Venture and a decrease in our earn outs on property sales from the 2005 Development/Repositioning Joint Venture during the three months ended June 30, 2008 as compared to the three months ended June 30, 2007.

The income tax benefit (provision) (included in continuing operations, discontinued operations and gain on sale) decreased by \$10.5 million, or 87.3%, due primarily to a decrease in equity in income of joint ventures and gain from the sale of real estate within the TRS.

The following table summarizes certain information regarding the industrial properties included in our discontinued operations for the three months ended June 30, 2008 and June 30, 2007.

	<b>Three Months Ended June 30, 2008</b>	<b>Three Months Ended June 30, 2007</b>

Income from Discontinued Operations	\$ 61,943	\$ 49,616

Income from discontinued operations, net of income taxes and minority interest, for the three months ended June 30, 2008 reflects the results of operations and gain on sale of real estate relating to 51 industrial properties that were sold during the three months ended June 30, 2008 and the results of operations of five properties that were identified as held for sale at June 30, 2008.

Income from discontinued operations, net of income taxes and minority interest, for the three months ended June 30, 2007 reflects the gain on sale of real estate relating to 49 industrial properties that were sold during the three months ended June 30, 2007 and reflects the results of operations of the 161 industrial properties that were sold during the year ended December 31, 2007, 89 industrial properties that were sold during the six months ended June 30, 2008 and five industrial properties identified as held for sale at June 30, 2008.

The \$4.3 million gain on sale of real estate for the three months ended June 30, 2008, resulted from the sale of one industrial property and several land parcels that do not meet the criteria established by SFAS 144 for inclusion in discontinued operations. The \$0.8 million gain on sale of real estate for the three months ended June 30, 2007, resulted from the sale of one industrial property and several land parcels that do not meet the criteria established by SFAS 144 for inclusion in discontinued operations.

## LIQUIDITY AND CAPITAL RESOURCES

At June 30, 2008, our cash and restricted cash was approximately \$14.4 and \$103.0 million, respectively. Restricted cash is primarily comprised of cash held in escrow in connection with mortgage debt requirements and gross proceeds from the sales of certain industrial properties. These sales proceeds will be disbursed as we exchange industrial properties under Section 1031 of the Code.

We have considered our short-term (one year or less) liquidity needs and the adequacy of our estimated cash flow from operations and other expected liquidity sources to meet these needs. Our 5.25% Notes due in 2009, in the aggregate principal amount of \$125 million are due on June 15, 2009 (the 2009 Notes). We expect to satisfy the payment obligations on the 2009 Notes with the issuance of additional debt, subject to market conditions, and have filed a registration statement with the Securities and Exchange Commission covering an indefinite number or amount of debt or equity securities to be issued up to April 30, 2010. With the exception of the 2009 Notes, we believe that our principal short-term liquidity needs are to fund normal recurring expenses, property acquisitions, developments, renovations, expansions and other nonrecurring capital improvements, debt service requirements and the minimum distribution required to maintain our REIT qualification under the Code. We anticipate that these needs will be met with cash flows provided by operating and investing activities, including the disposition of select assets.

We expect to meet long-term (greater than one year) liquidity requirements such as property acquisitions, developments, scheduled debt maturities, major renovations, expansions and other nonrecurring capital improvements through the disposition of select assets, long-term unsecured indebtedness and the issuance of additional equity securities.

We also may finance the development or acquisition of additional properties through borrowings under the Unsecured Line of Credit. At June 30, 2008, borrowings under the Unsecured Line of Credit bore interest at a weighted average interest rate of 3.09%. The Unsecured Line of Credit currently bears interest at a floating rate of LIBOR plus .475%, or the prime rate, at our election. As of July 25, 2008 we had approximately \$113.8 million available for additional borrowings under the Unsecured Line of Credit.

### **Six Months Ended June 30, 2008**

Net cash provided by operating activities of approximately \$33.7 million for the six months ended June 30, 2008 was comprised primarily of net income before minority interest of approximately \$112.8 million and net distributions from Joint Ventures of \$1.6, offset by adjustments for non-cash items of approximately \$67.9 million and the net change in operating assets and liabilities of approximately \$12.8 million. The adjustments for the non-cash items of approximately \$67.9 million are primarily comprised of the gain on sale of real estate of approximately \$155.9 million, the effect of the straight-lining of rental income of approximately \$3.9 million, and gain on early retirement of debt of approximately \$1.5 million, offset by depreciation and amortization of approximately \$91.7 million and the provision for bad debt of approximately \$1.7 million.

Net cash provided by investing activities of approximately \$46.3 million for the six months ended June 30, 2008 was comprised primarily of the net proceeds from the sale of real estate, the repayment of notes receivable, and distributions from our Joint Ventures, partially offset by the acquisition of real estate, development of real estate, capital expenditures related to the expansion and improvement of existing real estate, an increase in restricted cash that is held by an intermediary for Section 1031 exchange purposes, contributions to, and investments in, our Joint Ventures and funding of notes receivable.

During the six months ended June 30, 2008, we acquired 18 industrial properties comprising approximately 2.2 million square feet of GLA and several land parcels. The purchase price of these acquisitions totaled

approximately \$179.6 million, excluding costs incurred in conjunction with the acquisition of the industrial properties and land parcels.

We invested approximately \$10.9 million and received distributions of approximately \$11.2 million from our Joint Ventures. As of June 30, 2008, our industrial real estate Joint Ventures owned 115 industrial properties comprising approximately 19.9 million square feet of GLA.

During the six months ended June 30, 2008, we sold 90 industrial properties comprising approximately 7.6 million square feet of GLA and several land parcels. Net proceeds from the sales of the 90 industrial properties and several land parcels were approximately \$422.3 million.

Net cash used in financing activities of approximately \$71.3 million for the six months ended June 30, 2008 was derived primarily of common and preferred stock dividends and unit distributions, repayments of senior unsecured debt, the repurchase of restricted stock from our employees to pay for withholding taxes on the vesting of restricted stock, repayments on mortgage loans payable, and debt issuance costs, partially offset by net proceeds from our Unsecured Line of Credit, a book overdraft, and proceeds from the issuance of common stock.

During the six months ended June 30, 2008, certain of our employees exercised 6,300 non-qualified employee stock options. Net proceeds to us were approximately \$0.2 million.

### **Market Risk**

The following discussion about our risk-management activities includes forward-looking statements that involve risk and uncertainties. Actual results could differ materially from those projected in the forward-looking statements. Our business subjects us to market risk from interest rates, and to a much lesser extent, foreign currency fluctuations.

### **Interest Rate Risk**

In the normal course of business, we also face risks that are either non-financial or non-quantifiable. Such risks principally include credit risk and legal risk and are not represented in the following analysis.

At June 30, 2008, approximately \$1,656.4 million (approximately 84.4% of total debt at June 30, 2008) of our debt was fixed rate debt (including \$50.0 million of borrowings under the Unsecured Line of Credit in which the interest rate was fixed via an interest rate protection agreement) and approximately \$305.8 million (approximately 15.6% of total debt at June 30, 2008) was variable rate debt.

For fixed rate debt, changes in interest rates generally affect the fair value of the debt, but not our earnings or cash flows. Conversely, for variable rate debt, changes in the interest rate generally do not impact the fair value of the debt, but would affect our future earnings and cash flows. The interest rate risk and changes in fair market value of fixed rate debt generally do not have a significant impact on us until we are required to refinance such debt. See Note 4 to the consolidated financial statements for a discussion of the maturity dates of our various fixed rate debt.

Based upon the amount of variable rate debt outstanding at June 30, 2008, a 10% increase or decrease in the interest rate on our variable rate debt would decrease or increase, respectively, future net income and cash flows by approximately \$1.0 million per year.

The use of derivative financial instruments allows us to manage risks of increases in interest rates with respect to the effect these fluctuations would have on our earnings and cash flows. As of June 30, 2008, we had two outstanding interest rate protection agreements with an aggregate notional amount of \$119.5 million which fix the interest rate on a forecasted offering of debt, and one outstanding interest rate protection agreement with a notional amount of \$50.0 million which fixes the interest rate on borrowings on our Unsecured Line of Credit. See Note 11 to the June 30, 2008 Consolidated Financial Statements.

### **Foreign Currency Exchange Rate Risk**

Owning, operating, and developing industrial property outside of the United States exposes us to the possibility of volatile movements in foreign exchange rates. Changes in foreign currencies can affect the operating results of international operations reported in U.S. dollars and the value of the foreign assets reported in U.S. dollars. The economic impact of foreign exchange rate movements is complex because such changes are often linked to variability in real growth, inflation, interest rates, governmental actions and other factors. At June 30, 2008, we had only one property and one land parcel for which the U.S. dollar was not the functional currency. The property and land parcel are located in Ontario, Canada and use the Canadian dollar as their functional currency.

## **Recent Accounting Pronouncements**

Refer to Note 2 to the June 30, 2008 Consolidated Financial Statements.

## **Subsequent Events**

From July 1, 2008 to July 25, 2008, we acquired three industrial properties and one land parcel for a purchase price of approximately \$19.8 million, excluding costs incurred in conjunction with the acquisition of these industrial properties and one land parcel. In conjunction with the acquisition of two of these industrial properties, we assumed \$3.5 million in mortgage loans payable. There were no industrial properties sold during this period.

On July 1, 2008, we repurchased and retired \$5.0 million of the 2017 II Notes at a redemption price of 88.915% of par. In connection with the partial retirement, we recognized \$0.4 million as gain on early retirement of debt, which is the difference between the repurchase amount of \$4.4 million and the principal amount retired of \$5.0 million, net of the pro rata write off of the unamortized debt issue discount, the unamortized loan fees, and the unamortized settlement amount of the interest rate protection agreements related to the 2017 II Notes of \$0.01 million, \$0.05 million, and \$0.1 million, respectively.

On July 3, 2008 the mortgage note receivable that we originated related to a property sale in the first quarter 2008 in which we deferred \$2.5 million in gain (see Note 7) was paid off and retired.

On July 21, 2008, we paid a second quarter 2008 dividend/distribution of \$0.72 per common share/Unit, totaling approximately \$36.4 million.

## **Item 3. *Quantitative and Qualitative Disclosures About Market Risk***

Response to this item is included in Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations above.

## **Item 4. *Controls and Procedures***

Our principal executive officer and principal financial officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this report, based on the evaluation of these controls and procedures required by Exchange Act Rules 13a-15(b) or 15d-15(b), have concluded that as of the end of such period our disclosure controls and procedures were effective.

There has been no change in our internal control over financial reporting that occurred during the fiscal quarter covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
